AMPHIOXUS. FROG. MAN. FISH. CRAB.

PLATE I. GASTRULATION. (After Haeckel.)

Figs. 1 to 17 represent holoblastic eggs (with total cleavage); Figs. 18 to 30 show meroblastic eggs (with partial cleavage). The animal halves are colored gray, the vegetative halves red. The nutritive yolk is shaded vertically. All the figures show vertical meridian sections through the axis of the primitive intestine. In all, the letters indicate the same parts: *c*, the parent-cell (*cytula*); *f*, cleavage-cells (*segmentella*); *m*, the mulberry-germ (*morula*); *b*, the germ-vesicle (*blastula*); *g*, the cup-germ (*gastrula*); *s*, the cleavage-cavity: *d*, the primitive intestinal cavity; *o*, the primitive mouth; *n*, the nutritive yolk; *i*, the intestinal layer; *e*, the skin-layer.

Figs. 1–6.—Original or primordial egg-cleavage of the lowest vertebrate (*amphioxus*). Fig. 1, parent-cell (*cytula*); Fig. 2, cleavage-stage with 4 cleavage-cells; Fig. 3, mulberry-germ (*morula*); Fig. 4, germ-vesicle (*blastula*); Fig. 5, the same, in process of inversion (*invaginatio*); Fig. 6, bell-gastrula (*archigastrula*).

Figs. 7–11.—Unequal egg-cleavage of an amphibian (frog). Fig. 7, parent-cell (*cytula*); Fig. 8, cleavage-stage with 4 cleavage-cells; Fig. 9, mulberry-germ (*morula*); Fig. 10, germ-vesicle (*blastula*); Fig. 11, hood-gastrula (*amphigastrula*).

Figs. 12–17.—Unequal egg-cleavage of a mammal (man). Fig. 12, parent-cell (*cytula*); Fig. 13, cleavage-stage with 2 cleavage-cells (*e*, mother-cell of the exoderm; *i*, mother-cell of the entoderm); Fig. 14, cleavage-stage with 4 cleavage-cells; Fig. 15, beginning of the inversion of the germ-vesicle; Fig. 16, further advanced inversion; Fig. 17, hood-gastrula (*amphigastrula*).

Figs. 18–24.—Discoidal egg-cleavage of an osseous fish (*Motella ? Cottus ?*). The greater part of the nutritive yolk (*n*) is omitted. (Cf. Figs. 42, 43, pp. 217, 219, Haeckel's "Evolution of Man.") Fig. 18, parent-cell (*cytula*); Fig. 19, cleavage-stage with 2 cells; Fig. 20, cleavage-stage with 32 cells; Fig. 21, mulberry-germ (*morula*); Fig. 22, germ-vesicle (*blastula*); Fig. 23, the same, in process of inversion; Fig. 24, disc-gastrula (*discogastrula*).

Figs. 25–30.—Superficial egg-cleavage of a crab (*peneus*). Fig. 25, parent-cell (*cytula*); Fig. 26, cleavage-stage with 4 cells; Fig. 27, cleavage-stage with 32 cells; Fig. 28, mulberry-germ (*morula*), and at the same time the germ-vesicle (*blastula*); Fig. 29, bladder-g trula (*perigastrula*); Fig. 30, nauplius-germ; the pharynx-cavity has formed in front of the primitive mouth (*d*), owing to an inversion from without.

AN

ILLUSTRATED ENCYCLOPÆDIC

MEDICAL DICTIONARY.

BEING A DICTIONARY OF THE TECHNICAL TERMS

USED BY WRITERS ON

MEDICINE AND THE COLLATERAL SCIENCES,

IN THE

LATIN, ENGLISH, FRENCH, AND GERMAN LANGUAGES.

BY

FRANK P. FOSTER, M. D.,

EDITOR OF THE NEW YORK MEDICAL JOURNAL,

WITH THE COLLABORATION OF

WILLIAM C. AYRES, M. D., New Orleans.
EDWARD B. BRONSON, M. D., New York.
CHARLES STEDMAN BULL, M. D., New York.
HENRY C. COE, M. D., M. R. C. S., L. R. C. P., New York.
ANDREW F. CURRIER, M. D., New York.
ALEXANDER DUANE, M. D., New York.
SIMON H. GAGE, Ithaca, N. Y.
HENRY J. GARRIGUES, M. D., New York.
CHARLES B. KELSEY, M. D., New York.
RUSSELL H. NEVINS, M. D., New York.
BURT G. WILDER, M. D., Ithaca, N. Y.

Vol. I.

PREFACE.

The time was when almost all important medical writing was in Latin ; hence, the older medical dictionaries dealt for the most part with Latin terms only. But the science of the present age is recorded in no one language ; to learn it, one must at least read its exposition in English, French, and German. Each of these languages has its technical words, and words which acquire a special meaning in technical expressions, and it is only with difficulty, if at all, that their meaning can be made out from general dictionaries. This fact points to the need of a medical dictionary including the terms of the three languages mentioned, as well as those of Latin or Greek origin or form. The want seems to have been recognized by Littré and Robin, as is shown by the brief Greek, Latin, German, English, Italian, and Spanish vocabularies appended to their revision of Nysten's "Dictionnaire de médecine." It was more fully, but still insufficiently, met in Palmer's "Pentaglot Dictionary." A comprehensive medical dictionary giving adequate attention to English, French, and German terms in the same vocabulary has not hitherto been produced. To make such a dictionary, and at the same time one founded as far as possible on independent reading, was the leading idea on which the present work was undertaken. When the first hundred pages had been completed, a few copies were printed and submitted to the judgment of a number of representative American physicians, with the request that they should examine the pages and acquaint the author with any criticisms that might occur to them. Replies were received from nearly all those gentlemen, and the burden of them was that both the plan and its execution were acceptable.

Early in the year 1881 I began the preparation of this work. It soon became apparent, however, that the need of a comprehensive dictionary of medical terms was urgently felt, and it was therefore decided to hasten the completion of this one so far as it could be accomplished by dividing the preliminary work among a corps of collaborators. The list given on the title-page includes the names of those gentlemen who kindly consented to take part in the work. Most of them worked during the two years 1883 and 1884, under instructions to draw their definitions from systematic courses of reading in their several departments, and to consult other dictionaries only as a final step, if at all. The instructions issued to them contained the following passage : "As regards definitions —the most important point in a work of this sort—it should be borne in mind not only that the etymological signification of a word is to be elucidated, but that the reader must be enabled to form a satisfactory idea of the *thing* the word represents. The definition should apply to that thing, and to nothing else. Definitions must not be taken *verbatim* from books ; let the contributor read books to assure himself of the meanings that various authors attach to words, but let him express those meanings in his own terms. Least of all should other dictionaries be followed. Dictionaries may be used—indeed, they must be—but only as testimony from any other source is to be used, not as conclusive, but as worthy of attention." It is believed that these instructions were faithfully carried out by the collaborators, and it is certain that the matter which they furnished was prepared by them almost wholly on the basis of their independent courses of reading. It is only just to these

gentlemen that the precise share which each of them has taken in the preparation of the work should be indicated as specifically as practicable.

Dr. Ayres was originally charged with the whole subject of anatomy, including histology. On account of the magnitude of the work in these departments, together with its great practical importance, it was soon thought best to relieve him of histology altogether, as well as of the anatomy of the central nervous system. Soon after entering upon the work, he changed his residence to New Orleans, and a large part of his contributions, in the shape of a package of manuscript, was destroyed by fire while on its way from New Orleans to New York. A great portion of the work in anatomy had, therefore, to be done over again, and it devolved upon another collaborator, as will be explained farther on.

Professor Bronson undertook the departments of cutaneous and venereal diseases, including the special anatomy and physiology of the skin and the genito-urinary organs.

Dr. Bull took charge of the anatomy, physiology, and pathology of the organs of sight and hearing.

Dr. Coe dealt with the greater part of general physiology and with the anatomy of the central nervous system.

Dr. Currier was charged with general pathology (non-surgical) and with the theory and practice of medicine. In addition to this share in the preliminary work, he also spent a year in assisting in the final revision.

Dr. Duane undertook the subjects of chemistry, botany, zoology (in part), and pharmacology (in part). Besides the enormous labor involved in his treatment of these branches, his continued assistance in the final revision has placed the author under a debt of gratitude which it is impossible to express in words. His original work in the branches mentioned was so comprehensive and exact that it scarcely needed editorial revision. In the final preparation of the manuscript for the entire work, Dr. Duane kindly undertook everything relating to the Oriental languages, and throughout he has materially assisted in the laborious work of proof-reading.

Professor Gage worked in the departments of histology and the physiology of digestion, respiration, and circulation. He also did a portion of the work in embryology.

Dr. Garrigues's part in the work was of brief duration, from the fact that the state of his health at the time made it advisable for him to give up all literary labor for a considerable period. The work which he did related chiefly to the writings of ancient and medieval authors.

Dr. Kelsey's work was in the department of surgery, including all the special branches not otherwise provided for.

Dr. Nevins dealt with zoology, general anatomy, comparative anatomy, anthropology, and pharmacology (in part). He also rendered valuable assistance in the final revision and in the proof-reading.

Professor Wilder furnished lists of the terms used by writers on the anatomy of the central nervous system, with bibliographical references. These lists were referred to Dr. Coe, who supplied most of the definitions of the terms they contained, only a few having been contributed by Professor Wilder himself.

Besides the work of these collaborators, assistance in the revision was rendered for a few months by Dr. H. N. Vineberg.

In addition to the general planning of the work, as well as the editorial revision, the author took charge of the departments of embryology, obstetrics, and gynæcology.

Each collaborator is credited with his own contributions by means of a letter inclosed in brackets: [A] means the author; [B], Dr. Duane; [C], Dr. Ayres; [D], Dr. Currier; [E], Dr. Kelsey; [F], Dr. Bull; [G], Dr. Bronson; [H], Dr. Garrigues; [I], Dr. Wilder; [J], Mr. Gage;

[K], Dr. Coe; [L], Dr. Nevins; and [M], Dr. Vineberg. Where any one of these letters is followed by one or more numerals (also inclosed in the brackets), the combined expression refers to the work or works consulted in the preparation of the article. Lists of all such works will be given at the end of the dictionary.

A reference to any book means simply that it has been consulted, and not that the definition given is to be considered as resting on its authority. Indeed, in many instances the insertion of these reference numerals has been made more for the purpose of serving as a sort of index to medical literature than because it was felt that authority was required for the definitions given. In many cases the definitions here given are quite at variance with the statements of the authors referred to. In like manner, the insertion of any collaborator's letter in an article means only that that gentleman has taken part in preparing the data on which the article is founded, and not that he is in any way responsible for either the definition or anything else contained in the article. While I fully appreciate the character of the work done by the collaborators, it is proper to state that I have not hesitated in any instance to recast it in accordance with my own judgment; I alone, therefore, am responsible for whatever is to be found in the book. In references to variorum works, wherever it was practicable, the name of the author of the article has been given, followed by a letter and numeral in parenthesis-marks indicating the work in which the article occurs. In references to periodicals, the abbreviated title of the periodical is given, followed by a letter in parenthesis-marks indicating which collaborator it was that made use of the article referred to; where no such letter is inserted, the article may be understood to have been examined by myself. Where page numbers are given in references to periodicals, it is to be understood that, except as regards abstracts, the page on which the article begins (or, in the case of continued articles, that on which the portion in the particular number referred to begins) is the one meant, and not the page on which the word occurs. The great number of such references, and the recent date of most of the articles referred to, constitute, it is thought, a specially valuable feature of the work.

In the preparation of a few of the articles, material assistance has been given by a number of gentlemen not belonging to the corps of collaborators. Their contributions are designated by Greek letters followed by numerals in brackets, and a list of their names will be given at the close of the work.

The vocabulary is intended to include all strictly medical terms that have become current at any period in our medical literature, and a few have been given that can not be said to have gained currency—the latter being inserted, in most instances, on account of their having been used by well-known writers. A few terms that are to be found in some other medical dictionaries have been omitted purposely, either on account of their seeming to have nothing to do with medicine, or because of their meaning being so obscure as not to admit of definitions precise enough to be of discernible value; and a few have been inserted that properly do not belong in a medical dictionary, for the reason that in other works of the sort they have been incorrectly defined. But it has not been thought best to omit any words merely on account of their being obsolete, partly because many such words throw more or less light on the origin and primitive meaning of terms still in common use, but mainly because it can hardly be said of any word now considered obsolete that it will not shortly come into vogue again. The following illustrations of this uncertainty may be mentioned: In Hooper's edition of Quincy's "Medical Dictionary," published in 1802, obsolete words were excluded from the major vocabulary, but were given in a separate list at the end of the volume. That list contains the word *acne*, a term with which the dermatological writers of the present day could hardly dispense. Another pointed instance of the revival of a term that had long ago fallen into disuse is that of *sal alembroth*, the compound anciently denoted by that name having been very recently brought into use as an antiseptic (and under that name) by Sir Joseph Lister.

Moreover, many words that but a short time since would have been pronounced obsolete by almost any person versed in modern English medical literature are coming to be current among us, largely in consequence of the increasing extent to which we read the writings of the Germans, who have either long used them or lately revived them. For example, the word *struma*, which but a few years since was commonly understood by us as meaning scrofula and nothing else, is now frequently employed by writers in our own language as a synonym of *goître*, in which sense it has long been in use among the Germans. It is evident, therefore, that the assumption that a word has been consigned to oblivion is a very unsafe ground on which to omit it from a work of this character.

In contemporary medical literature we constantly meet with words that belong to the technical language employed by writers on physics, chemistry, botany, and zoology ; and, within reasonable limits, it seems desirable that they should be explained in a medical dictionary. These limits necessarily vary with the different sciences. As regards physics, the terms given in this work include for the most part only those that have a direct medical bearing or are used in accounts of processes of investigation subsidiary to medical science, particularly those of electro-physics, optics, acoustics, and the like.

Chemical terms have been included with fewer exceptions than those of the other sciences in question. An illustration of the wisdom of this course is to be found in the recent importance assumed by acetanilide ("antifebrine") in medical literature, although it was before of interest only to chemists. Books on chemistry do not always contain definitions of the technical terms to be found in them, and the same may be said of works on pharmacy and the materia medica. Consequently, and in view of the additions constantly being made to the materia medica from the list of substances before known to few but the chemists, it has been thought best to give, besides the descriptive terms, a great number of the names of such substances, but it has not been considered necessary to mention every known derivative of the various bases and acids. The commercial names of drugs are also given, as well as the native names of medicinal substances that are brought to market from various quarters of the world.

The chemical notation followed has been devised by Dr. Duane on a plan calculated to express structural peculiarities without an unwarrantable expenditure of space. It is explained by Dr. Duane as follows :

"In indicating the structural composition of the aromatic compounds, the following notation is used: Benzene,

```
HC - CH
HC    CH
HC = CH
```

is denoted by C_6(H,H,H,H,H,H,). Any substitution compound of benzene is denoted by writing the replacing radicle in place of the hydrogen. Thus, phenol,

```
HC - CH
HC    C(OH)
HC = CH
```

pyrocatechin (orthodioxybenzene),

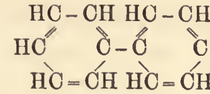
```
HC - CH
HC    C(OH)
HC = C(OH)
```

resorcin (metadioxybenzene),

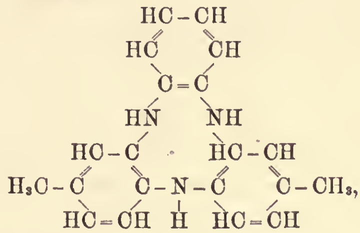
```
HC - CH
HC    C(OH)
(OH)C = CH
```

and hydroquinone (paradioxybenzene),

```
HC - CH
(OH)C    C(OH)
HC = CH
```



are written respectively C_6(H,H,OH,H,H,H,), C_6(H,H,OH,OH,H,H,), C_6(H,H,OH,H,OH,H,), and C_6(H,H,OH,H,H,OH,). If the replacing radicles are interconnected, as in quinone,

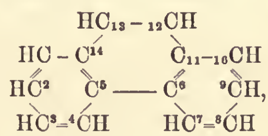


```
HC - CH
HC    C - O
HC = C - O
```

this is indicated by a brace connecting the symbols of the two radicles, thus: C_6(H,H,O,O,H,H,). The absence of a radicle is denoted by a dash, as in phenyl,

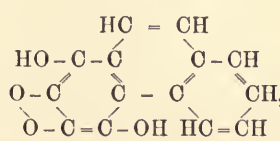
```
HC - CH
HC    C —
HC = CH
```

written C_6(H,H, —,H,H,H,). Conjugated



benzene compounds are represented in like manner. Thus, diphenyl,  is written C_6(H,H,—,H,H,H,) C_6(—,H,H,H,H,H,), the brace connecting the two dashes denoting the bond uniting the two carbon atoms with which no radicle is connected. It may also, although less properly, be written C_6(H,H,C_6[—,H,H,H,H,H,],H,H,H,), the second phenyl molecule being considered as a radicle replacing hydrogen in a benzene molecule. So also rosaniline,

may be written C_6(H,H,H,H,NH C_6[—,H,CH_3,H,H,H], NH C_6[—,—,H,H,CH_3,H,],), or, better,



C_6(H,H,H,H,NH,—,) C_6(—,H,CH_3,H,H,NH,) C_6(—,NH,H,CH_3,H,H,).

Compounds containing condensed benzene nuclei are written as if composed of a single closed carbon chain, the brace being used to indicate interconnected carbon atoms. Thus, anthracene,

is written C_{14}(H,H,H,H,—,—,H,H,H,H,—,H,H,—,), the formula in this case being considered as a single closed chain, and the carbon atoms being enumerated in the order indicated by the numerals appended to them.

"The foregoing formulæ may be still further abbreviated by writing, instead of a number of adjacent H's separated by commas, a single H with a subscript numeral. Thus, benzene becomes $C_6(H_6)$; pyrocatechin, $C_6(H_2$,OH,OH,H_2,); resorcin, $C_6(H_2$,OH,H,OH,H,), or $C_6(H_3$,OH,H,OH,); hydroquinone, $C_6(H_2$,OH,H_2,OH,); rosaniline, $C_6(H_4$,NH,—,) C_6(—,H,CH_3,H_2,NH,) C^6(—,NH,H,CH_3,H_2,); and alizarin,

becomes C_{14}(OH,O,O,OH,—,—,H_4,—,H_2,—,). In these formulæ it matters not how the members within the parenthesis are shifted, so long as the order remains the same, since it makes no difference which carbon atom of the closed benzene chain is considered the first. Thus, resorcin may be written either C_6(H,H,OH,H,OH,H,), or C_6(H,H,H,OH,H,OH,), or C_6(OH,H,H,H,OH,H,), or C_6(H,OH,H,OH,H,H,)."

The mineralogical terms found in medical literature are almost limited to the native forms of certain mineral drugs and to those used in descriptive crystallography; and, with few exceptions, these are all of them that it has been thought well to mention.

In botany the plan has been to include, along with descriptive terms, all classification names ranking above those of genera, but only those of genera and species that have, or have been supposed to have, medicinal, nutritive, or poisonous properties, or belong to the pathogenetic micro-organisms, although in some instances allied plants are mentioned briefly. The popular and the commercial names of plants and vegetable drugs, in English, French, and German, have also been included, as well as the native names of plants that are brought from countries where other languages are spoken.

In zoology the same plan has been followed as in botany. As the animal kingdom contributes but little to the materia medica, the list of names of genera and species given is naturally very brief. In regard to the animal parasites, with few exceptions, only those are mentioned that are parasitic in man or the domesticated animals. As to botanical and zoological classification-names, it has been thought desirable that the definitions should be given under those that are preferred by systematic writers, with cross-references from the synonymous names; but authors' preferences vary from time to time, and consequently it will be found in some instances that a name which, at the time the definition was made, seemed to be the one generally preferred has been more or less supplanted by another. The system of cross-references, however, will readily enable the reader to turn from the one to the other.

Not only pure Latin words, but also Latinized forms of Greek words, as well as words adopted unchanged from the Greek into the Latin, together with many words of modern formation but with Latin terminations and forms of inflection, have been given as Latin words. This has been done rather as a matter of convenience (as will be explained when the subject of pronunciation is referred to) than from forgetfulness of the fact that many of them might quite as properly be called English, French, German, Italian, or Spanish by adoption. Some Latin words are omitted from the major list, because they are given as equivalents under English or other headings that are almost identical. This has been done for the sake of saving space.

Regularly formed genitives of Latin nouns of the first and second declensions have not been given as a rule, but those of nouns of the other declensions, especially those involving augmentation, are generally given. In the case of Latinized Greek nouns (here treated as Latin), the Greek form of the genitive is first given, followed by the pure Latin form. For example, the genitive of *basis* is given: *baseos* (*-sis*). The first form is considered preferable in most instances, not from the notion that the Romans necessarily gave up their own forms of inflection in the case of words actually adopted by them from the Greek, but because the great majority of the words in question were not so adopted, but were looked upon by the old medical writers as still Greek, and by many of them written in Greek letters. The second form of the genitive is given because it is found in literature. Latin plurals are not given unless they are decidedly irregular, for they are readily formed from the genitives.

In giving the derivation of words, the endeavor has been made to take up as little space as was consistent with clearness. With this object in view, where a number of words of substantially the same origin follow each other in regular sequence, the derivation has often been given only under one of them, and frequent reference is made (by means of syllables printed in italics, followed by the sign *) to a *Table of Initial and Terminal Parts of Words*, to be printed at the close of the book, which renders a great saving of space possible, and will, it is thought, give the student a clearer idea than could well be conveyed otherwise of the prevailing systems of scientific word-building. Liddell and Scott's and Donnegan's Greek lexicons, Sophocles's lexicon of Byzantine Greek, and Leverett's and Lewis and Short's edition of Andrews's Freund's Latin lexicon have for the most part been referred to for the orthography, derivation, and meaning of the Greek and Latin words that are given in indicating the etymology of the terms that constitute headings in this work.

The major list includes some words belonging to the Italian, Spanish, Portuguese, or other languages of Europe or to those of Asia, Africa, Central America, South America, or Australasia. They are such as are occasionally met with in medical writings in English, French, or German, being mainly the names of drugs, pharmaceutical preparations, medicinal plants, or mineral springs.

In the arrangement of the subheadings, this work differs somewhat from most dictionaries.

A majority of the compound expressions consist of an adjective and a noun, and most dictionaries arrange them under the adjective. In this one they are usually given under the noun, that being generally the fundamental word. An analogous principle is observed when the title consists of two or more nouns, the definition being given under that noun which is considered the fundamental one, the other nouns being regarded as modifying or adjective expressions; for example, *balm-of-Gilead fir* is defined under Fir. In the case of certain chemical expressions containing such words as Acid, Alcohol, Aldehyde, etc., this rule is reversed, the definition being placed under the adjective, as the contrary course would have led to articles of inconvenient length. When both of two words constituting a title are equally significant, the definition will generally be found under the first of them, and in doubtful cases the title is entered under both names, a cross-reference being given from one to the other. The names of salts are arranged under those of the bases. In compound anatomical expressions, the definition is placed under the first noun; for example, *neck of the femur* is defined under Neck, and not under Femur. Such expressions as *Addison's disease*, *Emmet's operation*, etc., will be found under Disease, Operation, etc., and, in general, proper names are not given as primary headings. The names of pharmaceutical preparations are to be looked for according to the following rule: A title that contains the name of one or more drugs will be found under the name of the drug, or, in case more than one such name figures in the title, under the one that occurs first; a title that does not contain the name of a drug will be found under the title common to similar preparations. For example, *liquor ammonii carbonatis* is defined under Ammonium, but *aqua anhaltina* is defined under Aqua. The same rule applies to products of plants and to parts of plants, regarded as drugs; hence, *radix aconiti* is defined under Aconitum, and *oil of rosemary* under Rosemary. Names of drugs that are natural products (in the sense of not being made according to a formula) are to be looked for under their English titles; for example, *iron sulphate* will be found under Iron, with a cross-reference from Ferri *sulphas*. But formal preparations made from such natural products are defined under their Latin titles, if such there are; otherwise, under the official or the most customary titles in the language in which they occur; thus, *tincture of chloride of iron* is defined under *Tinctura* ferri *chloridi*. But the preparations of the French Codex are usually given under the French titles, even if a Latin synonym exists, inasmuch as such Latin titles as occur in the Codex are always employed as synonyms, and are never regarded as the principal titles; hence, *asparagus juice* is defined under *Suc de pointe d'*asperge, and not under *Succus* asparagi. Those French preparations, however, which closely resemble preparations given under Latin titles in other pharmacopœias are defined under the titles of such analogous preparations; thus, the *Bain dit de Barèges* of the French Codex is defined under Balneum *baretginense* [Belg. Ph.]. In general, when any preparation is comparable with one that is official in the United States Pharmacopœia, it is defined under the Latin title there given; otherwise, under the corresponding title in the British Pharmacopœia, or, if that gives no analogous preparation, under the corresponding title of the German Pharmacopœia. In references to the different pharmacopœias, when no date is given, the latest edition is usually meant, but in a few instances such editions were not accessible at the time of printing. In all headings and subheadings, a strictly alphabetical order is followed, every word in the title being regarded as determining this order; the only exception is in the case of nouns in the plural, which are arranged in the subheadings in the same order as if they were in the singular. A cross-reference printed in italics always refers to a heading in the same article; one containing a word printed in small capitals refers to the article on that word (or the word of which it is the plural or an oblique case). The direction "See the major list" denotes that the subheading will be found defined in its proper place as a major heading.

What is said concerning the derivation and signification of English words rests largely on the authority of Dr. Noah Webster. In the spelling of such words, the predominant usage among American authors has been followed for the most part. For example:

For variable nouns in -our, see the equivalent forms in -or.
" " verbs " -ise, " " " " " -ize.
" " nouns " -isation, " " " " " -ization.
" " " " -er, " " " " " -re.

The present tendency to omit the hyphen from compound words has been followed strictly in the case of names of chemical compounds, but in other cases some variation has been made; in general, the hyphen has been retained where it came between two vowels (as in *intra-ocular*), but omitted from other words of like construction (as in *intraperitoneal*). The Latin diphthongs have generally been preserved in English nouns (English, that is, in form), but not so generally in the corresponding adjectives (*e. g.*, *perinæorrhaphy*, but *perineal*). In some such adjectives, however (such as *fœtal*, *fæcal*, etc.), the diphthong has been retained. *Fœtus* has been preferred to *fetus*, not as being required by the etymology, but as being established by long usage. In general, regard has been paid to etymology in giving the preference to one of two or more ways of spelling a word, but it has not been thought best to insist upon radical deviations from widely prevalent usage. For example, *aneurysm* has been preferred to *aneurism*, *thyreoid* to *thyroid*, and *lacrymation* to *lachrymation*. In the case of the latter word, there is good precedent for *lacrimation*, but there seems to be some doubt whether the Latin *lacrima* was a changed form of δάκρυμα, or was of common origin with the latter. In the case of such words as *silvestris* (here preferred to *sylvestris*) there is little room for doubt on that point, and the preference has been given accordingly. In like manner, *Sylvian* and *sylvius* would have been made to give way to *Silvian* and *silvius* but for the consideration that it was desirable to retain the primitive form of Latinization of proper names and their derivatives, however faulty it might be.

Latin words derived from Greek words beginning with ῥ will be found spelled with *rh* instead of *r* (*e. g.*, *rhachitis*, not *rachitis*). So, too, in such compounds as *hydrorrhachis* (preferred to *hydrorhachis*) the plain and unequivocal rule of the Greek language has been followed, namely, that, where a prefix ending in a short syllable is united to a word beginning with ῥ, the ῥ must be preceded by ῤ. The Latin rendering of the Greek ει was various with the ancients, who sometimes employed *ei*, but more commonly *i*. The former seems preferable, both as indicating the origin and as conducing to the proper pronunciation, but this consideration has not been held to be of sufficient moment to warrant any decided departure from prevalent methods. Where, however, the forms in *ei* and in *i* have each seemed to be well supported, the preference has been given to the former, notably in the derivatives of ἀγγεῖον. In the spelling of French words, the improved forms employed by a few recent writers, especially the late M. Robin, have been adopted. In German words spelled indifferently with *c* or *k*, the former has generally been preferred. The recent tendency to change *th* to *t* (*e. g.*, to write *Weichteile* instead of *Weichtheile*) it has not been thought best to follow. In Spanish words, the system of accentuation employed in the last edition of the Spanish Academy's "Diccionario de la Lengua Castellana" has been adhered to as far as it could be ascertained to apply.

To indicate the pronunciation, the scheme printed at the foot of the pages has been devised rather for its simplicity and ready intelligibility than for its capacity to show nice shades of pronunciation. Many of the latter can be manifested only with the voice, and an attempt to teach them by means of a printed key would necessarily fail. The chief purpose of the plan adopted

is to so guide those who have already acquired some knowledge of the language concerned as to enable them to take advantage of it, but it is thought that it will also enable others to pronounce in such a manner as to answer all ordinary requirements. Where a word is pronounced in more than one way, both the recognized pronunciations are given, usually, however, only the variable syllables being repeated. To repeat the pronunciation in full would have sacrificed considerable space, and added unwarrantably to the bulk of the book. For the same reason, the pronunciation of subheadings has not been given, but that of the technical words embodied in them will be found under those words as major headings. The pronunciation of Latin words is given according to both the English and the Roman method, the Continental method being ignored—not because it is considered less reasonable than the English, but because this dictionary is designed chiefly for the use of persons who commonly speak the English language, by whom many of the commoner Latin words have ceased to be considered as foreign, and, except when combined with other Latin words or inflected according to Latin forms, are treated as English by adoption. The Roman method, strange as it may seem to those who are unaccustomed to it, and who now see it for the first time in a medical dictionary, is the one now taught in the leading universities of this country, and it will doubtless be adopted everywhere within a very few years. In this work it is indicated in the syllables inclosed in parenthesis-marks. In some instances (like that of the word *hydrocele*) it has been necessary to give three pronunciations—the word being really Latin (or Latinized Greek), and so calling for the two forms of Latin pronunciation, but also so thoroughly adopted into English as in common use to have come to be pronounced as if it had a distinct English form. Latin words made from modern proper names (chiefly botanical and zoological classification-names) have been treated in such a way as to give to that part of the word representing the proper name the pronunciation that the name would have if standing alone, and to the terminal portion the pronunciation that an ordinary Latin word of like formation would have (*e. g.*, *Ammannia*, pronounced only $A^{3}m$-$ma^{3}n'ni^{2}$-a^{3}, and not, as in an ordinary word, by the English method also, $A^{2}m$-$ma^{2}n'ni^{2}$-a^{3}). It has not been thought best to attempt to indicate the pronunciation of other words than those belonging to the Latin, English, French, German, Italian, Spanish, or Portuguese language.

In the transliteration of Arabic words, the following scheme, devised by Dr. Duane, has been followed :

Unconnected.	Terminal.	Medial.	Initial.		Unconnected.	Terminal.	Medial.	Initial.		Unconnected.	Terminal.	Medial.	Initial.	
ا	ـا	—	—	*a, e, i, o, u* (initial); *â* (medial).	ز	ـز	—	—	*z*	ق	ـق	ـقـ	قـ	*q*
ب	ـب	ـبـ	بـ	*b*	س	ـس	ـسـ	سـ	*s*	ك	ـك	ـكـ	كـ	*k*
ت	ـت	ـتـ	تـ	*t*	ش	ـش	ـشـ	شـ	*sh*	ڭ	ـڭ	ـڭـ	ڭـ	*ng* (Malay, Turkish).
ث	ـث	ـثـ	ثـ	*th* (in Persian, *s̲*).	ص	ـص	ـصـ	صـ	*ç*	ل	ـل	ـلـ	لـ	*l*
ج	ـج	ـجـ	جـ	*j*	ض	ـض	ـضـ	ضـ	*dz*	م	ـم	ـمـ	مـ	*m*
ح	ـح	ـحـ	حـ	*c*	ط	ـط	ـطـ	طـ	*t*	ن	ـن	ـنـ	نـ	*n*
خ	ـخ	ـخـ	خـ	*kh*	ظ	ـظ	ـظـ	ظـ	*dh*	و	ـو	—	—	*u, w* (initial); *û, w* (medial).
د	ـد	—	—	*d*	ع	ـع	ـعـ	عـ	*O*	ه	ـه ـة	ـهـ	هـ	*h*
ذ	ـذ	—	—	*th'*	غ	ـغ	ـغـ	غـ	*gh*	ى	ـى	ـيـ	يـ	*i, y*
ر	ـر	—	—	*r*	ف	ـف	ـفـ	فـ	*f*					

In the selection of the pictorial illustrations, those have been chosen which were thought most suitable rather than those which were pretty to look upon. Wherever it was practicable, the permission of authors or publishers has been asked for to make use of cuts taken from their works. It is right that the liberality with which such permission has been granted should be recognized; in particular, the author is indebted to Messrs. J. U. and C. G. Lloyd, of Cincinnati, for liberty to make use of the excellent drawings given in their work entitled "Drugs and Medicines of North America."

It is proper that due acknowledgment should be made of the extent to which references to medical literature have been facilitated by the use of the "Index-Catalogue of the Library of the Surgeon-General's Office," and of the privileges which have been accorded to several of the collaborators at the Astor Library, the Library of the New York Hospital, and the Library of the New York Academy of Medicine.

The value of a dictionary seems to me to depend upon its accuracy, the convenience of its arrangement, and its comprehensiveness; and in the preparation of this work those qualities have been esteemed in the order in which they are here enumerated. It is hoped that the work will commend itself to the medical profession.

Frank P. Foster.

FOSTER'S MEDICAL DICTIONARY.

C E Reed M.D. 1894.

A

A. For the force of this letter as an abbreviation and in composition, see the "List of Abbreviations" and the "Table of Initial and Terminal Parts of Words."

AABACH (Ger.), n. Written also *Abach*. Pr. a^3'ba^{3}ch^2. A Bavarian spring containing calcium carbonate and sodium chloride and sulphate.

AABAM (Ar.), n. An alchemical name for lead. [A, 306.]

AABEC, n. The bark of an Australian bush, said to have diaphoretic properties. [N. K. Morton, "Med. and Surg. Reporter," May 29, 1875, p. 425.]

AACHEN (Ger.), n. Pr. a^{3}ch^2'e^{2}n. Fr., *Aix-la-Chapelle*. The Aquisgranum of the ancient Romans; a town in Rhenish Prussia containing a number of sulphurous springs of the temperature of 131° F. According to von Liebig, 10,000 parts of the water of the Kaiserquelle, the richest in sulphur, contain:

Sodium chloride	26·161
Sodium bromide	·036
Sodium iodide	·005
Sodium sulphide	·095
Sodium sulphate	2·836
Potassium sulphate	1·527
Sodium carbonate	6·449
Lithium carbonate	·049
Magnesium carbonate	·506
Calcium carbonate	1·579
Strontium carbonate	·002
Ferrous carbonate	·095
Silicic acid	·661
Organic matter	·769
Carbon dioxide, free or partly free	5·000

It contains also traces of fluorine, boron, arsenic, and probably allyl. The waters are drank and used as baths, chiefly for chronic catarrhs, biliary congestion, hæmorrhoids, skin diseases, rheumatism, gout, and syphilis. [A, 308, 319, 327.]

AAEZ, n. Pr. a^3-e^{2}s'. A hot sulphurous spring in Portugal. [A, 321.]

AAL, n. Pr. a^{3}l. 1. A terebinthaceous tree, indigenous to the Moluccas. The bark is aromatic, and has been used as a condiment. [B, 38.] 2. A red dye obtained from the root of the *Morinda citrifolia*, a tree growing in Central India. [B, 37.]

AALBAUM (Ger.), n. Written also *Ahlbaum*. Pr. a^{3}l'ba^3-um. See Lonicera *xylosteum*.

AALBEERE (Ger.), n. Written also *Ahlbeere*. Pr. a^{3}l'ba-re^2. A common term for various species of the genus *Ribes*, also for the *Rhamnus frangula* and the *Prunus padus* (*q. v.*). [B.]

AALBEERSTRAUCH (Ger.), n. Pr. a^{3}l'bar-stra^3-uch^2. The black-currant bush. See Ribes *rubrum*. [A, 315.]

AALBESING (Ger.), n. Pr. a^{3}l'ba-zi^{2}ng. See Aalbeere.

AALCLIM, n. Written also *aalklim*. An East Indian species of *Bauhinia*. [B.]

AALKIRSCHE (Ger.), n. Pr. a^{3}l'ki^{2}rsh-e^2. The black wild service-berry. [A, 315.] The term is applied also to various other plants. See Heckenkirsche, Vogelbeere, and Elsebeere. [A, 305.]

AALKLIM, n. See Aalclim.

AALSHORN (Ger.), n. Pr. a^{3}ls'ho^{2}rn. A term applied to various species of elder. See Sambucus.—**A'baum.** The elder-tree.

AANDE, n. Pr. a^{3}nd. Written also *aand*, *and*, *ande*, *aind*, *aynd*, and *end*. A.-S., *anda*. Old Norse, *andi*. A popular term for breath, generally obsolete, but said to be still in use in Scotland and the North of England. [J, 50.]

AANS, n. A Hindu term for the *Terminalia alata*. [A, 328.]

AARBEERE (Ger.), n. Pr. a^{3}r'ba-re^2. The *Cratægus torminalis*. [B.]

AARBLEICHERT (Ger.), n. Pr. a^{3}r'bli-ch^{2}e^{2}rt. See Ahrbleichert.

AARGHEES, n. A corruption of *aargis*, an Arabic name for the barberry-bush. [A, 322.]

AARKIRSCHE (Ger.), n. Pr. a^{3}r'ki^{2}rsh-e^2. The alder.

AARON, AARONSSTAB, AARONSWURZEL (Ger.), n's. Pr. a^{3}r'o^{2}n, -s-sta^{3}b, -s-vurt-ze^{2}l. See Arum.

AARWEIN (Ger.), n. Pr. a^{3}r'vin. See Ahrwein.

AARZIHLEBAD (Ger.), n. Pr. a^{3}rt'ze-le^2-ba^{3}d. A warm alkaline spring in the Canton of Berne, Switzerland, containing traces of free carbon dioxide and sulphur compounds. [A, 305.]

AARZIHLE (Ger.), n. Pr. a^{3}rt'ze-le^2. See Aarzihlebad.

AAS, n. Pr. a^{3}z. A commune in the Lower Pyrenees, containing the springs that furnish the *eaux-bonnes*. [A, 321.]

AAS (Ger.), n. Pr. a^{3}s. A carcass.—**A'blatter.** Malignant pustule. [E.]—**A'blume.** The carrion-flower. See Stapelia *hirsuta*.—**A'fliege.** The carrion-fly. See Musca *cadaverina*. [B.]—**A'geruch, A'gestank.** A cadaveric odor.—**A'haft.** Cadaveric.—**A'pflanze.** See A'blume.—**A'pocke.** 1. Malignant pustule. 2. The sheep-pox. [A, 315.]

AASMUS (Lat.), n. m. Pr. a^{3}z'mu^{3}s, a^{3}s'mus. Gr., ἀασμός, the act of breathing. An old term for asthma. [E.]

ABABANGAY, n. A term applied in the Philippine Islands to the *Calosanthes indica*. [A, 321.]

ABABIL, n. According to Kraus, a Persian term for certain birds that were fabled to have carried the small-pox from the sea to Æthiopia; also for the disease itself. This use of the term probably arose from a mistaken interpretation of a passage in the Koran, the word *abâbîl* (meaning a separate flock, a bevy) having been taken to mean a special variety of bird. Many fabulous stories were told of the birds mentioned in that passage in the Koran. [A, 322; B, 44, 47.]

ABABOUY, n. A West Indian term for the *Ximenia americana*.

ABACA, n. Fr., *chanvre de Manille*. Manilla or West Indian hemp. See Musa *textilis*.

ABACH (Ger.), n. Pr. a^{3}b'a^{3}ch^2. See Aabach.

ABÄCHZEN (Ger.), v. refl. Pr. a^{3}b'e^{2}ch^2-tze^{2}n. To pine away.

ABACTINAL, adj. Pr. a^{2}b-a^{2}k-ti'na^{2}l. For deriv., see *Ab-** and Actinic. Lat., *abactinalis*. Fr., *abactinal*. Ger., *abaktinisch*. It., *abattinale*. Sp., *abactinal*. L. Agassiz's term for that part of a radiate which is opposite the pole from which the organs are supposed to radiate. [B, 39.]

ABACTIO (Lat.), n. f. Pr. a^{2}b-a^{2}k'shi^2-o, a^{3}b-a^{3}k'ti^2-o. From *ab* (see *Ab-**) and *actio* (from *agere*), an act. Gr., ἀπελασία. A stealthy or forcible driving away.—**A. fœtus, A. partus.** 1. Artificial premature labor. 2. Criminal abortion. [A, 322.]

ABACTUS (Lat.), adj. Pr. a^{2}b-a^{2}k'tu^{3}s, a^{3}b-a^{3}k'tu^{4}s. From *abigere*, to drive away, to force birth. Expelled.—**A. venter.** See under Venter.

ABACUS (Lat.), n. m. Pr. a^{2}b'a^{2}k-u^{3}s, a^{3}b'a^3-ku^{4}s. Gr., ἄβαξ. Anciently, a table for drawing, playing games, etc. A table for holding preparations. [A, 336.]

ABADES, n. An old term for cantharides. [A, 334.]

ABAGMENTUM (Lat.), n. n. Pr. a^{2}b(a^{3}b)-a^{2}g(a^{3}g)-me^{2}n'tu^{3}m-(tu^{4}m). From *abigere* (see Abactus). An abortifacient. [A, 312.]

ABAIRUCU, n. Pr. a^{3}b-a^3-e-ru'ku. An East Indian term for the fruit of the *Cynometra ramiflora*. [A, 321.]

ABAISER, ABAISIR, n. Pr. a^{2}b-a'su^{5}r. Portuguese, *abaissir*. Ivory black, animal charcoal. [B, 38, 44.]

ABAISSE-LANGUE (Fr.), n. Pr. a^3-bas-la^{3}ng. A tongue-depressor.

ABAISSEMENT (Fr.), n. Pr. a^3-bas-ma^{3}n^2. 1. A falling, as of the temperature or of a part (*e. g.*, prolapse of the uterus). 2. A lowering, as of the eyelids or the voice. [A, 300.] 3. The operation of couching for cataract. [F.] 4. Mental depression.

ABAISSEUR (Fr.), n. Pr. a^3-ba-su^{5}r. A depressor (either a muscle or an instrument).—**A. de l'aile du nez.** See Depressor *alæ nasi*.—**A. de la langue.** 1. The sterno-hyoid muscle. 2. An instrument for depressing the tongue.—**A. de la lèvre inférieure.** See Depressor *labii inferioris*.—**A. de la mâchoire inférieure.** The digastric muscle.—**A. de l'angle des lèvres.** See Depressor *anguli oris*.—**A. de l'angle du nez.** See Depressor *alæ nasi*.—**A. de la paupière.** An instrument for depressing the eyelid. [F.]—**A. de la paupière inférieure.** See Depressor *palpebræ inferioris*.—**A. de la pupille.** See Rectus *inferior oculi*.—**A. de la vessie.** See Levator *prostatæ*.—**A. de l'épiglotte.** See Depressor *epiglottidis*.—**A. de l'hyoïde.** See Sterno-hyoideus.—**A. de l'œil.** See Rectus *inferior oculi*.—**A. du larynx.** See Sterno-thyroideus.—**A. externe de la tête.** That portion of the sterno-cleido-mastoid muscle which is inserted into the clavicle. [A, 301].—**A. interne de la tête.** That portion which is inserted into the sternum. [A, 301.]

ABAJANUSS (Ger.), n. Pr. a^3-ba^3'ya^3-nus. The cashew-nut.

ABAJOUE (Fr.), n. Pr. a^3-ba^{3}z-yu. A contraction of *à bas joue* (*au bas de la joue*). [A, 306.] See Cheek-pouch.

A, ape; **A^2**, at; **A^3**, ah; **A^4**, all; **Ch**, chin; **Ch^2**, loch (Scottish); **E**, he; **E^2**, ell; **G**, go; **I**, die; **I^2**, in; **N**, in; **N^2**, tank; **O**, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

ABAKTINISCH (Ger.), adj. Pr. a3b-a3k-te'ni2sh. Abactinal.

ABALIENATED, adj. Pr. a2b-a'li2-e2n-a-te2d. Lat., *abalienatus.* 1. So injured or diseased as to require removal. (Said of a part.) 2. (Obs.) weakened. (Said of the intellectual faculties.) [B, 39.] 3. Corrupted. [Celsus; A, 336.] 4. Severed, separated. [A, 318.]

ABALIENATIO (Lat.), n. f. Pr. a2b(a3b)-a(a3)-li2-e2n-a'(a3')-shi2(ti2)-o. From *abalienare,* to estrange. Gr., ἀπαλλοτρίωσις. Abalienation.—**A. mentis.** Weakness of the mind.

ABALIENATION, n. Pr. a2b-a-li2-e2n-a'shu3n. Lat., *abalienatio.* Fr., *abaliénation.* Ger., *Abalienation.* It., *abalienazione.* Sp., *abalienación.* The state of being abalienated (*q. v.*).

ABALIENATUS (Lat.), adj. Pr. a2b(a3b)-a(a3)-li2-e2n-a'(a3')-tu3s(tu4s). Abalienated. Gr., ἀπηλλατριωμένος.—**Membra abalienata.** See under MEMBRUM.

ABAMA (Lat.), n. f. Pr. a2b(a3b)-a(a3)'-ma3. A name given by Adanson to the genus *Narthecium* [Möhr.]. [B, 41, 42.]

ABAMÉES (Fr.), n. pl. Pr. a3-ba3-ma. A group of plants of the natural order *Liliaceæ* which have their type in the *Abama.* [B, 38.]

ABÄNDERUNG (Ger.), n. Pr. a3b'-e2n-de2-rung. A variation (as from the type of a species); a variety. [B.]

ABANET (Heb.), n. See ABNET.

ABANGA, n. Written also *abauga.* A negro name for the fruit of a West Indian species of palm. The seeds are used in medicine, and an intoxicating drink is made from the sap of the trunk of the tree. [B, 49.]

ABÄNGSTIGUNG, ABÄNGSTUNG (Ger.), n's. Pr. a3b'-e2ng-sti2-gung, -stung. Anxiety. [A, 315.]

ABANO (It.), n. Pr. a3-ba3'no. A hot spring in the northern part of Italy. The water contains sodium, magnesium, and calcium chlorides, magnesium iodide and bromide, calcium and magnesium carbonates, silicic acid, iron silicate, carbon dioxide, nitrogen, naphtha vapor, and oxygen. [A, 328.]

ABAPTISTON, n. Pr. a2b-a2p-ti2s'to2n. Lat., *abaptista, abaptistum.* Gr., ἀβάπτιστον (τρύπανον understood), a trephine that will not sink suddenly. Fr., *abaptiste.* Ger., *Leiste.* It., *abatisto.* Sp., *abaptista.* An ancient term for a trephine that was so constructed as not to sink suddenly when the bone had been perforated by it, and thus injure the dura mater. According to some authors, this was due to its shape, that of the modern conical trephine; others state that it had a guard to prevent its sinking beyond a certain depth. [A, 311; E, 11.]

ABAPUS (Lat.), n. m. Pr. a2b'(a3b')-a3-pu3s(pu4s). Adanson's term for the genus *Gethyllis* (*q. v.*). [B, 41, 42.]

ABARBEITEN (Ger.), v. intr. Pr. a3b'a3r-bi-te2n. To cease to ferment.

ABAREMOTEMO (Port.), n. Pr. a3b-a3-ra-mo-ta'mo. A Brazilian tree of the genus *Abaremotemon.* [B, 44.]

ABAREMOTEMON (Lat.), n. n. Pr. a2b(a3b)-a3-re(ra)-mo-te'(ta')-mo2n. A Latinized form of *aboremotemo*; Bentham's term for a genus of leguminous plants of the sub-order *Mimosaceæ,* embracing some species of the genus *Pithecolobium.* [B, 41.]

ABARIGA, n. A species of palm growing on the Island of St. Thomas, which furnishes the fruit called abanga. [B, 38.]

ABARNAHAS, ABARNAS (Ar.), n. The alchemists' term for magnesia.

ABART (Ger.), n. Pr. a3b'a3rt. See ABÄNDERUNG.

ABARTAMEN (Ar.), n. An old term for lead.

ABARTHROSIS, n. Pr. a2b-a3r-thro'si2s. For deriv., see *Ab-** and ARTHROSIS. Fr., *abarthrose.* Ger., *Abarthrose.* It., *abartrosi.* Sp., *abartrosis.* See DIARTHROSIS and APARTHROSIS.

ABARTICULAIRE (Fr.), adj. Pr. a3b-a3r-ti2-ku6-la2r. Not connected with a joint. See ARTHRITISME *abarticulaire.*

ABARTICULATION, n. Pr. a2b-a3r-ti2k-u2-la'shu3n. Gr., διάρθρωσις. Lat., *abarticulatio* (see *Ab-** and ARTICULATIO). Fr., *abarticulation.* Ger., *Abarticulation, Verrenkung* (2d def.). It., *abarticolazione.* Sp., *abarticulación.* 1. That variety of articulation known as diarthrosis. 2. A dislocation.

ABARTIG (Ger.), adj. Pr. a3b'a3r-ti2g. Degenerate. [A, 315.]

ABARTUNG (Ger.), n. Pr. a3b'a3r-tung. Degeneracy.

ABAS (Ar.), n. Tinea. [B, 44.]

ABASALOA (Lat.), n. f. Pr. a2b(a3b)-a2s(a3s)-a3-lo'a3. Llave and Lexarza's term for a genus of the *Compositæ,* of which only one species is known, growing in Mexico. [B, 42.]

ABASICARPE (Fr.), n. Pr. a3-ba3-si2-ka3rp. A genus of plants of the natural order *Cruciferæ.* [B, 38.]

ABASIR, n. See ABAISER.

ABASOLOA, n. See ABASALOA.

ABAS-TUMAN, n. The seat of a military bathing establishment in the Caucasus, where there are warm springs, feebly sulphurous. [A, 319.]

ABATAGE (Fr.), n. Written also *abattage.* Pr. a3-ba3-ta3zh. Ger., *Niederwerfen, Schlachten* (1st def.). It., *abbattimento* (1st def.). Sp., *matanza* (1st def.). 1. The slaughter of an animal to prevent the spread of disease. 2. (Vet.) the procedure of "casting" an animal upon which an operation is to be performed. [A, 300.]

ABÂTARDISSEMENT (Fr.), n. Pr. a3-ba3-ta3r-des-ma3n2. Ger., *Ausartung, Abartung.* It., *degenerazione.* Sp., *degeneración.* Degeneracy (the degeneration of a race or a breed—not histological degeneration). [A, 300.]

ABATIA (Lat.), n. f. Pr. a2b(a3b)-a(a3)'shi2(ti2)-a3. Ruíz and Pavón's term for a genus of the natural order *Lythraceæ.* [B, 41.]

ABATIEÆ (Lat.), n. f. pl. Pr. a2b(a3b)-a(a3)-shi2(ti2)-e'(a')-e(a3-a). A tribe of plants belonging to the natural order *Samydaceæ.* It is named from the genus *Abatia,* by some included under this tribe, but usually referred to the order *Lythraceæ.* [B, 19.]

ABATIS (Fr.), n. Pr. a3-ba3-te. A collective term for those parts of a fowl that are cast aside as unfit to be cooked, and for the refuse of a slaughter-house. [A, 300.]

ABATITIBABI, n. A South American tree yielding a transparent resin. [A, 305.]

ABATTAGE (Fr.), n. See ABATAGE.

ABATTEMENT (Fr.), n. Pr. a3-ba3t-ma3n2. Prostration; a sudden and decided diminution of the phenomena of nervous power. [J. Bouillaud, A, 332.]

ABATTIREN (Ger.), v. tr. Pr. a3-ba3-te're2n. To prostrate.

ABATTOIR (Fr.), n. Pr. a3-ba3-twa3r. Ger. *Schlachthaus.* It., *ammazzatoio.* Sp. *matadero.* A place set apart for the slaughter of animals.

ABATTRE (Fr.), v. Pr. a3-ba3tr. 1. (Tr.) to prostrate. 2. (Reflexive [*s'a.*]) to fall down prostrate, either wholly or on the knees (said of the lower animals). [A, 301.]

ABÄTZEN (Ger.), v. tr. Pr. a3b'e2t-ze2n. To corrode away; to remove with caustic. [A, 315.]

ABAUGA, n. See ABANGA.

ABAVO, n. See ADANSONIA *digitata.*

ABAX (Lat.), n. f. Pr. a'ba2x, a3'ba3x. Gen., *abacis.* Gr., ἄβαξ. See ABACUS.

ABAXILE, adj. Pr. a2b-a2x'i2l. For deriv., see *Ab-** and AXIS. In botany, situated away from the axis. (Said of the embryo when not lying in the centre of the seed.) [B, 39.]

ABBÄHEN (Ger.), v. tr. Pr. a3b'ba-he2n. To foment thoroughly. [A, 315.]

ABBÄLGEN (Ger.), v. tr. Pr. a3b'be2l-ge2n. To enucleate.

ABBAYE DU VAL, ABBECOURT (Fr.), n's. Pr. a3-ba-du6-va3l, a3b-kur. A spring near Versailles, in France, containing iron and calcium bicarbonates and magnesium sulphate and chloride. [A, 328.]

ABBEIZEN (Ger.), v. tr. Pr. a3b'bi-tze2n. To bite away, to remove with corrosives.

ABBEVILLE (Fr.), n. Pr. a3b-vel. A town in the department of the Somme, in France, having a cold mineral spring containing iron and calcium sulphates, sodium hydrochlorate, and bitumen. [A, 331.]

ABBIEGUNG (Ger.), n. Pr. a3b'be-gung. Abduction.

ABBINDEN (Ger.), v. tr. Pr. a3b'bi2n-de2n. 1. To ligate, especially to tie off or remove with an écraseur; hence to castrate (said of the lower animals). 2. To wean a young animal. [A, 315.]

ABBINDEWERKZEUG (Ger.), n. Pr. a3b'bi2n-de2-ve2rk''-tzoig. An old term for the implements used in tying off parts. [A, 305.]

ABBISS (Ger.), n. Pr. a3b'bi2s. A biting off; the part bitten off.—**Teufels A.** Devil's-bit. See SCABIOSA *succisa.*

ABBLATTERN (Ger.), v. intr. Pr. a3b'bla3t-e2rn. To recover from the small-pox. [A, 315.]

ABBLÄTTERN (Ger.), v. intr. Pr. a3b'ble2t-e2rn. To exfoliate.—**A'd.** adj. Exfoliating, exfoliative; capable of causing exfoliation. [A, 315.]

ABBLÄTTERUNG (Ger.), n. Pr. a3b'ble2t-e2-rung. Exfoliation, desquamation.—**A'smittel.** An exfoliative.

ABBRAND (Ger.), n. Pr. a3b'bra3nd. 1. The oxide formed when a metal is heated in the air. [B.] 2. The loss of material in the process of testing by heat. [A, 315.]

ABBRECHEN (Ger.), n. Pr. a3b'bre2ch2-e2n. See ABRUPTION.

ABBRENNEN (Ger.), v. tr. Pr. a3b'bre2n-e2n. 1. To burn away. 2. To deflagrate.

ABBRENNER (Ger.), n. Pr. a3b'bre2n-e2r. A deflagrator. [A, 315.]

ABBRENNUNG (Ger.), n. Pr. a3b'bre2n-ung. Deflagration.

ABBRÜHUNG (Ger.), n. Pr. a3b'bru6-hung. A scalding.

A-B-C-DARIA (Lat.), n. f. Pr. a(a3)-be(ba)-se(ka)-da'(da3')-ri2-a3. See ACMELLA *mauritiana.*

ABCÉDÉ (Fr.), adj. Pr. a3b-sa-da. Advanced to suppuration; having formed an abscess. [E.]

ABCÉDER (Fr.), v. intr. Pr. a3b-sa-da. Lat., *abscedere.* Ger., *vereitern.* It., *suppurare.* Sp., *abceder.* 1. To end in the formation of an abscess (said of a phlegmon). 2. To break and discharge (said of an abscess). [A, 300.]

ABCÈS (Fr.), n. Pr. a3b-se2. An abscess. [E.]—**A. aigu.** An acute abscess. [E.]—**A. arthrifluent.** A wandering abscess which originates in a diseased joint. [Nicaise, "Rev. de chir.," June, 1885, p. 486.]—**A. canaliculaire du sein.** A mammary abscess communicating with the milk-ducts. [E.]—**A. chaud.** An acute abscess. [E.]—**A. consécutif.** A secondary or metastatic abscess. [E.]—**A. constitutionel.** A constitutional abscess. See *Diathetic* ABSCESS.—**A. de la lymphe.** See *Lymphatic* ABSCESS.—**A. dermique.** See *Dermoid* ABSCESS.—**A. des gaines tendineuses.** See *Thecal* ABSCESS.—**A. de l'œil.** See PANOPHTHALMITIS *purulenta.*—**A. de voisinage.** See ABSCESS *of proximity.*—**A. en bouton de chemise.** A shirt-stud abscess; a mammary abscess which, being essentially submammary, communi-

cates with a large subcutaneous pus-cavity by a narrow channel running through the mammary gland—the entire suppurating tract having thus the shape of a shirt-stud. [A, 222.]—**A. essentiel.** See *Idiopathic* ABSCESS.—**A. froid.** A cold abscess.—**A. froid extra-périostique.** A variety of the "abscess of proximity" in which an abscess forms in the cellular tissue situated on the outer surface of the periosteum, and is generally held to be indicative of osteitis. [Nicaise, *loc. cit.*].—**A. ganglionnaire.** See *Lymphatic* ABSCESS.—**A. ganglionnaire scrofuleux.** A scrofulous lymphatic abscess.—**A. hématique.** See *Diathetic* ABSCESS.—**A. laiteux.** See *Mammary* ABSCESS.—**A. lamelleux de la membrane du tympan.** See *Interlamellar* ABSCESS *of the membrana tympani.*—**A. médullaire.** According to Chassaignac, a medullary abscess should be distinguished from purulent osteo-myelitis by its being strictly confined by new bony walls formed within the medullary cavity. ["Arch. gén. de méd.," Feb., 1880, p. 240.]—**A. migrateur.** See *Wandering* ABSCESS.—**A. odontopathique.** See *Dental* ABSCESS.—**A. opistho-pharyngien.** See *Retro-pharyngeal* ABSCESS.—**A. par congestion.** See *Wandering* ABSCESS.—**A. par dépôt.** An old term for a wandering abscess.—**A. par fluxion.** An acute abscess.—**A. par sympathie de continuité.** See *Sympathetic* ABSCESS.—**A. péri-amygdalien.** An abscess in the tissue surrounding the tonsil.—**A. sanguin.** An abscess due to the breaking down of an effusion of blood.—**A. séreux.** Gosselin has used the term *a. séreux sous-périostique* to denote a collection of reddish serosity beneath the periosteum during the early stage of traumatic osteitis; Nicaise applies the expression *a. séreux extra-périostique* to like collections on the outer surface of the periosteum in cases of "external periostitis" (see PAROSTEITIS). [Nicaise, "Rev. mens. de méd. et de chir.," Oct., 1879, p. 780.]—**A. soudain.** Under this term Delpech has described a variety of abscess, included by him among the cold abscesses. These abscesses, which are of extreme gravity, develop suddenly in the subcutaneous or the intermuscular cellular tissue, without having been preceded by any manifest local inflammation. They very rapidly acquire a large size, and are accompanied by high fever. When the abscess bursts, the pus appears of good character, but is remarkably fœtid. Sometimes it becomes more serous and quite abundant in the course of a few days; in other cases the first abscess dries up suddenly, and others follow in great numbers. A fœtid, serous diarrhœa sets in, and this and the discharge from the abscesses rapidly undermine the patient's strength. [S. Laugier, A, 329.]—**A. sous-épidermique.** Suppuration beneath the epidermis, as in paronychia. [A, 331.]—**A. stercoraire, A. stercoral.** See *Fæcal* ABSCESS.—**A. sudoripare.** See ABSCESSUS *sudoriparus.*—**A. tubéreux.** An abscess of a tuberous or furuncular appearance. The term was applied by Velpeau to abscesses of the areola of the nipple. [A, 222.]

ABCESSUS (Lat.), n. m. Pr. a^{2}b-se^{2}s'u^{3}s, a^{3}b-ke^{2}s'u^{4}s. See ABSCESSUS.

A-B-C-KRAUT (Ger.), n. Pr. a^{3}-ba-tsa'kra^{3}-ut. See ACMELLA *mauritiana.*

ABDACHUNG (Ger.), n. Pr. a^{3}b'da^{3}ch^{2}-ung. See DÉCLIVE.

ABDAMPFEN (Ger.), v. intr. Pr. a^{3}b'da^{3}mp-fe^{2}n. To evaporate (in the passive sense).

ABDÄMPFEN (Ger.), v. tr. Pr. a^{3}b'de^{2}mp-fe^{2}n. To evaporate (to cause to evaporate).

ABDÄMPFUNG (Ger.), n. Pr. a^{3}b'de^{2}mp-fung. See ABDÄMPFEN.—**A'sgefäss.** An evaporating vessel.—**A'skessel.** An evaporating kettle.—**A'smaschine.** See EVAPORATOR.—**A'spfanne.** An evaporating pan.—**A'sschale.** An evaporating capsule.

ABDELAVI (Ar.), n. See CUCUMIS *chate.*

ABDOMEN (Lat.), n. n. Pr. a^{2}b(a^{3}b)-do'me^{2}n. Gen., *abdominis.* Gr., λαπάρα, γαστήρ, ὑπογάστριον, ἦτρον, περιτόναιον. Fr., *abdomen, ventre, bas-ventre.* Ger., *Unterleib, Hinterleib* (in the lower animals), *Bauch, Wanst.* It., *addome, addomine, ventre.* Sp., *abdomen, vientre, bajo vientre.* Syn.: *venter, venter infimus* (seu *imus*), *alvus, uterus* [Celsus, A, 322]. Of doubtful etymology, generally said to be from *abdere*, to conceal, and *omen* (either in the sense of a presage, from the ancient augurs' having found their inspiration in its contents, or as a contraction of *omentum*)—so that the word would signify either that which conceals the omen or that which conceals the omentum. [A, 300.] Kraus considers it more likely to have come from the Hebrew אב־דמן, the father (or source) of ordure. [A, 322.] The word is said to have been first used in English writing by Copland, in 1541. [B, 39.] 1. The belly; being that one of the great visceral cavities of the body which is bounded by the diaphragm above and the floor of the pelvis (or, in a more restricted sense, the plane of the pelvic entrance) below. 2. (Obs.) the genitals. 3. (Fig.) gluttony.—**Abdominis exploratio.** A physical examination of the abdomen.—**Pendulous a.** Lat., *venter propendulus.* Fr., *ventre avalé* (ou *en besace*), *prolapsus profond* (ou *pariétoviscéral*) *de la paroi abdominale* [Guéniot, "Arch. de tocol.," May, 1885, p. 425]. Ger., *Hängebauch.* It., *ventre avvallato.* Sp., *vientre caido.* An abnormal protrusion of the anterior wall of the abdomen and its sinking downward in front of the pubic arch. The term should be restricted to that condition in which the weight of the abdominal contents fails to be supported properly, from lack of tone in the muscles, but it is sometimes applied to the prominence due to an accumulation of fat. When the state first referred to occurs during pregnancy it is often spoken of as a form of anteversion of the gravid uterus. See also EVENTRATION and PROLAPSUS *graisseux.*

ABDOMINAL, adj. Pr. a^{2}b-do^{2}m'i^{2}n-a^{2}l. Gr., ὑπογάστριος. Lat., *abdominalis.* Fr., *abdominal.* Ger., *abdominal.* It., *addominale.* Sp., *abdominal.* Syn.: *ventral.* 1. Pertaining to the abdomen. 2. (Rare) having a large belly. See ABDOMINOUS. 3. Having ventral fins (said of fishes). [B.]—**A'athmen** (Ger.). A. respiration.—**A'eingeweide** (Ger.). The a. organs.—**A'krankheit** (Ger.). A disease of an a. organ.—**A'nervenfieber** (Ger.). Typhoid fever.—**A'schwangerschaft** (Ger.). Abdominal gestation.—**A'typhus.** (Ger.). Typhoid fever.

ABDOMINOSCOPY, n. Pr. a^{2}b-do^{2}m-i^{2}n-o^{2}s'co-pi^{2}. Lat., *abdominoscopia* (from *abdomen*, and Gr., σκόπεῖν [see *-scopy**]). Fr., *abdominoscopie.* Ger., *Abdominoskopie.* It., *addominoscopia.* Sp., *abdominoscopia.* See LAPAROSCOPY.

ABDOMINO-THORACIC, adj. Pr. a^{2}b-do^{2}m''i^{2}n-o-tho-ra^{2}s'-i^{2}k. Lat., *abdomino-thoracicus.* Fr., *abdomino-thoracique.* Ger., *abdominothoracisch.* It., *addomino-toracico.* Sp., *abdomino-toracico.* Pertaining to both the abdomen and the thorax.

ABDOMINOUS, adj. Pr. a^{2}b-do^{2}m'i^{2}n-u^{3}s. An unusual synonym of *abdominal*, especially in the sense of the 2d def. of that word.

ABDOMINO-UTEROTOMY, n. Pr. a^{2}b-do^{2}m''i^{2}n-o-u^{2}-te^{2}-ro^{2}t'o-mi^{2}. From *abdomen, uterus*, and τέμνειν (see *-tomy**). Fr., *abdomino-utérotomie.* See LAPARO-HYSTEROTOMY.

ABDOPPELN (Ger.), v. tr. Pr. a^{3}b'do^{2}p-pe^{2}ln. To double-stitch; to sew with a double thread. [A, 315.]

ABDREHEN (Ger.), v. tr. Pr. a^{3}b'dra-he^{2}n. To twist off; to remove by torsion.

ABDUCE, v. tr. Pr. a^{2}b-du^{2}s'. See ABDUCT.

ABDUCENS (Lat.), adj. and n. Pr. a^{2}b-du^{2}'-se^{2}nz, a^{3}b-du'-ke^{2}ns. From *ab* (see *Ab-**), and *ducere*, to lead. See ABDUCENT and ABDUCTOR.—**A. labiorum.** See LEVATOR *anguli oris.*—**A. nerve.** See under NERVE.—**A. oculi.** Fr., *abducteur de l'œil.* Ger., *Abziehmuskel des Auges.* It., *abduttore dell' occhio.* Sp., *abductor del ojo.* 1. The external rectus muscle of the eye, the action of which is to roll the globe outward. It arises by two heads, one from the outer margin of the optic foramen, and the other from the lower margin of the sphenoidal fissure, and is inserted into the sclerotic near the outer margin of the cornea. [F.] 2. The a. nerve. See under NERVE.—**A. oris.** See LEVATOR *anguli oris.*—**A'wurzeln** (Ger.) The roots of the a. nerve. [I, 6.]

ABDUCENS-FACIALIS (Lat.), adj. Pr. a^{2}b-du^{2}''se^{2}nz-fa-si^{2}-a'li^{2}s, a^{3}b-du''ke^{2}ns-fa^{3}-ki^{2}-a^{3}l'i^{2}s. Pertaining to the abducens and the facial nerves.—**A.-f'kern** (Ger.). **A.-f. nucleus.** The common nucleus of the abducens and facial nerves. [I, K.]

ABDUCENT, adj. Pr. a^{2}b-du^{2}'se^{2}nt. Lat., *abducens.* Fr., *abducteur.* Ger., *abziehend.* It., *abduttore.* Sp., *abductor.* Abducting, acting as an abductor.

ABDUCIREN (Ger.), v. tr. Pr. a^{3}b-dut-se're^{2}n. To abduct.

ABDUCIREND (Ger.), adj. Pr. a^{3}b-dut-se're^{2}nd. Abducent.

ABDUCT, v. tr. Pr. a^{2}b-du^{3}kt'. Gr., ἀπάγειν. Lat., *abducere.* Fr., *ecarter.* Ger., *abduciren, abziehen.* It., *menare via.* Sp., *abducir.* To draw a part away from the median line of the body or (as used by most writers) away from the median line of a limb.

ABDUCTEUR (Fr.), adj. and n. Pr. a^{3}b-du^{6}k-tu^{6}r. Abducent; an abductor. In many instances the word is the equivalent of *adductor*, those who so use it not accepting the idea that abduction may properly mean the drawing of a part (such as a finger or toe) away from the median line of a limb.—**A. court du pouce.** See ABDUCTOR *brevis pollicis.*—**A. de l'aile du nez.** See LEVATOR *labii superioris alæque nasi.*—**A. de l'œil.** See ABDUCTOR *oculi.*—**A. de l'oreille.** See ABDUCTOR *auris.*—**A. du doigt indicateur.** See ABDUCTOR *indicis.*—**A's du gros orteil.** See ADDUCTOR *hallucis* and TRANSVERSUS *pedis.*—**A. du petit doigt.** See ABDUCTOR *minimi digiti manus.*—**A. du petit orteil.** See ABDUCTOR *minimi digiti pedis.*—**A. du trompe d'Eustache.** See ABDUCTOR *of the Eustachian tube.*—**A's laryngés.** See ABDUCTORS *of the larynx.*—**A. long de la main.** See EXTENSOR *ossis metacarpi pollicis.*—**A. long du pouce.** See ADDUCTOR *longus pollicis.*—**A. oblique du gros orteil.** See ADDUCTOR *hallucis.*—**A. transverse du gros orteil.** See TRANSVERSUS *pedis.*—**Court a. du bras.** See ABDUCTOR *brevis brachii.*—**Long a. du bras.** See ABDUCTOR *longus brachii.*

ABDUCTION, n. Pr. a^{2}b-du^{3}k'shu^{3}n. Gr., ἄπαγμα. Lat., *abductio* (from *ab* and *ducere*). Fr., *abduction.* Ger. *Abziehung.* It., *abduzione.* Sp., *abducción.* 1. A movement which carries a part away from the median line of the body or (in the case of the fingers and toes) away from the middle line of a limb. [C, E.] See also remarks under ABDUCTEUR. As applied to the hand, the word means flexion toward the radial side of the forearm. 2. (Obs.) separation of the fragments of a broken bone. [A, 323.]

ABDUCTOR, adj. and n. Pr. a^{2}b-du^{3}k'to^{2}r. Lat., *abductor.* Fr., *abducteur.* Ger., *Abzieher.* It., *abduttore.* Sp., *abductor.* Abducent; a muscle or nerve the action of which is to abduct a part.—**A. auricularis, A. auris** (Lat.). Fr., *abducteur de l'oreille.* Ger., *Abziehmuskel des Ohres.* It., *abduttore dell' orecchio.* Sp., *abductor de la oreja.* See AURICULARIS *posterior.*—**A. brevis alter.** See *A. brevis pollicis.*—**A. brevis auriculæ.** See CERVICO-AURICULARIS *profundus.*—**A. brevis brachii.** Fr., *court abducteur du bras, petit rond* (ou *scapulo-huméral*). Ger., *kurzer Auswärtszieher* (oder *äusserer kurze Beuger*) *des Armbeins, mittlerer Schulterumdrehermuskel.* It., *abduttore corto del braccio, piccolo rotondo* (o *scapolo-omerale*). Sp., *a. corto del brazo.* A small elongated muscle, found in the solipeds, being the analogue of the teres minor in man. It arises from the posterior margin of the scapula, the infra-spinous fossa, and the small tubercle at the outer border of the glenoid cavity, and is inserted into the humerus between the crest of the tuberosity and the deltoid impression. It abducts and rotates the humerus. [A, 314.]—**A. brevis pollicis.** Fr., *abducteur court du pouce.* Ger., *kurzer Abziehmuskel des Daumens.* It., *abduttore breve* (o *corto*) *del pollice della mano.* Sp., *a. corto del pulgar de la mano.* Syn.: *a. brevis alter, a. pollicis manus, scapho-carpo-superphalangeus pollicis.* The short a. of

the thumb. It arises from the annular ligament of the wrist and from the trapezium or the tubercle of the semilunar bone, and is inserted into the outer aspect of the base of the first phalanx of the thumb. [C.]—**A. digiti quinti.** See *A. minimi digiti.*—**A. hallucis.** Fr., *abducteur du gros orteil.* Ger., *Abzieher der grossen Zehe.* It., *abduttore dell' alluce.* Sp., *a. del pulgar del pié.* Syn.: *a. obliquus hallucis*, *a. pollicis pedis.* The a. of the great toe; a muscle that arises from the greater tuberosity of the calcaneum, from the plantar fascia, and from the annular ligament of the ankle, and is inserted into the inner border of the base of the first phalanx of the great toe. [C.]—**A. indicis.** Fr., *abducteur du doigt indicateur.* Ger., *Abziehmuskel des Zeigefingers.* It., *abduttore del dito indice.* Sp., *a. del indice.* Syn.: *semi-interosseus indicis.* The a. of the forefinger, being the first dorsal interosseous muscle of the hand. It arises by two heads from the first and second metacarpal bones, and is inserted into the radial side of the index-finger.—**A. indicis pedis.** Fr., *premier interosseux dorsal du pied.* Ger., *ersterer äussere Zwischenknochenmuskel des Fusses.* Sp., *a. del índice del pie.* Syn.: *prior* (seu *posterior*) *indicis pedis.* The first dorsal interosseous muscle of the foot. It arises from the first and second metatarsal hones, and is inserted into the tibial side of the second toe.—**A. longus auriculæ.** See Cervico-auricularis *medius.*—**A. longus brachii.** Fr., *long abducteur du bras, portion scapulaire du deltoïde, grand scapulo-huméral.* Ger., *grosser Schulterumdrehermuskel, grosser Auswärtszieher* (oder *äusserer lange Beuger*) *des Armbeins.* It., *abduttore lungo del braccio, grande scapolo-omerale.* Sp., *a. largo del brazo.* A muscle found in the solipeds, being to some extent an analogue of the deltoid in man. It arises by two heads: the anterior, through the medium of the scapular aponeurosis, from the tuberosity of the acromion; the posterior from the dorsal angle of the scapula, and is inserted into the humerus below the deltoid impression. It is an abductor, a rotator, and a flexor of the humerus. [A, 314.]—**A. longus pollicis.** Fr., *abducteur long du pouce.* Ger., *langer Abzieher des Daumens.* It., *abduttore lungo* (o *grande*) *del pollice della mano.* Sp., *a. largo del pulgar de la mano.* Syn.: *a. pollicis longus, extensor primus* (seu *primi internodii*) *pollicis.* A name given by Albinus to the extensor ossis metacarpi pollicis (*q. v.*). [C.]—**A. metacarpi.** See Extensor *obliquus metacarpi.*—**A. minimi digiti manus.** Fr., *abducteur du petit doigt.* Ger., *Abzieher des kleinen Fingers.* It., *abduttore del dito mignolo.* Sp., *a. del dedo pequeño de la mano.* Syn.: *extensor tertii internodii* (seu *carpo-phalangeus*) *minimi digiti, hypothenar minor metacarpeus.* The a. of the little finger; arising from the pisiform bone, and being inserted into the ulnar border of the base of the first phalanx of the little finger, a small portion going also to the back of the finger. [C.]—**A. minimi digiti pedis.** Fr. *abducteur du petit orteil.* Ger., *Abzieher der kleinen Zehe.* It., *abduttore del dito piccolo del piede.* Sp., *a. del dedo pequeño del pié.* Syn.: *calco-subphalangeus minimi digiti, parathenar major* [Winslow]. The a. of the little toe; a muscle which arises from the os calcis, the external intermuscular septum, and the deep surface of the plantar fascia, and is inserted into the outer side of the first phalanx of the little toe.—**A. nerve.** See *Abducens* nerve.—**A. obliquus hallucis.** See *A. hallucis.*—**A. oculi.** See Rectus *externus oculi.*—**A. of the ear.** See *A. auris.*—**A. of the Eustachian tube.** Lat., *a. tubæ.* Fr. *abducteur du trompe d'Eustache.* Ger., *Abziehmuskel der eustachischen Röhre.* It., *abduttore del tubo.* Sp., *a. del tubo.* Syn.: *dilatator tubæ, spheno-salpingo-staphylinus, circumflexus palati, tensor palati mollis.* This muscle arises from the lower surface of the sphenoid bone, from the short hook-like part of the cartilaginous wall, and from the membranous part of the cartilaginous portion of the Eustachian tube, and is inserted into the hamulus pterygoideus. By its contraction the cartilaginous hook is slightly unfolded, the membranous portion of the tube is lifted a little from the cartilaginous portion, and the lumen of the tube is opened. [F.]—**A. of the eye.** See Rectus *externus oculi.*—**A's of the larynx.** Lat. *abductores laryngis.* Fr., *abducteurs laryngés.* Ger., *Abziehmuskeln des Kehlkopfes.* It., *abduttori della laringe.* Sp., *a'es de la laringe.* Syn.: *dilators of the larynx* (or *glottis*). The crico-arytenoidei postici, which rotate the arytenoid cartilages outward and thus separate the posterior attachments of the vocal bands. [α, 1.]—**A's of the thigh.** Lat., *a'es femoris.* Fr., *abducteurs de la cuisse.* Ger., *Abziehmuskeln des Oberschenkels.* It., *abduttori de la coscia.* Sp., *a'es del fémur.* The gluteus medius, the gluteus minimus, and the upper part of the gluteus maximus.—**A. ossis metatarsi minimi digiti, A. ossis metatarsi quinti.** See *A. minimi digiti pedis.*—**A. pollicis brevis.** See *A. brevis pollicis.*—**A. pollicis longus.** See *A. longus pollicis.*—**A. pollicis longus manus.** See *A. longus pollicis.*—**A. pollicis manus.** See *A. brevis pollicis.*—**A. pollicis pedis.** See *A. hallucis*—**A. pollicis longus.** See *A. longus pollicis.*—**A. transversus hallucis.** See Transversus *pedis.*—**A. tubæ.** See *A. of the Eustachian tube.*

ABDUMEN (Lat.), n. n. Pr. a^{2}b(a^{3}b)-du^2'(du')-me^{2}n. See Abdomen.

ABDÜNSTEN (Ger.), v. tr. Pr. a^{3}b'du^{6}n-ste^{2}n. To evaporate.

ABDÜNSTUNG (Ger.), n. Pr. a^{3}b'du^{6}n-stung. Evaporation.—**A'sbad.** An evaporating bath.

ABEBÆUS (Lat.), adj. Pr. a-be-be'-u^{3}s, a^3-ba-ba^3'e^2-u^{4}s. Gr., ἀβέβαιος, unsteady, uncertain. Infirm, debilitated. [A, 325.)

ABECEDARIA (Lat.), n. f. Written also *a-b-c-daria.* Pr. a-be-se-da'ri^2-a^3, a^3-ba-ka-da^3'ri^2-a^3. Fr., *abécédaire.* Ger., *A-b-c-daria.* See Acmella *mauritiana.* Rumpf is said to have given the plant this name on account of the root being used in Africa to make the children more readily acquire the difficult pronunciation of the Arabic tongue. [A, 322.]

ABEILLE (Fr.), n. Pr. a^3-be^{2}l-y'. The honey-bee. See Apis *mellifica.*

ABELANIÉ (Fr.), n. Pr. a^3-be^2-la^3-ni^2-a. A Languedoc term for the hazel-nut tree. [A. 321.] See Corylus *avellana.*

ABELASIS, n. Pr. a^{3}b-e^{2}l'a^3-si^{2}s. Fr., *abélasis, amande de terre.* An Egyptian term for the African ground-nut, said to have galactagogue properties. [A, 321.] See Cyperus *esculentus.*

ABELE, n. Pr. a^{2}b-e^{2}l', a'be^{2}l. From late Lat., *abellus*, dim. of *albus*, white. Fr., *abèle.* Ger., *Abele.* The white poplar. See Populus *alba.* [B.]

ABELIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-e'(a')-li^2-a^3. Fr., *abélie.* R. Brown's name (in honor of Dr. C. Abel) for a genus of plants of the natural order *Caprifoliaceæ* and the tribe *Lonicereæ.* [B, 19, 38.]

ABELKE (Ger.), n. Pr. a^{3}b'e^{2}l-ke^2. See Abele.

ABEL-MELUCH, n. Written also *abel-moluch.* A native name for a plant growing in Northern Africa, the seeds of which have strong purgative properties. [B, 38.]

ABELMOSCH (Ar.), n. See Abelmoschus.—**Echter A.** (Ger.). See Abelmoschus *moschatus.*—**Essbarer A.** (Ger.). See Abelmoschus *esculentus.*—**Langblätteriger A.** (Ger.). See Abelmoschus *longifolius.*—**A'same** (Ger.). See *Semen* abelmoschi.

ABELMOSCHUS (Lat.), n. m. Pr. a(a^3)-be^{2}l-mo^{2}s'(mos')-ku^{3}s-(ch^{2}u^{4}s). Fr., *abelmosch.* Ger., *Abelmosch.* It., Sp., *abelmosco.* From Ar., *'habb-el-misk*, a grain of musk. Abelmosch; musk-seed, on account of the odor of the *A. moschatus.* A genus of plants of the order *Malvaceæ* [Medic.]; the same as the *Bamia* of R. Brown and the *Manihot* of de Candolle. [B.]—**A. esculentus** [Wight and Arnott]. Ger., *essbarer Abelmosch.* Sp., *Abelmosco suculento.* Syn.: *Hibiscus esculentus.* A species growing in the West Indies, but cultivated in India and Southern Europe. It furnishes the okra pods which are used in soups. The root is occasionally used internally as a medicine, and poultices are made from the leaves. [B, 5, 19.]—**A'körner.** See *Semen* abelmoschi.—**A. moschatus** [Wight and Arnott]. Fr., *ambrette.* Ger., *echter Abelmosch.* It., *ambretta.* Sp., *almizcle vegetal.* Syn.: *Hibiscus abelmoschus.* A species indigenous to Bengal, but cultivated in Egypt and the West Indies. It is an evergreen shrub, distinguished by the agreeable odor of its seeds (*semina abelmoschi, musk-seeds*), which were formerly used in medicine. [B, 5, 19.]—**Semen abelmoschi.** Fr., *graines d'ambrette.* Ger., *Abelmoschuskörner, Bisamkörner.* It., *grani di muschio.* Sp., *granos de ambar.* Musk-seed; the seeds of the *A. moschatus* (*Hibiscus abelmoschus*). They are small, dark-gray, kidney-shaped bodies, of a musk-like odor and an aromatic taste. [B, 5.]

ABELMOSK, ABELMUSK, n's. Pr. a'-be^{2}l-mo^2(u^3)sk. See Abelmoschus.

ABEL-TREE, n. Pr. a'be^{2}l-tre. See Abele.

ABENDBLUME (Ger.), n. Pr. a^{3}b'e^{2}nd-blu''me^2. See Mirabilis *longiflora.*

ABENDVIOLE (Ger.), n. Pr. a^{3}b'e^{2}nd-fe''o-le^2. Dame's violet, Julian flower, double rocket. [A, 315.] See Hesperis *matronalis.*

ABENSBERG (Ger.), n. Pr. a^{3}b'e^{2}nz-be^2-rg. A town in Lower Bavaria, supposed to be the ancient Abasinum, having a thermal spring the waters of which, containing calcium and sodium carbonates, are used as baths for gastro-intestinal, gouty, and rheumatic affections, also vesical catarrh. [A, 321, 327; α, 2.]

ABEPITHYMIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-e^{2}p-i^2-thi(thi^2)'mi^2-a^3. For deriv., see *Ab-** and Epithymia. Fr., *abépithymie.* Ger., *Abepithymie.* It., *abepitimia.* Sp., *abeptimia.* 1. Paralysis of the solar plexus. [A, 305.] 2. J. F. Lobstein's term for *anepithymia* (*q. v.*). [A, 322.]

ABERAUTE (Ger.), n. Pr. a^{3}b'e^2-ra^3-u-te^2. See Aberraute.

ABERBROTHOCK, ABERBROTHWICK, n. See Arbroath.

ABEREMOA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-e^2-re^2-mo'-a^3. Aublet's name for a genus of plants of the order *Anonaceæ;* the same as the *Guatteria* of Ruíz and Pavón. [B, 41.]

ABERESCHE (Ger.), n. Pr. a^3'be^{2}r-e^2-she^2. See Eberesche.

ABERIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-e(a)'ri^2-a^3. A genus of plants of the order *Bixineæ*, indigenous to Africa and Ceylon. [B, 19, 41.]—**A. caffra.** A species growing at the Cape of Good Hope, furnishing a very acid edible fruit called the "kei apple of the Cape." [B, 19.]

ABERKNOBLAUCH, ABERLAUCH (Ger.), n's. Pr. a^{3}b'-e^{2}r-knob-la^3-uch^2, a^{3}b'e^{2}r-la^3-uch^2. Terms applied to the *Allium ophioscorodon* and the *Allium controversum.*

ABERRANS (Lat.), adj. Pr. a^{2}b(a^{3}b)-e^{2}r-a^{2}nz(a^{3}ns). From *aberrare*, to wander. See Aberrant.—**Vas a.** See under Vas.

ABERRANT, adj. Pr. a^{2}b-e^{2}r'a^{2}nt. Lat., *aberrans.* Fr., *aberrant.* Ger., *abweichend, abirrend.* It., Sp., *aberrante.* 1. In anatomy, varying from a direct course. 2. In botany, varying from the regular or usual structure. [B. 19.]—**A. vessels.** See Vasa *aberrantia.*

ABERRATIO (Lat.), n. f. Pr. a^{2}b(a^{3}b)-e^{2}r-a(a^3)'shi^2(ti^2)-o. For deriv., see Aberrans. Aberration.—**A. chromatica.** See *Chromatic* aberration.—**A. humorum.** Aberration (4th def.).—**A. lactis.** See *Milk* metastasis.—**A. loci.** Fr., *erreur de lieu.* See Ectopia.—**A. mensium, A. menstruorum.** See *Vicarious* menstruation.—**A. sphærica.** See *Spherical* aberration.

ABERRATION, n. Pr. a^{2}b-e^{2}r-a'shu^{3}n. Lat., *aberratio.* Fr., *aberration.* Ger., *Aberration, Abweichung, Brechung.* It., *aberrazione, sviamento.* Sp., *aberración.* 1. Any deviation from the normal course. [B.] 2. In optics, the deviation of the rays of light from the principal focus of a curved lens or speculum. [F.] 3. See *Mental a.* 4. An abnormal determination of one of the fluids of the body, especially the blood. to a part, as in vicarious menstruation; a metastasis. [A, 301.]—**A. chromatique** (Fr.).

See *Chromatic a.*—**A. de la lumière** (Fr.). See *A. of light.*—**A. de la menstruation** (Fr.). See *Vicarious* MENSTRUATION.—**A. de réfrangibilité** (Fr.). See *Chromatic a.*—**A. der Gläser** (Ger.). Dioptrical a. See *Spherical a.*—**A. des fluides** (Fr.). See *A.* (4th def.).—**A. de sphéricité** (Fr.). See *Spherical a.*—**A. des Lichtes** (Ger.). See *A. of light.*—**A. des sens** (Fr.). See *Mental a.*—**A. dioptrique** (Fr.). Dioptrical a. See *Spherical a.*—**A. du jugement** (Fr.). See *Mental a.*—**A. of light.** Fr., *a. de la lumière.* Ger., *A. des Lichtes.* It., *aberrazione della luce.* Sp., *aberración de la luz.* The apparent change in the direction of a visual ray produced by the combined influence of the movement of the earth in its orbit and the time consumed in the transmission of light. [B.]—**A. of sphericity, A. sphérique** (Fr.). See *Spherical a.*—**Angle of a.** Fr., *angle d'a.* Ger., *Abirrungswinkel.* See ANGLE *of deviation.*—**Chromatic a.** Lat., *aberratio chromatica.* Fr., *a. chromatique.* Ger., *chromatische A.* It., *aberrazione cromatica* (o *di cromatismo*). Sp., *aberración cromática.* Syn. : *Newtonian a.* In the refraction of light by a lens, an inequality in the degree of refraction of the rays of the different colors, so that a series of tinted images is produced more or less removed from the focus. [B, C, F.]—**Dioptrical a.** Fr., *a. dioptrique.* Ger., *dioptrische A.*, *Abirrung der Gläser.* It., *aberrazione diottrica.* Sp., *aberración dióptica.* See *Spherical a.*—**Mental a.** Fr., *a. des sens* (ou *du jugement*). Ger., *Geistesstörung.* It., *aberrazione mentale.* Sp., *aberración mental.* Syn. : *a.*, *a. of the mind*, *a. of mentality.* A rather vague term for a condition in which the mind acts abnormally, but which does not necessarily amount to insanity.—**Newtonian a.** See *Chromatic a.*—**Spherical a.** Lat., *aberratio sphærica.* Fr., *a. sphérique* (ou *de sphéricité*). Ger., *sphärische A.* It., *aberrazione sferica* (o *di sfericità*, o *di curvatura*). Sp., *aberración esférical.* Syn. : *a. of sphericity.* In the refraction of light by a lens, an inequality in the degree of convergence of the rays from different portions of the lens, producing a series of images at different focal distances, and hence multiple and indistinct images at every point of view; so called because the character of the aberration is due to the fact that the surface of the lens is a segment of a sphere. [B.]

ABERRAUTE, ABERREUTE (Ger.), n's. Written also *Abraute* and *Aberaute.* Pr. a^{3}b'e^{2}r-a^3-u(oi)-te^2. Southernwood. See ARTEMISIA *abrotanum.*

ABERTHON (Ger.), n. Written also *Abthon.* Pr. a^{3}b'e^{2}r-ton. The maidenhair. See ASPLENIUM *trichomanes.*

ABERYSTWITH, n. Pr. a^{2}b-e^{2}r-i^{2}st'wi^{2}th. A Welsh sea-bathing resort. [A, 327.]

ABESAMUM (Lat.), n. n. Pr. a^{2}b(a^{3}b)-e(a)'sa^3-mu^{3}m(mu^{4}m). An old term for the compound of iron contained in wheel-grease. [B, 44, 50.]

ABÉSODÉ, n. An Oriental term for the seeds of the *Nigella sativa.* [A, 321.] See *Semen* NIGELLÆ.

ABESSI, n. Pr. a^{3}b-e^{2}s'si^2. An old term for : 1. Fæcal matter. [A, 306.] 2. Native red sulphide of arsenic. [A, 336.]

ABESTEN, ABESTON, n's. Pr. a^{3}b-e^{2}s'te^2(o^2)n. Asbestos. [A, 322; B, 39.]

ABESTUM, ABESTUS (Lat.), n's. n. and m. Pr. a^{2}b(a^{3}b)-e^{2}s'-tu^{3}m(tu^{4}m), -tu^{3}s(tu^{4}s). See ASBESTOS.

ABESUM, n. An old term for quicklime. [A, 325.]

ABET (Fr.), n. Pr. a^{3}b-a. The fir-tree. See ABIES. [B, 38.]

ABEVACUATION, n. Pr. a^{2}b-e-va^{2}k-u^2-a'shu^{3}n. Lat., *abevacuatio*, from *ab* (see *Ab-**), and *evacuare*, to empty. Fr., *abévacuation.* Ger., *Abevacuation.* It., *apocenosi.* Sp., *apocenosis.* Syn. : *apocenosis.* 1. An incomplete evacuation. [A, 306.] 2. A metastasis of a secretion. Compare APOCENOSIS.

ABFALLEND (Ger.), adj. Pr. a^{3}b'fa^{3}l-le^{2}nd. Deciduous. [B.]

ABFEGEMITTEL (Ger.), n. Pr. a^{3}b'fa-ge^2-mi^{2}t-e^{2}l. A detergent. [A, 317.]

ABFEGEND (Ger.), adj. Pr. a^{3}b'fa ge^{2}nd. Detergent. [A, 315.]—**A'e Mittel.** A detergent.

ABFEGUNG (Ger.), n. Pr. a^{3}b'fa-gung. Depuration.

ABFILTRIREN (Ger.), v. tr. Pr. a^{3}b'fi^{2}l-tre-re^{2}n. To separate by filtration. [A, 315.]

ABFLUSS (Ger.), n. Pr. a^{3}b'flus. An evacuation, a flow, a discharge. [K.]—**A'riemen, A'schnur.** A seton. [E.]—**A'wunde.** The wound made by a seton-needle ; the tract of a seton. [E.]

ABFÜHREN (Ger.), v. tr. Pr. a^{3}b'fu^6-re^{2}n. 1. To abduct. 2. To evacuate. 3. To cleanse, to purge.

ABFÜHREND (Ger.), adj. Pr. a^{3}b'fu^{6}r-e^{2}nd. 1. Abducent. 2. Purgative. 3. Detergent. 4. Excretory.—**A'e Mittel.** A purgative ; a detergent.—**A'e Muskeln.** Abductor muscles.

ABFÜHRMITTEL (Ger.), n. Pr. a^{3}b'fu^{6}r-mi^{2}t''e^{2}l. 1. A detergent. 2. An evacuant, a purgative.

ABFÜHRPILLEN (Ger.), n. pl. Pr. a^{3}b'fu^{6}r-pi^{2}l''e^{2}n. Cathartic pills.

ABFÜHRSYSTEM (Ger.), n. Pr. a^{3}b'fu^{6}r-zi^{2}s-te^{2}m''. 1. A sewerage system. 2. An excretory apparatus ; the emunctories.

ABFÜHRUNG (Ger.), n. Pr. a^{3}b'fu^{6}r-ung. 1. An evacuation. 2. Abduction. 3. A cleansing. [K.]—**A'sgang.** An excretory duct.—**A'smittel.** An evacuant.—**A'swirkung.** A cathartic or cleansing action.

ABGANG (Ger.), n. Pr. a^{3}b'ga^{3}ng. An evacuation ; a loss, as of blood.—**A. der Frucht.** Abortion, miscarriage.—**A. der Wöchnerinnen.** The lochial discharge.

ABGÄNGLING (Ger.), n. Pr. a^{3}b'ge^{2}ng-li^{2}ng. An abortion (in the sense of an abortive fœtus). [A, 315.]

ABGÄSCHEN (Ger.), v. intr. Pr. a^{3}b'ge^{2}sh-e^{2}n. To cease fermenting. [A, 315.]

ABGEBLÜHT (Ger.), adj. Pr. a^{3}b'ge^{2}b-lu^{6}t. See DEFLORATE.

ABGEBOGEN (Ger.), adj. Pr. a^{3}b'ge^2-bo-ge^{2}n. Declinate. [A, 320.]

ABGEBROCHEN-GEFIEDERT (Ger.), adj. Pr. a^{3}b'ge^2-bro^{3}ch^2-e^{2}n-ge^2-fe''de^{2}rt. Abruptly pinnated. [A, 315.]

ABGEDÄMPFT (Ger.), adj. Pr. a^{3}b'ge^2-de^{2}mpft. Evaporated. [A, 315.]

ABGEKOCHTE (Ger.), n. Pr. a^{3}b'ge^2-ko^{3}ch''te^2. A decoction.

ABGELEBTHEIT (Ger.), n. Pr. a^{3}b'ge^2-le^{2}b-tit. Decrepitude. [A, 315.]

ABGEMAGERT (Ger.), adj. Pr. a^{3}b'ge^2-ma^3-ge^{2}rt. Emaciated.

ABGERAHMT (Ger.), adj. Pr. a^{3}b'ge^2-ra^{3}mt. Skimmed.—**A'e Milch.** Skim-milk.

ABGESCHLAGENHEIT (Ger.), n. Pr. a^{3}b'ge^2-shla^{3}g''e^{2}n-hit. Dejection, depression. [A, 317.]

ABGESCHÖPFT (Ger.), adj. Pr. a^{3}b'ge^2-shu^{5}pft. Skimmed.—**A'e Milch.** Skim-milk.

ABGESCHWEFELT (Ger.), adj. Pr. a^{3}b'ge^2-shwe^{2}f-e^{2}lt. Desulphurated. [A, 315.]

ABGESONDERT (Ger.), adj. Pr. a^{3}b'ge^2-zo^{3}n-de^{2}rt. Secreted (in the sense of being separated by secretion).

ABGESPANNT (Ger.), adj. Pr. a^{3}b'ge^2-spa^{3}nt''. Relaxed, enervated, debilitated. [K.]—**A'heit.** Relaxation, atony, debility. [A, 315.]

ABGESTUMPFT, ABGESTUTZT (Ger.), adj. Pr. a^{3}b'ge^2-stumpft'' (stutzt''). Truncated. [B.]

ABGEWASCHEN (Ger.), adj. Pr. a^{3}b'ge^2-va^{3}sh''e^{2}n. Washed.

ABGIESSEN (Ger.), v. tr. Pr. a^{3}b'ge-se^{2}n. To decant ; as a n., decantation.

ABGLIEDERUNG (Ger.), n. Pr. a^{3}b'gle-de^2-rung. Disarticulation.

ABGRENZUNG (Ger.), n. Pr. a^{3}b'gre^{2}nt-zung. A line of demarkation. [E ; A, 315.]

ABHAAREN (Ger.), v. intr. Pr. a^{3}b'ha^3-re^{2}n. To suffer loss of the hair. [A, 315.]

ABHAGERN (Ger.), v. intr. Pr. a^{3}b'ha^3-ge^{2}rn. To become emaciated. [A, 315.]

ABHAL (Ar.), n. Written also *abhel.* The fruit of an East Indian species of cypress, or some related tree, used as an emmenagogue. [A, 310 ; B, 44.]

ABHÄREN (Ger.), v. intr. Pr. a^{3}b'he^2-re^{2}n. To lose the hair (said of the lower animals). [A, 315.]

ABHÄRTUNG (Ger.), n. Pr. a^{3}b'he^{2}r-tung. The process of hardening (in the sense of inuring).

ABHÄUTEN (Ger.), v. tr. Pr. a^{3}b'hoi-te^{2}n. To excoriate. [A, 315.]

ABHEILEN (Ger.), v. tr. and intr. Pr. a^{3}b'hi-le^{2}n. To heal.

ABHEILUNG (Ger.), n. Pr. a^{3}b'hi-lung. Healing, cure.—**A'speriode.** The period of healing or of convalescence.

ABHEL (Ar.), n. See ABHAL.

ABHELFEN (Ger.), v. tr. Pr. a^{3}b'he^{2}lf-e^{2}n. To remedy. [A, 315.]

ABHELLEN (Ger.), v. tr. Pr. a^{3}b'he^{2}l-le^{2}n. To clarify.

ABHOLDER (Ger.), n. Pr. a^{3}b'ho^{3}l-de^{2}r. The mistletoe. See VISCUM *album.* [A, 320.]

ABHÜLSEN (Ger.), v. tr. Pr. a^{3}b'hu^{6}l-ze^{2}n. To decorticate. [A, 315.]

ABHUSTEN (Ger.), v. tr. Pr. a^{3}b'hus-te^{2}n. To cough up.—**Sich a.** To exhaust one's self with coughing. [A, 315.]

ABI, n. A native name for Peruvian caimito. [B.] See LUCUMA *cainito.*

ABICUM (Lat.), n. n. Pr. a^{2}b(a^{3}b)'i^{2}k-u^{3}m(u^{4}m). An old term for the thyroid cartilage. [A, 325.]

ABIES (Lat.), n. f. Pr. a(a^3)'bi(bi^2)-ez(e^{2}s). Gen., *abi'etis.* Gr., ἐλάτη. Fr., *abies, sapin.* Ger., *Tanne, Tannenbaum.* It., *abete.* Sp., *abeto.* Syn. : *Sapinus* [Endlicher], *Pinus* [Linn.], *Picea* [Don, Link.]. According to Linnæus, a genus of evergreen trees belonging to the *Coniferæ* and to the sub-order *Abietineæ*, including the firs. The *Abies* of Linnæus is the *Sapinus* of Endlicher ; the *Abies* of Tourn. corresponds in part to the *Pinus* of Linn. ; the *Abies* of Juss. and Link. is the *Picea* of Don ; and the *Abies* of Don is the *Picea* of Link. [B.]—**A. alba** [Michaux]. Fr., *sapinette blanche.* Ger., *weisse Tanne.* Sp., *abeto blanco.* The white spruce.—**A. balsamea** [Marshall]. Fr., *baume du Canada.* Ger., *Balsamtanne.* It., *abete balsamifera.* Sp., *abeto balsámico.* Syn. : *A. balsamifera*, *Pinus balsamea.* The American silver fir or balm-of-Gilead fir ; a species indigenous to the Northern United States and Canada, which furnishes Canada balsam (Canada turpentine). [B, 5, 19.]—**A. balsamifera.** See *A. balsamea.*—**A. canadensis** [Michaux]. Fr., *sapin du Canada, sapinette de Québec.* Ger., *Hemlockstanne, Schierlingstanne.* The hemlock or hemlock spruce ; a species indigenous to British America and the Northern United States, being a tree growing to a height of from 70 to 80 feet, and furnishing the so-called Canada pitch (the *pix canadensis* of the U. S. Ph.). [B.]—**A. communis.** See *A. excelsa.*—**A. excelsa** [de Candolle]. Fr., *sapin de Norvège.* Ger., *europäische Edeltanne.* It., *abete comune.* Sp., *abeto común.* Syn. : *A communis*, *Pinus*

abies, *Pinus picea*. The Norway spruce ; a species indigenous to Europe and Northern Asia. It grows to a great height, and is distinguished by its abundant dark-green foliage. It furnishes Burgundy pitch (*pix burgundica*). [B, 5.]—**A. larix.** See LARIX *europæa*.—**A. nigra** [Michaux]. Fr., *sapinette noire*. Ger., *Schwarzkiefer*. Sp., *abeto negro*. Syn. : *Pinus nigra*. The black spruce, or double spruce ; a species growing abundantly in the Northern United States and Canada. Its young branches are used in making spruce beer, and its trunk furnishes a variety of pitch employed in the arts. [B, 5.]—**A. pectinata** [de Candolle]. See *A. picea*.—**A. picea** [Linn.]. Fr., *sapin*, *sapin commun* (ou *blanc*, ou *argenté*), *avet*. Ger., *Silbertanne*, *Weisstanne*, *gemeine Tanne*. Sp., *abeto argentado*. Syn. : *A. pectinata* [de Candolle], *A. taxifolia*, *Pinus picea*. The European silver fir, a species growing in the mountainous parts of Central Europe and in Siberia ; a tree reaching the height of 100 feet or more, and furnishing a pitch called Strassburg turpentine. [B, 5, 19.]—**A. rubra** [Tournefort]. A genus indigenous to North America, identical with the *Pinus rubra* of some authors ; a tree averaging about 50 feet in height. [B, 43.]—**A. taxifolia.** See *A. picea*. —**Essentia abietis** [Ph. August.]. The balsam of the fir-tree "joined with scurvy-grass." [A, 336.]

ABIETATE, n. Pr. a^{2}b-i'e^{2}t-at. Fr., *abiétate*. Ger., *Abietat*, *abietinsaures Salz*. It., Sp., *abetato*. A salt of abietic acid.

ABIETENE, n. Pr. a^{2}b-i'e^{2}t-en. Fr., *abiétène*. Ger., *Abieten*. A liquid distilled from the resin of the *Pinus sabiniana*. When pure, according to Thorpe, it consists entirely of heptane. [B, 3.]

ABIETIC, adj. Pr. a^{2}b-i^2-e^{2}t'i^{2}k. From Lat., *abies* (*q. v.*). Lat., *abieticus*. Fr., *abiétique*. Ger., *abietisch*. It., *abietico*. Sp., *abético*. Derived from the fir-tree. [B.]—**A. acid.** Lat., *acidum abieticum*. Fr., *acide abiétique*. Ger., *Abietinsäure*. It., *acido abietico*. Sp., *ácido abético*. A bibasic acid formed by the action of dilute alcohol on pine-resin. Its formula is given as $C_{44}H_{64}O_5$ [B, 5, 10], and $C_{20}H_{30}O_2$ [B, 4].—**A. anhydride.** The anhydride of a. acid ; a substance obtained from pine or larch resin after the latter has been freed from its volatile oil and water. Its formula is $C_{44}H_{62}O_4$, which is also the constitution of colophony. [B, 2, 5, 10.]

ABIETIN, n. Pr. a^{2}b-i'e^{2}t-i^{2}n. Fr., *abiétine*. Ger., *Abietin*. It., *abietina*. Sp., *abetina*. 1. A tasteless, inodorous resin prepared from Strassburg or Canadian turpentine. [B, 2.] 2. A crystallizable substance found in the same varieties of turpentine.

ABIÉTIN (Fr.), adj. Pr. a^3-be-a-ta^{2}n^2. Pertaining to the genus *Abies*. [A, 306.]

ABIETINEÆ (Lat.), n. f. pl. Pr. a^{2}b(a^{3}b)-i(e)-e^{2}t-i^{2}n'e(e^2)-e(a^3-e^2). Fr., *abiétinées*. Ger., *Abietineen*. Sp., *abetináceas*. The fir family of the order *Coniferæ*, so called from *Abies*, the typical genus of the group ; comprising those genera in which the scales representing the pistils are numerous, bractate, and provided with two inverted ovules at the base, and the seeds alate. [B, 34, 35.]

ABIETINSÄURE (Ger.), n. Pr. a^3-be-a'te^{2}n-zoi''re^2. See ABIETIC *acid*.

ABIETITE, n. Pr. a^{2}b-i'e^{2}t-it. Fr., *abiétite*. Ger., *Abietit*. A sugar, $C_6H_8O_3$, contained in the needles of the *Abies pectinata*. [B, 2.]

ABIGA (Lat.), n. f. Pr. a^{2}b(a^{3}b)'i^2-ga^3. From *abigere*, to drive away, to procure abortion. Gr., χαμαίπιτυς. An ancient term for the ground-pine (*Teucrium iva*), from its supposed power of producing abortion, expelling the gout, etc. [A, 312, 322.]

ABILDGAARDIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-i^{2}ld-ga^{3}r'di^2-a^3. Fr., *abildgaardie*. According to Vahl, a genus of plants of the natural order *Cyperaceæ*, named in honor of the Danish physician and naturalist, Peter Abildgaard ; according to others, a section of the genus *Fimbristylis*. [B, 38, 42, 44.]

ABIOGENESIS, n. Pr. a^{2}b-i-o-ge^{2}n'e^2-si^{2}s. For deriv., see *A-**, *Bio-**, and *-genesis*.* Fr., *abiogénèse*. Ger., *Abiogenese*, *Urzeugung*. It., *abiogenesi*. Sp., *abiogénesis*. Syn. : *generatio æquivoca* (seu *spontanea*). Spontaneous generation ; the doctrine of the origin of living organisms from inanimate matter.

ABIOGENETIC, ABIOGENOUS, adj. Pr. a^{2}b-i-o-je^{2}n-e^{2}t'-i^{2}k, u^{3}s. Fr., *abiogénétique*. Ger., *abiogenetisch*. It., *abiogenetico*. Sp., *abiogenético*. Pertaining to or arising by abiogenesis.

ABIOGENY, n. Pr. a^{2}b-i-o^{2}j'e^{2}n-i^2. See ABIOGENESIS.

ABIOLOGICAL, adj. Pr. a^{2}b-i-o-lo^{2}j'i^{2}k-a^{2}l. Fr., *abiologique*. Ger., *abiologisch*. It., *abiologico*. Sp., *abiológico*. Not pertaining to biology. [A, 12.]

ABIONARCE (Lat.), n. f. Pr. a^{2}b(a^{3}b)-i(e)-o-na^{3}r'se(ka). From α priv., βίος, life, and νάρκη, torpor. Syn. : *torpor paralyticus*. An old term for torpor due to sinking of the powers of life. [A, 322.]

ABIOSIS, n. Pr. a^{2}b-i-o'si^{2}s. From α priv., and βιωσις, life. Lat., *defectus vitæ*. Ger., *Leblosigkeit*. Lifelessness. [A, 322.]

ABIOTICUS (Lat.), adj. Pr. a^{2}b(a^{3}b)-i(e)-o^{2}t'i^{2}k-u^{3}s(u^{4}s). Incapable of or incompatible with life. [A, 322.]

ABIOTUS (Lat.), adj. Pr. a^{2}b(a^{3}b)-i(e)-o'tu^{3}s(tu^{4}s). Gr., ἀβίωτος, ἀβίοτος, not to be survived. Incapable of life ; non-viable ; nigh unto death. [A, 322.]

ABIPSIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-i^{2}p'si^2-a^3. See ADIPSIA.

ABIRRITANT, adj. and n. Pr. a^{2}b-i^{2}r'i^{2}t-a^{2}nt. Fr., *abirritant*, *abirritatif*. 1. Having the property of lessening irritation. 2. Dependent on a state of abirritation (in Broussais's sense of the word [e. g., *maladies abirritatives*]). [A, 301, 306.]

ABIRRITATION, n. Pr. a^{2}b-i^{2}r-i^{2}t-a'shu^{3}n. Lat., *abirritatio* (see *Ab-** and IRRITATION). Fr., *abirritation*. Ger., *Reizverminderung*. It., *abirritazione*. Sp., *abirritación*. 1. Freedom from or diminution of irritation. 2. As employed by Broussais, a pathological lack of irritability ; asthenia ; atony. [A, 306 ; K, 4.]

ABIRRITÉ (Fr.), adj. Pr. a^{3}b-er-i^{2}t-a. In a state of abirritation.

ABIRRITER (Fr.), v. tr. Pr. a^{3}b-er-i^{2}t-a. To lessen sensibility or irritation. [A, 306.]

ABIRRUNG (Ger.), n. Pr. a^{3}b-i^{2}r'rung. Aberration.—**A. der Gläser.** Dioptric aberration. See *Spherical* ABERRATION.—**A. des Lichtes.** Aberration of light.—**Dioptrische A.** Dioptric aberration. See *Spherical* ABERRATION.—**A'swinkel.** See ANGLE *of deviation*.

ABISGA, n. A Central African term for the *Capparis sodada*. [A, 321.]

ABIT, n. Written also *aboit*. Probably from Ar., *abiad'*, white. [B, 52.] An old term for carbonate of lead. [A, 306.]

ABKLÄREN (Ger.), v. tr. Pr. a^{3}b'kla-re^{2}n. To clarify.

ABKNALLEN (Ger.), v. intr. Pr. a^{3}b'kna^{3}l-le^{2}n. To fulminate. [A, 315.]

ABKNISTERN (Ger.), v. tr. Pr. a^{3}b'-kni^{2}s-te^{2}rn. 1. To calcine. 2. To decrepitate. [A, 315.]

ABKOCHEN (Ger.), v. tr. and intr. Pr. a^{3}b'ko^2-ch^{2}e^{2}n. 1. To extract by boiling ; to make a decoction. 2. To be separated by boiling. [A, 315.]

ABKOCHUNG (Ger.), n. Pr. a^{3}b'ko^2-ch^{2}ung. A decoction. [B.]

ABKRÄNKELN (Ger.), v. intr. Pr. a^{3}b'kre^{2}n^{2}k-e^{2}ln. To be weakened from long illness. [A, 315.]

ABKRATZUNG (Ger.), n. Pr. a^{3}b'kra^{3}t-zung. An abrasion.

ABKRAUT (Ger.), n. Pr. a^{3}b'kra^3-ut. The *Eupatorium cannabinum*.

ABKÜHL-APPARAT (Ger.), n. Pr. a^{3}b'ku^{6}l-a^{3}p-pa^3-ra^{3}t''. A refrigerating apparatus.

ABKÜHLEN (Ger.), v. tr. Pr. a^{3}b'ku^{6}l-e^{2}n. To refrigerate.

ABKÜHLEND (Ger.), adj. Pr. a^{3}b'ku^{6}l-e^{2}nd. Refrigerant.

ABKÜHLUNG (Ger.), n. Pr. a^{3}b'ku^{6}l-ung. Refrigeration.—**A'smittel.** A refrigerant.

ABKÜRZUNG (Ger.), n. Pr. a^{3}b'ku^{6}r-tzung. The partial removal of a part, as of the tonsil.

ABLACTATE, v. tr. Pr. a^{2}b-la^{2}k'tat. Lat., *ablactare*. Ger., *ablaktiren*. To wean. [A, 302.]

ABLACTATION, n. Pr. a^{2}b-la^{2}k-ta'shu^{3}n. Gr., ἀπογαλακτισμός. [A, 314.] Lat., *ablactatio*. Fr., *ablactation*. Ger., *Ablactation*. It., *ablattazione*. Sp., *ablactación*. Weaning ; the cessation of lactation.—**A'sdiarrhöe** (Ger.). See DIARRHŒA *ablactatorum*.

ABLACTATUS (Lat.), adj. and n. m. Pr. a^{2}b(a^{3}b)-la^{2}k(la^{3}k)-ta(ta^3)'tu^{3}s(tu^{4}s). Weaned ; a weaned child.

ABLACTIREN (Ger.), v. tr. Pr. a^{3}b-la^{3}k-te're^{2}n. To wean.

ABLAGERUNG (Ger.), n. Pr. a^{3}b'la^{3}g-e^{2}r-ung. 1. A deposit (either a sediment or an infiltration). 2. A metastasis.

ABLANIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-la(la^3)'ni^2-a^3. Fr., *ablanie*. A genus of plants of the natural order *Liliaceæ*, of which only a single species is known, a tree growing in Guiana. [B, 38.]

ABLASTEMIC, adj. Pr. a^{2}b-la^{2}s-te^{2}m'i^{2}k. From α priv., and βλαστημος, a growth. Having no relation with germination. ["Nature," xxiii, 1881, p. 277 ; B, 39.]

ABLASTES (Lat.), adj. Pr. a^{2}b(a^{3}b)-la^{2}s(la^{3}s)'tez(te^{2}s). Gr., ἄβλαστης (from α priv., and βλάστη, a bud). Sterile. [A, 322.]

ABLASTOUS, adj. Pr. a^2-bla^{2}st'u^{3}s. For deriv., see ABLASTES. Bearing no bud or germ. [B.]

ABLATEUR (Fr.), n. Pr. a^{3}b-la^{3}t-u^{6}r. See ABLATOR.—**A. vulcanique.** In veterinary medicine, a cautery-iron used in the operation of castration. [A, 306.]

ABLATION, n. Pr. a^{2}b-la'shu^{3}n. Gr., ἀφαίρεσις. Lat., *ablatio* (from *auferre*, to take away). Fr., *ablation*. Ger., *Abnahme*, *Wegnahme*. It., *ablazione*. Sp., *ablación*. 1. The removal of a part, especially by a cutting operation. [C.] 2. (Obs.) the disappearance or remission of the acute symptoms of a malady. [B, 38.]

ABLATOR (Lat.), n. m. Pr. a^{2}b(a^{3}b)-la(la^3)'to^{2}r. Fr., *ablateur*. Ger., *Schafmesser*. An instrument for removing a part ; in veterinary medicine, one for removing sheep's tails. [A, 306.]

ABLAUFEND (Ger.), adj. Pr. a^{3}b'la^3-u-fe^{2}nd. Decurrent. [A, 320.]

ABLÄUTERN (Ger.), v. tr. Pr. a^{3}b'loi-te^{2}rn. To clarify, filter, purify. [A, 315.]

ABLEGMINA (Lat.), n. n. pl. Pr. a^{2}b(a^{3}b)-le^{2}g'mi^{2}n-a^3. The *partes extorum*, being the large viscera from which the haruspices drew their inspirations. [A, 312.]

ABLEITEN (Ger.), v. tr. and n. Pr. a^{3}b'li-te^{2}n. To derive ; derivation, revulsion. [A, 315.]

ABLEITEND (Ger.), adj. Pr. a^{3}b'li-te^{2}nd. 1. Derivative, revulsive. 2. Abducent (see ABDUCENS). 3. Deferent.—**A'e Gefässe.** Deferent vessels. [A, 315.]

ABLEITUNG (Ger.), n. Pr. a^{3}b'li-tung. Derivation, revulsion. —**A'smittel.** A derivative, a revulsive.

ABLENKER (Ger.), n. Pr. a^{3}b'le^{2}n^{2}k-e^{2}r. An abductor.

ABLEPHARIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-le^{2}f-a(a^3)'ri^2-a^3. From α priv., and βλέφἄρον, the eyelid. Fr., *ablépharon*. Ger., *Ablepharie*. It., *ablefaro*. Sp., *ablefarosis*. That state in which one or more of the eyelids are lacking or defective.—**Partial a.** Lat., *a. partialis*. Fr., *manque partiel des paupières*. Ger., *partieller Mangel der Augenlider*. It., *mancanza parziale delle palpebre*. Sp., *falta parcial de los párpados*. A congenital defect in or absence of one or more of the lids. [F.]—**Total a.** Lat., *a. totalis*.

Fr., *manque totale des paupières.* Ger., *gänzlicher Mangel der Augenlider.* It., *mancanza totale delle palpebre.* Sp., *falta total de los párpados.* Strictly speaking, the term means total absence of all four lids, but by some authors it has been used to describe that condition in which there is no inter-palpebral fissure, and hence no division into upper and lower lids. [F.]

ABLEPHARUS (Lat.), n. m. Pr. a^{2}b(a^{3}b)-le^{2}f'a^{3}r-u^{3}s(u^{4}s). Gr., ἀβλέφαρος. A subject of ablepharia (*q. v.*).

ABLEPSIA, ABLEPSY, n's. Pr. a^{2}b-le^{2}p'si^{2}a^2, a^{2}b'le^{2}p-si^2. Gr., ἀβλεψία. Lat., *cæcitas.* Fr., *ablepsie.* Ger., *Ablepsie.* It., *cecità.* Sp., *ceguera.* 1. Blindness. [F.] 2. An old synonym of apolepsia and epilepsy. [A, 322.]

ABLÖSEN (Ger.), v. tr. Pr. a^{3}b'lu^5-ze^{2}n. 1. To amputate. [E.] 2. To resolve, disperse. [A, 315.]

ABLÖSEND (Ger.), adj. Pr. a^{3}b'lu^5-ze^{2}nd. Resolvent, expectorant.

ABLÖSUNG (Ger.), n. Pr. a^{3}b'lu^5-zung. 1. Amputation. 2. The process of freeing a part from its attachments, as in plastic operations. 3. A detachment (as of the retina); desquamation.

ABLOTHRIDION, ABLOTHRIDIUM, n's. See AMBLOTHRIDION.

ABLUENT, adj. and n. Pr. a^{2}b'lu^2-e^{2}nt. Lat., *abluens* (from *abluere*, to wash away). Fr., *abluant.* Ger., *abluent, abluentirend.* Cleansing. See ABSTERGENT. [B.]

ABLUENTIA (Lat.), n. n., pl. of *abluens.* Pr. a^{2}b(a^{3}b)-lu^2(lu)-e^{2}n'shi^2(ti^2)-a^3. Fr., *abluants.* Ger., *Abluentien.* Abluents. See ABSTERGENT.

ABLUENTIREN (Ger.), v. tr. Pr. a^{3}b-lu-e^{2}n-te're^{2}n. To purge, purify. [A, 315.]

ABLUTION, n. Pr. a^{2}b-lu^2'shu^{3}n. Gr., ἀπόνιψις. Lat., *ablutio* (from *abluere*, to wash away). Fr., *ablution, lavement.* Ger., *Abwaschung.* It., *abluzione.* Sp., *ablución.* 1. (Rare) a lotion. 2. (Obs.) in chemistry, purification by infusing and washing.

ABLUTUS (Lat.), adj., perf. part. of *abluere.* Pr. a^{2}b(a^{3}b)-lu^2-(lu)'tu^{3}s(tu^{4}s). Washed.

ABMAGERUNG (Ger.), n. Pr. a^{3}b'ma^3-ge^2-rung. Emaciation; atrophy.

ABMATTUNG (Ger.), n. Pr. a^{3}b'ma^{3}t-tung. Debility; prostration. [A, 315.]

ABMEISSELN (Ger.), v. tr. Pr. a^{3}b'mis-se^{2}ln. To remove with a chisel.

ABNABELN (Ger.), v. tr. Pr. a^{3}b'na^3-be^{2}ln. To separate a new-born child from the mother by dividing the umbilical cord.

ABNABELUNG (Ger.), n. Pr. a^{3}b'na^3-be^{2}l-ung. Division of the umbilical cord.

ABNAHME (Ger.), n. Pr. a^{3}b'na^3-me^2. 1. Ablation, amputation. 2. A decline of strength or of a disease. [A, 315.]

ABNEHMEN (Ger.), v. tr. and intr. Pr. a^{3}b'na-me^{2}n. 1. To remove, amputate. 2. To waste away, decline. 3. To wean (said of the lower animals). [A, 315.]

ABNELECTEN, n. From Ger., *abneigend*, having an antipathy. An old term for alum, from its resistance to fire. [B, 44.]

ABNET (Heb.), n. Written also *abanet.* Pr. a^{2}b'ne^{2}t. Lit., the girdle worn by a Jewish priest; a girdle-like bandage. (Obs.) [B, 39.]

ABNORMAL, adj. Pr. a^{2}b-no^{2}r'ma^{2}l. Gr., ἀνώμαλης. Lat., *abnormis* (from *ab* [see *Ab-**], and *norma*, a rule). Fr., *anormal.* Ger., *abnorm, regelwidrig.* It., *anormale.* Sp., *anormal.* Irregular, not according to rule; unnatural.

ABNORMALITY, n. Pr. a^{2}b-no^{2}r-ma^{2}l'i^2-ti^2. See ABNORMITY.

ABNORMITY, n. Pr. a^{2}b-no^{2}rm'i^2-ti^2. Gr., ἀνωμαλία. Lat., *abnormitas.* Fr., *abnormité.* Ger., *Abnormität.* It., *anormalità.* Sp., *anormalidad.* An abnormal state, especially a malformation.

ABO, n. Pr. a^{3}b'o. A city in Finland, the seat of a mineral spring furnishing the aqua medicata kuppisensis.

ABOBORA (Port.), n. Pr. a^{3}b-o'bo-ra^3. 1. A common term for the pumpkin, the gourd, and the melon. 2. A genus of cucurbitaceous plants indigenous to South America. [B, 19, 44.]—**A. domata** (a Latinized form of the Portuguese, *A. do mato*). The *Bryonia tayuya*, a Brazilian species, the fruit of which is occasionally used in the treatment of dropsy. [B, 44.]

ABOBRA (Port.), n. Pr. a^{3}b-o'bra^3. A colloquial form of *abobora* (*q. v.*).

ABOBRINHA (Port.), n. Pr. a^3-bo-bre'n-ya^3. A colloquial form of *aboborinha* (dim. of *abobora*).—**A. do mato.** See ABOBORA *domata.*

ABOI (Fr.), n. Pr. a^{3}b-wa^3. See ABOIEMENT.

ABOIEMENT (Fr.), n. Written also *aboîment.* Pr. a^{3}b-wa^3-ma^{3}n^2. Gr., ὑλακή. Lat., *latratus.* Ger., *Bellen, Gebell.* It., *abbaiamento.* Sp., *ladrido.* A sound like the barking of a dog, produced within the body either by the movements of flatus or by abnormal phonation, as in persons suffering with hydrophobia, hysteria, or chorea. [A, 306, 321.] See also DÉLIRE *des aboyeuses.* —**A. du ventre.** See BORBORYGMUS.

ABOIT, n. See ABIT.

ABOLBODA, n. An Indian name for a genus of xyridaceous plants found in Central America. [A, 306.]

ABOLITIO (Lat.), n. f. Pr. a^{2}b(a^{3}b)-o-li^{2}sh(li^{2}t)'i^2-o. Generally said to be from *abolere*, to cause not to grow, or *abolescere*, to be annihilated; according to Kraus, from ἀπόλλυσθαι, to die away, to vanish. Gr., ἀφανισμὸς. Fr., *abolition.* Ger. *Tilgung.* It., *abolizione.* Sp., *abolición.* Abolition; a cessation or suspension (as of consciousness or any of the physiological processes).—**A. pulsus.** Syn.: *pulsus privatio.* Syncope; asphyxia.—**A. sensuum.** Ger., *Schwinden der Sinne* (oder *der Gefühle*). Loss of consciousness.

ABOMASUM, ABOMASUS (Lat.), n's, n., m. Pr. a^{2}b(a^{3}b)-o-ma(ma^3)'su^{3}m(su^{4}m, su^{3}s, su^{4}s). For deriv., see *Ab-** and OMASUM. Gr., ἤνυστρον. Fr., *caillette.* Ger., *Labmagen, Käsemagen, Röthe.* It., *abomaso, caglio.* Sp., *abomaso.* Syn.: *venter faliscus, ventriculus intestinalis.* The fourth or principal stomach of a ruminant animal. The mucous coat of the abomasum of the calf, or a preparation made from it (termed *rennet*), is used for curdling milk in the process of making cheese. [B.]

ABOMINATIO (Lat.), n. f. Pr. a^{2}b(a^{3}b)-o^{2}m-i^{2}n-a(a^3)'shi^2(ti^2)-o. From *abominari*, to abhor. Gr., ἀποσιτία. Fr., *abomination.* Ger., *Verabscheuung.* It., *abbominazione.* Sp., *abominación.* Syn.: *fastidium ciborum.* Abomination; a morbid loathing of food.

ABONDANCE (Fr.), n. Pr. a^{3}b-o^{2}n-da^{3}ns. Plethora. [K.]

ABORAL, adj. Pr. a^{2}b-o'ra^{2}l. From Lat., *ab*, away from, and *os*, the mouth. Agassiz's term for that part of an animal which is remote from the mouth. [B.]

ABORINHAWURZEL (Ger.), n. Pr. a^{3}b-o-re'na^3-vurt-ze^{2}l. The root of the *Abobora domata.*

ABORSEMENT, n. Pr. a^{2}b-o^{2}rs'me^{2}nt. An obsolete synonym of abortion. [A, 302.] For the deriv. of this and the intervening words, see ABORTION.

ABORSIO (Lat.), n. f. Pr. a^{2}b(a^{3}b)-o^{2}r'shi^2(si^2)-o. Abortion.

ABORSIVE, adj. Pr. a^{2}b-o^{2}r'si^{2}v. An obsolete form of *abortive.* [A, 302.]

ABORSUS (Lat.), n. m. Pr. a^{2}b(a^{3}b)-o^{2}r'su^{3}s(su^{4}s). Abortion.

ABORT, n. Pr. a^{2}b-o^{2}rt'. Ger., *Abort.* Abortion. (Obs.) [A, 302.]

ABORT, v. intr. Pr. a^{2}b-o^{2}rt'. Lat., *aboriri.* Gr., ἐκτιτρώσκειν. Fr., *avorter.* Ger., *abortiren.* It., *abortire.* Sp., *abortar.* 1. To suffer an abortion. 2. To fall short of full development, to come to an untimely end (said of a disease). The word is used also (but improperly) in an active sense; e. g., a remedy is said to abort a disease, i. e., to cut it short.

ABORTICIDE, n. Pr. a^{2}b-o^{2}rt'i^2-sid. Lat., *aborticidium.* Fr., *aborticide.* The destruction of a fœtus by causing abortion.

ABORTIENT, adj. Pr. a^{2}b-o^{2}r'she^{2}nt. Lat., *abortiens.* Abortive. [A, 302.]

ABORTIF (Fr.), adj. Pr. a^{3}b-o^{2}rt-ef. Abortive; abortifacient.

ABORTIFACIENT, adj. Pr. a^{2}b-o^{2}rt-i^2-fa'she^{2}nt. Gr., ἐκτρωτικος. Lat., *abortifaciens* (from *abortus*, abortion, and *facere*, to produce). Fr., *abortif.* Ger., *abortiv, abtreibend.* It., *abortivo.* Sp., *abortivo.* Syn.: *abortive.* Productive of abortion.

ABORTION, n. Pr. a^{2}b-o^{2}r'shu^{3}n. Gr., ἔκτρωμα. Lat., *abortus, aborsus, abortum, abortio* (from *aboriri*, to miscarry). Fr., *avortement, fausse couche, effluxion, blessure.* Ger., *Abort, Fehlgeburt, Abgang der Frucht, Verwerfen, Umschlag, Missfall, Unrichtiggehen.* It., *aborto, sconciatura.* Sp., *aborto.* 1. The termination of pregnancy by the expulsion of the ovum before the fœtus has become viable; in a stricter sense, the expulsion of the ovum before the completion of the third month of gestation (in the human subject), as distinguished from *miscarriage.* 2. A fœtus which has been expelled prematurely. 3. In botany, an arrest of development. [B.]—**Chronic a.** See *Habitual a.*—**Criminal a.** Lat., *abortus procuratio.* Fr., *avortement criminel.* Ger., *verbrecherischer Abortus.* It., *aborto criminoso.* Sp., *aborto criminal.* Syn.: *fœticide.* The act of inducing or attempting to induce a. for any other purpose than that of saving the mother's life.—**Embryonic a.** Fr., *avortement embryonnaire.* Guillemot's term for a. between the twentieth and the ninetieth days of gestation. [A, 120, 329.]—**Epidemic a.** Lat., *abortus epidemicus.* Fr., *avortement épidémique.* Ger., *epidemischer Abortus.* It., *aborto epidemico.* Sp., *aborto epidemial.* Various "epidemics" of a. have been described, notably one that was observed in France from 1813 to 1815 [Courhaut, A, 20]. Probably they were due either to the epidemic prevalence of some constitutional disease, to ergotism, or to emotional disturbances, privation, etc., arising from some publ c calamity, such as a siege.—**Fœtal a.** Fr., *avortement fœtal.* Guillemot's term for a. between the third and sixth months. [A, 120, 329.]—**Habitual a.** Lat., *abortus habitualis.* Fr., *avortement périodique.* Ger., *habituelles Absterben der Frucht.* It., *aborto abituale.* Sp., *aborto habitual.* The repeated occurrence of a. in the same individual in successive pregnancies, formerly imputed to "habit."—**Incomplete a.** Ger., *unvollkommener* (oder *protrahirter*) *Abortus.* Protracted a.; one in which an unusual delay occurs, so that portions of the ovum are retained. See also *Cervical* PREGNANCY.—**Induced a.** Fr., *avortement artificiel* (ou *provoqué*). Ger., *eingeleiteter Abortus.* It., *aborto procurato.* Sp., *aborto provocado.* A. produced intentionally.—**Missed a.** It., *aborto mancato.* J. M. Duncan's term for that condition in which the ovum is retained in the uterus for a considerable time after its death, and the fœtus is macerated or mummified, and finally expelled. ["Med. Times and Gaz.," Dec. 28, 1878. p. 729.]—**Ovular a.** Fr., *avortement ovulaire.* Guillemot's term for a. before the twentieth day. [A, 120, 329.]—**Partial a.** Fr., *avortement partiel.* A. resulting in the expulsion of one fœtus (or fewer than the whole number) in cases of multiple gestation.—**Provoked a.** See *Induced a.*—**Spontaneous a.** Fr., *avortement spontané.* A. not due to interference or to any known accidental cause.

ABORTIONIST, n. Pr. a^{2}b-o^{2}r'shu^{3}n-i^{2}st. One who practises criminal abortion.

ABORTIREN (Ger.), v. tr. and intr. Pr. a^{3}b-o^{2}rt-e're^{2}n. To cause or suffer abortion.

ABORTIUM (Lat.), n. n. Pr. a^{2}b(a^{3}b)-o^{2}r′shi^2(ti^2)-u^{3}m(u^{4}m). Abortion.

ABORTIVA (Lat.), n. n., pl. of *abortivum* (*q. v.*).

ABORTIVE, adj. Pr. a^{2}b-o^{2}rt′i^{2}v. Gr., ἐκτρωματικος. Lat., *abortivus.* Fr., *abortif.* Ger., *abortiv.* It., Sp., *abortivo.* 1. Born prematurely; undeveloped or imperfectly developed. In botany, an a. stamen is one that has no anther or only a rudimentary one; an a. flower is one that falls without leaving any trace of fecundation. [A, 300.] 2. Cutting short the course of a disease. See *Abortive* TREATMENT. 3. A disease or a lesion is said to be abortive when, after having begun in the usual way, it suddenly disappears or stops short in its progress. 4. Productive of abortion. See ABORTIFACIENT.

ABORTIVUM (Lat.), n. n. Neut. of adj. *abortivus.* Pr. a^{2}b-(a^{3}b)-o^{2}rt-i(e)′vu^{3}m(wu^{4}m). 1. An abortifacient. 2. An abortion.

ABORTUM (Lat.), n. n. Pr. a^{2}b(a^{3}b)-o^{2}rt′u^{3}m(u^{4}m). Abortion.

ABORTUS (Lat.), n. m. Pr. a^{2}b(a^{3}b)-o^{2}rt′u^{3}s(u^{4}s). Abortion.—**A. crebro redeuns, A. habitualis, A. periodicus.** Habitual abortion.—**A. procuratio.** Criminal abortion.—**Eingeleiteter (künstlicher) A.** (Ger.). Induced abortion.—**Verbrecherischer A.** (Ger.). Criminal abortion.

ABOUCHEMENT (Fr.), n. Pr. a^{3}b-ush-ma^{3}n^2. Ger., *Einmündung.* It., *abboccamento.* Sp., *abocamiento.* The termination of a canal in a larger one or in a hollow organ (e. g., of the thoracic duct in the subclavian vein or of the ureter in the bladder). [A, 300, 321.] It is to be distinguished from *anastomosis* (*q. v.*).

ABOUKIR, n. Pr. a^3-bu-ker′. A village in the Algerian province of Oran, with a mineral spring containing sodium chloride and a small amount of iron. [A, 321.]

ABOULAZA, n. Written also *abulaza* and *abroulaza.* A tree of Madagascar, used by the natives in the treatment of heart diseases. [B, 44.]

ABOULOMANIA, n. Pr. a^{2}b-u-lo-ma′ni^2-a^3. For deriv., see ABULIA and MANIA. W. A. Hammond's term for a form of insanity characterized by an inertness, torpor, or paralysis of the will, the other mental faculties not being necessarily affected. [A, 10.]

ABOUSSENNA, n. An Abyssinian name for the *Albizzia anthelminthica.* [A, 328.]

ABOUTIR (Fr.), v. intr. Pr. a^{3}b-u-ter. To end in suppuration (said of phlegmons); to break and discharge (said of abscesses). [E.]

ABOUTISSEMENT (Fr.), n. Pr. a^{3}b-u-tes-ma^{3}n^2. 1. A termination, as of the spine of the scapula in the acromion. [A, 300.] 2. The pointing of an abscess. [A, 321.]

ABOYEUR, ABOYEUSE (Fr.), n's. Pr. a^{3}b-wa^3-yu^{5}r(yu^{5}z). Lit., a barker; one who, under the influence of disease, makes a barking sound with the voice. [A, 321.] See DÉLIRE *des aboyeuses.*

ABPÄHLEN (Ger.), v. intr. Pr. a^{3}b′pa-le^{2}n. To suffer loss of the hair. [A, 305.]

ABPRÄPARIREN (Ger.), v. tr. Pr. a^{3}b′pra-pa^3-re-re^{2}n. To dissect away, to set free by dissection.

ABRABAX, n. See ABRAXAS.

ABRACADABRA, n. Written also (more correctly, says Littré) *abrasadabra.* Pr. a^{3}b-ra^3-ka^3-da^3′bra^3. A magical word used formerly in the East as a charm against certain diseases, especially malarial fevers. It was spoken, or worn on the person figured on an amulet in one of the following triangular forms:

ABRACADABRA	ABRACADABRA	ABRACADABRA
ABRACADABR	BRACADABR	BRACADABRA
ABRACADAB	RACADAB	RACADABRA
ABRACADA	ACADA	ACADABRA
ABRACAD	CAD	CADABRA
ABRACA	A	ADABRA
ABRAC		DABRA
ABRA		ABRA
ABR		BRA
AB		RA
A		A

ABRACALAM, ABRACALAN, ABRACALARS, n's. Pr a^{3}b-ra^3-ka^{3}l-a^{3}m(a^{3}n, a^{3}rz)′. Cabalistic words to which the Jews attributed virtues like those imputed to *abracadabra.* [A, 306.]

ABRACAX, n. See ABRAXAS.

ABRACHIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-ra(ra^3)′ki^2(ch^{2}i^2)-a^3. From α priv., and βραχίων, the arm. Fr., *abrachie.* Ger., *Abrachie.* Congenital absence of the arms.

ABRACHIOCEPHALIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-ra(ra^3)-ki^2-(ch^{2}i^2)-o-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)′i^2-a^3. From α priv., βραχίων, the arm, and κεθαλή, the head. Fr., *abrachiocéphalie.* Congenital absence of the head and arms.

ABRACHIUS (Lat.), n. m. Pr. a^{2}b(a^{3}b)-ra(ra^3)′ki^2(ch^{2}i^2)-u^{3}s-(u^{4}s). A subject of abrachia (*q. v.*).

ABRACO-PALO, n. Pr. a^3-bra^3′ko-pa^3′lo. A South American name for the *Epidendrum nodosum.* [A, 321.]

ABRADE, v. tr. Pr. a^{2}b-rad′. From Lat., *abradere,* to rub off. Fr., *racler.* Ger., *wegkratzen.* It., *radere.* Sp., *abrasar.* To remove the surface. especially of the skin, by friction.

ABRAHAM, n. Pr. a′bra^3-ha^{2}m. See CORNET.—**A's balm.** Ger., *Abrahamsbaum, Abrahamstrauch.* The chaste-tree. See VITEX *agnus castus.* [B, 39.]—**Sham A.** To feign sickness or infirmity. [A, 302.]

ABRAKH, n. Pr. a^{3}b′ra^{3}k. According to Power and Sedgwick, a Hindu name for mica; used, calcined, in the treatment of fevers. [A, 316.]

ABRANCHIATA (Lat.), n. n. pl. Pr. a^{2}b(a^{3}b)-ra^{2}n^2(ra^{3}n^2)-ki^2-(ch^{2}i^2)-a(a^3)′ta^3. From α priv., and βράγχια, gills. Fr., *abranches.* Ger., *Abranchien.* Sp., *abranquios.* Syn.: *abrancha, abranchia, abranchians, abranchiates.* A section of the *Annelida* characterized by the absence of gills, or branchiæ; including the orders *Hirudinea* (leeches) and *Oligochæta* (earth-worms). [B, 28.]

ABRANCHIATE, adj. Pr. a^{2}b-ra^{2}n^2′ki^2-at. Gr., ἀβράγχος. Lat., *abranchus.* Fr., *abranche.* Ger., *kiemenlos.* Sp., *abranquio.* Destitute of gills. [B.]

ABRANDKRAUT (Ger.), n. Pr. a^{3}b′ra^{3}nd-kra^3-ut. The genus *Artemisia.*

ABRASADABRA, n. Pr. a^{3}b-ra^3-sa^3-da^3′bra^3. See ABRACADABRA.

ABRASAX, ABRASAXAS, n's. Pr. a^{3}b′ra^3-sa^{3}x(sa^{3}x′a^{3}s). See ABRAXAS.

ABRASIN, n. Pr. a^{2}b′ra^3-si^{2}n. A name given by Kæmpfer to a Japanese plant, the *Elæococca cordata,* from which an acrid fixed oil is obtained by expression. [B, 46.]

ABRASIO (Lat.), n. f. Pr. a^{2}b(a^{3}b)-ra(ra^3)′zhi^2(si^2)-o. From *abradere,* to scrape off. An abrasion.—**A. intestinalis.** An expression sometimes applied to a condition characterized by the discharge of membranous shreds from the bowels. [A, 328.]—**A. intestinorum.** Fr., *ulcération des intestins.* A superficial ulceration of the intestinal mucosa. [A, 323.]

ABRASION, n. Pr. a^{2}b-ra′zhu^{3}n. Gr., ἀποσύρμα, ἀποξύρησις, ἀπόξυσις. Lat., *abrasio* (*q. v.* for deriv.). Fr., *abrasion.* Ger., *Abschaben, Abreiben.* It., *abrasione.* Sp., *raspadura.* Syn.: *excoriation.* 1. The accidental or intentional rubbing or scraping away of a superficial portion of tissue or an incrustation (cf. ERASION), also the resulting lesion. [A, E, G.] 2. A similar loss of substance by ulceration. [F.]

ABRASOR (Lat.), n. m. Pr. a^{2}b(a^{3}b)-ra(ra^3)′zo^{2}r(so^{2}r). For deriv., see ABRASIO. Gr., ξύστρα. Fr., *rugine.* Ger., *Beinfeile.* It., *abrasore.* Sp., *raspadera.* See RASPATORY.

ABRASUM (Lat.), n. n. Pr. a^{2}b(a^{3}b)-ra(ra^3)′su^{3}m(su^{4}m). An abrasion. [A, 322.]

ABRASUS (Lat.), adj. Pr. a^{2}b(a^{3}b)-ra(ra^3)′su^{3}s(su^{4}s). Abraded.

ABRATHAN, n. Pr. a^{3}b-ra^3-tha^{3}n′. Said to be a corruption of *abrotanum.* [A, 316.] See ARTEMISIA *abrotanum.*

ABRAUCHEN (Ger.), v. tr. and intr. and n. Pr. a^{3}b′ra^3-u-ch^{2}e^{2}n. To evaporate, to cause to evaporate; volatilization. [B.]

ABRAUCHSCHALE (Ger.), n. Pr. a^{3}b′ra^3-uch^2-sha^3″le^2. An evaporating vessel.

ABRAUTE (Ger.), n. Pr. a^{3}b′ra^3-u-te^2. See ARTEMISIA *abrotanum.*

ABRAXAS, n. Written also *abrabax, abracax,* and *abrasax.* Pr. a^{3}b-ra^{3}x′a^{3}s. A mystical word made up of the Greek letters α, β, ρ, α, ξ, α, ς, expressing the number 365, being the number of the heavens, according to the Egyptian gnostic, Basilides; hence, the deity. Jewels engraved with the word were worn as amulets. [A, 300, 314, 327.]

ABRE (Fr.), n. Pr. a^{3}br. The botanical genus *Abrus.*

ABREIBUNG (Ger.), n. Pr. a^{3}b′ri-bung. An abrasion.

ABREISSEN, ABREISSUNG (Ger.), n's. Pr. a^{3}b′ris-se^{2}n, sung. Avulsion.

ABRESCHBAUM, ABRESCHE (Ger.), n's. Pr. a^{3}b′re^{2}sh-ba^3-um(e^2). See EBERESCHE.

ABRESHAIN, n. According to Power and Sedgwick, an East Indian aphrodisiac made of white silk cut up very fine.

ABREST (Fr.), n. Pr. a^{3}b-re^{2}st. An alkaline spring resembling those of Vichy, situated near the latter. [A, 316.]

ABRETTE (Fr.), n. Pr. a^{3}b-re^{2}t. See *Semen* ABELMOSCHI.

ABRI (Fr.), n. Pr. a^3-bre. Sp., *abrigo.* Lit., a protection against the wind; a natural or artificial grove, or other collection of plants, considered as a sanitary agent. [Tollard, A, 330.]

ABRIC (Ar.), n. An old term for sulphur. [A, 325.]

ABRINDEN (Ger.), v. tr. Pr. a^{3}b′ri^{2}nd-e^{2}n. To decorticate, to excoriate.

ABRODIÆTA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-ro-di(de)-e′(a^3′e^2)-ta^3. From ἀβρός, delicate, and δίαιτα, mode of life. Sp., *abrodeita.* A dainty course of life. [A, 322.]

ABRODIÆTUS (Lat.), adj. Pr. a^{2}b(a^{3}b)-ro-di(de)-e′(a^3′e^2)-tu^{3}s(tu^{4}s). Gr., ἀβροδίαιτος. Leading a delicate course of life. [A, 322.]

ABROMA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-ro′ma^3. From α priv., and βρῶμος, a stink [A, 334], or α priv., and βρῶμα, food = unfit for food [A, 336]. Fr., *abrome.* Ger., *Cacaomalve.* Sp., *abromas.* A genus of trees, found in India, Java, and New Holland, belonging to the tribe *Büttneriæ* of the order *Sterculiaceæ.* [B, 19, 41, 42.]—**A. augusta, augustum.** The *wollut comul,* or *wullut cumal,* of Bengal; a species from the bark of which a tough fiber is obtained, used for cordage, and which furnishes a milky juice that has been used as a remedy for dysmenorrhœa. [B, 5, 19.]—**A. fastuosa** [R. Brown]. An evergreen species indigenous to New South Wales, but naturalized in England. [B, 43.]—**A. mollis.** A species indigenous to the Molluccas and the Sunda Islands, furnishing, like the other species, fibers fit for making cordage, coarse fabrics, and paper. [B.]

ABROMOTOUN, n. Pr. a^{3}b-ro′mo-tun. According to Power and Sedgwick, the Ashantee name of a plant of which the bruised leaves are used as a discutient for boils. [A, 316.]

ABRONG, n. Pr. a^{3}b′ro^{2}ng. According to Power and Sedgwick, a bitter, laxative, and vermifuge round grain, spotted with black and white, said to have been brought from China. [A, 316.]

ABRONIA [Jussieu] (Lat.), n. f. Pr. a^{2}b(a^{3}b)-ro′ni^2-a^3. Fr., *abronie*. Syn.: *tricratus* [L'Heritier]. A genus of nyctagineous plants indigenous to California. [A, 306; B, 19.]

ABROS (Lat.), n. m. Pr. a^{2}b(a^{3}b)′ro^{2}s. See ABRUS.

ABROSIA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-ro′zi^2(si^2)-a^3. Gr., ἀβρωσία. Fasting. [A, 311.]

ABROSUS (Lat.), adj. Pr. a^{2}b(a^{3}b)-ro′su^{3}s(su^{4}s). Perf. part. of *abrodere*, to gnaw away. Corroded. [A, 318.]

ABROTANELLE (Fr.), n. Pr. a^{3}b-ro^{3}t-a^{3}n-e^{2}l. A genus of plants, of the order *Compositæ*, found in the Falkland Islands. [A, 306; B.]

ABROTANUM (Lat.), n. n. Written also, more properly, *abrotonum*. Pr. a^{2}b(a^{3}b)-ro^{2}t′a^{3}n-u^{3}m(u^{4}m). Gr., ἀβρότονον. Fr., *abrotone, aurone, citronelle*. Ger., *Eberrautenkraut, Beifuss*. It., *abrotano*. Sp., *abrótano*. Southernwood. See ARTEMISIA *abrotanum*.

ABROTONITES (Lat.), n. m. Pr. a^{2}b(a^{3}b)-ro^{2}t-o-ni(ne)′tez-(te^{2}s). Gen., *abrotonitæ*. Gr., ἀβροτονίτης (οἶνος understood). Sp., *abrotónita, abrotónito*. An ancient term for a wine prepared with southernwood. [A, 312.]

ABROTONOÏDE (Fr.), adj. Pr. a^{3}b-ro^{2}t-o^{2}n-o-ed. Resembling southernwood. [A, 306.]

ABROTONUM (Lat.), n. n. Pr. a^{2}b(a^{3}b)-ro^{2}t′o^{2}n-u^{3}m(u^{4}m). See ABROTANUM.

ABROULAZA, n. See ABOULAZA.

ABRUM, n. An old term for amber. [A, 336.]

ABRUPTION, n. Pr. a^{2}b-ru^{3}p′shu^{3}n. Lat., *abruptio* (from *ab* [see *Ab-*] and *rumpere*, to break). Gr., ἀπόρρηξις. Fr., *abruption*. Ger., *Abbrechung*. It., *rottura*. Sp., *abrupción*. 1. A tearing apart; a rupture. 2. (Obs.) a transverse fracture of a bone. [E.]

ABRUPTI-PINNATUS (Lat.), adj. Pr. a^{2}b(a^{3}b)-ru^{3}p(ru^{4}p)″-ti^2-pi^{2}n-a(a^3)′tu^{3}s(tu^{4}s). Fr., *abrupti-pinné*. See *Abruptly* PINNATE.

ABRUS (Lat.), n. m. Pr. a^{2}b(a^{3}b)′ru^{3}s(ru^{4}s). Gr., ἀβρός, pretty, elegant. Fr., *abre*. A name given by Prosper Alpinus to a genus of plants of the order *Leguminosæ*, sub-order *Papilionaceæ*, and tribe *Phaseolæ*. [B.]—**A. precatorius.** From *preces*, a prayer, from the beans being used as beads. Fr., *liane à réglisse*. Ger., *indisches Süssholz*. Syn.: *Glycine abrus* [Linn.], *wild* (or *country*, or *Jamaica*) *licorice, licorice bush, red bean, love pea, jequirity*. A species indigenous to Africa and tropical Asia, which has been transplanted to America. The beans (*Angola seeds*; Fr., *pois d'Amérique, pois rouges des Indes, graines de jéquiriti*; Ger., *Paternostererbsen, Giftbohnen, indianische rothe Erbsen*) are used in India as a standard of weight, and an infusion made from them has lately come into use among ophthalmologists as a means of exciting an artificial purulent ophthalmia for the cure of pannus. On the coast of Malabar a decoction of the leaves is used for cough and affections of the throat. [De Wecker, "Ann. d'oc.," July-Aug., 1882, p. 24; A, 316, 328; B, 19.]

ABRUTISSEMENT (Fr.), n. Pr. a^{3}b-ru^{6}t-es-ma^{3}n^2. A considerable enfeeblement of the intellectual faculties without paralysis. [A, 321.]

ABSAC (Fr.), n. Pr. a^{3}b-sa^{3}k. See AVAILLES.

ABSÄGEN (Ger.), n. Pr. a^{3}b′za-ge^{2}n. 1. Amputation. 2. Ainhum.

ABSÄUGEN, ABSÄUGUNG (Ger.), v. tr., n. Pr. a^{3}b′zoig-e^{2}n, -ung. 1. To give suck; lactation. 2. To wean; weaning.

ABSCEDENTIA (Lat.), n. n., pl. of *abscedens*. Pr. a^{2}b(a^{3}b)-se(ske^2)-de^{2}n′shi^2(ti^2)-a^3. Gr., ἀφεστέωτα. A term which Hippocrates seems to have used to designate those parts, such as the bones, which were supposed to be prone to break down by ulceration as the result of impaired general health. [A, 325.]

ABSCEDIREN (Ger.), v. intr. Pr. a^{3}bs-tze^{2}d-e′re^{2}n. To form an abscess, to suppurate.

ABSCESS, n. Pr. a^{2}b′se^{2}s. Gr., ἀπόστημα. Lat., *abscessus* (from *abscedere*, to depart). Fr., *abcès*. Ger., *Abscess*. It., *ascesso*. Sp., *abceso*. Syn.: *gathering, rising*. Properly, a collection of pus in a cavity formed as the result of suppuration (not an infiltration with pus or a collection in a natural cavity, although often applied to those conditions). Anciently the word was taken in its literal meaning, a departure, *abscessus* being the opposite of *accessus* (an onset), and the formation of an abscess being looked upon as the way in which a disease took its departure. [A, 334.]—**A. of proximity.** Fr., *abcès de voisinage*. An a. formed in the neighborhood of a diseased structure, and in consequence of the disease, but not communicating directly with the original lesion. The term is generally applied to a'es due to disease of a bone or joint, but has been used in describing those connected with stricture of the rectum. [A, 294; Nicaise, "Rev. de chir.," June, 1885, p. 486.] See also ABCÈS *froid extra-périostique*.—**Acute a.** Lat., *abscessus acutus*. Fr., *abcès aigu* (ou *chaud*). Ger., *acuter* (oder *heisser*, oder *calider*) *A*. One that results from an acute inflammation of the part in which the a. forms. [E.]—**Adenöser A.** (Ger.). See *Glandular a.*—**Alveolar a.** Lat., *abscessus alveolaris*. Fr., *abcès alvéolaire*. Ger. *Alveolarabscess*. An a. originating beneath the periosteum of the socket (alveolus) of a tooth. [A, 292.] Cf. PARULIS.—**Antemammary a.** See *Subcutaneous mammary a.*—**Bartholinian a.** It., *ascesso bartoliniano*. An a. resulting from suppuration of the vulvo-vaginal (Bartholin's) gland or its duct. [A, 314.]—**Biliary a.** Fr., *abcès biliaire*. An a. connected with the gall-bladder or a bile-duct.—**Bursal a.** Suppuration of a bursa mucosa. [A, 316.] Cf. *Lymphatic a.*—**Calider A.** (Ger.). See *Acute a.*—**Caseous a., cheesy a.** Fr., *abcès caséeux*. 1. (Fr., *abcès caséeux d'emblée*) a broken-down condition of a tubercular gumma, the cavity of which contains thick cheesy masses together with a serous or viscid liquid. 2. (Fr., *abcès caséeux consécutif*) a cold a. with its contents condensed to a cheesy consistence. [Nicaise, *l. c.*]—**Chronic a.** See *Cold a.*—**Circumscribed a.** One that is definitely limited by a wall of lymphy exudate.—**Cold a.** Lat., *abscessus frigidus*. Fr., *abcès froid*. Ger., *kalter A*. It., *ascesso freddo*. Sp., *abceso* (o *tumor*) *frio*. One that results from a chronic (particularly a scrofulous) inflammation. [E.] The tendency is to restrict the term to a'es that result from the breaking down of tubercular deposits. Delpech makes it include his *abcès soudain* (*q. v.*).—**Congestive a.** Lat., *abscessus congestionis* (seu *congestivus*, seu *per congestum*). Fr., *abcès par congestion*. Ger., *Congestionsabscess, Senkungsabscess*. Sp., *abceso por congestión*. See *Wandering a.* Boyer restricted the term to a'es due to caries of the vertebræ or of a large joint, like the hip. [S. Laugier, A, 329.]—**Consecutive a.** Fr., *abcès consécutif*. See *Critical a.*—**Constitutional a.** Fr., *abcès constitutionel*. An a. due to a constitutional disease. [A, 306.]—**Critical a.** Fr., *abcès critique*. Ger., *kritischer A*. An a. which forms during the course of an acute disease, general or local, and, if it does not itself prove fatal, seems to exercise a salutary influence. [A, 329.]—**Dental a.** Fr., *abcès dentaire*. Ger., *Zahnabscess*. See *Alveolar a.*—**Dermoid a.** An expression used by W. H. Van Buren, apparently for the small cutaneous a'es (*abcès dermiques*) of French writers, characteristic of the *scrofulide phlegmoneuse* of Hardy. [A, 294; *a*, 3.]—**Diathetic a.** Fr., *abcès diathésique*. An a. due to a diathesis.—**Diffuse a.** Fr., *abcès diffus*. See *Purulent* INFILTRATION.—**Embolic a.** Lat., *abscessus embolicus*. Ger., *embolischer A*. An a. due to arterial or capillary embolism. [Cohnheim, D, 3.]—**Emphysematous a.** See *Tympanitic a.*—**Encysted a.** Fr., *abcès enkysté*. 1. Suppuration of a cystic tumor. [A, 330.] 2. A circumscribed accumulation of pus in a serous sac.—**Epithelial a.** An a. "located in epithelia." [A, 293.]—**Fæcal a.** Lat., *abscessus stercoralis* (seu *stercorosus*). Fr., *abcès stercoral*. Ger., *Kothabscess*. It., *ascesso fecale*. Sp., *abceso fecal*. An a. communicating with the intestinal canal and containing fæcal matter.—**Follicular a.** Lat., *abscessus follicularis*. An a. formed in an inflamed follicle.—**Glandular a.** Lat., *abscessus adenosus*. Fr., *abcès glandulaire*. Ger., *adenöser A.*, *Drüsenabscess*. An a. in or around a lymphatic gland.—**Gravitation a.** See *Wandering a.*—**Hæmatic a.** Fr., *abcès hématique*. An a. due to a broken-down clot of extravasated blood.—**Heisser A.** (Ger.). An acute a.—**Hypostatic a.** See *Wandering a.*—**Idiopathic a.** Fr., *abcès idiopathique*. One formed independently of any other disease. [E.]—**Iliac a.** Lat., *abscessus in fossa iliaca*. Fr., *abcès iliaque* (ou *de la fosse iliaque*). It., *ascesso della fossa iliaca*. Sp., *abceso de la fosa iliaca*. A wandering a. which points in the iliac region.—**Infecting mitral a.** An embolic a. due to the detachment of lymph deposited on the valves in endocarditis. [A, 316.]—**Interlamellar a. of the membrana tympani.** Fr., *abcès lamelleux de la membrane du tympan*. Ger., *interlamellärer A. des Trommelfells*. It., *ascesso lamelloso della membrana del timpano*. Sp., *abceso lameloso de la membrana del timpano*. A collection of pus formed within or between the laminæ of the substantia propria of the tympanic membrane, the result of myringitis or, sometimes, of otitis media. [F, 3.]—**Ischio-rectal a.** Fr., *abcès de la fosse ischio-rectale*. Sp., *abceso de la fosa izquio-rectal*. An a. of the ischio-rectal fossa. [E.]—**Kalter A.** (Ger.). See *Cold a.*—**Kritischer A.** (Ger.). See *Critical a.*—**Lacrymal a.** Fr., *abcès lacrymal*. An a. of the lacrymal sac.—**Lacunar a.** Suppuration of a urethral lacuna. [A, 316.]—**Lufthaltiger A.** (Ger.). See *Tympanitic a.*—**Lumbar a.** Lat., *abscessus lumbaris*. Fr., *abcès lombaire*. Ger., *A. der Weichengegend*. It., *ascesso lombare*. Sp., *abceso lumbar*. A wandering a. which points in the lumbar region.—**Lymphatic a.** Lat., *abscessus lymphaticus* (seu *bursalis*). Fr., *abcès lymphatique* (ou *de la lymphe*). Ger., *Lymphabscess*. It., *ascesso linfatico*. 1. Suppuration of a lymphatic gland. 2. (Obs.) an enlarged bursa mucosa. [A, 331.]—**Mammary a.** Lat., *abscessus mammæ*. Fr., *abcès mammaire* (ou *de la mamelle*). Ger., *Brustdrüsenabscess*. An a. of the mammary gland. Cf. *Milk a.*, *Sub-mammary a.*, and *Supra-mammary a.*—**Marginal a.** A superficial a. situated near the orifice of the anus. [A, 294.]—**Mastoid a.** Suppuration in the cells of the mastoid portion of the temporal bone.—**Metastatic a.** Lat., *abscessus metastaticus*. Fr., *abcès métastatique*. Ger., *metastatischer A*. It., *ascesso metastasico*. Sp., *abceso metastasico*. Syn.: *secondary a*. These a'es occur in pyæmia; they are usually multiple, of embolic origin, and situated most commonly in the lungs and the liver.—**Microscopical a.** Ger., *mikroscopischer A*. Stricker's term for a minute collection of necrosed cells, as in the cornea. [Albert, A, 319.]—**Miliary a.** A minute a. of embolic origin.—**Milk a.** Lat., *abscessus lacteus*. Fr., *abcès laiteux*. Ger., *Milchabscess*. An a. of the mammary gland during lactation.—**Multiple a.** Fr., *abcès multiple*. Ger., *allgemeine A'bildung*. A condition characterized by the formation of numerous metastatic a'es; one of the features of pyæmia. [E.]—**Mural a.** An a. of the wall of a splanchnic cavity. The term is commonly applied to the a'es that sometimes form in the abdominal wall after laparotomy.—**Ossifluent a.** Fr., *abcès ossifluent*. Sp., *abceso osifluente*. An a. which has its origin in diseased bone, as in Pott's disease. [E.]—**Otic cerebral a., Otitic cerebral a.** Fr., *abcès cérébral otique*. Ger., *otitischer Gehirnabscess*. It., *ascesso cerebrale otico*. Sp., *abceso cerebral otico*. An a. of the brain due to purulent disease of the ear. [F, 3.]—**Parametritic a., Parametric a.** Fr., *abcès paramétritique*. Ger., *parametritischer A*. An a. of the cellular tissue of the pelvis in the female, particularly between the folds of the broad ligament of the uterus and around the upper part of the vagina.—**Perimetritic a., Perimetric a.** A circumscribed collection of pus within the peritonæum, arising from inflammation of the peritoneal covering of the uterus. [A, 236.]—**Perinephritic a., Perinephric a.** An a. in the loose connective tissue surrounding the kidney. [E.]—**Peripleuritic a.** An a. formed in the connective tissue beneath the parietal pleura, usually as the result of pleurisy, disease of a rib, or injury. [A, 296.]—**Peritoneal a.** A term some-

times applied to encysted collections of softened exudate in cases of peritonitis.—**Phlegmonous a.** Fr., *abcès phlegmoneux.* Ger., *phlegmonöser A.* It., *ascesso flemmonoso.* Sp., *abceso flemonoso.* An acute a. formed in connective tissue.—**Post-fascial a.** See *Subfascial a.*—**Post-mammary a.** See *Submammary a.*—**Post-pharyngeal a.** See *Retro-pharyngeal a.*—**Prelacrymal a.** Fr., *abcès prélacrymal.* Ger., *A. vor dem Thränensack.* It., *ascesso prelacrimale.* Sp., *abceso prelagrimal.* A swelling at the inner canthus, above the canthal ligament, in the hollow of the lacrymal bone, immediately beneath the upper margin of the orbit. It has a distinct cyst-wall communicating at the bottom with a hole leading into the ethmoid cells. It is due to caries of the lacrymal or ethmoid bone, and has no connection with the lacrymal sac. [F.]—**Pre-peritoneal a.** See *Subperitoneal a.*—**Progressive ulcerative a. of the cornea.** See *Reapers'* KERATITIS.—**Psoas a.** Lat., *abscessus psoadicus.* Fr., *abcès psoïque.* Ger., *Psoasabscess, Lendenmuskelabscess.* A wandering a. which, originating from a carious vertebra, has followed the course of the psoas muscles and points in the groin or at the sacro-ischiadic foramen. Occasionally the term is applied also to a. of the psoas muscle (more properly called psoitis).—**Puerperal a.** According to Power and Sedgwick, a form occurring in infants, in which hard nodules form under the skin and rapidly soften, the skin over them having become reddened, thinned, and painful. [A, 316.]—**Pyæmic a.** See *Metastatic a.*—**Residual a.** 1. An a. formed in or about the cicatrix left by a preceding a. 2. A chronic a. of which the contents have for the most part been absorbed. [Sir J. Paget, "St. Barth. Hosp. Rep.," 1869, p. 73.]—**Retro-mammary a.** See *Submammary a.*—**Retro-œsophageal a.** An a. situated between the œsophagus and the vertebral column.—**Retro-peritoneal a.** See *Subperitoneal a.*—**Retro-pharyngeal a.** Lat., *abscessus retropharyngealis.* Fr., *abcès rétro-pharyngien.* Ger., *Retropharyngealabscess.* It., *ascesso retrofaringeo.* Sp., *abceso retrofaringeo.* 1. An a. formed between the vertebral column and the posterior wall of the pharynx. 2. An a. which, originating from disease of a cervical vertebra, has traveled to the space behind the pharynx. —**Scrofulous a.** Fr., *abcès scrofuleux.* Ger., *scrophulöser A.* Syn.: *strumous a.* 1. A glandular a. due to scrofula. 2. Any chronic a. in a scrofulous person.—**Secondary a.** Fr., *abcès consécutif.* Ger., *secundärer A.* See *Metastatic a.*—**Septicæmic a.** An a. due to septicæmia or to septic poisoning.—**Shirt-stud a.** See ABCÈS *en bouton de chemise.*—**Spermatic a.** Fr., *abcès spermatique.* An a. communicating with the seminiferous tubules. [A, 331.]—**Spinal a.** An a. connected with disease of a vertebra.—**Stercoraceous a., Stercoral a.** See *Fæcal a.*—**Strumous a.** See *Scrofulous a.*—**Subaponeurotic a.** An a. beneath an aponeurosis.—**Subareolar a.** Fr., *abcès sous-auréolaire* [Duval], *phlegmon tubéreux du mamelon* [Velpeau]. A furuncular subcutaneous a. of the areola of the nipple.—**Subfascial a.** An a. beneath a fascia.—**Submammary a.** An a. between the mammary gland and the chest-wall.—**Subpectoral a.** An a. beneath the pectoral muscles.—**Subperitoneal a.** An a. formed between the parietal peritonæum and the abdominal wall.—**Sudoriparous a.** See ABSCESSUS *sudoriparus.*—**Supra-mammary a.** An a. of the subcutaneous tissue over the breast.—**Sympathetic a.** Fr., *abcès sympathique.* An a., usually glandular, formed at a distance from the part at which the exciting cause has acted (e. g., a bubo). [A, 329.]—**Symptomatic a.** An a. due to a morbid state of the system. [E.]—**Thecal a.** Fr., *abcès des gaines tendineuses.* Ger., *Sehnenabscess.* It., *ascesso delle vagine dei tendini.* Syn.: *paronychia tendinosa.* Suppuration in the sheath of a tendon.—**Tropical a.** A. of the liver, the result of the acute hepatitis of the tropics. [D, 47.]—**Tubercular a.** Fr., *abcès tuberculeux.* An a. resulting from the breaking down of a tubercular lymphatic gland. [A, 331.]—**Tympanitic a.** Lat., *abscessus flatuosus.* Ger., *lufthaltiger A.* An a. which contains gas formed by putrefaction. [A, 316.]—**Urethral a.** 1. A lacunar a. 2. An a. of the tissue surrounding the urethra. [A, 295.] See also *Urinary a.*—**Urinary a.** Lat., *abscessus urinosus.* Fr., *abcès urinaire.* Ger., *Urinabscess.* It., *ascesso orinario.* Sp., *abceso urinario.* An a. due to extravasation of urine. [E.]—**Verminous a.** Lat., *abscessus verminosus.* Fr., *abcès vermineux.* Ger., *Wurmabscess.* An a. communicating with the intestine and containing intestinal worms.—**Wandering a.** Ger., *wandernder A.* Syn.: *congestive a.* An a. in which the pus travels away from the seat of its formation, along the connective-tissue spaces, and presents at some distant locality (e. g., a psoas a.).

ABSCESSED, adj. Pr. a^{2}b'se^{2}sd. Affected with abscess, or in a state due to an abscess ("abscessed teeth" ["Independ. Pract.," July, 1885, p. 394]).

ABSCESSIO (Lat.), n. f. Pr. a^{2}b(a^{3}b)-se^2(ske^2)'shi^2(si^2)-o. See ABSCESSION.—**A. cum effluxu.** Gr., ἀπόστασις κατ' ἔκρουν [Galen]. An ancient term for any discharge occurring as the result of an acute disease. [A, 325.]

ABSCESSION, n. Pr. a^{2}b-se^2'shu^{3}n. Lat., *abscessio* (from *abscedere*, to depart). Gr., ἀπόστασις. An old term for the termination of a disease by a critical discharge, especially with the formation of an abscess; also for metastasis. [A, 325.]

ABSCESSUS (Lat.), n. m. Pr. a^{2}b(a^{3}b)-se^{2}s(ske^{2}s)'u^{3}s(u^{4}s). An abscess.—**A. arthriticus.** Musgrave applied this term to certain intestinal abscesses which he supposed to be due to "gouty dysentery." [A, 336.] **A. articuli.** Suppurative arthritis.—**A. bursalis.** See *Bursal* ABSCESS.—**A. capitis sanguineus neonatorum.** See CEPHALHÆMATOMA.—**A. congestionis, A. congestivus.** A congestive abscess. See *Wandering* ABSCESS.—**A. embolicus.** See *Embolic* ABSCESS.—**A. flatuosus.** See *Tympanitic* ABSCESS.—**A. follicularis.** See *Follicular* ABSCESS.—**A. frigidus.** See *Cold* ABSCESS.—**A. frigidus scrofulosus.** See *Scrofulous* ABSCESS.—**A. gangrænescens, A. gangrænosus.** See ANTHRAX.—**A. lacteus.** See *Milk* ABSCESS.—**A. lumbalis, A. lumbaris, A. lumborum.** See *Lumbar* ABSCESS.—**A. lymphaticus.** See *Lymphatic* ABSCESS. —**A. metastaticus.** See *Metastatic* ABSCESS.—**A. muco-carnosus botryoides labii vulvæ.** D. S. Grassius's term for a multilobular pendulous outgrowth from the labium pudendi majus. [A, 66.]—**A. nucleatus.** See FURUNCLE.—**A. oculi.** Fr., *abcès de l'œil.* Ger., *Augapfelabscess.* It., *ascesso dell' occhio.* Sp., *abceso del ojo.* An obsolete term for panophthalmitis purulenta. [F.]—**A. pectoris.** An old term for empyema. [A, 316.]—**A. per congestum, A. per decubitum.** See *Wandering* ABSCESS.—**A. per fluxum.** An old term for an acute abscess. [A, 331.]—**A. psoadicus.** See *Psoas* ABSCESS.—**A. spirituosus.** An old term for aneurysm.—**A. stercoralis, A. stercorosus.** See *Fæcal* ABSCESS. —**A. sudoriparus.** Fr., *abcès sudoripare.* Ger., *Schweissdrüsenabscess.* A sudoriparous abscess; a small abscess, of slow formation, due to an inflammation of obstructed sweat-glands, most commonly in the axilla, on the areola of the nipple, or at the verge of the anus. [A, 319, 326.]—**A. thoracis.** See *A. pectoris.*—**A. urinalis, A. urinosus.** See *Urinary* ABSCESS.—**A. verminosus.** See *Verminous* ABSCESS.

ABSCHABER (Ger.), n. Pr. a^{3}b'sha^3-be^{2}r. A raspatory.

ABSCHABUNG. An abrasion. [E.]

ABSCHÄLUNG (Ger.), n. Pr. a^{3}b'she^{2}l-ung. 1. An excoriation. 2. Decortication, blanching (of almonds).

ABSCHÄUMUNG (Ger.), n. Pr. a^{3}b'shoim-ung. Despumation.

ABSCHIEFERN, ABSCHIEFERUNG (Ger.), n's. Pr. a^{3}b'-shef-e^{2}rn, -e^{2}r-ung. Exfoliation.

ABSCHIENEN (Ger.), v. tr. Pr. a^{3}b'shen-e^{2}n. 1. To remove splints. 2. To apply splints. [A, 315.]

ABSCHILFERN, ABSCHILFERUNG (Ger.), n's. Pr. a^{3}b'-shi^{2}l-fe^{2}rn, -fe^{2}r-ung. 1. An abrasion. 2. Branny desquamation.

ABSCHNEIDEN, ABSCHNEIDUNG (Ger.), n's. Pr. a^{3}b'-shnid-e^{2}n, -ung. Abscission; amputation.

ABSCHNÜREN, ABSCHNÜRUNG (Ger.), n's. Pr. a^{3}b'-shnu^{6}r-e^{2}n, -ung. A constricting, as by a tight bandage; a tying off; ligation.

ABSCHRAPEMESSER (Ger.), n. Pr. a^{3}b'shra^{3}p-e^2-me^{2}s-se^{2}r. See *Sweating*-IRON.

ABSCHRIPPEN, ABSCHRÖPFEN, ABSCHRÜPFEN, ABSCHRUPPEN (Ger.), n's. Pr. a^{3}b'shri^{2}p(shru^{6}pf, shru^{6}pf, shrup)-e^{2}n. Depletion by cupping. [A, 315.]

ABSCHUPPEN, ABSCHUPPUNG (Ger.), n's. Pr. a^{3}b'shup-pe^{2}n, -pung. 1. Desquamation. 2. Chapping. [A, 315.]

ABSCINDIREN (Ger.), n. Pr. abs-tsi^{2}nd-e're^{2}n. Abscission. [A, 304.]

ABSCISIO (Lat.), n. f. Pr. a^{2}b-si^2(ski^2)'zhi^2(si^2)-o. See ABSCISSIO.

ABSCISION, n. Pr. a^{2}b-si^2'zhu^{3}n. See ABSCISSION.

ABSCISSÆ (Lat.), n. f. pl. Pr. a^{2}b(a^{3}b)-si^{2}s(ski^{2}s)'e(a^3-e^2). From *abscindere*, to cut off, divide. The horizontal lines of a chart (e. g., of the vital signs), cutting the vertical ones at right angles. [A, 316.]

ABSCISSIO (Lat.), n. f. Pr. a^{2}b(a^{3}b)-si^{2}z(ski^{2}s)'zhi^2(si^2)-o. Abscission.

ABSCISSION, n. Pr. a^{2}b-si^{2}z'zhu^{3}n. Lat., *abscissio.* Gr., ἀποκοπή. Fr., *abscission.* Ger., *Abschneiden.* It., *abscissione.* Sp., *abcisión.* 1. The cutting away of a part. 2. (Obs.) the fatal termination of a disease. 3. (Obs.) a form of fracture in which a portion of the bone is torn away from its proper connections. [A, 325.] 4. The suppression of a function, as of the voice. [A, 316.] See VOX *abscissa.*

ABSCISSUS (Lat.), adj. Pr. a^{2}b(a^{3}b)-si^{2}s(ski^{2}s)'su^{3}s(su^{4}s). From *abscindere*, to cut off. Suppressed. See VOX *abscissa.*

ABSCONSIO (Lat.), n. f. Pr. a^{2}b(a^{3}b)-sko^{2}n'shi^2(si^2)-o. From *abscondere*, to hide away. 1. An old synonym of *sinus* (in the anatomical sense). [A, 325.] 2. A cavity of a bone which receives and conceals the head of another bone. [A. 336.]

ABSEIHUNG (Ger.), n. Pr. a^{3}b'zi-hung. Filtration, straining, elutriation. [A, 315.]

ABSEMIR, n. Fr., *absémir.* An alchemical term for quintessence. [A, 340.]

ABSENCE, n. Pr. a^{2}b'se^{2}ns. Lat., *absentia.* Fr., *absence.* Ger., *Abwesenheit, Absenz.* It., *assenza.* Sp., *ausencia.* 1. Temporary mental aberration. 2. A form of epilepsy characterized by sudden loss of consciousness without convulsive action. [A, 303.]

ABSETZCISTERNE (Ger.), n. Pr. a^{3}b''ze^{2}tz-tsi^{2}s-te^{2}r'ne^2. In chemistry, a settling cistern. [A, 315.]

ABSETZEN (Ger.), v. tr. and intr. Pr. a^{3}b'ze^{2}tz-e^{2}n. 1. To give rise to a metastasis. 2. To remove a part, to amputate. 3. In chemistry, to precipitate, to deposit. 4. To wean gradually (said of the lower animals).

ABSICHT (Ger.), n. Pr. a^{3}b'zi^{2}ch^{2}t. See INDICATION.

ABSIE (Fr.), n. Pr. a^{3}b-se. A French village having a mineral spring. See *Fontaine de* TONNERET.

ABSIEDUNG (Ger.), n. Pr. a^{3}b'ze-dung. A decoction. [A, 320.]

ABSIN MENU (Fr.), n. Pr. a^{3}b-sa^{2}n^2-ma^{3}n-u^6. A popular name for wormwood. [A, 306.]

ABSINTH (Ger.), n. Pr. a^{3}b'zi^{2}nt. 1. Wormwood. 2. The liqueur *absinthe.*

ABSINTHE (Fr.), n. Pr. a^{3}b(a^{3}p)-sa^{2}nt. Lat., *absinthium, absynthium* (1st def.). Ger., *Wermuth, Wurmtod* (1st def.), *Absinthliqueur* (2d def.), *Absinth.* It., *assenzio.* Sp., *ajenjo.* 1. Wormwood. See ABSINTHIUM. 2. A liqueur. See *A. suisse.*—**A. bâtarde.** A West Indian name for several plants of the *Compositæ*,

especially the *Parthenium hysterophorus.* [A, 328.]—**A. commune.** See ARTEMISIA *absinthium.*—**A. de mer.** Sea wormwood. See ARTEMISIA *maritima.*—**A. de montagne.** See *A. bâtarde.*—**A. glaciale.** See ARTEMISIA *glacialis.*—**A. majeure.** See ARTEMISIA *absinthium.*—**A. maritime.** See ARTEMISIA *maritima.*—**A. mineure.** Roman wormwood. See ARTEMISIA *pontica.*—**A. officinale.** See ARTEMISIA *absinthium.*—**A. panachée.** A drink consisting of a mixture of *A. suisse* with other liquids. [B, 38.]—**A. pontique.** See ARTEMISIA *pontica.*—**A. suisse.** 1. The *Achillea moschata.* 2. The liqueur known as *absinthe* or *extrait d'a.* Authorities differ as to the constituents of this cordial, but the probability is that it is made of the *Artemisia absinthium, A. mutellina, A. glacialis, A. rupestris, A. spicata,* and perhaps certain other Alpine species of *Artemisia* (called collectively *Génépi* or *Genippi*), together with anise. The habitual use of this liqueur is said to occasion a particular form of disease. See ABSINTHISME. [A, 301, 303.]—**Alcoolat d'a.** A preparation made by distilling fresh wormwood tops with alcohol. It is said to have the property of masking the bitter taste of cinchona, and on that account it is used, together with sugar, in the preparation of an elixir of cinchona. [A, 328.]—**Alcoolé d'a. composé.** See *Teinture d'a. composée.*—**Bière d'a.** See PURL.—**Bois d'a.** Syn.: *bois amer de Bourbon.* A hard, yellow wood, of a very bitter taste, from an apocynaceous tree growing in the Isle of Bourbon, occasionally used in medicine. [B, 38.]—**Eau distillée d'a.** [Fr. Cod.]. A preparation made by distilling the leaves and tops of the *Artemisia absinthium* (wormwood) with water until the distillate equals in weight the amount of the plant employed. [B.]—**Essence d'a.** See *Oleum* ABSINTHII.—**Extrait d'a.** 1. According to the French Codex, a preparation made from the tops of wormwood by exhausting with boiling water and evaporating to the consistence of a soft extract. Compare the German *Extractum* ABSINTHII. [B.] 2. The liqueur. See *A. suisse.*—**Grande a.** Syn.: *aluyne, aluine.* Wormwood; *Artemisia absinthium* [Linn.]. As an official term in the French Codex, the leaves and tops of the plant. [B.]—**Huile d'a.** [Fr. Cod.]. A preparation made by digesting 1 part of the leaves and tops of wormwood in 10 parts of olive-oil on a water bath and filtering the product. [B.]—**Huile volatile d'a.** [Fr. Cod.]. See *Oleum* ABSINTHII.—**Œnolé d'a.** See *Vin d'a.*—**Petite a.** Roman wormwood. See ARTEMISIA *pontica.*—**Quintessence d'a.** A bitter stomachic made by macerating 2 parts, each, of the tops of *Artemisia absinthium* and *Artemisia pontica,* and 1 part of bruised cloves, in 320 parts of 56-per-cent. alcohol for eight days, straining, expressing, filtering, and adding 1 part of sugar. [O. Reveil, A, 328.]—**Sel essentiel d'a.** See *Sal* ABSINTHII.—**Sirop d'a.** A preparation made by infusing 1 part of wormwood tops in 8 parts of boiling water, straining, filtering, and adding 190 parts of sugar to 100 parts of the infusion, over a water bath. [O. Reveil, A, 328.]—**Teinture (alcoolique) d'a.** [Fr. Cod.]. A preparation made by macerating 1 part of wormwood tops in 5 parts of 60-per-cent. alcohol for ten days, and filtering. [B.]—**Teinture d'a. composée** [Fr. Cod.]. Lat., *tinctura absinthii composita.* Syn.: *élixir stomachique de Stoughton.* A preparation made by macerating 25 parts, each, of wormwood tops, germander (*Teucrium chamædrys*) tops, gentian root, bitter-orange peel, and rhubarb, and 5 parts, each, of aloes and cascarilla, in 1,000 parts of 60-per-cent. alcohol, for ten days, and filtering. [B.]—**Tisane d'a.** [Fr. Cod.]. Wormwood tea; a preparation made by infusing 5 parts of the tops in 1,000 parts of boiling water, and filtering.—**Vin d'a.** [Fr. Cod.]. Lat., *vinum de absinthio.* Syn.: *œnolé d'a.* 1. A preparation made by macerating 3 parts of dried wormwood leaves in 6 parts of 60-per-cent. alcohol, for a day, then adding 100 parts of white wine, macerating for ten days longer, and filtering. [B.] 2. The ancient *absinthites* (*q. v.*).—**Vin sec avec de l'a.** See PURL-*royal.*

ABSINTHÉ (Fr.), adj. Pr. a^{3}b(a^{3}p)-sa^{2}n-ta. 1. Mixed with absinthe. [B.] 2. In a condition caused by indulging in absinthe. [A, 306.]

ABSINTHÉINE (Fr.), n. Pr. a^{3}b(a^{3}p)-sa^{2}n-ta-en. Absinthin.

ABSINTHEUR (Fr.), n. Pr. a^{3}b(a^{3}p)-sa^{2}n-tu^{5}r. An habitual drinker of absinthe. [B.]

ABSINTHIAN, adj. Pr. a^{2}b-si^{2}n'thi^{2}-a^{2}n. See ABSINTHIC.

ABSINTHIATE, n. Pr. a^{2}b-si^{2}n'thi^{2}-at. A salt of absinthic acid.

ABSINTHIATED, adj. Pr. a^{2}b-si^{2}n'thi^{2}-at-e^{2}d. Lat., *absinthiatus.* Containing wormwood.

ABSINTHIATUM (Lat.), n. n. Pr. a^{2}b(a^{3}b)-si^{2}nth-i^{2}-a(a^{3})'-tu^{3}m(tu^{4}m). Really the neut. of *absinthiatus* (*vinum* understood); wormwood-wine. [A, 312.]

ABSINTHIATUS (Lat.), adj. Pr. a^{2}b(a^{3}b)-si^{2}nth-i^{2}-a(a^{3})'tu^{3}s-(tu^{4}s). Absinthiated.

ABSINTHIC, adj. Pr. a^{2}b-si^{2}nth'i^{2}k. Lat., *absinthicus.* Fr., *absinthique.* Ger., *absinthisch.* It., *absintico.* Sp., *absíntico.* 1. Pertaining to or derived from absinthium. [B.] 2. Due to the action of absinthe (e. g., *a. epilepsy*).—**A. acid.** Lat., *acidum absinthicum.* Fr., *acide absinthique.* Ger., *Wermuthsäure.* It., *acido absintico.* Sp., *ácido absíntico.* An acid derived by Braconnot from wormwood, probably identical with succinic acid. [B, 5, 10.]

ABSINTHIER (Fr.), n. Pr. a^{3}b(a^{3}p)-sa^{2}n-ti^{2}-a. See ABSINTHEUR.

ABSINTHIIN (Ger.), n. Pr. a^{3}b-zi^{2}nt-i^{2}-en'. ABSINTHIN. [B.]

ABSINTHIN, n. Written also *absynthin.* Pr. a^{2}b-si^{2}nth'i^{2}n. Fr., *absinthine.* Ger., *Absinthiin, Wermuthbitter.* It., Sp., *absintina.* The bitter principle of wormwood; a white, imperfectly crystalline substance; according to Kromayer, an aldehyde, $C_{40}H_{56}O_8 + H_2O$. [B, 5.]

ABSINTHIQUE (Fr.), adj. and n. Pr. a^{3}b(a^{3}p)-sa^{2}n-tek. Absinthic; a person affected with absinthisme.

ABSINTHISME (Fr.), n. Pr. a^{3}b(a^{3}p)-sa^{2}n-tesm. Ger., *Absinthismus.* It., *absintismo.* A morbid condition due to the use of absinthe. In the acute form, besides the effects of alcohol, vertigo and nausea are prominent. The chronic form differs from chronic alcoholism by the occurrence of epileptoid seizures and the early supervention of general paralysis, also, according to Gautier, by the frequency of hyperæsthesia, especially in the iliac fossa. [A, 321; "Progr. méd.," July 8, 1882, p. 531.]

ABSINTHITES (Lat.), n. m. Pr. a^{2}b(a^{3}b)-si^{2}nth-i(e)'tez(te^{2}s). Gen., *absinthi'tæ.* Gr., ἀψινθίτης (οἶνος understood). A wine of wormwood, mentioned by Dioscorides, Pliny, and other ancient writers. [A, 311.]

ABSINTHIUM (Lat.), n. n. Pr. a^{2}b(a^{3}b)-si^{2}nth'i^{2}-u^{3}m(u^{4}m). Gr., ἀψίνθιον (from α priv., and ψίνθος, sweetness). Fr., *absinthe.* Ger. *Wermuth.* It., *assenzio.* Sp., *ajenjo.* 1. In botany, Tournefort's or Gärtner's name for a genus corresponding in part to the Linnæan genus *Artemisia* (*q. v.*). [B, 41, 42.] 2. In pharmacy, wormwood; the leaves and tops of the *Artemisia a.* (the *grande absinthe,* or *aluyne,* of the Fr. Cod.; the *herba absinthii* of the Ph. Ger.). [B.]—**A. alpinum.** Fr., *génépi.* Ger., *Genipkraut.* A group of Alpine species of *Artemisia* (*glacialis, mutellina,* and *spicata*), used in Switzerland for making absinthe. See ABSINTHE *suisse.*—**A. marinum, A. maritimum.** See ARTEMISIA *maritima.*—**A. minus, A. ponticum, A. romanum.** See ARTEMISIA *pontica.*—**A. santonicum.** See ARTEMISIA *santonica.*—**A. seriphium belgicum** [G. Bauhin]. See ARTEMISIA *maritima.*—**A. vulgare** [J. Bauhin]. See ARTEMISIA *absinthium.*—**Conserva absinthii maritimi.** An old stomachic preparation, made by beating the tender tops of sea wormwood (*Artemisia maritima*) with three times their weight of lump sugar. [A, 343.]—**Extractum absinthii** [Ph. Ger.]. Ger., *Wermuthextract.* A preparation made by extracting wormwood tops with alcohol (2 parts) and water (3 parts) and evaporating to the consistence of a thick extract. [B.] Cf. *Extrait d'*ABSINTHE.—**Oleum (essentiale) absinthii.** Fr., *huile volatile d'absinthe* [Fr. Cod.]. Oil of wormwood, a volatile oil distilled from the tops and leaves of *Artemisia a.*; formerly used as an antispasmodic and anodyne. [A, B.]—**Sal absinthii.** Fr., *sel essentiel d'absinthe.* Salt of wormwood; a carbonate of potassium formerly obtained from the ashes of wormwood. [A, 328.]—**Summitates absinthii.** Wormwood tops. [B.]—**Tinctura absinthii** [Ph. Ger.]. Ger., *Wermuthtinctur.* Tincture of wormwood; made by macerating 1 part of the tops in 5 parts of dilute alcohol for a week, straining, and filtering. [B.]—**Tinctura absinthii composita.** Compound tincture of wormwood. For the French preparation, see *Teinture d'*ABSINTHE *composée.* According to the Austrian Ph. (of 1869, with appendix of 1879), made by digesting 1 part of wormwood, 4 parts of orange peel, 2 parts of calamus, 2 parts of gentian root, and 1 part of cinnamon in 100 parts of alcohol, and filtering. [B.]—**Vinum de absinthio.** See *Vin d'* ABSINTHE.

ARTEMISIA ABSINTHIUM.

ABSINTHIUS (Lat.), n. m. Pr. a^{2}b(a^{3}b)-si^{2}nth'i^{2}-u^{3}s(u^{4}s). See ABSINTHIUM.

ABSINTHLIKÖR, ABSINTHLIQUEUR (Ger.), n's. Pr. a^{3}b'zi^{2}nt-le-ku^{5}r''. See ABSINTHE *suisse.*

ABSINTHOL, n. Pr. a^{2}b-si^{2}nth'o^{2}l. For deriv., see ABSINTHIUM and *-ol.** The essential constituent of oil of wormwood; a liquid, $C_{10}H_{16}O$, isomeric with ordinary camphor. [B, 2, 4.]

ABSOLUTE, adj. Pr. a^{2}b'so-lu^{2}t. Lat., *absolutus* (from *absolvere,* to complete). Fr., *absolu.* Ger., *absolut.* It., *assoluto.* Sp., *absoluto.* 1. Actual, positive, as the a. weight of a body as distinguished from its specific weight. 2. Pure (e. g., a. alcohol).

ABSONDERN (Ger.), v. tr. Pr. a^{3}b'zo^{2}n-de^{2}rn. 1. To secrete. 2. To abduce.—**A'd.** Secretory.

ABSONDERUNG (Ger.), n. Pr. a^{3}b'zo^{2}nd-e^{2}r-ung. 1. A process of secretion or excretion. 2. A product of such process. 3. An exudation. [A, 315.]—**A'sdotter..** See under DOTTER.—**A'sgefäss.** A secretory vessel.—**A'sorgan.** A secretory organ.—**A's-vermögen.** The power of secretion.—**A'swerkzeug.** A secretory apparatus.

ABSORBENT, adj. and n. Pr. a^{2}b-so^{2}rb'e^{2}nt. Lat., *absorbens* (pres. part. of *absorbere,* to suck in). Fr., *absorbant.* Ger., *absorbirend* (adj.). It., *assorbente.* Sp., *absorbente.* 1. (adj.) Capable of absorbing; pertaining to the function of absorption. 2. (n.) A lymphatic or lacteal vessel. 3. (n.) A medicine or a dressing which acts by absorbing gases or liquids. Cf. ANTACID. 4. (n.) An old synonym of styptic. [A, B, K.]

ABSORBIREND (Ger.), adj. Pr. a^{3}b-zo^{2}rb-e're^{2}nd. Absorbent, sorbefacient.

ABSORPTIO (Lat.), n. f. Pr. a[2]b(a[3]b)-so[2]rp'shi[2](ti[2])-o. Absorption.—**A. morbosa.** See *Pathological* ABSORPTION.—**A. pulmonalis.** See *Pulmonary* ABSORPTION.—**A. sana.** Physiological absorption.

ABSORPTIOMETER, n. Pr. a[2]b-so[2]rp-shi[2]-o[2]m'e-tu[5]r. From Lat., *absorptio*, and Gr., μέτρον (see *-meter**). S. Lea's term for an instrument devised by him for varying the thickness of a layer of liquid that is to be examined with a spectro-photometer; being a modified form of hæmatoscope. Two tubes, each closed at one end with a glass plate, move one within the other, the extent of the motion, and consequently the degree of separation of the plates (between which the liquid is situated), being regulated by a screw, each complete revolution of which approximates or separates the plates 1/40 of an inch. ["Jour. of Physiol.," v, p. 239.]

ABSORPTION, n. Pr. a[2]b-so[2]rp'shu[3]n. For deriv., see ABSORBENT. Gr., ἀναῤῥόφησις, ἀναῤῥοιβδησις. Lat., *absorptio*. Fr., *absorption*. Ger., *Aufsaugung*. It., *assorbimento*. Sp., *absorción*. In general, the act or process of absorbing; the imbibition of nutritive or other material by a living organism; the process of taking up waste or effete material into the general circulation. [A, B, C, K.]—**A. band.** See *A.* SPECTRUM.—**A. chyleuse** (Fr.). Syn.: *pénétration du chyle*. See *Chylous a.*—**A. coëfficient.** See *Coëfficient of a.*—**A. cutanée** (Fr.). See *Cutaneous a.*—**A. décomposante** (Fr.). See *Internal a.*—**A. de composition** (Fr.). See *External a.*—**A. de décomposition, A. de nutrition** (Fr.). See *Internal a.*—**A. externe** (Fr.). See *External a.*—**A. interne, A. interstitielle** (Fr.). See *Internal a.*—**A. lines.** See *A.* SPECTRUM.—**A. lymphatique** (Fr.). See *Lymphatic a.*—**A. of composition.** See *External a.*—**A. of decomposition, A. of disassimilation.** See *Internal a.*—**A. pathologique** (Fr.). See *Pathological a.*—**A. pulmonaire** (Fr.). See *Pulmonary a.*—**A. récrémentitielle** (Fr.). See *Recrementitial a.*—**A. respiratoire** (Fr.). See *Pulmonary a.*—**A'scoëfficient** (Ger.). See *Coëfficient of a.*—**A'sfähig** (Ger.). Absorptive.—**A. spectrum.** See under SPECTRUM.—**A'sstreif** (Ger.). An a. band. See *A.* SPECTRUM.—**A. tube.** See under TUBE.—**A. ulcérative** (Fr.). See *Ulcerative a.*—**A. veineuse** (Fr.). See *Venous a.*—**Chylous a.** Fr., *a. chyleuse*, *pénétration du chyle*. The process by which the oil globules of the chyle pass into the central canals of the intestinal villi. [A, 301.]—**Coëfficient of a.** Fr., *coefficient d'a.* Ger., *A'scoëfficient*. It., *coefficiente di assorbimento*. Sp., *coeficiente de absorción*. A number representing the volume of a gas absorbed by a unit volume of water at a temperature of 0°C., and under a barometric pressure of 760 mm. [B.]—**Cutaneous a.** Lat., *absorptio cutanea*. Fr., *a. cutanée*. Ger., *Hauteinsaugen*. It., *assorbimento cutaneo*. Sp., *absorción cutanea*. A. by the skin, either entire or deprived of the horny layer of its epidermis.—**Disjunctive a.** The a. of living tissue around a necrosed mass, whereby the latter is separated. [K.]—**Excrementitial a.** The supposed a. of a certain amount of the fluid excretions as they flow over mucous surfaces. [K, 3.]—**External a.** Syn.: *a. of composition*. 1. A. by those surfaces of the body which are exposed to the air, such as the skin and the mucosa of the air-passages. 2. A process of a. by which the nutritive material needed by an organ is obtained from without. [K, 3.]—**Internal a.** Syn.: *a. of decomposition*. The a. of waste material from an organ. [K.]—**Lymphatic a.** A. by the lymphatic vessels.—**Molecular a., Nutritive a., Organic a.** See *Internal a.*—**Pathological a.** Syn.: *resorption*. The a. of an excretion (like the bile) or a morbid product (like pus or the contents of a cyst) into the blood. [A, 301.]—**Progressive a.** The gradual a. or atrophy of a part from long-continued pressure, as from an aneurysm. [K.]—**Pulmonary a.** A. by the respiratory mucous membrane. [K.]—**Purulent a.** A term sometimes applied to pyæmia. [D.]—**Recrementitial a.** The a. of surplus secretions, such as mucus, synovia, etc. [K, 3.]—**Respiratory a.** See *Pulmonary a.*—**Ulcerative a.** The a. by which an ulcer forms or increases in extent.—**Venous a.** A. by the veins.

ABSORPTIVE, adj. Pr. a[2]b-so[2]rp'ti[2]v. Fr., *absorptif*. Ger., *absorptionsfähig*. Having the power of absorbing. [D.]

ABSORPTIVITY, n. Pr. a[2]b-so[2]rp-ti[2]v'i[2]-ti[2]. Fr., *absorptivité*. Ger., *Einsaugungskraft*. The power of absorbing. [A, 324.]

ABSPANNUNG (Ger.), n. Pr. a[3]b'spa[3]n-nung. 1. Lassitude, debility. 2. Relaxation, as of a muscle. [K.]

ABSPLITTERUNG (Ger.), n. Pr. a[3]b'spli[2]t-te[2]r-ung. Desquamation. [A, 320.]

ABSTAMMUNGSLEHRE (Ger.), n. Pr. a[3]b'sta[3]m-mungz-la''re[2]. The doctrine of descent. See DARWINISM.

ABSTEMIOUS, adj. Pr. a[2]b-ste'mi[2]-u[3]s. Lat., *abstemius* (from *abs* [see *Ab-**], and *temetum*, an intoxicating drink). Fr., *abstème*. Ger., *enthaltsam*. Abstaining from intoxicating drinks or other indulgence of the appetites; temperate.

ABSTENTIO (Lat.), n. f. Pr. a[2]b(a[3]b)-ste[2]n'shi[2](ti[2])-o. From *abstinere*, to hold back, abstain from. Retention.—**A. stercorum.** Retention of fæces, constipation. [Cælius Aurelianus, A, 312.]

ABSTERBEN (Ger.), n. Pr. a[3]b'ste[2]r-be[2]n. 1. Numbness, insensibility. 2. Suspended or impaired animation of a part. See *Local* ASPHYXIA. 3. Gangrene. 4. Death. 5. Coagulation.—**Habituelles A. der Frucht.** See *Habitual* ABORTION.

ABSTERBEORDNUNG (Ger.), n. Pr. a[3]b'ste[2]rb-e[2]-o[2]rd''-nung. Mortality statistics. [A, 303.]

ABSTERGE, v. tr. Pr. a[2]b-stu[5]rj'. Lat., *abstergere*, to wipe away. Fr., *absterger*. Ger., *abstergiren*. To cleanse.

ABSTERGENT, n. Pr. a[2]b-stu[5]rj'e[2]nt. Lat., *abstergens*, *abstersivus*. Fr., *abstergent*. Ger., *abstergirende Mittel*. It., *astergente*. Sp., *abstergente*. Syn.: *detergent*. A cleansing application.

ABSTERSE, v. tr. Pr. a[2]b-tu[5]rs'. See ABSTERGE.

ABSTERSION, n. Pr. a[2]b-stu[5]r'shu[3]n. Lat., *abstersio*. Fr., *abstersion*. Ger., *Abstersion*. It., *astersione*. Sp., *abstersión*. A cleansing.

ABSTERSIVE, n. Pr. a[2]b-stu[5]rs'i[2]v. Lat., *abstersivum*. Fr., *abstersif*. Ger., *abstergirende Mittel*. It., *astersivo*. Sp., *abstersivo*. See ABSTERGENT.

ABSTERSIVUS, ABSTERSORIUS (Lat.), adj's. Pr. a[2]b-(a[3]b)-stu[5]r(ste[2]r)-si(se)'vu[3]s(wu[4]s), -so'ri[2]-u[3]s(u[4]s). Abstergent.

ABSTINENCE, n. Pr. a[2]b'sti[2]n-e[2]ns. Gr., ἐγκράτεια. Lat., *abstinentia* (from *abstinere*, to abstain). Fr., *abstinence*. Ger., *Enthaltsamkeit*. It., *astinenza*. Sp., *abstinencia*. An abstaining from indulgence, especially from food or drink. Cf. DIET.

ABSTOSSEN (Ger.), n. Pr. a[3]b'sto[2]s-se[2]n. A separation, a casting off, as of a slough or a sequestrum; the shedding of the milk teeth.

ABSTOSSUNG (Ger.), n. Pr. a[3]b'sto[2]s-sung. In magnetism, repulsion. [B.]

ABSTRACT, n. Pr. a[2]b'stra[2]kt. Lat., *abstractum* (from *abstrahere*, to withdraw). Ger., *Abstract*. A preparation, official in the U. S. Ph., consisting of a powder made by evaporating an alcoholic fluid extract to dryness with milk-sugar, in such a manner that 1 part of the a. represents 2 parts of the drug or of the fluid extract. [B.]

ABSTRACTICIUS (Lat.), adj. Pr. a[2]bs(a[3]bs)-tra[2]kt(tra[3]kt)-i[2]'shi[2](ki[2])-u[3]s(u[4]s). Capable of being abstracted without preliminary maceration, fermentation, or the like. [A, 322.]

ABSTRACTION, n. Pr. a[2]bs-tra[2]k'shu[3]n. Lat., *abstractio*. Fr., *abstraction*. Ger., *Entziehung*. It., *astrazione*. Sp., *abstracción*. In chemistry and pharmacy, the withdrawal of a constituent, such as water, from a compound.

ABSTRACTITIUS (Lat.), adj. Pr. a[2]bs(a[3]bs)-tra[2]kt(tra[3]kt)-i[2]'-shi[2](ti[2])-u[3]s(u[4]s). See ABSTRACTICIUS.

ABSTRACTIV (Ger.), n. Pr. a[3]b-stra[3]k-tef'. 1. A spirituous extract. 2. An expressed juice.

ABSTRACTIVE, adj. Pr. a[2]bs-tra[2]kt'i[2]v. See ABSTRACTICIUS.

ABSTRACTIVUS (Lat.), adj. Pr. a[2]bs(a[3]bs)-tra[2]kt(tra[3]kt)-i-(e)'vu[3]s(wu[4]s). See ABSTRACTICIUS.

ABSTRACTUM (Lat.), n. n. Pr. a[2]bs(a[3]bs)-tra[2]kt(tra[3]kt)'u[3]m-(u[4]m). See ABSTRACT.

ABSTÜCKELUNG (Ger.), n. Pr. a[3]b'stu[6]k-e[2]l-ung. See MORCELLEMENT.

ABSTUMPFEN (Ger.), v. tr. Pr. a[3]b'stumpf-e[2]n. In chemistry, to neutralize.—**A'd.** Demulcent. [A, 315.]

ABSUD (Ger.), n. Pr. a[3]b'zud. A decoction; an extract.—**A'humussäure.** Apotheme (*q. v.*); the deposit obtained by prolonged boiling of a vegetable decoction in an open vessel; so called from its resemblance to humin, or humic acid. [B, 48.]

ABSUS (Lat.), n. m. Pr. a[2]b(a[3]b)'su[3]s(su[4]s). See CASSIA *a.*

ABSÜSSEN (Ger.), n. Pr. a[3]b'zu[6]s-se[2]n. Edulcoration.

ABSYNTH, ABSYNTHIIN, ABSYNTHIN, ABSYNTHITES, ABSYNTHIUM. See ABSINTH, etc.

ABTHON (Ger.), n. Pr. a[3]b'ton. See ABERTHON.

ABTÖDTEN, ABTÖDTUNG (Ger.), n's. Pr. a[3]b'tu[5]t-e[2]n, -ung. Mortification. [A, 315.]

ABTRAGEN, ABTRAGUNG (Ger.), n's. Pr. a[3]b'tra[3]g-e[2]n, -ung. Abscission, excision. [E.]

ABTREIBEMITTEL (Ger.), n. Pr. a[3]b'tri-be[2]-mi[2]t''te[2]l. An abortifacient.

ABTREIBUNG DER LEIBESFRUCHT (Ger.), n. Pr. a[3]b'tri-bung de[2]r lib'e[2]z-fruch[2]t. Criminal abortion.

ABTRENNUNG (Ger.), n. Pr. a[3]b'tre[2]n-nung. Avulsion, disruption.

ABUK (Ar.), n. Mercury. [A, 344.]

ABUKIR, n. See ABOUKIR.

ABULAZA, n. See ABOULAZA.

ABULIA (Lat.), n. f. Pr. a[2]b(a[3]b)-u[2](u)'li[2]-a[3]. Gr., ἀβουλία (from α priv., and βούλεσθαι, to will). Fr., *abulie*. Ger., *Abulie*, *Willenlosigkeit*. Syn.: *defectus voluntatis*. A form of insanity characterized by loss or great impairment of the will. Cf. ABOULOMANIA.

ABULIC, adj. Pr. a[2]b-u[2]l'i[2]k. Lat., *abulicus*. Pertaining to or affected with abulia.

ABUTA (Lat.), n. f. Written also *abutua* and *butua*. Pr. a[2]b-(a[3]b)-u[2](u)'ta[3]. A Guiana word, adopted by Aublet as the name for a genus of *Menispermaceæ* growing in Cayenne. [B, 43.]—**A. amara** [Aublet]. A Brazilian species which furnishes one variety of false pareira brava. [B, 33.]—**A. rufescens** [Aublet]. A climbing evergreen species found in the northern part of South America, the root and stems of which constitute white pareira brava. [B, 5, 43, 46.]

ABUTILON (Lat.), n. n. Pr. a[2]b(a[3]b)-u[2](u)'ti[2]-lo[2]n. Said to be from the Ar., *aû'bûtîlûn*, yellow. Fr., *mauve jaune*. Ger., *Sammtpappel*. An ancient name for a plant resembling marsh mallow; a genus of *Malvaceæ* established by Dillenius, Mönch, or Tournefort; made the name of a species of *Sida* by Linnæus. [L, 19, 39, 41, 43, 52.]—**A. asiaticum** [Don]. A species including individuals described under *Sida arguta* and *Sida asiatica*. [B, 43.]—**A. Avicennæ** [Gärtner]. Ger., *Bastardeibisch*. Syn.: *Sida a.* Indian mallow; a species growing to the height of 3 or 4 feet, indigenous to the East and West Indies and naturalized in the United States. [B, 20, 34.]—**A. cordatum.** See *A. Avicennæ*.—**A. esculentum.** A Brazilian plant, the flowers of which are used as an article of food.—**A. giganteum.** See SIDA *gigantea* and SIDA *fru-*

tescens.—**A. indicum** [Don]. An Indian shrub, the fibers of which are used for making ropes. [B, 19.]

ABUTUA (Lat.), n. f. Pr. a^{2}b(a^{3}b)-u^2(u)′tu^2(tu)-a^3. See Abuta.

ABVACUATIO (Lat.), n. f. Pr. a^{2}b(a^{3}b)-va^{2}k(wa^{3}k)-u^2(u)-a(a^3)′-shi^2(ti^2)-o. See Abevacuation.

ABWECHSELN (Ger.), v. intr. Pr. a^{3}b′ve^{2}ch^2-ze^{2}ln. To intermit (said of fever).—**A'd.** Intermittent; in botany, alternate.—**A'd-gefiedert.** Alternately pinnate. [B.]

ABWEG (Ger.), n. Pr. a^{3}b′ve^{2}g. A diverticulum. [A, 320.]

ABWEHRUNGSMITTEL (Ger.), n. Pr. a^{3}b′va-rungz-mi^{2}t″-te^{2}l. A preventive, a preservative. [A, 315.]

ABWEICHEN (Ger.), v. tr. and intr. Pr. a^{3}b′vi-ch^{2}e^{2}n. To macerate, to deviate; as a n., maceration, diarrhœa. [A, 315.]—**A'd.** Anomalous, irregular. [A, 315.]

ABWEICHUNG (Ger.), n. Pr. a^{3}b′vi-ch^{2}ung. See Abweichen.—**A'skreis.** The circle in which lie the points of intersection of rays refracted by a prism. [B, 48.]

ABWESENHEIT (Ger.), n. Pr. a^{3}b′va-ze^{2}n-hit. See Absence.

ABWÜRGUNG (Ger.), n. Pr. a^{3}b′vu^{6}r-gung. Strangulation. [A, 315.]

ABYREICA, n. An Abyssinian name for senna. [A, 344.]

ABYSSE, n. A priest believed by the Kalmuks to have the power of driving away diseases. [A, 321.]

ABYSSUS (Lat.), n. m. Pr. a^{2}b(a^{3}b)-i^{2}s(u^{6}s)′su^{3}s(su^{4}s). Gr., ἄβυσσος, boundless. A mystic term among the followers of Paracelsus, signifying "a receptacle for the seminal matter," i. e., the primitive material out of which substances in general were held to be formed. [A, 343.]

ABZAC (Fr.), n. Pr. a^{3}b-za^{3}k. A village in the Department of the Charente, in France, near which there is a bathing establishment, with a cold mineral spring. [A, 319.]

ABZAHNEN (Ger.), n. Pr. a^{3}b′tza^{3}n-e^{2}n. The shedding of the deciduous teeth (said especially of the lower animals). [A, 305.]

ABZAPFEN (Ger.), n. Pr. a^{3}b′tza^{3}p-fe^{2}n. 1. Paracentesis. 2. Bloodletting.—**Abzapfer.** A trocar.

ABZÄUMUNG (Ger.), n. Pr. a^{3}b′tzoim-ung. Division of the frænum linguæ. [A, 320.]

ABZEHRUNG (Ger.), n. Pr. a^{3}b′tzar-ung. Emaciation, consumption.

ABZENDEGKANI (Pers.), n. Lit., water of life; an Oriental spring the waters of which were said to confer immortality. [A, 305.]

ABZIEHEN (Ger.), v. tr. Pr. a^{3}b′tze-he^{2}n. 1. To distill. 2. To abduct.—**Abziehapparat.** A distilling apparatus. [A, 315.]—**Abziehblase.** An alembic.—**A'd.** Abducent.—**Abzieher.** An abductor muscle.—**Abziehflasche.** A cucurbit. [A, 315.]—**Abziehkolben.** An alembic. [A, 315.]—**Abziehmuskel.** An abductor muscle.—**Abziehung.** 1. An abrasion. [E.] 2. Abduction.—**Abziehungsmuskel.** An abductor muscle.

ABZUG (Ger.), n. Pr. a^{3}b′tzug. The dross which forms on the surface of molten lead. [B, 3, 38, 48.]—**A'skanal, A'sröhre.** An outlet, a sewer. [H.]

ACACALIS (Lat.), n. f. Pr. a^{2}k(a^{3}k)-a^{2}k(a^{3}k)′a^3-li^{2}s. Gr., ἀκακαλίς. Fr., *acacalis.* An Egyptian shrub mentioned by Dioscorides, the seeds of which were used by the ancients as a remedy for ophthalmia. It has been supposed to be the *Siliqua silvestris*, the *Cassia absus*, or a variety of *Acacia arabica.* [A, 311, 328, 342; B, 46.]

ACACANTHRAX (Lat.), n. m. Pr. a^{2}k(a^{3}k)-a^{2}k(a^{3}k)-a^{2}n(a^{3}n)′-thra^{2}x(thra^{3}x). Gen., *acacanthracis.* From α priv., κακός, pernicious, and ἄνθραξ, a carbuncle. Non-malignant anthrax. [A, 322.]

ACACIA (Lat.), n. f. Pr. a^{2}k(a^{3}k)-a(a^3)′shi^2(ki^2)-a^3. Gr., ἀκακία [Dioscorides] (from ἀκάζειν, to sharpen, from the spines possessed by some of the species). Fr., *acacia, gomme arabique* (2d def.). Ger., *Acacie, Akazie, Schotendorn, Schlehendorn, arabisches Gummi* (2d def.). It., *acacia, acazia, gomma arabica* (2d def.). Sp., *acacia, goma arabiga* (2d def.). Syn.: *gummi arabicum* (2d def.). 1. A genus, mostly trees and shrubs, of which more than four hundred species are known, belonging to the natural order *Leguminosæ* and the sub-order *Mimoseæ*, and distinguished from the other genera by having polygamous flowers. The genus was established by Willdenow, the various species having formerly been included under the Linnæan genus *Mimosa.* It is found more particularly in Africa and Australia. The products of many of the species are used in medicine and the arts. [B, 34.] 2. Gum arabic.—**A. Adansonii** [Guillemin and Perottet]. Fr., *gommier rouge gonaké* (ou *gonatié*) [Adanson]. Syn.: *Mimosa adstringens* [Thönning and Schumacher]. A species found in Senegambia, said to furnish Senegal gum arabic. [B, 5.]—**A. adstringens** [Martius]. See Stryphnodendron *polyphyllum.*—**A. ægyptiaca.** A variety of *A. arabica.* [A, 328.]—**A. alba.** See *A. leucophlœa.*—**A. albicans.** According to Power and Sedgwick, a Brazilian species furnishing Kuisache gum. [A, 316.]—**A. amara** [Willdenow]. Syn.: *Albizzia amara* [Boivin]. An Indian species, the bark of which is used in astringent lotions and as a tonic. [A, 316, 328.]—**A. angico** [Martius]. See Stryphnodendron *polyphyllum.*—**A. anthelminthica** [H. Baillon]. See Albizzia *anthelminthica.*—**A. arabica** [Willdenow]. Syn.: *Mimosa arabica* [Linnæus]. The *babul, babool,* or *balbul* tree of India, now regarded as a variety of the *A. verek;* a tree reaching the height of 20 feet. Its bark contains a large amount of tannin, and is used as an astringent and tonic; the bruised leaves are applied to ulcers; and the pods, called *bablah,* are used in coughs. It furnishes an inferior sort of gum arabic called *babul* gum or *gond-babul.* [A, 2, 247, 316; B, 5, 19, 43.]—**A. Bambolah** [Roxburgh]. Fr., *A. cendré.* An East Indian variety that furnishes *bablah.*—**A. blanchâtre** (Fr.). See *A. dealbata.*—**A. capensis** [Burchell]. See *A. horrida.*—**A. catechu** [Willdenow]. Fr., *cachoutier.* Sp., *A. catecú.* Syn.: *A. suma* [Kurz.], *Mimosa catechu* [Linnæus]. A species indigenous to India and Burmah; a tree, seldom more than 12 feet high, from which catechu is made by evaporating a decoction of the inner red or brownish wood of the trunk. [B, 5.]—**A. cendré** (Fr.). See *A. Bambolah.*—**A. cochliocarpa** [Don]. According to Power and Sedgwick, a Brazilian tree which furnishes *cortex braziliensis* (*q. v.*). [A, 316.]—**A. concinna** [De Candolle]. Syn.: *Mimosa saponaria* [Roxburgh]. An Indian species, growing to the height of 20 feet. It is said to contain saponin, and its pods are used in washing clothes and for cleansing the hair. It is also expectorant and emetic. [A, 316. 328; B, 5, 19, 43.]—**A. d'Allemagne** (Fr.). See *A. nostras.*—**A. dealbata** [Link]. Fr., *A. blanchâtre.* The silver wattle; an Australian evergreen shrub, about 4 feet high, which furnishes a variety of gum arabic. [B, 10, 43.]—**A. de Constantinople** (Fr.). See *A. Julibrissin.*—**A. decurrens** [Willdenow]. Syn.: *Mimosa decurrens* [Donn]. The wattle tree; a New South Wales shrub, about 6 feet high, furnishing a variety of gum arabic which is sometimes slightly purplish. The bark yields an extract similar to catechu. [A, 328; B, 5, 43.]—**A. de Farnèse** (Fr.). See *A. farnesiana.*—**A. du Nil** (Fr.). See *A. nilotica.*—**A. ehrenbergiana** [Hayne], **A. Ehrenbergii** [Nees]. A shrub, 6 to 8 feet high, indigenous to the Nile region, furnishing a variety of gum arabic. [B, 5.]—**A. falcata** [Willdenow]. According to Power and Sedgwick, a New South Wales tree, the *wee-tjellan* of the aborigines, the *lignum vitæ* of the colonists, the bark of which contains tannin and is used by the natives to poison fish. [A, 316.]—**A. farnesiana** [Willdenow]. Fr., *A. de Farnèse, cassie, casse du Levant.* A West Indian tree, 15 to 20 feet high. According to Power and Sedgwick, it furnishes a gum resembling gum arabic, the bark is astringent, the creoles use the leaves in bladder diseases, and a delicious perfume, said to be stimulant, is distilled from the flowers. [A, 316; B, 43, 49.]—**A. fasciculata** [Guillemin and Perottet]. See *A. tortilis.*—**A. ferrea.** In alchemy, an iron spoon. [B, 50.]—**A. ferruginea** [De Candolle]. Syn.: *Mimosa ferruginea* [Roxburgh]. An Indian shrub, from which a very poisonous liquor is distilled. The bark is highly astringent; a decoction of it is used as a tooth wash. According to Miquel, it is a species of *Albizzia.* [A, 328, 344.]—**A. fistula.** A species growing in Northern Africa, furnishing a variety of gum arabic. [B, 5.]—**A. floribunda** [Willdenow]. Syn.: *Mimosa floribunda* [Ventenat]. A shrub, 6 feet high, growing in New South Wales, yielding a gum resembling gum arabic. The name has also been applied to the *A. longifolia.* [A, 344; B, 5, 43.]—**A. germanica.** See *A. nostras.*—**A. giraffæ** [Sieber]. Camelopard's a., from its being a favorite food of the giraffe; an African species, yielding a superior kind of gum arabic, called by the natives *kameel-doorn* and eaten by them. [A, 248, 316.]—**A. graveolens.** According to Power and Sedgwick, a native of India and Bengal, used as a bitter and diaphoretic. [A, 316.]—**A. Greggii.** A species growing in the western part of the United States, said to furnish shellac and lac dye. [B, 5, 60, 66.]—**A. gummifera** [Willdenow]. Ger., *Talhahbaum.* A tree, 30 feet high, growing in Guinea, said to furnish Barbary gum and gum sassa. [A, 328; B, 43.]—**A. homalophylla** [A. Cunn.]. The myal, or myall, tree of Australia, furnishing a gum used as a remedy for diarrhœa. [A, 321; B, 5, 19.]—**A. horrida** [Willdenow]. A shrub, 6 feet high, growing at the Cape of Good Hope, furnishing the variety of gum arabic known as Cape gum. The bark is highly astringent. [A, 316; B, 5, 43.]—**A. indica** [Desvaux]. Syn.: *Mimosa indica.* A variety of the *A. arabica* of Willdenow. [A, 328.]—**A. Julibrissin** [Willdenow]. Fr., *a. de Constantinople, arbre à soie.* The silk tree growing in the Levant, distinguished by its smooth bark and its white blossoms. A diaphoretic tea is made from the latter. [B, 43.]—**A. jurema.** See Stryphnodendron *jurema.*—**A. karroo** [Hayne]. A Cape of Good Hope species, furnishing gum arabic. [B, 5.]—**A. lebbek** [Willdenow]. Syn.: *Mimosa lebbek* [Linnæus]. The *labach* of the Arabians, indigenous to Upper Egypt, and cultivated in the East and West Indies, yielding a kind of gum arabic. The wood is the *bois noir* of the Mauritius; the leaves are used, as fomentations and baths, for rheumatic pains; the boiled seeds are said to be poisonous. [A, 316, 344.]—**A. leucocephala** [Bertolini]. A Puerto Rico species. The bark is astringent. [A, 344.]—**A. leucophlæa** [Willdenow]. An Indian shrub, from which the natives distill a strong spirituous liquor. The bark is highly astringent. [A, 316, 328.]—**A. melanochæta.** Thought to be the same as *A. leucophlœa.* [A, 328.]—**A. melanoxylon** [R. Brown]. An Australian shrub, which furnishes Australian gum and an extract resembling catechu. [A, 328.]—**A. mollissima** [Willdenow]. A shrub indigenous to Van Dieman's Land, considered by Lindley as a variety of *A. decurrens.* The bark yields an astringent extract. [A, 316, 328.]—**A. myriophylla** [Graham]. A species indigenous to Silhet, where a kind of beer is made from the bark. [A, 316.]—**A. neboueb, A. neboued.** Probably from *nebneb,* a negro name for the *A. verek,* with which it is found associated. [A, 316, 328.] Cf. *A. Adansonii.*—**A. nellyrenza** [Graham]. See *A. amara.*—**A. nilotica** [Delille]. Fr., *a. du Nil, gommier rouge.* Syn.: *Mimosa nilotica* [Linnæus]. A variety of the *A. arabica* of Willdenow, furnishing a sort of gum arabic and the Senegal and Egyptian bablah. [B, 5.]—**A. niopo, A. niops.** A South American species, considered to be more properly a *Piptadenia.* The Orinoco Indians, according to Humboldt, smoke the powdered seeds instead of tobacco. According to Power and Sedgwick, the pods, mixed with the flour of cassava and with lime from the shell of a *Helix,* are used as an intoxicating snuff by the Indians. [A, 316, 328, 344.]—**A. nostras.** Fr., *faux a.* Ger., *Schlehensaft.* Syn.: *a. germanica.* German, or false, acacia; an imitation of the old extract of a. (acaciæ veræ succus), made by inspissating the juice of the unripe fruit of the wild sloe (*Prunus spinosa*). [B, 5. 55, 58.]—**A. odoratissima** [Willdenow]. An East Indian tree, 40 feet high, with white, fragrant flowers. A preparation of the juice of the bark, together with lime-juice and turmeric, boiled in cocoanut oil, is used externally in leprosy and chronic

ulcers. [A, 316; B, 43, 48.]—**A. orfota** [Lindley]. Syn.: *Mimosa Orfota* [Forskal]. An Arabian species. According to Forskal, the leaves prevent camel's milk from becoming sour for a considerable time, and the Arabs use fumigation with the resin in the treatment of epilepsy. [A, 344.]—**A. pennata** [De Candolle]. See *A. concinna.*—**A. peregrina** [Willdenow]. Syn.: *Mimosa peregrina* [Linnæus]. A New Granada species, the bark of which is supposed to contain tannin. [A, 344.]—**A. polyacantha** [Willdenow]. See *A. catechu.*—**A. pycnantha** [Bentham]. An Australian species, furnishing a variety of Australian gum arabic. [B, 5.]—**A. raddiana** [Savi]. An Egyptian species, upon which an insect termed *giokel* produces galls that are used to relieve odontalgia. [A, 328.] Considered by some as identical with *A. tortilis.*—**A. sassa.** Syn.: *Mimosa sassa* [Bruce]. A species growing in Abyssinia and Madagascar, furnishing a gum analogous to gum arabic. [Dupetit-Thouars, A, 344.]—**A. scandens** [Willdenow]. Syn.: *Mimosa scandens* [Linnæus]. The *bayugo* of the Philippine Islands, a large creeper. It furnishes the St. Thomas bean, and the bark, which contains a soapy principle, is used for washing linen. According to Horsfield, the plant is reputed an emetic in Java, where the seeds are eaten by the natives. The green pods contain a translucent, gummy material, from which, according to Rumpf, a lotion is made for cleansing the scalp and preventing the hair from falling out. The plant has also been classed as a species of *Entada.* [A, 328, 344; B, 43, 48.]—**A. Senegal** [Willdenow]. Several species have been confounded under this name. One of them furnishes gum senegal. [A, 328.]—**A. Seyal** [Delille]. A tree of Northern Africa, furnishing Suakin gum arabic. [B, 5.] The *A. Seyal* of De Candolle is the *A. tortilis.* [B, 63.]—**A. sophoræ** [R. Brown]. An Australian tree, the fruit of which, as well as the seeds (which the natives eat roasted), is nutritive and analeptic. It is doubtful if it furnishes gum arabic. [A, 328.]—**A. speciosa** [Willdenow]. The sirissa tree of India, where the leaves, the bark, and an oil extracted from the seeds are used in ophthalmia, as an application to foul ulcers, in leprosy, and in beri-beri. [A, 316.]—**A. stenocarpa.** A species found in Upper Egypt and adjacent countries, furnishing Suakin gum arabic. [B, 5.]—**A. suma, A. sundra.** Species which resemble the *A. catechu* and yield a similar extract. [A, 316; B.]—**A. tenuifolia** [Willdenow]. A West Indian species. According to Poupée-Desportes, the buds and root, commonly called *tendre à caillou*, are used for hæmorrhages, diarrhœa, and vomiting. [A, 344.]—**A. tortilis** [Hayne]. A tree of Northern Africa, sometimes 60 feet high, furnishing a variety of gum arabic. [B, 5.]—**A. tortuosa** [Willdenow]. A West Indian species. The coats of the pod contain a bitter and astringent syrupy liquid. [A. 316.]—**A. vera** [Willdenow], **A. veravel.** Ger., *ägyptischer Schotendorn.* Syn.: *Mimosa nilotica* [Linnæus]. A moderate-sized tree, indigenous to Egypt, but growing also in Nubia, Senegal, and probably other parts of Africa, also found in India. This and *A. verek* are the most important sources of gum arabic. [B, 5, 43.]—**A. verek** [Guillemin and Perottet]. Fr., *gommier blanc.* A species growing in Eastern Africa, but chiefly in Western Africa, north of the Senegal River; usually less than 20 feet high; recognized in the U. S. Ph. as furnishing the official variety of gum arabic. Its specific name is the native term for the tree. [B.]—**A. wallichiana** [De Candolle]. See *A. catechu.*—**A. Wrightii** [Graham]. Probably identical with *A. amara.* [A, 328.]—**A. zeylonica.** See HÆMATOXYLON *campechianum.*—**Acaciæ gummi.** Gum arabic.—**Acaciæ veræ succus.** Fr., *vrai a.* A reddish-brown solid extract formerly obtained from the immature pods of *A. arabica* and *A. vera;* mildly astringent, of a sweetish-acidulous taste, and soluble in water. [A, 308.]—**Bastard a., False a., Faux a.** [Fr.], **German a.** See *A. nostras* and ROBINIA *pseudo-acacia.*—**Gummi acaciæ.** Gum arabic.—**Mucilago acaciæ** [U. S. Ph., Br. Ph.]. Fr., *mucilage de gomme* [Fr. Cod.]. Ger., *Gummischleim.* It., *mucillaggine di gomma arabica.* Sp., *mucilago de goma arabica.* Syn.: *mucilago gummi arabici* [Ger. Ph.], *mucilago cum gummi* [Fr. Cod.]. Mucilage of a. or of gum arabic; a viscid, tenacious liquid made by dissolving 34 parts of gum arabic in 66 parts of water [U. S. Ph.], or 4 avoirdupois ounces of the gum in 6 fluidounces of water [Br. Ph.]. The German preparation is of about the same strength as that of the U. S. Ph.; the French is made of equal parts of gum arabic and water. [B.]—**Syrupus acaciæ** [U. S. Ph.]. Fr., *sirop de gomme* [Fr. Cod.]. Ger., *Gummisyrup.* It., *siroppo di gomma arabica.* Sp., *jarabe de goma arabica.* Syn.: *syrupus cum gummi* [Fr. Cod.], *syrupus gummosus* [Ger. Ph.]. Syrup of a., or of gum arabic, containing 25 parts of mucilage of a. and 75 parts of syrup. The preparation of the U. S. Ph. of 1870 was made by dissolving 2 troyounces of a. in 8 fluidounces of water, adding 14 troyounces of sugar, and straining. The French preparation contains only one twelfth its weight of gum arabic. The German (given in the 1st ed. of the Ger. Ph., but discarded in the 2d) was of the same strength as the present U. S. preparation. [B.]—**Vrai a.** (Fr.). See *Acaciæ veræ succus.*

ACACIÆ (Lat.), n. f., pl. of *acacia.* See ACACIEÆ.

ACACIE (Fr., Ger.), n. Pr. a^{3}k-a^3-se, a^{3}k-a^3′tzi^2-e^2. A horticultural term for several species of the genus *Acacia.* [A, 306.]—**Amerikanische A.** (Ger.) See ROBINIA *pseudo-acacia.*—**Unechte A.** (Ger.) See ACACIA *nostras.*

ACACIEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a(a^3)-si(ke)′e^2-e(a^3-e^2). A tribe of plants of the order *Mimosaceæ*, including the genera *Acacia*, *Albizzia*, *Pithecolobium*, *Erythrophleum*, etc. [B, 41.]

ACACIN, n. A^{2}k′a^3-si^{2}n. Fr., *acacine.* Arabin.

ACACINE, n. A^{2}k′a^3-si^{2}n. Gum arabic. [B, 39.]

ACACOS, ACACUS (Lat.), adj's. A^{2}k(a^{3}k)-a(a^3)′ko^{2}s, -ku^{3}s-(ku^{4}s). Gr., ἄκακος (from α priv., and κακός, evil). A term used by Pechlinus to signify benign, involving no danger to life. As a n., it has been used as a synonym of aphthæ. [A, 325, 334.]

AÇACU (Port.), n. A^3-sa^3-ku′. A Brazilian tree, with poisonous sap, said to be curative of morphœa. [B, 44.]

ACADINUS (Lat.), n. m. A^{2}k(a^{3}k)-a^3-di(de)′nu^{3}s(nu^{4}s). A Sicilian spring classed with that of Palice. [A, 305.]

ACADZIR (Ar.), n. See ACAZIR.

ACÆNA (Lat.), n. f. A^{2}s(a^{3}k)-e′(a^3′e^2)-na^3. From ἄκαινα, a spine. A genus of *Rosaceæ* established by Vahl, embracing a number of herbaceous or shrubby plants provided with a spinous calyx. [B, 38, 41.]—**A. sanguisorba.** A Tasmanian species, the leaves of which are used as a substitute for tea. [A, 316.]

ACAHI (Ar.), n. Written also *achahi.* An old name for alum water. [A, 325.]

ACAID (Ar.), n. An old term for vinegar. [A, 325.]

ACAJA (Ger.), n. A^{3}k-a^3′ya^3. The fruit of the *Acacia vera.*

ACAJOU (Fr.), n. A^{3}k-a^3-zhu. 1. A genus of plants established by Tournefort, corresponding to the *Anacardium* of Rottböd. 2. The *Anacardium occidentale.* 3. The cashew nut. 4. A yellow gummy substance, consisting of ordinary gum and bassorin, obtained from the bark of the cashew-nut tree (*Anacardium occidentale*). [B, 2, 5, 41.]—**A. à pommes** (Fr.), **A'baum** (Ger.). The cashew-nut tree.—**A'gummi, A'harz** (Ger.). See *Acajou* (4th def.).—**A'nuss** (Ger.). The cashew nut.—**Gomme d'a.** See *Acajou* (4th def.).—**Noix d'a., Pomme d'a.** The cashew nut.—**Résine d'a.** See *Acajou* (4th def.).

ACAJU, ACAJUBA (Lat.), n's f. A^{2}k(a^{3}k)′a^3-ju(yu), ju(yu)′-ba^3. Latinized forms of a Malay word meaning a wood readily worked [B, 51]; according to others, of the Brazilian word *acajaibo*, or a corruption of *caju* or *cazou*, meaning any sort of wood used by cabinet-makers. [A, 306.] Under the name *Acajuba*, Gärtner established a genus corresponding to the *Anacardium* of Rottböd, who, according to Baillou, applied the term only to the fruit of *Anacardium occidentale.* [B, 41, 43, 46.]—**Acajuba occidentalis, A. officinalis.** See ANACARDIUM *occidentale.*

ACALAI (Ar.), n. An old name for common salt. [A, 325.]

ACALCUM, n. An old name for tin. [A, 325.]

ACALICAL, adj. See ACALYCAL.

ACALICINE, adj. See ACALYCINE.

ACALICULATE, adj. A^{2}k-a^{2}l-i^{2}k′u^2-lat. See ACALYCULATE.

ACALICULÉ (Fr.), adj. A^3-ka^3-le-ku^6-la. Acalyculate.

ACALVITIEN (Fr.), adj. A^{3}k-a^{3}l-vi^2-shi^2-a^{3}n^2. From α priv., and *calvities* (*q. v.*). Preventive of baldness. [A, 306.]

ACALYCAL, adj. A^{2}k-a^{2}l′i^{2}k-a^{2}l. From α priv., and κάλυξ (see CALYX). Lat., *acalycalis.* Fr., *acalical.* Not adherent to the calyx (said of stamens). [B, 38, 39.]

ACALYCINE, ACALYCINOUS, adj's. A^{2}k-a^{2}l′i^2-si^{2}n, i^{2}s′-i^{2}n-u^{3}s. Fr., *acalicin.* Having no calyx. [B, 38, 39.]

ACALYCULATE, adj. A^{2}k-a^{2}l-i^{2}k′u^2-lat. Fr., *acaliculé.* Having no calyculus. [B, 39.]

ACALYPHA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}l(a^{3}l)′i^{2}f(u^{6}f)-a^3. From ἀκαλυφής or ἀκάλυφος (forms of ἀκάλυπτος), unveiled; or from ἀκαλήφη, a nettle. Fr., *acalyphe, ricinelle.* Syn.: *Acalyphes* [Hasskarl]. A genus of euphorbiaceous plants established by Linnæus. [B, 34, 41, 46.]—**A. amentacea, A. betulina.** See *A. fruticosa.*—**A. carpinifolia.** A Santo Domingo species. The leaves are used as an antispasmodic. [A, 316.]—**A. ciliata** [Willdenow]. A species found in Asia and Tropical Africa. In Ashantee, where it is known as *crowera*, it is ground up with the lesser cardamum seeds, and applied to the chest to relieve pain. [Waring, A, 316.]—**A. fruticosa.** Birch-leaved a.; an Indian shrub, the leaves of which are used by the native doctors in dyspepsia and cholera, and are also regarded as attenuant and alterative. [A, 316.]—**A. hispida** [Willdenow]. An Indian species. The decoction is used in diarrhœa and dysentery, and as a tonic. [A, 316.]—**A. indica** [Linnæus]. An annual, 1 to 2 feet high, indigenous to India, said to have cathartic properties. [B, 19.]—**A. virginica** [Linnæus]. Three-seeded mercury; a weed 1 to 1½ foot high, indigenous to North America, said to be expectorant and diuretic. [A, 316; B, 34.]—**Birch-leaved a.** See *A. fruticosa.*

ACALYPHACEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^{2}l(a^{3}l)-i^2(u^6)-fa-(fa^3)′se^2(ke^2)-e(a^3-e^2). Fr., *acalyphacées.* Ger., *Acalyphaceen.* See ACALYPHEÆ.

ACALYPHÉ (Fr.), adj. A^3-ka^3-li^2-fa. Resembling an acalypha. [A, 306.]

ACALYPHEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^{2}l(a^{3}l)-i^{2}f′(u^{6}f)e^2-e-(a^3-e^2). Fr., *acalyphées.* Ger., *Brennkrautgewächse.* Sp., *acalifeas.* Syn.: *acalyphaceæ.* A sub-order of the natural order *Euphorbiaceæ*, including the genus *Acalypha.* [B, 35. 41.]

ACALYPHES (Lat.), n. m. A^{2}k(a^{3}k)-a^{2}l(a^{3}l)′i^{2}f(u^{6}f)-ez(e^{2}s). Hasskarl's name for the genus *Acalypha.* [B, 41.]

ACALYPTOSPORA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}l(a^{3}l)-i^{2}p(u^{6}p)-to^{2}s′po-ra^3. From ἀκάλυπτος, uncovered, and σπορά, a sowing. A genus of fungi established by Desmazières. [B, 41.]

ACAMANTIA, ACAMASIA (Lat.), n's f. A^{2}k(a^{3}k)-a^3-ma^{2}n-(ma^{3}n)′shi^2(ti^2)-a^3, -a(a^3)′zhi^2(si^2)-a. Fr., *acamasie.* Ger., *Unermüdlichkeit.* The state of being *acamatus* (*q. v.*).

ACAMATHOS, ACAMATOS, ACAMATUS (Lat.), adj's. A^{2}k(a^{3}k)-a^{2}m(a^{3}m)′a^3-tho^{2}s, -to^{2}s, -tu^{3}s(tu^{4}s). Gr., ἀκάματος, from α priv., and κάμνειν, to be weary. Fr., *infatigable.* Ger., *unermüdbar, unerschöpflich.* Sp., *acamatos.* Untiring; hence, of long-enduring health. Galen is said to have used the term to indicate that state of a limb in which, being midway between flexion and extension, it could be kept longest without fatigue. [A, 322, 323.]

ACAMECH, n. An alchemical term for the impurities of silver, or, according to others, for refined silver. [A, 334, 337.]

ACAMELT, ACAMETL, n. A Mexican name for the *Agave*

americana, a plant from which a wine is made that is drank in Mexico. [A, 334, 344.]

ACAMPSIA, n. A^{2}k-a^{2}mp′si^2-a^3. Gr., ἀκαμψία, ἀκαμπία (from α priv., and κάμπτειν, to bend). Fr., *acampsie.* Ger., *Akampsie.* Sp., *acampsia.* Inflexibility, rigidity of a limb.

ACANACA, n. A^{3}k-a^{3}n′a^3-ka^3. An East Indian plant used by the natives as a sudorific and anti-syphilitic. [A, 334.]

ACANACEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-a(a^3)′se^2(ke^2)-e(a^3-e^2). Fr., *acanacées.* Ger., *Acanaceen, distelartige Pflanzen.* See CICHORACEÆ.

ACANACEOUS, adj. A^{2}k-a^{2}n-a′se^2-u^{3}s. Fr., *acanacé.* See ACANTHACEOUS.

ACANOR (Ar.), n. See ATHANOR.

ACANOS (Lat.), n. m. A^{2}k(a^{3}k)′a^{3}n-o^{2}s. Gen., *acani.* Gr., ἄκανος. 1. A thorny plant, mentioned by Pliny, the seeds and roots of which were used by the ancients against hæmorrhages. 2. A genus of *Compositæ* established by Adanson, corresponding to the *Onopordon* of Vaillant. [B, 41, 44.]—**A. spina** [Scopoli]. See ONOPORDON *acanthium.*

ACANTHA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′tha^3. Gr., ἄκανθα. 1. A thorn. 2. A spine, as of a vertebra or of the tibia. 3. The vertebral column. [A, 336.] 4. Spina bifida. [A, 322.] 5. Anciently, any prickly plant, especially the *Acacia.* [A, 311.]

ACANTHABOLUS (Lat.), n. m. See ACANTHOBOLUS.

ACANTHACEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tha(tha^3)′se^2(ke^2)-e(a^3-e^2). Fr., *acanthacées.* Ger., *Acanthaceen, Strauchdisteln.* Sp., *acantáceas.* Acanthads; an order of herbs and shrubs in De Candolle's natural system. They have opposite simple leaves, and flowers inclosed in large leafy bracts. The calyx and corolla are five-parted, the former being imbricate and the latter convolute in æstivation. The stamens are didynamous or diandrous. The fruit is a two-celled capsule containing from 4 to 12 seeds, destitute of albumen, and supported by hard hook-like or cup-shaped processes of the placenta. [B, 19, 34.]

ACANTHACEOUS, adj. A^{2}k-a^{2}n-tha′se^2-u^{3}s. Having spines, prickly (said of plants of the thistle kind).

ACANTHADS, n. pl. A^{2}k-a^{2}n′tha^{2}dz. See ACANTHACEÆ.

ACANTHALBUCA, ACANTHALZUCA [Quincy] (Lat.), n's f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tha^{2}l(tha^{3}l)-ru^2(ru)′, zu^2(zu)′ka^3. The globe-thistle. [A, 336.] See ECHINOPS *sphærocephalus.*

ACANTHAVOLA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tha^2(tha^3)′vo(wo)-la^3. See ACANTHOBOLUS.

ACANTHE (Fr.), n. A^{3}k-a^{3}nt. The genus *Acanthus.* [B.]—**A. d'Allemagne.** See HERACLEUM *sphondylium.*—**A. épineuse.** See ACANTHUS *spinosus.*—**A. molle.** See ACANTHUS *mollis.*—**A. sauvage, Fausse a.** The cotton-thistle. See ONOPORDON *acanthium.* [B, 19, 34.]

ACANTHEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^{2}nth(a^{3}nth)′e(a)-e(a^3-e^2). Fr., *acanthées.* Ger., *Acantheä.* A tribe of the *Acanthaceæ* of which the *Acanthus* is the typical genus. [B, 38.]

ACANTHI (Lat.), n. m. pl. A^{2}k(a^{3}k)-a^{2}nth(a^{3}nth)′i(e). Jussieu's term for the *Acanthaceæ.* [A, 322.]

ACANTHIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thi^2-a^3. Fr., *acanthie.* Ger., *Wanze.* Syn.: *Cimex.* A genus of hemipterous insects.—**A. ciliata** [Eversmann]. A Russian species, smaller than *A. lectularia*, yellowish-red, and thickly covered with hair. Its bite is more painful and more lasting in its effects than that of *A. lectularia.* [B, 27.]—**A. lectularia** [Linnæus]. Fr., *punaise des lits.* Ger., *Bettwanze.* Syn.: *Cimex lectularius.* The bedbug; a reddish-brown insect, 4–5 mm. long, with rudimentary wings and the abdomen divided into 8 segments. Its mouth is adapted for suction, and contains an alkaline secretion from the salivary glands, which causes the irritation that follows its bite. [B, 27.]

ACANTHIADÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-thi(the)′a^3-de(da^3-e^2). See MEMBRANACEI.

ACANTHICE MASTICHE (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thi^2-se(ka) ma^{2}s(ma^{3}s)′ti^{2}k(ti^{2}ch^2)-e(a). Gr., ἀκανθική μαστίχη. The juice of the *helxine*, a plant of unknown characters, mentioned by Pliny, supposed to be the *Carduus pinea* of the ancients or the *Atractylis gummifera* of Linnæus. [B, 59.]

ACANTHICHTHYOSIS, n. A^{2}k-a^{2}nth-i^{2}k-thi^2-o′si^{2}s. Fr., *acanthichthyose.* Ger., *Dornfischschuppenkrankheit.* See ICHTHYOSIS *spinosa.*

ACANTHIDÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thi^{2}d-e(a^{3}e^2). See ACANTHEÆ.

ACANTHILLIS (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-thi^{2}l′li^{2}s. Gen., *acanthillidis.* Gr., ἀκανθιλλίς. Wild asparagus. [A, 312.]

ACANTHINUM (Lat.), n. n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thi^{2}n-u^{3}m(u^{4}m). Gum arabic. [Celsus; B, 45.]

ACANTHINUS (Lat.), adj. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thi^{2}n-u^{3}s(u^{4}s). Resembling the *Acanthus.* [A, 312.]

ACANTHION (Lat.), n. n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thi^2-o^{2}n. Gr., ἀκάνθιον, dim. of ἄκανθα. See ONOPORDON *acanthium.*

ACANTHIS (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thi^{2}s. Gen., *acanthidis.* Gr., ἀκανθίς. The groundsel. See SENECIO *vulgaris.*

ACANTHIUM (Lat.), n. n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thi^2-u^{3}m(u^{4}m). A name for certain plants of the genus *Onopordon.* [B, 41, 43.]

ACANTHIUROUS, adj. A^{2}k-a^{2}n-thi^2-u^2′ru^{3}s. From ἄκανθα, a spine, and οὐρά, a tail. Fr., *acanthiure.* Ger., *dornschwanzig.* Having the tail supplied with spines. [A, 316.]

ACANTHOBOLUS (Lat.), n. m. Written also *acanthabolus.* A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho^{2}b′o-lu^{3}s(lu^{4}s). From ἄκανθα, a thorn, and βάλλειν, to cast out. Fr., *acanthobole.* Ger., *Grätenzange.* It., *acantobolo, acantabolo.* Sp., *acantabola.* 1. A name given by Paulus Ægineta to an ancient forceps for removing foreign bodies imbedded in the soft parts, resembling the volsella. [A, 314.] 2. The rose-bush. [Nicander, A, 322.] 3. A genus of *Algæ* established by Kützing. [B.]

ACANTHOCARPOUS, adj. A^{2}k-a^{2}n-tho-ka^{3}r′pu^{3}s. From ἄκανθα, a spine, and καρπός, fruit. Fr., *acanthocarpe.* Ger., *dornfruchtig.* Sp., *acantocarpo.* Having the fruit covered with spines. [B, 38.]

ACANTHOCEPHALA (Lat.), n. n. pl. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho-se^{2}f(ke^{2}f)′a^3-ia^3. From ἄκανθα, a spine, and κεφαλή, the head. Fr., *acanthocéphales.* Ger., *Hakenwürmer.* It., *acantocefali.* Sp., *acantocéfalos.* Thorny-headed worms; an order of scolecids characterized by a proboscis armed with hook-like processes. There is but one genus, *Echinorrhynchus*, all the species of which are parasitic. [B, 27, 28.]

ACANTHOCEPHALOUS, adj. A^{2}k-a^{2}n-tho-se^{2}f′a^{2}l-u^{3}s. Thorny-headed, having the characters of the *Acanthocephala* (*q. v.*).

ACANTHOCLADOUS, adj. A^{2}k-a^{2}n-tho^{2}k′la^{2}d-u^{3}s. From ἄκανθα, a thorn, and κλάδος, a branch. Fr., *acanthoclade.* Ger., *dornästig.* Having thorny branches. [B, 36, 38.]

ACANTHODES (Lat.), adj. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho′dez(das). See ACANTHOID.

ACANTHODION, ACANTHODIUM (Lat.), n's n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho′di^2-o^{2}n, -u^{3}m(u^{4}m). For deriv., see ACANTHOID. 1. A genus of *Acanthaceæ* established by Delille. 2. A name given by C. Koch to a genus of *Compositæ.* [B, 41.]

ACANTHOGLOSSUM (Lat.), n. n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho-glo^{2}s′su^{3}m(su^{4}m). From ἄκανθα, a spine, and γλῶσσα, the tongue. Blume's name for a genus of orchids of the sub-order *Vandinæ.* [B, 19, 41.]

ACANTHOID, adj. A^{2}k-a^{2}n′thoid. Gr., ἀκανθώδης. Lat., *acanthodes, acanthoides, acanthoideus.* Fr., *acanthoïde.* Ger., *akanthusartig* (1st def.), *dornähnlich* (2d def.). 1. Resembling the *Acanthus.* [A, 306.] 2. Spinous, prickly. [A, 322.]

ACANTHOLIMON [Boissier], **ACANTHOLINUM** [C. Koch] (Lat.), n's n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho-li(le)′mo^{2}n, -nu^{3}m(nu^{4}m). From ἄκανθα, a spine, and λειμώνιον, the sea-lavender or snakeweed [A, 311]. A genus of *Plumbaginaceæ* [B, 41] or *Plantaginaceæ* [B, 43] established by Boissier. They are small perennial plants.

ACANTHOLOBUS (Lat.), n. m. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho^{2}l′o-bu^{3}s-(bu^{4}s). See ACANTHOBOLUS (3d def.).

ACANTHOLOMON (Lat.), n. n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho-lo′-mo^{2}n. See ACANTHOLIMON.

ACANTHOLYSIS (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho^{2}l′i^2(u^6)-si^{2}s. From ἄκανθα, a prickle, and λύσις, a loosening. Ger., *Akantholyse.* A form of acanthosis (*q. v.*) characterized by separation of the upper layers of the epidermis. In Auspitz's classification of skin diseases the acantholyses are a family of the acanthoses, embracing *pemphigus essentialis* and *gangræna cachectica infantum.* [G, 4.]—**A. bullosa acquisita** [G, 75]. See PEMPHIGUS *foliaceus.*

ACANTHOMA (Lat.), n. n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho′ma^3. For deriv., see ACANTHA and *-oma.** Ger., *Akanthom.* Hyperplasia of the prickle-cell layer of the epidermis. [G.]—**A. simplex.** See HYPERACANTHOSIS.—**Alveolar a.** Ger., *alveolares Akanthom.* A form in which the new growths have an alveolar structure. See *Alveolar* PARACANTHOMA.—**Warty a.** Ger., *warzenartiges Akanthom.* A form in which there are warty elevations upon the surface of the skin. In Auspitz's classification of skin diseases the *warzenartige Akanthome* are a subdivision of the family of hyperacanthoses, including *verruca* and *condyloma acuminatum.* [G.]

ACANTHO-MASTIC, n. A^{2}k-a^{2}n″tho-ma^{2}s′ti^{2}k. See *Pseudo*-MASTIC.

ACANTHOPELVIS (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho-pe^{2}l′-vi^{2}s(wi^{2}s). For deriv., see ACANTHA and PELVIS. Ger., *Stachelbecken.* A pelvis with its cavity encroached upon by an exostosis. [A, 319.]

ACANTHOPHOROUS, adj. A^{2}k-a^{2}n-tho^{2}f′o-ru^{3}s. From ἄκανθα, a spine, and φορεῖν, to bear. Fr., *acanthophore.* Ger., *dorntragend.* Bearing spines or prickles. [B, 36, 38.]

ACANTHOPODIOUS, adj. A^{2}k-a^{2}n-tho-po′di^2-u^{3}s. From ἄκανθα, a spine, and πόδιον (dim. of πούς, a foot). Having prickly leaf-stalks.

ACANTHOPODOUS, adj. A^{2}k-a^{2}n-tho^{2}p′o-du^{3}s. From ἄκανθα, a spine, and πούς, a foot. Fr., *acanthopode.* Ger., *dornfüssig.* 1. Having spinous legs (said of insects). 2. Having spines in the place of fins (said of fishes). [A, 306, 316.]

ACANTHOPOMATOUS, ACANTHOPOMOUS, adj's. A^{2}k-a^{2}n-tho-po^{2}m′a^{2}t-u^{3}s, -tho^{2}p′o-mu^{3}s. From ἄκανθα, a spine, and πῶμα, a cover. Having the opercula spinous or serrated. [A, 306.]

ACANTHOPOUS, adj. A^{2}k-a^{2}n-tho′pu^{3}s. From ἄκανθα, a spine, and ὤψ, the eye. Fr., *acanthope.* Ger., *dornaugig.* Having the eye furnished with spinous processes. [B, 38.]

ACANTHOPTERYGIOUS, adj. A^{2}k-a^{2}n-tho^{2}p-te^{2}ri^2′ji^2-u^{3}s. From ἄκανθα, a spine, and πτέρυξ, a fin. Thorny-finned. [A, 327.]

ACANTHOSIS (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho′si^{2}s. Gen., *acantho′seos* (*-sis*). For deriv., see ACANTHA and *-osis.** Ger., *Akanthose.* Disease of the prickle-cell layer of the epidermis. The acanthoses are the 3d order of Auspitz's 7th class of skin diseases (the *epidermidoses*), comprising *hyperacanthoses, paracanthoses,* and *acantholyses.* [G, 4.]

ACANTHOSPERMUM (Lat.), n. n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho-spu^{5}rm(spe^{2}rm)′u^{3}m(u^{4}m). From ἄκανθα, a spine, and σπέρμα, a seed. Schrank's name for a genus of plants, of the natural order *Compositæ*, tribe *Senecionideæ*, corresponding in part to the genus

Xanthioides of De Candolle. [B, 41.]—**A. brasilium** [Schraub], **A. hirsutum, A. xanthioides.** These are thought to be only varieties of the same species. They are indigenous to Brazil. The *A. hirsutum* is aromatic, tonic, diuretic, and diaphoretic, and the infusion is given in diarrhœa. [A, 316.]

ACANTHOTHECA (Lat.), n. n. pl. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)-tho-the-(tha)′ka^3. From ἄκανθα, a spine, and θήκη, a case or sheath. Fr., *acanthothèques.* A type of entozoa made by Davaine in 1860, including the single genus *Pentastoma.* [B.] See LINGUATULA.

ACANTHOUS, adj. A^{2}k-a^{2}n′thu^{3}s. From ἄκανθα, a spine. Fr., *acantheux.* Ger., *dornig.* Spinous, prickly, thorny.

ACANTHOXANTHIUM (Lat.), n. n. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′tho^{2}x-a^{2}n(a^{3}n)′thi^2-u^{3}m(u^{4}m). From ἄκανθα, a thorn, and ξανθός, yellow. De Candolle's name for a section of the genus *Xanthium.* [B, 41.]

ACANTHULUS (Lat.), n. m. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thu^2(thu)-lu^{3}s-(lu^{4}s). See ACANTHOBOLUS.

ACANTHUS (Lat.), n. m. A^{2}k(a^{3}k)-a^{2}n(a^{3}n)′thu^{3}s(thu^{4}s). Gr., ἄκανθος. Fr., *acanthe.* Ger., *Bärenklau.* It., Sp., *acanto.* Bear's breech; a genus of acanthaceous plants established by Linnæus. [B, 19, 20, 43, 51.]—**A'gewächse** (Ger.). See ACANTHACEÆ.—**A. mollis** [Linnæus]. Fr., *acanthe molle, branche-* (ou *branc-*) *ursine.* Ger., *weiche* (oder *echte*) *Bärenklau.* Sp., *branca ursina.* Smooth bear's breech, brankursine; a species growing in Southern Europe, having long, pinnatifid, dentate leaves, and white or reddish flowers. [B, 49, 51.] The leaves and roots were formerly called *branca ursina.* They were highly esteemed by the ancients for ruptures, sprains, burns, etc., and as being diuretic, anti-dysenteric, and preventive of phthisis. The whole plant, especially the root, is highly mucilaginous. [A, 303, 328, 341.]—**A. spinosa** [Linnæus]. Written also *A. spinosus.* Fr., *acanthe épineuse.* Ger., *dornige Bärenklau.* A perennial herb of Southern Europe, about 3 feet high, bearing white flowers, and having leaves smaller than those of *A. mollis,* with spinous edges. Its properties are said to be similar to those of *A. mollis.* [A, 316; B, 19, 43, 49.]—**A. verus, A. vulgaris.** See *A. mollis.*

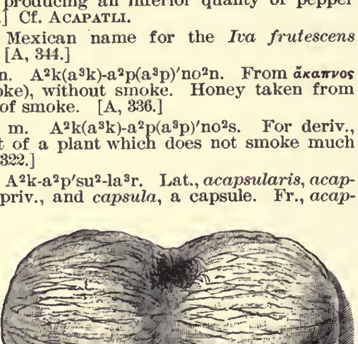
ACANTHUS.

ACANUS (Lat.), n. m. See ACANOS.

ACAPALTI, n. Written also *acapatli, acapatli,* and *acapulti.* A New Granada plant, producing an inferior quality of pepper (? *Piper longum*). [B, 44.] Cf. ACAPATLI.

ACAPATLI, n. A Mexican name for the *Iva frutescens* ("Mexican cinchona"). [A, 344.]

ACAPNON (Lat.), n. n. A^{2}k(a^{3}k)-a^{2}p(a^{3}p)′no^{2}n. From ἄκαπνος (α priv., and καπνός, smoke), without smoke. Honey taken from the hive without the use of smoke. [A, 336.]



ACAPNOS (Lat.), n. m. A^{2}k(a^{3}k)-a^{2}p(a^{3}p)′no^{2}s. For deriv., see ACAPNON. That part of a plant which does not smoke much when burned (obs.). [A, 322.]

ACAPSULAR, adj. A^{2}k-a^{2}p′su^2-la^{3}r. Lat., *acapsularis, acapsius, acapsus.* From α priv., and *capsula,* a capsule. Fr., *acapsulaire.* Without a capsule. [A, 322.]

ACAPULTI, n. See ACAPALTI.

ACARDE (Fr.), adj. A^3-ka^{3}rd. Acardiac.

ACARDIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{3}r′-di^2-a^3. From α priv., and καρδία, the heart. Fr., *acardie.* Ger., *Acardie, Herzmangel.* It., Sp., *acardia.* Syn.: *defectus cordis.* Congenital absence of the heart; that form of monstrosity in which, together with a normal fœtus, another exists, usually born afterward, having no heart and otherwise malformed in various ways. [A, 22.] See ACEPHALUS, AMORPHUS, and ACORMUS.

ACARDIA. (AFTER LUSK.)

ACARDIAC, adj. A^{2}k-a^{3}rd′i^2-a^{2}k. Gr., ἀκάρδιος. Lat., *acardius.* Fr., *acarde.* The subject of acardia (*q.v.*)

ACARDIACUS (Lat.), n. m. A^{2}k(a^{3}k)-a^{3}r-di(de)′-a^3-ku^{3}s(ku^{4}s). Fr., *acardiaque.* A monster without a heart. See ACARDIA.—**A. anceps.** Fr., *acardiaque douteux.* One in which the body is more developed than in the other varieties; the head, the trunk, the pelvis, the limbs, and even the heart existing, but in a state of atrophy. [A, 15.]

ACARDINATE, adj. A^{2}k-a^{3}r′di^{2}n-at. From α priv., and *cardo* (gen., *cardinis*), a hinge. Not hinged (said of shells). [A, 316.]

ACARDIOHÆMIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{3}r-di^2-o-he′(ha^3′-e^2)-mi^2-a^3. From α priv., καρδία, the heart, and αἷμα, blood. Fr., *acardiohémie.* Lack of blood in the heart. [K.]

ACARDIONERVIA (Lat.), n. f. A^{2}k(a^{2}k)-a^{3}r-di^2-o-nu^{5}r(ne^{2}r)′-vi^2(wi^2)-a^3. From α priv., καρδία, the heart, and *nervus,* a nerve. Fr., *acardionervie.* Syn.: *cardianeuria.* Piorry's term for a failure of nervous action in the heart. [A, 322; K.]

ACARDIOTROPHIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{3}r-di^2-o-tro′fi^2-a^3. From α priv., καρδία, the heart, and τροφή, nutrition. Fr., *acardiotrophie.* Syn.: *cardiatrophia.* Piorry's term for atrophy of the heart. [A, 322.]

ACARDIUS (Lat.), adj. A^{2}k(a^{3}k)-a^{3}r′di^2-u^{3}s(u^{4}s). Affected with acardia. [A, 322.]

ACARE (Fr.), n. A^3-ka^{3}r. See ACARUS.

ACARI (Lat.), n. m., pl. of *acarus* (*q. v.*). Fr., *acariens.* The family of *Acarina* (mites). [B.]

ACARIASIS (Lat.), n. f. A^{2}k(a^{3}k)-a^3-ri(re)′a^3-si^{2}s. For deriv., see ACARUS. Fr., *acariase.* Ger., *Milbensucht.* It., *acariasi.* Sp., *acariosis.* See SCABIES.

ACARICABA, n. See ACARICOBA.

ACARICIDE, adj. A^{2}k′a^{3}r-i^2-sid. Lat., *acaricidus* (from *acarus* [*q. v.*], and *cædere,* to kill). See ACAROTOXIC.

ACARICOBA, ACARICORA, n. A Brazilian name for the *Hydrocotyle umbellata* [Linnæus]; used by the Indians as an aromatic, alexipharmic, and emetic. [A, 316; B, 44, 49.]

ACARIDA, ACARIDÆ (Lat.), n's n. and f. pl. A^{2}k(a^{3}k)-a^2-(a^3)′ri^{2}d-a^3, -e(a^3-e^2). The acarides; a family of insects of the order *Acarina* (mites), many of which are parasitic. [B.]

ACARIDEA (Lat.), n. n. pl. A^{2}k(a^{3}k)-a^2(a^3)-ri^{2}d′e(e^2)-a. See ACARINA.

ACARIDES, n. pl. A^{2}k′a^2-ri^{2}dz. See ACARIDA.

ACARIDIÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^2(a^3)-ri^{2}d′i^2-e(a^3-e^2). See ACARINA.

ACARIEN (Fr.), adj. and n. A^3-ka^3-re-a^{3}n^2. Due to an acarus. In the pl., *acariens,* the *Acarina.*

ACARINA (Lat.), n. n. pl. A^{2}k(a^{3}k)-a^2(a^3)-ri(re)′na^3. Fr., *acarien, acarin.* Syn.: *Monomero-somata.* An order of animals of the class *Arachnida,* distinguished by the fusion of the abdomen and the cephalo-thorax into a single mass. It comprises the families *Linguatulina, Macrobiolidæ,* and *Acarida,* which include several parasitic genera, such as *Argas, Chrithoptes, Cheyletus, Demodex, Dermanyssus, Ixodes, Pentastoma, Sarcoptes,* and *Tyroglyphus.* [B, 27, 28.]

ACARNA (Lat.), n. f. A^{2}k(a^{3}k)-a^{3}r′na^3. Gr., ἄκαρνα, a kind of thistle [Theophrastus]. A name given by Willdenow to a section of the genus *Atractylis,* by Vaillant to the genus *Picnomon,* and by Hill to another genus of plants; all of which belong to the natural order *Compositæ* and the tribe *Cynareæ.* [B, 41, 43.]—**A. gummifera** [Willdenow]. The gummy-rooted thistle. See CARLINA *gummifera.*

ACARO-DERMATITIS (Lat.), n. f. A^{2}k(a^{3}k)′′a^2(a^3)-ro-du^{5}r-(de^{2}r)-ma^3-ti(te)′ti^{2}s. For deriv., see ACARUS and DERMATITIS. Inflammation of the skin due to the presence of an acarus. [G.]—**A.-d. autumnalis.** A variety produced by the *Leptus autumnalis.* [G.]

ACARODES (Lat.), adj. A^{2}k(a^{3}k)-a^2(a^3)-ro′dez(de^{2}s). Acaroid.

ACARODIUM (Lat.), n. n. A^{2}k(a^{3}k)-a^2(a^3)-ro′di^2-u^{3}m(u^{4}m). Acaroid resin.

ACAROID, adj. A^{2}k′a^2-roid. Lat., *acarodes.* Fr., *acaroïde.* For deriv., see ACAROIS, ACARUS, and *-oid.** 1. Resembling an acarus or tick. 2. Pertaining to or derived from the genus *Acarois.* —**A'harz** (Ger.), **A. resin.** See under RESIN.

ACAROIDIUM (Lat.), n. n. A^{2}k(a^{3}k)-a^2(a^3)-ro-i^{2}d′i^2-u^{3}m(u^{4}m). See *Acaroid* RESIN.

ACAROIS (Lat.), n. f. A^{2}k(a^{3}k)-a^2(a^3)-ro′i^{2}s. A genus of plants, said to be identical with the *Xanthorrhœa.* [B, 78.]—**A. resinifera.** See XANTHORRHŒA *hastilis.*

ACARON (Lat.), n. n. A^{2}k(a^{3}k)′a^2(a^3)-ro^{2}n. Gr., ἄκαρον [Aristotle] (from α priv., and κάρη, a head). A variety of wild myrtle, perhaps the *Myrtus silvestris,* or its berry. [A, 322, 323; B, 38.]

ACAROPSIS (Lat.), n. f. A^{2}k(a^{3}k)-a^2(a^3)-ro^{2}p′si^{2}s. From ἄκαρι, an *acarus,* and ὄψις, *aspect.* Fr., *acaropse.* A genus of *Arachnida,* established by Moquin-Tandon, including a part of the genus *Cheyletus* (*q. v.*). [A, 328.]

ACAROTOXIC, adj. A^{2}k-a^2-ro-to^{2}x′i^{2}k. For deriv., see ACARUS and TOXIC. Fr., *acarotoxique.* It., *acarotossico.* Syn.: *acaricide.* Capable of killing acari (said of medicinal applications). [Aubé, A, 301.]

ACARPÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^{3}rp′e(a^3-e^2). From ἄκαρπος, without fruit, barren. Syn.: *crypto-impetigines* [Schönlein]. A genus of skin diseases in Fuchs's classification; eruptions not attended with plastic lesions ("fruits"), i. e., without papules, vesicles, or the like. [G, 5.] Really an adj., *macuiæ* being understood.

ACARPE (Fr.), adj. A^3-ka^{3}rp. Acarpous.

ACARPELLOUS, adj. A^{2}k-a^{3}r′pe^{2}l-u^{3}s. From α priv., and *carpellum* (see CARPEL). Lat., *acarpellus.* Fr., *acarpellé.* Without, or deprived of, carpels. [Lindley, A, 322; B, 38, 39.]

ACARPIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{3}rp′i^2-a^3. Gr., ἀκαρπία. Unfruitfulness, barrenness. [A, 311.]

ACARPOUS, adj. A^{2}k-a^{3}r′pu^{3}s. Gr., ἄκαρπος. Lat., *acarpus.* Fr., *acarpe.* Ger., *unfruchtbar.* 1. (In botany) without, or deprived of, fruit. [B, 38.] 2. (In dermatology) without elevations, non-nodular. [A, 322.] Cf. ACARPÆ.

ACARTUM, n. An alchemical name for red lead. [Ruland, A, 316.] See LEAD *tetroxide.*

ACARUM (Lat.), n. n. A^{2}k(a^{3}k)′a^3-ru^{3}m(ru^{4}m). See ACARON.

ACARUS (Lat.), n. m. A^{2}k(a^{3}k)′a^3-ru^{3}s(ru^{4}s). From ἄκαρι (from ἀκαρής, minute, indivisible), a mite. Fr., *acare.* Ger., *Milbe.* It., Sp., *acaro.* A genus of *Arachnida* (embracing the mites and ticks) belonging to the order *Acarina,* established by Linnæus and by him made co-extensive with that order. The genus is now distributed among a number of other genera. [B, G.]—**A. americanus.** See PULEX *penetrans.*—**A. autumnalis.** See LEPTUS *autumnalis.*—**A. brachypus** [Olfers]. See SARCOPTES *scabiei.*—**A. casei.** Fr., *acare du fromage.* Ger., *Käsemilbe.* Syn.: *A. domesticus.* The cheese-mite.—**A. cellaris. A. ciro.** See *A. casei.* —**A. comedonum.** See DEMODEX *folliculorum.*—**A. domesticus.** See *A. casei.*—**A. dysenteriæ** [Linnæus]. A species found in the dejecta of dysenteric patients, at one time supposed to be the cause of the disease. [B, 70.]—**A. exulcerans** [Linnæus]. See SARCOPTES *scabiei.*—**A. farinæ.** Fr., *acare de la farine.* Ger., *Mehlmilbe.* The flour-mite (*Tyroglyphus farinæ*). [B.]—**A. folliculorum** [G. Simon]. See DEMODEX *folliculorum.*—**A. hordei.** The *Chrithoptes monunguiculosus;* a larval mite that occurs as a parasite upon barley, and occasionally attacks persons engaged in handling barley (reaping, threshing, etc.). It enters the skin in the region of the follicles, giving rise to urticarial wheals, eczema, or painful dermatitis. [G.]—**A. humanus** [Geoffroy], **A. humanus subcutaneus,** seu **psoricus** [Pallas]. See SARCOPTES *scabiei.*—**A. marginatus** [Hermann]. A species the type of which was a mite found running about on the corpus callosum at the necropsy of a man who had died of fracture of the skull in Strassburg. It has been suggested that it was "introduced during the operation by a fly seeking to lay its eggs." [A, 249.]—**A. ricinus.** Ger., *gemeine Zecke, Holzbock.* Syn.: *Ixodes ricinus* [Linnæus]. The wood-tick. According to Gerber, after inserting its seta in the skin it distends itself with blood to the size of a ricinus seed. [G.]—**A. sacchari, A. saccharinus.** The sugar-mite; found in raw sugar by R. Niccol in 1868; now assigned to the genus *Tyroglyphus.* [B.] —**A. scabiei** [Degeer]. The itch-mite. See SARCOPTES *scabiei.*—**A. siro** [Linnæus]. Fr., *A. siron.* See *A. casei.*—**A. Stockholmii.** See SCABIES *norwegica.*—**A. syron.** See *A. casei.*

ACATALEPSIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}t(a^{3}t)-a^2(a^3)-le^{2}p′si^2-a^3. Gr., ἀκαταληψία (from α priv., and καταλαμβάνειν, to comprehend), incomprehensibility. Fr., *acatalepsie.* Ger., *Akatalepsie.* It., *acatalessia.* Acatalepsy. 1. Uncertainty as to diagnosis or prognosis. 2. Impairment of the faculty of following a course of reasoning. 3. Epilepsy. 4. Dementia. [A, 306, 316, 322, 325.]

ACATALEPSY, n. A^{2}k-a^{2}t′a^{2}l-e^{2}p-si^2. See ACATALEPSIA.

ACATALEPTIC, adj. A^{2}k-a^{2}t-a^{2}l-e^{2}p′ti^{2}k. Fr., *acataleptique.* Sp., *acataléptico.* Pertaining to, or affected with, acatalepsia. [A, 306.]

ACATALIS (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}t(a^{3}t)′a^{2}l(a^{3}l)-i^{2}s. From α priv., and χατέειν, to want. An old name for the juniper berry, from the abundance of its seed. [A, 323, 336; B, 44, 58.]

ACATAPHASIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}t(a^{3}t)-a^3-fa(fa^3)′zi^2(si^2)-a^3. From α priv., and κατάφασις, a well-ordered statement. Ger., *Akataphasie.* A syntactical disturbance of the faculty of speech, as distinguished from verbal aphasia (*q. v.*). [A, 319.]

ACATAPOSIS, n. A^2-ka^{2}t-a^{2}p′o-si^{2}s. From α priv., and κατάποσις, deglutition. Fr., *acatapose.* Ger., *Akatapose.* It., *acataposi.* Sp., *acatáposis.* See DYSPHAGIA.

ACATAPOTOS (Lat.), adj. A^{2}k(a^{3}k)-a^{2}t(a^{3}t)-a^2(a^3)′po-to^{2}s. Gr., ἀκατάποτος. Incapable of being swallowed. [A, 322.]

ACATARTUS (Lat.), adj. A^{2}k(a^{3}k)-a^{2}t(a^{3}t)-a^{3}r′tu^{3}s(tu^{4}s). See ACATHARTUS.

ACATASTASIA, ACATASTASIS (Lat.), n's f. A^{2}k(a^{3}k)-a^{2}t-(a^{3}t)-a^{2}s(a^{3}s)-ta(ta^3)′zi^2(si^2)-a^3, -a^{2}st(a^{3}st)′a^{2}s(a^{3}s)-i^{2}s. Gr., ἀκαταστασία (from α priv., and καθιστάναι, to set in order). Fr., *acatastasie.* Ger., *Akatastasie.* It., *acatastasi.* Sp., *acatastasis.* Irregularity, as in the paroxysms of fever. [A, 322.]

ACATASTATÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-a^{2}t(a^{3}t)-a^{2}st(a^{3}st)′a^{2}t-(a^{3}t)-e(a^3-e^2). Acatastatic fevers. [A, 343.]

ACATASTATIC, adj. A^{2}k-a^{2}t-a^3-sta^{2}t′i^{2}k. Gr., ἀκατάστατος. Lat., *acatastatus, acatastaticus.* Fr., *acatastatique.* Ger., *akatastatisch.* It., *acatastatico.* Sp., *acatastático.* 1. Irregular, indeterminate, lacking a definite type (said of fevers). 2. Constantly changing (said of the appearance of the urine). [A, 306.]

ACATERA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}t(a^{3}t)-e(a)′ra^3. Fr., *acatéra.* The common juniper. See JUNIPERUS *communis.* [B, 44.]

ACATERGASTOS, ACATERGASTUS (Lat.), adj. A^{2}k(a^{3}k)-a^{2}t(a^{3}t)-u^{5}r(e^{2}r)-ga^{2}s(ga^{3}s)′to^{2}s, -tu^{3}s(tu^{4}s). Gr., ἀκατέργαστος. Difficult of elaboration (said of the chyme). [Galen, A, 322.]

ACATHARSIA (Lat.), n. f. A^{2}k(a^{3}k)-a^2(a^3)-tha^{3}r′si^2-a^3. Gr., ἀκαθαρσία (from α priv., and καθαίρειν, to cleanse). Fr., *acatharsie.* Ger., *Akatharsie.* It., Sp., *acatarsia.* 1. Uncleanness; an old term for impurity of the humors, or a foul state of a wound. 2. Absence of menstruation. 3. A saburral condition of the intestines. [A, 337.]

ACATHARTUS (Lat.), adj. A^{2}k(a^{3}k)-a^2(a^3)-tha^{3}r′tu^{3}s(tu^{4}s). Gr., ἀκάθαρτος. In a state of acatharsia (*q. v.*); not having menstruated. [A, 311, 322.]

ACATSIA-VALLI, ACATSJAVALLI, n. A Malabar name for the *Cassythra filiformis.* [A, 321.]

ACAUDATE, adj. A^{2}k-a^4′dat. Gr., ἄκαυλος. Lat., *acaudatus* (from α priv., and *cauda,* a tail). Fr., *acaudé.* Ger., *ungeschwänzt.* It., *acaudato.* Lit., tailless; lacking the coccyx. [A, 314.]

ACAULE (Fr.), adj. A^3-kol. Acaulose, acaulescent. [B.]

ACAULESCENCE, n. A^{2}k-a^{4}l-e^{2}s′ens. The state of being acaulescent (*q. v.*).

ACAULESCENT, ACAULINE, adj's. A^{2}k-a^{4}l-e^{2}s′e^{2}nt, -a^{4}l′-i^{2}n. From α priv., and καυλός, a stem. Lat., *acaulis.* Fr., *acaule.* Ger., *stengellos.* In botany, apparently devoid of a stem, having a very short stem. [B.]

ACAULIS (Lat.), adj. A^{2}k(a^{3}k)-a^{4}l′(a^3′ul)-i^{2}s. Acaulescent. [B.]

ACAULOSE, adj. A^{2}k-a^{4}l′os. In botany, having no stem. [B.]

ACAULOSIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{4}l(a^3-ul)-o′si^2-a^3. For deriv., see ACAULESCENT. 1. The condition of being apparently stemless, or naturally acaulescent. 2. A diseased state of a plant in which the stem is abnormally deficient. [B, 19.]

ACAULOUS, adj. A^{2}k-a^{4}l′u^{3}s. See ACAULOSE.

ACAWERIA, n. Sp., *acaveria, raiz de serpientes.* A Ceylon plant, or its root (*racine de serpent*), used as a remedy for snakebites; the *Ophioxylum serpentinum* [Linnæus]. [B, 44.]

ACAYA, n. Said to be an American (? Indian) name for the *Cleome sinapistrum.* ["Jour. de pharm.," xiii, 23; A, 344.]

ACAYIBA, n. According to Pison, a Brazilian name for the *Anacardium occidentale.* [A, 344.]

ACAZDIR, ACAZIR, n. Written also *acadzir, kazdir, kacir, fasdir,* and *sasdir.* Ar., *al-qazdír,* tin. An alchemical name for tin. [B, 44, 50, 52.]

ACCABLEMENT (Fr.), n. A^3-ka^{3}bl-ma^{3}n^2. Lat., *virium oppressio.* Ger., *Ueberhäufung, Niedergeschlagenheit.* It., *oppressione, aggravamento.* Sp., *abatimiento.* Prostration, particularly a sense of oppression. [J. Bouillaud, A, 332.]

ACCATEM, ACCATUM, n's. Alchemical names for brass. [A, 343.]

ACCÉLÉRATEUR (Fr.), n. A^{3}k-sa-la-ra^3-tu^{5}r. See ACCELERATOR.—**A. de l'urine.** See BULBO-CAVERNOSUS.

ACCELERATOR, n. A^{2}k-se^{2}l′e^2-ra-to^{2}r. Lat., *accelerator* (from *accelerare,* to hasten). Fr., *accélérateur.* Ger., *Beschleuniger, Treibmuskel* (2d def.). It., *acceleratore.* Sp., *acelerador.* 1. A term applied to certain nerves stimulation of which increases the rapidity of the heart's action. [K.] 2. A muscle which is supposed to hasten the flow of a physiological discharge.—**A. des Harns, A. des Samens** (Ger.). See BULBO-CAVERNOSUS.—**A. nerves of the heart.** See under NERVE.—**A. partus** (Lat.). An ecbolic, an abortifacient.—**A. seminis, A. urinæ** (Lat.). See BULBO-CAVERNOSUS.

ACCENSIO (Lat.), n. f. A^{2}k(a^{3}k)-se^{2}n(ke^{2}n)′shi^2(si^2)-o. From *accendere,* to kindle. 1. Ignition. 2. The lighting up of an inflammation. 3. A sensation of heat or burning in a part. [A, 333.]

ACCENTUATED, adj. A^{2}k-se^{2}nt′u^2-a-te^{2}d. Fr., *accentué.* Ger., *accentuirt.* Exaggerated, abnormally distinct (said of the sounds of the heart).

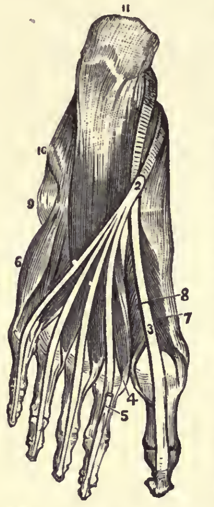
ACCENTUATION, n. A^{2}k-se^{2}nt-u^2-a′shu^{3}n. Fr., *accentuation.* Ger., *Accentuation, Betonung.* It., *accentuazione.* The state of being accentuated (*q. v.*).

ACCENTUÉ (Fr.), **ACCENTUIRT** (Ger.), adj's. A^{3}k-sa^{3}n-tu^6-a, a^{3}k-tse^{2}nt-u-ert′. Accentuated.

ACCEPTABULUM (Lat.), n. n. A^{2}k(a^{3}k)-se^{2}p(ke^{2}p)-ta^{2}b-(ta^{3}b)′u^2(u)-lu^{3}m(lu^{4}m). See ACETABULUM.

ACCESS, n. A^{2}k′se^{2}s. Lat., *accessus* (from *accedere,* to approach). Fr., *accès.* Ger., *Anfall, Zutritt.* It., *accesso.* Sp., *acceso.* 1. An attack or paroxysm of disease. 2. Copulation.

ACCESSION, n. A^{2}k-se^{2}sh′u^{3}n. Lat., *accessio* (from *accedere,* to approach). Fr., *accession.* Ger., *Hinzutreten.* It., *accessione.* Sp., *accesión.* 1. The onset of a disease. 2. Its recurrence or a sudden increase in its severity.



ACCESSIVE, adj. A^{2}k-se^{2}s′i^{2}v. Occurring in or characterized by accessions.

ACCESSOIRE (Fr.), adj. and n. A^{3}k-se^2-swa^{3}r. See ACCESSORY.—**A's de Cowper.** Cowper's glands. See GLANDULÆ *anteprostatæ.*—**A. de la parotide.** See *Accessory* PAROTID.—**A. de l'obturateur interne.** See ACCESSORIUS *obturatoris interni.*—**A's de l'œil.** The appendages of the eye (brow, lids, lachrymal apparatus, etc.). [A, 306.]—**A. de Willis.** See *Spinal accessory* NERVE.—**A. de Wrisberg, A. du brachial cutané interne.** See *Small internal cutaneous* NERVE.—**A. du grand** (ou **long**) **fléchisseur commun des orteils.** See ACCESSORIUS *flexoris longi digitorum pedis.*—**A. du nerf crural.** A name given to the fourth and fifth pairs of lumbar nerves. [A, 320.]—**A. du pancréas.** See *Accessory* PANCREAS.—**A. du pied d'hippocampe.** See PES *accessorius.*—**A. du sacro-lombaire.** See ACCESSORIUS *sacro-lumbalis.*—**A. du saphène externe.** See *External saphenous* NERVE. —**A. grand du pied d'hippocampe.** See PES *hippocampi.*

ACCESSORIUM (Lat.), n. n. A^{2}k(a^{3}k)-se^{2}s(ke^{2}s)-so′ri^2-u^{3}m-(u^{4}m). For deriv., see ACCESSORIUS. An accessory, an appendage.

ACCESSORIUS (Lat.), adj. and n. m. A^{2}k(a^{3}k)-se^{2}s(ke^{2}s)-so′ri^2-u^{3}s(u^{4}s). From *accedere,* to be added to. Accessory.—**Accessorii orbicularis oris.** Those muscles which co-operate with the orbicularis oris, either causing its coronal and basilar parts to meet and press, if necessary, against one another in the shutting of the mouth (levatores menti and depressores labii superioris alarumque nasi); or acting as its moderators so as to draw it from the points within its circumference, open the mouth, enlarge its diameters, and draw the integuments toward their origins (nasales labii superioris, levatores labii superioris et alarum nasi, levatores labii superioris, levatores angulorum oris, zygomatici majores, zygomatici

minores, buccinatores, depressores angulorum oris, and depressores labii inferioris). [A, 246.]—**A. ad ilio-costalem, A. ad sacro-lumbalem.** See *A. sacro-lumbalis.*—**A. cutanei brachii interni.** See *Small internal cutaneous* NERVE.—**A. flexoris longi digitorum pedis.** Fr., *accessoire du long* (ou *grand*) *fléchisseur* (*commun*) *des orteils.* Ger., *viereckiger Sohlenursprung des langen Zehenbeugers.* It., *accessorio del lungo flessore comune delle dita del piede.* Sp., *accesorio del flexor largo comun de los dedos del pié.* Syn.: *quadratus plantæ pedis, caro quadrata Sylvii, massa carnea Jacobi Sylvii, plantaris verus, caput plantare flexoris digitorum pedis longi, flexor longus digitorum pedis profundus perforans accessorius.* A flattened, fleshy muscle of the sole of the foot. It arises from the lower surface of the calcaneum, and is inserted into the lower and outer aspect of the tendon of the flexor communis digitorum, the oblique action of which it brings into a direction parallel with the axis of the foot. [A, 314, 320, 328.]—**A'kern** (Ger.). The nucleus of the spinal accessory nerve.—**A'krampf.** (Ger.). Spasm, tonic or clonic, of those muscles of the neck (the sterno-cleido-mastoid and the cucullaris) that are supplied by the spinal accessory nerve. [A, 319.]—**A'lähmung** (Ger.). Paralysis of the same muscles. [A, 319.]—**A. obturatoris interni.** Fr., *accessoire de l'obturateur interne.* Syn.: *ischio-trochanterianus.* A term applied by Petit to the gemelli muscles of the thigh. [A, 320.]—**A. pedis.** See *A. flexoris longi digitorum pedis.*—**A. pedis hippocampi.** See PES *accessorius.*—**A. sacro-lumbalis.** Fr., *accessoire du sacro-lombaire.* It., *accessorio del sacro-lombare.* An upward prolongation of the sacro-lumbalis muscle; arising from the upper margins of the lower six ribs, internally to the tendons of the sacro-lumbalis, and being inserted by a series of tendons into the angles of the upper ribs and into the transverse process of the seventh cervical vertebra. [A, 5.]—**A. tricipitis.** Syn.: *dorso-epitrochlearis.* A muscle common in the quadrumana, sometimes present in man as a slip connecting the triceps extensor cubiti and the latissimus dorsi. [C.]—**A. Willisii.** See *Spinal accessory* NERVE.

THE PLANTAR MUSCLES, MIDDLE LAYER. (AFTER SAPPEY.)

1, accessorius flexoris longi digitorum pedis; 2, tendon of the flexor longus digitorum communis; 3, tendon of the flexor longus pollicis; 4, the four lumbricales; 5, a tendon of the flexor brevis communis, perforated by the corresponding tendon of the flexor longus; 6, flexor brevis minimi digiti; 7, inner fasciculus of the flexor brevis pollicis; 8, outer fasciculus of the same; 9, tuberosity of the fifth metatarsal bone; 10, sheath of the peroneus longus; 11, os calcis.

ACCESSORY, adj. A^{2}k-se^{2}s'so-ri^2. Lat., *accessorius* (*q. v.* for deriv.). Fr., *accessoire.* Ger., *accessorisch.* It., *accessorio.* Sp., *accesorio.* Contributory in a subordinate manner (said chiefly of nerves and muscles).

ACCESSUS (Lat.), n. m. A^{2}k(a^{3}k)-se^{2}s(ke^{2}s)'su^{3}s(su^{4}s). For deriv., see ACCESSORIUS. See ACCESS and ADITUS, also remarks under ABSCESS.

ACCIB, n. Ar., *as-sekb,* lead. An alchemical name for lead. [B, 44, 50, 52.]

ACCIDENS (Lat.), adj. A^{2}k(a^{3}k)'si^{2}d(ki^{2}d)-e^{2}nz(e^{2}ns). Pres. part. of *accidere,* to fall down upon. Adventitious. As a n., an accident.

ACCIDENT, n. A^{2}k'si^{2}d-e^{2}nt. Gr., *σύμβασις.* Lat., *accidens* (*q. v.* for deriv.). Fr., *accident.* Ger., *Zufall.* It., Sp., *accidente.* An epiphenomenon; a morbid manifestation which is not a part of the usual course of a disease.

ACCIDENTAL, adj. A^{2}k-si^{2}d-e^{2}nt'a^{2}l. Gr., *συμβατικός.* Lat., *accidentalis.* Fr., *accidentel.* Ger., *accidentell, zufällig.* It., *accidentale.* Sp., *accidental.* 1. Adventitious. 2. Intercurrent; supervening without any necessary connection with the preceding condition (said of morbid phenomena).—**A. anus.** See *Artificial* ANUS.—**A. colors.** See *Complementary* COLORS.

ACCIDENTALISM, n. A^{2}k-si^{2}d-e^{2}nt'a^{2}l-i^{2}zm. Fr., *accidentalisme.* A doctrine which ignores ætiology in the study and management of disease, and deals only with symptoms. [A, 301.]

ACCIDENTALIST, n. A^{2}k-si^{2}d-e^{2}nt'a^{2}l-i^{2}st. Fr., *accidentaliste.* One who treats symptoms without regard to their causes. [A, 321.]

ACCIL, n. See ACCIB.

ACCIOCA, n. A plant of unknown botanical characters, sometimes used instead of Paraguay tea. [B, 44.]

ACCIPENSER (Lat.), n. m. A^{2}k(a^{3}k)-si^2(ki^2)-pe^{2}n-su^{5}r(se^{2}r). See ACIPENSER.

ACCIPITER (Lat.), n. m. A^{2}k(a^{3}k)-si^{2}p(ki^{2}p)'i^{2}t-u^{5}r(e^{2}r). Gen., *accipitris.* Probably from *ὠκύπτερος,* swift-winged. [A, 312.] Gr., *ἱέραξ.* Fr., *accipitre, épervier.* Ger., *Habichtsbinde, Sperber.* Sp., *accipitre.* Lit., a hawk; an ancient bandage used for the nose; so called from its resemblance to a falcon's hood or to a hawk's claw or from the tightness of its grasp. [A, 323, 336, 343.]—**A. quinqueceps.** Gr., *ἱέραξ πεντακέφαλος.* Ger., *fünfköpfige Habichtsbinde.* A variety made with a five-headed bandage. [A, 322.]—**A. triceps.** Gr., *ἱέραξ τρικέφαλος.* Ger., *dreiköpfige Habichtsbinde.* One made with a three-headed bandage. [A, 322.]

ACCIPITRINA (Lat.), n. f. A^{2}k(a^{3}k)-si^{2}p(ki^{2}p)-i^{2}t-ri(re)'na^3. From *accipiter,* a hawk (because birds of prey feed on its juices). Fr., *accipitrine, épervière.* Ger., *Habichtskraut.* 1. An ancient name for hawkweed (*Hieracium murorum*). [Pliny, A, 344.] 2. Flixweed (*Sisymbrium Sophia*). [A, 336.] 3. A division of the Linnæan genus *Sisymbrium,* also a section of the genus *Hieracium.* [B, 41.]

ACCISA, n. The leaves of the *Ilex paraguayensis.* See *Paraguay* TEA.

ACCLIMATATION (Fr.), n. A^{3}k-kle-ma^3-ta^3-sho^{2}n^2. See ACCLIMATIZATION.

ACCLIMATE, v. tr. A^{2}k-kli'mat. From Lat., *ad,* to, and *clima,* climate. See ACCLIMATIZE.

ACCLIMATEMENT (Fr.), n. A^{3}k-kle-ma^{3}t-ma^{3}n^2. See ACCLIMATIZATION.

ACCLIMATER (Fr.), v. tr. A^{3}k-kle-ma^3-ta. See ACCLIMATIZE.

ACCLIMATION, n. A^{2}k-kli-ma'shu^{3}n. See ACCLIMATIZATION.

ACCLIMATISATION, n. See ACCLIMATIZATION.

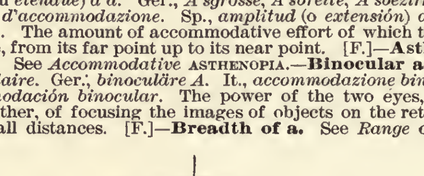
ACCLIMATISE, v. tr. See ACCLIMATIZE.

ACCLIMATISIREN (Ger.), n. A^{3}k-kle-ma^3-te-ze're^{2}n. To acclimatize.

ACCLIMATIZATION, n. A^{2}k-kli-ma^{2}t-i^2-za'shu^{3}n. Lat., *acclimatisatio, climati assuetudo.* Fr., *acclimatement, acclimatation.* Ger., *Acclimatisation, Acclimatisirung.* It., *acclimazione, acclimamento.* Sp., *aclimatación.* Syn.: *acclimation.* The process by which an individual organism or a race becomes, or is rendered, so inured to a strange climate that it no longer suffers harm from that climate; or the state of being so inured. By some writers this sense is restricted to *acclimation,* and *acclimatization* is used to signify the process of causing animals or plants to become acclimatized. Cf. INDIGÉNISATION.

ACCLIMATIZE, v. tr. A^{2}k-kli'ma^{2}t-iz. Fr., *acclimater.* Ger., *acclimatisiren.* It., *acclimare.* To accustom to a foreign climate.

ACCLINÉ (Fr.), adj. A^{3}k-kle-na. From Lat., *acclinis* (from *ad* and *clinare*), leaning against. Applied to a part or organ so as to cover in one side of it (said of the upper teeth when they overlap the lower ones at the side and not in front or behind). [B, 38.]



ACCLIVIS (Lat.), adj. A^{2}k(a^{3}k)-kli(kle)'vi^{2}s(wi^{2}s). Ascending (said of the obliquus abdominis internus muscle).

ACCOCAY, n. A bark employed by the natives of Senegal as a febrifuge. [A, 337.]

ACCOLÉ (Fr.), adj. A^{3}k-ko-la. In botany, united, adherent. [B, 38.]

ACCOMBANT (Fr.), adj. A^{3}k-ko^{2}m-ba^{3}n^2. Accumbent. [B.]

ACCOMMODATION, n. A^{2}k-ko^{2}m-mo-da'shu^{3}n. Lat., *accommodatio* (from *accommodare,* to adapt, to adjust). Fr., *accommodation.* Ger., *Accommodation.* It., *accommodazione.* Sp., *acomodación.* 1. The process by which the refractive condition of the eye is changed in accordance with the distance at which an object is to be viewed, so as to secure invariable focusing of the image on the retina. [F.] 2. The processes by which a partly disabled organ is favored in the performance of its functions. See COMPENSATION. 3. The adjustment of the shape and attitude of the fœtus to the parturient canal during labor.—**A'sbezirk, A'sbreite, A'sgrösse** (Ger.). See *Amplitude of a.*—**A'simpuls** (Ger.). That condition in which the eye feels the necessity of a. in order to see more distinctly. [F.]—**A'skrampf** (Ger.). See SPASM *of a.*—**A'slinie** (Ger.). See *Line of a.*—**A'smuskel** (Ger.). See *Ciliary* MUSCLE.—**A'sphosphen** (Ger.). See PHOSPHENES *of a.*—**A'sspannung** (Ger.). See *Tension of a.*—**A'svermögen** (Ger.). The accommodative power of the eye.—**Amplitude of a.** Fr., *amplitude* (ou *étendue*) *d'a.* Ger., *A'sgrösse, A'sbreite, A'sbezirk.* It., *ampiezza d'accommodazione.* Sp., *amplitud* (o *extensión*) *de acomodación.* The amount of accommodative effort of which the eye is capable, from its far point up to its near point. [F.]—**Asthenopia of a.** See *Accommodative* ASTHENOPIA.—**Binocular a.** Fr., *a. binoculaire.* Ger., *binoculäre A.* It., *accommodazione binoculo.* Sp., *acomodación binocular.* The power of the two eyes, when used together, of focusing the images of objects on the retinæ of both for all distances. [F.]—**Breadth of a.** See *Range of a.*—

THE MECHANISM OF ACCOMMODATION.

c, cornea; *i,* iris; *l,* lens during repose; *c', i', l',* the same parts during an effort of accommodation.

Étendue d'a. (Fr.). See *Amplitude of a.*—**Étendue latente d'a.** (Fr.). See *Latent* HYPERMETROPIA.—**Kreis der A.** (Ger.). See *Region of a.*—**Latent range of a.** Fr., *étendue latente d'a.* Ger., *latente A'sbreite.* It., *campo* (o *estensione*) *latente d'accommodazione.* Sp., *campo latente de acomodación.* See *Latent* HYPERMETROPIA.—**Line of a.** Fr., *ligne d'a.* Ger., *A'slinie.* It., *linea d'accommodazione.* Sp., *linea de acomodación.* Czermak's term for that portion of the visual line (*q. v.,* under LINE) in which lie objects which are seen without any perceptible indistinctness, and

with a given state or degree of a. [F.]—**Mechanism of a.** Fr., *mécanisme d'a.* Ger., *A'smechanismus.* It., *meccanismo d'accommodazione.* Sp., *mecanismo de acomodación.* A term used to signify not only the manner in which a. takes place, but also the structures by which it is accomplished (the ciliary muscle, the zonule of Zinn, and the crystalline lens).—**Negative a.** Fr., *a. négative.* Ger., *negative A.* It., *accommodazione negativa.* Sp., *acomodación negativa.* It is supposed by some that, when the emmetropic eye is in a state of rest, it is not quite adjusted for its farthest point of distinct vision, but can become so by a slight alteration in its a., which is called negative, produced, according to Henke, by the action of the radial fibers of the ciliary muscle. [F.]—**Negative range of a.** See *Range of a.*—**Paralysis of a.** See under Paralysis.—**Phosphenes of a.** See under Phosphene.—**Positive a., Positive range of a., Positive relative range of a.** See *Range of a.*—**Range of a.** Fr., *amplitude* (ou *champ*, ou *étendue*) *d'a.* Ger., *A'sbreite.* It., *ampiezza* (o *campo*) *d'accommodazione.* Sp., *campo de acomodación.* The distance between the farthest point and the nearest point of distinct vision. It is expressed by the formula $\frac{1}{P} - \frac{1}{R}$, in which P represents the near point and R the far point; and may be taken as the difference in refractive power of lenses of which the foci are respectively P and R. The *binocular range of a.* is the a. from the farthest point (r_2) to the nearest point (p_2), for both eyes at once. The *relative range of a.* is the range over which we have control at a given convergence of the visual lines. It represents the degree in which a. is independent of convergence. The *positive relative range of a.* represents the amount of a. of which a person is capable nearer or closer than the point of convergence of the visual lines of the eyes. The *negative relative range of a.* is that amount of convergence which is required in order that a person may clearly see an object lying beyond the point of convergence of the visual lines. [F.]—**Region of a.** Fr., *région d'a.* Ger., *A'skreis.* It., *regione d'accommodazione.* Sp., *región de acomodación.* According to Donders, this is only the expression of the distance between r and p, and is therefore equal to R—P, while the range of a. (*q. v.*) is a dioptric value, proportional to the focal distance of the lens, which expresses the difference of a. for P and R. The region of a. is quite altered by spectacles, and there is no proportion whatever between it and the range of a. [F.]—**Relative range of a.** See *Range of a.*—**Spasm of a.** See under Spasm.—**Tension of a.** Ger., *A'sspannung.* Syn.: *amount* (or *degree*) *of a.* The act of tension or contraction of the ciliary muscle; also that condition or degree of a. which goes along with a given degree of convergence of the ocular axes. [F.]

ACCOMMODATIVE, adj. A^{2}k-ko^{2}m'mo-da-ti^{2}v. Fr., *accommodatif.* Ger., *accommodativ.* Pertaining to the function of accommodation (*q. v.*). [F.]

ACCOMPANIMENT OF THE CATARACT. A^{2}k-ku^{3}m'-pa^{2}n-i^2-me^{2}nt. Lat., *adjunctum cataractæ.* Fr., *accompagnement de la cataracte.* Ger., *Begleitung des Staars.* An obsolete term for a whitish, viscid substance occupying the place of the crystalline lens after the extraction of a cataract; constituting what was formerly called a secondary cataract (the latter term being now applied to an opacity of the capsule coming on after extraction and making a secondary operation necessary). [F.]

ACCOUCHÉE (Fr.), n. (fem. of adj., *accouché*). A^{3}k-ku-sha. Gr., τοκάς, τοκήεσσα. Lat., *puerpera.* Ger., *Wöchnerin, Kindbetterin.* Syn.: *femme en couche.* A lying-in woman; one who has recently been delivered, confined, or "brought to bed."

ACCOUCHEMENT (Fr.), n. Formerly written *accouchemen.* A^{3}k-kush-ma^{3}n^2. From *accoucher*, or *s'accoucher*, to go to bed. Syn.: *travail, enfantement* (the mere process of expulsion). 1. Confinement, labor, parturition (see Labor); in the pl., *accouchements*, obstetrics. 2. The expulsion of a solid substance (such as a tumor) from the uterine cavity.—**A. artificiel.** Delivery by operative interference.—**A. contre nature.** Preternatural labor. Improperly applied also to labor terminated artificially. [A, 44, 96.]—**A. difficile.** Difficult labor.—**A. facile.** Easy, natural labor.—**A. forcé.** Ger., *gewaltsame Entbindung.* Labor brought on artificially and terminated forcibly. It includes the manual or instrumental dilatation of the cervix uteri and the rapid extraction of the fœtus with the forceps or by version.—**A. gémellaire.** Twin labor.—**A. heureux.** A natural, easy delivery, without complications.—**A. irrégulier.** See *Irregular* labor.—**A. laborieux.** See Dystocia.—**A. légitime.** Labor at term. [A, 96.]—**A. mixte.** Labor which becomes easy after a complication has been remedied. [Gardien, A, 301.]—**A. multiple.** Labor with more than one fœtus.—**A. naturel, A. physiologique.** Natural labor.—**A. précoce.** Premature labor, especially before the 260th day. [A, 321.]—**A. prématuré.** Premature labor (between the 180th and the 270th days). [A, 321.]—**A. prématuré artificiel.** See *Induced* labor.—**A. prématuré forcé.** Labor brought on prematurely and terminated artificially.—**A. provoqué.** Induced labor. It differs from *a. forcé* in that, although brought on artificially, it is not necessarily hastened in its progress by interference.—**A. retardé.** Labor delayed beyond the usual term of gestation. [A, 321.]—**A. simple.** Labor with only one fœtus. [A, 321.]—**A. spontané.** Natural labor.—**A. tardif.** See *A. retardé.*—**A. tempestif.** Labor at term. [A, 96.]—**A. vicieux.** Labor requiring artificial aid. [Nägele, A, 301.]

ACCOUCHER (Fr.), v. tr. and intr. A^{3}k-ku-sha. 1. [Tr.) to give medical attendance to a woman in labor; to "confine" her, to "put her to bed." 2. (Intr.) to be "brought to bed"; to give birth to a child; to be in labor. 3. (Refl. [*s'a.*]) to be confined without assistance. [A, 306.]

ACCOUCHEUR (Fr.), n. A^{3}k-ku-shu^{5}r. Lat., *adjutor partus, obstetricans.* A male practitioner of obstetrics; a title first assumed by Jules Clément in the latter part of the seventeenth century. [A, 24.]

ACCOUCHEUSE (Fr.), n. A^{3}k-kush-u^{5}z. Gr., μαία, μαιεύτρια. Lat., *obstetrix.* Ger., *Hebamme.* It., *levatrice.* Sp., *partera.* Syn.: *sage-femme.* A midwife, a female practitioner of obstetrics; a title assumed by the French midwives (before known as *sages-femmes*) when male obstetricians had become popular under the name of *accoucheurs.*

ACCOUCHIRANSTALT (Ger.), n. A^{3}k-ku-sher'a^{3}n''sta^{3}lt. A lying-in institution.

ACCOUCHIREN (Ger.), v. tr. and intr. A^{3}k-ku-sher'e^{2}n. 1. (Tr.) to give medical attendance to a woman in labor. 2. (Intr.) to practice midwifery.

ACCOUCHIRHAUS (Ger.), n. A^{3}k-kuch^2-er'ha^3-us. A lying-in institution.

ACCOUCHIRINSTRUMENT (Ger.), n. A^{3}k-kuch^2-er'i^{2}ns-tru-me^{2}nt''. An obstetrical instrument.

ACCOUCHIRSTUHL (Ger.), n. A^{3}k-kuch^2-er'stul. An obstetrical chair.

ACCOUPLEMENT (Fr.), n. A^{3}k-kupl-ma^{3}n^2. Gr., συνδυασμός. Lat., *copulatio.* Ger., *Paarung.* It., *accoppiamento, copritura, monta.* Sp., *copula.* Syn.: *monte.* Copulation (said of the lower animals).

ACCOUPLER (Fr.), v. tr. A^{3}k-ku-pla. 1. To cause to copulate. 2. (Refl. [*s'a.*]) to copulate (said of the lower animals).

ACCOUPLIREN (Ger.), v. intr. A^{3}k-ku-ple're^{2}n. See Accoupler (2d def.).

ACCOUS (Fr.), n. A^{3}k-ku. A village in the Lower Pyrenees, near which there is a mineral spring, called *Suberlaché*, the waters of which are warm, sulphurous, and ferruginous, and are used for rheumatism. [T. Bordeu, A, 344.]

ACCOUTUMANCE (Fr.), n. A^{3}k-ku-tu^6-ma^{3}ns. That condition in which the system has become so accustomed to the action of a drug that the latter no longer exerts its usual effects. [A, 321.]

ACCOUVER (Fr.), v. intr. A^{3}k-ku-va. To incubate.

ACCREMENTITIAL, adj. A^{2}k-kre-me^{2}n-ti^{2}sh'a^{2}l. Fr., *accrémentitiel.* Pertaining to accrementition (*q. v.*).

ACCREMENTITION, n. A^{2}k-kre-me^{2}n-ti^{2}sh'u^{3}n. Gr., ἐπαύξη, ἐπαύξησις, ἐπίδοσις. Lat., *accrementum* (from *accrescere*, to grow larger). Fr., *accrémentition.* Ger., *Zuwachs.* It., *accrementizione.* 1. Increase by growth; according to Robin, either by the division of pre-existing elements or by the formation of new ones. [A, 321.] 2. One of the modes of tissue formation. See Interposition. 3. Burdach's term for a form of reproduction in which a separated portion of an organism becomes developed into a perfect individual.

ACCREMENTUM (Lat.), n. n. A^{2}k(a^{3}k)-kre(kra)-me^{2}nt'u^{3}m-(u^{4}m). See Accrementition.

ACCRESCENT, adj. A^{2}k-kre^{2}s'e^{2}nt. Lat., *accrescens* (from *accrescere*, to grow larger). Fr., Ger., *accrescent.* Increasing in size after flowering (said of any part of a flower except the ovary). [B, 7, 19, 34.]

ACCRESCENZ (Ger.), n. A^{3}k-kre^{2}s-tse^{2}ntz'. Accretion.

ACCRETE, adj. A^{2}k-kret'. In botany, grown together. [B, 43.]

ACCRETION, n. A^{2}k-kre'shu^{3}n. Gr., αὔξησις (1st def.), πρόσφυσις (2d def.). Lat., *accretio* (from *accrescere*, to grow, or to be joined to). Fr., *accrétion.* Ger., *Accrescenz.* It., *accrescimento.* Sp., *acrecentamiento.* 1. Growth, increment (to be distinguished from development). 2. An adhesion (growing together) of parts.

ACCROCHANT (Fr.), adj. A^{3}k-kro-sha^{3}n^2. In botany, covered with small, crooked hairs. [B, 1.]

ACCROISSEMENT (Fr.), n. A^{3}k-krwa^{3}s-ma^{3}n^2. Growth. See Accretion.

ACCUBATION, n. A^{2}k-ku^2-ba'shu^{3}n. Gr., ἀνάκλισις (1st def.). Lat., *accubatio* (= *accubitio*, from *accubare*, to lie near or by, to recline). 1. A reclining posture; the taking to one's bed. See Decubitus. 2. The lying of one person in bed with another. [A, 325.]

ACCUBITUS (Lat.), n. m. A^{2}k(a^{3}k)-ku^2(ku)'bi^{2}t-u^{3}s(u^{4}s). 1. Accubation (*q. v.*). 2. A couch. [A, 312.]

ACCUMBENT, adj. A^{2}k-ku^{3}m'be^{2}nt. Lat., *accumbens* (from *accumbere*, to lie against). Fr., *accombant.* Ger., *seitenwurzelig* (said of the cotyledons). Lying against another organ or part; a term applied in botany, in describing the parts of a dicotyledonous seed, to either the radicle or the cotyledons when the latter include the former between their opposed surfaces. [B, 19, 34, 35.]

ACCUMULATION, n. A^{2}k-ku^2-mu^{2}la'shu^{3}n. Lat., *accumulatio* (from *accumulare*, to heap up). Fr., *accumulation.* Ger., *Anhäufung.* It., *accumulazione.* 1. A collecting together in a mass. 2. An old term for a mixture of different symptoms.—**Fæcal a.** Ger., *Kothanhäufung.* Syn.: *coprostasis.* An abnormal collection of fæces in the large intestine. Cf. *Fœcal* impaction.

ACCUMULATOR, n. A^{2}k-ku^2'mu^2-la-to^{2}r. Fr., *accumulateur.* Ger., *Accumulator.* It., *accumulatore.* Sp., *acumulador.* An apparatus for storing electricity, such as a Leyden jar. [B.] See also *Secondary* battery.

ACCUSATIO (Lat.), n. f. A^{2}k(a^{3}k)-ku^2(ku)-za(sa^3)'shi^2(ti^2)-o. From *accusare*, to complain of. Lit., a complaint; an old synonym of *indicatio.* [A, 325.] See Indication.

ACCUSER (Fr.), v. intr. A^{3}k-ku^6-za. To complain of (symptoms).

ACCYSETUM (Lat.), n. m. A^{2}k(a^{3}k)-si^2(ku^6)-se(sa)'tu^{3}m(tu^{4}m). A word of unknown etymology and doubtful meaning; perhaps, as suggested by Kraus, anciently applied to a variety of *Alyssum* (madwort). [A, 322.]

ACE (Lat.), n. f. A(a^3)'se(ka). Gr., ἀκή. See Acis.

ACEBDELLOMÈTRE (Fr.), n. A^{3}sb-de^{2}l-lo-me^{2}tr. See *Artificial* LEECH.

ACEBUCO, n. A vegetable drug from Batavia, used by the Chinese of Canton. [A, 337.]

ACÉCHLORPLATINE (Fr.), n. A^3-sa-clor-pla^3-ten. A yellow crystalline body obtained by evaporating a solution of platinum dichloride in acetone to the consistence of syrup. [A, 306.]

ACECONITIC ACID, n. A^{2}s-e^{2}k-o^{2}n-i^{2}t′i^{2}k. For deriv., see Acetic and Aconitic. Fr., *acide acéconitique.* Ger., *Aceconitsäure.* A tribasic crystalline acid, $C_6H_6O_6 = C_6H_3{O_3 \atop H_3}\Big\} O_3 = (C_3H_3)(CO.OH)_3$, obtained, in combination with citracetic acid, by heating ethyl bromacetate with sodium; probably isomeric with aconitic acid. [B, 2, 4.]

ACEDIA (Lat.), n. f. A^{2}s(a^{3}k)-e(a)′di^2-a^3. Gr., ἀκηδία. Fr., *acédie.* Ger., *Sorglosigkeit.* Apathy, despondency; an old term for a sort of melancholia occurring especially among young monks. [A, 311, 314, 322.]

ACEDIAMINE, n. A^{2}s″e^2-di-a^{2}m′i^{2}n. For deriv., see Acetic, *Di-**, and Amine. Fr., *acédiamine.* Ger., *Acediamin.* Syn.: *acetyldiamine.* An artificial alkaloid, $NH : C_2H_3.NH_2$, produced by heating acetamide in hydrochloric-acid gas; occurring only in combination with an acid or an acid radicle. [B, 2, 4.]

ACEITE (Sp.), n. A^3-tha′e-ta. Oil.—**A. abetinote, A. abietino.** Fir-balsam. [A, 334.]—**A. comun.** Olive-oil. [A. 344.]—**A. craso.** A fixed oil. [A, 254.]—**A. de almendras.** Almond-oil. [A, 254.]—**A. de cal.** Chlorinated lime. [A, 254.]—**A. de comer.** Refined olive-oil. [A, 334.]—**A. del Brasil.** Copaiba balsam. [A, 254.]—**A. de linaza.** Linseed-oil.—**A. de olivas.** Olive-oil.—**A. de piedra.** Petroleum. [A, 254.]—**A. de ples de buey.** Neat's-foot-oil. [A, 254.]—**A. de ricino.** Castor-oil.—**A. de sal.** A liquid, said to be used in South America in the treatment of goitre. A salt, obtained in the province of Antioquia by evaporation, is suspended in a bag, and the liquid which drips from it constitutes *a. de sal* (lit., oil of salt). Boussingault found it to contain a considerable quantity of iodine, also free hydrochloric acid. ["Gaz. de santé," Dec. 25, 1825 (A, 344).]—**A. de Vénus.** Nitrate of copper in a state of deliquescence. [A, 254.]—**A. de vitriolo.** Sulphuric acid.—**A. esencial.** An essential oil. [A, 339.]—**A. esencial de trementina.** Oil of turpentine. [A, 254.]—**A. fijo.** A fixed oil.—**A. glacial de vitriolo.** Nordhausen sulphuric acid. [A, 254.]—**A. medicinal.** Almond-oil. [*a*, 5.]—**A. mineral.** Petroleum. [*a*, 5.]—**A. narcótico.** See Baume *tranquille.*—**A. virgen.** Virgin oil (that which is first expressed from the olive without the aid of heat). [*a*, 5.]

ACENAPHTHENE, n. A^{2}s-e^2-na^{2}f(na^{2}p)′then. For deriv., see Acetic and Naphthalene. Fr., *acénaphtène.* Ger., *Acenaphthen.* Syn.: *acetylonaphthalene.* A substance forming colorless prismatic crystals, melting at 95° and boiling at about 268° C.; prepared by the decomposition of ethylnaphthalene and in other ways, and also occurring in that fraction of coal-tar oil which distills between 260° and 280° C. It has the composition $C_{12}H_{10}$, or probably $C_{10}H_6\left\langle {CH_2 \atop CH_2} \right.$ = ethylenenaphthalene. [B, 4.]—**A. bromides.** Addition compounds of bromine and a. The hexabromide, $C_{12}H_{10}.Br_6$, is known. [B, 2].—**A. hydride.** Formed by the action of hydriodic acid on a. Its probable formula is $C_{12}H_{12}$. [B, 2.]—**A. picrate.** Formula, $C_{12}H_{10}.C_6H_3(NO_2)_3O$. [B, 2.]

ACENE, ACENIUM (Lat.), n's n. A^{2}k(a^{3}k)-e(a)′ne(na), -ni^2-u^{3}m(u^{4}m). See Achænium.

ACEOGNOSIA (Lat.), n. f. A(a^3)-se(ke^2)-o^{2}g-no′si^2-a^3. From ἄκος (gen., ἄκεος), a remedy, and γνῶσις, knowledge. A knowledge of remedies.

ACEOLOGY, n. A-se-o^{2}l′o-ji^2. Lat., *aceologia* (from ἄκος, a remedy, and λόγος [see *-logy**]). Ger., *Akologie.* Therapeutics in general, and especially as connected with operative measures and mechanical appliances. [A, 322.]

ACEPHAL, ACEPHALAN, n's. A^{2}s′e^{2}f-a^{3}l, a^{2}s-e^{2}f′a^{2}l-a^{3}n. Lat., *acephalum* (from α priv., and κεφαλή, the head). Fr., *acéphalien.* Ger., *Ohnekopf.* It., Sp., *acefalo.* An animal with no marked distinction between the head and the rest of the body.

ACEPHALHÆMIA (Lat.), n. f. A^{2}s(a^{3}s)-e^{2}f-a^{3}l-he′(ha^3′e^2)-mi^2-a^3. From α priv., κεφαλή, the head, and αἷμα, blood. Fr., *acéphalhémie.* A term applied by Piorry (who wrote the French form *acéphalémie*) to encephalic anæmia. [A, 250.]

ACEPHALIA (Lat.), n. f. A^{2}s(a^{3}k)-e^{2}f-a(a^3)′li^2-a^3. Fr., *acéphalie.* Ger., *Acephalie, Kopfmangel.* It., Sp., *acefalia.* That form of monstrosity in which the head is wanting or is anencephalic. See Anencephalia.—**A. spuria.** See Hemiacephalia.

ACÉPHALIEN (Fr.), n. A^3-sa-fa^{3}l-i^2-a^{3}n^2. See Acephalan and Acephalus.

ACEPHALISM, n. A^{2}s-e^{2}f′a^{3}l-i^{2}zm. See Acephalia.

ACEPHALOBRACHIA (Lat.), n. f. A^{2}s(a^{3}k)-e^{2}f-a^3-lo-bra-(bra^3)′ki^2(ch^{2}i^2)-a^3. From α priv., κεφαλή, the head, and βραχίων, the arm. Fr., *acéphalobrachie.* Ger., *Acephalobrachie.* It., *acefalobrachia.* Sp., *acefalobraquia.* That form of monstrosity in which the head and arms are wanting.

ACEPHALOBRACHIUS (Lat.), n. m. A^{2}s(a^{3}k)-e^{2}f-a^3-lo-bra-(bra^3)′ki^2(ch^{2}i^2)-u^{3}s(u^{4}s). Fr., *acéphalobrache.* Sp., *acefalobraquio.* A monster without head or arms.

ACEPHALOCARDIA (Lat.), n. f. A^{2}s(a^{3}k)-e^{2}f-a^3-lo-ka^{3}r′di^2-a^3. From α priv., κεφαλή, the head, and καρδία, the heart. Fr., *acéphalocardie.* Ger., *Acephalocardie.* It., *acefalocardia.* That form of monstrosity in which the head and the heart are wanting.

ACEPHALOCARDIUS (Lat.), n. m. A^{2}s(a^{3}k)-e^{2}f-a^3-lo-ka^{3}r′-di^2-u^{3}s(u^{4}s). Fr., *acéphalocarde.* A monster without head or heart.

ACEPHALOCHEIRIA, ACEPHALOCHEIRUS (Lat.), n's f. and m. A^{2}s(a^{3}k)-e^{2}f-a^3-lo-ki′(ke^2′i^2)-ri^2-a^3, -ru^{3}s(ru^{4}s). See Acephalochiria and Acephalochirus.

ACEPHALOCHIRIA (Lat.), n. f. A^{2}s(a^{3}k)-e^{2}f-a^3-lo-kl(ch^{2}e)′-ri^2-a^3. From α priv., κεφαλή, the head, and χείρ, the hand. Fr., *acéphalochirie.* Ger., *Acephalochirie.* It., *acefalochiria.* Sp., *acefaloquiria.* That form of monstrosity in which the head and the hands are wanting.

ACEPHALOCHIRUS (Lat.), n. m. A^{2}s(a^{3}k)-e^{2}f-a^3-lo-ki(ch^{2}e)′-ru^{3}s(ru^{4}s). Fr., *acéphalochire.* Sp., *acefaloquiro.* A monster without head or hands.

ACEPHALOCYST, n. A^{2}s-e^{2}f′a^3-lo-si^{2}st. Lat., *acephalocystis* (from α priv., κεφαλή, the head, and κύστις, a bag). Fr., *acéphalocyste.* Ger., *Acephalocyste.* It., *acefalocisto.* Sp., *acefalocista.* A name given by Laennec to a class of hydatids consisting only of a membranous bag filled with fluid. [A, 328.] They were formerly regarded as constituted by an animal belonging to a genus of entozoa. [B.] For the varieties, see Acephalocystis.

ACEPHALOCYSTIS (Lat.), n. f. A^{2}s(a^{3}k)-e^{2}f-a^3-lo-si^{2}s(ki^{2}s)′-ti^{2}s. An acephalocyst.—**A. endogena.** A name given by J. Hunter and Owen to a sterile echinococcus cyst which has increased by endogenous proliferation. [B.] See Echinococcus *endogenus.*—**A. eremita.** Fr., *acéphalocyste solitaire.* Syn.: *A. sterilis.* A solitary acephalocyst, i. e., one in which there is a single cyst enveloped by a semi-transparent, non-adherent areolar membrane. [Cruveilhier (B, 85).]—**A. exogena.** Syn.: *Echinococcus hominis.* [B, 84.] A term applied by Kuhl to an acephalocyst which has increased by exogenous proliferation. [B.] See Echinococcus *exogenus.*—**A. granulosa.** A name applied by Laennec and others to a variety of acephalocyst distinguished by minute granulations, about as large as a millet-seed, scattered through its substance. [B, 84.]—**A. macaci** [Cobbold]. See Echinococcus *hominis.*—**A. multifida.** One which sends out branch-like prolongations between the anatomical structures of a part, as between the convolutions of the brain. [B.]—**A. ovis tragelaphi** [Cobbold]. See Echinococcus *hominis.*—**A. ovoidea.** Fr., *acéphalocyste ovoïde.* A name applied by Laennec and others to a variety that is studded with whitish spheroidal bodies. [B, 84.]—**A. plana.** Syn.: *oculigera carpi.* A name given by Laennec in 1812 to small flattened concretions found in the sheaths of tendons and in muscles near their insertion. [B, 84, 85.]—**A. prolifera.** Fr., *acéphalocyste multiple.* Syn.: *A. socialis.* A multiple acephalocyst, i. e., one in which a number of cysts are contained within a common membrane. [Cruveilhier (B, 85).]—**A. racemosa, A. ramosa.** Cloquet's terms for any hydatigenous formation of the chorion resembling bunches of grapes or currants. [B, 84.] See *Vesicular* MOLE.—**A. socialis.** See *A. prolifera.*—**A. sterilis.** See *A. eremita.*—**A. surculigera.** Fr., *acéphalocyste surculigère.* A name applied by Laennec and others to a variety distinguished by the presence of minute, bud-like, flattened processes, of irregular shape, on the outer or inner surface of the investing membrane. [B, 84.]

ACEPHALOGASTER (Lat.), n. m. A^2(a^3)-se^{2}f(ke^{2}f)′a^3-lo-ga^{2}s-(ga^{3}s)-tu^{5}r(te^{2}r). Fr., *acéphalogastre.* Sp., *acefalogastro.* A monster of the kind defined under Acephalogastria.

ACEPHALOGASTRIA (Lat.), n. f. A^2(a^3)-se^{2}f(ke^{2}f)-a^3-lo-ga^{2}s(ga^{3}s)′tri^2-a^3. From α priv., κεφᾰλή, the head, and γαστήρ, the belly. Fr., *acéphalogastrie.* Ger., *Acephalogastrie.* It., Sp., *acefalogastria.* That form of monstrosity in which the head and the upper part of the abdomen are wanting.

ACEPHALOPHOROUS, adj. A^2-se^{2}f-a^{2}l-o^{2}f′o-ru^{3}s. Fr., *acéphalophore.* Characterized by the absence of a distinctly differentiated head (said of certain mollusks). [B, 28.]

ACEPHALOPODIA (Lat.), n. f. A^2(a^3)-se^{2}f(ke^{2}f)-a^3-lo-po′-di^2-a^3. From α priv., κεφᾰλή, the head, and πόδιον (dim. of πούς, the foot). Fr., *acéphalopodie.* Ger., *Acephalopodie.* It., Sp., *acefalopedia.* That form of monstrosity in which the head and the feet are wanting or are present in only a rudimentary state.

ACEPHALOPODUS (Lat.), n. m. A^2(a^3)-se^{2}f(ke^{2}f)-a^3-lo^{2}p′o-du^{3}s(du^{4}s). Fr., *acéphalopode.* Sp., *acefalópedo.* A monster of the kind defined under Acephalopodia.

ACEPHALORRHACHIA (Lat.), n. f. A^2(a^3)-se^{2}f(ke^{2}f)-a^3-lo^{2}r-ra(ra^3)′ki^2(ch^{2}i^2)-a^3. From α priv., κεφαλή, the head, and ῥάχις, the backbone. Fr., *acéphalorrhachie.* Ger., *Acephalorrhachie.* It., *acefalorachia.* Sp., *acefaloraquia.* That form of monstrosity in which the head and the vertebral column are wanting.

ACEPHALOS (Lat.), n. m. See Acephalus.

ACEPHALOSTOMA (Lat.), n. n. See Acephalostomus.

ACEPHALOSTOMIA (Lat.), n. f. A^2(a^3)-se^{2}f(ke^{2}f)-a^3-lo-sto′-mi^2-a^3. From α priv., κεφᾰλή, the head, and στόμα, the mouth. Fr., *acéphalostomie.* Ger., *Acephalostomie.* It., *acefalostomia.* Sp., *acefalostomía.* That variety of acephalia in which there is a mouth-like opening at the upper extremity of the body. [A, 306.]

ACEPHALOSTOMUS (Lat.), n. m. A^2(a^3)-se^{2}f(ke^{2}f)-a^3-lo^{2}s′to-mu^{3}s(mu^{4}s). Fr., *acéphalostome.* Ger., *Acephalostom.* Sp., *acefalóstomo.* A monster of the kind defined under Acephalostomia.

ACEPHALOTHORACIA (Lat.), n. f. A^2(a^3)-se^{2}f(ke^{2}f)-a^3-lo-tho-ra(ra^3)′si^2(ki^2)-a^3. From α priv., κεφαλή, the head, and θώραξ, the chest. Fr., *acéphalothoracie, acéphalothorie.* Ger., *Acephalothoracie.* It., Sp., *acefalotoracia.* That form of monstrosity in which the head and the thorax are wanting.

ACEPHALOTHORAX, ACEPHALOTHORUS (Lat.), n's m. A^2(a^3)-se^{2}f(ke^{2}f)-a^3-lo-tho′ra^{2}x(ra^{3}x), -lo^{2}th′o-ru^{3}s(ru^{4}s). Fr., *acéphalothore.* Sp., *acefalotórax, acefalótoro.* A monster of the kind defined under Acephalothoracia.

ACEPHALOUS, adj. A^2-se^{2}f′a^{2}l-u^{3}s. Gr., ἀκέφαλος. Lat., *acephalus.* Fr., *acéphale.* Ger. *acephalisch.* It., *acefalo.* Sp., *acéfalo.* 1. Destitute of a head (said of monsters). 2. Acephalopho-

rous (*q. v.*). 3. (In botany) not terminated by a style (said of the ovary). [B.]

ACEPHALUM (Lat.), n. n. A^{2}(a^{3})-se^{2}f(ke^{2}f)'a^{3}-lu^{3}m(lu^{4}m). Fr., *acéphale.* In botany, an ovary that is not terminated by a style. [B.]

ACEPHALUS (Lat.), n. m. A^{2}(a^{3})-se^{2}f(ke^{2}f)'a^{3}-lu^{3}s(lu^{4}s). Gr., ἀκέφαλος. Fr., *acéphale, monstre acéphalien.* Ger., *Ohnekopf.* It., *accfalo.* Sp., *acéfalo.* An acardiac monster (see ACARDIACUS) without a head, or with only a rudimentary head.—**A. dibrachius.** An a. with both upper limbs present but more or less undeveloped. —**A. dipus.** One with both lower limbs present but more or less undeveloped.—**A. monobrachius.** One with only one upper limb. —**A. monopus.** One with only one lower limb.—**A. paracephalus.** See PARACEPHALUS and HEMIACEPHALUS.—**A. sympus.** One in which the trunk ends in a long conical extremity, having a foot or two feet at the end; due to fusion of the two lower limbs. [A, 326].

ACEPHOSGENIC ACID, n. A^{2}s-e^{2}-fo^{2}s-je^{2}n'i^{2}k. For deriv., see ACETONE, PHOSPHORUS, and *-genic.** Ger., *Acephosgensäure.* An acid said by Zeise to be developed, along with acephossic and phosphacetic acids, when a solution of phosphorus in acetone is allowed to stand for some weeks. [B, 2.]

ACEPHOSSIC ACID, n. A^{2}s-e^{2}-fo^{2}s'si^{2}k. For deriv., see ACETONE and PHOSPHORUS. Ger., *Acephossäure.* An acid said by Zeise to be developed by the action of phosphorus on acetone. [B, 2.] Cf. ACEPHOSGENIC ACID.

ACER (Lat.), n. n. A(a^{3})'su^{5}r(ke^{2}r). Gen., *aceris.* From the adj. *acer*, sharp, and hence vigorous. Gr., σφένδαμνος. Fr., *érable.* Ger., *Ahorn.* It., *acero.* Sp., *arce.* The genus-name of the maples, a genus of trees of the natural order *Aceraceæ.*—**A. pennsylvanicum** [Linnæus]. Fr., *érable jaspé.* Syn.: *A. striatum* [Lamark]. The striped maple, or whistle-wood; a low, shrubby tree, distinguished by its smooth, longitudinally striped bark, indigenous to the Atlantic coast of North America and cultivated in Europe. [B, 34.]—**A. rubrum** [Linnæus]. Fr., *érable rouge* (ou *de Virginie*). The red maple. It furnishes sugar, and its inner bark, a mild astringent, is used by the American Indians in diseases of the eye. [A, 316.] —**A. saccharinum** [Linnæus]. Fr., *érable à sucre.* Ger., *Zuckerahorn.* Sp., *arce del azúcar.* The sugar maple, or rock maple; a tree growing throughout the United States, but especially in New England, the sap of which furnishes maple sugar. [B, 34.]—**A. striatum.** See *A. pennsylvanicum.*—**A. trifidum.** In summer the silk-weavers of Wuhu drink an infusion of the leaves, thinking that it prevents their perspiration from soiling the silk. [A, 261.]

ACER (Lat.), adj. A(a^{3})'su^{5}r(ke^{2}r). Acrid.

ACERA (Lat.), n. n. pl. A(a^{3})'se^{2}(ke^{2})-ra^{3}. Fr., *acères.* 1. A class (cohort) of plants including the natural orders *Aceraceæ, Malpighiaceæ, Erythroxylaceæ, Ixonanthaceæ, Sapindaceæ, Hippocastanaceæ, Melianthaceæ,* and *Rhizobolaceæ.* [B, 41.] 2. A group of apterous insects characterized by the absence of antennæ. [A, 251.]

ACERACEÆ (Lat.), n. f. pl. A^{2}(a^{3})-su^{5}r(ke^{2}r)-a(a^{3})'se^{2}(ke^{2})-e(a^{3}-e^{2}). Fr., *acéracées.* Ger., *Aceraceen.* Sp., *aceráceas.* Syn.: *Acerineæ.* 1. The maples, an order of trees and shrubs. 2. In Bentley and Hooker's classification, a suborder of the *Sapindaceæ.* [B, 34, 75.]

ACERACEOUS, adj. A^{2}-se^{2}-ra'shu^{3}s. Having the characters of the *Aceraceæ* (*q. v.*).

ACERAS (Lat.), n. f. A(a^{3})'su^{5}r(ke^{2}r)-a^{2}s(a^{3}s). From α priv., and κέρας, a horn, from there being no spur on the labellum (1st def.). Fr., *acéras.* 1. A genus of plants of the natural order *Orchidaceæ*, established by R. Brown. 2. A salt of aceric acid.—**A. anthropophora.** Fr., *homme pendu.* The green man, or man orchis; a plant having globular bulbs which furnish part of the salep of commerce. The leaves are said to be sudorific. [A, 316, 328; B, 19.]

ACERATE, n. A^{2}s'u^{5}r-at. Lat., *aceras, sal acericum.* Ger., *ahornsaures Salz.* A salt of aceric acid.

ACERATE, adj. A^{2}s'u^{5}r-at. From Lat., *acer*, sharp-pointed. See ACICULAR.

ACERATES (Lat.), n. f. A^{2}(a^{3})-su^{5}r(ke^{2}r)-a(a^{3})'tez(te^{2}s). From α priv., and κέρας, a horn, because the corona is destitute of horn-like processes. A genus of plants, of the natural order *Asclepiadaceæ*, indigenous to North America.—**A. decumbens.** A New Mexican species, said to be used as an antidote to snake-bites. [B, 5.]—**A. longifolia** [Elliot]. A species found throughout the Mississippi Valley; a plant from 2 to 3 feet high, with numerous green flowers; a diaphoretic. [A, 316; B, 34.]

ACERATIA (Lat.), n. f. A^{2}s(a^{3}k)-u^{5}r(e^{2}r)-a(a^{3})'shi^{2}(ti^{2})-a^{3}. Fr., *acératie.* Ger., *Hornmangel.* A monstrosity characterized by lack of horns in a ruminant. [A, 301.]

ACERATOS (Lat.), adj. A^{2}(a^{3})-se(ka)'ra^{3}-to^{2}s. See ACERATUS.

ACERATOSIA (Lat.), n. f. A^{2}(a^{3})-se^{2}(ke^{2})-ra^{3}-to'si^{2}-a^{3}. See ACERATIA.

ACERATOSIS (Lat.), n. f. A^{2}(a^{3})-se^{2}(ke^{2})-ra^{3}-to'si^{2}s. Syn.: *defectus cornuum.* A lack of horns.

ACERATOTHERION (Lat.), n. n. A^{2}(a^{3})-se^{2}(ke^{2})-ra^{3}-to-the-(tha)'ri^{2}-o^{2}n. From ἀκέρατος, without horns, and θηρίον, a beast. Fr., *acératothérion.* An animal which is a monster from lacking horns. [A, 301.]

ACERATUS (Lat.), adj. A^{2}(a^{3})-se(ka)'ra^{3}-tu^{3}s(tu^{4}s) (1st def.), a^{2}(a^{3})-se^{2}(ke^{2})-ra(ra^{3})'tu^{3}s(tu^{4}s) (2d def.). Gr., ἀκήρατος (from α priv., and κεράσθαι, to mix) (1st def.), ἀκέρατος (2d def.). 1. Uncorrupted (said of the humors). [Hippocrates, A, 325.] 2. Destitute of horns.

ACERB, adj. A^{2}-su^{5}rb'. Gr., στρυφνός. Lat., *acerbus.* Fr., *acerbe.* Ger., *scharf.* It., Sp., *acerbo.* Possessed of acerbity (*q. v.*).

ACERBITY, n. A^{2}-su^{5}rb'i^{2}t-i^{2}. Gr., στρυφνότης. Lat., *acerbitas.* Fr., *acerbité.* Ger., *Herbe.* It., *acerbità.* Sp., *acerbidad.* Harshness, sourness, or astringency of taste, like that of certain unripe fruits. [A, 344.]

ACERBOUS, adj. A^{2}-su^{5}rb'u^{3}s. Lat., *acerbus.* See ACERB.

ACERCUS (Lat.), n. m. A^{2}(a^{3})-su^{5}r(ke^{2}r)'ku^{3}s(ku^{4}s). Gr., ἄκερκος, without a tail. A monstrosity destitute of a tail, or of the coccygeal vertebræ.

ACERDESE, n. A^{2}-su^{5}r-des'. From ἀκερδής, unprofitable. Fr., *acerdèse.* Sp., *acerdesa, acerdesia.* Beudant's name for manganite (native hydrated sesquioxide of manganum), from its comparative lack of value in the arts. [A, 328, 347.]

ACERELLATOUS, adj. A^{2}-se^{2}-re^{2}l'la^{2}-tu^{3}s. Lat., *acerellatus.* Fr., *acérellé.* In botany, terminating in a somewhat blunted point. [B.]

ACERIC ACID, n. A^{2}-se^{2}'ri^{2}k. From Lat., *acer*, the maple tree. Lat., *acidum acericum.* Fr., *acide acérique.* Ger., *Ahornsäure.* An acid obtained from the sap of the maple tree, said to be identical with malic acid. [B, 7.]

ACERIDE, n. A^{2}s'e^{2}r-i^{2}d. From α priv., and *cera*, wax. Fr., *acéride.* Ger., *Acerid.* Sp., *aceride.* An old term for a plaster or ointment made without wax. [A, 322.]

ACERINEÆ (Lat.), n. f. pl. A(a^{3})-su^{5}r(ke^{2}r)-i^{2}n'e^{2}-e(a^{3}-e^{2}). Fr., *acérinées.* Ger., *Acerineen.* In Eichler's classification, a family (= order) of trees identical with the natural order *Aceraceæ*; also the *Aceraceæ* regarded as a suborder of *Sapindaceæ.* [B, 35, 75.]

ACERITOUS, adj. A^{2}-se^{2}'ri^{2}-tu^{3}s. See ACEROTUS.

ACERODE, n. A^{2}s'e^{2}r-od. See ACERIDE.

ACEROSÆ (Lat.), n. f. pl. A(a^{3})-su^{5}r(ke^{2}r)-o'ze(sa^{3}-e^{2}). Ger., *Nadelhölzer.* The order of needle-bearing trees (*Coniferæ*). [B, 49.]

ACEROSE, adj. A^{2}s'u^{5}r-os. Gr., πιθύρινος. Lat., *acerosus* (from *acer*, sharp). Fr., *acéreux, acéré.* Ger., *nadelförmig* (2d def.). 1. Coarse, chaffy, branny, furfuraceous. 2. In botany, needle-shaped. [A, 325; B, 39.]

ACEROTUS (Lat.), adj. A^{2}(a^{3})-se^{2}(ke^{2})-ro'tu^{3}s(tu^{4}s). From α priv., and *cera*, wax. Destitute of wax. [A, 322.]

ACEROUS, adj. A^{2}s'u^{5}r-u^{3}s. See ACEROSE.

ACERRA (It.). n. A^{3}-che^{2}r'hra^{3}. A town near Naples, with a spring containing calcium sulphide and carbonic acid. [A, 321.]

ACERVULUS (Lat.), n. m. A^{2}(a^{3})-su^{5}r(ke^{2}r)'vu^{2}(wu)-lu^{3}s(lu^{4}s). Dim. of *acervus*, a heap. Fr., *acervule.* Ger., *Hirnsand.* It., *acervolo.* Syn.: *a. cerebri* (seu *glandulæ pinealis*). Brain-sand; a collection of sabulous material found in the pineal gland, and sometimes also in the chorioid plexuses. It consists of carbonate of calcium and phosphates of calcium, magnesium, and ammonium, with a small amount of animal matter. [I, 6.]

ACESCENCE, ACESCENCY, n's. A^{2}s-e^{2}s'e^{2}ns, -e^{2}ns-i^{2}. Lat., *acescentia* (from *acescere*, to turn sour). Fr., *acescence.* Ger., *Acescenz, Säuerungsfähigkeit, Neigung zur Säure.* It., *acescenza.* Sp., *acescencia.* The process of becoming, or the tendency to become, acid. Cf. ACIDITY.

ACESCENT, adj. A^{2}s-e^{2}s'e^{2}nt. Lat., *acescens.* Fr., *acescent.* Ger., *acescent, säuerlich.* Sp., *acescente.* Possessed of acescence (*q. v.*). Cf. ACESCENTIA, pl.

ACESCENTIA (Lat.), n. f. A^{2}(a^{3})-se^{2}s(ke^{2}s)-se^{2}n(ke^{2}n)'shi^{2}-(ti^{2})-a^{3}. Acescence.

ACESCENTIA (Lat.), n. n., pl. of *acescens.* Gr., ὀξύνοντα, ὀξυνόμενα (from ὀξύνειν, to make, be, or become sour). Ger., *sauerwerdende Stoffe.* Articles of food and drink that have a special tendency to give rise to excessive acidity of the contents of the stomach.

ACESIA (Lat.), n. f. A^{2}(a^{3})-se(ka)'zi^{2}(si^{2})-a^{3}. Gr., ἄκεσις. Ger., *Akesie.* 1. Recovery, cure. 2. The name of a salve or plaster. [A, 311.] 3. (Obs.) a drug prepared from the urine of children. [A, 322.]

ACESINOSUS (Lat.), adj. A^{2}(a^{3})-se^{2}(ke^{2})-si^{2}n'o-su^{3}s(su^{4}s). Gr., ἀκεσίνοσος. Curative. [A, 322.]

ACESIPONOS (Lat.), adj. A^{2}(a^{3})-se^{2}(ke^{2})-si^{2}p'o-no^{2}s. Gr., ἀκεσίπονος (from ἄκεσις, a remedy, and πόνος, pain). Anodyne. [A, 322.]

ACESIS (Lat.), n. f. A^{2}(a^{3})'se^{2}(ke^{2})-si^{2}s. Gr., ἄκεσις. 1. A cure. [A, 322.] 2. A sort of borax. [A, 312.] 3. Water-sage. [Pliny, A, 318.]

ACESIUS (Lat.), adj. A^{2}(a^{3})-se(ka)'zi^{2}(si^{2})-u^{3}s(u^{4}s). Gr., ἀκέσιος. Curative, preservative. [A, 322.]

ACESMA (Lat.), n. n. A^{2}(a^{3})-se^{2}z(ke^{2}s)'ma^{4}. Gen., *aces'matos* (*-tis*). Gr., ἄκεσμα. A remedy. [A, 322.]

ACESMIUS, ACESMUS (Lat.), adj's. A^{2}(a^{3})-se^{2}z(ke^{2}s)'mi^{2}-u^{3}s(u^{4}s), -mu^{3}s(mu^{4}s). Gr., ἀκέσμιος, ἀκεσμός. Curable. [A, 322.]

ACESODYNE, ACESODYNOUS, adj's. A^{2}-se^{2}s'o-din, -o^{2}d'-i^{2}n-u^{3}s. Gr., ἀκεσώδυνος. Lat., *acesodynus.* Fr., *acésodyne.* Anodyne. [A, 311.]

ACESPHORIA (Lat.), n. f. A^{2}(a^{3})-se^{2}s(ke^{2}s)-fo'ri^{2}-a^{3}. Gr., ἀκεσφορία (from ἄκεσις, a remedy, and φορεῖν, to bear). Fr., *acesphorie.* A cure. [A, 322.]

ACESPHOROUS, adj. A^{2}-se^{2}s'fo-ru^{3}s. Gr., ἀκεσφόρος. Lat., *acesphorus.* Healing. [A, 322.]

ACESTA, ACESTER (Lat.), n's m. A^{2}(a^{3})-se^{2}s(ke^{2}s)'ta^{3}, -tu^{5}r-(te^{2}r). Gr., ἀκεστήρ. See ACESTOR.

ACESTERIUS (Lat.), adj. A^{2}(a^{3})-se^{2}s(ke^{2}s)-te(ta)'ri^{2}-u^{3}s(u^{4}s). See ACESTORIUS.

ACESTES (Lat.), n. m. A^{2}(a^{3})-se^{2}s(ke^{2}s)'tez(te^{2}s). Gr., ἀκεστής. See ACESTOR.

ACESTICA (Lat.), n. f. A[2](a[3])-se[2]s(ke[2]s)'ti[2]-ka[3]. A contraction of *ars a.* Gr., (τέχνη) ἀκεστική. See ACESTORIA.

ACESTICUS (Lat.), adj. A[2](a[3])-se[2]s(ke[2]s)'ti[2]-ku[3]s(ku[4]s). See ACESTORIUS.

ACESTOR (Lat.), n. m. A[2](a[3])-se[2]s(ke[2]s)'to[2]r(tor). Gr., ἀκέστωρ. A physician. [A, 322.]

ACESTORIA (Lat.), n. f. A[2](a[3])-se[2]s(ke[2]s)-to'ri[2]-a[3]. Gr., ἀκεστορία. The healing art. [A, 322.]

ACESTORIS (Lat.), n. f. A[2](a[3])-se[2]s(ke[2]s)'to-ri[2]s. Gr., ἀκεστορίς (fem. of ἀκέστωρ). A female physician. [A, 311.]

ACESTORIUS (Lat.), adj. A[2](a[3])-se[2]s(ke[2]s)-to'ri[2]-u[3]s(u[4]s). 1. Curative. 2. Curable. [A, 322.]

ACESTOS (Lat.), adj. A[2](a[3])-se[2]s(ke[2]s)'to[2]s. Gr., ἀκεστός. Curable. [Hippocrates, A, 311.]

ACESTRA (Lat.), n. f. A[2](a[3])-se[2]s(ke[2]s)'tra[3]. Gr., ἀκέστρα. A needle. [A, 325.]

ACESTRIA, ACESTRIS (Lat.), n's f. A[2](a[3])-se[2]s(ke[2]s)'tri[2]-a[3], -tri[2]s. Gr., ἀκεστρίς (fem. of ἀκεστήρ). A midwife. [A, 311, 322.]

ACESTRON, ACESTRUM (Lat.), n's n. A[2](a[3])-se[2]s(ke[2]s)'-tro[2]n, -tru[3]m(tru[4]m). Gr., ἄκεστρον. A remedy. [A, 311.]

ACESTYS (Lat.), n. f. A[2](a[3])-se[2]s(ke[2]s)'ti[2]s(tu[6]s). See ACESIA.

ACETA (Lat.), n. n., pl. of *acetum* (*q. v.*). A[2]s(a[3]k)-e(a)'ta[3]. The vinegars; a series of pharmaceutical preparations. For the individual *aceta*, see under ACETUM and under the drugs from which they take their names.

ACETABULAR, adj. A[2]s-e[2]t-a[2]b'u[2]-la[3]r. Pertaining to the acetabulum.

ACETABULARIA (Lat.), n. f. A[2](a[3])-se[2](ke[2])-ta[2]b(ta[3]b)-u[2]-(u)-la(la[3])'ri[2]-a[3]. A genus of umbrella-shaped, green-spored, calcareous marine *Algæ*. [B, 19.]—**A. mediterranea** [Lamouroux]. A species which furnishes part of the article known as Corsican moss. [A, 344.]

ACETABULEUS (Lat.), adj. A[2](a[3])-se[2]t(ke[2]t)-a[2](a[3])-bu[2](bu)-le[2]-u[3]s(u[4]s). Fr., *acétabulé*. See ACETABULIFORM.

ACETABULIFEROUS, adj. A[2]-se[2]t-a[2]b-u[2]-li[2]f'e[2]-ru[3]s. From *acetabulum* (*q. v.*), and *ferre*, to bear. Fr., *acétabulifère*. In zoology, provided with suckers (said especially of the *Cephalopoda*). [B, 38, 39.]

ACETABULIFORM, adj. A[2]-se[2]t-a[2]b-u[2]'li[2]-fo[2]rm. Lat., *acetabuliformis*. Fr., *acétabuliforme*. Ger., *becherförmig*. Sp., *acetabuliforme*. In botany, shaped like a saucer or a shallow cup. [Lindley, Gray, B, 39.]

ACETABULOSE, adj. A[2]-se[2]t-a[2]b'u[2]-los. See ACETABULIFORM.

ACETABULUM (Lat.), n. n. A[2](a[3])-se[2]t(ke[2]t)-a[2]b(a[3]b)'u[2](u)-lu[3]m(lu[4]m). From *acetum*, vinegar. Gr., κοτύλη, κοτυληδών. Fr., *acétabule, acétable* (obs.), *cavité cotyloïde* (3d def.), *fosse cotyloïdienne* (3d def.), *nombril de Vénus* (6th def.). Ger., *Pfanne, Gelenkpfanne* (3d def.), *Nabelkraut* (6th def.), *Venusnabel* (6th def.). It., *acetabolo*. Sp., *acetábulo, cavidad cotiloídea* (3d def.), *ombligo de Venus* (6th def.). Syn.: *cotyloid cavity* (3d def.). 1. Originally, a vessel for holding vinegar; hence, any cup-shaped vessel. [A, 312.] 2. A measuring cup holding about 10 fluidrachms. [Celsus, B, 45.] 3. A cup-shaped articular cavity, especially that of the innominate bone serving as a socket for the head of the thigh bone. [C.]. 4. In zoology, the sucker of a cephalopod; also, the socket with which the limb of an insect articulates. [B.] 5. In botany, the receptacle of certain lichens and fungi; also the calyx of a flower. 6. A name sometimes applied to the plants known as Venus's navelwort (*Cotyledon umbilicus* and various species of *Omphalodes*). 7. A placental cotyledon, especially in ruminants. [A, 300, 325.]—**A. alterum.** The common orpine (*Sedum telephium*). [A, 316.]—**A. cotyle.** See *A.* (3d def.).—**A. humeri.** See *Humeri a.*—**A. marinum.** Navelwort.—**Acetabula uterina.** See *A.* (7th def.).—**Humeri a.** Gr., ὠμοκοτύλη. See *Glenoid* CAVITY.

ACETACETATE, n. A[2]s-e[2]t-a[2]s'e[2]t-at. See ACETOACETATE.

ACETAL, n. A[2]s'e[2]t-a[2]l. From *acetic* and *aldehyde*. Lat., *acetalium*. Fr., *acétal*. Ger., *Acetal*. It., *acetal, acetalo*. Sp., *acetal*. Syn.: *ethylidene ethylate, ethylidene diethyl ether*. A colorless, mobile liquid, $CH_3.CH\langle^{O.C_2H_5}_{O.C_2H_5} = C_6H_{14}O_2$, produced by the oxidation of ethyl alcohol. It has a peculiar, agreeable odor and a refreshing taste, with an after-taste like that of hazel-nuts. It acts as a hypnotic. [B, 2, 4; v. Mering, "Berl. kl. Wchnschr.," 1882, No. 43.]

ACETALDEHYDE, n. A[2]s-e[2]t-a[2]l'de-hid. Fr., *acétaldéhyde*. Ger., *Acetaldehyd*. See ACETIC ALDEHYDE.

ACETALIUM (Lat.), n. n. A[2](a[3])-se[2]t(ke[2]t)-a(a[3])'li[2]-u[3]m(u[4]m). Acetal.

ACETAMEISENSÄURE (Ger.), n. A[3]-tse[2]t-a[3]-mi'se[2]n-zoi-re[2]. Acetoformic acid. [B.]

ACETAMIDE, n. A[2]s-e[2]t'a[2]m-i[2]d. Fr., *acétamide*. Ger., *Acetamid*. It., *acetammide*. Sp., *acetámide*. A substance formed by the action of ammonia on an acetic ether; occurring in colorless acicular crystals, having an odor resembling that of mouse-dung, and possessing the composition of ammonia in which one atom of hydrogen is replaced by a molecule of acetyl: $CH_3.CO.NH_2 = C_2H_5NO$. [B, 2, 4.]—**A. chloral.** See CHLORALACETAMIDE.—**A. nitrate.** Fr., *azotate d'acétamide*. Ger., *salpetersaures Acetamid*. A crystalline substance formed by the action of nitric acid on a.: $C_2H_5NO.HNO_3 = CH_3.CO - N(H_3) - ONO_2$. [B, 4.]

ACETAMIDOPHTHALIC ACID, n. A[2]s-e[2]t-a[2]m-i[2]d-o[2]p-tha[2]l'i[2]k. From *acetic, amide*, and *phthalic*. Fr., *acide acétamidophtalique*. Ger., *Acetamidophtalsäure*. An acid formed by the combination of acetamide with phthalic acid: $C_6H_3.(CO_2H)_2.NH.C_2H_3O$. [B, 2.]

ACETANILIDE, n. A[2]s-e[2]t-a[2]n'i[2]l-i[2]d. Fr., *acétanilide*. Ger., *Acetanilid*. A substance having the constitution $C_6H_5.N.(C_2H_3O).H = C_8H_9NO$. It forms shining laminar crystals, soluble in hot water, in alcohol, and in ether. [B, 4.] Cf. ANTIFEBRINE.

ACETARIA (Lat.), n. n. pl. A[2]s(a[3]k)-e[2]t-a(a[3])'ri[2]-a[3]. Vegetables, etc., prepared with vinegar (pickles and salads). [A, 312, 336.]

ACETARIOUS, adj. A[2]s-e[2]t-a'ri[2]-u[3]s. Lat., *acetarius*. Proper for making salads or pickles (said of plants). [B, 7.]

ACETARIUM (Lat.), n. n. A[2]s(a[3]k)-e[2]t-a(a[3])'ri[2]-u[3]m(u[4]m). A pickle or salad.—**A. scorbuticum.** A kind of pickle, advised by Bates for scorbutic patients, made of the bruised leaves of the *Cochlearia anglica*, 3 oz; white sugar, 6 oz; "sal cochlear.," 1 oz; and orange juice, 6 oz. [A, 336.]

ACETAS (Lat.), n. m. A[2](a[3])-se(ka)'ta[2]s(ta[3]s). An acetate.—**A. aluminicus.** Neutral acetate of aluminium.—**A. ammonicus.** Acetate of ammonium. [B.]—**A. ammonicus aqua solutus** [Fr. Cod.]. A preparation corresponding to the liquor ammonii acetatis of the U. S. Ph. [B.]—**A. calcicus** [Fr. Cod.]. Acetate of calcium. [B.]—**A. cupricus.** Acetate of copper.—**A. kalicus.** Acetate of potassium.—**A. lixivæ.** See KALIUM *aceticum solutum*.—**A. morphicus.** Acetate of morphine.—**A. natricus.** Acetate of sodium.—**A. natricus cum aqua.** See NATRIUM *aceticum*.—**A. plumbicus** [Fr. Cod.]. Fr., *acétate neutre de plomb*. Normal acetate of lead.—**A. potassicus** [Fr. Cod.]. Fr., *acétate de potasse sec*. Acetate of potassium. [B.]—**A. quinicus.** Acetate of quinine.—**A. sodicus** [Fr. Cod.]. Fr., *acétate de soude crystallisé*. Acetate of sodium. [B.]—**A. zincicus** [Fr. Cod.]. Acetate of zinc.

ACETATCITRAT (Ger.), n. A[3]-tse[2]t-a[3]t''tsi[2]t-ra[3]t'. See ACETOCITRATE.

ACETATCITRONENSÄURE-AETHYLESTER (Ger.), n. A[3]-tse[2]t-a[3]t''tsi[2]t-ro'ne[2]n-zoi-re[2]-a'tu[6]l-e[2]s-te[2]r. Acetocitrate of ethyl.—**Acetatcitronensäure-Methylester.** Acetocitrate of methyl. [B.]

ACETATE, n. A[2]s'e[2]t-at. Lat., *acetas*. Fr., *acétate*. Ger., *Acetat, essigsaures Salz*. It., Sp., *acetato*. A salt of acetic acid. For the individual a's, see under the names of the bases.—**Acid a.** One in which the base replaces only a part of that portion of the hydrogen of the acid that is capable of displacement.—**Basic a.** One in which one or more of the acid-radicle molecules (C_2H_3O) have been replaced by oxygen or hydroxyl (OH); or, a combination of a normal a. with the hydrate or the oxide of the base. Various prefixes are assigned to the different basic a's to designate the ratio between the number of molecules of the acid radicle and the number of molecules or atoms of the base; thus: a *sesquibasic a.* is one in which the ratio is as 2 to 3, a *dibasic a.* one in which it is as 1 to 2, a *tribasic a.* one in which it is as 1 to 3, a *tetrabasic a.* one in which it is as 1 to 4, and a *sexbasic a.* one in which it is as 1 to 6. [B.]—**Dibasic a.** See *Basic a.*—**Neutral a., Normal a.** One in which the base replaces all the hydrogen of the acid that is capable of displacement. [B.]—**Sesquibasic a., Sexbasic a., Tetrabasic a., Tribasic a.** See *Basic a.*

ACETATED, adj. A[2]s'e[2]t-a-te[2]d. Lat., *acetatus*. Ger., *essigsauer*. It., *acetato*. Sp., *acetado*. 1. Having the constitution of an acetate. 2. Containing an acetate, or acetic acid, or vinegar.

ACETATMILCHSÄUREÄTHYLESTER, ACETATMILCHSÄUREESTER (Ger.), n's. A[3]-tse[2]t-a[3]t''mi[2]lch[2]'''zoi-re[2]-a'ti[2]l-e[2]s-te[2]r, -zoi-re[2]-e[2]s-te[2]r. See ETHYL *acetolactate*.

ACETATSALICYLSÄURE (Ger.), n. A[3]-tse[2]t-a[3]t''za[3]l-i[2]-tsu[6]l'zoi-re[2]. Acetosalicylic acid. [B.]

ACETATUS (Lat.), adj. A[2]s(a[3]k)-e[2]t-a(a[3])'tu[3]s(tu[4]s). Acetated.

ACÈTE (Fr), n. A[3]-se[2]t. An old name for an acetate. [A, 344.]

ACÉTÉ (Fr.), n. A[3]-sa-ta. Turned into vinegar. [A, 306.]

ACETENE, n. A[2]s'e[2]t-en. Fr., *acétène*. Ger., *Aceten*. Olefiant gas. See ETHYLENE. [B.]

ACETENYL, n. A[2]s-e[2]t'e[2]n-i[2]l. Fr., *acétényle*. Ger., *Acetenyl*. A univalent radicle, supposed to be present in acetylene, having the composition $C \equiv CH_3$. [B.]—**A'benzene.** Fr., *acétényl-benzine*. Ger., *Acetenylbenzol*. Syn.: *phenylacetylene*. A colorless, highly refracting liquid, having a peculiar aromatic odor; chemically, a hydrocarbon of the acetylene series: $C_8H_6 = (C_6H_5) - C \equiv CH$. [B, 2.] See PHENYLACETYLENE.—**A'benzol** (Ger.). See *A'benzene*.

ACETESSIGESTER (Ger.), n. A[3]-tse[2]t-e[2]s'si[2]g-e[2]st''e[2]r. Acetoacetic ether.

ACETESSIGSÄURE (Ger.), n. A[3]-tse[2]t-e[2]s'si[2]g-zoi-re[2]. Acetoacetic acid. [B.]

ACETEUGENOL, n. A[2]s-e[2]t-u[2]'je[2]n-o[2]l. From *acetic* and *eugenol*. A compound obtained by treating eugenol with chloracetyl. On oxidation, it is converted into acetvanillic acid, and is hence used as a source of artificial vanillin. [B, 4, 5.]

ACÉTEUSE (Fr.), n. A[3]-sa-tu[5]z. An old name for sorrel. [A, 306.]

ACÉTEUX (Fr.), adj. A[3]-sa-tu[5]. Acetous.

ACETIC, adj. A[2]s-et(e[2]t)'i[2]k. Lat., *aceticus*. Fr., *acétique*. Ger., *acetisch, essigsauer*. It., *acetico*. Sp., *acético*. Containing or derived from vinegar or acetyl.

ACETICA (Lat.), n. n. pl. A[2]s(a[3]k)-e[2]t'i[2]-ka. See ACETA *medicata*, under ACETUM.

ACETIC ACID, n. Lat., *acidum aceticum*. Fr., *acide acétique*. Ger., *Essigsäure*. It., *acido acetico*. Sp., *ácido acético*. Syn.: *methylcarbonic acid, acetyl hydrate*. The acid of vinegar; a hydrate, or hydrated oxide, of acetyl: $C_2H_4O_2 = \left.\begin{matrix}C_2H_3O\\H\end{matrix}\right\} O$, or $C_2H_3O_2.H$, or $CH_3.COOH$. It may be regarded as a molecule of water (H_2O) in which half the hydrogen is replaced by acetyl (C_2-

H_3O). It is an organic monobasic acid found in the juices of many plants, and existing probably also in several of the animal secretions, but more commonly resulting from the decomposition and oxidation of organic bodies. It is prepared either by oxidizing alcohol or by the destructive distillation of wood. The a. a. of commerce and of medicine is an aqueous solution of the pure acid, containing 33 per cent. (Br. Ph.) or 36 per cent. (U. S. Ph.) of the latter. The a. a. of the Ger. Ph. is glacial *a. a.* The Fr. Cod. recognizes two grades: *acide acétique crystallisable, monohydraté,* or *pur,* corresponding to glacial a. a.; and *acide acétique du commerce* (*acide pyroligneux purifié*), containing 50 per cent. of the pure acid and having a sp. gr. of 1·060. [B, 2.] Cf. ACIDUM ACETICUM.—**Anhydrous a. a.** See ACETIC ANHYDRIDE.—**Aqueous a. a.** Any mixture of a. a. and water.—**Camphorated a. a.** See ACIDUM ACETICUM *camphoratum.*—**Crystallizable a. a.** See *Glacial a. a.*—**Diluted a. a.** Fr., *acide acétique dilué.* Ger., *reiner Essig.* It., *acido acetico diluto.* Sp., *ácido acético diluido.* See ACIDUM ACETICUM *dilutum.*—**Glacial a. a.** Lat., *acidum aceticum glaciale.* Fr., *acide acétique crystallisable* [Fr. Cod.], *vinaigre glacial.* Ger., *Eisessig.* It., *acido acetico glaciale.* Sp., *ácido acético concentrado.* Syn.: *radical vinegar.* Nearly absolute a. a.; a colorless, volatile liquid, of pungent odor and caustic taste, which crystallizes below 15° C. [B, 5.]—**Hydrated a. a.** A definite compound of a. a. and water (79 parts of the crystallized acid to 21 of water). Its density is 1·073, all other mixtures of a. a. and water being less dense. [B, 2.]—**Monohydrated a. a.** See *Glacial a. a.*—**Syrup of a. a.** A preparation of the Belgian Ph. (1853), containing 347 parts of a 5·5-per-cent. a. a. and 653 parts of sugar. [B, 10.]

ACETIC ALDEHYDE, n. Written also *aceticaldehyde.* Fr., *aldéhyde acétique* (ou *vinique*). Ger., *Acetaldehyd, Aethylaldehyd.* It., *aldeide acetica.* Syn.: *acetaldehyde, ethylic aldehyde, oxide of ethylidenc.* Ordinary aldehyde, C_2H_4O; a body which may be regarded as ethyl alcohol deprived of 2 atoms of hydrogen, or as acetic acid deprived of 1 atom of oxygen, a hydrate, or hydrated oxide, of vinyl, or a hydride of acetyl; a transparent liquid having a pungent, suffocating odor, very volatile, and boiling at 21° C. Döbereiner, who first obtained it, in an impure state, called it "light oxygen ether." It is the substance usually meant when the word aldehyde is used without qualification. It is produced by the oxidation and destructive distillation of alcohol and some other organic compounds. In its reactions, it may be regarded as a monobasic acid, forming salts called aldehydates. It readily oxidizes into acetic acid. [B, 2.] For its substitution and addition compounds, see BROMALDEHYDE, CHLORALDEHYDE, etc.; for its polymeric modifications, see PARALDEHYDE, METALDEHYDE, ACRALDEHYDE, and ELALDEHYDE.

ACETIC ANHYDRIDE, n. Fr., *anhydride acétique.* Ger., *Essigsäureanhydrid.* It., *anidride acetica.* Anhydrous acetic acid, oxide of diacetyl, or acetate of acetyl: $C_4H_6O_3 = (CH_3.CO)_2O$. A colorless, mobile liquid, boiling at 138° C., obtained by the action of acetic chloride or phosphorus oxychloride on sodium acetate. It dissolves in water with the production of acetic acid. [B, 4.]

ACETIC ETHER, n. Lat., *æther aceticus.* Fr., *éther acétique.* Ger., *Essigester, Essigäther.* It., *etere acetico.* Sp., *éter acético.* Any compound of acetic acid with a compound radicle. The most common are ethyl acetate (to which the term is frequently limited), methyl acetate, allyl acetate, and the acetoacetic ethers. [B.]

ACETICUS (Lat.), adj. A²s(a³k)-e²t′i²k-u³s(u⁴s). Acetic. Used with the name of a base, the acetate of that base.

ACETIDIN, n. A²s-e²t′i²d-i²n. Fr., *acétidine.* Ger., *Acetidin.* Acetic ether.

ACETIFICATION, n. A²s-e²t-i²-fi²-ka′shu³n. Lat., *acetificatio* (from *acetum,* vinegar, and *facere,* to make). Fr., *acétification.* Ger., *Sauermachen, Essigbildung.* It., *acetificazione.* Sp., *acetificación.* A transformation into vinegar.

ACETIFY, v. tr. A²s-e²t′i²-fi. Fr., *acétifier.* Ger., *sauer machen.* It., *acetificare.* Sp., *acetificar.* To convert into vinegar.

ACETIMETER, ACETIMETRIC, ACETIMETRY, n's. A²s-e²t-i²m′e²t-u⁵r, -i²m-e²t′ri²k, -i²m′e²t-ri². See ACETOMETER, ACETOMETRIC, and ACETOMETRY.

ACETIN, n. A²s′e²t-i²n. Fr., *acétine.* Ger., *Acetin.* It., Sp., *acetina.* An acetic ether (or acetate) of glyceryl. Three are known: *monacetin,* $C_3H_5.(OH)_2.(C_2H_3O_2)$; *diacetin,* $C_3H_5.(OH).(C_2H_3O_2)_2$; and *triacetin,* $C_3H_5.(C_2H_3O_2)_3$. All of them are liquids. [B, 4.]

ACETIS (Lat.), n. m. A²(a³)-se(ka)′ti²s. See ACETITE.

ACETISCH (Ger.), adj. A³-tsat′i²sh. Acetic.

ACETITE, n. A²s′e²t-it. Lat., *acetis.* Fr., *acétite.* Ger., *Acetit, essigsaures Salz* (1st def.). It., Sp., *acetito.* 1. A salt of acetous acid (formerly so called, but now known to be the same as acetic acid); an acetate. 2. A compound of acetic acid and mannite (diacetate of mannitan). [B, 2, 4, 39.]

ACETMALONSÄUREESTER (Ger.), n. A³-tse²t-ma³-lon′zoi-re²-e²s-te²r. An ether consisting of the acetate and the malonate of the same compound radicle, especially ethyl. [B.] See ETHYL *acetomalonate.*

ACETMETAMIDOBENZOIC ACID, n. A²s-e²t-me²t-a²m-i²d-o-be²n-zo′i²k. From *acetic* and *metamidobenzoic.* Fr., *acide métamido-benzoïque.* Ger., *Acetmetamidobenzoësäure.* A crystalline acid formed by heating metamidobenzoic acid with glacial acetic acid: $C_6H_4.N(C_2H_3O)H.COOH = C(H,N[C_2H_3O]H,H,COOH,H,H)$. [B, 4.]

ACETNAPHTHALIDE, n. A²s-e²t-na²p′tha²l-i²d. From *acetic* and *naphthalide.* Ger., *Acetnaphthalid.* A crystalline substance, $C_{10}H_7.N(C_2H_3O)H$, formed by the action of glacial acetic acid on naphthalide. [B, 4.]

ACETOACETATE, n. A²s″e²t-o-a²s′e²t-at. Fr., *acéto-acétate.* Ger., *Acetacetat, acetessigsaures Salz.* A salt of acetoacetic acid. The general formula is $C_2H_3O.CH_2.COO.(M')$, in which M′ is a univalent metal or radicle. Many substitution compounds are formed by replacing one or both of the atoms of hydrogen in the second molecule (CH_2) of the acid radicle—thus, a *benzoylacetoacetate* is $C_2H_3O.CH.(COC_6H_5).COOM'$. Many doubly substituted a's are known, of the general formula $CH_3.CO.CH(C_mH_n)'.COO.(C_pH_q)'$, in which C_mH_n and C_pH_q are any two univalent hydrocarbon radicles. Triply substituted a's have the constitution $CH_3.CO.C(C_rH_s)'(C_mH_n)'.COO(C_pH_q)'$. [B, 2, 4.]

ACETOACETIC ACID, n. A²s″e²t-o-a²s-e′ti²k. Fr., *acide acéto-acétique.* Ger., *Acetessigsäure.* A monobasic acid formed from acetic acid by replacing one of the hydrogen atoms of the acid radicle with the acetic-acid radicle, acetyl (C_2H_3O), giving the formula $C_2H_3O.C_2H.COOH$. [B, 2.]

ACETOACETIC ETHER, n. Fr., *éther acéto-acétique.* Ger., *Acetessigester.* An acetoacetate in which a compound radicle replaces the extra-radical hydrogen of the acid. The most common are the ethylic derivative and its numerous substitution products. [B, 2.]

ACETOARSENITE, n. A²s″e²t-o-a³r′se²n-it. Fr., *acéto-arsénite.* Ger., *Acetarsenit.* A salt consisting of an acetate and an arsenite of the same base.

ACÉTO-AZOTATE (Fr.), n. A³-sa-to-a³-zo-ta³t. An acetonitrate.

ACETOBENZIDINE, n. A²s″e²t-o-be²n′zi²d-en. Ger., *Acetbenzidin.* See BENZIDINE.

ACETOBENZOIC ANHYDRIDE, n. A²s″e²t-o-be²n-zo′i²k. Fr., *anhydride acéto-benzoïque.* Ger., *Benzoëessigsäureanhydrid.* Acetate of benzoyl, benzoate of acetyl: $C_9H_8O_3 = \left.\begin{matrix}C_2H_3O\\C_7H_5O\end{matrix}\right\}O$. [B, 2.]

ACETOBROMANILIDE, n. A²s″e²t-o-bro-ma²n′i²l-i²d. For deriv., see ACETUM, BROMINE, and ANILINE. See BROMOPHENYLACETAMIDE.

ACETOBROMIDE, n. A²s″e²t-o-bro′mi²d. Fr., *acétobromure.* Ger., *Acetobromür.* Syn.: *bromoacetate.* An acetate in which part of the hydrogen of the acid radicle has been replaced by bromine. [B.]

ACETOBROMOPHENONE, n. A²s″e²t-o-bro‴mo-fe²n-on′. For deriv., see ACETUM, BROMINE, and PHENONE. See ACETOPHENONE.

ACETOBUTYRATE, n. A²s″e²t-o-bu²′ti²-rat. For deriv., see ACETUM and BUTYRATE. Fr., *acéto-butyrate.* Ger., *Acetobuttersäureester.* A salt containing molecules of both the acetic-acid radicle and the butyric-acid radicle, the general formula being $R''(O.C_2H_3O).(OC_4H_7O)$, in which R″ is a bivalent radicle. [B, 4.]

ACETOBUTYRIC ACID, n. A²s″e²t-o-bu²-ti²′ri²k. Fr., *acide acéto-butyrique.* Ger., *Acetobuttersäure.* See PROPIONIC ACID.

ACETOCHLORAL, n. A²s″e²t-o-klo′ra³l. See CHLORAL.

ACETOCHLORANILIDE, n. A²s″e²t-o-klor-a²n′i²l-i²d. For deriv., see ACETUM, CHLORINE, and ANILINE. Fr., *acéto-chloranilide.* Ger., *Acetochloranilid.* Syn.: *monochlorophenylacetamide.* See under CHLOROPHENYLACETAMIDE.

ACETOCHLORHYDRIN, n. A²s″e²t-o-klor-hi′dri²n. For deriv., see ACETUM, CHLORINE, and HYDRIN. Fr., *acéto-chlorhydrine.* Ger., *Acetochlorhydrin.* A liquid produced by the action of acetic and hydrochloric acids on glycerin (glyceryl alcohol), whereby two molecules of hydroxyl are replaced by chlorine and the radicle of acetic acid: $C_3H_5.(OH).Cl.(C_2H_3O_2)$. [B, 4.]

ACETOCHLORHYDROSE, n. A²s″e²t-o-klor-hi′dros. For deriv., see ACETUM, CHLORINE, HYDROGEN, and *-ose.** Fr., *acéto-chlorhydrose.* Ger., *Acetochlorhydrose.* Acetochlorhydrin of glucose, $C_6H_7(C_2H_3O)_4ClO_5$; a semi-fluid or crystalline body resulting from the action of acetyl chloride on glucose. [B, 2.]

ACETOCHLORIDE, n. A²s″e²t-o-klo′ri²d. For deriv., see ACETATE and CHLORIDE. Fr., *acéto-chlorure.* Ger., *Acetochlorür.* A double salt consisting of an acetate and a chloride of the same base. [B, 2.]

ACETOCINNAMENE, n. A²s″e²t-o-si²n′a²m-en. For deriv., see ACETUM and CINNAMENE. Fr., *acéto-cinnamène.* Ger., *Acetocinnamen.* An oily liquid, $C_{10}H_{10}O = CO\langle\begin{matrix}CH_3\\CH = CH - C_6H_5\end{matrix}$, formed by the dry distillation of the calcium salts of acetic and cinnamic acids. [B, 2.]

ACETOCINNAMIC ANHYDRIDE, n. A²s″e²t-o-si²n-a²m′-i²k. For deriv., see ACETUM and CINNAMYL. Fr., *anhydride acéto-cinnamique.* Ger., *Zimmtsäureessigsäureanhydrid.* Acetate of cinnamyl; a heavy oil having the composition $C_2H_3O.C_9H_7O.O$. [B, 2.]

ACETOCITRATE, n. A²s″e²t-o-si²t′rat. For deriv., see ACETIC and CITRATE. Fr., *acéto-citrate.* Ger., *Acetatcitrat.* A compound of an acetate and a citrate. The general formula of the a's is $C_3H_4.C.(C_2H_3O_2).(COO)_3R'''$, in which R‴ is a trivalent radicle or its equivalent. [B.]

ACETOCOMENATE, n. A²s″e²t-o-ko′me²n-at. For deriv., see ACETIC and COMENATE. Fr., *acéto-coménate.* Ger., *Acetokomenat.* A compound of an acetate and a comenate. The a's have the general formula $R[C_5H_2(C_2H_3O_2)O_2.COO]_n$, in which R is a radicle of which the quantivalence is *n.* [B, 3.]

ACETOCUMINIC ANHYDRIDE, n. A²s″e²t-o-ku²-mi²n′i²k. For deriv., see ACETUM and CUMYL. Fr., *anhydride acéto-cuminique.* Acetate of cumyl, $C_2H_3O.C_{10}H_{11}O.O$. [B, 2.]

ACETOCYANIC OXIDE, n. A²s″e²t-o-si-a²n′i²k. For deriv., see ACETUM and CYANOGEN. Fr., *oxyde acéto-cyanique.* Ger., *Es-*

sigsäurecyansäureanhydrid. Acetate of cyanogen, $C_3H_3NO_2 = CH_3.CO_2.CN = {C_2H_3O \atop C\,N}\Big\} O$; a compound isomeric with cyanacetic acid. [B, 2.]

ACETODIBROMANILIDE, n. A^{2}s''e^{2}t-o-di-brom-a^{2}n'i^{2}l-i^{2}d. For deriv., see ACETUM, *di-**, BROMINE, and ANILINE. Fr., *acéto-dibromanilide.* Ger., *Acetodibromanilid.* Syn.: *Dibromophenyl-acetamide.* See BROMOPHENYLACETAMIDE.

ACETODIBROMOXYLIDE, n. A^{2}s''e^{2}t-o-di-bro-mo-zi'li^{2}d. For deriv., see ACETUM, *di-**, BROMINE, and XYLYL. Fr., *acéto-dibromoxylide.* Ger., *Acetodibromxylid.* See XYLIDINE.

ACETODICHLORACETATE, n. A^{2}s''e^{2}t-o-di-klor-a^{2}s'e^{2}t-at. For deriv., see ACETUM, *di-**, CHLORINE, and ACETATE. Fr., *acéto-dichloracétate.* Ger., *dichloracetessigsaures Salz.* A salt of acetoacetic acid in which 2 atoms of chlorine are substituted for 2 of hydrogen. [B.]

ACETODICHLORANILIDE, n. A^{2}s''e^{2}t-o-di-klor-a^{2}n'i^{2}l-i^{2}d. For deriv., see ACETUM, *di-**, CHLORINE, and ANILINE. Fr., *acéto-dichloranilide.* Ger., *Acetodichloranilid.* See DICHLOROPHENYL-ACETAMIDE.

ACETODICHLORHYDRIN, n. A^{2}s''e^{2}t-o-di-klor-hi'dri^{2}n. For deriv., see ACETUM, *di-**, CHLORINE, and HYDRIN. Fr., *acéto-dichlorhydrine.* Ger., *Acetodichlorhydrin.* A liquid, $C_3H_5.Cl_2.(C_2H_3O_2)$, formed by the action of acetic and hydrochloric acids on glycerin (glyceryl alcohol), 1 molecule of the radicle of acetic acid and 2 atoms of chlorine being substituted for 3 molecules of hydroxyl. [B, 4.]

ACETODIETHYLACETATE, n. A^{2}s''e^{2}t-o-di-e^{2}th'''i^{2}l-a^{2}s'-e^{2}t-at. For deriv., see ACETUM, *di-**, ETHYL, and ACETATE. Fr., *acéto-diéthylacétate.* Ger., *diäthylessigsaures Salz.* A salt of acetoacetic acid in which 2 molecules of ethyl (C_2H_5) are substituted for 2 atoms of hydrogen. [B.]

ACETODIISOBUTYLACETATE, n. A^{2}s''e^{2}t-o-di-i-so-bu^2'''-ti^{2}l-a^{2}s'e^{2}t-at. For deriv., see ACETUM, *Di-**, *Iso-**, BUTYL, and ACETATE. Fr., *acéto-diisobutylacétate.* Ger., *Acetatdiisobutylacetat.* A salt of acetoacetic acid in which 2 molecules of isobutyl (C_4H_9) replace 2 atoms of hydrogen. [B.]

ACETOFORMIC ACID, n. A^{2}s''e^{2}t-o-fo^{2}rm'i^{2}k. From *acetic* and *formic.* Fr., *acide acéto-formique.* Ger., *Acetameisensäure.* It., *acido acetoformico.* Sp., *ácido acetofórmico.* Syn.: *pyroracemic* (or *pyruvic*) *acid.* A monobasic acid obtained by the distillation of glyceric acid; a liquid of the constitution $C_3H_4O_3 = CH_3.CO.COOH$, i. e., formic acid in which a molecule of acetyl replaces an atom of hydrogen. [B.]

ACETOFORMOBENZOIC ETHER, n. A^{2}s'''e^{2}t-o-fo^{2}rm''o-be^{2}n-zo'i^{2}k. From *acetic, formic,* and *benzoic.* Fr., *éther acéto-formobenzoïque* See FORMOBENZOIC ACID.

ACETOGLYCERAL, n. A^{2}s''e^{2}t-o-gli^{2}s'e^{2}r-a^{2}l. From *acetic* and *glyceral.* Fr., *acéto-glycéral.* Ger., *Acetoglyceral.* See GLYCERALS.

ACETOGLYCOLCHLORHYDRIN, n. A^{2}s'''e^{2}t-o-gli^{2}k''o^{2}l-klor-hi'dri^{2}n. From *acetic, glycol, chlorine,* and *hydrogen.* Fr., *acéto-glycolchlorhydrine.* Ger., *Acetoglycolchlorhydrin.* A body having the composition $C_4H_7ClO_2 = C_2H_4\Big\{ {OC_2H_3O. \atop Cl.}$ [B, 2.]

ACETOGLYCOLLATE, n. A^{2}s''e^{2}t-o-gli^{2}k'o^{2}l-at. From *acetic* and *glycollic.* Fr., *acéto-glycolate.* Ger., *Acetoglycolat.* A salt of acetoglycollic acid. [B.]

ACETOGLYCOLLIC ACID, n. A^{2}s''e^{2}t-o-gli^{2}k-o^{2}l'i^{2}k. Fr., *acide acéto-glycolique.* Ger., *Acetoglycolsäure.* A monobasic acid derived from glycollic acid by the substitution of acetyl (C_2H_3O) for hydrogen: $CH_2.O(C_2H_3O) - CO.OH = C_4H_6O_4$. [B, 4.]

ACETOGUANAMINE, n. A^{2}s''e^{2}t-o-gwa^{3}n'a^{2}m-i^{2}n. From *acetic* and *guanamine.* Fr., *acéto-guanamine.* Ger., *Acetoguanamin.* See METHYLGUANAMINE.

ACETOHYPOBROMOUS ANHYDRIDE, A. OXIDE, n's. A^{2}s''e^{2}t-o-hi'''po-bro'mu^{3}s. From *acetic* and *hypobromous.* Fr., *anhydride acéto-hypobromeux.* Ger., *Essigsäureunterbromigsäureanhydrid.* Acetate of bromine, a compound isomeric with monobromacetic acid: $C_2H_3BrO_2 = {C_2H_3O \atop Br}\Big\} O = CH_3.CO_2.Br$. [B, 2.]

ACETOHYPOCHLOROUS ANHYDRIDE, A. OXIDE, n's. A^{2}s''e^{2}t-o-hi'''po-klo'ru^{3}s. From *acetic* and *hypochlorous.* Fr., *anhydride acéto-hypochloreux.* Ger., *Essigsäureunterchlorigsäureanhydrid.* Acetate of chlorine, isomeric with monochloracetic acid: $C_2H_3ClO_2 = {C_2H_3O \atop Cl}\Big\} O = CH_3.COOCl$. A colorless liquid, which explodes when heated to 100° C. [B, 2, 4.]

ACETOHYPOIODOUS ANHYDRIDE, A. OXIDE, n's. A^{2}s''e^{2}t-o-hi'''po-i'o^{2}d-u^{3}s. From *acetic* and *hypoiodous.* Fr., *anhydride acéto-hypoiodeux.* Ger., *Essigsäureunterjodigsäureanhydrid.* Acetate of iodine. Two of them are known: *iodine monoacetate,* $C_2H_3IO_2 = {C_2H_3O \atop I}\Big\} O$; and *iodine triacetate,* $I.(C_2H_3O_2)_3$. [B, 2.]

ACETOIODIDE, n. A^{2}s''e^{2}t-o-i'o-di^{2}d. From *acetic* and *iodide.* Fr., *acéto-iodure.* Ger., *Acetjodür.* A compound consisting of the acetate and the iodide of the same radicle. [B.]

ACETOIODOUS ANHYDRIDE, n. A^{2}s''e^{2}t-o-i'o^{2}d-u^{3}s. From *acetic* and *iodous.* Fr., *anhydride acéto-iodeux.* Ger., *Essigsäurejodigsäureanhydrid.* Syn.: *triacetate of iodine.* An explosive compound, occurring under the form of readily deliquescing, colorless, prismatic crystals, having the composition $I.(O.C_2H_3O)_3$. [B, 4.]

ACETOKOMENAT (Ger.), n. A^3-tse^{2}t-o-ko-me^{2}n-a^{3}t'. See ACETOCOMENATE.

ACETOL, n. A^{2}s'et-o^{2}l. For deriv., see ACETONE and *-ol.** Fr., *acétol.* Ger., *Acetol.* It., *acetolo.* Sp., *acetol.* The alcohol of acetone, a body of agreeable odor, discovered by Emmerling, having the composition $C_3H_5O(OH) = CH_3CO.CH_2OH$, probably present in the distillate of the product obtained by heating glucose with caustic potash. [Emmerling and Toges, "Bericht d. dtsch. chem. Gesellsch.," xvi, p. 837 (B).]

ACÉTOL (Fr.), n. A^3-sa-tol. 1. Acetol. 2. A medicated vinegar. [B.]

ACETOLACTATE, n. A^{2}s''e^{2}t-o-la^{2}k'tat. Fr., *acéto-lactate.* Ger., *Acetolactat.* A salt of acetolactic acid. [B.]

ACETOLACTIC ACID, n. A^{2}s''e^{2}t-o-la^{2}k'ti^{2}k. From *acetic* and *lactic.* Fr., *acide acéto-lactique.* Ger., *Acetomilchsäure.* A syrupy monobasic acid: $CH_3. - CH(O.C_2H_3O). - COOH = C_5H_8O_4$. [B, 4.]

ACÉTOLAT (Fr.), n. A^3-sa-to-la^3. Lat., *acetolatum.* Ger., *Essigaufguss.* It., *acetolato.* Sp., *acetolado.* A preparation made by distilling vinegar with one or more aromatic vegetable substances. [Béral (A, 301, 348).]

ACÉTOLATURE (Fr.), n. A^3-sa-to-la^3-tu^{6}r. Lat., *acetolaturum.* Ger., *Essigauszug.* It., Sp., *acetolatura.* A preparation made by infusing or macerating a vegetable drug in vinegar; an acetous tincture. [Béral (A, 301, 348).]

ACÉTOLÉ (Fr.), n. A^3-sa-to-la. Lat., *acetoleum.* Ger., *Essigauflösung.* It., *acetoleto.* Syn.: *vinaigre médicinal* [Fr. Cod.]. A simple solution of a drug in vinegar. [Béral (A. 301, 348).]—**A. antiseptique, A. aromatique.** See ACETUM *antisepticum* and *aromaticum.*

ACETOLEUM (Lat.), n. n. A^{2}s(a^{3}k)-e^{2}t-o'le(le^2)-u^{3}m(u^{4}m). See ACÉTOLÉ.

ACETOLICUM (Lat.), n. n. A^{2}s(a^{3}k)-e^{2}t-o^{2}l'i^{2}k-u^{3}m(u^{4}m). See ACÉTOLIQUE.

ACÉTOLIQUE (Fr.), adj. and n. A^3-sa-to-lek. Lat., *acetolicum.* It., *acetolico.* Dissolved in vinegar; a general term for pharmaceutical preparations made with vinegar. [Béral (A, 301, 306).]

ACÉTOLOTIF (Fr.), n. A^3-sa-to-lo-tef. Lat., *acetolotivum.* Sp., *acetolotivo.* A medicated vinegar for external use. [Béral (A, 301, 306).]

ACETOLOTIVUM (Lat.), n. n. A^{2}s(a^{3}k)''e^{2}t-o-lo-ti(te)'vu^{3}m-(wu^{4}m). From *acetum,* vinegar, and *lavare* (perf. part., *lotus*), to bathe. See ACÉTOLOTIF.

ACETOLUIDE, n. A^{2}s-e^{2}t-o^{2}l'u^2-i^{2}d. From *acetic* and *tolyl.* See TOLYLACETAMIDE.

ACETOMALONATE, n. A^{2}s''e^{2}t-o-ma^{2}l'o^{2}n-at. Fr., *acéto-malonate.* Ger., *acetmalonsaures Salz.* A double salt of acetic and malonic acids. [B.]

ACÉTOMEL (Fr.), n. A^3-sa-to-me^{2}l. It., *acetomele.* Sp., *acetomiel.* An oxymel. [Béral (A, 301).]

ACÉTOMELLÉ (Fr.), n. A^3-sa-to-me^{2}l-a. Sp., *acetomelado.* A general name for oxymels. [Béral (A, 301, 306).]

ACETOMETER, n. A^{2}s-e^{2}t-o^{2}m'e^{2}t-u^{6}r. From *acetum,* vinegar, and μέτρον, a measure. Lat., *acetometrum.* Fr., *acétimètre, acétimètre.* Ger., *Essigmesser.* Sp., *acetímetro.* A hydrometer graduated for determining the strength of commercial acetic acid according to its density. [B, 2.]

ACETOMETRIC, adj. A^{2}s-e^{2}t-o-me^{2}t'ri^{2}k. Fr., *acétimétrique.* Pertaining to acetometry.

ACETOMETRY, n. A^{2}s-e^{2}t-o^{2}m'e^{2}t-ri^2. Fr., *acétimétrie.* The process of testing commercial acetic acid with the acetometer.

ACETOMILCHSÄURE (Ger.), n. A^3''tse^{2}t-o-mi^{2}lch^2'zoi-re^2. Acetolactic acid. [B.]

ACETOMONOBROMANILIDE, n. A^{2}s''e^{2}t-o-mo^{2}n'''o-brom-a^{2}n'i^{2}l-i^{2}d. For deriv., see ACETUM, *Mono-**, BROMINE, and ANILINE. Fr., *acéto-monobromanilide.* Ger., *Acetomonobromanilid.* Monobromophenylacetamide (*q. v.,* under BROMOPHENYLACETAMIDES). [B.]

ACETON (Ger.), n. A^3-tse^{2}t-on'. Acetone.

ACETONÆMIA (Lat.), n. f. A^{2}s(a^{3}k)''e^{2}t-on-e'(a^3'e^2)-mi^2-a^3. From *acetonum,* acetone, and αἷμα, blood. Fr., *acétonémie.* Ger., *Acetonämie.* It., Sp., *acetonemia.* A morbid condition imputed to the presence of acetone in the blood. It is marked by a peculiar odor of the breath and urine and by various derangements of the nervous system; and has been thought to be the cause of diabetic coma. According to Saundby, the acetone breaks up the blood-corpuscles. [D, 3, 35.]

ACETONAMINES, n. pl. A^{2}s-e^{2}t-o^{2}n'(o^{2}n)-a^{2}m(a^{2}m')-i^{2}nz. For deriv., see ACETUM and AMINE. Fr., *acétonamines.* Ger., *Acetonamine.* It., *acetonamine.* Sp., *acetonaminas.* A series of substances acting as bases, produced by the action of ammonia on acetone. The following are known: *Diacetonamine,* or *diacetonhydramine,* $C_6H_{13}NO = 2C_3H_6O + NH_3 - H_2O$; *triacetonamine,* or *triacetonhydramine,* $C_9H_{17}NO = 3C_3H_6O + NH_3 - 2H_2O$ (of which compound there is one uncrystallizable isomer, called *isotriacetonamine*); *dehydrotriacetonamine* (the *acetonine* of Heintz, and the *triacetonamine* of Sokoloff and Tatschinoff), $C_9H_{15}N = C_9H_{17}NO - H_2O$; *dehydropentacetonamine,* $C_{15}H_{23}N = 5C_3H_6O + NH_3 - 5H_2O$. [B, 2.]

ACETONAPHTHYLAMIDE, n. A^{2}s''e^{2}t-o-na^{2}p-thi^{2}l'a^{2}m-i^{2}d. From *acetic, naphthyl,* and *amide.* Fr., *acéto-naphthylamide.* Ger., *Acetonaphthylamid.* See NAPHTHYLAMIDE.

ACETONATE, n. A^{2}s-e^{2}t'o^{2}n-at. Fr., *acétonate.* Ger., *Acetonat.* It., Sp., *acetonato.* A salt of acetonic acid.

ACETONE, n. A^{2}s'e^{2}t-on. Lat., *acetonum.* Fr., *acétone.* Ger., *Aceton.* It., *acetone.* Sp., *acetona.* Syn.: *pyroacetic spirit, acetylmethyl, dimethyl ketone.* A colorless, mobile liquid, of pleasant odor, produced by the destructive distillation of acetates (whence

the name *pyroacetic spirit*), and of sugar, cellulose, and various organic compounds: $C_3H_6O = C_2H_3O.CH_3 = CH_3 : CO : CH_3$. [B, 4.] It has been found in small quantities in normal urine. [Von Jaksch, "Ztschr. f. phys. Chem.," vi, p. 541 (B).] A feeble anæsthetic action has been attributed to it. [N. Guéneau de Mussy, "Bull. gén. de thérap.," May 30, 1882, p. 404.] Circulating in the blood, it gives rise to acetonæmia. The word is also used in a generic sense as synonymous with *ketone* (*q. v.*). [B.]—**A. alcohol.** See Acetol.—**A. series.** See Ketone.

ACETONECYANHYDRINS, n. pl. A²s″e²t-on-si‴a²n-hi′-dri²nz. From *acetone*, *cyanogen*, and *hydrogen*. Compounds of acetone with hydrocyanic acid. The following are known: *Acetonecyanhydrin*, $C_4H_7NO = C_3H_6O.CNH$; *diacetonecyanhydrin*, $C_7H_{13}NO_2 = 2(C_3H_6O).CNH$; *monochloracetonecyanhydrin*, $C_4H_6ClON = C_3H_5ClO.CNH$; *tetrachlordiacetonecyanhydrin*, $C_7H_9Cl_4NO_2 = C_3H_6O.C_3H_2Cl_4O.CNH$. [B, 2.]

ACÉTONÉMIE (Fr.), n. A³-sa-to-na-me. Acetonæmia.

ACETONESULPHONIC ACID, n. A²s″e²t-on-su³l-fo²n′i²k. Fr., *acide acétone-sulfonique*. Ger., *Acetonsulfonsäure*. An acid, $C_3H_6SO_4 = CO\left\{\begin{matrix}CH_3\\CH_2(SO_3H)\end{matrix}\right.$, formed by the action of alkaline sulphites on dichloracetin. [B, 2.]

ACETONIC ACID, n. A²s-e²t-o²n′i²k. Fr., *acide acétonique*. Ger., *Acetonsäure*. Butyl lactic acid (*q. v.*), so called because it may be regarded as acetone in which hydroxyl and the acid characteristic CO.OH replace an atom of oxygen: $(CH_3)_2 = C(OH).COOH$. [B, 4.]

ACETONINE, n. A²s-e²t′o²n-i²n. Fr., *acétonine*. Ger., *Acetonin*. 1. Dehydrotriacetonamine (*q. v.* under Acetonamines). 2. A substance produced by the action of ammonia on acetone, incorrectly supposed by Städeler to have the composition $C_9H_{18}N_2$. [B, 2.]

ACETONITRATE, n. A²s″e²t-o-ni′trat. From *acetic* and *nitrate*. Fr., *acéto-nitrate*, *acéto-azotate*. Ger., *Acetonitrat*. A double salt of acetic and nitric acids. [B, 2.]

ACETONITRILE, n. A²s″e²t-o-ni′tri²l. From *acetic* and *nitrile*. Fr., *acéto-nitrile*. Ger., *Acetonitril*. It., *acetonitrilo*. Sp., *acetonitrilo*. Syn.: *cyanide of methyl*. A colorless, inflammable liquid, $(C_2H_3)'''.N$, or $(CH_3)'.CN$; a substitution compound of nitrile, NO_2, in which a molecule of ethenyl (formerly called acetyl), C_2H_3, replaces the double oxygen atom. It has an agreeable odor, and boils at 82° C. It is obtained by treating acetate of ammonium or acetamide with phosphoric anhydride. [B, 2.]

ACETONITROSE, n. A²s″e²t-o-ni′tros. Fr., *acéto-nitrose*. Ger., *Acetonitrose*. A crystalline substance, $C_6H_7(NO_3)(C_2H_3O)_4O_5$, prepared by the action of concentrated nitric acid on acetochlorhydrose. [B, 3.]

ACÉTONOMIE (Fr.), n. A³-sa-to-no-me. Acetonæmia.

ACETONSÄURE (Ger.), n. A³-tse²t-on′zoi″re². Acetonic acid.

ACETONSULFONSÄURE (Ger.), n. A³-tse²t-on″sul-fon′zoi-re². Acetonesulphonic acid.

ACETONUM (Lat.), n. n. A²s(a³k)-e²t-o′nu³m(nu⁴m). Acetone.

ACETONURAMIC ACID, n. A²s″e²t-o²n-u²-ra²m′i²k. From *acetone*, *urea*, and *amine*. Fr., *acide acétone-uramique*. Ger., *Acetonuraminsäure*. A monobasic acid, $C_5H_{10}N_2O_3 = (CH_3)_2 = C(NH.CO.NH_2) - COOH$. [B, 4.]

ACETONURIA, n. A²s″e²t-on-u²′ri²-a³. From *acetone*, and οὖρον, urine. Fr., *acétonurie*. Ger., *Acetonurie*. It., Sp., *acetonuria*. The occurrence of acetone in the urine in abnormal amount. [R. v. Jaksch (A, 319).]

ACETONYL, n. A²s-e²t′o²n-i²l. For deriv., see Acetone and *-yl*.* Fr., *acétonyle*. Ger., *Acetonyl*. The radicle of acetone; a univalent radicle derived from acetone by the removal of one atom of hydrogen: $CH'_2 - CO - CH_3$. [B.]—**A'chinolin** (Ger.). See *A'quinoline*.—**A'harnstoff** (Ger.). See *A'urea*.—**A'quinoline.** Fr., *acétonylquinoléine*. Ger., *A'chinolin*. A substitution product of quinoline occurring under the form of golden-yellow acicular crystals, of the constitution $C_9H_6N(CH_2.CO.CH_3) = C_6(—,H,H,H,H,—)N(CH_2.CO.CH_3,H,H.)C_3$. [B, 79.]—**A'urea.** Fr., *acétonylurée*. Ger., *A'harnstoff*. A crystalline body, $C_6H_8N_2O_2 = CO.N_2H_2.CO.C.(CH_3)_2$, formed by the union of single molecules of acetone, hydrocyanic acid, and cyanic acid. It may be regarded as a urea in which 2 atoms of hydrogen are replaced by the acetonic-acid residue $CO.C(CH_3)_2$. [B, 2.]

ACETONYLURAMIC ACID, n. A²s-e²t″on-i²l-u²-ra²m′i²k. From *acetonyl* and *uramic*. Fr., *acide acétonyl-uramique*. Ger., *Acetonyluraminsäure*. See Acetonuramic acid.

ACETOORTHOSILICIC ANHYDRIDE, n. A²s″e²t-o-o²r‴-tho-si²l-i²s′i²k. For deriv., see Acetic, *Ortho-**, and Silicic. Fr., *anhydride acéto-orthosilicique*. Ger., *Orthosiliciumessigsäureanhydrid*. Syn.: *tetracetate of silicon*. A body occurring in prismatic crystals: $Si.(O.C_2H_3O)_4$. [B, 4.]

ACETOPHENONE, n. A²s″et-o-fe²n-on′. From *acetic* and *phenone*. Fr., *acéto-phénone*. Ger., *Acetophenon*. Syn.: *phenylmethylketone*. A body having the composition $C_6H_5CO.CH_3$. [B, 2.] See Phenylmethyl ketone and Hypnone.

ACETOPHENONIC ALCOHOL, n. A²s″et-o-fe²n-o²n′i²k. Fr., *alcool acéto-phénonique*. Ger., *Acetophenonalkohol*. Secondary phenylethyl alcohol, $C_6H_5.CH.(OH).CH_3$. [B, 2.]

ACETOPHENONINE, n. A²s″e²t-o-fe²n′o²n-i²n. From *acetic* and *phenone*. Fr., *acéto-phénonine*. Ger., *Acetophenonin*. A base produced by the action of dry ammonia on boiling acetophenone: $C_{24}H_{19}N$, or $C_{48}H_{38}N_2$. [B, 2.]

ACETOPHOSPHORIC ACID, n. A²s″e²t-o-fo²s-fo²r′i²k. From *acetic* and *phosphoric*. See Acetylphosphoric acid.

ACETOPIPERIDINE, n. A²s″e²t-o-pi-pe²r′i²d-i²n. See Piperidine.

ACETOPROPIONATE, n. A²s″e²t-o-pro-pi′o²n-at. From *acetic* and *propionic*. Fr., *acéto-propionate*. Ger., *Acetopropionat*. A salt of aceto-propionic acid. The a's have the general formula $R_n(C_5H_7O_3)_n$, in which R_n is a radicle of the quantivalence *n*. [B.]

ACETOPROPIONIC ACID, n. A²s″e²t-o-pro-pi²-o²n′i²k. From *acetic* and *propionic*. Fr., *acide acéto-propionique*. Ger., *Acetopropionsäure*. A monobasic acid, $CH_3CO - CH_2.CH_2.COOH = C_5H_8O_3$, being propionic acid with an atom of its hydrogen replaced by a molecule of acetyl. [B, 4.]

ACETOPYROPHOSPHORIC ACID, n. A²s″e²t-o-pi‴ro-fo²s-fo²r′i²k. For deriv., see Acetic, *Pyro-**, and Phosphoric. Fr., *acide acéto-pyrophosphorique*. Ger., *Acetopyrophosphorsäure*. See Acetylpyrophosphoric Acid.

ACETOPYROPHOSPHOROUS ACID, n. A²s″e²t-o-pi‴ro-fo²s′fo²r-u³s. From *acetic* and *pyrophosphorous*. Fr., *acide acéto-pyrophosphoreux*. Ger., *acetopyrophosphorige Säure*. Pyrophosphorous acid in which the radicle of acetic acid has replaced a molecule of hydroxyl: $(C_2H_3O_2)(OH)_3P_2.O = C_2H_6P_2O_6$. [B, 4.]

ACETOSA (Lat.), n. f. A²s(a³k)-e²t-o′sa³. From *acetosus*, sour. Gr., ὀξαλίς, ὀξυλάπαθον (1st def.). Fr., *oseille* (1st def.). Ger., *Sauerampfer* (1st def.). It., Sp., *acetosa*. 1. A sub-genus of plants belonging to the genus *Rumex*, comprising those of which the flowers, often diœcious or polygamous, are distinguished by the absence of tubercles upon the perianth, and by the adherence of the styles, which bear multifid stigmas, to the angles of the ovary. [B, 19.] 2. A spring in Rome, containing carbonate of calcium. [A, 319.]—**A. alpina.** See Rumex *alpinus*.—**A. arvensis.** See Rumex *acetosa*.—**A. esurina.** An old synonym of spiritus æruginis. [A, 325.] See Acetum *esurinum*.—**A. nostras, A. officinalis, A. oxalidis, A. pratensis.** See Rumex *acetosa*.—**A. romana, A. rotundifolia, A. rotundifolia hortensis, A. scutata.** See Rumex *scutatus*.—**A. vulgaris.** See Rumex *acetosa*.—**Ptisana de a. composita** [Fr. Cod.]. See *Tisane d'* oseille *composée*.

ACETOSALICYLIC ACID, n. Fr., *acide acéto-salicylique*. Ger., *Acetatsalicylsäure*. Acetate of salicylic acid, a monobasic crystalline acid, $C_6(H,H,H,H,O.C_2H_3O,CO.OH,) = C_9H_8O_4$. [B, 4.]

ACETOSALICYLIC ANHYDRIDE, n. A²s″e²t-o-sa²l-i²-si²l′i²k. From *acetic* and *salicylic*. Fr., *anhydride acéto-salicylique*. Ger., *Salicylessigsäureanhydrid*. Acetate of salicyl, $C_2H_3O.C_7H_5O_2.O$. [B, 2.]

ACÉTOSAMINE (Fr.), n. A³-sa-tos-a³-men. Diethylenediamine. [B.]

ACETOSE, adj. A²s′e²t-os. See Acetous.

ACETOSELLA (Lat.), n. f. A²s(a³k)-e²t-o-se²l′la³. The wood-sorrel. See Oxalis *a*.—**Sal acetosellæ.** See *Salt of* sorrel.

ACÉTOSELLÉ (Fr.), adj. A³-sa-to-se²l-la. Having the taste of, or resembling, sorrel. [A, 306.]

ACETOSITY, n. A²s-e²t-o²s′i²t-i². Fr., *acétosité*. Sp., *acetosidad*. The state of being acetous. [A, 306.]

ACETOSODACETATE, n. A²s″e²t-o-sod-a²s′e²t-at. From *acetic*, *sodium*, and *acetate*. Fr., *acéto-sodacétate*. Ger., *Natracetessigsaures Salz*. An acetoacetate in which an atom of sodium replaces an atom of hydrogen. [B.]

ACETOSODETHYLACETATE, n. A²s‴e²t-o-sod-e²th′i²l-a²s′e²t-at. Fr., *acéto-sodéthylacétate*. Ger., *-natracetessigester* (preceded by the name of a base). An acetoacetate in which an atom of sodium and a molecule of ethyl replace 2 atoms of hydrogen. [B.]

ACETOSUCCINATE, n. A²s″e²t-o-su³k′si²n-at. From *acetic* and *succinate*. Fr., *acéto-succinate*. Ger., *acetobernsteinsaures Salz*. A double salt of acetic and succinic acids. Such salts differ in the number of molecules of the acetic- or succinic-acid radicle which they contain. [B, 3.]

ACETOSULPHIDE, n. A²s″e²t-o-su³l′fi²d. From *acetic* and *sulphide*. Fr., *acéto-sulfure*. Ger., *Acetosulfür*. A double salt consisting of an acetate and a sulphide of the same base. [B.]

ACETOSULPHURIC ACID, n. A²s″e²t-o-su³l-fu²′ri²k. From *acetic* and *sulphuric*. See Thiacetylenic acid.

ACETOSUS (Lat.), adj. A²s(a³k)-e²t-o′su³s(su⁴s). Acetous.

ACETOSYL, n. A²s-e²t′o-si²l. Gerhardt's name for acetyl (*q. v.*). [B, 2.]

ACETOTARTARIC ACID, n. A²s″e²t-o-ta³r-ta³r′i²k. From *acetic* and *tartaric*. Fr., *acide acéto-tartrique*. Ger., *Acetoweinsäure*. An acid having the composition of tartaric acid in which a molecule of acetyl replaces an atom of hydrogen in one or both of the hydroxyl molecules of the acid radicle. The formulæ are: *Monacetotartaric acid*, $C_2H_2\begin{matrix}\diagup(OH).COOH\\\diagdown(C_2H_3O_2).COOH\end{matrix} = C_6H_8O_6$; *diacetotartaric acid*, $C_2H_2\begin{matrix}\diagup(C_2H_3O_2).COOH\\\diagdown(C_2H_3O_2).CO.OH\end{matrix} = C_8H_{10}O_8$. [B, 4.]

ACETOTOLUIDE, n. A²s″e²t-o-to²l′u²-i²d. From *acetic* and *toluene*. See Tolylacetamide.

ACETOTRIBROMANILIDE, n. A²s″e²t-o-tri‴brom-a²n′i²l-i²d. For deriv., see Acetum, *Tri-**, Bromine, and Aniline. Syn.: *tribromophenylacetamide*. See Bromophenylacetamides.

ACETOUS, adj. A²s′e²t-u³s. Lat., *acetosus*. Fr., *acéteux*. Ger., *essigt*, *essigsauer*. It., Sp., *acetoso*. Relating to vinegar or its formation. [B.]—**A. acid.** Lat., *acidum acetosum*. Fr., *acide acéteux*. Ger., *Essigsäure*. It., *acido acetoso*. Sp., *ácido acetoso*. Vinegar or dilute acetic acid; formerly so called because it was supposed to be a definite compound less highly oxygenated than acetic acid. Its salts were called *acetites*. [B, 39.]

ACETOWEINSÄURE (Ger.), n. A^3″tse^{2}t-o-vin′zoi-re^2. Acetotartaric acid.

ACETOXACETIC ACID, n. A^{2}s″e^{2}t-o^{2}x‴a^{2}s-e^{2}t′i^{2}k. For deriv., see *Oxy-** and ACETIC. Acetoglycollic acid. [B.]

ACETOXYBENZAMIC ACID, n. A^{2}s″e^{2}t-o^{2}x‴i^2-be^{2}n-za^{2}m′i^{2}k. From *acetic* and *oxybenzamic*. See OXYBENZAMIC ACID.

ACETOXYCHINOLIN (Ger.), n. A^3-tse^{2}t-o^{2}x-u^6-ch^{2}i^{2}n-o-len′. Acetoxyquinoline.

ACETOXYL, n. A^{2}s-e^{2}t-o^{2}x′i^{2}l. For deriv., see ACETIC, OXYGEN, and *-yl.** Fr., *acétoxyle*. Ger., *Acetoxyl*. Kolbe's name for acetyl, from its being supposed to be an oxide of what was formerly regarded as acetyl. [B, 2.]—**A'amid** (Ger.), n. Acetamide. [B.]—**A'harnstoff** (Ger.), n. Acetylurea [B.]—**A'hydrat** (Ger.), n. Hydrate of a. (acetic acid). [B.]—**A'isocyanür** (Ger.), n. Isocyanide of acetyl. [B.]—**A'thioharnstoff** (Ger.), n. Acetylthiourea. [B.]

ACETOXYLIDE, n. A^{2}s″e^{2}t-o-zi′li^{2}d. From *acetic* and *xylyl*. Fr., *acétoxylide*. Ger., *Acetoxylid*. See XYLYLACETAMIDE.

ACETOXYQUINOLINE, n. A^{2}s″e^{2}t-o^{2}x‴i^{2}qui^{2}n′o-li^{2}n. From *acetic*, *oxygen*, and *quinoline*. Fr., *acétoxyquinoléine*. Ger., *Acetoxychinolin*. A substitution product of oxyquinoline in which a molecule of acetyl replaces an atom of hydrogen: $C_9H_8O(CH_3.CO)N$. Two isomeric bodies of this formula are known: *ortho-a.*, $C_6(-,H,H,H,O.CH_3CO,-)N(H,H,H)C_3$, a yellowish oily liquid, boiling at 280° C.; and *para-a.*, $C_6(-,H,O.CH_3.CO,H,H,-)N(H,H,H)C_3$, a substance forming colorless crystals melting at from 36 to 38° C. [B, 79.]

ACETOYL, n. A^{2}s-e^{2}t′o-i^{2}l. Acetyl.

ACETULMIC ACID, n. A^{2}s″e^{2}t-u^{3}l′mi^{2}k. From *acetum*, vinegar, and *ulmus*, elm. Fr., *acide acétulmique*. An acid of the constitution $C_7H_{12}O_2$. [B, 2.]

ACETUM (Lat.), n. n. A^{2}s(a^{3}k)-e(a)′tu^{3}m(tu^{4}m). From *acere*, to turn sour (*vinum acetum* = wine that has turned sour). Gr., ὄξος, ὀξείδιον. Fr., *vinaigre*. Ger., *Essig*. It., *aceto*. Sp., *vinagre*. 1. Vinegar. 2. A pharmaceutical preparation made with vinegar. [B.]—**A. acerrimum, A. acetosum.** Old terms for distilled vinegar. [A, 344.]—**A. alcalisatum.** An old term for normal acetate of potassium.—**A. antihystericum.** Ger., *Mutteressig*. 1. An old mixture containing spirit of *convallaria maialis*, 2 oz.; vinegar of rue, 1 oz.; tincture of castoreum, 1 dr.; oil of lavender, 2 dr. [Ludovicus (B, 48).] 2. An acetous preparation of rue, elderberries, sagapenum, galbanum, peucedanum, castoreum, asafœtida, etc. [Mynsicht (B, 57).]—**A. antilyssicum.** An old acetous infusion containing chiefly southernwood, betony, and sage. [Hannemann (B, 57).]—**A. antimephiticum maravillianum.** Ger., *Pestessig*. A preparation consisting of 1 oz. of garlic juice, and 2½ oz., each, of camphor and chloride of ammonium, dissolved in 50 lbs. of vinegar. [B, 48.]—**A. antisepticum** [Fr. Cod.], **A. aromaticum** [Fr. Cod., Ger. Ph.], **A. bezoardicum.** Fr., *vinaigre antiseptique* (ou *aromatique*, ou *des quatre voleurs*, ou *de Marseille*). Ger., *aromatischer Essig* [Ger. Ph.], *Giftessig*, *Pestessig*, *Vierräuberessig*. It., *aceto antipestilenziale* (o *aromatico*, o *profilattico*, o *bezoardico*). Syn.: *a. quatuor furum* (seu *latronum*). Thieves' vinegar, vinegar of the four thieves; so called from the story of its having been used as a preventive of the plague by four men who, under pretense of nursing and succoring the sick in the great Marseilles epidemic of 1720–1721, robbed the sick, the dying, and the dead, and themselves escaped unharmed. One of them, having been afterward captured, was pardoned on condition of his divulging the composition of the vinegar. The original formula directed that 1½ oz., each, of wormwood tops, rosemary, sage, mint, and rue, 2 oz. of dried lavender flowers, and 2 dr., each, of garlic, sweet flag, cinnamon, cloves, and nutmeg be macerated for 12 days in 8 lbs. of the best vinegar. To the liquid, expressed and filtered, was added ½ oz. of camphor dissolved in alcohol. The *a. antisepticum* of the Fr. Cod. is prepared after the following formula: Wormwood tops (*Artemisia absinthium*), Roman-wormwood tops (*Artemisia pontica*), peppermint, rosemary, rue, sage, lavender flowers, each 15 parts; sweet-flag root, Ceylon cinnamon, cloves, nutmeg, garlic, each, 2 parts; camphor, 4 parts; glacial acetic acid, 15 parts; white vinegar, 1,000 parts. Macerate the vegetable drugs in the vinegar, in a closed vessel, for ten days; express; add the camphor, dissolved in the acetic acid; and, after a few hours, filter. The *a. aromaticum* of the Fr. Cod. consists of a filtered mixture of 125 parts of *alcoolature vulnéraire* (*q. v.*) and 875 parts of white vinegar. The *a. aromaticum* of the Ger. Ph. is made by dissolving 1 part, each, of the oils of lavender, peppermint, rosemary, juniper, and cinnamon, and 2 parts, each, of oil of lemon and oil of cloves, in 300 parts of alcohol, and adding 480 parts of acetic acid and 1,200 parts of water. The term *a. bezoardicum* (see BEZOAR) has been applied to various preparations consisting of aromatics infused in vinegar and employed as antidotes to the plague. [A, 253, 306; B.]—**A. britannicum.** Fr., *vinaigre anglais*. 1. Malt vinegar. 2. (Fr. Cod.) a preparation consisting of 1,000 parts of glacial acetic acid, 100 parts of camphor, 2 parts, each, of oil of cinnamon and oil of cloves, and 1 part of oil of lavender. [A, 253; B.]—**A. camphoratum** [Fr. Cod.]. Fr., *vinaigre camphré* (ou *camphoraté*), *acétolé de camphre*. Ger., *Kampheressig*. It., *aceto canforato*. Sp., *vinagre alcanforado*. Camphorated vinegar; made by powdering 25 parts of camphor, with the aid of the same quantity of glacial acetic acid, and gradually adding 950 parts of white vinegar, keeping the mixture in a tightly closed bottle until solution is complete, and then filtering. [A, 253].—**A. cardiacum.** See *A. aromaticum*.—**A. cerevisiæ.** Vinegar. [A, 316.]—**A. chalybeatum.** Ger., *Stahlessig*. Chalybeate vinegar; a solution of iron in vinegar or in acetic acid. [B.] See *Tinctura* FERRI *acetatis*.—**A. chymicorum metallicum.** An old term for a hydromel containing antimony. [A, 325.]—**A. commune.** Vinegar. [A, 316.]—**A. concentratum.** Fr., *vinaigre concentré*. Ger., *concentrirter Essig*. Concentrated vinegar, acetic acid. [B.]—**A. contra pestem.** "Vinegar against the plague"; an old preparation containing wormwood, sage, rue, and turpeth. [B, 89.] Cf. *A. antisepticum*.—**A. crudum.** Crude, or commercial, vinegar.—**A. destillatum.** Fr., *vinaigre distillé*. Ger., *destillirter Essig*. It., *aceto distillato* (o *bianco*). Sp., *vinagre destilado*. Distilled vinegar. [B.]—**A. diaphoreticum Mynsichti.** Mynsicht's diaphoretic vinegar; an old preparation made by bruising together 1 oz., each, of sarsaparilla root and *Smilax china*, 6 dr. of sassafras wood, ½ oz. of elder-flowers, 2 dr. of cassia wood, and a sufficient quantity of distilled wine vinegar. [B, 57.]—**A. emeticum.** Lémery's name for acetate of antimony. [A, 344.]—**A. empyreumaticum.** Wood vinegar. See PYROLIGNEOUS ACID.—**A. esurinum.** Syn.: *acetosa esurina*, *spiritus æruginis*. Lit., "hungry vinegar" (*esurire*, to be hungry), from its creating an appetite; an old preparation made by distilling vinegar and verdigris. [A, 325, 343, 344.]—**A. gallicum.** French, or wine, vinegar. [B.]—**A. glaciale.** Glacial acetic acid. [A, 344.]—**A. lenitivum Prævotii.** Prevost's lenitive vinegar; an old preparation containing cream of tartar and cinnamon. [B, 89.]—**A. lignorum.** Wood vinegar. See PYROLIGNEOUS ACID.—**A. lithargyrites.** Vinegar of litharge; an old preparation, consisting of a solution of subacetate of lead, made by digesting 4 oz. of litharge in a pint of the strongest vinegar, over a sand-bath, for three days, with occasional agitation. Diluted, it was used as a lotion for burns, bruises, etc., and given internally as a hæmostatic, as a preventive of impending gangrene, and to cure cancers. [A, 336, 344.]—**A. medicatum.** Fr., *vinaigre médicinal*, *acétolé*. Ger., *medicinischer Essig*, *Arzneiessig*, *Kräuteressig*. It., *aceto medicinale*, *acetoleo*. Sp., *vinagre medicinal*. A medicated vinegar.—**A. mithridaticum.** Mithridatic vinegar; an old preparation containing a great number of aromatics. [Mynsicht (B, 57).] Cf. *A. antisepticum*.—**A. mulsum.** From *mulcere*, to sweeten. A mixture of vinegar and honey. [A, 312.]—**A. mulsum dulce.** See OXYGLUCUS.—**A. myrrhatum (Mynsichti).** Vinegar with myrrh; an old aromatic vinegar containing myrrh, used as a preventive of pestilential diseases. [B, 89.]—**A. odoratum.** A perfumed vinegar, mentioned in an old Wurtemberg dispensatory. [B, 57.]—**A. philosophicum, A. philosophorum.** Gr., ὕδωρ σοφῶν. Philosophers' vinegar; an alchemical preparation distilled from honey. [A, 323.] See also AQUA *mercurialis* and LAC *virginum*.—**A. plumbicum.** See *Liquor* PLUMBI *subacetatis*.—**A. prophylacticum.** See *A. antisepticum*.—**A. purificatum, A. purum.** Syn.: *a. destillatum*. Purified vinegar; the *acidum aceticum dilutum* of the U. S. Ph. [B.]—**A. purum concentratum.** Acetic acid.—**A. pyrolignosum.** Ger., *Holzessig*. Pyroligneous acid or wood vinegar.—**A. pyrolignosum crudum** [Ger. Ph.]. Ger., *roher Holzessig*. Crude pyroligneous acid.—**A. pyrolignosum rectificatum** [Ger. Ph.]. Ger., *rectificirter Holzessig*. Rectified pyroligneous acid.—**A. quatuor furum, A. quatuor latronum.** Four thieves' vinegar. See *A. antisepticum*.—**A. radicale, A. radicatum.** Fr., *vinaigre radical*. Ger., *Radikalessig*. It., *aceto radicale*. Sp., *vinagre radical*. See *Radical* VINEGAR.—**A. rhizoticum (Mynsichti).** Mynsicht's rhizotic vinegar, so called from its being made largely from roots; an old aromatic preparation used as a preventive and curative of pestilential diseases. [B, 89.]—**A. rosatum.** Fr., *vinaigre rosé*. Ger., *Rosenessig*. It., *aceto rosato*. An infusion of 1 part of red-rose petals in 12 parts of red vinegar; used in astringent injections. [A, 321.]—**A. saturni, A. saturninum.** Vinegar of lead. See *Liquor* PLUMBI *subacetatis*.—**A. scilliticum** [Fr. Cod.], **A. squilliticum.** See *A.* SCILLÆ.—**A. stillatum.** Distilled vinegar. [B.]—**A. theriacale.** A preparation containing vinegar and treacle. Mynsicht's treacle vinegar (*a. theriacale Mynsichti*) was made by digesting 1 oz. of Venice treacle; ½ oz., each, of elks' horns "spagyrically calcined," juniper berries, and seeds of *Carduus benedictus*; 2 dr., each, of vervain, scordium, and rue; 1½ dr., each, of red myrrh and citron peels; 1 dr., each, of the roots of tormentil and angelica, zedoary, and "butter bur."; ½ dr., each, of camphor, aloes-wood, and mace, in a sufficient quantity of marigold vinegar. [B, 89.]—**A. vini.** Wine vinegar.—**A. vini concentratum, A. vini radicale.** Acetic acid. [A, 344.]—**A. vomitorium Mynsichti.** Mynsicht's emetic vinegar; made from the roots of *Thapsia* and *Asarum* and the seeds of *Carthamus* and cinnamon, distilled with wine vinegar; formerly esteemed as "a sweet and gentle vomit." [B, 89.]—**A. zedoarticum Mynsichti.** Mynsicht's zedoartic vinegar; an old preparation containing zedoary; used against poisons and pestilential diseases. [B, 89.]—**Syrupus cum aceto** [Fr. Cod.]. See *Sirop de* VINAIGRE.—**Syrupus cum aceto rubi idæi** [Fr. Cod.]. See *Sirop de* VINAIGRE *framboisé*. For other preparations made with vinegar, see under the drugs that figure in their titles.

ACETUREID, ACETUREIDE, n. A^{2}s-e^{2}t-u^2′re-i^{2}d. See ACETYLUREA.

ACETURIC ACID, n. A^{2}s″e^{2}t-u^2′ri^{2}k. From *acetic* and *uric*. Fr., *acide acéturique*. Ger., *Acetursäure*. See *Acetyl* GLYCOCINE.

ACÉTURIDE (Fr.), n. A^3-sa-tu^6-red. Acetamide. [A, 324.]

ACETURSÄURE (Ger.), n. A^3-tse^{2}t-ur′zoi-re^2. Aceturic acid. See *Acetyl* GLYCOCINE.

ACETUS (Lat.), adj. A^{2}s(a^{3}k)-e(a)′tu^{3}s(tu^{4}s). See ACŒTUS.

ACETVANILLIC ACID, n. A^{2}s″e^{2}t-va^{2}n-i^{2}l′li^{2}k. From *acetic* and *vanillic*. Fr., *acide acéto-vanillique*. Ger., *Acetvanillin*. An acid produced artificially by the oxidation of aceteugenol, and capable of conversion into vanillin by treatment with caustic potash. Used as a source of vanillin. [B, 81.]

ACETYL, ACETYLE, n. A^{2}s′e^{2}t-i^{2}l. For deriv., see ACETUM and *-yl.** Fr., *acétyle*. Ger., *Acetyl*. It., *acetilo*. Syn.: *acetoyl*, *acetosyl* [Gerhardt], *acetoxyl* [Kolbe], *othyl*. A radicle (old formula, $C_4H_3O_2$; new formula, C_2H_3O), not yet isolated, but supposed to exist in acetic acid and its derivatives. Formerly the name was applied to a different radicle, C_2H_3, or C_4H_3 (old system). [B, 2.]—**A. acetate.** Acetic anhydride.—**A. chloride.** Acetic chloride.—**A. hydrate.** Fr., *hydrate d'acétyle*. Ger., *Acetoxylhydrat*. Acetic acid. [B.]—**A. hydride.** Acetic aldehyde.—**A. isocyanide.**

Fr., *isocyanide d'acétyle.* Ger., *Acetoxylisocyanür.* Syn.: *acetic isocyanide, cyanacetyl.* A liquid, $(C_2H_3O) - N \equiv C$, boiling at 93° C. There is a polymeric form which is a crystalline solid. [B, 4.]—**A. nitrides.** See ACETAMIDE, DIACETAMIDE, and ETHYLACETAMIDE.—**A. oxide.** Acetic anhydride.—**A. picrate.** Acetic picrate, $\left.\begin{matrix}C_2H_3O\\C_6H_2(NO_2)_3\end{matrix}\right\}O$; a yellowish-white crystalline powder. [B, 2.]—**A. sulphide, A. sulphydrate.** Acetic sulphide, thiacetic anhydride, $(C_2H_3O)_2.S$. [B, 2.]—**A. trihydrate.** Fr., *trihydrate d'acétyle.* Ger., *Acetyltrihydrat.* A liquid, $CH_3.C.(OH)_3 = C_2H_6O_3$, formed by adding water to acetic acid until the resulting liquid has a sp. gr. of 1·079.

ACETYLALDEHYD (Ger.), n. A^3-tse^{2}t-u^{6}l''a^{3}l-da-hed'. Acetic aldehyde.

ACETYLAMINE, n. A^{2}s-e^{2}t-i^{2}l'a^{2}m-i^{2}n. From *acetyl* and *amine.* Fr., *acétylamine, acétosamine.* Ger., *Acetylamin.* See DIETHYLENEDIAMINE.

ACETYLAMMONIUM, n. A^{2}s''e^{2}t-i^{2}l-a^{2}m-mo'ni^2-u^{3}m. From *acetyl* and *ammonium.* See AMMONIUM *aldehydate* and ALDEHYD-AMMONIA.

ACETYLAMYGDALANILIDE, n. A^{2}s''e^{2}t-i^{2}l-a^{2}m-i^{2}g'''da^{2}l-a^{2}n'i^{2}l-i^{2}d. For deriv., see ACETYL, AMYGDALIN, and ANILIDE. Fr., *acétylamygdalanilide.* Ger., *Acetylamygdalanilid.* A derivative formed from amygdalanilide by the substitution of one or more molecules of acetyl for hydroxyl. [B, 2.]

ACETYLAMYL, n A^{2}s''e^{2}t-i^{2}l-a^{2}m'i^{2}l. From *acetyl* and *amyl.* Fr., *acétylamyle.* Ger., *Acetylamyl.* An addition product of acetyl and amyl, $C_7H_{14}O = C_2H_3O.C_5H_{11}$. [B, 2.]

ACETYLANILINE, n. A^{2}s''e^{2}t-i^{2}l-a^{2}n'i^{2}l-i^{2}n. From *acetyl* and *aniline.* Fr., *acétylaniline.* Ger., *Acetylanilin.* A substance of alkaline reaction, produced by the action of Dutch liquid (ethylene dichloride) on aniline at a temperature of 200° C. [B, 38.]

ACETYLANTHRAFLAVIC ACID, n. A^{2}s''e^{2}t-i^{2}l-a^{2}n'''-thra^3-fla'vi^{2}k. From *acetyl* and *anthraflavic.* Fr., *acide acétyl-anthraflavique.* See DIACETOANTHRAFLAVIC ACID.

ACETYLBARBALOIN, n. A^{2}s''e^{2}t-i^{2}l-ba^{3}rb'''a^{2}l-o'i^{2}n. From *acetyl* and *barbaloin.* Fr., *acétyl-barbaloïne.* Ger., *Acetylbarbaloin.* A substitution compound of acetyl and barbaloin; a curdy, yellowish-white mass, to which the following formulæ have been assigned by different analysts: $C_{16}H_{15}(C_2H_3O)_3.O_7$; $C_{17}H_{15}(C_2H_3O)_3.O_7$; and $C_{16}H_{13}(C_2H_3O)_3.O_7$.

ACETYLBIOXYDAMID (Ger.), n. A^3-tse^{2}t-u^{6}l'''be-o^{2}x-u^{6}d''-a^{3}m-ed'. Acetamide.

ACETYLCARBERINS, n. pl. A^{2}s''e^{2}t-i^{2}l-ka^{3}rb'u^{5}r-i^{2}nz. From *acetyl* and *carberin.* Fr., *acétyl-carbérines.* Ger., *Acetylcarberine.* See CARBERINS.

ACETYLCHLORALAMMONIAS, n. pl. A^{2}s''e^{2}t-i^{2}l-klo'''-ra^{2}l-a^{2}m-mo'ni^2-a^{3}z. From *acetyl, chloral,* and *ammonia.* Bodies formed by the substitution of 1 or 2 molecules of acetyl for hydrogen in chloralammonia (trichlorethylidene hydramine). The two following are known: *Monoacetylchloralammonia,* $C_2H_3(C_2H_3O)Cl_3ON$; *diacetylchloralammonia,* $C_2H_2(C_2H_3O)_2Cl_3ON$. [B, 2.]

ACETYLDIAMINE, n. A^{2}s''e^{2}t-i^{2}l-di'a^{2}m-i^{2}n. From *acetyl* and *diamine.* See ACEDIAMINE.

ACETYLDIPHENYLAMINE, n. A^{2}s''e^{2}t-i^{2}l-di'''fe^{2}n-i^{2}l'a^{2}m-i^{2}n. For deriv., see ACETYL, *Di-**, and PHENYLAMINE. Fr., *acétyl-diphénylamine.* Ger., *Acetyldiphenylamin.* Diphenylamine with 1 atom of its hydrogen replaced by a molecule of acetyl: $C_{14}H_{13}ON = N(C_6H_5)_2(C_2H_3O)$. It acts as a base. [B, 2.]

ACETYLE, n. A^{2}s'e^{2}t-i^{2}l. Acetyl.

ACÉTYLE (Fr.), n. A^3-sa-tel. Acetyl.

ACETYLEN (Ger.), n. A^3-tse^{2}t-i^{2}l-e^{2}n'. Acetylene.—**A'dibromür, A'dichlorür, A'diiodür, A'dijodür, A'tetrabromür, A'tetrachlorür.** See ACETYLENE *dibromide, dichloride, diiodide, tetrabromide,* and *tetrachloride.*

ACETYLENE, n. A^{2}s-e^{2}t'i^{2}l-en. For deriv., see ACETYL and *-ene.** Fr., *acétylène.* Ger., *Acetylen, Aethin.* It., *acetilene.* Sp., *acetileno.* Syn.: *ethine.* A gaseous hydrocarbon, $C_2H_2 = CH \equiv CH$, and so having the same relation to the acetyl of the older writers (C_2H_3) that ethylene and methylene have to ethyl and methyl; a colorless, inflammable gas, of very disagreeable odor, which can be prepared by the direct synthesis of its elements in the electric arc. [B, 4.] It has various polymeric modifications, which are derived from it by the action of heat, such as: *diacetylene,* C_4H_4; *triacetylene,* or benzene, C_6H_6; *tetracetylene,* styrol, or cinnamene, C_8H_8; *pentacetylene,* or naphthalene hydride, $C_{10}H_{10}$; and *enneacetylene,* or retene, $C_{18}H_{18}$. [B, 2.]—**A. bromides.** These include the *dibromide,* the *tetrabromide,* and the *hydrobromide,* $C_2H_2.HBr$ (all of which are addition products); and one substitution product, *bromacetylene,* C_2HBr, with its dibromide, $C_2HBr.Br_2$. [B, 2.]—**A. bromiodide.** See *A. iodides.*—**A. chlorides.** These are the *dichloride,* $C_2H_2.Cl_2$; the *chlorinated dichloride,* $C_2HCl.Cl_2$; and the *tetrachloride,* $C_2H_2.Cl_4$. [B, 2.]—**A. dibromide.** Fr., *dibromure d'acétylène.* Ger., *Acetylendibromür.* A liquid having the constitution $CHBr = CHBr = C_2H_2Br_2$. [B, 4.]—**A. dichloride.** Fr., *dichlorure d'acétylène.* Ger., *Acetylendichlorür.* A colorless liquid, $CHCl = CHCl = C_2H_2Cl_2$, isomeric, and apparently identical, with dichlorethylene. [B, 4.]—**A. dihydriodide.** See *A. iodides.*—**A. diiodide.** Fr., *diiodure d'acétylène.* Ger., *Acetylendiiodür.* A crystalline solid, $CHI = CHI = C_2H_2I_2$. [B, 4.]—**A. iodides.** They include the *diiodide*; the *monohydriodide,* $C_2H_2.HI$; and the *dihydriodide,* $C_2H_2.(HI)_2$ (addition products); and the following substitution products: *iodoacetylene,* C_2HI; *diiodoacetylene,* $C_4H_2I_2$, the *tetraiodide,* $C_4H_2I_4 = C_2H_2.C_2I_4$, or $(C_4H_2I_2)I_2$; and the *bromiodide,* $C_4Br_3I_3 = (C_4Br_2I_2)IBr$, formed from the tetraiodide by substituting 2 atoms of bromine for 2 of hydrogen, and 1 of bromine for 1 of iodine. [B.]—**A.-hæmoglobin.** See under HÆMOGLOBIN.—**A. hydrobromide.** See *A. bromides.*—**A. monohydriodide.** See *A. iodides.*—**A. series.** See ALKYLIDENE *series.*—**A. tetrabromide.** Fr., *tétrabromure d'acétylène.* Ger., *Acetylentetrabromür.* A liquid having the constitution $CHBr_2 = CHBr_2 = C_2H_2Br_4$. [B, 4.]—**A. tetrachloride.** Fr., *tétrachlorure d'acétylène.* Ger., *Acetylentetrachlorür.* A colorless liquid, $CHCl_2 = CHCl_2 = C_2H_2Cl_4$, isomeric, and apparently identical, with dichlorethylene dichloride. [B, 4]—**A. tetraiodide.** Fr., *tétraiodure d'acétylène.* Ger., *Acetylentetraiodür.* See *A. iodides.*—**Chlorinated a. dichloride.** See *A. chlorides.*

ACETYLENETRIPHENYLTRIAMINE, n. A^{2}s-e^{2}t''i^{2}l-en-tri-fe^{2}n'''i^{2}l-tri'a^{2}m-i^{2}n. For deriv., see ACETYLENE, *Tri-**, PHENYL, and AMINE. Fr., *acétylènetriphénytriamine.* Ger., *Acetylentriphenyltriamin.* A crystalline body, $NC_6H_5 < \begin{matrix}CH - N(C_6H_5)H\\CH - N(C_6H_5)H\end{matrix}$, having the constitution of a triple molecule of ammonia in which 3 molecules of phenyl and 1 molecule of acetylene replace 7 atoms of hydrogen. [B.]

ACETYLFLAVENOL, n. A^{2}s''e^{2}t-i^{2}l-fla've^{2}n-o^{2}l. From *acetyl* and *flavenol.* Fr., *acétylflavénol.* Ger., *Acetylflavenol.* A substitution compound of flavenol in which a molecule of acetyl (CH_3CO) replaces an atom of hydrogen: $C_{17}H_{15}NO_2 = C_9H_5.C_6H_4O(CH_3CO).CH_3.N$. It forms long acicular crystals, melting at 128° C. [B, 79.]

ACETYLIA (Lat.), n. f. A^{2}s(a^{3}k)-e^{2}t-i^{2}l(u^{6}l)'i^2-a^3. An old term for diethylenediamine (acetylamine). [B, 7.]

ACETYLIAC, n. A^{2}s-e^{2}t-i^{2}l'i^2-a^{2}k. Fr., *acétyliaque.* A name given by Cloëz to a base which he obtained by the action of ammonia on ethylene dibromide, and to which he assigned the formula $N(C_2H_3)H_2$, i. e., that of ammonia with 1 atom of hydrogen replaced by acetyl (C_2H_3); probably the same as diethylene diamine or its hydrate. [B, 3.]

ACETYLIDE, n. A^{2}s-e^{2}t'i^{2}l-i^{2}d. From *acetylene.* Fr., *acétylure.* Ger., *Acetylid.* 1. A substitution compound of a metal with acetylene. Most of the a's are explosive when brought into contact with water. [B, 3.] 2. A name applied by Tommasi and Quesneville to a body having the constitution $C_{10}H_{18}O_4 = C_2H_3O(C_2H_2)_3O - C_2H_3O.(C_2H_2)_3O$. [B, 2.]

ACETYLITE, n. A^{2}s-e^{2}t'i^{2}l-it. Fr., *acétylite.* Ger., *Acetylit, aldehydsaures Salz.* A salt of acetylous acid. [B, 2.]

ACETYLMETHYL, n. A^{2}s''e^{2}t-i^{2}l-me^{2}th'i^{2}l. From *acetyl* and *methyl.* Fr., *acétylméthyle.* Ger., *Acetylmethyl.* See ACETONE.

ACETYLNAPHTHALIN, n. A^{2}s''e^{2}t-i^{2}l-na^{2}p(na^{2}f)'tha^{2}l-i^{2}n. From *acetyl* and *naphthalin.* Fr., *acétylnaphthaline.* Ger., *Acetylnaphthalin.* See ACENAPHTHENE.

ACETYLONAPHTHALENE, n. A^{2}s-et''i^{2}l-o-na^{2}p(na^{2}f)'tha^{2}l-en. From *acetyl* and *naphthalene.* Fr., *acétylonaphthalène.* Ger., *Acetylonaphthalen.* See ACENAPHTHENE.

ACETYLOUS ACID, n. A^{2}s-e^{2}t'i^{2}l-u^{3}s. From *acetyl.* Fr., *acide acétyleux.* Ger., *Aldehydsäure.* Syn.: *aldehydic* (or *etheric,* or *lampic*) *acid.* An acid supposed to be produced by the slow combustion of ether or of alcohol, or, under certain circumstances, by the oxidation of aldehyde. It has also been thought to be a mere mixture of aldehyde and acetic acid. [B, 2.]

ACETYLOXAMETHANE, n. A^{2}s''e^{2}t-i^{2}l-o^{2}x'''a^3-me^{2}th-an'. From *acetyl* and *oxamethane.* Fr., *acétyl-oxaméthane.* Ger., *Acetyloxamethan.* See OXAMETHANE.

ACETYLOXYD (Ger.), n. A^3-tse^{2}t-u^{6}l-o^{2}x'u^{6}d. Anhydrous acetic acid.—**A'hydrat.** Acetic acid. [B.]

ACETYLPHOSPHORIC ACID, n. A^{2}s''e^{2}t-i^{2}l-fo^{2}s-fo^{2}r'i^{2}k. From *acetyl* and *phosphoric.* Fr., *acide acétyl-phosphorique.* Ger., *Acetylphosphorsäure.* Syn.: *aceto-phosphoric acid.* A monobasic acid, $PO(O.C_2H_3O)_2.OH = C_4H_7PO_6$; being phosphoric acid in which 2 molecules of acetyl replace 2 atoms of hydrogen. [B, 38.]

ACETYLPIPERIDINE, n. A^{2}s''e^{2}t-i^{2}l-pi-pe^2'ri^{2}d-en. From *acetyl* and *piperidine.* Fr., *acétyl-pipéridine.* Ger., *Acetylpiperidin.* An artificial alkaloid, $C_5H_5N.H_5(CH_3CO) = C_7H_{13}NO$ = piperidine in which a molecule of acetyl (CH_3CO) replaces an atom of hydrogen; a liquid boiling at 224° C. [B, 79.]

ACETYLPYROPHOSPHORIC ACID, n. A^{2}s''e^{2}t-i^{2}l-pi'''-ro-fo^{2}s-fo^{2}r'i^{2}k. From *acetyl* and *pyrophosphoric.* Fr., *acide acétyl-pyrophosphorique.* Ger., *Acetylpyrophosphorsäure.* Syn.: *acetopyrophosphoric acid.* A tribasic acid $(C_2H_3O_2).(OH)_3P_2.O_3 = C_2H_6P_2O_8$, derived from pyrophosphoric acid by the replacement of hydroxyl by the radicle of acetic acid. [B, 4.]

ACETYLPYRROL, n. A^{2}s''e^{2}t-i^{2}l-pi^{2}r'ro^{2}l. From *acetyl* and *pyrrol.* Fr., *acetyl-pyrrol.* Ger., *Acetylpyrrol.* A liquid, of peculiar odor, $C_6H_7NO = C_4H_4.N(C_2H_3O)$; being pyrrol with 1 atom of its hydrogen (the one which is directly combined with the nitrogen) replaced by acetyl. [B, 3.] See also PSEUDOACETYLPYRROL.

ACETYLSÄURE (Ger.), n. A^3'tse^{2}t-u^{6}l-zoi-re^2. Acetic acid. [B.]

ACETYLSCHWEFELHARNSTOFF (Ger.), n. A^3''tse^{2}t-u^{6}l-shwa'''fe^{2}l-ha^{3}rn'sto^{2}f. Acetylthiourea.

ACETYLSULPHUREA, n. A^{2}s''e^{2}t-i^{2}l-su^{3}lf-u^2-re'a^3. From *acetyl, sulphur,* and *urea.* Fr., *acétyl-sulfurée.* Ger., *Acetylschwefelharnstoff.* See ACETYLTHIOUREA.

ACETYLTETRAHYDROQUINOLINE, n. A^{2}s''e^{2}t-il-te^{2}t'''-ra^3-hi''''dro-kwi^{2}n'o-len. From *acetyl* and *tetrahydroquinoline.* Fr., *acétyl-tétrahydroquinoléine.* Ger., *Acetyltetrahydrochinolin.* A colorless liquid, boiling at 295° C., having the constitution of tetrahydroquinoline in which 1 of the added hydrogen atoms is replaced by a molecule of acetyl: $C_9H_7N.H_3(CH_3CO) = C_{11}H_{13}NO$. [B, 79.]

ACETYLTHIOUREA, n. A^{2}s''e^{2}t-i^{2}l-thi'''o-u^2-re'a^3. From *acetyl* and *thiourea.* Fr., *acétyl-thio-urée.* Ger., *Acetoxylthioharnstoff.* Syn.: *acetylsulphurea.* A body occurring in the form

of prismatic crystals, consisting of thiourea (sulphurea) in which a molecule of acetyl replaces an atom of hydrogen: $CSN_2H_3(C_2H_3O) = C_3H_6N_2SO$. [B.]

ACETYLTRIETHYL ETHER, n. A^{2}s″e^{2}t-i^{2}l-tri‴e^{2}th′i^{2}l. From *acetyl* and *triethyl*. Fr., *éther acétyl-triéthylique*. Ger., *Acetyltriäthyläther*. See ETHYL *orthoacetate*.

ACÉTYLURE (Fr.), n. A^3-sa-ti^{2}l-u^{6}r. An acetylide. [B.]

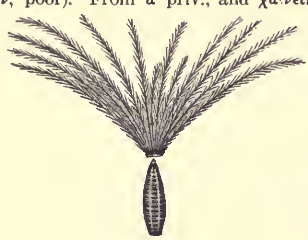
ACETYLUREA, n. A^{2}s″e^{2}t-i^{2}l-u^2-re′a^3. From *acetyl* and *urea*. Fr., *acétylurée*. Ger., *Acetoxylharnstoff*. A body occurring in the form of acicular crystals, consisting of urea in which an atom of hydrogen is replaced by a molecule of acetyl: $CON_2H_3\text{-}(C_2H_3O) = C_3O_2N_2H_6$. [B, 4.]

ACETYLURETHANE, n. A^{2}s″e^{2}t-i^{2}l-u^2-re^{2}th-an′. From *acetyl* and *urethane*. Fr., *acétyl-uréthane*. Ger., *Acetylurethan*. See URETHANE.

ACETYLWASSERSTOFF (Ger.), n. A^3″tse^{2}t-i^{2}l-va^{3}s′se^{2}r-sto^{3}f. Aldehyde.

ACETYLZANALOIN, n. A^{2}s″e^{2}t-i^{2}l-za^{2}n‴a^{2}l-o′i^{2}n. From *acetyl* and *zanaloin*. Fr., *acétyl-zanaloïne*. Ger., *Acetylzanaloin*. A substitution compound of acetyl and zanaloin; a yellow, amorphous mass having the formula (according to one view of the constitution of zanaloin) $C_{16}H_{16}.(C_2H_3O)_3.O_7$. [B, 2.]

ACEYTE (Sp.), n. A^3-tha′e-ta. See ACEITE.



ACHACANA (Sp.), n. A^3-cha^3-ka^3′na^3. A local name for one or more species of cactus of the genus *Cereus* [De Candolle], the root (or, according to some authors, the fruit) of which is eaten in Peru. [A, 321, 348.]

ACHÆMENIS (Lat.), n. f. A^{2}k(a^{3}ch^2)-e′(a^3′e^2)-me^{2}n-i^{2}s. Gr., ἀχαιμενίς. Gen., *achæmen′idos* (*-dis*). A fabulous plant of the ancients, the same as the ἱπποφοβάς (meaning fear of horses); regarded by Fée as a variety of *Euphorbia*, or else as a solanaceous plant. [A, 311, 312; Waring (A, 316).]

ACHÆNA (Lat.), n. f. A^{2}k(a^{3}ch^2)-e′(a^3′e^2)-na^3. See ACHÆNIUM.

ACHÆNE, n. A^3-ken′. See ACHÆNIUM.

ACHÆNIUM (Lat.), n. n. A^{2}k(a^{3}ch^2)-e′(a^3′e^2)-ni^2-u^{3}m(u^{4}m). Written also *achenium* (on the theory of its being derived from ἀχήν, poor). From α priv., and χαίνειν, to gape. [A, 347.] Fr.,

a b

achaine, *achène*, *akène*. Ger., *Achene*. It., *acheno*. In botany, an achene; a fruit consisting of a dry, indehiscent pericarp separated from the single seed which it contains. [B.] In the cut, *a* shows an a. with one ovary, and *b* one with several ovaries. [A, 304.]

ACHAHI, n. See ACAHI.

ACHAINA (Lat.), n. f. A^{2}k(a^{3}ch^2)-a(a^3)′i^{2}n-a^3. See ACHÆNIUM.

ACHAINE (Fr.), n. A^3-ke^{2}n. An achænium.—**A. aigretté.** One surmounted by an aigrette (*q. v.*).

ACHAINUM (Lat.), n. n. A^{2}k(a^{3}ch^2)-a(a^3)′i^{2}n-u^{3}m(u^{4}m). See ACHÆNIUM.

ACHALYBÆMIA, ACHALYBHÆMIA (Lat.), n. f. A^{2}k-(a^{3}ch^2)-a^{2}l(a^{3}l)-i^{2}b(u^{6}b)-e′(a^3′e^2)-mi^2-a^3, -he′(ha^3′e^2)-mi^2-a^3. From α priv., χάλυψ, steel, and αἷμα, blood. Fr., *achalybhémie*. It., *acalibemia*. Piorry's term for a deficiency of iron in the blood. [A, 250.]

ACHÆNOCARP, n. A^{2}k-e^{2}n′o-ka^{3}rp. From α priv., χαίνειν, to gape, and καρπός, a fruit. An achænium. [Gray, B, 39.]

ACHAMELLA (Lat.), n. f. A^{2}k(a^{3}ch^2)-a^3-me^{2}l′la^3. See ACMELLA.

ACHANACA, n. An African name for a plant the leaves and fruit of which are used by the natives of the kingdom of Mély as a sudorific in the treatment of venereal diseases. [Lémery (A, 344).]

ACHAOVAN, n. Written also *achoavan*. The Egyptian name of a plant, supposed to be a species of *Matricaria*, used in the treatment of jaundice. [A, 321.]—**A.-Abiat.** The name under which Prosper Alpinus speaks of a plant which grows about Cairo, used by the Egyptians in diseases of women; supposed to be the *Senecio cineraria* [De Candolle] (*Cineraria maritima* [Linnæus]). [A, 321.]

ACHAR, n. Written also *atchar*, *attchar*, *atsiaar*, *aichar*, *achard*, and *atschi*. Ger., *indischer Pökel*. A Malay name applied in India to a condiment made of various plants with vinegar, capsicum, and other aromatics. [A, 323.] In Europe the term is applied to various sorts of pickles. [A, 344.]

ACHARD, n. See ACHAR.

ACHARISTON, ACHARISTUM (Lat.), n. n. A^{2}k(a^{3}ch^2)-a^3-ri^{2}s′to^{2}n, -tu^{3}m(tu^{4}m). Neut. of adj. *acharistos* (*medicamentum* understood). Gr., (φάρμακον) ἀχάριστον (ἀχάριστος, thankless). In Galen's time, a certain antidote of very speedy action; in the middle ages, a medicine that cured so promptly as to be unprofitable to the physician—hence a thankless drug. [A, 322.]

ACHASCOPHYTE, n. A^{2}k-a^{2}s′ko-fit. From α priv., χάσκειν, to gape, and φυτόν, a plant. Fr., *achascophyte*. A plant of which the fruit is indehiscent. [Necker (A, 316).]

ACHATES (Lat.), n. m. and f. A^{2}k(a^{3}ch^2)-a(a^3)′tez(tas). Gr., ἀχάτης. The agate (so called from its having been first found in the Sicilian river of that name); anciently esteemed as an antidote to poisons, especially that of the viper. [A, 325, 348.]

ACHATINUS (Lat.), adj. A^{2}k(a^{3}ch^2)-a^{2}t(a^{3}t)-i(e)′nu^{3}s(nu^{4}s). Agate-like. See FAVUS *a.* [G.]

ACHATIUSQUELLE, ACHAZBAD, ACHAZQUELLE (Ger.), n's. A^3-ch^{2}a^{3}t′i^2-us-kwe^{2}l″le^2, a^3-ch^{2}a^{3}tz′ba^{3}d, -kwe^{2}l″le^2. St. Achatius's spring, in the town of Wasserburg, in Upper Bavaria; an earthy-alkaline spring. [A, 305.]

ACHE, v. intr. Ak. A.-S., *acan*. Gr., ἀχεῖν. Fr., *avoir mal*, *souffrir*. Ger., *schmerzen*. It., *dolere*. Sp., *doler*. To be affected with pain, especially steady pain (generally said of a part rather than of the individual).

ACHE, n. Ak. A.-S., *ace*, *æce*, *ece*. [A, 302.] Gr., ἄχος. Lat., *dolor*. Fr., *mal*. Ger., *Schmerz*. It., *male*. Sp., *dolor*, *mal*. (All these equivalents apply only to the 1st def.) 1. Pain, especially steady pain. 2. An old name for parsley. See PETROSELINUM.

ACHE (Fr.), n. A^{3}sh. The genus *Apium*, also several medicinal plants of that and other genera.—**A. céleri.** Celery (*Apium dulce*). [A. Richard (A, 331).]—**A. d'eau.** See SIUM *angustifolium*.—**A. de montagne.** See *A. des montagnes*.—**A. des chiens.** See ÆTHUSA *cynapium*.—**A. des marais.** Wild celery. See APIUM *graveolens*.—**A. des montagnes.** Lovage. See LEVISTICUM *officinale*.—**A. odorante.** *A des marais*.—**A.-persil.** Parsley. See PETROSELINUM.—**A. vulgaire.** A. des marais.

ACHEBONE, n. Ach′bo^{3}n. The hip-bone. [Wright (A, 258).] See *Os innominatum*.

ACHEEN (Hind.), n. See ACHIE-PATCHIE-ELLEY.

ACHEILARY, adj. A^{2}k-i′la^2-ri^2. From α priv., and χεῖλος, a lip. Lacking the lip of the corolla (said of certain orchids). [B, 39.]

ACHEILIA (Lat.), n. f. A^{2}k(a^{3}ch^2)-i′(e^2′i^2)-li^2-a^3. Fr., *achéilie*, *achilie*. Ger., *Achilie*, *Lippenmangel*. Syn.: *labiorum defectus*. A deformity consisting in partial or complete absence of the lips.

ACHEILOUS, adj. A^{2}k-i′lu^{3}s. Gr., ἄχειλος. Lat., *acheilus*. Affected with acheilia (*q. v.*).

ACHEILUS (Lat.), adj. A^{2}k(a^{3}ch^2)-i′(e^2′i^2)-lu^{3}s(lu^{4}s). Acheilous; as a n., an acheilous individual.

ACHEIR (Lat.), adj. A^{2}k(a^{3}ch^2)′ir(e^2-i^{2}r). Gr., ἄχειρ (from α priv., and χείρ, the hand). Fr., *achéire*. Syn.: *demanus*. 1. Acheirous. 2. (In ichthyology) destitute of pectoral fins. [A, 322.]

ACHEIRIA (Lat.), n. f. A^{2}k(a^{3}ch^2)-i′(e^2′i^2)-ri^2-a^3. Gr., ἀχειρία. Fr., *achéirie*. Ger., *Handlosigkeit*. Congenital absence of the hands.

ACHEIROUS, adj. A^{2}k-i′ru^{3}s. Gr., ἄχειρος. Lat., *achirus*. Affected with acheiria (*q. v.*).

ACHEL (Ger.), n. A^3′ch^{2}e^{2}l. A leech. [A, 315.]

ACHELIA (Lat.), n. f. A^{2}k(a^{3}ch^2)-e(a)′li^{2}a^3. See ACHEILIA.

ACHENA (Lat.), n. f. A^{2}k(a^{3}ch^2)-e(a)′na^3. See ACHÆNIUM.

ACHENE, n. A^{2}k-en′. Fr., *achène*. Ger., *Achene*. See ACHÆNIUM.

ACHENIUM (Lat.), n. n. A^{2}k(a^{3}ch^2)-e(a)′ni^2-u^{3}m(u^{4}m). See ACHÆNIUM.

ACHENODIUM (Lat.), n. n. A^{2}k(a^{3}ch^2)-e^{2}n(an)-o′di^2-u^{3}m-(u^{4}m). Fr., *achénode*. Ger., *Schalenfruchtkranz*. A fruit (like the strawberry) bearing several achænia arranged on a single surface. [B.]

ACHENUS (Lat.), n. m. A^{2}k(a^{3}ch^2)-e(a)′nu^{3}s(nu^{4}s). See ACHÆNIUM.

ACHEROIS (Lat.), n. f. A^{2}k(a^{3}ch^2)-e^2-ro′i^{2}s. Gen., *achero′idis*. Gr., ἀχερωΐς (from Ἀχέρων, "because from its pale color it was thought to have been brought from the shades by Hercules"). [A, 311.] An old name for the white poplar. [A, 348.]

ACHÈVEMENT (Fr.), n. A^3-she^{2}v-ma^{3}n^2. An elaboration (as of a secretion). [A, 101.]

ACHIA, ACHIAR, n's. See ACHAR.

ACHICOLUM (Lat.), n. n. A^{2}k(a^{3}ch^2)-i^{2}k′o-lu^{3}m(lu^{4}m). The sweating-room of an ancient bath. [A, 343.]

ACHIDO-PEIRASTICA (Lat.), n. f. See ACIDO-PEIRASTICA.

ACHIE-PATCHIE-ELLEY, n. According to Ainslie, a Hindu term for the green leaves of the *Acheen* (the botanical name of which is not given), which have an agreeable, somewhat astringent taste, like black tea; used in infusion by the Indian physicians as a stomachic or laxative. [A. 344.]

ACHILAIS (Lat.), n. f. A^{2}k(a^{3}ch^2)-i^{2}l-a(a^3)′i^{2}s. See ACHILLEIS.

ACHILIA (Lat.), n. f. A^{2}k(a^{3}ch^2)-i(e)′li^{2}a^3. See ACHEILIA.

ACHILLÆA (Lat.), n. f. A^{2}k(a^{3}ch^2)-i^{2}l-le′(la^3′e^2)-a^3. See ACHILLEA.

ACHILLEA (Lat.), n. f. A^{2}k(a^{3}ch^2)-i^{2}l-le(la)′a^3. Gr., ἀχίλλεια (Achilles having been fabled to have first made use of the plant). Fr., *achillée*. Ger., *Achillenkraut*, *Schafgarbe*, *Grinsing*. A Linnæan genus of herbaceous plants, of the natural order *Compositæ*, suborder *Tubulifloræ*, tribe *Senecionidæ*. [B, 34.] Several of the species contain tannin and an aromatic essential oil. [A, 321.]—**A. ageratum** [Linnæus]. Fr., *achillée visqueuse*, *eupatoire de Mésué*. [A, 328.] Ger., *Agerat*, *Leberbalsam*. It., *erba bacaja* (o *giulia*). [A, 316.] Sweet maudlin, maudlin tansy; formerly used for constipation, intestinal worms, and atonic dyspepsia. [A, 305.]—**A. ambigua** [Boissier]. See *A. millefolium*.—**A. atrata** [Linnæus]. Fr., *achillée* (ou *millefeuille*) *noire*. Ger., *schwärzliche Schafgarbe*. A species found on the Alps, where it is used in pneumonia and diarrhœa. [A, 321.] From this and *A. nana* an essence (*esprit*, ou *liqueur*, *d'iva*) is distilled in the Engadine, much esteemed for its aromatic, musk-like odor. [O. Reveil (A, 328).]—**A.**

Clavenæ. A species mistaken by Nic. Clavena for a species of *Artemisia*; employed by him in the form of an electuary (much vaunted in his book, "Historia de absintheo umbellifero," published in 1609). [O. Reveil (A, 328).]—**A. falcata** [Linnæus]. A sickle-leaved Levant species, the leaves of which are said to be much used in the East for hypochondriasis. [A, 248; O. Reveil (A, 328).]—**A. foliis pinnatis.** An old pharmaceutical name for the *Artemisia glacialis.* [A, 341.]—**A. herba-rota** [Allioni]. A small plant, growing on high mountains in Southern Europe; esteemed as a vulnerary, and used in making Falltrank. Its essential oil is employed as a sudorific and emmenagogue. [A, 344.]—**A. iva.** See *A. moschata.*—**A. lanata** [Lamarck]. See *A. nana.*—**A. lutea.** See *A. ageratum.*—**A. macrophylla** [Linnæus]. A large-leaved Italian species, used in making Falltrank. [A, 248, 321.]—**A. magna.** A term applied both to *A. millefolium* and to some other species. [B, 63.]—**A. millefolium** [Linnæus]. Fr., *mille-feuille, herbe aux charpentiers* (ou *à la coupure*). Ger., *gemeine Schafgarbe.* It., *millefoglio.* Sp., *milenrama, yerba de San Juan* [A, 316], *ciento en same.* Syn.: *A. ambigua, A. ossica, A. magna.* Milfoil, yarrow, nose-bleed, bastard pellitory, the achillea of the U. S. Ph. (1870); a species growing in Europe and northern America, attaining a height of about a foot, and surmounted by white or rose-colored flowers arranged in a corymb. It contains achillein and achilleic acid. [B, 5, 34, 63.] It is a mild aromatic bitter tonic, astringent, and antispasmodic; it is a constituent of the *eau vulnéraire*, and has been used for hæmorrhages and other discharges, also for flatulence, dysmenorrhœa, amenorrhœa, and malarial fevers. It is given in extract or infusion, and in the form of the oil; a distilled water and a tincture were formerly used. It is one of the constituents of Falltrank (*thés suisses*). [A, 316, 321; O. Reveil (A, 328).]—**A. moschata** [Jacquin]. Fr., *genipi blanc* (ou *iva*, ou *musqué*), *achillée musquée.* Ger., *Moschusschafgarbe, wahres Genipkraut.* Syn.: *A. iva.* A species growing on the continent of Europe. It contains ivaol (the essential constituent of *esprit*, or *liqueur, d'iva*) and moschatin. [B, 5.] In Switzerland, where it is known as *forest lady's herb*, it is used as a stomachic tonic. [A, 316.]—**A. myriophyllum.** See *A. millefolium.*—**A. nana** [Linnæus]. Fr., *genipi bâtard.* Ger., *falsches Genipkraut.* Syn.: *A. lanata, Ptarmica nana* [De Candolle]. An Italian species, used in making Falltrank. [A, 321.]—**A. nobilis** [Linnæus]. Fr., *mille-feuille noble.* A species found in France and Germany; used as a substitute for *A. millefolium.* [A, 305; O. Reveil (A, 328).]—**A. odorata** [Linnæus]. A species indigenous to Spain; used in making Falltrank. [A, 248, 321.]—**A. ossica** [C. Koch]. See *A. millefolium.*—**A. ptarmica** [Linnæus]. Fr., *ptarmique, herbe à eternuer, bouton d'argent.* Ger., *Niesekraut, Nieswurz, weisser Dorant, Bertram-Schafgarbe, deutscher Bertram, wildes Bertramkraut.* It., *erba da sternutare.* [A, 259.] Syn.: *Ptarmica vulgaris* [De Candolle]. Sneezewort; a plant about 15 inches high, surmounted by a corymb of white flowers, found in the northern part of the United States, in Canada, in northern and central Europe, and in northern Asia. The powdered leaves cause sneezing when inhaled, and have been used as a sialagogue. [A. 321; B, 19, 34, 63.]—**A. setacea.** A species indigenous to Hungary; mildly stimulant and tonic. [A, 248, 316.]—**A. viscosa.** See *A. ageratum.*

ACHILLEA MILLEFOLIUM. [A, 257.]

ACHILLEA PTARMICA. [A, 248.]

ACHILLEÆ (Lat.), n. f. pl. A^{2}k(a^{3}ch^2)-i^{2}l-le(la)′e(a^3-e^2). Fr., *achillées.* A name given by Jussieu to a group of plants of his family *Corymbiferæ.* [A, 345.]

ACHILLEAS (Lat.), n. f. A^{2}k(a^{3}ch^2)-i^{2}l-le(la)′a^{2}s(a^{3}s). See ACHILLEIS.

ACHILLEATE, n. A^{2}k-i^{2}l-le′at. Fr., *achilléate.* A salt of achilleic acid. [A, 306.]

ACHILLÉE (Fr.), n. A^3-kel-la. The genus *Achillea.*—**A. musquée.** *Achillea moschata.*—**A. noire.** *Achillea atrata.*—**A. visqueuse.** *Achillea ageratum.*

ACHILLEIC ACID, n. A^{2}k-i^{2}l-le′i^{2}k. From *achillea.* Fr., *acide achilléique.* Ger., *Achilleinsäure.* It., *acido achilleico.* An acid obtained from milfoil (*Achillea millefolium*), probably identical with aconitic acid. [B, 5.]

ACHILLEIN, n. A^{2}k-i^{2}l-le′i^{2}n. Lat., *achilleinum.* Fr., *achilléine.* Ger., *Achillein.* It., *achilleina.* 1. A brownish-red, amorphous, bitter glucoside, $C_{20}H_{38}N_2O_{15}$, by some called an alkaloid, obtained from *Achillea millefolium* and *Achillea moschata*, soluble in water, but insoluble in ether; used by the Italians in intermittent fever. [A, 321; B, 5, 49.] 2. A name given by Zanoni to a hydro-alcoholic extract, of complex composition (probably impure a.), obtained by him from the same plant; a resinous mass, brownish-yellow, very bitter, hygroscopic, soluble in boiling alcohol and in water, but insoluble in ether (except with the aid of acetic acid). [O. Reveil (A, 328).]

ACHILLEINE, n. See ACHILLEIN.

ACHILLEINSÄURE (Ger.), n. A^3-ch^{2}i^{2}l-la-en′zoi″re^2. Achilleic acid.

ACHILLEINUM (Lat.), n. n. A^{2}k(a^{3}ch^2)-i^{2}l-le(le^2)-i(e)′nu^{3}m-(nu^{4}m). Achillein.

ACHILLEION (Lat.), n. n. A^{2}k(a^{3}ch^2)-i^{2}l-li′(le^2′i^2)-o^{2}n. See ACHILLEUM.

ACHILLEIS (Lat.), n. f. A^{2}k(a^{3}ch^2)-i^{2}l-le(la)′i^{2}s. Gen., *achille′idis.* Gr., ἀχίλλητις. A variety of barley, the decoction of which was used by the ancients in fevers and jaundice. [A, 344, 348.]

ACHILLEIUS (Lat.), n. m. A^{2}k(a^{3}ch^2)-i^{2}l-li′(le^2′i^2)-u^{3}s(u^{4}s). The tendo Achillis. [Quincy (A, 316).]

ACHILLENKRAUT (Ger.), n. A^3-ch^{2}i^{2}l′le^{2}n-kra^3-ut. See ACHILLEA.

ACHILLÉOÏDE (Fr.), adj. A^3-ki^{2}l-la-o-ed. Resembling the *Achillea.* [A, 306.]

ACHILLEOS (Lat.), n. f. A^{2}k(a^{3}ch^2)-i^{2}l-le(la)′o^{2}s. Gen., *achille′i.* Gr., ἀχίλλειος. See ACHILLEA.

ACHILLESFLECHSE (Ger.), n. A^3-ch^{2}i^{2}l′le^{2}s-fle^{2}ch^2″ze^2. The tendo Achillis. [A, 320.]

ACHILLESQUELLE (Ger.), n. A^3-ch^{2}i^{2}l′le^{2}s-kwe^{2}l″le^2. A mineral spring at Freienwald, in the valley of the Oder; poor in solid constituents, but rich in carbon dioxide. [A, 305.]

ACHILLESSEHNE (Ger.), n. A^3-ch^{2}i^{2}l′le^{2}s-za″ne^2. See TENDO *Achillis.*

ACHILLES TENDON, n. See TENDO *Achillis.*

ACHILLETIN, n. A^{2}k-i^{2}l′le^{2}t-i^{2}n. From *achillea.* Fr., *achillétine.* Ger., *Achilletin.* An aromatic substance, $C_{11}H_{17}NO_4$, obtained by the action of sulphuric acid on achillein. [B, 81.]

ACHILLEUM (Lat.), n. n. A^{2}k(a^{3}ch^2)-i^{2}l-le(la)′u^{3}m(u^{4}m). Gr., ἀχίλλειον. 1. An old term for a cancerous or any inveterate ulcer of the skin. [A, 322.] 2. A soft and compact sort of sponge, used for wiping wounds, etc. [Pliny (A, 318).]

ACHILLEUS (Lat.), n. m. A^{2}k(a^{3}ch^2)-i^{2}l-le(la)′u^{3}s(u^{4}s). See ACHILLEA.

ACHILOUS, adj. A^{2}k-i′lu^{3}s. See ACHEILOUS.

ACHILUS (Lat.), adj. A^{2}k(a^{3}ch^2)-i(e)′lu^{3}s(lu^{4}s). Gr., ἄχιλος (from α priv. [1st def.], or intens. [2d def.], and χιλός, green fodder), ἄχειλος (3d def.). 1. Lacking in nourishment or in juice. 2. Abundantly nourished. 3. Destitute of lips (see ACHEILUS). [A, 322.]

ACHIMADIUM, n. See ACHMADIUM.

ACHIMAN (Ar.), n. See ACHMADIUM.

ACHIMBASSI, n. Written also *Hakim-Bachi.* The title of a magistrate in Grand Cairo, who gives licenses to practise medicine. [A, 348.]

ACHIOTE, n. A′chi^2-ot. From *achiotl*, the Mexican name of the *Bixa orellana.* Annotto. [Hernandez (A, 344).]

ACHIOTL, n. See ACHIOTE.

ACHIR (Lat.), adj. A^{2}k(a^{3}ch^2)′u^{5}r(er). See ACHEIR.

ACHIRA (Lat.), n. f. A^{2}k(a^{3}ch^2)-i(e)′ra^3. A Latinized form of *achiras* (*q. v.*). The *Canna achiras.*

ACHIRAS (Sp.), n. A^3-che′ra^{3}s. The Peruvian name of a species of *Canna* (probably the *Canna edulis*), the tubers of which contain an abundance of a very nutritious fæcula resembling arrowroot, termed by the French *tous-les-mois.* [A, 321, 328.]

ACHIRIA (Lat.), n. f. A^{2}k(a^{3}ch^2)-i(e)′ri^2-a^3. See ACHEIRIA.

ACHIROUS, adj. A^{2}k-i′ru^{3}s. See ACHEIROUS.

ACHIRUS (Lat.), adj. A^{2}k(a^{3}ch^2)-i(e)′ru^{3}s(ru^{4}s). See ACHEIR.

ACHITOLUM, ACHITOLUS (Lat.), n's. A^{2}k(a^{3}ch^2)-i^{2}t′o^{2}l-u^{3}m(u^{4}m), -u^{3}s(u^{4}s). See ACHICOLUM.

ACHLAMYDATE, adj. A^{2}k-la^{2}m′i^{2}d-at. From α priv., and χλαμύς, a cloak. In zoology, destitute of a mantle (said of molluscs). [A, 349; B.] See MANTLE.

ACHLAMYDEOUS, adj. A^{2}k-la^{2}m-i^{2}d′e-u^{3}s. For deriv., see ACHLAMYDATE. Fr., *achlamyde.* Ger., *nackt, bloss, kelchlos.* In botany, uncovered. devoid of calyx and corolla. [A, 315; B.]

ACHLAMYDOSPOREÆ (Lat.), n. f. pl. A^{2}k(a^{3}ch^2)-la^{2}m-(la^{3}m)″i^{2}d(u^{6}d)-o(o^2)-spo(spo^2)′re(re^2)-e(a^3-e^2). From α priv., χλαμύς, a cloak, and σπορά, a seed. In Bentley and Hooker's classification of the *Dicotyledones*, the sixth series of the *Monochlamydeæ* (*Apetalæ*), comprising the orders *Loranthaceæ, Santalaceæ*, and *Balanophoreæ.* [B, 42.] The plants belonging to these orders are mostly parasitic, and are distinguished by the ovules being usually devoid of integuments. This series corresponds to the cohort *Santales* of other systems of classification. [B, 75.]

ACHLIE (Fr.), n. A^3-kle. See ACHLYA.

ACHLIS (Lat.), n. f. A^{2}k(a^{3}ch^2)′li^{2}s. See ACHLYS.

ACHLYA (Lat.), n. f. A^{2}k(a^{3}ch^2)′li^2(lu^6)-a^3. Perhaps from ἀχλύς, mist, gloom, darkness. Fr., *achlie.* A genus of *Fungi* (*Oosporeæ*) established by Nees von Esenbeck, belonging to the order *Saprolegniaceæ.* [B, 54, 75.]—**A. Braunii** [Reinsch]. A species probably identical with *Aplanes Braunii.* [B, 54.]

ACHLYS (Lat.), n. f. A^{2}k(a^{3}ch^2)′li^{2}s(lu^{6}s). For deriv., see ACHLYA. Fr., *achlys, brouillard.* Ger., *Nebel.* It., *nebbia.* Sp., *niebla.* An old term for cloudiness or opacity of the cornea. [F.]

O, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^6**, urn; **U^6**, like ü (German).

ACHMADIUM, n. A corruption of the Arabic *achman*, or *achiman*, a name for antimony. [A, 325.]

ACHMAN (Ar.), n. See ACHMADIUM.

ACHMELLA (Lat.), n. f. A^{2}k(a^{3}ch^2)-me^{2}l′la^3. See ACMELLA.

ACHNANTHEÆ (Lat.), n. f. pl. A^{2}k(a^{3}ch^2)-na^{2}n(na^{3}n)′the-(the^2)-e(a^3-e^2). A section of diatomaceous plants.

ACHNE (Lat.), n. f. A^{2}k(a^{3}ch^2)′ne(na). Gr., ἄχνη, anything shaved off or standing on the surface. [A, 311.] Fr., *charpie râpée* (1st def.). Ger., *weiche geschabte Scharpie* (1st def.). Syn.: *lintei ramentum* (1st def.), *sordes oculi* (2d def.), *spuma* (3d def.). 1. Fine scraped lint. 2. Flocculent mucus on the eye. 3. Froth. 4. Frothy sputum. [A, 305, 320, 325; Hippocrates (A, 343).]

ACHOAVA, ACHOAVAN, n's. See ACHAOVAN.

ACHOLIA (Lat.), n. f. A^{2}k(a^{3}ch^2)-o(o^2)′li^2-a^3 Gr., ἀχολια (from α priv., and χολή, bile). Fr., *acholie*. Ger., *Acholie*. 1. A decided deficiency or complete lack of the secretion of bile; also the effects produced thereby. See CHOLÆMIA. 2. Any condition in which the escape of bile into the small intestine is obstructed. 3. Asiatic cholera; so called in Russia in 1832, on account of the absence of bile from the evacuations. 4. A gentle, non-choleric temperament. [A, 322.]—**Pigmentary a.** Fr., *acholie pigmentaire* [Hanot]. Ger., *pigmentäre Acholie*. Apparent a. due to a deficiency of pigment in the bile; the fæces are decolorized, but there is no jaundice. [V. Hanot, "Arch. gén. de méd.," Jan., 1885, p. 12.]

ACHOLIC, adj. A^{2}k-o^{2}l′i^{2}k. Gr., ἄχολος (from α priv., and χολή, bile). Lat., *acholus*. 1. Lacking in bile; affected with acholia. [A, 311, 322.] 2. Due to acholia. [Ploucquet (A, 322).] 3. Curative of jaundice. [A, 322.]

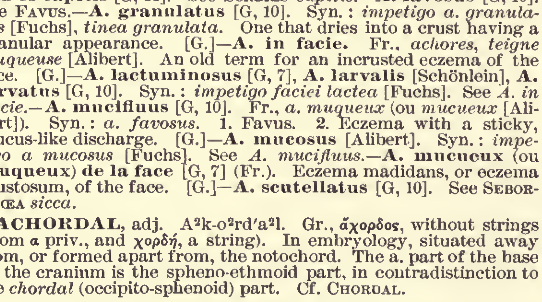
ACHOLOUS, adj. A^{2}k′o-lu^{3}s. See ACHOLIC (1st def.).

ACHOLUS (Lat.), adj. A^{2}k(a^{3}ch^2)′o(o^2)-lu^{3}s(lu^{4}s). Acholic.

ACHOR (Lat.), n. m. A(a^3)′ko^{2}r(ch^{2}or). Gr., ἄχωρ, scurf, dandruff. Fr., *achores*, *teigne muqueuse* [Alibert]. Ger., *Achor*, *Kopfgrind*. It., *acore*. Syn.: *tinea*, *tinea muciflua* [Alibert], *sordes capitis*. 1. An old term for a small, yellowish, acuminate pustule, usually perforated by a hair and situated on the scalp or the face. 2. A pustular eruption of the same parts; crusta lactea. [G.] Cf. PSYDRACIUM and PHLYZACIUM.—**A. barbatus** [G, 10]. See SYCOSIS.—**A'es capitis** [G, 11]. See SCABIES *capitis*.—**A. favosus** [G, 10]. See FAVUS.—**A. granulatus** [G, 10]. Syn.: *impetigo a. granulatus* [Fuchs], *tinea granulata*. One that dries into a crust having a granular appearance. [G.]—**A. in facie.** Fr., *achores*, *teigne muqueuse* [Alibert]. An old term for an incrusted eczema of the face. [G.]—**A. lactuminosus** [G, 7], **A. larvalis** [Schönlein], **A. larvatus** [G, 10]. Syn.: *impetigo faciei lactea* [Fuchs]. See *A. in facie*.—**A. mucifluus** [G, 10]. Fr., *a. muqueux* (ou *mucueux* [Alibert]). Syn.: *a. favosus*. 1. Favus. 2. Eczema with a sticky, mucus-like discharge. [G.]—**A. mucosus** [Alibert]. Syn.: *impetigo a mucosus* [Fuchs]. See *A. mucifluus*.—**A. mucueux** (ou **muqueux**) **de la face** [G, 7] (Fr.). Eczema madidans, or eczema crustosum, of the face. [G.]—**A. scutellatus** [G, 10]. See SEBORRHŒA *sicca*.

ACHORDAL, adj. A^{2}k-o^{2}rd′a^{2}l. Gr., ἄχορδος, without strings (from α priv., and χορδή, a string). In embryology, situated away from, or formed apart from, the notochord. The a. part of the base of the cranium is the spheno-ethmoid part, in contradistinction to the *chordal* (occipito-sphenoid) part. Cf. CHORDAL.

ACHORES (Lat.), n. m., pl. A^{2}k(a^{3}ch^2)-o′rez(re^{2}s). See ACHOR.



ACHORESIS (Lat.), n. f. A^{2}k(a^{3}ch^2)-o-re(ra)′si^{2}s. Gen., *achore′seos* (*-sis*). From α priv., and χωρεῖν, to make room. Fr., *achorèse*. A badly formed word (*achorema* would be better) used by Grossi to signify the diminished capacity of a hollow organ, like the bladder. [A, 306.] Cf. STENOCHORIA.

ACHORIA (Lat.), n. f. A^{2}k(a^{3}ch^2)-o′ri^2-a^3. See ACHORESIS.

ACHORIA (Lat.), n. n., pl. of *achorion* (*q. v.*). A^{2}k(a^{3}ch^2)-o′-ri^2-a^3. Those mammals (including the *Monotremata* and the *Marsupialia*) in which there is no direct connection between the fœtus and the maternal organism, *i. e.*, no chorion is formed. [A, 8.] Cf. IMPLACENTALIA.

ACHORICUS (Lat.), adj. A^{2}k(a^{3}ch^2)-o^{2}r′i^{2}k-u^{3}s(u^{4}s). Affected with or proceeding from *achor* (*q. v.*). [A, 322.]

ACHORION (Lat.), n. n. A^{2}k(a^{3}ch^2)-o(o^2)′ri^2-o^{2}n. From α priv., and χόριον, the chorion (1st def.), or ἄχωρ, achor (2d def.). 1. An animal of the orders mentioned under *Achoria* (*q. v.*). 2. A genus of

ACHORION SCHÖNLEINII.

a, conidia arranged in groups and chains; *b*, proper *Achorion*; *c*, mycelium; *d*, epidermal cell, with micrococci and bacteria. (After Neumann.)

Fungi of uncertain affinities, the individuals of which are probably developmental stages of a more highly organized fungus. [B, 54.]—**A. de la teigne** (Fr.). See *A. Schönleinii*.—**A. Lebertii.** See TRICHOPHYTON *tonsurans*.—**A. Schönleini, A. Schönleinii** [Remak]. Fr., *a. de la teigne*. Ger., *Favuspilz*. Syn.: *Puccinia favi*, *Oidium Schönleinii* [Lebert]. A species which, by its presence and growth in the skin, produces the disease called favus; named in honor of Schönlein, who discovered it in 1839. [G.] It forms a network of segmented mycelial threads, which, by transverse fission, produce rows and chains of spores. Its development by sexual reproduction has not been observed. It differs little in physical characters from the *Trichophyton tonsurans* (the fungus of ringworm), from the *Microsporon furfur* (the fungus of pityriasis versicolor), or from *Oidium lactis* (the fungus of thrush), and by Grawitz all these forms are held to be identical. [B, 54.]

ACHORISTOS, ACHORISTUS (Lat.), adj. A^{2}k(a^{3}ch^2)-o-ri^{2}s′-to^{2}s, -tu^{3}s(tu^{4}s). Gr., ἀχώριστος (from α priv., and χωρίζειν, to separate). Fr., *achoriste*. Inseparable (said of any phenomenon that invariably accompanies a particular disease). [A, 306.]

ACHOUROU, n. The Carib name for a species of myrtle, the leaves of which are used in decoction for nervous affections and dropsy. [A, 313, 316.]

ACHRAS (Lat.), n. f. A^{2}k(a^{3}ch^2)′ra^{2}s(ra^{3}s). Gen., *ach′rados*, *ach′radis*. Gr., ἀχράς, the wild pear. A genus of trees of the natural order *Sapotaceæ*. Many of the species are included by some writers under the genus *Sapota*. [B, 7, 19.]—**A. Australis.** See *A. sapota*.—**A. balata** [Aublet], **A. dissecta** [Linnæus]. A species growing in China, Manila, etc. The bruised leaves, mingled with ginger, are used externally in paralysis. The fruit is of the size and shape of that of the nettle-tree, and is of a pleasant taste when ripe; it promotes the appetite and facilitates digestion. [A, 344.]—**A. mammosa.** Fr., *jaune d'œuf* (a term applied also to some other plants), *marmelade*. Syn.: *Lucuma mammosa* [Jussieu], *Sapota mammosa*, *American marmalade*, *mammee*, *Jamaica bully-tree*. A West Indian tree, the fruit of which is called natural marmalade, from its likeness to quince marmalade. It furnishes Lucuma balata. According to Descourtils, the milky juice of the tree is emetic and caustic, and is used in the West Indies for destroying warts. [A, 248, 316, 344.]—**A. Milleri, A. Mülleri.** A species indigenous to Guiana and Central America, yielding balata (a substance similar to gutta-percha), of which urethral bougies have been made. [A, 316.]—**A. nigra.** See BUMELIA *nigra*.—**A. salicifolia.** Fr., *dipholis à feuilles de saule*. Syn.: *Bumelia salicilifolia*. A West Indian species, furnishing Galimata (or Galimeta) or white balata. [A, 316.]—**A. sapota** [Linnæus]. From the Mexican name, *cochitzapotl*. [A, 248.] Fr., *sapotillier*, *nèfle d'Amérique* (the Guatemala name [A, 344]). Ger., *Breiapfel*. [A, 316.] Syn.: *Sapota achras* [Miller]. The sapodilla plum-tree; a West Indian species, bearing an edible fruit, the seeds of which are laxative and diuretic. [B, 7.] According to Jacquin, the fruit is reputed curative of strangury. A sort of odorous resin which surrounds the seeds is regarded as laxative and diuretic. Made into an emulsion with sugar and water, the seeds are given for gravel and renal colic. A fatty substance, of the consistence of butter, is obtained from them. [A, 344.] The bark (termed *cortex jamaicensis* [A, 316]) is bitter and astringent, and has been used as a substitute for cinchona. It furnishes the alkaloid *sapotine*. [A, 247.]—**A. sideroxylon.** A Jamaica species, furnishing Neesberry balata. [A, 316.]—**A. Tchicomame** [Perrotet]. A Manila species, the fruit of which is very large. [A, 344.]—**A. zapota, A. zapotu.** See *A. sapota*.

ACHROA, ACHRŒA (Lat.), n. f. A^{2}k(a^{3}ch^2)-ro′a^3, -re′-(ro^2′e^2)-a^3. Gr., ἄχροια. Ger., *Achröa*. An old term for pallor due to cachexia. [A, 305.]

ACHROI (Lat.), n. m., pl. of *achrous* (*q. v.*).

ACHROMA (Lat.), n. n. A^{2}k(a^{3}ch^2)-ro′ma^3. Gen., *achro′matos* (*-tis*). From α priv., and χρῶμα, color. Fr., *achrome*. Syn.: *achromasia*, *achromatia*, *achromatosis*. 1. Any defect in the color of the skin, general or local. 2. An old term for vitiligo. [A, 305.]—**A. congeniale.** [G, 7.] Fr., *achrome congénial*. Albinism. [G.]—**A. vitiligo.** [G, 7.] Fr., *achrome vitiligue* [Alibert]. See VITILIGO.

ACHROMADERMA (Lat.), n. n. A^{2}k(a^{3}ch^2)-ro″ma^3-du^{5}r-(de^{2}r)′ma^3. For deriv., see ACHROMA and DERMA. Fr., *achromadermie*. See LEUCODERMA.

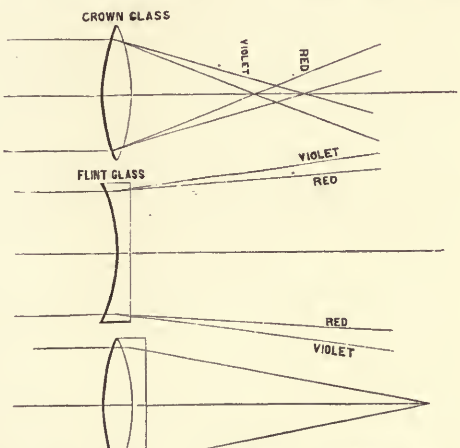
ACHROMASIA, ACHROMATIA (Lat.), n's f. A^{2}k(a^{3}ch^2)-ro-ma(ma^3)′zi^2(si^2)-a^3, -shi^2(ti^2)-a^3. For deriv., see ACHROMA. Fr., *achromasie*. Ger., *Achromasie*. It., *acromasi*. Sp., *acromasis*. Syn.: *coloris defectus*. See ACHROMA, ACHROMATISM, and ACHROMATOSIS.

ACHROMATIC, adj. A^{2}k-ro-ma^{2}t′i^{2}k. For deriv., see ACHROMA. Lat., *achromaticus*. Fr., *achromatique*. Ger., *achromatisch*. It., *acromatico*. Sp., *acromático*. 1. Devoid or non-productive of color. An a. lens (one corrected for chromatic aberration) consists of a combination of lenses, of different material and shape (*e. g.*, a double-convex lens of crown glass and a plano-concave lens of flint glass), whereby, instead of the unequal refraction of the rays of various colors which either alone would produce, all the rays (forming white light) are brought to a single focus, so that the image of an object viewed through the lens is free from adventitious colors. [A, 327; B; F.] See fig. under ACHROMATIZE. 2. Pertaining to the non-stainable substance (achromatin) of the nucleus of a cell. [Flemming, 1880 (J).] For other applications of the word, see under CONDENSER, FIBRIL, and FIGURE.

ACHROMATICITY, n. A^{2}k-ro-ma^{2}t-i^{2}s′i^{2}t-i^2. See ACHROMATISM.

ACHROMATIN, n. A^{2}k-ro′ma^{2}t-i^{2}n. For deriv., see ACHROMA. Fr., *achromatine*, *suc nucléaire*. Ger., *Achromatin*, *Kernsaft*. Flemming's term for the non-fibrillated portion of the nucleus of an animal or vegetable cell, which does not become deeply stained by microscopic reagents [Flemming, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," lxxvii, 1879 (B, 77)]; that part which in cell-division (karyokinesis) does not become stained, but remains as a

clear substance filling the interstices between the fibrils and surrounding them. In the resting nucleus the a. is supposed to be present, and to hold part at least of the chromatin in solution; hence there is not the sharp distinction of the nuclear substance into a staining and a non-staining part that there is when the nucleus is dividing. [Flemming, "Arch. f. mikr. Anat.," 1880, p. 158 (J).]—**A'fäden** (Ger.). See *Achromatic* FIBRILS.



ACHROMATISIREN (Ger.), v. tr. A^3-kro-ma^3-te-ze're^{2}n. To achromatize.

ACHROMATISM, n. A^{2}k-ro'ma^{2}t-i^{2}zm. Lat., *achromatismus.* The state of being achromatic.

ACHROMATISTOUS, adj. A^{2}k-ro-ma^{2}t-i^{2}s'tu^{3}s. Gr., ἀχρωμάτιστος. Lat., *achromatistus.* Fr., *achromatiste.* Ger., *farblos, missfarbig.* Colorless, or having an unhealthy color (as in cachexia). [A, 316, 322.]

ACHROMATIZATION, n. A^{2}k-ro-ma^{2}t-i^{2}z-a'shu^{3}n. The act or process of rendering achromatic.

ACHROMATIZE, v. tr. A^{2}k-ro'ma^{2}t-iz. Ger., *achromatisiren.* To render achromatic.

ACHROMATIC COMBINATION.

ACHROMATOPSIA, ACHROMATOPSIS (Lat.), n's f. A^{2}k(a^{3}ch^2)-ro-ma^{2}t(ma^{3}t)-o^{2}p'si^2-a^3, -si^{2}s. From α priv., χρῶμα, color, and ὄψις, sight. Fr., *achromatopsie.* Ger., *Achromatopsie. Farbenblindheit.* It., Sp., *acromatopsia.* See *Color*-BLINDNESS.

ACHROMATOPSY, n. A^{2}k-ro'ma^{2}t-o^{2}p-si^2. Achromatopsia.

ACHROMATOSIS (Lat.), n. f. A^{2}k(a^{3}ch^2)-ro-ma^3-to'si^{2}s. Ger., *Achromatose.* A disease of the skin or hair characterized by defective pigmentation. In the pl., *achromatoses,* a family of the *chromatoses* in Auspitz's classification of skin diseases, comprising those characterized by deficiency of pigmentation. [G, 4.]—**A. acquisita.** Acquired a., including vitiligo and canities præmatura (*q. v.*). [G.]—**A. congenialis.** Congenital a., including albinismus and poliosis (*q. v.*). [G.]

ACHROMATOUS, adj. A^{2}k-ro'ma^{2}t-u^{3}s. Gr., ἀχρώματος. Lat., *achromatus.* See ACHROMATISTOUS.

ACHROME (Fr.), n. A^3-krom. Achroma.—**A. congénial.** Congenital achroma. [G.] See ALBINISMUS.—**A. vitiligue.** Vitiligo. [G.]

ACHROMIA (Lat.), n. f. A^{2}k(a^{3}ch^2)-ro'mi^2-a^3. Fr., *achromie.* Ger., *Achromie.* It., *acromia.* Sp., *decoloración.* Decoloration of the skin, whether congenital or acquired, such as vitiligo, etc. [A, 321.]

ACHROMODERMA (Lat.), n. n. A^{2}k(a^{3}ch^2)-ro-mo-du^{5}r(de^{2}r)'-ma^3. For deriv., see ACHROMA and DERMA. Fr., *achromodermie.* Leucoderma. [G.]

ACHROMOUS, adj. A^{2}k-ro'mu^{3}s. Gr., ἄχρωμος. Lat., *achromus.* See ACHROMATISTOUS.

ACHRONIZOIC, adj. A^{2}k-ro^{2}n-i^{2}z-o'i^{2}k. From α priv., and χρονίζειν, to endure. Fr., *achronizoïque.* Incapable of being kept long unaltered (said of drugs). [A, 306.]

ACHRONYCHOUS, adj. See ACRONYCHOUS.

ACHROODECTIN, n. A^{2}k-ro''o-de^{2}k'ti^{2}n. From ἄχροος, colorless, and perhaps δέχεσθαι, to receive (because incapable of receiving color). Syn.: *achrooglycogen.* A carbohydrate obtained from the mucin derived from snails; characterized by giving no reaction with iodine. [Landwehr, "Ztschr. f. phys. Chem.," vi, p. 74 (B).]

ACHROODEXTRIN, n. A^{2}k-ro''o-de^{2}x'tri^{2}n. From ἄχροος, colorless, and *dextrin.* Fr., *achroödextrine.* Ger., *Achroödextrin.* A modification of dextrin which is not colored by iodine, and is with difficulty converted into glucose or maltose. [B, 12; K.]

ACHROOGLYCOGEN, n. A^{2}k-ro''o-gli^{2}k'o-je^{2}n. From ἄχροος, colorless, and *glycogen.* Ger., *Achroöglykogen.* See ACHROODECTIN.

ACHROOMYCES (Lat.), n. m. A^{2}k(a^{3}ch^2)-ro(ro^2)-om'i^2(u^6)-sez(kas). Gen., *achroomyce'tis.* From ἄχροος, colorless, and μύκης, a mushroom. A genus of *Fungi* of the division *Hyphomycetes.* [A, 316.]

ACHROOUS, adj. A^{2}k'ro-u^{3}s. Gr., ἄχροος. Lat., *achrous.* Colorless. See ACHROMATISTOUS.

ACHRYSALLODIAPHANIE (Fr.), n. A^3-kri^{2}s-a^{3}l-lo-de-a^3-fa^{3}n-e. Improperly formed from α priv., κρύσταλλος, crystal, and διαφάνεια, transparency. Piorry's term for cataract. [A, 250.]

ACHSBACH (Ger.), n. A^{3}ch^{2}s'ba^{3}ch^2. An Alsatian village, near which there is said to be a cold sulphurous spring, used for diseases of the skin. The existence of this spring has been denied. [A, 344.]

ACHSE (Ger.), n. A^{3}ch^2'ze^2. Written also *Axe.* An axis.—**A'nband, A'ncylinder, A'nfaser.** See AXIS-CYLINDER.—**A'nförmig.** Axiform, in the form of an axis. [A, 315.]—**A'nfügung.** See *Trochoid* ARTICULATION.—**A'nlos.** In botany, devoid of an axis (said of the thallophytes). [B, 35.]—**A'npflanze.** A plant possessed of an axis, or stem and root, as distinguished from an *a'nlose Pflanze.* [B.]—**A'nstrom.** The stream of red corpuscles observed moving along in the center of a capillary when seen under the microscope. [K, 13.]—**Aufsteigende A.** See *Ascending* AXIS.—**Dreha'.** See AXIS *of rotation.*—**Gehirnrückenmarksa'.** See *Cerebro-spinal* AXIS.—**Optische A.** See *Optic* and *Optical* AXIS.—**Secundäre A'n der Linsen.** See *Secondary* AXES *of lenses.*—**Seha'.** See *Visual* AXIS.

ACHSEL (Ger.), n. A^{3}ch^2'ze^{2}l. See AXILLA.—**A'ader.** The axillary vein.—**A'aneurysma.** An axillary aneurysm.—**A'arterie.** The axillary artery.—**A'bein.** The scapula.—**A'beule.** An axillary abscess.—**A'blätter.** Axillary leaves. [A, 320.]—**A'blumen.** Axillary flowers. [A, 320.]—**A'blutadern.** Axillary veins. [A, 320.]—**A'dolden.** Axillary umbels. [A, 320.]—**A'drüsen.** The axillary glands.—**A'falte.** The fold of the axilla. [A, 317.]—**A'gabeln.** Axillary tendrils. [A, 320.]—**A'geburt.** Delivery with a shoulder presentation.—**A'gestank.** The odor of the axilla. See HIRCUS.—**A'grube.** The hollow of the axilla, the armpit.—**A'grubengegend.** The axillary region.—**A'grubenhaare.** The hairs of the axilla. [A, 320.]—**A'höhle.** See *A'grube.*—**A'höhlenabscess.** An axillary abscess. [A, 320.]—**A'knochen.** The scapula.—**A'knospe.** An axillary bud. [B.]—**A'lage.** A shoulder presentation.—**A'nerven.** The axillary nerves.—**A'pulsader.** The axillary artery. [A, 320.]—**A'ranke.** An axillary tendril. [A, 315.]—**A'schlagader.** The axillary artery.—**A'spross.** See *A'knospe.*—**A'ständig.** In botany, axillary.—**A'vene.** The axillary vein.—**A'zug.** An old apparatus for the forcible reduction of dislocations by means of pulleys. [A, 305.]

ACHSELMANNSTEIN (Ger.), n. A^{3}ch^2'ze^{2}l-ma^{3}n''stin. See REICHENHALL.

ACHTÄUGIG (Ger.), adj. A^{3}ch^{2}t'oig-i^{2}g. Octonocular. [A, 315.]

ACHTBEINIG (Ger.), adj. A^{3}ch^{2}t'bin-i^{2}g. Eight-legged. [A, 315.]

ACHTBLÄTTERIG (Ger.), adj. A^{3}ch^{2}t'ble^{2}t-te^{2}r-i^{2}g. Octopetalous. [A, 315.]

ACHTERBINDE (Ger.), n. A^{3}ch^{2}t'e^{2}r-bi^{2}n-de^2. A figure-of-eight bandage. [A, 305.]

ACHTFÄCHERIG (Ger.), adj. A^{3}ch^{2}t'fe^{2}ch^2-e^{2}r-i^{2}g. In botany, octolocular. [A, 315.]

ACHTFÜSSIG (Ger.), adj. A^{3}ch^{2}t'fu^{6}s-si^{2}g. Eight-footed. [A, 315.]

ACHTGESPALTEN (Ger.), adj. A^{3}ch^{2}t'ge^2-spa^{3}lt''e^{2}n. In botany, octofid. [A, 315.]

ACHTMÄNNERIG, ACHTMÄNNIG (Ger.), adj's. A^{3}ch^{2}t'-me^{2}n-ne^{2}r-i^{2}g, me^{2}n-i^{2}g. Octandrous.—**Achtmännige,** n. pl. See OCTANDRIA.

ACHTSAMIG (Ger.), adj. A^{3}ch^{2}t'za^{3}m-i^{2}g. In botany, octospermous. [A, 315.]

ACHTSPALTIG (Ger.), adj. A^{3}ch^{2}t'spa^{3}lt-i^{2}g. Octofid. [A, 315.]

ACHTSTEMPELIG (Ger.), adj. A^{3}ch^{2}t'ste^{2}mp-e^{2}l-i^{2}g. Octogynous. [B.]—**A'e,** n. pl. See OCTOGYNIA.

ACHTSTRAHLIG (Ger.), adj. A^{3}ch^{2}t'stra^{3}l-i^{2}g. Octoradiated. [A, 315.]

ACHTTÄGIG, ACHTTÄGLICH, ACHTTÄGLIG (Ger.), adj's. A^{3}ch^{2}t'te^{2}g-i^{2}g, -li^{2}ch^2, -li^{2}g. Octan, i. e., occurring every eight days (said of fevers). [A, 315, 317.]

ACHTWEIBERIG (Ger.), n. A^{3}ch^{2}t'vib-e^{2}r-i^{2}g. In botany, octogynous. [A, 315.]

ACHTZÄHNIG (Ger.), adj. A^{3}ch^{2}t'tse^{2}n-i^{2}g. Octodentate. [A, 315.]

ACHTZEHNKÖPFIGE BINDE (Ger.), n. A^{3}ch^{2}t'tsan-ku^{5}pf''i^{2}g-e^2. See *Many-tailed* BANDAGE.

ACHTZELLIG (Ger.), adj. A^{3}ch^{2}t'tse^{2}l-li^{2}g. In botany, octolocular. [A, 315.]

ACHUSA (Lat.), n. f. A^{2}k(a^{3}k)-u^2(u)'sa^3. See ANCHUSA.

ACHY (Ar.), n. Gr., ἀχυ, δαφνίτης. A species of *Cassia* growing in Arabia. [A, 343.]

ACHYLA (Lat.), n. f. A^{2}k(a^{3}ch^2)'i^2(u^6)-la^3. See ACHLYA.

ACHYLIA, ACHYLOSIS (Lat.), n's f. A^{2}k(a^{3}ch^2)-i(u^6)'li^{2}a^3, -i^{2}l(u^{6}l)-o'si^{2}s. From α priv., and χυλός, juice, chyle, or α priv., and χύλωσις, a conversion into chyle. Fr., *achylie, achylose.* Ger., *Saftmangel* (1st def.), *Chylusmangel* (2d def.). Syn.: *exsuccitas* (1st def.). 1. A lack of juice. 2. (The only meaning of *achylosis*) a defective formation of chyle. [A, 322.]

ACHYLOTUS (Lat.), adj. A^{2}k(a^{3}ch^2)-i^2(u^6)-lo'tu^{3}s(tu^{4}s). Gr., ἀχύλωτος. Not converted into chyle. [Galen (A, 311).]

ACHYLOUS, adj. A^{2}k'i^{2}l-u^{3}s. Gr., ἄχυλος. Lat., *achylus.* Fr.,

achyle. Ger., *saftlos.* 1. Without juice or chyle. 2. Insipid. [A, 311, 322.]

ACHYMOSIS (Lat.), n. f. A^{2}k(a^{3}ch^2)-i^2(u^6)-mo'si^{2}s. Gen., *achymo'seos (-sis).* From α priv., and χύμωσις, a conversion into chyme. Fr., *achymose.* A defective formation of chyme. [A, 306.]

ACHYMOTUS (Lat.), adj. A^{2}k(a^{3}ch^2)-i^2(u^6)-mo'tu^{3}s(tu^{4}s). Gr., ἀχύμωτος. Affected with achymosis. [A, 322.]

ACHYMOUS, adj. A^{2}k-i'mu^{3}s. Gr., ἄχυμος. Lat., *achymus.* Fr., *achyme.* 1. Achylous. 2. Lacking in chyme. [A, 322.]

ACHYRANTHEÆ (Lat.), n. f. pl. A^{2}k(a^{3}ch^2)-i^2(u^6)-ra^{2}n(ra^{3}n)'-the(the^2)-e(a^3-e^2). For deriv., see ACHYRANTHES. A tribe of amaranthaceous plants, distinguished by the leaves being alternate and the flowers having two-celled anthers and an ovary containing but one ovule. [B, 34.]

ACHYRANTHES (Lat.), n. f. A^{2}k(a^{3}ch^2)-i^2(u^6)-ra^{2}n(ra^{3}n)'thez-(thas). From ἄχυρον, chaff, and ἄνθος, a flower. Fr., *achyranthe.* Ger., *Spreublume.* Syn.: *cadelari.* The representative genus of the *Achyrantheæ.* [B, 19.]—**A. aspera** [Willdenow]. A species growing in India, Egypt, the Cape of Good Hope, Jamaica, and Sardinia; used in the East, under the name of *cadelari,* as a remedy for dropsy, as an antidote to the venom of the scorpion, as a depurative, and as an astringent. [A, 305, 321; Ainslie (A, 328); B, 19.]—**A. fruticosa** [Lamarck]. An East Indian species, used for the same purposes as *A. aspera.* [B, 19.]—**A. globulifolia.** A Madagascar species, employed there as a remedy for syphilis. [B, 19.]—**A. lanata** [Linnæus]. A species referred by Forskål to the genus *Ærua.* It furnishes chaya root, used as a diuretic and depurative. [A, 321.]—**A. obtusifolia.** Used in India as a diuretic. [A, 328.]—**A. repens.** Forty-knot. The decoction has been used as a diuretic in dropsy, ischuria, etc. [A, 313.]—**A. viridis.** The bruised leaves have been used as an emollient. [A, 316.]

ACHYRANTHES ASPERA. [A, 248.]

ACHYRANTHOID, adj. A^{2}k-i^2-ra^{2}n'thoid. Fr., *achyranthoïde.* Resembling the *Achyranthes.* [A, 306.]

ACHYRODES (Lat.), adj. A^{2}k(a^{3}ch^2)-i^2(u^6)-ro'dez(das). For deriv., see ACHYRON and *-odes.** See ACEROSUS.

ACHYRON (Lat.), n. n. A^{2}k(a^{3}ch^2)'i^2(u^6)-ro^{2}n. Gr., ἄχυρον, chaff, bran. Fr., *son.* Ger., *Spreu.* Chaff. See FURFUR.

ACHYROPHORUS (Lat.), n. m. A^{2}k(a^{3}ch^2)-i^2(u^6)-ro^{2}f'o^2-ru^{3}s-(ru^{4}s). From ἄχυρον, chaff, and φορεῖν, to bear (from its feathery pappus). Fr., *achyrophore.* A genus of herbaceous plants, of the natural order *Compositæ,* suborder *Cichoraceæ.* [B, 19.]—**A. apargioides, A. scorzoneræ.** Two species, the roots of which are eaten in Chile, under the name of *escorzonera,* for their refreshing and purifying qualities. [A, 252.]—**A. sessiliflorus.** Sp., *chicoria de la tierra caliente.* A New Granada species, having long, white roots, a decoction of which is sometimes used in thoracic affections. [B, 19.]

ACHYROPHYTE, n. A^{2}k'i^2-ro-fit. From ἄχυρον, chaff, and φυτόν, a plant. Fr., *achyrophyte.* A plant of which the flower is accompanied by glumes. [Necker (A, 348).]

ACHYRUM (Lat.), n. n. A^{2}k(a^{3}ch^2)'i^2(u^6)-ru^{3}m(ru^{4}m). For deriv., see ACHYRON. In botany, a chaffy collection of paleæ. [A, 316.]

ACHYTUS (Lat.), adj. A^{2}k(a^{3}ch^2)'i^2(u^6)-tu^{3}s(tu^{4}s). From α priv., and χυτός, flowing. 1. Pent up (said of discharges). 2. Due to the retention of matter that should be cast off. [A, 322.]

ACIA (Lat.), n. f. A(a^3)'si^2(ki^2)-a^3. 1. A needle. 2. A threaded needle; also a ligature of thread. [Celsus (B, 45).] 3. See ACHAR.

ACIAMIDES, n. pl. A^{2}s-i'a^{2}m-i^{2}dz. From *acid* and *amide.* Bodies formed on the ammonia type, but yet possessing acid characters. [B, 2.]

ACIAR, n. See ACHAR.

ACIB (Ar.), n. Lead. [A, 338.]

ACÍBAR (Sp.), n. A^3-the'ha^{3}r. Aloes.

ACIBROMIDE, n. A^{2}s''i^2-bro'mi^{2}d(mid). From *acid* and *bromide.* See OXYBROMIDE.

ACICHLORIDE, n. A^{2}s''i^2-klo'ri^{2}d(rid). From *acid* and *chloride.* See OXYCHLORIDE.

ACICULA (Lat.), n. f. A^{2}s(a^{3}k)-i^{2}k'u^2(u)-la^3. Dim. of *acus,* a needle. Gr., ῥαφίον. Fr., *acicule.* Ger., *Borste.* Lit., a little needle; in botany, a bristle, the bristle-like abortive flower of a grass. [A, 252.]

ACICULAR, adj. A^{2}s-i^{2}k'u^2-la^{3}r. Lat., *acicularis,* from *acicula* (*q. v.*). Gr., ῥαφιώδης. Fr., *aciculaire.* Ger., *nadelförmig, nadelähnlich.* Sharp-pointed like a needle; needle-shaped. [B.]

ACICULATE, ACICULATED, adj's. A^{2}s-i^{2}k'u^2-lat, -la-te^{2}d. Lat., *aciculatus.* Fr., *aciculé.* 1. Marked with fine lines resembling those traced with a needle. [B, 19.] 2. Acicular.

ACICULE, n. A^{2}s'i^{2}k-u^{2}l. See ACICULA.

ACICULIFORM, adj. A^{2}s-i^{2}k-u^2'li^2-fo^{2}rm. From *acicula,* a little needle, and *forma,* form. Fr., *aciculiforme.* Acicular. [Craig (B, 39).]

ACICULUM (Lat.), n. n. A^{2}s(a^{3}k)-i^{2}k'u^2(u)-lu^{3}m(lu^{4}m). Dim. of *acus,* a needle. A spine (said of the sharp-pointed processes on the parapodia of the *Polychæta*). [A, 349.]

ACICUS, ACICYS (Lat.), adj's. A^{2}s(a^{3}k)-i(e)'ku^{3}s(ku^{4}s), -si^{2}s-(ku^{6}s). Gr., ἄκικυς (from α priv., and κίκυς, strength, vigor). Infirm, debilitated. [Hippocrates (A, 325).]

ACID, n. A^{2}s'i^{2}d. Lat., *acidum* (neut. of adj. *acidus* [*q. v.*]). Gr., ὀξύ. Fr., *acide.* Ger., *Säure.* It., *acido.* Sp., *ácido.* A salt of hydrogen. The following properties are common to the most important acids: 1. Solubility in water. 2. A sour taste. (In those acids which have the most marked characters this property can be perceived only after dilution with a large quantity of water.) 3. The power of reddening most organic blue and violet coloring matters (e. g., litmus), and of restoring the original color of substances which have been altered by alkalies. 4. The power of decomposing most carbonates, causing effervescence. 5. The power of destroying the characteristic properties of alkalies more or less completely, at the same time losing their own distinguishing characters and forming alkaline salts. The last of these properties is the only one considered essential. The most common reaction of acids with other substances is by double decomposition, in which they exchange their hydrogen for metals or for radicles possessing, to a certain extent, metallic functions; with some substances, however, such as ammonia and its analogues and certain hydrocarbons, acids unite directly, forming compounds which are hence usually classed as addition compounds, but which may also be regarded as substitution compounds like the derivatives first mentioned. See under AMMONIA. [B, 2.]—**A.-albumin.** See under ALBUMIN.—**A. characteristic.** That portion of the molecule of an a. which contains the replaceable hydrogen and the elements to which it is immediately attached. Thus, in organic a's the a. characteristic is the molecule CO.OH, which contains the a. hydrogen and the carbon atom to which it is attached. Many organic a's are formed by the substitution of this a. characteristic for an atom of hydrogen in an organic compound. [B.]—**A. of air.** Bergmann's term for carbonic a. [B, 3.] See CARBON *dioxide.*—**A. of amber.** Succinic a. [B, 86.]—**A. of ants.** Formic a. [B, 86.]—**A. of apples.** Malic a. [B, 86.]—**A. of benzoin.** Benzoic a. [B, 86.]—**A. of borax.** Orthoboric a. [B.] See under BORIC ACID.—**A. of chalk.** Fr., *acide crayeux.* An old term for carbonic a. See CARBON *dioxide.*—**A. of citrons.** Citric a. [B, 86.]—**A. of corks.** Suberic acid. [B, 86.]—**A. of fat.** A name given by Crell to an a. formed by the distillation of fat; afterward shown to be identical with acetic a. [B, 86.]—**A. of flints.** Lat., *acidum silicum.* An old term for silicic a. or silicic anhydride. [B, 87.]—**A. of fluor.** An old name for hydrofluoric a. [B, 86.]—**A. of fossil salt.** An old name for hydrochloric a. [B.]—**A. of galls.** Gallic a. [B, 86.]—**A. of lemons.** Citric a. [B, 86.]—**A. of milk.** Lactic a. [B, 86.]—**A. of molybdena.** Lat., *acidum molybdænæ.* See under MOLYBDENA.—**A. of Prussian blue.** An old name for hydrocyanic a. [B, 86.]—**A. of sea salt.** Hydrochloric a. [B.]—**A. of pus.** See PYIC ACID.—**A. of sugar.** An old name for oxalic a. [B, 86.]—**A. of sugar of milk.** Lat., *acidum sacchari lactis.* An old name for mucic a., because it was obtained by treating milk sugar with nitric a. [B, 3, 86.]—**A. of tartar.** Tartaric a. [B, 86.]—**A's of the acrylic a. series, A's of the lactic a. series,** etc. See ACRYLIC ACID, LACTIC ACID, etc.—**A. of tin.** An old term for an a. produced by the action of nitric a. upon tin; probably metastannic a. [B, 3, 86.]—**A. of tungsten.** Tungstic a. [B, 3, 86.]—**A. of urine.** 1. Phosphoric a. [B.] 2. Uric a. [A, 313.]—**A. of wolfram.** Tungstic a. [B, 3.]—**A. of wood.** Pyroligneous a. [B, 86.]—**A. oxide.** See under OXIDE.—**A. radicle.** An element or a combination of elements which, when united with hydrogen, forms an a. The term is usually limited to the oxygen a's. [B.]—**A. stiffening.** Ger., *Säure-Starre.* A condition of rigor induced in a muscle by injecting an acid solution into its substance. [Landois (K).]—**Aerial a.** An old term for carbonic a. [B.] See CARBON *dioxide.*—**Alcohol a.** Fr., *acide-alcool.* Ger., *Alkoholsäure.* A body having at once the constitution of an alcohol and an a. (e. g., glycollic a., $CH_2(OH) - CO.OH$ formed by the oxidation of ethyl alcohol, $CH_2(OH) - CH_3$, and of ethylene alcohol (glycol), $CH_2(OH) - CH_2(OH)$.) [B, 4.]—**Aldehyde a., aldehydic a.** Fr., *acide aldéhydique.* Ger., *Aldehydsäure.* A substance possessing the properties both of an aldehyde and of an a., and derived from a dibasic organic a. by the replacement of one of the molecules of CO.OH in the a. characteristic by the molecule COH characteristic of the aldehydes. Such a's have in general the formula $C_nH_m\Big\langle{CHO \atop CO.OH}$, where m usually equals $2n$. [B, 4.]—**Alkali a.** An expression corresponding to the French *alcali-acide.* See *Amido-a.*—**Amic a's.** Fr., *acides amiques.* Ger., *Aminsäuren.* A class of nitrogenized a's derived from a polybasic a. by the substitution of amidogen (NH_2) for one of the molecules of hydroxyl in the a. characteristic (e. g., succinamic a., $\Big\{{CH_2 - CO.NH_2 \atop CH_2 - CO.OH}$, derived from succinic a., $\Big\{{CH_2 - CO.OH \atop CH_2 - CO.OH}\Big)$. They differ from the ammonium salts of the same a's by the elements of one or more molecules of water. [B, 2, 3, 4.]—**Amido-a.** Fr., *acide amidé, alcali-acide.* Ger., *Amidosäure.* An a. derived from another a. by the substitution of amidogen (NH_2) for hydrogen in the a. radicle (e. g., amidosuccinic a. $\Big\{{CH.(NH_2) - CO.OH \atop CH_2 - CO.OH}\Big)$. [B, 3, 4.]—**Anhydrous a.** Fr., *acide anhydre.* Ger., *wasserfreie Säure.* See ANHYDRIDE.—**Animal a.** Fr., *acide animal.* An a. found in an animal tissue or secretion. [B.]—**Aromatic a.** Fr., *acide aromatique.* Ger., *aromatische Säure.* It., *acido aromatico.* Sp., *ácido aromático.* An a. derived from hydrocarbons of the aromatic group of compounds. They are divided into the *aromatic a's proper,* derived from benzene or a homologue of benzene by the substitution of the a. characteristic CO.OH for one or more atoms of hydrogen; and the *aromatized fatty a's,* derived from the a's of the fatty series by the replacement of one or more atoms of hydrogen by phenyl or its homologues. [B, 4.]—**Aromatized fatty a.** See *Aromatic a.*—**Arsinic a's, Arsonic a's.** Fr., *acides arsiniques* (ou *arsoniques*). Ger., *Arsinsäuren.* A class of a's formed by the oxidation of the arsines or the arsonium compounds. The most important of them are dimethylarsinic and methylarsinic a's. [B, 4.] Cf. *Phosphinic a's.*—**Bibasic a.** Fr., *acide bibasique.* See *Dibasic a.*—**Biliary**

a's. Fr., *acides biliaires.* Ger., *Gallensäuren.* See TAUROCHOLIC ACID, GLYCOCHOLIC ACID (a's of ox-bile), HYOGLYCOCHOLIC ACID, HYOTAUROCHOLIC ACID (a's of pig's bile), and CHENOTAUROCHOLIC ACID (a. of goose's bile). [B.]—**Brom'a.** An a. in which one or more atoms of hydrogen in the a. radicle are replaced by bromine. [B.] —**Carbon a.** See *Organic a.*—**Chalky a.** An old name for carbonic a. [B, 91.] See CARBON *dioxide.*—**Chamber a.** Ger., *Kammersäure.* The dilute impure sulphuric a. formed in the lead chambers in the manufacture of sulphuric a. from sulphur. [B.]—**Chlor-a.** An a. in which one or more of the hydrogen atoms of the a. radicle are replaced by chlorine (e. g., monochloracetic a.). [B.]—**Conjugate a, Copulated a.** Fr., *acide conjugué* (ou *copulé*). Ger., *gepaarte Säure.* An a. considered as formed from two or more other a's united in definite proportions. [B.]—**Dephlogisticated marine a.** An old term for chlorine. [B, 86.]—**Diatomic a.** Fr., *acide diatomique* (ou *biatomique*). Ger., *zweiatomige Säure.* It., *acido diatomico.* An a. which contains 2 atoms of hydrogen replaceable by metallic or organic radicles. If both of these replaceable atoms are contained in the a. characteristic, CO.OH, the a. is also dibasic, but if one is contained in the a. radicle, and the other in the a. characteristic, the a. is monobasic. Salicylic a., for instance, the formula of which is $C_6H_4(OH)CO.OH$, forms two classes of salts, having respectively the formulæ $C_6H_4(OH).COO.R'$ and $C_6H_4(OR')$.-COO.R'. It is, therefore, monobasic and diatomic. [B.]—**Dibasic a.** Fr., *acide dibasique* (ou *bibasique*). Ger., *zweibasische Säure.* It., *acido dibasico.* An a. containing 2 replaceable atoms of hydrogen in the a. characteristic. [B.]—**Dihydrated a.** Fr., *acide bihydraté.* See *Hydrated a.*—**Dihydric a.** Fr., *acide dihydrique.* Ger., *dihydrische Säure.* A diatomic a. [B.]—**Dihydroxy-a's, Dioxy-a's.** A class of a's formed from other a's by the replacement of 2 hydrogen atoms in the a. radicle by 2 molecules of hydroxyl; called *dioxy-a's*, because they may be regarded as formed from the primitive a's by the addition of 2 atoms of oxygen. [B.] —**Disulphonic a.** Fr., *acide disulfonique.* Ger., *Disulfonsäure.* An a. which may be regarded as made up of a double molecule of sulphurous a. in which a bivalent radicle replaces 2 atoms of hydrogen; having, therefore, the general formula $R''.<(SO_2.OH)_2$. [B, 4.]—**Fatty a.** Fr., *acide gras.* Ger., *fettige Säure, Fettsäure.* It., *acido grasso.* Sp., *ácido graso* (o *craso*). 1. In general terms, an a. of the fatty series of hydrocarbons, i. e., any organic a. not belonging to the aromatic series. 2. An a. found in the fixed oils and fats, e. g., stearic and oleic a's. 3. In a more restricted sense, those organic a's that are derived from the trivalent series of hydrocarbons (acidyls) by the addition of an atom of oxygen and a molecule of hydroxyl; or they may be regarded as derived from carbonic acid by the successive substitution of each of the univalent hydrocarbons (alcohol radicles) for an atom of hydrogen; their general formula is, accordingly, $C_nH_{2n-1}.O.(OH)$, or $C_mH_{2m+1}.CO$.-OH. Thus restricted, the term includes formic, acetic, propionic, butyric, valeric, caproic, œnanthylic, caprylic, pelargonic, capric, hendecatoic, lauric, tridecatoic, myristic, pentadecatoic, palmitic, margaric, stearic, nondecatoic, arachidic, medullic, behenic, lignoceric, hyænic, cerotic, melissic a's, an a. of the composition C_{34}-$H_{68}O_2$, and theobromic a. [B, 3, 4.]—**Haloid a.** Fr., *acide haloïde.* Ger., *Halogenwasserstoffsäure.* A hydrogen a. formed by the direct combination of an atom of hydrogen with an atom of one of the haloid elements (chlorine, bromine, iodine, and fluorine). Hence the term includes hydrochloric, hydrobromic, hydriodic, and hydrofluoric a's. [B.]—**Hexabasic a.** Fr., *acide hexabasique.* Ger., *sechsbasische Säure.* An a. containing 6 atoms of replaceable hydrogen in the a. characteristic. [B.]—**Hexatomic a.** Fr., *acide hexatomique.* Ger., *sechsatomische Säure.* An a. which contains 6 atoms of replaceable hydrogen, whether in the a. radicle, or in the a. characteristic, or in both. [B.]—**Hydra'.** See *Hydrogen a.* —**Hydrated a.** Fr., *acide hydraté.* An a. combined with the elements of water; especially applied to the anhydrous a's or anhydrides in aqueous solution when they combine with the elements of the water of solution to form true a's. Such a's are called *monohydrated*, *dihydrated*, and *trihydrated* a's, according as they are combined with one, two, or three molecules of water.—**Hydrogen a.** Fr., *hydracide.* Ger., *Wasserstoffsäure.* Originally an a. containing hydrogen; hence (as distinguished from an oxygen a.) one containing no oxygen. [B, 7.] The following are the best known of this class: hydrochloric a. (HCl), hydrobromic a. (HBr), hydriodic a. (HI), hydrofluoric a. (HF), hydrocyanic a. (HCN), and hydrosulphuric a. (hydrogen sulphide, H_2S). The hydrogen a's include also hydrocobalticyanic, hydroferricyanic, hydroferrocyanic, hydroplatinocyanic, hydrocuprocyanic, hydroauricyanic, hydromellonic, and hydronitroprussic a's. Under this head may be included the group of thio-a's, derived from oxy-a's by replacing the oxygen with sulphur; such are thiocyanic, isothiocyanic, perthiodicyanic, dithiocyanic, thiocarbamic, thiocarbonic, thioarsenic. and thioantimonic a's. [B.]—**Hydroxy-a's.** Ger., *Hydroxysäuren.* A class of a's formed from other a's by the substitution of one or more molecules of hydroxyl for an equal number of atoms of hydrogen in the a. radicle; also called *oxy-a's*, because they may be regarded as derived from the primitive a's by the direct addition of one or more atoms of oxygen. [B.] Cf. *Dihydroxy-a's*, *Trihydryoxy-a's*, and *Tetrahydroxy-a's.*—**Imperfect a.** In the old nomenclature, an oxy-a. which contained less oxygen than was required to saturate it (e. g., nitrous a.). [B, 69.]—**Inorganic a.** See *Mineral a.*—**Ketonic a.** A substance having at once the constitution of a ketone and of an a., and imagined to be derived from a ketone by the substitution of the a. characteristic CO.OH for hydrogen. Thus, acetoacetic a., $CH_3.CO.CH_2.CO.OH$, may be regarded as dimethylketone, in which CO.OH replaces an atom of hydrogen. [B, 4.]—**Marine a.** An old name for hydrochloric a. [B.]—**Marine aerated a.** An old name for chlorine. [B, 86.]—**Metallic a.** Fr., *acide métallique.* A mineral a. in which the a. radicle is a metal or a metallic oxide. [B.]—**Mineral a.** Lat., *acidum minerale* (seu *metallicum*, seu *fossile*). Fr., *acide minéral.* Ger., *Mineralsäure.* It., *acido minerale.* Sp., *ácido mineral.* An inorganic a., one of which the radicle is not a carbon derivative. The chief mineral a's are sulphuric, sulphurous, nitric, nitrous, phosphoric, phosphorous, hydrochloric, and hydrobromic a's, and these have all the distinguishing characters of an a. above laid down; less important, and in some respects possessing less characteristic properties, are antimonic, arsenic, boric, chloric, hypochlorous, hyponitrous, hyposulphurous, chromic, hydrofluoric, iodic, hydriodic, manganic, molybdenic, osmic, silicic, stannic, tungstic, and vanadic a's. [B.]—**Monatomic a.** Fr., *acide monoatomique.* Ger., *einatomige Säure.* It., *acido monoatomico.* An a. which contains one atom of replaceable hydrogen which must be in the a. characteristic. [B.]—**Monobasic a.** Fr., *acide monobasique.* Ger., *einbasische Säure.* It., *acido monobasico.* An a. which, whether containing 1, 2, or more atoms of replaceable hydrogen, contains only one of them in the a. characteristic. [B.]—**Monohydrated a.** Fr., *acide monohydraté.* See *Hydrated a.*—**Monohydric a.** Fr., *acide monohydrique.* Ger., *monohydrische Säure.* See *Monatomic a.*—**Nitro-a.** Fr., *nitro-acide.* Ger., *Nitrosäure.* An a. formed from another a. by the substitution of nitryl (NO_2) for hydrogen. [B.]—**Nitrogenous a.** Fr., *acide azoté.* Ger., *stickstoffhaltige Säure.* An a. containing nitrogen. [B.]—**Oleic a.** Lat., *acidum oleicum.* Fr., *acide oléique.* Ger., *Oleïnsäure.* For the individual a. so called, see the major list; for the generic sense, see *Fatty a.* (2d def.).—**Organic a.** Fr., *acide organique.* Ger., *organische Säure.* It., *acido organico.* Sp., *ácido orgánico.* An a. the radicle of which is a carbon derivative. [B.]—**Oxa'.** See *Oxy-a.* —**Oxaline a.** An old term for oxalic a. [B, 86.]—**Oxy-a.** Fr., *oxacide.* Ger., *Oxysäure.* 1. An oxygen a. 2. An a. formed from another by the addition of an atom of oxygen. [B.] See *Hydroxy-a's.*—**Oxygen a.** Fr., *oxy-acide.* Ger., *Sauerstoffsäure.* An a. containing oxygen; a term formerly especially applied, in contradistinction to the hydrogen a's, to the anhydrous a's or anhydrides, but now applied to the true a's containing oxygen. Nearly all the a's known are oxygen a's in the latter sense. [B.] See *Hydrogen a.*—**Pentabasic a.** Fr., *acide pentabasique.* Ger., *fünfbasische Säure.* An a. that contains 5 atoms of replaceable hydrogen all in the a. characteristic. [B.]—**Pentatomic a.** Fr., *acide pentatomique.* Ger., *fünfatomige Säure.* An a. containing 5 atoms of replaceable hydrogen. [B.]—**Perfect a.** In the old nomenclature, an oxygen a. which contained the full amount of oxygen required to saturate it. [B, 69.]—**Phosphinic a's, phosphonic a's.** Fr., *acides phosphiniques* (ou *phosphoniques*). Ger., *Phosphinsäuren, Phosphonsäuren.* A class of a's formed from phosphoric a. by the substitution of one or two molecules of a compound radicle for one or two molecules of hydroxyl. Such a's have the general formula, PO.R'.-$(OH)_2$ or $PO.R'_2.OH$, where R' is a univalent radicle. [B.] See METHYLPHOSPHINIC ACID, PHENYLPHOSPHONIC ACID.—**Polyatomic a.** Fr., *acide polyatomique.* Ger., *polyatomische Säure.* It., *acido poliatomico.* An a. containing more than one atom of replaceable hydrogen, whether in the a. radicle, in the a. characteristic, or in both. [B.]—**Polybasic a.** Fr., *acide polybasique.* Ger., *mehrbasische Säure.* It., *acido polibasico.* An a. containing more than one replaceable atom of hydrogen in the a. characteristic. A's of this class are divided into *dibasic*, *tribasic*, *tetrabasic*, etc., according to the number of such atoms. [B.]—**Polyhydric a.** Fr., *acide polyhydrique.* Ger., *polyhydrische Säure.* Polyatomic a.—**Pyro-a.** Fr., *pyro-acide.* Ger., *Pyrosäure, Brenzsäure.* An a. derived from another by the action of heat. [B.]—**Saccharine a.** An old term for oxalic a. [B, 86.]—**Saturated a.** Fr., *acide saturé.* Ger., *gesättigte Säure.* See *Perfect a.*—**Sulphazotized a's.** Fr., *acides sulfazotés.* A class of a's formed by the action of sulphurous a. upon potassium nitrite. [B, 2.] See SULPHAMIC ACIDS, SULPHAMMONIC ACIDS, and SULPHOXYAZIC ACIDS.—**Sulphinic a's.** Fr., *acides sulfiniques.* Ger., *Sulfinsäuren.* A class of a's of the general formula R'.SO.OH (where R' is a univalent radicle). Such a's may be regarded as derived from sulphurous a., $SO.(OH)_2$, by the substitution of a univalent radicle for a molecule of hydroxyl; or they may be considered as acid hyposulphites derived from hyposulphurous a., H_2SO_2, by the replacement of one of the hydrogen atoms. [B.] See METHYLSULPHINIC ACID.—**Sulpho-a.** Fr., *sulfo-acide.* Ger., *Sulfosäure.* 1. A thio-a. 2. A sulphonic a., especially one derived from another a. [B.]—**Sulphonic a's.** Fr., *acides sulfoniques.* Ger., *Sulfonsäuren.* A class of a's of the general formula $R_N.(SO_2.OH)_n$ (where R_N is a radicle whose quantivalence is *n*). Such a's may be regarded as derived from sulphuric a. by the substitution of a radicle for hydroxyl; or they may be regarded as acid sulphites derived from sulphurous a., H_2SO_3, by the replacement of half of its hydrogen by a basic radicle. [B.] See METHYLSULPHONIC ACID.—**Sulphur a.** See *Thio-a.*—**Tetrabasic a.** Fr., *acide tétrabasique.* Ger., *vierbasische Säure.* It., *acido tetrabasico.* A polybasic a. supposed to contain 4 replaceable atoms of hydrogen, all of which must be contained in the a. characteristic. [B.]—**Tetrahydric a.** Fr., *acide tétrahydrique.* Ger., *tetrahydrische Säure.* See *Tetratomic a.*—**Tetrahydroxy-a's.** A class of a's formed from other a's by the substitution of 4 molecules of hydroxyl for 4 atoms of hydrogen. [B.]—**Tetratomic a.** Fr., *acide tétratomique.* Ger., *vieratomige Säure.* It., *acido tetratomico.* An a. which contains 4 atoms of hydrogen replaceable by metallic or organic radicles, those atoms being found either entirely in the a. characteristic, CO.OH (the a. being then tetrabasic), or partly in the a. radicle as well (the a. being then tribasic, dibasic, or monobasic). Thus, tartaric a., the formula of which is $C_2H_2(OH)_2$(CO.-$OH)_2$, forms two classes of salts, having respectively the constitution $C_2H_2(OH)_2(CO.OR')_2$ and $C_2H_2(OR')_2(CO.OR')_2$; it is, therefore, at once dibasic and tetratomic. [B.]—**Thio-a.** Syn.: *sulphur a.* An a. in which sulphur replaces oxygen (e. g., thiocarbamic a.). [B.]—**Triatomic a.** Fr., *acide triatomique.* Ger., *dreiatomige Säure.* It., *acido triatomico.* An a. which contains 3 atoms of hydrogen replaceable by metallic or organic radicles, whether these atoms are all contained in the a. characteristic, CO.OH (the a. being tribasic), or partly in the a. radicle as well (the a. being dibasic or monobasic). [B.] Cf. *Diatomic a.*—**Tribasic a.** Fr., *acide tribasique.* Ger., *dreibasische Säure.* It., *acido tribasico.* A polybasic a. containing 3 replaceable atoms of hydrogen, all in the a.

characteristic. [B.]—**Trihydrated a.** Fr., *acide trihydraté.* See *Hydrated a.*—**Trihydric a.** Fr., *acide trihydrique.* Ger., *trihydrische Säure.* See *Triatomic a.*—**Trihydroxy-a's., Trioxy-a's.** A class of a's derived from other a's by the substitution of 3 molecules of hydroxyl for 3 atoms of hydrogen.—**Unsaturated a.** Ger., *ungesättigte Säure.* See *Imperfect a.*—**Vegetable a.** Ger., *Pflanzensäure.* An a. occurring in or derived from vegetable tissues or juices. [B.]—The names of the individual a's will be found in their proper places in the major list.

ACID, adj. A^{2}s'i^{2}d. Gr., ὀξύς. Lat., *acidus* (from ἀκίς [gen., ἀκίδος], a point). Fr., *acide.* Ger., *sauer.* It., *acido.* Sp., *ácido.* 1. Sour. 2. Having the chemical properties or showing the reaction of an acid. For special uses of the word, see A. DYSPEPSIA, A. ELECTRICITY, A. FERMENTATION, and A. SALT.

ACIDA (Lat.), n. n., pl. of *acidum* (*q. v.*). A^{2}s(a^{3}k)'i^{2}d-a^3. Gr., ὀξέα. Fr., *acides.* Ger., *Säuren.* Acids.

ACIDATION, n. A^{2}s-i^{2}d-a'shu^{3}n. Ger., *Versäuerung.* See ACIDIFICATION.

ACIDE (Fr.), n. A^{3}s-ed. An acid.—**A. abiétique.** Abietic acid.—**A. aboléique.** Œnanthylic acid. [B. 93.]—**A. absinthique.** Absinthic acid.—**A. acéconitique.** Aceconitic acid.—**A. acéphosgénique.** Acephosgenic acid. [B.]—**A. acéphossique.** Acephossic acid. [B.]—**A. acétamido-phtalique.** Acetamidophthalic acid.—**A. acétamique.** Amidoacetic acid; glycocin. [B.]—**A. acéteux.** Acetous acid. See ACETIC ACID.—**A. acétique.** Acetic acid.—**A. acétique anhydre.** Anhydrous acetic acid; acetic anhydride.—**A. acétique aromatisé.** See ACETUM *brittanicum.*—**A. acétique camphré.** See ACIDUM ACETICUM *camphoratum.*—**A. acétique concentré, A. acétique cristallisable** [Fr. Cod.]. Glacial acetic acid. [B.]—**A. acétique dilué.** Dilute acetic acid; acidum aceticum dilutum. [B.]—**A. acétique du bois.** Pyroligneous acid. [B, 92.]—**A. acétique du commerce** [Fr. Cod.]. Syn.: *a. pyroligneux purifié.* An aqueous solution of acetic acid, corresponding to the acidum aceticum of the U. S. Ph., containing 50 per cent. of the glacial acid, and having a sp. gr. of 1·060. [B.]—**A. acétique dulcifié, A. acétique étendu d'eau, A. acétique faible.** Dilute acetic acid.—**A. acétique monohydraté, A. acétique pur.** Glacial acetic acid. [B.]—**A. acétique sulfuré.** Thiodiglycollic acid. [B. 93.]—**A. acéto-acétique.** Acetoacetic acid.—**A. acéto-butyrique.** Acetobutyric acid. [B.] See PROPIONIC ACID.—**A. acéto-formique.** Acetoformic acid.—**A. acéto-glycolique.** Acetoglycollic acid. [B.]—**A. acéto-lactique.** Acetolactic acid. [B.]—**A. acéto-métamido-benzoïque.** Acetometamidobenzoic acid.—**A. acétone-sulfonique.** Acetonesulphonic acid.—**A. acétone-uramique.** Acetonuramic acid. [B.]—**A. acétonique.** Acetonic acid.—**Acétonyl-uramique.** Acetonuramic acid.—**A. acéto-phosphorique.** Acetylphosphoric acid. [B.]—**A. acéto-propionique.** Acetopropionic acid.—**A. acéto-pyrophosphoreux.** Acetopyrophosphorous acid.—**A. acéto-pyrophosphorique.** Acetylpyrophosphoric acid. [B.]—**A. acéto-salicylique.** Acetosalicylic acid.—**A. acéto-sulfurique.** Thiacetylenic acid. [B.]—**A. acéto-tartrique.** Acetotartaric acid.—**A. acéto-vanillique.** Acetvanillic acid. [B.]—**A. acétoxacetique, A. acétoxyacétique.** Acetoglycollic acid. [B.]—**A. acétoxy-benzamique.** Acetoxybenzamic acid. See OXYBENZAMIC ACID.—**A. acétulmique.** Acetulmic acid. [B.]—**A. acéturique.** Acetic acid. See *Acetyl* GLYCOCINE.—**A. acétyl-anthraflavique.** Acetylanthraflavic acid. [B.]—**A. acétyleux.** Acetylous acid. See ALDEHYDIC ACID.—**A. acétyl-pyrophosphorique.** Acetylpyrophosphoric acid.—**A. acétyl-vanillique.** Acetvanillic acid. [B.]—**A. achilléique.** Achilleic (aconitic) acid. [B.]—**A. aconitanilique.** Aconitanilic acid. [A.]—**A. aconique.** Aconic acid. [B.]—**A. aconitique.** Aconitic acid. [B.]—**A. acridique.** Acridic acid. [B.]—**A. acrolactique.** Acrolactic acid.—**A. acroléine-sulfureux.** Acroleinsulphurous acid. [B.]—**A. acroléique, A. acrylique.** Acrylic acid. [B.]—**A. adipique.** Adipic acid. [B.]—**A. adipomalique.** Adipomalic acid. [B.] See HYDROXYADIPIC ACID.—**A. adipotartrique.** Adipotartaric acid. [B.] See DIHYDROXYADIPIC ACID.—**A. aérien.** Carbonic acid. [A, 324.] See CARBON *dioxide.*—**A. æscinique.** Æscinic acid.—**A. agaricique.** Agaricic acid. [B.]—**A. aïlanthique.** Ailantic acid. [B.]—**A. alantique.** Alantic acid. [B.]—**A'alcali.** See *Amido*-ACID.—**A'alcool.** See *Alcohol* ACID.—**A'aldéhyde.** See *Aldehyde* ACID.—**A. aldéhyde-sulfureux.** Ethylidenehydroxysulphonic acid. [B.]—**A. aldéhydique.** 1. An aldehydic acid. See under ACID. 2. Aldehydic acid. See ALDEHYDIC ACID.—**A. aldéhydo-diméthyl-protocatéchique.** Aldehydodimethylprotocatechuic (opianic) acid. [B.]—**A. aldéhydo-méthyl-protocatéchique.** Aldehydomethylprotocatechuic (aldehydovanillic) acid. [B.]—**A. aldéhydo-paroxy-benzoïque.** Aldehydoparoxybenzoic acid. [B.]—**A. aldéhyd-orthoxy-benzoïque.** Aldehyd-orthoxybenzoic acid.—**A. aldéhydo-salicylique.** Aldehydosalicylic acid.—**A. aldéhydo-vanillique.** Aldehydovanillic acid.—**A. aldéhydoxybenzoïque.** Aldehydoxybenzoic acid. [B.]—**A. alizarine-sulfonique.** Alizarinsulphonic acid.—**A. alizarique.** Alizaric acid. See PHTHALIC ACID.—**A. allanique.** Allanic acid.—**A. allantoïque.** Alantoic acid. [B.]—**A. allantoxanique.** Allantoxanic acid. [B.]—**A. allanturique.** Allanturic acid.—**A. alliturique.** Allituric acid.—**A. allophanique.** Allophanic acid.—**A. alloxanique.** Alloxanic acid. [B.]—**A. allyl-acétique.** Allylacetic acid.—**A. allyl-dithio-carbamique.** Allyldithiocarbamic acid.—**A. allyl-malonique.** Allylmalonic acid.—**A. allyl-oxybutyrique.** Allyloxybutyric acid.—**A. allyl-sulfocarbamique.** Allylthiocarbamic acid.—**A. allyl-sulfocarbonique.** Allylthiocarbonic acid.—**A. allyl-sulfonique.** Allylsulphonic acid.—**A. allyl-sulfurique.** Allylsulphuric acid; acid sulphate of allyl. [B.] See ALLYL *sulphate.*—**A. allyl-thiocarbamique.** Allylthiocarbamic acid.—**A. allyl-thiocarbonique, A. allyl-xanthique.** Allylthiocarbonic acid. [B.]—**A. aloérésique.** Aloeresic acid. [A, 259.]—**A. aloérétinique.** Aloeretinic acid. [A, 259.]—**A. aloérétique.** Aloeretic acid. [A, 259.]—**A. aloésinique.** Aloesinic acid. [A, 259.]—**A. alorcinique.** Alorcic (alorcinic) acid. [B, 93.]—**A. alpha amido-valérique, A. alpha orselique,** etc. See *Alpha* AMIDOVALERIC ACID, *Alpha* ORSELLINIC ACID, etc.—**A. amalique.** Amalic acid. [B.]—**A. amarique.** Amaric acid. [B.]—**A. ambréique.** Ambreic acid. [B.]—**A. aménylvalérique.** Amenylvaleric acid. [B.]—**A. améthénique.** Amethenic acid. [B.]—**A. amidé.** See *Amido-acid* under ACID.—**A. amidacétique.** Amidoacetic acid; glycocine.—**A. amid-iséthionique.** Amidisethionic acid; taurine. [B.]—**A. amido-acétique.** Amidoacetic acid; glycocine. [B.]—**A. amido-anisique.** Amidoanisic acid. [B.]—**A. amido-barbiturique.** Amidobarbituric acid. [B.]—**A. amido-benzine-sulfonique.** Amidobenzenesulphonic acid. [B.]—**A. amido-benzoïque.** Amidobenzoic acid. [B, 93.]—**A. amido-benzoylacétique.** Amidobenzoylacetic acid. [B.]—**A. amido-butyrique.** Amidobutyric acid. [B.]—**A. amido-camphorique.** Amidocamphoric acid. [B.]—**A. amido-caproïque.** Amidocaproic acid; leucine. [B.]—**A. amido-caprylique.** Amidocaprylic acid. [B.]—**A. amido-chrysophanique.** Amidochrysophanic acid. [B.]—**A. amido-cinnamique.** Amidocinnamic acid. [B.]—**A. amido-coménique.** Amidocomenic acid. [B.]—**A. amido-cuminique.** Amidocumic acid. [B, 93.]—**A. amido-dicyanique.** Dicyanamic acid. [B.]—**A. amido-diméthyl-propionique.** Amidodimethylpropionic acid. See *Beta* AMIDOVALERIC ACID.—**A. amido-dinitro-phénique.** Amidodinitrophenol. [B, 93.] See PICRAMIC ACID.—**A. amido-dracylique.** Paramidobenzoic acid. [B.] See AMIDOBENZOIC ACID.—**A. amido-glutarique.** Amidoglutaric (glutamic) acid. [B.]—**A. amido-hippurique.** Amidohippuric acid. [B.]—**A. amido-hydrocinnamique.** Amidohydrocinnamic (amidophenylpropionic) acid. [B, 38.]—**A. amido-iséthionique.** Amidisethionic acid; taurine. [B.]—**A. amido-isocaproïque.** Amidoisocaproic acid; isoleucine. [B.]—**A. amido-isophtalique.** Amidoisophthalic acid. [B.] See AMIDOPHTHALIC ACID.—**A. amido-isovalérique.** Amidoisovaleric acid. [B.]—**A. amido-lactique.** Amidolactic acid; alanine. [B.]—**A. amido-malonique.** Amidomalonic acid. [B.]—**A. amido-mésitylène-sulfonique.** Amidomesitylenesulphonic acid. [B.]—**A. amido-naphtylsulfureux.** Naphthionic acid. [B.]—**A. amido-œnanthylique.** Amidoœnanthylic acid. [B.]—**A. amido-pentoïque.** Amidopentoic acid. [B.]—**A. amido-phénolsulfonique.** Amidophenolsulphonic acid. [B.]—**A. amido-phénylpropionique.** Amidophenylpropionic acid. [B, 38.]—**A. amido-phénylsulfureux.** Amidobenzenesulphonic acid. [B.]—**A. amido-phtalique.** Amidophthalic acid. [B.]—**A. amido-propionique.** Amidopropionic acid; alanine. [B.]—**A. amido-pyroméconique.** Amidopyromeconic acid. [B.]—**A. amido-salicylique.** Amidosalicylic acid. [B.]—**A. amido-stéarique.** Amidostearic acid.—**A. amido-succinamique.** Amidosuccinamic acid; asparagine. [B.]—**A. amido-succinique.** Amidosuccinic (aspartic) acid.—**A. amido-sulfobenzoïque.** Amidosulphobenzoic acid. [B.]—**A. amido-térephtalique, A. amido-téréphtalique.** Amidoterephthalic acid. [B.] See AMIDOPHTHALIC ACID.—**A. amido-toluène-sulfonique.** Amidotoluenesulphonic acid. [B.]—**A. amido-valérique.** Amidovaleric acid. [B.]—**A's amiques.** Amic acids. See under ACID.—**A. ammonio-chélidonique.** Ammoniochelidonic acid. [B.]—**A. ammonio-disulfonique.** Ammondisulphonic acid. [B.]—**A. amniotique.** Amniotic acid. [B.] See ALLANTOIN.—**A. ampélique.** Ampelic acid. [B.]—**A. amygdalique.** Amygdalic acid. [B.]—**A. amyl-carbonique.** Amylcarbonic (caproic) acid. [B.]—**A. amyl-citrique.** Amylcitric acid.—**A. amyl-décatoïque.** Amyldecatoic acid. [B.]—**A. amyl-disulfo-carbonique.** Amyldithiocarbonic (amylthiocarbonic) acid. [B, 93.]—**A. amyl-dithionique.** Amylsulphonic acid.—**A. amyl-hydroxalique.** Amylhydroxalic acid. [B.] See HYDROXYŒNANTHYLIC ACID.—**A. amylique.** Valeric acid. [B.]—**A. amyl-oxalique.** Amyl oxalic acid. [B, 93.] See AMYL *oxalate.*—**A. amyl-phosphoreux.** Amylphosphorous acid. [B.] See AMYL *phosphite.*—**A. amyl-phosphorique.** Amyl-phosphoric acid. [B.] See AMYL *phosphate.*—**A. amyl-sulfacétique.** Amylsulphacetic acid. [B.]—**A. amyl-sulfhydrique.** Amyl mercaptan. [B, 38.]—**A. amyl-sulfocarbamique.** Amylthiocarbamic acid. [B.]—**A. amyl-sulfocarbonique.** Amylthiocarbonic acid. [B.]—**A. amyl-sulfureux.** Amylsulphonic acid. [B, 38.]—**A. amyl-sulfurique.** Amylsulphuric (isoamylsulphuric) acid. See AMYL *sulphate*—**A. amyl-tartrique.** Amyltartaric acid. See AMYL *tartrate.*—**A. amyl-thiocarbamique.** Amylthiocarbamic acid. [B.]—**A. amyl-thiocarbonique, A. amyl-xanthique.** Amylthiocarbonic acid. [B.]—**A. amyrique.** Amyric acid. [B.]—**A. anabénique.** Oxaluric acid. [B, 93.]—**A. anacardique.** Anacardic acid.—**A. anchoïnique, A. anchoïque.** Anchoic acid. [B.]—**A. anchusique.** Anchusic acid.—**A. anémonique.** Anemonic acid.—**A. angélicique, A. angélique.** Angelic acid. [B.]—**A. angélique anhydre.** Anhydrous angelic acid; angelic anhydride.—**A. anglais.** See *English* SULPHURIC ACID.—**A. anhydre.** An anhydrous acid. See ANHYDRIDE.—**A. anhydro-préhnique.** Anhydroprehnitic acid. [B.]—**A. anhydro-sulfamine-benzoïque.** Anhydrosulphaminbenzoic acid. [B.]—**A. anhydro-sulfurique.** Anhydrosulphuric acid. See PYROSULPHURIC ACID.—**A. anhydro-trimellique, A. anhydro-trimellitique.** Anhydrotrimellitic acid. [B.]—**A. anilamique.** Anilamic (phenylamic) acid. [B.]—**A. anilidique, A. anilique.** Anilic acid. [B.] See INDIGOTIC ACID.—**A. anilo-cyanique.** Anilocyanic (phenylcyanic) acid. [B.]—**A. aniluvitonique.** Aniluvitonic acid. [B.]—**A. animal.** See *Animal* ACID.—**A. anisamique.** Anisamic (oxyanisamic) acid.—**A. anisique.** Anisic acid. [B.]—**A. anisuramique.** Anisuramic acid. [B.]—**A. anthémidique.** Anthemidic acid. [B.]—**A. anthémique.** Anthemic acid. [B.]—**A. anthracène-carbonique.** Anthracenecarbonic acid.—**A. anthracène-sulfonique.** Anthracenesulphonic acid. [B.]—**A. anthranilique.** Anthranilic (orthamidobenzoic) acid. See AMIDOBENZOIC ACID.—**A. anthraquinone-carbonique.** Anthraquin-

onecarbonic acid. [B.]—**A. anthraquinone-disulfonique.** Anthraquinonedisulphonic acid. [B.]—**A. anthraquinone-quinaldine-sulfonique.** Anthraquinonequinaldinesulphonic acid. [B.]—**A. anthraquinone-sulfonique.** Anthraquinonesulphonic acid. [B.]—**A. anthraquinonique.** Anthraquinonic acid; alizarin. [B.]—**A. antimonieux.** Antimonious acid.—**A. antimonique.** Antimonic acid.—**A. antirrhinique.** Antirrhinic acid. [B.]—**A. antitartrique.** Antitartaric acid. [B.] See TARTARIC ACID.—**A. apocrénique.** Apocrenic acid.—**A. apoglucinique, A. apoglucique.** Apoglucic acid. [B.]—**A. apophyllénique.** Apophyllic acid. [B.]—**A. aposorbique.** Aposorbic acid. [B.]—**A. arabique.** Arabic acid; arabin. [A, 260.]—**A. arachidique, A. arachique.** Arachidic acid. [A, 260; B.]—**A. aromatique.** See *Aromatic* ACID.—**A. arsénical.** Arsenic acid.—**A. arsénieux.** See the major list.—**A. arsénio-molybdique.** Arseniomolybdic acid. [B.]—**A. arsénio-monéthylique.** Ethylarsinic acid. [B.]—**A. arsénio-monométhylique.** Methylarsinic acid. [B.]—**A. arsénio-tungstique.** Arseniotungstic acid. [B.]—**A. arsénique.** [Fr. Cod.]. Lat., *acidum arsenicum.* Arsenic acid. [B.]—**A's arsiniques, A's arsoniques.** See *Arsinic* ACIDS.—**A. artanthique.** Artanthic acid. [A, 260.]—**A. asparamique, A. aspartique.** Aspartic acid. [A, 324.]—**A. aspartique actif.** Optically active aspartic acid. [B.]—**A. aspartique inactif.** Optically inactive aspartic acid.—**A. aspertannique.** Aspertannic acid. [B.]—**A. atmosphérique.** Aerial acid (an old term for carbonic acid). [A, 344.] See CARBON *dioxide.*—**A. atractylique.** Atractylic acid. [A, 259.]—**A. atropique.** Atropic acid. [B.]—**A. aurique.** Auric acid. [B.]—**A. axinique.** Axinic acid. [B.]—**A. azélaïque.** Azelaic (anchoic) acid.—**A. azélo-aldéhydique.** Azeloaldehydic acid. [B.]—**A. azobenzoïque.** Azobenzoic acid.—**A. azoléique.** Laurent's name for œnanthylic acid because obtained by the action of nitric (azotic) acid upon oleic acid. [B, 3.]—**A. azomarique.** Azomaric acid. [B, 38.]—**A. azoncarbonique.** Azoncarbonic acid. [B.]—**A. azophosphorique.** Pyrophosphamic acid. [B.]—**A. azoté.** See *Nitrogenous* ACID.—**A. azoteux.** Nitrous acid.—**A. azotique** [Fr. Cod.]. Nitric acid. [B.]—**A. azotique alcoolisé** [Fr. Cod.]. Lat., *acidum nitricum alcoolisatum.* Syn.: *esprit de nitre dulcifié.* A preparation made by mixing 78 parts of the *a. azotique officinal* with 22 parts of water (forming an aqueous solution containing 50 per cent. of pure nitric acid), and adding this mixture gradually to 300 parts of alcohol, the volatile principles evolved by the interaction of the acid and alcohol being allowed to escape. The preparation contains nitrite of ethyl (nitrous ether), and corresponds in part to the *spiritus ætheris nitrosi* of the U. S. Ph. [B.]—**A. azotique anhydre.** Anhydrous nitric acid; pentoxide of nitrogen. [B.]—**A. azotique dilué.** Dilute nitric acid.—**A. azotique du commerce** [Fr. Cod.]. Commercial nitric acid.—**A. azotique monohydraté.** Monohydrated nitric acid; chemically pure nitric acid. [B.]—**A. azotique officinal** [Fr. Cod.], **A. azotique purifié.** Official nitric acid. A purified aqueous solution of nitric acid, containing 63·6 per cent. of the chemically pure acid, and having a sp. gr. of 1·390 at 15° C. [B.]—**A. azoto-sulfurique.** Nitrosulphuric acid. [A, 324.]—**A. azoxy-benzoïque.** Azoxybenzoic acid. [B.]—**A. azulmique.** Azulmic acid. [B.]—**A. balénique.** Balænic acid. [B.]—**A. baphique.** Baphic acid.—**A. barbiturique.** Barbituric acid. [B.]—**A. basique.** A monobasic acid. [A, 324.]—**A. bassique.** Bassic acid. [B, 93.]—**A. bébeerique, A. bébirique.** Bebeeric acid. [B, 93.]—**A. béhénique.** Behenic acid. [B.]—**A. béhénolique.** Behenolic acid. [B.]—**A. béhénoxylique.** Behenoxylic acid. [B.]—**A. belladonique.** Belladonnic acid. [B.]—**A. bénique.** Behenic acid. [B.]—**A. béno-margarique.** Benomargaric acid. [B.]—**A. béno-stéarique.** Benostearic acid. [B.]—**A. benz-acrylique.** Benzacrylic acid.—**A. benzamique.** Benzamic acid.—**A. benzénique.** Benzenic acid. [B, 93.]—**A. benzhydroxamique.** Benzhydroxamic acid. [B.]—**A. benzhydryl-benzoïque.** Benzhydrylbenzoic acid. [B.]—**A. benzilique.** Benzilic acid. [B.]—**A. benzine-disulfonique.** Benzenedisulphonic acid.—**A. benzine-hypochloreux.** Benzene trichlortrihydrate. [B.]—**A. benzine-méthyl-dicarbonique.** Benzenemethyldicarbonic acid. [B.] See URILIC ACID.—**A. benzine-monosulfonique.** Benzenemonosulphonic acid. See BENZENESULPHONIC ACID.—**A. benzine-sulfinique.** Phenylsulphinic acid.—**A. benzine-sulfonique.** Benzenesulphonic acid.—**A. benzine-trisulfonique.** Benzenetrisulphonic acid. [B.]—**A. benzoërésique.** Benzoeretic (amorphous benzoic) acid. [A, 324.]—**A. benzo-glycolique.** Benzoglycollic acid. [B.]—**A. benzoïlique.** Benzoilic (hydrobenzoic) acid. [B, 93.]—**A. benzoïque** [Fr. Cod.]. Benzoic acid.—**A. benzoïque amidé.** Amidobenzoic acid.—**A. benzoïque anhydre.** Benzoic anhydride. [B, 38.]—**A. benzoïque bibromé.** Dibrombenzoic acid. [B.]—**A. benzoïque bichloré.** Dichlorbenzoic acid. [B.]—**A. benzoïque binitré.** Dinitrobenzoic acid.—**A. benzoïque bromé.** Brombenzoic acid. [B.]—**A. benzoïque chloré.** Chlorbenzoic acid. [B.]—**A. benzoïque hydraté.** Hydrated benzoic acid; ordinary benzoic acid. [B, 38.]—**A. benzoïque monobromé.** Monobrombenzoic acid. See BROMBENZOIC ACID.—**A. benzoïque monochloré.** Monochlorbenzoic acid. See CHLORBENZOIC ACID.—**A. benzoïque mononitré.** Mononitrobenzoic acid. See NITROBENZOIC ACID. [B.]—**A. benzoïque nitré.** Nitrobenzoic acid.—**A. benzoïque par sublimation** [Fr. Cod.]. Syn.: *fleurs de benjoin.* Benzoic acid obtained by subliming benzoin. [B.]—**A. benzoïque par voie humide** [Fr. Cod.]. Benzoic acid obtained by the action of slaked lime upon benzoin. [B.]—**A. benzoïque trinitré.** Trinitrobenzoic acid. [B.]—**A. benzo-lactique.** Benzolactic acid. [B.]—**A. benzoléique.** Benzoleic acid. [B.]—**A. benzo-nitrobenzoïque.** Benzonitrobenzoic acid. [A, 324.]—**A. benzo-quinaldine-carbonique.** Benzoquinaldinecarbonic acid. [B.]—**A. benzo-salicylique.** Benzosalicylic acid.—**A. benzo-urique.** Hippuric acid. [B, 93.]—**A. benzoyl-acétique.** Benzoylacetic acid. [B.]—**A. benzoyl-benzoïque.** Benzoylbenzoic acid. [B.]—**A. benzoyl-sulfonique.** Benzoylsulphonic acid. [B.] See under SULPHOBENZOIC ACID.—**A. benzoyl-vanillique.** Benzoylvanillic acid.—**A. benzulmique.** Benzulmic acid. [B.]—**A. benzy-hydroxyamique.** Benzhydroxamic acid. [B.]—**A. benzyl-benzoïque.** Benzylbenzoic acid.—**A. benzylique.** Benzilic acid. [B, 38.]—**A. benzyl-salicylique.** Benzylsalicylic acid.—**A. benzyl-sulfamique.** Benzylsulphamic acid.—**A. benzyl-sulfonique, A. benzyl-sulfureux.** Benzylsulphonic acid. [B.]—**A. berbéronique.** Berberonic acid. [B.]—**A. bêta amido-valérique, bêta orsellique,** etc. See *Beta* AMIDOVALERIC ACID, *Beta* ORSELLINIC ACID, etc.—**A. bétulo-résinique.** Betuloresinic acid. [B.]—**A. bézoardique.** An old term for uric acid. [A, 344.]—**A. bézoarique.** Ellagic acid. [B.]—**A. biatomique.** See *Diatomic* ACID.—**A. bibasique.** See *Dibasic* ACID.—**A. bichloracétique.** Dichloracetic acid.—**A. bichloro-benzoïque.** Dichlorbenzoic acid.—**A. bichloro-salicylique.** Dichlorsalicylic acid. [B.]—**A. bichromique.** Dichromic acid. [B.]—**A. bihydraté.** Dihydrated acid. See *Hydrated* ACID.—**A. bihydrique.** Dihydric acid. See *Diatomic* ACID.—**A. bihydro-carboxylique.** Dihydrocarboxylic acid. [B, 93.]—**A. bilianique.** Bilianic acid. [B.]—**A. bilicholique.** Bilicholic acid. [B.]—**A. bilifellinique.** Bilifellinic acid. [B.]—**A. bilifulvique.** Bilifulvic acid; impure bilifulvin. [B.]—**A. bilique.** Bilic acid. [B.]—**A. binitrobenzoïque.** Dinitrobenzoic acid. [B.]—**A. binitro-naphtalique.** Dinitronaphthol. [A, 259.]—**A. binitro-phénique.** Dinitrophenol. [B.]—**A. bioxy-benzoïque.** Dihydroxybenzoic acid. [B.]—**A. bismuthique.** Bismuthic acid.—**A. bixique.** Bixic acid.—**A. bohéique, A. bohéo-tannique.** Boheic acid. [B.]—**A. bolétique.** Boletic (fumaric) acid. [B.]—**A. bombique, A. bombycique.** Bombic acid. [B.]—**A. boracin, A. boracique, A. borique** [Fr. Cod.]. Boric acid. [A, 344; B.]—**A. borique cristallisé** [Fr. Cod.], **A. borique pur.** Lat., *acidum boricum purissimum.* Crystallized boric acid prepared for medicinal use. [B.]—**A. bornénique.** Campholic acid. [B, 38.]—**A. boro-salicylique.** Borosalicylic acid. [B.]—**A. borussique.** Hydrocyanic acid. [A, 259.]—**A. brasilique.** Brazilic acid; brazilin. [B.]—**A. brassidique.** Brassidic (erucidic) acid. [B.]—**A. brassinique, A. brassique.** Brassic acid. [B.]—**A. brassoléique.** Brassoleic acid. [B.]—**A. brassylique.** Brassylic acid. [B.]—**A. brassylo-aldéhydique.** Brassyloaldehydic acid. [B.]—**A. brésilique.** Brazilic acid; brazilin. [B.]—**A. brom-acétique.** Bromacetic acid. [B.]—**A. brom-acrylique.** Bromacrylic acid. [B.]—**A. brom-adipique.** Bromadipic acid.—**A. brom-angélicique, A. brom-angélique.** Bromangelic acid.—**A. brom-anisique.** Bromanisic acid. [B.]—**A. brom-apophyllénique.** Bromapophyllic acid. [B.]—**A. brom-arsénieux.** Bromarsenious acid. [B.] See ARSENIC *oxybromide.*—**A. brom-érucique.** Bromerucic acid. [B.]—**A. bromhydrique.** See the major list.—**A. bromhydro-éthylcrotonique.** Bromhydroethylcrotonic acid. [B.]—**A. bromique.** Bromic acid. [B.]—**A. brom-iridique.** Bromiridic acid. [B.]—**A. brom-isobutyrique.** Bromisobutyric acid. [B.]—**A. brom-isosuccinique.** Bromisosuccinic acid. [B.]—**A. bromo-acétique.** Bromacetic acid.—**A. bromo-acrylique.** Bromacrylic acid.—**A. bromo-adipique.** Bromadipic acid.—**A. bromo-angélicique, A. bromo-angélique.** Bromangelic acid.—**A. bromo-anisique.** Bromanisic acid.—**A. bromo-arsénieux.** Bromarsenious acid; arsenic oxybromide.—**A. bromo-aurique.** Bromauric acid. [B.]—**A. bromo-benzinesulfonique.** Brombenzenesulphonic acid. [B.]—**A. bromo-benzoïque.** Brombenzoic acid. [B.]—**A. bromo-benzoylique.** Brombenzoylic acid; brombenzoyl. [B.]—**A. bromo-butyrique.** Brombutyric acid. [B.]—**A. bromo-chlor-acétique.** Bromchloracetic acid. [B.]—**A. bromo-cinnamique.** Bromcinnamic acid. [B.]—**A. bromo-coménique.** Bromcomenic acid. [B.]—**A. bromo-crotonique.** Bromcrotonic acid. [B.]—**A. bromo-dracylique.** Bromdracylic (parabrombenzoic) acid. [B, 93.]—**A. bromo-fumarique.** Bromfumaric acid. [B.]—**A. bromo-gallique.** Bromgallic acid. [B.]—**A. bromo-glycolique.** Bromglycollic acid. [B.]—**A. bromo-iridique.** Bromiridic acid. [B.]—**A. bromo-isobutyrique.** Bromisobutyric acid. [B.] See BROMBUTYRIC ACID.—**A. bromo-isosuccinique.** Bromisosuccinic acid. [B.]—**A. bromo-lactique.** Bromlactic acid. [B.]—**A. brom-oléique.** Bromoleic acid. [B.]—**A. bromo-maléique.** Brommaleic acid. [B.] See BROMFUMARIC ACID.—**A. bromo-nitrobenzoïque.** Bromnitrobenzoic acid. [B.]—**A. bromo-nitro-phénolsulfonique.** Bromnitrophenolsulphonic acid. [B.]—**A. bromo-phénolsulfonique.** Bromphenolsulphonic acid. [B.]—**A. bromo-phénylacétique.** Bromphenylacetic acid. [B.]—**A. bromo-phénylmercapturique.** Bromphenylmercapturic acid. [B.]—**A. bromo-platinique.** Bromplatinic acid. [B.]—**A. bromo-propionique.** Brompropionic acid. [B.]—**A. bromo-pyroméconique.** Brompyromeconic acid. [B.]—**A. bromo-quinoléinesulfonique.** Bromquinolinesulphonic acid. [B.]—**A. bromo-salicylique.** Bromsalicylic acid. [B.]—**A. bromo-salylique.** Metabrombenzoic acid. [B.] See BROMBENZOIC ACID.—**A. bromo-subérique.** Bromsuberic acid.—**A. bromo-sulfobenzoïque.** Bromsulphobenzoic acid. [B.]—**A. bromo-toluènesulfonique.** Bromtoluenesulphonic acid. [B.]—**A. bromo-toluïque, A. bromo-toluylique.** Bromtoluic acid. [B.]—**A. bromo-valérique.** Bromvaleric acid. [B.]—**A. bromo-vanillique.** Bromvanillic acid. [B.]—**A. bromoxyl-bromo-coménique.** Bromoxylbromcomenic acid. [B.]—**A. brunolique.** Brunolic acid. [A, 259.]—**A. butinique.** Butinic (arachidic) acid. [B.]—**A. butyl-carbonique.** Butylcarbonic (valeric) acid. [B.]—**A. butyl-formique.** Butylformic (normal valeric) acid. See VALERIC ACID.—**A. butyl-lactique.** Butyl lactic acid. [B.]—**A. butyl-sulfonique.** Butylsulphonic acid. [B.]—**A. butyracétique.** Butyracetic acid. [A, 324.]—**A. butyrique.** Butyric acid.—**A. butyrique normal.** Normal butyric acid. [B.]—**A. butyrique trichloré.** Trichlorbutyric acid. [B.]—**A. butyro-acétique.** Butyroacetic (propionic) acid. [B, 93.]—**A. butyro-furonique.** Butyrofuronic acid. [B.]—**A. butyr-oléique.** Butyroleic acid. [B.]—**A. butyro-nitrique.** Butyronitric (nitropropionic) acid. [A, 324; B.]—**A. butyryl-formique.** Butyrylformic acid. [B.]—**A. cachou-tannique, A. cachou-**

tique. Catechutannic acid (tannin of catechu). [A, 324; B.]—**A. caféanique.** Caffeanic acid. [B.]—**A. caféelique.** Cafeelic acid. [B.]—**A. caféique, A. café-tannique, A. cafique.** Caffeic (caffetannic) acid. [B.]—**A. cafurique.** Caffuric acid. [B.]—**A. caïncique.** Cahincic acid.—**A. calcaire.** Carbonic anhydride. [A, 324.] See CARBON *dioxide*.—**A. calcitrapique.** Calcitrapic acid. [A, 259.]—**A. callutannique.** Callutannic acid.—**A. cambogique.** Gambogic acid. [B.]—**A. camphamique.** Camphoramic acid.—**A. camphanique.** Oxycamphoric anhydride.—**A. camphique.** Camphic acid. [B.]—**A. campho-carbonique.** Camphocarbonic acid. [B.]—**A. campho-glycuronique.** Camphoglycuronic acid. [B.]—**A. campholique.** Campholic acid.—**A. campho-méthylique.** Camphormethylic (methylcamphoric) acid.—**A. camphoramique.** Camphoramic acid.—**A. camphoranilique.** Phenylcamphoramic acid. [B.]—**A. camphorétique.** Camphoretic acid. [B.] — **A. camphorinique.** Camphorinic (ethylcamphoric) acid. [A. 324.]—**A. camphorique.** Camphoric acid. [B.]—**A. camphorique anhydre.** Anhydrous camphoric acid; camphoric anhydride. [B.] — **A. camphorique droit.** Dextrocamphoric acid. [B, 38.] See CAMPHORIC ACID.—**A. camphorique gauche.** Lævocamphoric acid. [A, 324.] See CAMPHORIC ACID.—**A. camphorique inactif.** Inactive camphoric acid. See CAMPHORIC ACID.—**A. camphoronique.** Camphoronic acid. [B.]—**A. camphovinique.** Ethylcamphoric acid. [B, 38.] —**A. camphrénique.** Camphrenic acid. [B, 93.]—**A. camphrésinique.** Camphresinic acid. [B.] — **A. cantharidique, A. cantharique.** Cantharidic acid. [B.]—**A. caprinique, A. caprique.** Capric acid. [B.]—**A. caproïque.** Caproic acid. [B.]—**A. caprylique.** Caprylic acid. [B.]—**A. capsulæscique, A. capsuléique.** Capsulæscic acid. [A, 259; B.]—**A. caramélique.** Caramel. [A, 259.]—**A. carballylique.** Tricarballylic acid. [B.]—**A. carbamique.** Carbamic acid.—**A. carbazotique.** Carbazotic (picric) acid. [B.]—**A. carbo-benzique.** Benzoic acid. [B. 93.]—**A. carbo-benzoïque.** Carbobenzoic (myroxylic) acid. [A, 324; B.]—**A. carbo-cinchoméronique.** Carbocinchomeronic (alpha pyridinetricarbonic) acid. [B.] See PYRIDINETRICARBONIC ACID. — **A. carbo-cinchonique.** Carbocinchonic acid. — **A. carbo-hydroquinonique.** Carbohydroquinonic acid. [B.]—**A. carbolique.** Carbolic acid. [B.]—**A. carbo-naphtolique.** Carbonaphtholic acid. See HYDROXYNAPHTHOIC ACID.—**A. carboneux.** An old term for oxalic acid. [A, 344.]—**A. carbonilique.** Phenylcarbamic acid. [B, 93.]—**A. carbonique.** Carbonic acid.—**A. carbonique liquide.** Liquid carbon dioxide. [A, 324.]—**A. carbonique solide.** Solid carbon dioxide. [A, 324.]—**A. carbo-nitrotoluylique.** Nitrodracylic acid. [B.]—**A. carbo-pyrrolique.** Carbopyrrolic acid. [B.]—**A. carbo-styrilcarbonique.** Carbostyrilcarbonic acid. [B.]—**A. carbo-vinique.** Ethylcarbonic acid. [B.]—**A. carbox-amidobenzoïque.** Carboxamidobenzoic acid. [B.]—**A. carboxamidodracylique.** Carboxamidodracylic acid. [B.] See CARBOXAMIDOBENZOIC ACID.—**A. carboxy-cinchonique.** Carboxycinchonic acid. [A, 259.]—**A. carboxylique.** Carboxylic acid.—**A. carminique.** Carminic acid (carmin). [B.]—**A. carobique.** Carobic acid. [B.]—**A. carotique.** Carotic acid; carotin. [B.] —**A. carthaminique, A. carthamique.** Carthamic acid; carthamin. [A, 260, 324.]—**A. cartha-xanthique.** Carthaxanthic acid. [B.] — **A. carvacrotique.** Carvacrotic acid. [B.] — **A. caryophyllique.** Engenol. [B.]—**A. caryophyllinique.** Caryophyllinic acid. [B.]—**A. caséique.** An obsolete term for lactic acid. [B, 93.]—**A. cassonique.** Cassonic acid. [B.]—**A. catéchique.** Catechuic acid; catechin. [A, 260.] — **A. catéchuïnique.** Catechuinic acid. [B.]—**A. catéchuïque.** Catechuic acid; catechin. [A, 260.] — **A. catéchu-tannique, A. catéchutique, A. catéchuvique, A. catécique.** Tannin of catechu; catechutannic acid. [A.]—**A. cathartique.** Cathartic acid. [A, 260.]—**A. cathartogénique.** Cathartogenic acid. [B.]—**A. céphaélique.** Cephaelic (ipecacuanhic) acid. [B.]—**A. cérébrique.** Cerebric acid. See CEREBRIN.—**A. cérique.** Ceric acid. [B.]—**A. céropique.** Ceropic acid. [B.]—**A. cérosique.** Cerosic acid. [A, 324; B, 38.]—**A. cérotinique, A. cérotique.** Cerotic acid. [A, 324.]—**A. céruïique.** Cœrulic acid. [B.]—**A. cétineélaïque.** Cetinelaic acid. [B.]—**A. cétique.** Cetic acid. [B, 93.] —**A. cétrarique.** Cetraric acid. [B.] —**A. cétyl-acétique.** Cetylacetic acid. [B.]—**A. cétyl-carbonique.** Margaric acid.—**A. cétyl-oxydithio-carbonique, A. cétyl-xanthique.** Cetyloxydithiocarbonic acid. [B.]—**A. cévadique.** Cevadic (sabadillic) acid. [A, 324; B.]—**A. charbonneux.** An old term for carbonic acid. [A, 344.] See CARBON *dioxide*.—**A. chavicique.** Chavicic acid. [B.]—**A. chélidonamique.** Chelidonamic acid. [B.]—**A. chélidoninique.** Chelidoninic acid. [B, 93.]—**A. chélidonique.** Chelidonic acid. [B.]—**A. chéno-cholalique.** Chenocholic acid. [B.]—**A. chéno-taurocholalique.** Chenotaurocholic acid. [B.]—**A. chio-coccique.** Chiococcic acid; cahincin. [B, 93.]—**A. chinovatique.** Quinovatic acid.—**A. chinovique.** Quinovic acid. [A, 259.]—**A. chlor-acétique.** Chloracetic acid. [B.]—**A. chlor-acrylique.** Chloracrylic acid. [B.]—**A. chloranilamidique hydraté.** Chloranilam. [B, 93.]—**A. chlor-anilique.** Chloranilic acid; dichlordioxyquinone. [B.]—**A. chloranisique.** Chloranisic acid. [B.]—**A. chlor-arsenieux.** Chlorarsenious acid; arsenic oxychloride. [B.]—**A. chlor-azoteux.** Nitrosyl chloride. [B.]—**A. chlor-azotique.** 1. Nitrohydrochloric acid. 2. Chloronitric acid (nitroxyl chloride). [B.]—**A. chlor-azotique dilué.** Dilute nitrohydrochloric acid. [B.]—**A. chloreux.** Chlorous acid. [B.]—**A. chlorhydrine-sulfonique.** Chlorhydrinsulphonic acid. [B.]—**A. chlorhydrine-sulfurique.** Chlorhydrinsulphuric acid. [B.]—**A. chlorhydrique.** See the major list.—**A. chlor-hydropyrotartrique.** Chlorhydropyrotartaric acid. [B.] —**A. chlorhypoazotique.** Chlorhyponitric acid; nitrosyl dichloride. [B.] — **A. chlorindaturique, A. chlorindopténique.** Two acids said to be formed by the action of chlorine on indigo. [B, 93.]—**A. chloriodique.** Chloriodic acid. [B, 38.]—**A. chlorique.** Chloric acid.—**A. chlor-isamique.** Chlorisamic acid. [B, 93.] — **A. chlor-isatinique.** Chlorisatinic acid. [B, 93.]—**A. chlor-iséthionique.** Chlorisethionic acid. [B.]—**A. chlor-isocrotonique.** Chlorisocrotonic acid. [B.] — **A. chlor-itamalique.** Chloritamalic acid. [B.] See CHLORHYDROPYROTARTARIC ACID.—**A. chloro-acétique, A. chloro-acrylique, A. chloro-anilique, A. chloro-anisque, A. chloro-arsénieux.** See *A. chloracétique, A. chloracrylique, A. chloranilique, A. chloranisique, A. chlorarsénieux*.—**A. chloro-aurique.** Chlorauric acid. [B.] — **A. chloro-azoteux, A. chloro-azotique.** See *A. chlorazoteux, A. chlorazotique*. — **A. chloro-benzinesulfonique.** Chlorbenzenesulphonic acid. [B.] — **A. chloro-benzoïque.** Chlorbenzoic acid. [B.]—**A. chloro-borique.** Boron trichloride. [B, 93.]—**A. chloro-butyrique.** Chlorbutyric acid. [B.]—**A. chloro-carbonique.** Chlorcarbonic acid. [B.] See CARBON *oxychloride*.—**A. chloro-chromique.** Chlorchromic acid. [B.]—**A. chloro-cinchoninique.** Chlorcinchoninic acid. [B.]—**A. chloro-cinnamique.** Chlorcinnamic acid. [B.]—**A. chloro-citramalique.** Chlorcitramalic acid. [B.] See CHLORHYDROPYROTARTARIC ACID.—**A. chloro-citrique.** Chlorcitric acid. [B.] —**A. chloro-coménique.** Chlorcomenic acid. [B.]—**A. chloro-crotonique.** Chlorcrotonic acid.—**A. chloro-cyanique.** Chlorhydrocyanic acid. [B.] — **A. chloro-dracylique.** Chlordracylic (parachlorbenzoic) acid. [B.]—**A. chlorogénique.** Chlorogenic acid. [B.]—**A. chloro-hypoazotique.** Chlorohyponitric acid (nitrosyl dichloride). [B.]—**A. chloro-iodique.** See *A. chloriodique*. — **A. chloro-iridique.** Chloriridic acid. [B.] **A. chloro-isamique, A. chloro-isatinique, A. chloro-iséthionique, A. chloro-isocrotonique, A. chloro-itamalique.** See *A. chlorisamique, A. chlorisatinique, A. chloriséthionique, A. chlorisocrotonique, A. chloritamalique*.—**A. chloro-lactique.** Chlorlactic acid. [B.]—**A. chloro-maléique.** Chlormaleic acid. [B.]—**A. chloro-mésamalique.** Chlormesamalic acid. [B.] See CHLORHYDROPYROTARTARIC ACID. — **A. chlor-omichmylique.** Chloromichmylic acid. [B, 93.]—**A. chloro-muconique.** Chlormuconic acid. [B.]—**A. chloro-naphtalique.** Chlornaphthalic acid. [B.]—**A. chloro-nitreux.** See *A. chlorazoteux*.—**A. chloro-nitrique.** See *A. chlorazotique*. — **A. chloro-nitrobenzoïque.** Chlornitrobenzoic acid. [B.]—**A. chloro-palladique.** Chloropalladic acid. [B.]—**A. chloro-phénolsulfonique.** Chlorphenolsulphonic acid. [B.]—**A. chloro-phénylique.** Chlorphenol. [B.]—**A. chlorophyllanique.** Chlorophyllanic acid. [B.] —**A. chloro-platineux.** Chloroplatinous acid. [B.]—**A. chloro-platinique.** Chloroplatinic acid. [B.]—**A. chloro-platino-diphosphoreux.** Chlorplatinodiphosphorous acid. [B.] — **A. chloro-platino-phosphoreux.** Chlorplatinophosphorous acid. [B.]—**A. chloro-propionique.** Chlorpropionic acid. [B.]—**A. chloro-quarténylique.** Chlorquartenylic acid. [B.]—**A. chloro-quinoléinecarbonique.** Chlorquinolinecarbonic acid. [B.]—**A. chloro-salicylique.** Chlorsalicylic acid. [B.]—**A. chloro-salylique.** Chlorsalylic acid. [B.] See CHLORBENZOIC ACID.—**A. chloro-spiroyleux.** Chlorsalicylous acid; chlorsalicyl hydride. [B, 93.]—**A. chloro-spiroylique.** Chlorsalicylic acid. [B, 93.] —**A. chloro-subérancarboxylique.** Chlorsuberancarboxylic acid. [B.]—**A. chloro-subérique.** Chlorsuberic acid. [B.]—**A. chloro-sulfonique.** Chlorsulphonic acid. [B.]—**A. chloro-tétracrylique.** Chlortetracrylic (beta chlorcrotonic) acid. [B.] See CHLORCROTONIC ACID. — **A. chloro-toluènesulfonique.** Chlortoluenesulphonic acid. [B.]—**A. chlor-oxalique, A. chlor-oxalovinique.** Chloroxalic acid. [B, 93.]—**A. chlor-oxycarbonique.** Chlorcarbonic acid. [B, 93.] See CARBON *oxychloride*. —**A. chlor-oxynaphtalique.** Chlorhydroxynaphthoquinone. [B, 93.]—**A. chlor-rhodique.** Chlorrhodic acid. [B.]—**A. cholalique.** Cholalic (cholic) acid. [B.]—**A. choléinique, A. choléique.** Choleic (taurocholic) acid. [B.]—**A. choléo-camphorique.** Choleocamphoric (choloidanic) acid. [B.]—**A. cholestérinique, A. cholestérique.** Cholesteric acid. [B.]—**A. cholinique.** Cholinic acid. [B.]—**A. cholique.** Cholic acid. [B.] —**A. cholodinique.** Cholodinic acid. [B.]—**A. choloïdanique.** Choloidanic acid. [B.]—**A. choloïdique.** Cholodinic acid. [B.] —**A. chololique.** Cholic acid. [B, 38.]—**A. cholonique.** Cholonic acid. [B.]—**A. chondroïtique.** Chrondroitic acid. [B.]—**A. chromique.** See the major list.—**A. chrysalyique.** Dinitramidosalylic acid. [B.]—**A. chrysamidique.** Chrysammidic acid. [B, 93.]—**A. chrysamminique, A. chrysammique.** Chrysammic acid. [B.]—**A. chrysanilique.** Chrysanilic acid. [A, 324; B.]—**A. chrysanisique.** Chrysanisic acid. [A, 324; B.] See DINITRAMIDOBENZOIC ACID.—**A. chrysinique.** Chrysinic acid; chrysin. [B.]—**A. chrysolépique.** Picric acid. [A, 324; B.]—**A. chrysophanique.** Chrysophanic acid. [B.]—**A. chyazique.** Porret's term for hydrocyanic acid. [A, 344.] Derived from the letters C (carbon), Hy (hydrogen), Az (azote, or nitrogen), which make up the chemical formula of the body.—**A. chyazique ferruré.** Hydroferrocyanic acid. [A, 344.]—**A. chyazique sulfuré.** Thiocyanic acid. [A, 344.]—**A. cicérique.** Ciceric acid. [A, 344.]—**A. cimicique.** Cimicic acid. [B.]—**A. cinchoméronique.** Cinchomeronic acid. [B.]—**A. cinchonine-disulfonique.** Cinchoninedisulphonic acid. [B.]—**A. cinchonine-sulfonique.** Cinchoninesulphonic acid. [B.]—**A. cinchonine-trisulfonique.** Cinchoninetrisulphonic acid. [B.] —**A. cinchoninique.** Cinchoninic acid. [B.]—**A. cinchonique.** Cinchonic acid.—**A. cincho-tannique.** Cinchotannic (quinotannic) acid. [B.]—**A. cinnaménéyl-acrylique.** Cinnamenylacrylic acid. [B.]—**A. cinnaménéyl-angélicique, A. cinnaménéyl-angélique.** Cinnamenylangelic acid. [B.]—**A. cinnaménéyl-crotonique.** Cinnamenylcrotonic acid. [B.]—**A. cinnamique.** Cinnamic acid.—**A. cinnamo-mandélique.** Phenyloxycrotonic acid. [B.]—**A. cinnoylique.** Hydrocinnamic acid. [B.]—**A. cisso-tannique.** Cissotannic acid. [B.]—**A. citrabromo-pyrotartrique.** Citrabromopyrotartaric acid. [B.] See BROMPYROTARTARIC ACID.—**A. citracartique.** A name (made up of the words *citraconique* and *ars*) given to mesaconic acid. [B.]—**A. citra-chloro-pyrotartrique.** Citrachlorpyrotartaric acid. [B.] See CHLORPYROTARTARIC ACID.—**A. citraconique.** Citraconic acid. See PYROCITRIC ACID.—**A. citra-dibromo-pyrotartrique.** Citradibrompyrotartaric acid. [B.] See DIBROMPYROTARTARIC

ACID.—**A. citramalique.** Citramalic acid. [B.] See HYDROXYPYROTARTARIC ACID.—**A. citratartrique.** Citratartaric acid. [B.] —**A. citribique.** Baup's name for citraconic acid. [B, 3.]—**A. citricique.** Baup's name for itaconic acid. [B, 3.]—**A. citridique.** Citridic (aconitic) acid. [B.]—**A. citrique.** See the major list.—**A. cladonique.** Cladonic acid. [B.]—**A. cocatannique.** Cocatannic acid. [B.]—**A. coccalinique.** Menispermic acid (the variety of malic acid found in *Cocculus indicus*). [B.]—**A. coccinique, A. coccinonique.** Coccinic acid. [A, 324; B, 38, 93.]—**A. coccognidique.** Coccognidic acid. [B, 93.]—**A. cocco-tannique.** Kinotannic acid. [B.]—**A. cocinique, A. coco-stéarique.** Cocinic acid. [B.]—**A. collidine-dicarbonique.** Collidinedicarbonic acid. [B.]—**A. colombique.** Tantalic acid [A, 324]; columbic acid. [B.]—**A. colopholique, A. colophonique.** Colophonic acid. [B.]—**A. columbique.** See *A. colombique.*—**A. coménamique.** Comenamic acid. [B.] —**A. coménique.** Comenic acid. [B.]—**A. conicique, A. coniïque.** Coniic acid. [A, 324; B.]—**A. conjugué.** See *Conjugate* ACID.—**A. convolvulinolique.** Convolvulinolic acid. [B.]—**A. convolvulique.** Convolvulic acid. [B.]—**A. copahivique, A. copahu-résinique, A. copahuvique, A. copaïvique.** Copaivic acid. [B.]—**A. copulé.** See *Conjugate* ACID.—**A. cornique.** Cornic acid; cornin. [B.]—**A. corté-pinitannique.** Cortepinitannic acid. [B, 93.]—**A. corticinique.** Corticinic acid. [B.]—**A. cotarnique.** Cotarnic acid. [B.]—**A. coumarique.** Coumaric acid. [B.]—**A. crayeux, A. crayeux aériforme.** Chalky acid and gaseous chalky acid; old terms for carbonic acid and carbonic-acid gas. [B.] See CARBON *dioxide.*—**A. crénique.** Crenic acid. [B.]—**A. crescentique.** Crescentic acid. [B.]—**A. crésol-disulfonique, A. crésol-disulfureux.** Cresoldisulphonic acid.—**A. crésol-sulfonique, A. crésol-sulfureux, A. crésol-sulfurique.** Cresolphonic acid. [B.]—**A. crésotique.** Cresotic acid. [B.]—**A. crésylique.** Cresylic acid; cresol. [B.]—**A. crésyl-salicylique.** Cresylsalicylic acid. [B.]—**A. crésyl-sulfonique, A. crésyl-sulfureux.** Cresylsulphonic (toluene sulphonic) acid. [B.] —**A. crésyl-sulfurique.** Cresyl-sulphuric acid. [B.] See CRESOLSULPHONIC ACID.—**A. crithmique.** Crithmic acid. [B.]—**A. crocique, A. croconique.** Croconic acid. [B.]—**A. crotaconique.** Crotaconic acid. [B.]—**A. crotonique.** Crotonic acid. [B.]—**A. crotonoléique.** Crotonoleic acid. [B.]—**A. cryptophanique.** Cryptophanic acid.—**A. cubébique.** Cubebic acid. [B.]—**A. cuivrique.** Cupric acid. [A, 324.]—**A. cumarique.** Conmaric acid.—**A. cumène-sulfonique, A. cumène-sulfurique.** Cumenesulphonic acid.—**A. cuményl-acrylique.** Cumenylacrylic acid. [B.]—**A. cuménylangélique.** Cumenylangelic acid. [B.] —**A. cuményl-crotonique.** Cumenylcrotonic acid. [B.]—**A. cuményl-sulfureux.** Cumenesulphonic acid. [B, 38.]—**A. cumidique.** Cumidic acid. [B.]—**A. cuminamique.** Cuninamic acid. [B.]—**A. cuminique, A. cumique.** Cumic acid. [B.]— **A. cuminurique.** Cuminuric (oxycuminamic) acid. [B.]—**A. curcumique.** Curcumin. [B.]—**A. cyamélurique.** Cyameluric acid. [B.]—**A. cyanacétique.** Cyanacetic acid. [B.]—**A. cyanhydrique** [Fr. Cod.]. Hydrocyanic acid. [B.]—**A. cyanhydrique dissous au 100e** [Fr. Cod.], **A. cyanhydrique officinal.** An aqueous solution of hydrocyanic acid containing 1 per cent. by volume of the anhydrous acid. [B.]—**A. cyanhydrique végétal.** A preparation made by dissolving 4 parts of oil of bitter almonds in 35 parts each of rectified spirit and distilled water. [B.]— **A. cyanilique.** Cyanilic acid. [B.]—**A. cyanique.** Cyanic acid. [B.]—**A. cyano-carbonique, A. cyano-formique.** Cyanformic acid. [B.]—**A. cyano-propionique.** Cyanpropionic acid. [B.] —**A. cyanur-diamique.** Cyanurdiamic acid; ammeline. [B.] —**A. cyanurénique, A. cyanurique.** Cyanuric acid. [B.]—**A. cyanur-monaminique.** Cyanurmonamic acid; ammelide. [B.] —**A. cyclopique.** Cyclopic acid. [B.]—**A. cymène-sulfonique.** Cymenesulphonic acid. [B.]—**A. cyminique.** Cumic acid. [A, 324.]—**A. cynurénique.** Cynurenic acid. [B.]—**A. damalurique.** Damaluric acid. [B.]—**A. dammarique.** Dammaric acid. [B.]—**A. dammarylique.** Dammarylic acid. [B.] —**A. damolique.** Damolic acid. [B.]—**A. de benjoin.** Benzoic acid. [B.]—**A. décacrylique.** Decacrylic acid. [B.]—**A. décatoïque, A. décylique.** Decatoic (capric) acid. [B.]—**A. de fer.** Ferric acid. [A, 324.]—**A. de fourmis.** Formic acid. [B.] **A. de gomme laque.** Arabic acid; arabin. [A. 324.]—**A. déhydracétique.** Dehydracetic acid. [B.]—**A. déhydro-cholalique.** Dehydrocholalic acid. [B.]—**A. déhydro-mucique.** Dehydromucic acid. [B.]—**A. de l'ambre jaune.** Succinic acid. [A, 344.] —**A. delphinique.** Delphinic acid (valerianic acid obtained from the dolphin). [B.]—**A. de l'urine.** See ACID *of urine.*—**A. de mellite.** Mellitic acid. [A, 324.]—**A. déoxy-benzilique.** Deoxybenzilic (diphenylacetic) acid. [B.]—**A. déoxy-glutanique.** Deoxyglutanic (glutaric) acid. [B.]—**A. déoxy-glutarique.** Pyrotartaric acid. [B.]—**A. de Scheele.** Tungstic acid. [A, 324.]—**A. de sel commun.** Acid of common salt (hydrochloric acid). [A, 324.]—**A. de soufre.** Sulphuric acid. [A, 324.]—**A. désoxalique.** Desoxalic acid. [B.]—**A. désoxy-glutanique, A. désoxy-glutarique.** See *A. déoxyglutanique, A. déoxy-glutarique.*—**A. de sucre.** Oxalic acid. [B, 92.]—**A. de ver à soie.** Silk-worm acid. [B.] See BOMBIC ACID.—**A. dextro-camphorique.** Dextrocamphoric acid. See CAMPHORIC ACID.—**A. dextronique.** Dextronic acid. [B.]—**A. dextro-pimarique.** Dextropimaric acid. [B.] See PIMARIC ACID.—**A. dextro-racémique.** Dextroracemic (dextrotartaric) acid. See TARTARIC ACID.—**A. dextrose-sulfurique.** Dextrose sulphuric acid. [B.]—**A. dextro-tartrique.** Dextrotartaric acid. See TARTARIC ACID.—**A. diacéto-anthraflavique.** Diacetoanthraflavic acid. [B.]—**A. diacéto-tartrique.** Diacetotartaric acid. [B.]—**A. diacétyl-pyromécazonique.** Diacetylpyromecazonic acid. [B.]—**A. diacrylique.** Diacrylic acid. [B.] —**A. dialdanique.** Dialdanic acid. [B.]—**A. diallyl-acétique.** Diallylacetic acid. [B.]—**A. diallyl-malonique.** Diallylmalonic acid. [B.]—**A. diallyl-oxalique, A. diallyl-oxyacétique.** Diallyloxalic (diallyloxyacetic) acid. [B.]—**A. dialurique.** Dialuric acid. [B.]—**A. diamido-benzoïque.** Diamidobenzoic acid. [B.]—**A. diamido-cuminique.** Dioxycuminamic acid. [B, 38.] —**A. diamido-diphénique.** Diamidodiphenic acid. [B.]—**A. diamyl-oxalique.** Diamyloxalic acid. [B, 93.]—**A. diatérébique.** Diaterebic acid. [B.]—**A. diatomique.** See *Diatomic* ACID.—**A. diatropique.** Diatropic acid. [B.]—**A. diazo-amidobenzoïque.** Diazoamidobenzoic acid. [B.]—**A. diazo-benzine-sulfonique.** Diazobenzenesulphonic acid. [B.]—**A. diazo-benzoïque.** Diazobenzoic acid. [B.]—**A. diazo-phénolsulfonique.** Diazophenolsulphonic acid. [B.]—**A. diazo-phénylsulfurique.** Diazophenylsulphuric acid.—**A. diazoxybenzoïque.** Diazoxybenzoic acid. [B.]—**A. dibasique.** See *Dibasic* ACID.—**A. dibenzilique.** Dibenzilic acid. [B.]—**A. dibenzy-hydroxamique.** Dibenzyhydroxamic acid. [B.]—**A. dibenzyl-carboxylique.** Dibenzylcarboxylic acid. [B.]—**A. dibenzyl-dicarbonique.** Dibenzyldicarbonic acid. [B.]—**A. dibenzyl-phosphonique.** Dibenzylphosphonic acid. [B.]—**A. dibenzyl-sulfonique.** Dibenzylsulphonic acid. [B.]—**A. dibenzyl-tétrasulfonique.** Dibenzyltetrasulphonic acid. [B.]—**A. dibrom-acétique.** Dibromacetic acid. [B.]—**A. dibrom-acrylique.** Dibromacrylic acid. [B.]—**A. dibrom-adipique.** Dibromadipic acid. [B.]—**A. dibrom-amidobenzoïque.** Dibromamidobenzoic acid. [B.]—**A. dibrom-hydroéthyl-crotonique.** Dibromhydroethylcrotonic acid. [B.]—**A. dibrom-isocaproïque.** Dibromoiscaproic acid. [B.] See DIBROMCAPROIC ACID.—**A. dibromo-acétique, A. dibromo-acrylique, A. dibromo-adipique, A. dibromo-amidobenzoïque.** See *A. dibrom-acétique, A. dibrom-acrylique. A. dibrom-adipique, A. dibrom-amidobenzoïque.*—**A. dibromo-barbiturique.** Dibrombarbituric acid. [B.]—**A. dibromo-béhénique, A. dibromo-bénique.** Dibrombehenic acid. [B.]—**A. dibromo-benzoïque.** Dibrombenzoic acid. [B.]—**A. dibromo-butyrique.** Dibrombutyric acid. [B.]—**A. dibromo-crotonique.** Dibromcrotonic acid. [B.]—**A. dibromo-gallique.** Dibromgallic acid. [B.]—**A. dibromo-isocaproïque.** Dibromisocaproic acid. —**A. dibromo-lactique.** Dibromlactic acid. [B.]—**A. dibromo-malonique.** Dibrommalonic acid. [B.]—**A. dibromo-nitrobenzoïque.** Dibromnitrobenzoic acid. [B.]—**A. dibromo-palmitique.** Dibrompalmitic acid. [B.]—**A. dibromo-propionique.** Dibrompropionic acid. [B.]—**A. dibromo-pyromucique.** Dibrompyromucic acid. [B.]—**A. dibromo-pyroracémique.** Dibrompyroracemic acid. [B.]—**A. dibromo-pyrotartrique.** Dibrompyrotartaric acid. [B.]—**A. dibromo-pyruvique.** Dibrompyroracemic acid. [B.]—**A. dibromo-salicylique.** Dibromsalicylic acid. [B.]—**A. dibromo-stéarique.** Dibromstearic acid. [B.]—**A. dibromo-subérique.** Dibromsuberic acid. [B.] —**A. dibromo-succinique.** Dibromsuccinic acid. [B.]—**A. dibromo-undécylique.** Dibromundecylic (dibromhendecatoic) acid. [B.]—**A. dibromo-valérique.** Dibromvaleric acid. [B.] —**A. dicarbo-naphtalique.** Dicarbonaphthalic acid. [B.]—**A. dichlor-acétique.** Dichloracetic acid. [B.]—**A. dichlor-acétonique.** Dichloracetonic acid. [B.]—**A. dichlor-acrylique.** Dichloracrylic acid. [B.]—**A. dichlor-isobutyrique.** Dichlorisobutyric acid. [B.]—**A. dichloro-acétique, A. dichloro-acétonique, A. dichloro-acrylique.** See *A. dichlor-acétique, A. dichlor-acétonique, A. dichlor-acrylique.*—**A. dichloro-benzoïque.** Dichlorbenzoic acid. [B.]—**A. dichloro-isobutyrique.** Dichlorisobutyric acid.—**A. dichloro-lactique.** Dichlorlactic acid. [B.]—**A. dichloro-phtalique.** Dichlorphthalic acid. [B.] —**A. dichloro-picolinique, A. dichloro-pyridinecarbonique.** Dichlorpyridinecarbonic acid. [B.]—**A. dichloro-propionique.** Dichlorpropionic acid. [B.]—**A. dichloro-salicylique.** Dichlorsalicylic acid. [B.]—**A. dichloroxy-picolinique.** Dichloroxypicolinic acid. [B.]—**A. diconique.** Diconic acid. [B.]— **A. dicuminamique.** Dioxycuminamic acid.—**A. dicyanamique.** Dicyanamic acid. [B.]—**A. dicyanique.** Dicyanic acid. [B.]—**A. dicyan-oxy-isobutyrique.** Dicyanoxyisobutyric acid. [B.]—**A. diéth-acétique.** Diethacetic acid. [B.]—**A. diéthoxalique.** Diethoxalic acid. [B.]—**A. diéthoxy-glyoxylique.** Diethoxyglyoxylic acid. [B.]—**A. diéthyl-acétique.** Diethacetic acid.—**A. diéthyl-amidobenzoïque.** Diethylamidobenzoic acid. [B.]—**A. diéthyl-anilinesulfonique.** Diethylanilinesulphonic acid. [B.]—**A. diéthyl-arsinique.** Diethylarsinic acid. [B.]—**A. diéthyl-citrique.** Diethylcitric acid. [B.]—**A. diéthyl-éthylènelactique.** Diethethylenelactic acid. [B.]—**A. diéthyl-glyoxylique.** Diethylglyoxylic acid. [B.]—**A. diéthylidene-lactamique.** Diethylidenelactamic acid. [B.]—**A. diéthyl-isocyanurique.** Diethylisocyanuric acid. [B.]—**A. diéthyl-malonique.** Diethylmalonic acid. [B.] See PIMELIC ACID.—**A. diéthyl-métamido-benzoïque.** Diethylmetamidobenzoic acid. See DIETHYLAMIDOBENZOIC ACID.—**A. diéthyl-oxalique.** Diethoxalic acid. See HYDROXYCAPROIC ACID. [B.]—**A. diéthyl-oxamique.** Diethyloxamic acid. [B.]—**A. diéthyl-oxyacétique.** Diethyloxyacetic (diethoxalic) acid. See HYDROXYCAPROIC ACID. [B.]—**A. diéthyl-oxybutyrique.** Hydroxydiethylbutyric acid. [B.] See HYDROXYCAPRYLIC ACID. [B.]—**A. diéthyl-phosphinique.** Diethylphosphinic acid. [B.]—**A. diéthyl-phosphorique.** Diethylphosphoric acid. See ETHYL *phosphate.*—**A. diéthyl-protocatéchique.** Diethylprotocatechuic acid. [B.]—**A. digallique.** Digallic acid. [B.]—**A. digitaléique.** Digitaleic acid. [B.]—**A. digitalinique, A. digitalique.** Digitalic acid. [B.]—**A. digitaloinïque.** Digitaloic acid. [B.]—**A. digitoléique.** Digitoleic acid. [B.]—**A. diglycolamidique, A. diglycolamique.** Diglycollamic acid. [B.]—**A. diglycolique.** Diglycollic acid; glycollic anhydride. [B.]—**A. diheptyl-acétique.** Diheptylacetic acid. [B.]—**A. dihydracrylamique.** Dihydracrylamic acid. [B.]—**A. dihydracrylique.** Dihydracrylic acid. [B.] —**A. dihydrique.** Dihydric acid. See *Diatomic* ACID.—**A. dihydro-carbonylique.** Rhodizonic acid. [B.]—**A. dihydro-carboxylique.** Dihydrocarboxylic acid. [B.]—**A. dihydro-phtalique.** Dihydrophthalic acid. [B.]—**A. dihydro-téréphtalique, A. dihydro-téréphtalique.** Dihydroterephthalic acid. [B.]—**A. dihydroxy-adipique.** Dihydroxyadipic acid. [B.]—**A. dihydroxy-benzoïque.** Dihydroxybenzoic acid. [B.]— **A. dihydroxy-cinnamique.** Dihydroxycinnamic (caffeic) acid.

[B.]—**A. dihydroxy-propionique.** Dihydroxypropionic (glyceric) acid. [B.]—**A. dihydroxy-succinique.** Dihydroxysuccinic (tartaric) acid. quinoléine-benzocarbonique. Paraquinolinebenzocarbonic acid. [B.] See QUINOLINEBENZOCARBONIC ACID.—**A. para-quinoléinesulfonique.** Paraquinolinesulphonic acid. [B.] See QUINOLINESULPHONIC ACID.—**A. para-silicique.** Parasilicic acid. [B.]—**A. para-sorbique.** Parasorbic acid. [B.] See SORBIC ACID.—**A. parasulfo-benzoïque.** Parasulphobenzoic acid. [B.] See SULPHOBENZOIC ACID.—**A. parasulfo-crésylique, A. parasulfo-toluïdique.** Paratoluenesulphonic acid. [B.] See TOLUENESULPHONIC ACID.—**A. para-tartralique.** Paratartralic acid. [B, 93.]—**A. para-tartrélique.** Paratartrelic acid. [B, 93.]—**A. para-tartrique.** Paratartaric (racemic) acid. [B, 93.] See TARTARIC ACID.—**A. para-tartrovinique.** Ethylracemic acid. [B.] See ETHYL *tartrate.*—**A. para-thionique.** Parathionic acid. The same as ethylsulphuric acid. [B, 93.] See ETHYL *sulphate.*—**A. para-toluènesulfonique.** Paratoluenesulphonic acid. [B.] See TOLUENESULPHONIC ACID.—**A. para-toluïque, A. para-toluylique.** Paratoluic acid. [B.] See TOLUIC ACID.—**A. para-toluyl-sulfureux.** Paratoluenesulphonic acid. [B.] See TOLUENESULPHONIC ACID.—**A. para-xylique, A. para-xylylique.** Paraxylic acid. [B.] See XYLIC ACID.—**A. par-ellagique.** Rufigallic acid. [B.]—**A. parellique.** Parellic acid. [B.]—**A. parhydroxy-benzoïque.** Parahydroxybenzoic acid. [B.] See HYDROXYBENZOIC ACID.—**A. parhydroxy-cinnamique.** Parahydroxycinnamic (paracoumaric) acid. [B.] See COUMARIC ACID.—**A. pariétinique, A. pariétique.** Chrysophanic acid. [B, 93.]—**A. parillinique, A. parillique.** Parillinic acid ; smilacin. [B, 92, 93.]—**A. pariodo-benzinesulfonique.** Pariodobenzenesulphonic acid. [B.] See IODBENZENESULPHONIC ACID.—**A. pariodo-benzoïque.** Pariodobenzoic acid. [B.] See IODBENZOIC ACID.—**A. paroxy-benzamique.** Paramidobenzoic acid. [B, 93.] See AMIDOBENZOIC ACID.—**A. paroxy-benzoïque.** Parahydroxybenzoic acid. [B.] See HYDROXYBENZOIC ACID.—**A. paroxy-cinnamique.** Paracoumaric acid. See COUMARIC ACID.—**A. paroxy-phénacéturique.** Paroxyphenaceturic acid. [B.]—**A. paroxy-phényl-acétique.** Paroxyphenylacetic acid. [B.] See under HYDROXYTOLUIC ACID.—**A. paroxy-phénylène-amidopropionique.** Tyrosine. [B.]—**A. paroxy-phényl-propionique.** Hydroparacoumaric acid. [B.] See HYDROCOUMARIC ACID.—**A. paullinitannique.** Paullinitannic acid. [B.]—**A. pectique.** Pectic acid. [B.]—**A. pecto-lactique.** Pectolactic acid. [B.]—**A. pectosique.** Pectosic acid. [B.]—**A. pélargonique.** Pelargonic acid. [B.]—**A. pélargonique anhydre.** Pelargonic anhydride.—**A. pélopique.** Pelopic (niobic) acid. [A, 324.]—**A. pentabasique.** See *Pentabasic* ACID.—**A. pentacétyl-tannique.** Pentacetotannic acid. [B.]—**A. pentachloréthyl-oxalique.** Chloroxalic acid ; chloroxethide. [B, 38.]—**A. pentadécatoïque, A. pentadécylique.** Pentadecatoic acid. [B.]—**A. pentastannique.** Pentastannic (metastannic) acid. [B, 93.]—**A. pentathionique.** Pentathionic acid. [B.]—**A. pentatomique.** See *Pentatomic* ACID.—**A. pentinique.** Pentinic acid. [B.]—**A. pentylique.** Valeric acid. [B.]—**A. peraurique.** Auric acid ; trioxide of gold. [A, 324.]—**A. perbromique.** Perbromic acid. [B, 38.]—**A. perchlorique.** Perchloric acid. [B.]—**A. perchromique.** Perchromic acid. [B.]—**A. periodique.** Periodic acid. [B.]—**A. perlé.** See *A. ourique.*—**A. permanganique.** Permanganic acid. [B.]—**A. perruthénique.** Perruthenic acid ; ruthenium tetroxide. [B, 93.]—**A. persulfo-cyanhydrique, A. persulfo-cyanique, A. persulfo-dicyanique.** Perthiocyanic acid. [B.]—**A. persulfurique.** Persulphuric acid. [B, 93.]—**A. perthio-cyanique, A. perthio-dicyanique.** Perthiocyanic acid. [B.]—**A. phanolique.** Carbolic acid. [B, 92.]—**A. phellonique.** Phellonic acid. [B.]—**A. phén-acéturique.** Phenaceturic acid. [B.]—**A. phén-aconique.** Phenaconic (fumaric) acid. [B.]—**A. phén-acrylique.** Phenacrylic (cinnamic) acid. [B.]—**A. phénanthrène-carbonique.** Phenanthrenecarbonic acid. [B.]—**A. phénanthrène-glycolique.** Phenanthreneglycollic acid. [B.]—**A. phénanthrène-sulfonique.** Phenanthrenesulphonic acid. [B.]—**A. phéneux.** Carbolic acid. [B.]—**A. phénicine-sulfurique.** Phœnicinsulphuric acid. [B.]—**A. phénique.** See the major list. **A. phénoïque.** Phenoic acid. [B.]—**A. phénol-benzoïque.** Phenolbenzoic (hydroxybenzoic) acid. [B.]—**A. phénol-dicarbonique.** Phenoldicarbonic acid. [B.]—**A. phénol-disulfonique.** Phenoldisulphonic acid. [B.]—**A. phénol-métasulfonique.** Phenolmetasulphonic acid. [B.] See PHENOLSULPHONIC ACID.—**A. phénol-monosulfonique.** Phenolmonosulphonic acid. [B.] See PHENOLSULPHONIC ACID.—**A. phénol-orthoparadisulfonique.** Phenolorthoparadisulphonic acid. [B.] See PHENOLDISULPHONIC ACID.—**A. phénol-orthosulfonique.** Phenolorthosulphonic acid. [B.] See PHENOLSULPHONIC ACID.—**A. phénol-parasulfonique.** Phenolparasulphonic acid. [B.] See PHENOLSULPHONIC ACID.—**A. phénol-sulfonique.** Phenolsulphonic acid. [B.]—**A. phénol-sulfurique.** Phenolsulphuric acid. [B.]—**A. phénol-toluylique, A. phénol-toluïque.** Hydroxytoluic acid. [B.]—**A. phénol-tricarbonique.** Phenoltricarbonic acid. [B.]—**A. phénol-trisulfonique.** Phenoltrisulphonic acid. [B.]—**A. phénomalique.** Phenomalic acid. [B, 93.]—**A. phényl-acétique.** Phenylacetic acid. [B.] See under TOLUIC ACID.—**A. phényl-acéturique.** Phenaceturic acid. [B.]—**A. phényl-acrylique.** Phenacrylic acid. [B.] See CINNAMIC and ATROPIC ACID.—**A. phénylamique.** Phenylamic acid.—**A. phényl-amidopropionique.** Phenylamidopropionic acid. [B.] See AMIDOPHENYLPROPIONIC ACID.—**A. phényl-angélicique, A. phényl-angélique.** Phenylangelic acid. [B.]—**A. phényl-arsonique.** Phenylarsonic acid. [B.]—**A. phényl-benzoïque.** Phenylbenzoic acid. [B.] See PHENYLPHENYLENECARBONIC ACID.—**A. phényl-borique.** Phenylboric acid. [B.]—**A. phényl-bromacrylique, A. phényl-bromoacrylique.** Phenylbromacrylic acid.—**A. phényl-bromolactique.** Phenylbromolactic acid. [B.]—**A. phényl-camphoramique.** Phenylcamphoramic acid. [B.]—**A. phényl-carbamique.** Phenylcarbamic acid. [B, 93.]—**A. phényl-carbazinique.** Phenylcarbazinic acid. [B.]—**A. phényl-chlorolactique.** Phenylchlorlactic acid. [B.]—**A. phényl-crotonique.** Phenylcrotonic acid. [B.]—**A. phényl-cyanique.** Phenylcyanic acid. [B.]—**A. phényl-cyanurique.** Phenylcyanuric acid. [B, 93.] See PHENYL *cyanurate.*—**A. phényl-dibromopropionique.** Phenyldibrompropionic acid. [B.]—**A. phénylène-diacétique.** Phenylenediacetic acid. [B.] See under CUMIDIC ACID.—**A. phénylène-dicarbonique.** Phenylenedicarbonic acid. [B.] See PHTHALIC ACID.—**A. phénylène-sulfureux.** Benzenedisulphonic acid. [B, 38.]—**A. phényl-glycolique.** Phenylglycollic acid. [B.] See under HYDROXYTOLUIC ACID.—**A. phényl-glycuronique.** Phenylglycuronic acid. [B.]—**A. phényl-hydracrylique.** Phenylhydracrylic (tropic) acid. [B.] See PHENYLLACTIC ACID.—**A. phényl-hydroxypropionique.** Phenylhydroxypropionic (phenyllactic) acid. [B.]—**A. phénylique.** Carbolic acid. [B.]—**A. phényl-lactique.** Phenyllactic acid. [B.]—**A. phényl-mercapturique.** Phenylmercapturic acid. [B.]—**A. phényl-oxamique.** Phenyloxamic acid. [B.]—**A. phényl-oxyacrylique.** Phenyloxyacrylic acid. [B, 93.]—**A. phényl-oxycrotonique.** Phenyloxycrotonic acid. [B, 93.]—**A. phényl-oxypropionique.** Phenyloxypropionic (phenyllactic) acid. [B.]—**A. phényl-phénylène-carbonique.** Phenylphenylenecarbonic acid. [B.]—**A. phényl-phénylène-sulfonique.** Phenylphenylenesulphonic acid. [B.]—**A. phényl-phosphinique, A. phényl-phosphonique.** Phenylphosphonic acid. [B.]—**A. phényl-phtalamique.** Phenylphthalamic (phthalanilic) acid. [B.]—**A. phényl-propiolique.** Phenylpropiolic acid. [B.]—**A. phényl-propionique.** Phenylpropionic acid. [B.]—**A. phényl-propyl-glycolique.** Phenylpropylglycollic acid. [B.]—**A. phényl-pyridinecarbonique.** Phenylpyridinecarbonic acid. [B.]—**A. phényl-pyridinedicarbonique.** Phenylpyridinedicarbonic acid. [B.]—**A. phényl-subéramique.** Phenylsuberamic acid. [B.]—**A. phényl-succinamique.** Phenylsuccinamic acid. [B.]—**A. phényl-succinique.** Phenylsuccinic acid. [B.]—**A. phényl-sulfacétique.** Phenylsulphacetic acid. [B.]—**A. phényl-sulfinacétique.** Phenylsulphinacetic acid. [B.]—**A. phényl-sulfinique.** Phenylsulphinic acid. [B.]—**A. phényl-sulfocarbazinique.** Phenylthiocarbazinic acid. [B.]—**A. phényl-sulfonacétique.** Phenylsulfonacetic acid. [B.]—**A. phényl-sulfonique.** Phenylsulphonic (benzenesulphonic) acid. [B.]—**A. phényl-sulfopropionique.** Sulphophenylpropionic acid. [B.]—**A. phényl-sulfureux.** 1. Phenylsulphonic (benzenesulphonic) acid. 2. Phenylsulphinic acid. [B, 93.]—**A. phényl-sulfurique.** 1. Phenylsulphuric acid. 2. Benzenesulphonic acid. [B, 93.]—**A. phényl-tartramique.** Phenyltartramic acid. [B.]—**A. phényl-thiocarbazinique.** Phenylthiocarbazinic acid. [B.]—**A. phlorétamique.** Phloretamic acid. [B.]—**A. phlorétique.** Phloretic acid. [B.]—**A. phloridzique.** Phloridzin. [B.]—**A. phlorylique.** Phlorol. [B.]—**A. phocénique.** Phocœnic (valeric) acid. [B.]—**A. phosphacétique.** Phosphacetic acid. [A, 324.]—**A. phosphamique.** Phosphamic acid. [B.]—**A. phosphatique.** Phosphatic (hypophosphoric) acid. [A, 306 ; B, 93.]—**A. phosphényleux.** Phosphenylic acid. [B, 93.]—**A. phosphénylique.** Phenylphosphonic acid. [B, 93.]—**A. phosphinique.** See *Phosphinic* ACID.—**A. phospho-bergamique.** Phosphobergamic acid. [B.]—**A. phospho-bivinique.** Diethylic hydrogen phosphate. [B, 93.] See ETHYL *phosphate.*—**A. phospho-glycérique.** Phosphoglyceric (glycerinphosphoric) acid. [B, 93.]—**A. phosphomolybdique.** Phosphomolybdic acid. [B.]—**A. phospho-platinique.** Phosphoplatinic acid. [B.]—**A. phosphoreux.** Phosphorous acid.—**A. phosphorique.** See major list.—**A. phospho-tungstique.** Phosphotungstic acid. [B.]—**A. phosphovinique.** Phosphovinic (ethylphosphoric) acid. [B, 93.] See ETHYL *phosphate.*—**A. photo-santonique.** Photosantonic acid. [B.]—**A. phtalamique.** Phthalamic acid. [B.]—**A. phtalanilique.** Phthalanilic acid. [B.]—**A. phtalique.** Phthalic acid. [B, 38.]—**A. phtalique anhydre.** Phthalic anhydride. [B.]—**A. phtorique.** Hydrofluoric acid. [B.]—**A. phtoro-borique.** Fluoboric acid. [B.]—**A. phtoro-silicique.** Silicofluoric acid. [B.]—**A. phycique.** Phycic acid. [B.]—**A. phyllocyanique.** Phyllocyanic acid. [B, 93.]—**A. physétique, A. physétoléique.** Physetic (hypogæic) acid. [B.]—**A. phytolaccique, A. phytolacique.** Phytolaccic acid. [B, 92, 93.]—**A. picoline-carbonique.** Picolinecarbonic acid. [B.]—**A. picoline-dicarbonique.** Picolinedicarbonic acid. [B.]—**A. picoline-tétracarbonique.** Picolinetetracarbonic acid. [B.]—**A. picoline-tricarbonique.** Picolinetricarbonic acid. [B.]—**A. picolinique.** Picolinic acid. [B.]—**A. picramique.** Picramic acid. [B.]—**A. picranisique.** Picranisic (picric) acid. [B.]—**A. picrino-nitrique.** Picric acid. [B.]—**A. picrino-nitrique réduit.** Rubinonitric (picramic) acid. [B, 93.]—**A. picrique** [Fr. Cod.]. Picric acid.—**A. picro-cyamique.** Picrocyamic (isopurpuric) acid. [B.]—**A. picro-cyanique.** Picrocyanic acid. [B.]—**A. picro-podophyllique.** Picropodophyllic acid. [B.]—**A. picrotoxique.** Picrotoxic acid. See PICROTOXIN.—**A. pikrino-nitrique, A. pikrino-nitrique réduit.** See *A. picrino-nitrique* and *A. picrino-nitrique réduit.*—**A. pimarique.** Pimaric acid. [B.]—**A. pimélique.** Pimelic acid. [B.]—**A. pimentique.** Eugenic acid ; eugenol. [B, 93.]—**A. pini-cor-tannique.** Pinicortannic acid. [B, 93.]—**A. pinique.** Pinic acid. [B.]—**A. pinitannique.** Pinitannic acid. [B, 92, 93.]—**A. pipérique.** Piperic acid. [B.]—**A. pipéronylique.** Piperonylic acid. [B.]—**A. pipitzahuïque.** Pipitzahoic acid. [B, 93.]—**A. pitixylonique.** Pitixylonic acid. [B.]—**A. pivalique.** Pivalic (trimethacetic) acid. [B.] See VALERIC ACID.—**A. platinique.** Platinic acid. [A, 324.]—**A. plantini-thiocyanique.** Platinithiocyanic acid. [B.]—**A. platino-cyanhydrique, A. platino-cyanique.** Hydroplatinocyanic acid. [B.]—**A. plombique.** Plumbic acid ; lead peroxide. [B.]—**A. plumiérique.** Plumieric acid. [B.]—**A. pneumique.** Pneumic acid. [A, 306.]—**A. podocarpique.** Podocarpic acid. [B.]—**A. podophyllinique.** Podophyllinic acid ; the acid resin obtained from podophyllum. [B.]—**A. podophyllique.** Podophyllic acid. [B.]—**A. polyatomique.** See *Polyatomic* ACID.—**A. polybasique.** See *Polybasic* ACID.—**A. polychromatique, A. polychromique.** Polychromic (aloetic) acid. [A, 324 ; B, 92, 93.]—**A. polygalique.** Polygalic acid ; polygalin. [B, 92.]—**A. polygonique.** Polygonic acid. [B.]—**A. polyhydrique.** A polyatomic

acid. — **A's polylactiques.** Polylactic acids. — **A's polysalicyliques.** Polysalicylic acids. [B, 93.]—**A's poly-siliciliques.** Polysilicic acids. [B.]—**A. pommique.** An obsolete term for malic acid. [B, 93.]—**A. porphyrique.** Porphyric acid. [B.]—**A. pour le touchau.** A solution of nitrohydrochloric acid used in testing gold alloys, made by mixing 125 parts of dilute nitric acid of a sp. gr. of 1·272 and 2 parts of hydrochloric acid of a sp. gr. of 1·169. [B, 92.]—**A. préhnique.** Prehnitic acid. [B, 38.]—**A. préhnomalique.** Prehnomalic acid. [B, 38.]—**A. propargylique.** Propiolic acid. [B.]—**A. propényl-disulfonique.** Glycerindisulphonic acid. [B.] — **A. propényl-monosulfonique, A. propényl-sulfonique.** Glycerinsulphonic acid. [B.]—**A. propényl-tricarboxylique.** Tricarballylic acid. [B.]—**A. propényl-trisulfonique.** Glycerintrisulphonic acid. [B.]—**A. propiolique.** Propiolic acid. [B.]—**A. propionique.** Propionic acid. [B.]—**A. propionyl-formique.** Propionylformic acid.—**A. propyl-acétique.** Normal valeric acid. See VALERIC ACID.—**A. propyl-acrylique.** Propylacrylic (hydrosorbic) acid. [B.]—**A. propyl-carbonique.** Propylcarbonic (butyric) acid. [B.]—**A. propylène-disulfonique, A. propylène-sulfureux.** Propylenedisulphonic acid. [B.]—**A. propyl-éthényl-tricarboxylique.** Propylethenyltricarboxylic acid. [B.]—**A. propyl-malonique.** Propylmalonic acid. [B.]—**A. propyl-nitrolique.** Propylnitrolic acid. [B.]—**A. protique.** Protic acid. [B, 93.]—**A. protocatéchique, A. protocatéchucique.** Protocatechuic acid. [B.]—**A. prussique.** Prussic (hydrocyanic) acid. [B.]—**A. prussique médicinal.** A preparation consisting of hydrocyanic acid dissolved in 9 times its weight of water. [B, 93.]—**A. prussique oxygéné.** Chlorocyanic acid. [B, 88.]—**A. pseudacétique, A. pseudo-acétique.** Pseudoacetic (propionic) acid. [B, 93.]—**A. pseudo-cyanique.** Pseudocyanic acid ; carboxylimide. [B.]—**A. pseudo-hydroxybutyrique, A. pseudo-oxybutyrique.** Pseudoxybutyric acid. [B.] See HYDROXYBUTYRIC ACID.—**A. pseudo-propylhydroxalique.** Pseudopropylhydroxalic (hydroxyisovaleric) acid. [B.] See HYDROXYVALERIC ACID.—**A. pseudo-quinique.** Pseudoquinic acid. [B.]—**A. pseudo-urique.** Pseudouric acid. [B.]—**A. pseudo-valérique.** Pseudovaleric (trimethacetic) acid. [B.] See VALERIC ACID.—**A. pseudoxybutyrique.** Pseudoxybutyric acid. [B.] See HYDROXYBUTYRIC ACID.—**A. ptéri-tannique.** Pteritannic acid. [B, 93.]—**A. pulvinique.** Pulvinic acid. [B.]—**A. punico-tannique.** Punicotannic acid. [B.]—**A. purpuramique.** Purpuramic acid ; purpuramide. [B, 93.]—**A. purpurique.** Purpuric acid. [B.]—**A. purpurique blanc.** Vauquelin's term for a compound now regarded as an impure alloxanic acid. [A, 2.]—**A. purréique, A. purrhéique.** Euxanthic acid. [B, 93.]—**A. pyique.** Pyic acid. [B.]—**A. pyr-acétique.** Pyroligneous acid. [B.]—**A. pyr-aconitique.** Itaconic acid. See PYROCITRIC ACID.—**A. pyréthrique.** Pyrethric acid. [B.]—**A. pyridine-carbonique.** Pyridinecarbonic acid. [B.]—**A. pyridine-dicarbonique.** Pyridinedicarbonic acid. [B.] — **A. pyridine-disulfonique.** Pyridinedisulphonic acid. [B.]—**A. pyridine-monosulfonique.** Pyridinesulphonic acid. [B.]—**A. pyridine-pentacarbonique.** Pyridinepentacarbonic acid. [B.] — **A. pyridine-sulfonique.** Pyridinesulphonic acid. [B.]—**A. pyridine-tricarbonique.** Pyridinetricarbonic acid. [B.]—**A. pyro-acétique.** Pyroligneous acid. [B.]—**A. pyro-aconitique.** Itaconic acid.' [A, 324 ; B.] See PYROCITRIC ACID.—**A. pyro-alizarique.** Pyroalizaric acid ; phthalic anhydride. [A, 324 ; B, 93.]—**A. pyro-antimonique.** Pyroantimonic acid. [B.]—**A. pyro-arsenique.** Pyroarsenic acid. [B.]—**A. pyro-bismuthique.** Pyrobismuthic acid. [B.]—**A. pyroborique.** Pyroboric acid. [B.]—**A. pyro-catéchique.** Pyrocatechuic acid ; pyrocatechin. [B.] — **A. pyro-cinchoméronique.** Pyrocinchomeronic (gamma pyridinecarbonic) acid. [B.] See PYRIDINECARBONIC ACID. [B.]—**A. pyro-cinchoninique.** Pyrocinchoninic acid. [B.]—**A. pyro-citrique.** Pyrocitric acid. [B.]—**A. pyro-coménamique.** Pyrocomenamic acid. [B.]—**A. pyro-coménique.** Pyrocomenic acid. [B.]—**A. pyrodéorique, A. pyrodiorique.** Pyrodeoric acid ; pyrocatechin. [B.]—**A. pyro-gallique.** Pyrogallic acid ; pyrogallol. [B.]—**A. pyrogentisique.** Pyrogentisic acid.—**A. pyro-glycique.** Pyrodextrin. [B, 93.]—**A. pyro-isomalique.** Pyroisomalic acid. [B.]—**A. pyr-oléique.** Sebacic acid. [B.]—**A. pyro-lactique.** Lactide. [B, 93.]—**A. pyroligneux.** Pyroligneous acid. [B.]—**A. pyroligneux purifié.** Purified pyroligneous acid ; commercial acetic acid. [B.]—**A. pyro-lignique.** Pyroligneous acid. [A, 313.]—**A. pyro-lithique.** Cyanuric acid. [B, 93.]—**A. pyrolithofellique.** Pyrolithofellic acid. [B.]—**A. pyr-olivilique.** Pyrolivilic acid. [A, 324 ; B, 93.]—**A. pyro-malique.** Maleic acid. [B, 93.]—**A. pyro-marique.** Sylvic (abietic) acid.—**A. pyro-mécazonique.** Pyromecazonic acid. [B.]—**A. pyro-méconique.** Pyromeconic acid. [B.]—**A. pyro-mellique, A. pyromellithique, A. pyro-mellitique.** Pyromellitic acid. [B.] — **A. pyro-morintannique.** Pyromoritannic acid ; pyrocatechin. [B.]—**A. pyro-mucique, A. pyro-muqueux.** Pyromucic acid. [A, 324 ; B.]—**A. pyro-pectique.** Pyropectic acid. [B.]—**A. pyro-phosphamique.** Pyrophosphamic acid. [B.]—**A. pyrophospho-diamique.** Pyrophosphodiamic acid. [B.]—**A. pyrophosphorique.** Pyrophosphoric acid. [B.]—**A. pyrophosphotriamique.** Pyrophosphotriamic acid. [B.] — **A. pyro-racémique.** Pyroracemic (acetoformic) acid. [B.]—**A. pyro-saccholactique.** Pyrosaccholactic (pyromucic) acid. [A, 324.]—**A. pyro-sorbique.** Maleic acid. [B, 93.]—**A. pyro-sulfurique.** Pyrosulphuric acid. [B.] — **A. pyro-tartareux.** Pyroracemic (acetoformic) acid. [B, 3.]—**A. pyro-tartrique.** Pyrotartaric acid. [B.]—**A. pyro-térébilique.** A name given by Baboudin to a substance afterward shown to be impure pyroterebic acid. [B, 3.]—**A. pyro-térébique.** Pyroterebic acid. [B.] — **A. pyro-tritarique.** Pyrotritaric acid. [B, 38.]—**A. pyro-urique.** Pyrouric (cyanuric) acid. [B, 93.] — **A. pyro-uvique.** Pyruvic (acetoformic) acid. [B.]—**A. pyro-vanadique.** Pyrovanadic acid. [B.]—**A. pyro-vinique.** Pyrotartaric acid. [B.]—**A. pyro-xylique.** Pyroxylic acid. [B.]—**A. pyrréique, A. pyrrhéique.** Purrheic (euxanthic) acid. [B.]—**A. pyr-uvique.** Pyruvic (acetoformic) acid. [B.]—**A. quarténylique.** Quartenylic (isocrotonic) acid. [B.] See CROTONIC ACID.—**A. quassique.** Quassic acid. [B.]—**A. quercétique.** Quercetic acid. [B, 93.]—**A. quercimérique.** Quercimeric acid. [B.] — **A. querci-tannique.** Quercitannic acid. [B.]—**A. querci-tartrique.** Quercitartaric acid. [B.]—**A. quercitrique.** Quercitric acid ; quercitrin. [B, 92, 93.]—**A. quercitri-tannique.** Quercitritannic acid. [B.]—**A. quinaldine-carbonique.** Quinaldinecarbonic acid. [B.]—**A. quinaldinique.** Quinaldinic acid. [B.]—**A. quinine-sulfurique.** Quininesulphuric acid.—**A. quininique.** Quininic acid. [B.]—**A. quinique.** Quinic acid. [B.]—**A. quinoléine-benzocarbonique.** Quinolinebenzocarbonic acid. [B.]—**A. quinoléine-disulfonique.** Quinolinedisulphonic acid. [B.]—**A. quinoléine-métasulfonique.** Quinolinemetasulphonic acid. [B.] See QUINOLINESULPHONIC ACID. — **A. quinoléine - orthosulfonique.** Quinolineorthosulphonic acid. [B.] See QUINOLINESULPHONIC ACID. — **A. quinoléine-parasulfonique.** Paraquinolinesulphonic acid. [B.] See QUINOLINESULPHONIC ACID.—**A. quinoléine - sulfonique.** Quinolinesulphonic acid. [B.] — **A. quinoléine-sulfurique.** Quinolinesulphuric acid. [B.]—**A. quinoléine-tricarbonique.** Quinolinetricarbonic acid. [B.]—**A. quinoléinique.** Quinolinic acid. [B.]—**A. quinoléique, A. quinolique.** Quinolic acid. [B.]—**A. quino-picrique.** Quinopicric acid. [B.]—**A. quino-tannique.** Quinotannic (cinchotannic) acid. [B.]—**A. trinitro-benzoïque.** Trinitrobenzoic acid. [B.]—**A. trinitro-crésylique.** Trinitrocresol. [B.]—**A. trinitro-orcinique.** Trinitrorcinic acid. [B.]—**A. trinitro-phénique.** Trinitrophenol; picric acid. [B.]—**A. trioxy-adipique.** Trihydroxyadipic acid. [B.]—**A. trioxy-benzoïque.** Trihydroxybenzoic (gallic) acid. [B.]—**A. trioxy-bromique.** Bromic acid. [B.]—**A. trioxy-chlorique.** Chloric acid. [B.]—**A. trioxy-iodique.** Iodic acid. [B.]—**A. trioxy-picolinique.** Trioxypicolinic (oxycomenamic) acid. [B.]—**A. triphényl-rosaniline-monosulfonique.** Triphenylrosanilinemonosulphonic acid. [B.]—**A. trisalicylo-salicylique.** Trisalicylosalicylic acid. [B.]—**A. trisilicique.** Trisilicic acid. [B.]—**A. trisulfo-benzolique.** Benzenetrisulphonic acid. [B, 93.]—**A. trisulfo-carbonique.** Thiocarbonic acid. [B, 93.]—**A. trisulfo-phénique.** Phenoltrisulphonic

acid. [B, 93.]—**A. trithionique.** Trithionic acid. [B, 93.]—**A. tritylène-sulfureux.** Propylenedisulphonic acid. [B, 38.]—**A. tropéolique.** Tropæolic acid. [B.]—**A. tropique.** Tropic acid. [B.]—**A. tungsténique, A. tungstique.** Tungstic acid. [B.]—**A. tungsto-silicique.** Tungstosilicic acid. [B.]—**A. turpéthique.** Turpethic acid. [B.]—**A. turpétholique.** Turpetholic acid. [B.]—**A. tyrosine-hydantoïque.** Tyrosinehydantoic acid.—**A. ulmique.** Ulmic acid ; ulmin. [B, 93.]—**A. undécolique.** Undecolic acid. [B.]—**A. undécylénique.** Undecylenic (hendecalenic) acid. [B.]—**A. undécylique.** Hendecatoic acid. [B.]—**A. uramido-benzoïque.** Uramidobenzoic acid. [B.]—**A. uramido-caproïque.** Uramidocaproic acid. [B.]—**A. uramido-dinitro-phénylique.** Uramidodinitrophenylic acid. [B.]—**A. uramido-dracylique.** Uramidodracylic acid. [B.]—**A. uramido-hippurique.** Uramidohippuric acid. [B.]—**A. uramido-isobutyrique.** Uramidoisobutyric acid. [B.]—**A. uramido-salicylique.** Uramidosalicylic acid. [B.] — **A. uramilique.** Uramilic acid. [B, 93.]—**A. ureux.** Xanthin. [B, 93.]—**A. urinilique.** Urinilic acid. [B, 92, 93.]—**A. urique.** Uric acid. [B.]—**A. urique suroxygené.** Vauquelin's term for oxuric acid. [A, 2 ; B, 3.]—**A. uro-benzoïque.** Hippuric acid. [B.]—**A. uro-caninique.** Urocaninic acid. [B, 93.]—**A. uro-chloralique.** Urochloralic acid. [B.]—**A. uro-érythrique.** Uroerythric acid ; uroerythrin. [B, 92, 93.]—**A. uro-nitrotolinique.** Uronitrotoluenic acid. [B.]—**A. urosulfinique.** Urosulphinic acid. [B.]—**A. urosulfique.** Thiouric acid. [B, 93.]—**A. uroxanique.** Uroxanic acid. [B.]—**A. urushique.** Urushic acid. [B.]—**A. usnique.** Usnic acid. [B.]—**A. uvique.** Uvic acid. [B, 93.]—**A. uvitique.** Uvitic acid. [B, 93.]—**A. uvitonique.** Uvitonic acid. [B.]—**A. vaccinique.** Vaccinic acid. [B.]—**A. valérianique** [Fr. Cod.], **A. valérianique officinal, A. valérianique ordinaire.** Lat., *acidum valericum.* Valerianic acid.—**A. valérique.** Valeric acid. [B.]—**A. valérique actif.** Optically active valeric acid. See VALERIC ACID.—**A. valérique de fermentation.** Fermentation valeric acid. [B.]—**A. valérique inactif.** Optically inactive valeric acid. See VALERIC ACID.—**A. valérique normal.** Normal valeric acid. [B.]—**A. valérique tertiaire.** Tertiary valeric acid.—**A. valéro-lactique.** Valerolactic acid. [B, 93.]—**A. valérylique.** Valeric acid. [B.]—**A. vanadique.** Vanadic acid. [B.]—**A. vanillique.** Vanillic acid. [B.] — **A. vératrique.** Veratric acid. [B.] —**A. viburnique.** Viburnic acid. [B.]—**A. vino-phosphorique.** Phosphovinic (ethylphosphoric) acid. [B.] See ETHYL *phosphate.* —**A. vino-sulfurique.** Sulphovinic (ethylsulphuric) acid. [B, 93.] See ETHYL *sulphate.* — **A. vino-tartrique.** Tartrovinic (ethyltartaric) acid. [B.] See ETHYL *tartrate.*—**A. vin-oxalique.** Oxalovinic (ethyloxalic) acid.—**A. violénique.** Violenic acid. [B, 93.]—**A. violurique.** Violuric (nitrosobarbituric) acid. [B.] —**A. virginéique.** Virgineic acid. [B, 93.]—**A. viridinique, A. viridique.** Viridinic acid. [B, 93.]—**A. viscique.** Viscic acid. [B, 93.]—**A. vitriolique.** Sulphuric acid.—**A. vitriolique phlogistiqué, A. vitriolique volatil.** Sulphurous anhydride. [B, 93.]—**A. vulpinique, A. vulpique.** Vulpic acid. [B, 93.] —**A. wolframique.** Tungstic acid. [A, 324.]—**A. xanthamylique.** Amyldithiocarbonic (amylxanthic) acid. [B, 93.] — **A. xanthique.** Xanthic acid. [B.]—**A. xanthopénique.** Xanthopic acid. [B.]—**A. xantho-phénique.** Xanthophenic acid. [B, 93.]—**A. xanthopique.** Xanthopic acid. [B.]—**A. xanthoprotéique.** Xanthoproteic acid. [B.]—**A. xantho-quininique.** Xanthoquininic acid. [B.]—**A. xantho-rhamnique.** Xanthorhamnic acid. [B.]—**A. xantho-tannique.** Xanthotannic acid. [B, 93.]—**A. xéronique.** Xeronic acid. [B, 93.]—**A. xylétique.** Xyletic acid. [B, 93.]—**A. xylidique.** Xylidic acid. [B.] See under UVITIC ACID.—**A. xylique.** Xylic acid.—**A. xylo-chloérique, A. xylo-chlorique.** Xylindein. [B, 93.]—**A. xylylique.** Xylic acid. [B.]—**A. zirconique.** Zirconia. [B, 93.]—**A. ziziphique.** Ziziphic acid. [B, 92, 93.] — **A. zizipho-tannique.** Ziziphotannic acid. [B.]—**A. zoönique.** The name given by Berthollet to an acid obtained by the distillation of animal substances, now known to be identical with acetic acid. [B, 3.]—**A. zoö-stéarique.** Zoostearic acid. [B.]—**A. zoötique.** Zootic acid. [B.] See HYDROCYANIC ACID.—**A. zumique, A. zymique.** Lactic acid. [B, 93.]—**Alcali-a.** An amido-acid. [B.] See under ACID.—**Hydra', hydro-a.** See *Hydrogen* ACID.—**Nitro-a.** See *Nitro-acid* under ACID.—**Pèse-a.** See ACIDIMETER.—**Pyro-a.** A pyro-acid. See under ACID.—**Sulf-a.** Thio-acid.—**Sulfo-a.** A sulpho-acid. See under ACID.—**Thio-a.** See *Thio*-ACID.

ACIDE ARSÉNIEUX [Fr. Cod.], (Fr.), n. A^{3}r-sa-ni^{2}-u^{5}. Arsenious acid ; arsenic trioxide. [B.]—**A. a. porcellanique.** Opaque porcelain-like arsenious acid. [A, 324 ; B.] See ARSENIC *trioxide.*—**A. vitreux.** Arsenic glass ; vitreous oxide of zinc. [B.] See ARSENIC *trioxide.*—**Granules d'a. a.** [Fr. Cod.]. Lat., *granula cum acido arsenioso.* Syn. : *granules de Dioscoride.* A preparation consisting of granules each of which contains 1 milligramme ($\frac{1}{65}$ grain) of arsenic trioxide, with 4 centigrammes ($\frac{2}{3}$ grain) of milk sugar and 1 centigramme ($\frac{1}{6}$ grain) of gum arabic, with enough of the *mellite simple* of the Fr. Codex to secure the proper consistence. [B.]—**Soluté d'a. a.** [Fr. Cod.]. Lat., *acidum arseniosum aqua solutum.* Syn. : *liqueur de Boudin.* A preparation consisting of 1 part of arsenic trioxide dissolved in 1,000 parts of distilled water. [B.]

ACIDE BROMHYDRIQUE (Fr.), n. Bro-me-drek. Hydrobromic acid.—**A. bromhydrique dissous** [Fr. Cod.]. An aqueous solution of hydrobromic acid. See HYDROBROMIC ACID.—**A. b. gazeux** [Fr. Cod.]. Gaseous hydrobromic acid.—**A. b. officinal, Solution aqueuse d'a. b.** See *A. b. dissous.*

ACIDE CHLORHYDRIQUE (Fr.), n. Klor-e-drek. Hydrochloric acid or its aqueous solution. [B.]—**A. c. alcoolisé.** Syn. : *alcoholé chlorhydrique, alcool muriatique, esprit de sel dulcifié.* A mixture of 1 part of 22 per cent. hydrochloric acid and 3 parts of 36 per cent. alcohol. [A, 321.]—**A. c. du commerce** [Fr. Cod.]. Commercial hydrochloric acid. **A. c. dissous** [Fr. Cod.]. An aqueous solution of hydrochloric-acid gas. See HYDROCHLORIC ACID.—**A. c. officinal.** The official hydrochloric acid of the Fr. Codex. See HYDROCHLORIC ACID.—**A. c. ordinaire.** See *A. c. du commerce.*—**A. c. pur.** See *A. c. officinal.*—**Solution aqueuse d'a. c.** See *A. c. dissous.*

ACIDE CHROMIQUE (Fr.), n. Kro-mek. Chromic acid. [B.] —**A. c. cristallisé** [Fr. Cod.]. Crystallized or solid chromic acid ; chromium trioxide. [B.]—**Soluté d'a. c.** [Fr. Cod.]. Lat., *acidum chromicum aqua solutum.* A preparation consisting of a mixture of equal parts by weight of chromium trioxide and distilled water. [B.]

ACIDE CITRIQUE [Fr. Cod.], (Fr.), n. Se-trek. Citric acid.—**Poudre d'a. c.** [Fr. Cod.]. Lat., *pulvis acidi citrici.* Citric acid reduced to a powder and sifted. [B.]—**Sirop d'a. c.** [Fr. Cod.]. See *Syrupus* ACIDI CITRICI.

ACIDE GALLIQUE [Fr. Cod.], (Fr.), n. Ga^{3}l-lek. Gallic acid. —**Glycérolé d'a. g.** See *Glycerinum* and *Glyceritum* ACIDI GALLICI.

ACIDE PHÉNIQUE (Fr.), n. Fa-nek. Carbolic acid.—**Acétolé d'a. p.** See VINAIGRE *phéniqué.*—**A. p. alcoolisé.** A mixture of 9 parts of crystallized carbolic acid and 1 part of alcohol. [B, 92.]—**A. p. amidé.** Amidophenol. [B.]—**A. p. bibromé.** Dibromphenol. [B.]—**A. p. bichloré.** Dichlorphenol. [B.]—**A. p. biiodé.** Diiodophenol. [B.]—**A. p. binitré.** Dinitrophenol. [B.]—**A. p. bromé.** Bromphenol. [B.] — **A. p. chloré.** Chlorphenol. [B.]—**A. p. iodé.** Iodophenol. [B.]—**A. p. liquide.** See *A. p. alcoolisé.* **A. p. monobromé.** Monobromphenol. See BROMPHENOL.—**A. p. monochloré.** Monochlorphenol. See CHLORPHENOL —**A. p. monoiodé.** Moniodophenol. See IODOPHENOL.—**A. p. mononitré.** Mononitrophenol. See NITROPHENOL.—**A. p. nitré.** Nitrophenol. [B.]—**A. p. triamidé.** Triamidophenol.—**A. p. tribromé.** Tribromphenol.—**A. p. trichloré.** Trichlorphenol.—**A. p. triiodé.** Triiodophenol.—**A. p. trinitré.** Trinitrophenol ; picric acid. [B.]—**Glycérolé d'a. p.** See *Glycerinum* and *Glyceritum* ACIDI CARBOLICI.—**Soluté d'a. p.** [Fr. Cod.]. Lat., *acidum phenicum aqua solutum.* Syn. : *Eau phéniquée.* A solution of 1 part of crystallized carbolic acid in 1,000 parts of distilled water. [B.]

ACIDE PHOSPHORIQUE (Fr.), n. Fo^{2}s-fo-rek. Phosphoric acid.—**A. p. anhydre.** Anhydrous phosphoric acid ; phosphoric anhydride. [A, 324.]—**A. p. bibasique.** Pyrophosphoric acid. [B.]—**A. p. glacial.** Glacial phosphoric acid. [B.]—**A. p. hydraté.** Hydrated phosphoric acid. [A, 324.]—**A. p. monobasique, A. p. monohydraté.** Metaphosphoric acid. [B.]—**A. p. normal** [Fr. Cod.]. Orthophosphoric acid. See PHOSPHORIC ACID. —**A. p. officinal** [Fr. Cod.]. An aqueous solution of phosphoric acid containing 50 per cent. of the chemically pure acid. [B.]—**A. p. tribasique, A. p. trihydraté.** Orthophosphoric acid. [B.]—**Solution officinale d'a. p.** See *A. p. officinal.*

ACIDE SULFHYDRIQUE [Fr. Cod.], (Fr.), n. Su^{6}lf-e-drek. Lat., *acidum sulfhydricum.* Syn. : *hydrogène sulfuré.* Hydrogen sulphide.—**A. s. dissous** [Fr. Cod.], **Solution aqueuse d'a. s.** A saturated aqueous solution of hydrogen sulphide. At a temperature of 20° C. it contains nearly 3 parts by volume (about $2\frac{1}{4}$ per cent. by weight) of the gas. [B.]

ACIDE SULFUREUX (Fr.), n. Su^{6}l-fu^{6}-ru^{5}. Sulphurous acid. —**A. s. éthéré.** Sweet oil of wine. [B.] See *Ethereal* OIL.— —**Fumigation à l'a. s.** [Fr. Cod.]. Lat., *suffumigatio sulfurosa.* A preparation for generating sulphurous oxide, consisting of sulphur broken into fragments, to be moistened with alcohol and ignited at the time of using. [B.]

ACIDE TARTRIQUE [Fr. Cod.], (Fr.), n. Ta^{3}r-trek. Tartaric acid.—**A. t. anhydre.** Tartaric anhydride. [B, 92.]—**A. t. droit.** Dextrotartaric acid. See TARTARIC ACID.—**A. t. gauche.** Lævotartaric acid. See TARTARIC ACID.—**A. t. inactif.** Optically inactive tartaric acid. [B.]—**A. t. neutre.** Racemic acid. [B, 93.] See TARTARIC ACID.—**Poudre d'a. t.** [Fr. Cod.]. Tartaric acid pulverized and passed through a sieve.—**Sirop d'a. t.** [Fr. Cod.]. Lat., *syrupus cum acido tartrico.* A preparation made by dissolving 1 part of tartaric acid in 1 part of water and mixing with 98 parts of syrup. [B.]

ACIDIFEROUS, adj. A^{2}s-i^{2}d-i^{2}f'e^{2}-ru^{3}s. Lat., *acidifer* (from *acidum*, an acid, and *ferre*, to bear). Fr., *acidifère.* Ger., *Säure enthaltend* (1st def.), *säuernd* (2d def.). Sp., *acidífero.* 1. Containing acid. 2. Acid-forming ; acidifiant. [A, 306.]

ACIDIFIABLE, adj. A^{2}s-i^{2}d'i^{2}f-i''a^{2}bl. Lat., *acidifiabilis* (from *acidum*, an acid, and *fieri*, to become). Fr., *acidifiable.* Ger., *säuerungsfähig.* Sp., *acidificable.* Capable of conversion into an acid. [B.]

ACIDIFIANT, adj. A^{2}s-i^{2}d-i^{2}f'i^{2}-a^{2}nt. For deriv., see ACIDIFIABLE. Lat., *acidificus.* Fr., *acidifiant.* Ger., *säuernd.* Sp., *acidificante.* Acidiferous (*q. v.*, 2d def.). For its meaning as a n., see ACIDIFIER.

ACIDIFICATION, n. A^{2}s-i^{2}d''i^{2}f-i^{2}-ka'shu^{3}n. Lat., *acidificatio.* Fr., *acidification.* Ger., *Säurebildung.* It., *acidificazione.* Sp., *acidificación.* 1. Conversion into an acid. 2. (Obs.) oxygenation. [A, 322.]

ACIDIFICUS (Lat.), adj. A^{2}s(a^{3}k)-i^{2}d-i^{2}f'i^{2}k-u^{3}s(u^{4}s). Acidifiant. [A, 320.]

ACIDIFIER, n. A^{2}s-i^{2}d'i^{2}f-i''u^{6}r. Fr., *principe acidifiant.* Ger., *säuernder Grundstoff.* Sp., *acidificante.* The "acidifying principle" ; a term formerly applied to oxygen, on the theory (now abandoned) that that element was essential to the formation of acids. [A, 301.]

ACIDIFY, v. tr. A^{2}s-i^{2}d'i^{2}f-i. Lat., *acidificare.* Ger., *acidiren, säuern.* It., *acidificare.* Sp., *acidificar.* To convert into an acid. [A, 300.]—**A'ing principle.** See ACIDIFIER.

ACIDIMETER, n. A^{2}s''i^{2}d-i^{2}m'e^{2}t-u^{6}r. From Lat., *acidum*, an acid, and Gr., μέτρον, a measure. Fr., *acidimètre.* Ger., *Säuren-*

messer. It., *acidimetro.* Sp., *acidómetro.* An instrument for determining the strength of an acid ; either a hydrometer (the standard being one of density) or a simple graduated tube. When the latter is used, a definite quantity of the acid is poured into the tube, and the amount of an alkaline solution of known strength required to neutralize the acid is registered. [A, 347.]

ACIDIMETRIC, adj. A^{2}s″i^{2}d-i^2-me^{2}t′ri^{2}k. Fr., *acidimétrique.* Ger., *acidimetrisch.* Pertaining to acidimetry.

ACIDIMETRY, n. A^{2}s″i^{2}d-i^{2}m′e^{2}t-ri^2. Fr., *acidimétrie.* Ger., *Acidimetrie.* It., *acidimetria.* 1. The determination of the quantity of real acid in a sample of hydrated acid. [B, 2.] 2. The determination of the strength (saturating power) of an acid. [B.]

ACIDIREN (Ger.), v. tr. A^3-tse-de′re^{2}n. To acidify.

ACIDITATIO (Lat.), n. f. A^{2}s(a^{3}k)-i^{2}d-i^2-ta(ta^3)′shi^2(ti^2)-o. Fr., *aciditation.* Acidity of the primæ viæ. [Grünberg (A, 322).]

ACIDITIES (Lat.), n. f. A^{2}s(a^{3}k)-i^2-di^2′shi^2(ti^2)-ez(e^{2}s). Acidity of the stomach. [A, 313.]

ACIDITY, n. A^{2}s-i^{2}d′i^2-ti^2. Gr., ὀξύτης. Lat., *aciditas.* Fr., *acidité, aigreur* (2d def.). Ger., *Acidität, Säureverhalten.* It., *acidità, agrezza* (2d def.). Sp., *acidez, ácidos del estómago* (2d def.). Syn. : *sourness.* 1. In chemistry the word is used in different senses, denoting : *a.* The quality of possessing the characteristics of an acid, and so, in acids or acid salts, equivalent to *basicity.* *b.* The capacity for saturating an acid evinced by a base. (In the former case the a. is measured by the number of hydrogen atoms in one molecule of the acid or salt replaceable by combination with a base ; in the latter case it is measured by the number of hydrogen atoms which a molecule of the base can replace by combining with an acid. The degree of a. is designated by the terms *monacid, diacid,* and *triacid,* accordingly as the replacement affects 1, 2, or 3 atoms of hydrogen.) *c.* The intensity of acid reaction shown by a substance. It is measured by the amount of a standard solution of an alkali required to render the substance neutral. [B.] 2. Sourness of the stomach ; the over-production of acid in the stomach, characterized by a sensation of burning and distension and acid eructations or regurgitations. The term *a. of the humors* was used by the older writers to express an acid state of the blood or some other fluid of the body as a cause of disease, but the doctrine is now abandoned.

ACIDNESS, n. A^{2}s′i^{2}d-ne^{2}s. Acidity.

ACIDNOS (Lat.), adj. A^{2}s(a^{3}k)-i^{2}d′no^{2}s. Gr., ἀκιδνός, weak, feeble, faint. [Hippocrates, (A, 311, 325).]

ACIDO-BASIC, ACIDO-BASIGENOUS, adj. A^{2}s″i^{2}d-o-ba′si^{2}k, -ba-si^2′je^{2}n-u^{3}s. For deriv., see ACID, BASIC, and BASIGENOUS. Fr., *acido-basique.* Capable of forming either an acid or a base. [A, 348.]

ACIDOLOGY, n. A^{2}s-i^{2}d-o^{2}l′o-ji^2. Lat., *acidologia* (from ἀκίς, a point, also a bandage [Galen (A, 311)], and λόγος [see *-logy**]). The science of surgical instruments and appliances. [A, 322.]

ACIDOMETER, n. A^{2}s-i^{2}d-o^{2}m′e-tu^{5}r. See ACIDIMETER.

ACIDOMETRIC, adj. A^{2}s″i^{2}d-o-me^{2}t′ri^{2}k. See ACIDIMETRIC.

ACIDOMETRY, n. A^{2}s-i^{2}d-o^{2}m′e^{2}t-ri^2. See ACIDIMETRY.

ACIDONITRILE, n. A^{2}s-i^{2}d-o-ni′tri^{2}l. See ACIDYLNITRILE.

ACIDO-PEIRASTICA (Lat.), n. f. A^{2}s(a^{3}k)″i^{2}d-o-pi(pa)-ra^{2}s-(ra^{3}s)′ti^2-ka^3. From ἀκίς, a point, and πειραστικός (from πειράζειν, to test), tentative. Exploratory puncture. [A, 303.]

ACIDOSTEOPHYTE, n. A^{2}s″i^{2}d-o^{2}s′te^2-o-fit. Lat., *acidosteophyton* (from ἀκις, a point, ὀστέον, a bone, and φυτόν, a growth). Fr., *acidostéophyte.* Ger., *Akidosteophyt.* It., *acidosteofito.* Lobstein's term for a needle-shaped exostosis or osteophyte (the fungous exostosis of Sir A. Cooper). [A, 322.]

ACIDOTOUS, adj. A^{2}s-i^{2}d-o′tu^{3}s. Gr., ἀκιδωτός, pointed. Fr., *acidote.* In botany, terminating in a point. [A, 316.]

ACIDOXYL, n. A^{2}s-i^{2}d-o^{2}x′i^{2}l. For deriv., see ACID, OXYGEN, and *-yl.** A compound of an acidyl or acid radicle (of the trivalent series of hydrocarbons) with oxygen. The a's have in general the formula $(C_nH_{2n-1}\cdot\equiv O)'$. By combining with hydroxyl (OH) they form the fatty acids, $C_nH_{2n-1}\cdot O.OH$. [B, 4.]

ACIDULÆ (Lat.), n. f., pl. of adj. *acidulus* (*aquæ* understood). A^{2}s(a^{3}k)-i^{2}d′u^2(u)-le(la^3-e^2). Fr., *eaux acidules.* Ger., *Säuerlinge, Sauerbrunnen.* Waters containing carbon dioxide in solution. [B, 55.]—**A. artificiales.** Fr., *eaux minérales artificielles.* Ger., *künstliche Säuerlinge.* Artificially aerated waters. [A, 323.]—**A. naturales.** The natural aerated waters. [A, 325.]

ACIDULANT (Fr.), adj. A^3-se-du^6-la^{3}n^2. Having a moderate acidulating power. [A, 306.]

ACIDULATE, v. tr. A^{2}s-i^{2}d′u^2-lat. Lat., *acidulare.* Fr., *aciduler.* Ger., *ansäuern.* It., *acidulare.* Sp., *acidular.* To render slightly acid. [B.]

ACIDULE, n. A^{2}s′i^{2}d-u^{2}l. Lat., *acidulum* (dim. of *acidum*). Fr., *acidule.* Ger., *Acidul.* 1. An acid salt. [A, 315.] 2. A dilute acid, an acidulous preparation, or a pleasantly acid fruit. [A, 328, 329.]—**A. oxalique** (Fr.). Acid oxalate of potassium. [Nysten (A, 330).]—**A. tartareux, A. tartarique** (Fr.). Acid tartrate of potassium. [Nysten (A, 330).]

ACIDULE (Fr.), adj. and n. A^3-se-du^{6}l. 1. Acidulous. 2. Acid (said of salts). For its use as a n., see the preceding article.

ACIDULOUS, adj. A^{2}s-i^{2}d′u^2-lu^{3}s. Lat., *acidulus.* Fr., *acidulеux, acidule.* Ger., *säuerlich.* It., *acidulo.* Sp., *acídulo.* Slightly acid. [B.]—**A. elements.** See under ELEMENT.

ACIDULUM (Lat.), n. n. A^{2}s(a^{3}k)-i^{2}d′u^2(u)-lu^{3}m(lu^{4}m). An acid salt. See ACIDULE, n.—**Oxalic a.** An old term for acid oxalate of potassium. [A, 335].—**Tartareous a.** An old term for acid tartrate of potassium. [A, 335.]

ACIDUM (Lat.), n. n. A^{2}s(a^{3}k)′i^{2}d-u^{3}m(u^{4}m). An acid.—**Aceticum a.** Acetic acid.—**A. absinthicum.** Absinthic acid.—**A. acericum.** Aceric (malic) acid. [B, 48.]—**A. aceti.** Acid of vinegar ; acetic acid. [A, 344.]—**A. aceticum.** See the major list.—**A. acetosæ, A. acetosellæ.** Old terms for oxalic acid. [A, 344 ; B.]—**A. acetosum.** See the major list.—**A. aconiticum.** Aconitic acid. [A.]—**A. adipis.** See ACID *of fat.*—**A. aereum.** An old term for carbonic acid. [A, 344.] See CARBON *dioxide.*—**A. aeriforme.** A gaseous acid. [B, 99.]—**A. æthereum.** An old term for sulphuric acid. [B, 87.]—**A. alcoholicum.** Acetic acid. [B, 101.]—**A. allantoicum.** Allantoic acid.—**A. aluminosum.** An old name for sulphuric acid (because contained in alum under the form of a sulphate). [B, 87.]—**A. amnicum, A. amnioticum.** Amniotic acid. [A, 313.]—**A. animale.** An animal acid. [B, 87.] See under ACID.—**A. antimonicum, A. antimonii.** Antimonic acid. [B, 48, 91.]—**A. antimoniosum.** Antimonious acid. [A.]—**A. argenticum.** Argentic acid. [B, 91.]—**A. arseniacum.** A name given by Kerr (1793) to arsenic acid. [B, 91.]—**A. arsenicale.** See ARSENIOUS ACID and ARSENIC *trioxide.*—**A. arsenicicum.** Arsenic acid. [B, 49.]—**A. arsenicosum.** See ARSENIOUS ACID and ARSENIC *trioxide.*—**A. arsenicum.** See the major list.—**A. arseniosum.** See the major list.—**A. atmosphæricum.** An old name for carbonic acid (carbon dioxide). [B, 87.]—**A. auricum.** Auric acid. [B.]—**A. azoticum.** Nitric acid. [B, 10.]—**A. benzoes.** Benzoic acid. [A, 344.]—**A. benzoicum.** See the major list.—**A. benzoini, A. benzoinum, A. benzoylicum.** Benzoic acid. [A, 313 ; B.]—**A. berberium.** Acid of barberries ; malic acid. [B, 87.]—**A. bezoardicum.** Uric acid. [B, 87.]—**A. bismuthicum.** Bismuthic acid. [B.]—**A. bombicum.** Bombic acid. [B, 91.]—**A. boracicum** [Greek Ph.], **A. boracis.** Boric acid.—**A. boricum.** See the major list.—**A. borosalicylicum.** Borosalicylic acid. [A, 247.]—**A. borussicum.** Prussic (hydrocyanic) acid. [B.]—**A. borussicum alcoholisatum.** See A. HYDROCYANICUM *alcoholisatum.*—**A. botulinicum.** See BOTULINIC ACID.—**A. bromhydricum** [Fr. Cod.]. Hydrobromic acid.—**A. bromhydricum dilutum.** See *Dilute* HYDROBROMIC ACID.—**A. bromohydricum.** Hydrobromic acid. [A, 247.]—**A. butyricum.** Butyric acid. [B, 49.]—**A. cærulei berolinensis, A. cæruleum.** Acid of Prussian blue ; hydrocyanic acid. [B, 99.]—**A. camphoricum.** Camphoric acid. [B, 91.]—**A. carbazoticum.** Carbazotic (picric) acid.—**A. carbolicum.** See the major list.—**A. carbonicum.** See the major list.—**A. catharticum.** Cathartic acid. [A, 247.]—**A. catholicon, A. catholicum.** The universal acid ; an old name for sulphuric acid, from the theory that all other acids proceeded from it. [A, 323 ; B, 87.]—**A. chinicum.** Quinic acid. [B, 48.]—**A. chlorhydricum.** See the major list.—**A. chloricum.** Chloric acid. [B, 49.]—**A. chloroaceticum.** Dichloracetic acid. [A, 247.]—**A. chlorohydrargyricum.** 'Corrosive sublimate. [B, 98.]—**A. chlorohydrocyanicum.** Chlorhydrocyanic acid. [B.]—**A. chlorohydrogenatum.** Hydrochloric acid. [B.]—**A. chloro-nitricum, A. chloro-nitrosum** [Ger. Ph., 1st ed.]. Nitrohydrochloric acid. [B.]—**A. chromicum.** See the major list.—**A. chrysophanicum.** Chrysarobin. [A, 247.]—**A. chrysulea.** Nitrohydrochloric acid. [B, 101.]—**A. cinnamomicum.** Cinnamic acid. [B, 96.]—**A. citri.** Citric acid. [B.]—**A. citricum.** See the major list.—**A. cobalticum.** Cobaltic acid. [B, 91.]—**A. compositum Reitzii.** A mixture of nitric acid, 144 parts, hydrochloric acid and ether, of each 9 parts, and borax, 8 parts. [B, 96, 102.]—**A. concretum.** A concrete or solid acid. [B, 87.]—**A. copaibicum.** Copaivic acid ; resin of copaiba. [A, 247.]—**A. cresylicum.** Cresylic acid ; cresol. [A, 247.]—**A. cretaceum.** An old term for carbonic acid (carbon dioxide). [A, 344.]—**A. cubebicum.** Cubebic acid. [B, 102.]—**A. cupricum.** Cupric acid. [B, 91.]—**A. cyanhydricum** [Fr. Cod., Belg. Ph.]. Hydrocyanic acid. The Belgian preparation of this name contains 2·5 per cent. of the anhydrous acid. [B, 95.]—**A. cyanicum.** Hydrocyanic acid. [B, 101.]—**A. dephlogisticatum liquidum.** An aqueous solution of chlorine. [A, 316.]—**A. dulcificatum.** A mixture of a strong acid with rectified spirit. Such mixtures usually contain ethyl compounds produced by the action of the acid upon the alcohol. [B, 99.] Cf. A. *nitri dulcificatum* and *A. salis dulcificatum.*—**A. elainicum.** Oleic acid. [A, 247.]—**A. ferricum.** Ferric acid. [B.]—**A. filiceum.** Filicic acid. [B, 98.]—**A. fixum.** A fixed (non-volatile) acid. [B, 99.]—**A. fluidum.** A liquid acid. [B, 99.]—**A. fluorhydricum, A. fluoricum.** Hydrofluoric acid. [A, 247 ; B, 91.]—**A. fluoricum dilutum.** A preparation of the London Throat Hospital containing ½ per cent. of the anhydrous acid. [B, 94.]—**A. fluoris.** Hydrofluoric acid. [B, 87.]—**A. formicæ, A. formicarum, A. formicicum** [Ger. Ph.], **A. formicum.** Formic acid. [A, 247, 308 ; B.]—**A. fortius.** A stronger acid ; a term used in the Belgian Ph., in the pl., *acida fortiora,* to denote the stronger acids which produce corrosive poisoning. [B, 95.]—**A. fossile.** A mineral acid. [B.]—**A. galacticum.** A name given by Scheele (1780) to lactic acid. [B, 3.]—**A. galacto-saccharinum.** See *A. sacchari lactis.*—**A. gallaceum, A. galiæ, A. gallarum.** Gallic acid. [B.]—**A. gallicum.** See the major list.—**A. gallo-tannicum** [Dan. Ph., Fenn. Ph., Norweg. Ph., Swed. Ph.]. Tannic acid. [B, 99.]—**A. glycocholicum.** Glycocholic acid. [B.]—**A. gynocardicum.** Gynocardic acid. [B, 94.]—**A. hippuricum.** Hippuric acid. [A.]—**A. hydriodicum.** See the major list.—**A. hydrobromatum, A. hydrobromicum.** Hydrobromic acid.—**A. hydrobromicum concentratum.** An aqueous solution of hydrobromic acid containing 34 per cent. of the pure acid. [A, 247.]—**A. hydrobromicum dilutum** [U. S. Ph., Br. Ph.]. Dilute hydrobromic acid. See HYDROBROMIC ACID.—**A. hydrobromicum gasiforme.** Gaseous hydrobromic acid, the *acide bromhydrique gazeux* of the French Codex. [B, 95.]—**A. hydrocarbonicum.** Oxalic acid. [A, 344.]—**A. hydrochloratum** [Dan. Ph., Norweg. Ph., Swed. Ph.]. Hydrochloric acid. [B, 95.]—**A. hydrochloratum crudum** [Dan. Ph., Swed. Ph.]. Commercial hydrochloric acid. [B, 95.]—**A. hydrochloratum dilutum** [Dan. Ph., Norweg. Ph., Swed. Ph.].

See *Dilute* HYDROCHLORIC ACID.—**A. hydrochloratum purum** [Russ. Ph.]. Hydrochloric acid. [B, 95.]—**A. hydrochloratum purum dilutum** [Russ. Ph.]. See *Dilute* HYDROCHLORIC ACID.—**A. hydrochloricum** [U. S. Ph., Br. Ph., Ger. Ph.], **A. hydrochloricum concentratum purum** [Aust. Ph., Hung. Ph.]. See HYDROCHLORIC ACID.—**A. hydrochloricum crudum** [Ger. Ph.]. See *Commercial* HYDROCHLORIC ACID.—**A. hydrochloricum dilutum** [U. S. Ph., Br. Ph., Ger. Ph.], **A. hydrochloricum dilutum purum** [Aust. Ph., Fenn. Ph., Hung. Ph.]. See *Dilute* HYDROCHLORIC ACID.—**A. hydrochloricum purum** [Fenn. Ph.]. See HYDROCHLORIC ACID.—**A. hydrochloricum venale** [Fenn. Ph.]. See *Commericat* HYDROCHLORIC ACID.—**A. hydrochloricum volumetricum** [Ger. Ph.]. Ger., *Normalsalzsäure.* A test-solution containing 36·5 grammes of hydrochloric-acid gas in a litre of water ; 18·8 c. c. of this solution neutralizes one gramme of carbonate of sodium. [B.]—**A. hydro-chloro-nitricum.** Nitrohydrochloric acid. [B, 97.]—**A. hydrocyanatum** [Pruss. Ph. of 1846, Norweg. Ph.], **A. hydrocyanatum medicinale** [Russ. Ph.]. See *Dilute* HYDROCYANIC ACID.—**A. hydrocyanicum.** See the major list.—**A. hydrofluoricum.** Hydrofluoric acid. [A.]—**A. hydro-fluoro-silicicum.** Silicofluoric acid. [B, 49.]—**A. hydroiodatum, A. hydroiodicum.** Hydriodic acid. [B.]—**A. hydro-silicio-fluoricum.** Silicofluoric acid. [B, 102.]—**A. hydrosulfuratum, A. hydrosulfuricum, A. hydrosulphuratum, A. hydrosulphuricum.** Hydrogen sulphide. [B.] — **A. hydrosulphuricum solutum.** Aqueous solution of hydrogen sulphide. [A, 316.]—**A. hydrothionicum.** Hydrogen sulphide. [B.]—**A. hydrothionicum liquidum.** Aqueous solution of hydrogen sulphide. [B. 97.]—**A. hyperosmicum.** Perosmic (osmic) acid. [B.]—**A. hypochlorosum.** Hypochlorous acid. [B, 49.] — **A. hyposuipharseniosum.** Hyposulpharsenious acid ; arsenic disulphide.—**A. imperfectum.** See *Imperfect* ACID.—**A. iodatum, A. iodhydricum.** Hydriodic acid. [B.]—**A. iodicum.** Iodic acid. [A.] —**A. jatrophicum.** Jatrophic (crotonic) acid. [A.]—**A. jodo-aceticum.** See IODOACETIC ACID (2d def.).—**A. kinovicum.** Quinovic acid. [A.]—**A. lacticum** [U. S. Ph., Br. Ph., Ger. Ph., Fr. Cod., Belg. Ph., Russ. Ph.]. Lactic acid. [B.] — **A. lacticum dilutum** [Br. Ph.]. An aqueous solution of lactic acid of a sp. gr. of 1·040, and containing 3 oz. of the acid to 1 pint of the preparation. [B.]—**A. lactis.** Acid of milk ; a name given by Scheele (1780) to lactic acid. [B, 3.]—**A. ligneum, A. ligni empyreumaticum, A. ligni pyro-oleosum, A. lignorum empyreumaticum.** Pyroligneous acid. [A, 316, 344 ; B.]—**A. limonarum, A. limonicum, A. limonis, A. limonorum, A. liminosum, A. limonum.** Citric acid. [A, 316 ; B, 88, 101.]—**A. lithicum.** Uric acid. [B, 87.]—**A. malicum.** Malic acid. [A, 316.]—**A. manganesicum, A. manganicum.** Manganic acid. [B.]—**A. marinæ, A. marinum.** Hydrochloric acid. [B, 101.]—**A. marinum aeratum.** An old name for chlorine. [B.] —**A. marinum concentratum.** Concentrated hydrochloric acid. [A.] — **A. marinum dephlogisticatum.** See *A. marinum aeratum.*—**A. meconicum** [Br. Ph.]. Meconic acid. [B.] **A. menispermicum.** Menispermic acid. [B, 99.] — **A. mephiticum.** An old name for carbon dioxide. [B, 87.]—**A. mercuricum.** Mercuric acid. [B, 91.]—**A. metallicum.** A mineral acid. [B.]—**A. metatartaricum.** Metatartaric acid. [B, 96.]—**A. minerale.** See *Mineral* ACID.—**A. molybdænæ, A. molybdænicum, A. molybdenæ, A. molybdicum.** Molybdic acid. [B.]—**A. morbosum.** Acidity (in the pathological sense). [A, 313.]—**A. muriaticum.** See the major list.—**A. nativum.** An acid occurring free in nature. [B, 87.]—**A. nickoiicum.** Nickolic acid. [B, 91.]—**A. nitri.** Nitric acid. [A, 344.]—**A. nitrico-hydrochloratum.** Nitrohydrochloric acid. [B, 96.]—**A. nitri concentratum.** Fuming nitric acid. [A, 344.]—**A. nitrico-nitrosum** [Dan. Ph., Norweg. Ph., Swed. Ph.]. Nitrosonitric (fuming nitric) acid. [B, 95.]—**A. nitricum.** See the major list.—**A. nitri duicificatum.** Sweet spirit of nitre. [B, 99.] See *Spiritus* ÆTHERIS NITROSI.—**A. nitri fumans.** Fuming nitric acid. [A, 344.]—**A. nitri imperfectum.** Nitrous acid. [B, 99.]—**A. nitri perfectum.** Nitric acid. [B, 99.]—**A. nitri vinosum.** Sweet spirit of nitre. See *Spiritus* ÆTHERIS NITROSI.—**A. nitrochlorhydricum** [Belg. Ph.], **A. nitrohydrochloricum** [U. S. Ph.]. Nitrohydrochloric acid. [B.]—**A. nitrohydrochloricum dilutum.** [U. S. Ph., Br. Ph.]. See *Dilute* NITROHYDROCHLORIC ACID.—**A. nitromuriaticum** [U. S. Ph., 1870]. Nitrohydrochloric acid. —**A. nitromuriaticum dilutum** [U. S. Ph., 1870]. See NITROHYDROCHLORIC ACID.—**A. nitroso-nitricum.** Nitrosonitric (fuming nitric) acid. [B.]—**A. nitroso-oxygenatum.** Nitrohydrochloric acid. [B, 88.]—**A. nitrosum.** See the major list.—**A. nitro-xanthicum.** Picric acid. [B, 102.]—**A. œnothionicum.** Ethylsulphuric acid. [A, 344.] See ETHYL *sulphate.*—**A. oleicum** [U. S. Ph., Br. Ph.], **A. oleinicum.** Oleic acid.—**A. opianicum.** Opianic acid. [B.]—**A. orthoxyphenylsulphurosum.** Orthoxyphenylsuiphurous acid ; aseptol. [B, 94.] — **A. osmicum.** See the major list.—**A. ossium.** Phosphoric acid. [A, 316.]—**A. oxalicum** [Belg. Ph., Swiss Ph.], **A. oxalicum depuratum** [Russ. Ph.], **A. oxalinum, A. oxalycum.** Oxalic acid. [B.]—**A. oxygenatum.** An acid, as perchloric acid, containing oxygen in excess of the amount required for saturation. [B, 99.]—**A. oxymuriaticum.** An old name for chlorine. [B.]—**A. oxyphosphoricum.** Phosphoric acid. [B, 101.]—**A. perfectum.** See *Perfect* ACID.—**A. perlatum.** Acid of pearls ; a name applied to the acid phosphate of sodium. [B, 87, 88.]—**A. perosmicum.** Perosmic (osmic) acid. [A, 247.]—**A. phænicum** [Greek Ph.], **A. phanolicum, A. phenicum** [Fr. Cod.]. Carbolic acid. [A, 316 ; B, 95.] —**A. phenicum aqua solutum** [Fr. Cod.]. See *Soluté d'*ACIDE PHÉNIQUE.—**A. phenylicum.** See the major list.—**A. phenylosum.** Carbolic acid. [B, 101.]—**A. phosphori.** Phosphoric acid. [A, 344.]—**A. phosphoricum.** See the major list.—**A. phosphorosum.** 1. Phosphatic acid (a mixture of phosphorous and phosphoric acids). 2. Phosphorous acid. [B.] — **A. phthalicum.** Phthalic acid. [B, 49.]—**A. picricum** [Fr. Cod.], **A. picrinicum** [Greek Ph.], **A. picronitricum.** Picric acid. [B.]—**A. pingue.** 1. Acid of fat. See under ACID. 2. A name given by Mayer to an acid which he imagined to exist in the caustic alkalies, imparting to the latter their greasy feel. [B, 2, 87.]—**A. pinguedinis animalis.** See ACID *of fat.* — **A. pipitzahoicum** [Mex. Ph.]. See PIPITZAHOIC ACID.—**A. platinicum.** Platinic acid. [B, 91.] — **A. plumbicum.** Plumbic acid. [B.] — **A. pneumicum.** Pneumic acid. [A.]—**A. pomi.** Malic acid. [B.]—**A. pomi citrei.** Citric acid. [B.]—**A. pomorum.** Malic acid. [B, 99.]—**A. primarum viarum.** See *A. ventriculi.*—**A. primigenium.** A hypothetical principle which Becher ("Physica Subterranea," 1669) supposed to be present in all acids, and to which he imagined they owed their common properties, while the distinguishing characters of each were due to the particular substance it contained mixed with this primitive acid, the latter being formed by the union of "primitive earth" and water. [A.] This universal primitive acid was supposed to be sulphuric acid. [B.] Cf. *A. catholicon* and *A. universale.*—**A. prussicum.** Prussic (hydrocyanic) acid.—**A. prussicum Scheeleei.** Scheele's hydrocyanic acid (contains 6 per cent. of the anhydrous acid). [A, 316.]—**A. pyroaceticum.** Pyroligneous acid. [A, 316.]—**A. pyrogallicum** [Fr. Cod., Ger. Ph., Greek Ph., Swiss Ph.]. Pyrogallic acid ; pyrogallol. [B, 99.]—**A. pyroligneum, A. pyrolignosum.** Pyroligneous acid.—**A. pyrolignosum crudum** [Dan. Ph., Greek Ph.]. See ACETUM *pyrolignosum crudum.*—**A. pyrolignosum rectificatum** [Greek Ph.]. See ACETUM *pyrolignosum rectificatum.* — **A. pyromucosum.** An empyreumatic acid obtained by the dry distillation of sugar. [B.]—**A. pyrotartaricum, A. pyrotartarosum.** Impure pyrotartaric acid obtained by the distillation of cream of tartar ; official in several formularies of the last and the early part of the present century. [B, 97.]—**A. pyroxylicum.** Pyroligneous acid. —**A. pyroxylicum crudum, A. pyroxylicum rectificatum.** See ACETUM *pyrolignosum crudum* and ACETUM *pyrolignosum rectificatum.*—**A. quercitannicum.** Quercitannic acid. [B, 98.] —**A. quinicum.** Quinic acid.—**A. quinovicum.** Quinovic acid. —**A. regalinum.** Nitrohydrochloric acid. [B.]—**A. rhodanicum.** Thiocyanic acid.—**A. sacchari.** Acid of sugar ; an old term for oxalic acid. [A, 344.]—**A. sacchari lactis.** Syn. : *A. galacto-saccharinum.* Acid of sugar of milk. Names given by Scheele in 1780 to mucic acid which he obtained by the action of nitric acid upon milk sugar. [B, 3, 86.]—**A. saccharinum.** See *A. sacchari.*—**A. salicylicum.** See the major list.—**A. salis, A. salis culinaris.** Old names for hydrochloric acid. [A, 344.]—**A. salis dulcificatum.** Syn. : *spiritus muriatico-œthereus, spiritus salis dulcis, spiritus vinosus muriaticus.* A mixture of hydrochloric acid and rectified spirit containing chloride of ethyl. A preparation of this sort formerly official in one of the Continental pharmacopœias was made by distilling hydrochloric acid, 16 parts, black oxide of manganese, 6 parts, sulphuric acid, 12 parts, and alcohol, 48 parts. [B, 99.]—**A. salis fumans.** Syn. : *spiritus salis fumans Glauberi.* Fuming hydrochloric acid. [B, 99.]—**A. salis Libavii.** See SPIRITUS *fumans Libavii.*—**A. salis marini.** Hydrochloric acid. [A.]—**A. salis rectificatum.** Rectified hydrochloric acid. [B, 99.]—**A. santonicum.** Santonic acid. [A, 316.]—**A. scleroticum, A. sclerotinicum.** Sclerotic acid. [B.]—**A. scytodephicum, A. scytodepsicum.** [From Gr., σκυτοδεψικός, currying, σκῦτος, a hide, and δέφειν, to soften.] Tannic acid. [A, 316 ; B, 49.]—**A. sebacicum, A. sebi.** The sebacic acid of the older writers ; acetic acid obtained by the distillation of fat. [B, 3, 91, 99.]—**A. septicum.** Nitric acid. [A, 316 ; B, 87.]—**A. siderum.** The acid of the loadstone. [B, 87.]—**A. silicio-hydrofluoricum.** Silicofluoric acid. [B, 102.]—**A. silicicum, A. silicum.** Silicic acid. [B, 49, 87.]—**A. silicohydrofluoratum.** Silicofluoric acid. [B, 49.]—**A. solidum.** A solid acid. [B, 99.]—**A. solis.** Syn. : *clyssus antimonii.* Sulphurous acid. [B.]—**A. sorbicum.** Sorbic acid. [B, 49.]—**A. spatosum.** Acid of spar ; hydrofluoric acid. [B, 87.]—**A. spontaneum.** See *A. ventriculi.* **A. stannicum.** Stannic acid. [B.]—**A. stearinicum, A. stearicum venale** [Netherl. Ph.]. Stearic acid. [B, 95.]—**A. stibicum.** Antimonic acid. [B, 49.]—**A. stibicum cum aqua.** Hydrated peroxide of antimony ; antimonic acid. [B, 92.]—**A. stibiosum.** Antimonious acid. [B, 49.]—**A. subsulfurosum.** Hyposulphurous acid. [B, 49.]—**A. succini, A. succinicum** [Ger. Ph., 1st ed., Dan. Ph., Russ. Ph., Swiss Ph., Netherl. Ph.]. Succinic acid. [A, 344 ; B, 95.]—**A. succinicum crudum** [Fenn. Ph., Greek Ph.]. Crude succinic acid. [B, 95.] — **A. succinicum depuratum** [Fenn. Ph., Greek Ph., Swed. Ph.]. Purified succinic acid. [B, 95.] — **A. succinicum impurum.** Crude succinic acid. -- **A. succinicum medicinale** [Belg. Ph.], **A. succinicum subflavum** [Norweg. Ph.]. Purified succinic acid. [B, 95.]—**A. succinicum pyrogenæum.** Impure succinic acid obtained by the distillation of amber. [B, 92.]—**A. succinium.** An old name for succinic acid. [B, 91.]—**A. sueceanum, A. suecicum.** The Swedish acid of Scheele ; hydrofluoric acid. [A, 323 ; B.]—**A. sulfhydricum** [Fr. Cod.], **A. sulfohydrogenatum.** Hydrogen sulphide. [B.]—**A. sulfuricum.** See the major list.—**A. sulfurosum.** Sulphurous acid. [B.]—**A. sulfurosum aquosum, A. sulfurosum solutum** [Swiss Ph.]. An aqueous solution of sulphur dioxide containing 9 per cent. of the latter. [B, 95.]—**A. sulpho-arseniosum.** Thioarsenious acid. [A, 316.]—**A. sulpho-hydricum.** Hydrogen sulphide. [B.]—**A. sulpho-hydricum liquidum** [Belg. Ph.]. An aqueous solution of hydrogen sulphide. [B, 95.]—**A. sulpho-hydrocyanicum.** Thiocyanic acid.—**A. sulpho-stibicum.** Thioantimonic acid. [A, 316.]—**A. sulpho-stibiosum.** Thioantimonious acid. [A, 316.]—**A. sulphureum, A. sulphuricosum.** Volatile acid of sulphur ; sulphurous acid. [A, 316 ; B, 87, 97.]—**A. sulphuricum.** See the major list.—**A. sulphuris.** Sulphuric acid. [B.]—**A. sulphuris imperfectum.** Sulphurous acid. [B, 99.]—**A. sulphuris perfectum.** Sulphuric acid. [B, 99.]—**A. sulphuris volatile.** Volatile acid of sulphur ; sulphurous acid. [A. 344 ; B, 99.]—**A. sulphurosicum.** Sulphurous acid. [A, 316.]—**A. sulphurosum** [U. S. Ph., Br. Ph.]. Sulphurous acid ; an aqueous solution of sulphur dioxide containing 3·5 per cent. [U. S. Ph.] or 5 per cent. [Br. Ph.] of the gas. [B]—

A. sulphydricum. Hydrogen sulphide. [A.] — **A. supphosphorosum.** Hypophosphorous acid.—**A. tanicum** [Greek Ph.]. Tannic acid. [B. 95.]—**A. tannicum.** See the major list.—**A. tartari.** Tartaric acid. [A, 344.]—**A. tartari crystallisatum.** Crystallized tartaric acid. [B.]—**A. tartaricum.** See the major list.—**A. tartari destillatum.** The same as *A. pyrotartaricum.* [B, 99.]—**A. tartari essentiale, A. tartarosum.** Old names for tartaric acid. [B, 91, 97, 99.]—**A. tartricum.** See the major list.—**A. terræ ponderosæ.** Acid of barytes, or heavy spar; sulphuric acid. [B, 87.]—**A. thionhydricum.** Aqueous solution of hydrogen sulphide. [A, 316.]—**A. thionicum.** Sulphuric acid. [A, 316.]—**A. thymicum** [Fr. Cod.], **A. thymolicum.** Thymol. [B.]—**A. tingens.** Hydrocyanic acid. [B, 101.]—**A. trichloraceticum** [Swiss Ph.]. Trichloracetic acid. [B, 95.] **A. trichlorphenicum.** Trichlorphenol. [B, 94.]—**A. trinitrocarbolicum, A. trinitrophenicum.** Trinitrophenol; picric acid. [B, 94, 102.]—**A. tungsticum.** Tungstic acid. [B.]—**A. universale.** See *A. catholicon.*—**A. uricum.** Uric acid. [B, 97.]—**A. urinæ.** Acid of urine; phosphoric acid. [B, 101.]—**A. urinicum, A. urolithicum.** Uric acid. [A, 316; B, 102.]—**A. uvicum.** Racemic acid. [B, 49.]—**A. vagum.** Sulphuric acid. [B.]—**A. valerianicum** [Ger. Ph., 1st ed., Belg. Ph., Greek Ph., Russ. Ph., Netherl. Ph.], **A. valericum** [Fr. Cod.]. Valerianic acid. [B.]—**A. vanadinicum.** Vanadic acid. [B, 49.]—**A. vegetabile.** A vegetable acid. [B, 99.]—**A. vegetabile essentiale.** A concentrated vegetable acid. [B, 87.]—**A. ventriculi.** Acidity of the primæ viæ.—**A. vini phlogisticatum.** Tartaric acid. [B, 101.]—**A. vitrioli.** An old name for sulphuric acid. [A, 344.]—**A. vitrioli aromaticum.** See A. SULPHURICUM *aromaticum.*—**A. vitriolicum.** Sulphuric acid.—**A. vitriolicum aeratum.** Hydrofluoric acid. [B, 87.]—**A. vitriolicum cum alcohole aromatico.** See A. SULPHURICUM *aromaticum.*—**A. vitriolicum dilutum.** See *Dilute* SULPHURIC ACID.—**A. vitriolicum phlogisticatum.** Sulphurous acid. [B, 87.]—**A. vitriolicum tenue.** See *Dilute* SULPHURIC ACID.—**A. vitriolicum vinosum.** See MIXTURA *sulfurica acida.*—**A. vitrioli defæcatum, A. vitrioli defecatum, A. vitrioli dephlogisticatum, A. vitrioli depuratum.** Old terms for purified sulphuric acid. [A, 344.]—**A. vitrioli dilutum.** See *Dilute* SULPHURIC ACID.—**A. vitrioli forte.** Concentrated sulphuric acid. [B.]—**A. vitrioli phlogisticatum.** Sulphurous acid. [B.]—**A. vitrioli purissimum, A. vitrioli rectificatum.** Old names for purified sulphuric acid. [A, 344.]—**A. vitrioli vinosum.** Ether. [A, 316.]—**A. volatile.** A volatile acid. [B, 99.]—**A. wolframicum.** Tungstic acid. [B, 49.]—**A. zincicum.** Zincic acid. [B, 91.]—**A. zooticum, A. zootinicum.** Hydrocyanic acid. [A, 344.]

ACIDUM ACETICUM (Lat.), n. n. [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Dan. Ph., Finn. Ph., Russ. Ph., Netherl. Ph., Norweg. Ph., Swed. Ph.] A^{2}s(a^{3}k)-e^{2}t'i^{2}k-u^{3}m(u^{4}m). Fr., *acide acétique.* Ger., *Essigsäure.* It., *acido acetico.* Sp., *ácido acético.* Syn.: *acetum concentratum.* Acetic acid. In the Ger. Ph., glacial acetic acid; in the other pharmacopœias, an aqueous solution of acetic acid containing 29·4 per cent. [Dan. Ph., Norweg. Ph., Russ. Ph., Swed. Ph.], 31·5 per cent. [Finn. Ph.], 33 per cent. [Br. Ph.], 36 per cent. [U. S. Ph.] of the pure acid. [B, 95.]—**A. a. aromaticum** [Ger. Ph. (1st ed.), Belg. Ph., Greek Ph., Russ. Ph.]. Fr., *acide acétique aromatisé.* Ger., *Gewürzessigsäure.* It., *acido acetico aromatico.* Sp., *ácido acético aromático.* Syn.: *acetum aromaticum spirituosum* [Swiss Ph.]. A preparation variously made up from different volatile oils dissolved in acetic acid, with or without the addition of alcohol and acetic ether. That formerly official in the Ger. Ph. contained 9 parts of oil of cloves, 6 parts each of oil of lavender and oil of citrons, 3 parts of oil of thyme, 1 part of oil of cinnamon, and 25 parts of glacial acetic acid. Other preparations contained a higher percentage of the acid. [B, 95.]—**A. aromaticum camphoratum** [Greek Ph.]. A preparation similar to the *vinaigre anglais* of the French Codex. [B, 95.] See ACETUM *britannicum.*—**A. a. camphoratum.** Fr., *acide acétique camphré.* Ger., *campherhaltige Essigsäure.* It., *acido acetico canforato.* Sp., *ácido acético alcanforado.* Camphorated acetic acid. A preparation of the Edinburgh and Dublin Pharmacopœias, consisting of an avoirdupois ounce of camphor pulverized with the aid of a drachm of rectified spirit and dissolved in 10 fluidounces of strong acetic acid. The preparation of the Greek Ph. is made up of 1 part of camphor and 50 parts of concentrated acetic acid (containing 43·5 per cent. of the anhydrous acid.) [B, 5, 95.]—**A. a. concentratissimum.** Glacial acetic acid. [A, 316.]—**A. a. concentratum.** Fr., *acide acétique concentré.* Ger., *concentrirte Essigsäure.* It., *acido acetico concentrato.* Sp., *ácido acético concentrado.* In the Aust. Ph., Hung. Ph., Russ. Ph., Belg. Ph., and Swed. Ph., glacial acetic acid; in the Greek Ph., an aqueous solution containing 43·5 per cent. of anhydrous acetic acid. [B, 95.]—**A. a. crystallisatum** [Swiss Ph.]. Fr., *acide acétique cristallisable* [Fr. Cod.]. Ger., *krystallinische Essigsäure.* Glacial acetic acid. [B, 95.]—**A. a. dilutum.** Fr., *acide acétique dilué.* Ger., *verdünnte Essigsäure* [Ger. Ph.]. It., *acido acetico diluto.* Sp., *ácido acético diluido.* Dilute acetic acid. An aqueous solution of acetic acid containing 6 per cent. [U. S. Ph., Br. Ph.], 5¾ per cent. [Belg. Ph., Netherl. Ph.], 5¼ per cent. [Fenn. Ph.], and 4·9 per cent. [Russ. Ph.], of the anhydrous acid. The *A. a. dilutum* of the other pharmacopœias corresponds to the *A. a.* of the U. S. Ph. and Br. Ph., and contains 30 per cent. [Ger. Ph.], or 20·4 per cent. [Aust. Ph., Hung. Ph., Swiss Ph.], of the anhydrous acid. [B, 95.]—**A. a. eligno venale, A. a. empyreumaticum.** Pyroligneous acid. [A, 313, 316.]—**A. a. forte.** Strong acetic acid. [A, 316.]—**A. a. fortius.** The strongest acetic acid. [A, 316.] That of the old London Ph. was required to be of such strength that 100 grains would neutralize 87 grains of sodium carbonate. [B.]—**A. a. glaciale** [U. S. Ph., Br. Ph., Greek Ph.]. Fr., *esprit de vinaigre, vinaigre glacial, acide acétique cristallisable* [Fr. Cod.]. Ger., *Essigsäure* [Ger. Ph.], *Eisessig.* It., *acido acetico glaciale.* Sp., *ácido acético glacial.* Syn.: *acidum aceticum* [Ger. Ph.], *a. a. concentratum, a. a. crystallisatum.* Glacial acetic acid. Aqueous acetic acid containing at least 96 per cent. [Ger. Ph., Aust. Ph., Swiss Ph., Hung. Ph., Rouman. Ph.], 97·5 per cent. [Russ. Ph.], 99 per cent. [U. S. Ph., Br. Ph., Swed. Ph.], or 100 per cent. [Fr. Cod.], of the anhydrous acid. The corresponding Belgian preparation contains only 85 per cent. of the acid. [B, 95.]—**A. a. ligni.** Purified pyroligneous acid.—**A. a. purum.** Glacial acetic acid. [B.]—**A. a. pyrolignosum.** Pyroligneous acid. [A, 247.]—**A. a. scilliticum.** See *Acetum* SCILLÆ.—**A. a. tenue** [Edinb. Ph. (1826)]. Distilled wine vinegar; dilute acetic acid of a sp. gr. of 1·006. [B, 97.]—**Species pro vaporibus acidi acetici** [Swed. Ph. (1817)]. A preparation consisting of 3 parts of crystallized lead acetate and 1 part of sulphuric acid, to be mixed together at the moment of using. [B, 97.]—**Syrupus acidi acetici** [Edinb. Ph. (1826), U. S. Ph. (1820)]. Fr., *sirop d'acide acétique, sirop de vinaigre.* Ger., *Essigsyrup.* It., *siroppo di acido acetico.* Sp., *jarabe de ácido acético.* Syn.: *syrupus aceti, oxysaccharum.* A preparation made by boiling together 5 parts of vinegar and 7 parts of refined sugar to the consistence of a syrup. Similar preparations were official in various formularies of an earlier date, the amount of vinegar in them varying form 25 to 50 per cent. [B, 97], and the present Belg. Ph. contains one made up of 347 parts of dilute acetic acid (containing 5¾ per cent. of the anhydrous acid) and 653 parts of sugar. [B, 10.]

ACIDUM ACETOSUM (Lat.), n. n. A^{2}s(a^{3}k)-e^{2}t-o'su^{3}m(su^{4}m). Acetous (acetic) acid.—**A. a. camphoratum.** See ACIDUM ACETICUM *camphoratum.*—**A. a. debilius, A. a. destillatum.** Distilled vinegar; dilute acetic acid. [A, 316.]—**A. a. forte.** Strong acetous acid; acetic acid.—**A. a. tenue.** Dilute acetic acid; distilled vinegar. [A, 316.]—**Syrupus acidi acetosi.** See *Syrupus* ACIDE ACETICI.

ACIDUM ARSENICUM [Fr. Cod.] (Lat.), n. n. A^{3}r-se^{2}n'i^{2}k-u^{3}m(u^{4}m). Fr., *acide arsénique* [Fr. Cod.]. Ger., *Arsensäure.* It., *acido arsenico.* Sp., *ácido arsénico.* Arsenic acid.—**Pilulæ cum acido arsenico** [Fr. Cod.]. See PILULES *arsénicales.*

ACIDUM ARSENIOSUM [U. S. Ph., Br. Ph., Fr. Cod., Belg. Ph., Swiss Ph.] (Lat.), n. n. A^{3}r-se^{2}n'i^2-o'su^{3}m(su^{4}m). Fr., *acide arsénieux* [Fr. Cod.]. Ger., *arsenige Säure* [Ger. Ph.]. It., *acido arsenioso.* Sp., *ácido arsenioso.* Arsenious acid; trioxide of arsenic.—**A. a. aqua solutum** [Fr. Cod.]. See *Soluté d'*ACIDE ARSÉNIEUX.—**Granula cum acido arsenioso** [Fr. Cod.]. See *Granules d'*ACIDE ARSÉNIEUX.—**Liquor acidi arseniosi** [U. S. Ph.]. Fr., *liqueur arsénicale hydrochlorique.* Ger., *Chlorarseniklösung.* It., *soluzione di acido arsenioso, soluzione idroclorica d'arsenico.* Sp., *licor de ácido arsenioso.* Syn.: *liquor arsenici hydrochloricus* [Br. Ph.], *liquor arsenici chloridi* [U. S. Ph., 1870], *hydrochloric solution of arsenic.* Solution of arsenious acid; a one-per-cent. aqueous solution of arsenic trioxide prepared by boiling the latter with hydrochloric acid and adding water. The present preparation of the U. S. Ph. and Br. Ph. is stronger than that official in the preceding editions of these formularies in the proportion of 8 to 9.

ACIDUM BENZOICUM [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Aust. Ph., Dan. Ph., Finn. Ph., Swiss Ph., Netherl. Ph., Norweg. Ph., Swed. Ph.] (Lat.), n. n. Be^{2}n-zo'-i^{2}k-u^{3}m(u^{4}m). Fr., *acide benzoïque* [Fr. Cod.]. Ger., *Benzoësäure* [Ger. Ph.]. It., *acido benzoico.* Sp., *ácido benzóico* [Sp. Ph.]. Benzoic acid, obtained, according to all the formularies except the French Codex, by the sublimation of benzoin.—**A. b. crystallisatum** [Pruss. Ph., 1862]. See *A. b. via humida paratum.* — **A. b. medicinale** [Belg. Ph.], **A. b. sublimatione paratum** [Greek Ph.], **A. b. sublimatum** [Russ. Ph.]. Fr., *acide benzoïque par sublimation* [Fr. Cod.]. Ger., *Benzoëblumen.* It., *fiori di benzoe.* Sp., *flores de benjuí.* Syn.: *Flowers of benzoin.* Benzoic acid obtained by the sublimation of benzoin. [B, 95.]—**A. b. via humida paratum** [Greek Ph.]. Fr., *acide benzoïque par voie humide* [Fr. Cod.]. Benzoic acid obtained by boiling benzoin with lime water or potassium carbonate, extracting the product with water, and precipitating the extract with hydrochloric acid. [B, 95.]—**Trochisci acidi benzoici** [Br. Ph.]. Fr., *tablettes d'acide benzoïque.* Ger., *Benzoësäurepastillen.* It., *tavolette di acido benzoico.* Sp., *tabletas de ácido benzóico.* Troches of benzoic acid; a preparation consisting of troches each of which contains ½ grain of benzoic acid mixed with sugar.

ACIDUM BORICUM [U. S. Ph., Br. Ph., Ger. Ph., Dan. Ph., Russ. Ph., Swed. Ph., Netherl. Ph., Swiss Ph.] (Lat.), n. n. Bo'ri^{2}k-u^{3}m(u^{4}m). Fr., *acide borique.* Ger., *Borsäure* [Ger. Ph.]. It., *acido borico.* Sp., *ácido bórico* [Sp. Ph.]. Syn.: *acidum boracicum* [Greek Ph.]. Boric acid. [B, 95.]—**A. b. medicinale** [Belg. Ph.], **A. b. purissimum** [Fr. Cod.]. Fr., *acide borique cristallisé* [Fr. Cod.]. Ger., *gereinigte Borsäure.* It., *acido borico purissimo.* Purified boric acid.—**Gossypium acidi borici.** Borated cotton. A preparation of the London Throat Hospital containing 50 per cent. of boric acid. [B, 94.]—**Linteum acidi borici.** Borated lint; lint impregnated with about half its weight of boric acid. [B, 94.]—**Unguentum acidi borici** [Br. Ph.]. Fr., *pommade d'acide borique.* Ger., *Borsäuresalbe.* It., *pomata o unguento di acido borico.* Sp., *pomada de ácido bórico.* Ointment of boric acid. A preparation made by melting together soft paraffin, 4 parts, hard paraffin, 2 parts, and adding 1 part of finely powdered boric acid. Lister's boric-acid ointment is made by melting together 2 parts of paraffin, 1 part of white wax, and 2 parts of almond oil, and adding 1 part of boric acid. [B. 94.]

ACIDUM CARBOLICUM [U. S. Ph., Br. Ph., Ger. Ph., Aust. Ph., Hung. Ph.] (Lat.), n. n. Ka^{3}r-bo^{2}l'i^{2}k-u^{3}m(u^{4}m). Fr., *acide phénique, phénol* [Fr. Cod.]. Ger., *Carbolsäure* [Ger. Ph.]. It., *acido carbolico, acido fenico.* Sp., *ácido fénico, ácido carbólico.* Syn.: *acidum phœnicum* [Greek Ph.], *acidum phenylicum* [Dan. Ph., Swiss Ph., Netherl. Ph., Norweg. Ph.], *acidum phenylicum depuratum* [Swed. Ph.], *acidum phenicum* [Fr. Cod.]. Carbolic acid (phenol) purified for medicinal use. [B, 95.]—**Acetum cum acido carbolico** [Fr. Cod.]. See VINAIGRE *phéniqué.*—**A. c. crudum** [U. S. Ph., Ger. Ph., Russ. Ph.]. Fr., *acide phénique cru.* Ger., *rohe Carbolsäure* [Ger. Ph.]. It., *acido fenico crudo.* Sp., *ácido fénico comercial.* Syn.: *acidum phenylicum crudum* [Swiss Ph.,

Swed. Ph.]. Crude carbolic acid. Commercial carbolic acid containing various impurities which should not exceed more than 10 per cent. by volume [U. S. Ph., Ger. Ph.], or 50 per cent. by weight [Russ. Ph., Swiss Ph., Swed. Ph.]. It is usually more or less colored and contains cresol. [B, 5, 95.]—**A. c. crystallisatum** [Russ. Ph.]. See *A. c.*—**A. c. impurum.** See *A. c. crudum.*—**A. c. liquefactum** [Br. Ph., Ger. Ph.]. Fr., *acide phénique liquide.* Ger., *verflüssigte Carbolsäure* [Ger. Ph.]. It., *acido fenico liquido.* Sp., *ácido fénico liquido.* Carbolic acid mixed with one tenth its weight of water, forming an oily liquid. [B.]—**A. c. solutum** [Russ. Ph.], **Aqua acidi carbolici** [U. S. Ph., 1870]. See AQUA *carbolisata.*—**Carbasus acidi carbolici.** Carbolized gauze. [B, 94.]—**Glycerinum acidi carbolici** [Br. Ph.], **Glyceritum acidi carbolici** [U. S. Ph., 1870]. Fr., *glycéré d'acide phénique.* Ger., *Phenolglycerit.* It., *glicerato* o *glicerite di acido fenico.* Sp., *glicerolado de ácido fénico.* Glycerin or glycerite of carbolic acid ; a solution of 1 part of the crystallized acid in 4 parts by volume of glycerin. [B, 5, 94.]—**Solutio acidi carbolici** [Norweg. Ph.]. See AQUA *carbolisata.*—**Suppositoria acidi carbolici** [U. S. Ph., 1870]. Fr., *suppositoires d'acide phénique.* Ger., *Carbolsäurestuhlzäpfchen.* It., *suppositori di acido carbolico.* Sp., *supositorios de ácido fénico.* Suppositories of carbolic acid, each suppository containing 1 grain of carbolic acid and 29 grains of cacao butter. [B, 81.]—**Suppositoria acidi carbolici cum sapone** [Br. Ph.]. Fr., *suppositoires d'acide phénique avec savon.* Ger., *geseifte Carbolsäurestuhlzäpfchen.* It., *suppositori di acido carbolico con sapone.* Suppositories of carbolic acid with soap ; each suppository contains 1 grain of crystallized carbolic acid, 15 grains of soap, and enough starch to make a paste of suitable consistence.—**Unguentum acidi carbolici** [U. S. Ph., Br. Ph.]. Fr., *pommade d'acide phénique.* Ger., *Phensolsalbe.* It., *pomata* o *unguento di acido fenico.* Sp., *pomada de ácido fénico.* Ointment of carbolic acid ; an ointment made of 1 part of carbolic acid mixed with 9 parts of simple ointment [U. S. Ph.], or with 12 parts of soft paraffin and 6 parts of hard paraffin [Br. Ph.].

ACIDUM CARBONICUM (Lat.), n. n. Ka^{3}r-bo^{2}n'i^{2}k-u^{3}m-(u^{4}m). Fr., *acide carbonique.* Ger., *Kohlensäure.* It., *acido carbonico.* Sp., *ácido carbónico.* 1. Carbon dioxide (the carbonic-acid gas of the older chemists). 2. True carbonic acid. [B.]—**Aqua acidi carbonici** [Finn. Ph., U. S. Ph., 1870], **Aqua acidulata cum acido carbonico, Solutio acidi carbonici** [Swed. Ph.]. Fr., *eau gazeuse simple* [Fr. Cod.]. Ger., *kohlensaures Wasser.* It., *acqua gazosa semplice.* Sp., *aqua carbónica* [Sp. Ph.]. Syn. : *aqua carbonica, aqua acidula simplicior* [Fr. Cod.]. Carbonic-acid water ; soda water. An aqueous solution of carbon dioxide prepared under a pressure of several atmospheres (7 according to the French Codex). It is a colorless, odorless, and tasteless effervescent liquid, containing true carbonic acid. [B.]

ACIDUM CHLORHYDRICUM [Fr. Cod., Belg. Ph.] (Lat.), n. n. Klo^{3}r(klor)hi^{2}d-(hu^{6}d)'ri^{2}k-u^{3}m(u^{4}m). See HYDROCHLORIC ACID.—**A. c. dilutum** [Belg. Ph.]. See *Dilute* HYDROCHLORIC ACID.—**A. c. venale** [Belg. Ph.]. See *Commercial* HYDROCHLORIC ACID.—**Balneum acidi chlorhydrici** [Belg. Ph.]. Fr., *bain d'acide chlorhydrique.* Ger., *Chlorwasserstoffbade.* It., *bagno d'acido cloridrico.* Sp., *baño de acido chlorhidrico.* Syn. : *balneum acidum.* Bath of hydrochloric acid ; a sufficient quantity, *i. e.*, 1 kilogramme (2¼ lbs.) of concentrated hydrochloric acid of sp. gr. 1·18 to properly acidulate a bath of 300 litres (80 gallons). [B. 95.]

ACIDUM CHROMICUM [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Aust. Ph., Greek Ph., Russ. Ph., Hung. Ph., Netherl. Ph., Swiss Ph.] (Lat.), n. n. Kro'mi^{2}k-u^{3}m(u^{4}m). Fr., *acide chrômique cristallisé* [Fr. Cod.]. Ger., *Chromsäure* [Ger. Ph.]. It., *acido cromico.* Sp., *ácido crómico.* Chromic acid ; chromium trioxide. [B, 95.]—**A. c. aqua solutum** [Fr. Cod.], **Liquor acidi chromici** [Br. Ph.]. Fr., *soluté d'acide chromique* [Fr. Cod.]. Ger., *Chromsäurelösung.* It., *soluzione di acido cromico.* Sp., *solucion de ácido crómico.* An aqueous solution of chromium trioxide containing 50 per cent. [Fr. Cod.], or 25 per cent. [Br. Ph.], of the latter. [B.]

ACIDUM CITRICUM [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., and all the Pharmacopœias] (Lat.), n. n. Si^{2}t(ki^{2}t)'ri^{2}k-u^{3}m-(u^{4}m). Citric acid.—**A. c. crystallis concretum.** Crystallized citric acid. [B.]—**Pulvis acidi citrici** [Fr. Cod.]. See *Poudre d'*ACIDE CITRIQUE.—**Syrupus acidi citrici** [U. S. Ph.], **Syrupus cum acido citrico** [Fr. Cod.]. Fr., *sirop d'acide citrique* [Fr. Cod.]. Ger., *Citronensäuresyrup.* It., *siroppo di acido citrico.* Sp., *jarabe de ácido citrico.* Syrup of citric acid. A preparation made up of citric acid, 8 parts, spirit of lemon, 4 parts, water, 8 parts, and syrup, 980 parts [U. S. Ph.], or of citric acid, 10 parts, water, 10 parts, and syrup, 980 parts [Fr. Cod.], or of citric acid, 20 parts, water, 40 parts, simple syrup, 969 parts, and oil of citron, 1 part [Belg. Ph. (B, 10)].

ACIDUM GALLICUM [U. S. Ph., Br. Ph., Fr. Cod., Swiss Ph., Netherl. Ph.] (Lat.), n. n. Ga^{2}l(ga^{3}l)'li^{2}k-u^{3}m(u^{4}m). Gallic acid.—**Glycerinum acidi gallici** [Br. Ph.], **Glyceritum acidi gallici** [U. S. Ph., 1870]. Fr., *glycéré d'acide gallique.* Ger., *Gallussäureglycerit.* It., *glicerato* o *glicerite di acido gallico.* Sp., *glicerolado de ácido gálico.* Glycerin or glycerite of gallic acid ; a solution of 1 part of gallic acid in 4 parts by volume of glycerin. [B, 5, 94.]—**Unguentum acidi gallici** [U. S. Ph.]. Fr., *pommade d'acide gallique.* Ger., *Gallussäuresalbe.* It., *pomata di acido gallico.* Sp., *pomada de ácido gálico.* Ointment of gallic acid ; a mixture of 1 part of gallic acid with 9 parts of benzoinated lard. [B.]

ACIDUM HYDRIODICUM (Lat.), n. n. Hid(hu^{6}d)-ri^2-o^{2}d'i^{2}k-u^{3}m(u^{4}m). Hydriodic acid.—**A. h. dilutum.** See *Dilute* HYDRIODIC ACID.—**Syrupus acidi hydriodici** [U. S. Ph.]. Fr., *sirop d'acide iodhydrique.* Ger., *Iodwasserstoffsyrup.* It., *siroppo di acido iodidrico.* Sp., *jarabe de ácido yodhidrico.* Syrup of hydriodic acid ; a preparation made by adding to a mixture of 150 parts of syrup and 150 of water a solution of 10 parts of iodine in 80 of alcohol, passing a current of hydrogen sulphide through the mixture till the latter acquires a permanently yellow color, filtering and adding 5 parts of spirit of orange, 500 of sugar, and water up to 1,000 parts. It contains one per cent. of hydriodic acid. [B.]

ACIDUM HYDROCYANICUM [Greek Ph., Swiss Ph.] (Lat.), n. n. Hid(hu^{6}d)-ro-si(ku^6)-a^{2}n(a^{3}n)'i^{2}k-u^{3}m(u^{4}m). Hydrocyanic acid. In the Greek Ph. and Swiss Ph., dilute hydrocyanic acid.—**A. h. alcoholisatum, A. h. dilutum** [U. S. Ph., Br. Ph.]. See *Dilute* HYDROCYANIC ACID.—**Vapor acidi hydrocyanici** [Br. Ph., 1867]. Fr., *inhalation d'acide cyanhydrique.* It., *vapore* o *inalazione di acido cianidrico.* Inhalation of hydrocyanic acid ; a preparation consisting of 10 to 15 minims of dilute hydrocyanic acid mixed with a fluidrachm of cold water and slowly evaporated at the time of using. [B, 5.]

ACIDUM MURIATICUM [U. S. Ph., 1870] (Lat.), n. n. Mu^2-(mu)-ri^2-a^{2}t(a^{3}t)'i^2-ku^{3}m(ku^{4}m). Hydrochloric acid.—**A. m. concentratum.** See HYDROCHLORIC ACID.—**A. m. crudum.** See *Commercial* HYDROCHLORIC ACID.—**A. m. dephlogisticatum.** Fr., *acide muriatique déphlogistiqué.* An old name for chlorine. [A, 344.]—**A. m. dilutum.** See *Dilute* HYDROCHLORIC ACID.—**A. m. hyperoxygenatum.** Fr., *acide muriatique suroxygéné.* Ger., *überoxydirte Salzsäure.* Chloric acid. [B, 48, 49.]—**A. m. nitroso-oxygenatum.** Nitrohydrochloric acid. [A, 344.]—**A. m. oxygenatum** [Greek Ph.]. Fr., *acide muriatique oxygéné.* Ger., *oxydirte Salzsäure.* It., *acido muriatico ossigenato.* Sp., *ácido muriático oxigenado.* An old name for chlorine in saturated aqueous solution ; still official under this title in the Greek Ph. [B, 91, 95.]—**A. m. oxygenatum ad contagia.** An old name for chlorine gas (used as a means of disinfection). [B, 97.]—**A. m. purum.** Purified hydrochloric acid.—**Liquor acidi muriatici oxygenati.** See *A. m. oxygenatum.*—**Species pro vaporibus acidi muriatici** [Swed. Ph., 1817]. Syn. : *solutio alexiteria.* A preparation, designed for the extemporaneous production of chlorine, made up of 2 parts of common salt and 1 part of sulphuric acid, to be mixed at the time of using. [B, 97.]

ACIDUM NITRICUM [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., and the other Pharmacopœias] (Lat.), n. n. Ni(ne)'tri^{2}k-u^{3}m(u^{4}m). Fr., *acide azotique, acide azotique officinal* [Fr. Cod.]. Ger., *Salpetersäure* [Ger. Ph.]. It., *acido nitrico, acido azotico.* Sp., *ácido nitrico* [Sp. Ph.]. Syn. : *acidum azoticum.* Nitric acid.—**A. n. alcoholisatum, A. n. alcoolisatum** [Fr. Cod.]. Fr., *acide azotique alcoolisé* [Fr. Cod.]. It., *acido nitrico alcoolizzato.* A mixture of nitric acid and alcohol. See ACIDE *azotique alcoolisé.*—**A. n. concentratum** [Fenn. Ph., Greek Ph.]. Fr., *acide azotique concentré.* Ger., *concentrirte Salpetersäure.* It., *acido nitrico concentrato.* Sp., *ácido nitrico concentrado.* 1. Strong nitric acid [Fenn. Ph.]. See NITRIC ACID. 2. Fuming nitric acid [Greek Ph.]. [B, 95.]—**A. n. concentratum purum.** See NITRIC ACID.—**A. n. crudum.** See *Commercial* NITRIC ACID.—**A. n. dilutum, A. n. dilutum crudum, A. n. dilutum purum.** See *Dilute* NITRIC ACID.—**A. n. fumans.** See *Fuming* NITRIC ACID.—**A. n. hydrochloratum.** See NITROHYDROCHLORIC ACID.—**A. n. oxygenatum.** Nitric acid. [B.]—**A. n. purum.** See NITRIC ACID.—**A. n. purum dilutum.** See *Dilute* NITRIC ACID.—**A. n. solidificatum, A. n. solidum.** A gelatinous solid mass formed by subjecting nitric acid of a sp. gr. of 1·36 in contact with charpie to a moderate heat. It is used as a caustic application to cancers. [B, 96.]—**A. n. venale.** See *Commercial* NITRIC ACID.—**Species pro vaporibus acidi nitrici.** Fr., *fumigation de Smith.* Sp., *fumigacion de ácido nitrico* o *de Smith* [Sp. Ph.]. Syn. : *fumigatio smithiana.* A preparation designed for disengaging fumes of gaseous nitric acid and composed of equal parts of nitre and sulphuric acid, with or without the addition of water, mixed at the time of using [Sp. Ph., Swed. Ph., 1817, Batav. Ph., 1811]. In other formularies nitrate of calcium and potassium sulphate are directed to be heated together. [B, 92, 97, 103.]—**Unguentum acidi nitrici.** Fr., *pommade d'acide azotique.* Ger., *Salpetersäuresalbe.* It., *pomata di acido nitrico.* Sp., *pomada de ácido nítrico.* Syn. : *Axungia nitrica* seu *oxygenata, unguentum nitricatum* seu *oxynomenon.* Nitric-acid ointment, nitrous ointment. A preparation made up of 1 part of nitric acid mixed with 16 parts of lard [U. S. Ph., 1820, Batav. Ph., 1811], or of 6 drachms of impure nitric acid and 1 ounce of lard [Ed. Ph., 1826], or of 1 ounce of nitric acid, 4 ounces of lard, and 1 pound of olive-oil [Dubl. Ph., 1830]. Similar preparations of somewhat different strength were official at one time in many formularies. [B, 97.]

ACIDUM NITROSUM (Lat.), n. n. Ni(ne)-tro'su^{3}m(su^{4}m). Fr., *acide azoteux* ou *nitreux.* Ger., *salpetrige Säure.* It., *acido nitroso.* Sp., *ácido nitroso.* 1. Nitrous acid. 2. Impure nitric acid obtained by the action of sulphuric acid upon potassium nitrate. [Ed. Ph., 1826.]—**A. n. album.** Fr., *acide azoteux blanc.* Nitric acid.—**A. n. alcoholisatum.** The same as *A. nitricum alcoholisatum.*—**A. n. degazatum, A. n. dephlogisticatum.** Fr., *acide azoteux déphlogistiqué.* Dephlogisticated (oxygenated) nitrous acid ; nitric acid. [B.]—**A. n. dilutum.** See *Dilute* NITRIC ACID.—**A. n. fumans, A. n. phlogisticatum.** See *Fuming* NITRIC ACID.—**A. n. tenue.** See *Dilute* NITRIC ACID.—**Unguentum acidi nitrosi** [Ed. Ph., 1826]. See *Unguentum* ACIDI NITRICI.

ACIDUM OSMICUM (Lat.), n. n. O^{2}z(o^{2}s)'mi^{2}k-u^{3}m(u^{4}m). Osmic acid ; osmium tetroxide. [B.]—**Liquor acidi osmici.** Fr., *soluté d'acide osmique.* Ger., *Osmiumsäurelösung.* It., *soluzione di acido osmico.* Sp., *solucion de ácido ósmico.* A one-per-cent. aqueous solution of osmium tetroxide employed as a reagent in microscopy, and also occasionally employed in medicine. [B, 94.]

ACIDUM PHENYLICUM [Dan. Ph., Swiss Ph., Netherl. Ph., Norweg. Ph.] (Lat.), n. n. Fe^{2}n-i^{2}l(u^{6}l)'i^2-ku^{3}m(ku^{4}m). Carbolic acid. [B, 95.]—**A. p. crudum.** See A. CARBOLICUM *crudum.*—**A. p. depuratum** [Swed. Ph.]. Purified carbolic acid. [B, 95.]—**Solutio acidi phenylici.** See AQUA *carbolisata.*

ACIDUM PHOSPHORICUM (Lat.), n. n. Fo^{2}s-fo^{2}r'i^2-ku^{3}m-(ku^{4}m). Phosphoric acid.—**A. p. concentratum** [Br. Ph.]. Concentrated phosphoric acid. See PHOSPHORIC ACID.—**A. p. dilu-**

tum. See *Dilute* PHOSPHORIC ACID.—**A. p. ex ossibus.** Phosphoric acid obtained from bones. [B, 99.]—**A. p. fusum, A. p. glaciale** [Swiss Ph.]. See *Glacial* PHOSPHORIC ACID.—**A. p. liquidum, A. p. officinale.** The *acide phosphorique officinal* of the French Codex. [B, 92.] See PHOSPHORIC ACID.—**A. p. siccum.** 1. Phosphorus pentoxide obtained by heating phosphorus in oxygen. [A, 316.] 2. Glacial phosphoric acid. [Ger. Ph., 1st ed. (B, 95, 102).]—**Solutio acidi phosphorici.** Dilute phosphoric acid. [B, 101.]

ACIDUM SALICYLICUM [U.S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Aust. Ph., Dan. Ph., Swiss Ph., Norweg. Ph., Russ. Ph., Swed. Ph.] (Lat.), n. n. Sa[2]l(sa[3]l)-i[2]-si[2]l(ku[6]l)'i[2]-ku[3]m(ku[4]m). Salicylic acid. [B, 95.]—**Unguentum acidi salicylici** [Br. Ph.]. Fr., *pommade d'acide salicylique.* Ger., *Salicylsäuresalbe.* It., *pomata di acido salicilico.* Sp., *pomada de ácido salicílico.* Ointment of salicylic acid ; made by melting together 18 parts of soft paraffin and 9 parts of hard paraffin and adding 1 part of salicylic acid. [B.]

ACIDUM SULFURICUM [Fr. Cod., Ger. Ph., Swiss Ph.] (Lat.), n. n. Su[3]l(sul)-fu[2](fu)'ri[2]-ku[3]m(ku[4]m). Sulphuric acid.—**A. s. alcoolisatum** [Fr. Cod.]. See MIXTURA *sulfurica acida.*—**A. s. anglicanum.** English sulphuric acid ; in the Aust. Ph. and Hung. Ph., commercial sulphuric acid. [B, 95.]—**A. s. anglicum.** See *English* SULPHURIC ACID.—**A. s. concentratum.** Concentrated sulphuric acid. [B, 49.]—**A. s. concentratum purum.** See SULPHURIC ACID.—**A. s. crudum.** See *Commercial* SULPHURIC ACID.—**A. s. dilutum, A. s. dilutum purum.** See *Dilute* SULPHURIC ACID.—**A. s. fumans.** See *Fuming* SULPHURIC ACID and *Nordhausen* SULPHURIC ACID.—**A. s. nordhusianum.** Nordhausen sulphuric acid. [B, 96.]—**A. s. purum.** Pure sulphuric acid. See SULPHURIC ACID.—**A. s. purum dilutum.** See *Dilute* SULPHURIC ACID.—**A. s. rectificatum.** Pure sulphuric acid. [B.] See SULPHURIC ACID.—**A. s. spirituosum.** See MIXTURA *sulfurica acida.*—**Potus cum acido sulfurico** [Fr. Cod.]. See LIMONADE *sulfurique.*

ACIDUM SULPHURICUM [U. S. Ph., Br. Ph., Netherl. Ph., Dan. Ph.] (Lat.), n. n. Su[3]l(sul)-fu[2](fu)'ri[2]-ku[3]m(ku[4]m). Sulphuric acid.—**A. s. alcoholisatum, A. s. alcoolisatum.** See MIXTURA *sulfurica acida.*—**A. s. aquosum.** Fr., *acide sulfurique aqueux.* Ger., *wässerige Schwefelsäure.* It., *acido solforico acquoso.* Sp., *ácido sulfúrico acuoso.* Dilute sulphuric acid. [B, 97.]—**A. s. aromaticum** [U. S. Ph., Br. Ph.]. Fr., *teinture aromatique sulfurique* [Fr. Cod., 1837], *acide sulfurique aromatisé.* Ger., *aromatische Schwefelsäure, saure aromatische Tinctur.* It., *acido solforico aromatico.* Sp., *ácido sulfúrico aromático.* Syn. : *tinctura aromatica acida, elixir vitrioli Mynsichti, Mynsicht's elixir of vitriol.* Aromatic sulphuric acid. A preparation made up of 200 parts of sulphuric acid, 45 parts of tincture of ginger, 1 part of oil of cinnamon, and enough water to make 1,000 parts [U. S. Ph.] ; or of 3 parts by volume (140 parts by weight) of sulphuric acid, 36 parts by volume (770 parts by weight) of rectified spirit, and 2 parts each by volume (45 parts by weight) of spirit of cinnamon and essence of ginger [Br. Ph.]. [B.]—**A. s. concentratum** [Norweg. Ph., Swed. Ph.]. Fr., *acide sulfurique concentré.* Ger., *concentrirte Schwefelsäure.* It., *acido solforico concentrato.* Sp., *ácido sulfúrico concentrado.* Concentrated sulphuric acid. See SULPHURIC ACID.—**A. s. concentratum crudum** [Swed. Ph.]. Fr., *acide sulfurique concentré cru.* Ger. *concentrirte rohe Schwefelsäure.* It., *acido solforico concentrato crudo.* Sp., *ácido sulfúrico concentrado comercial.* Commercial sulphuric acid containing 92 to 93 per cent. of the pure acid. [B, 95.]—**A. s. condensatum.** See *A. s. concentratum.*—**A. s. crudum.** See *Commercial* SULPHURIC ACID.—**A. s. destillatum** [Belg. Ph.]. Fr., *acide sulfurique distillé.* Ger., *destillirte Schwefelsäure.* It., *acido solforico distillato.* Sp., *ácido sulfúrico destilado.* Sulphuric acid purified by distillation. [B, 95.]—**A. s. dilutum.** See *Dilute* SULPHURIC ACID.—**A. s. fumans.** See *Fuming* SULPHURIC ACID and *Nordhausen* SULPHURIC ACID.—**A. s. germanicum.** German (Nordhausen) sulphuric acid. [B.]—**A. s. purum** [Fenn. Ph.], **A. s. rectificatum** [Greek Ph.]. Fr., *acide sulfurique pur* ou *rectifié.* Ger., *gereinigte Schwefelsäure.* It., *acido solforico puro* o *rettificato.* Sp., *ácido sulfúrico rectificado.* Concentrated and purified sulphuric acid. [B.] See SULPHURIC ACID.—**A. s. tenue.** See *Dilute* SULPHURIC ACID.—**A. s. venale.** See *Commercial* SULPHURIC ACID.—**Syrupus acidi sulphurici.** Fr., *sirop d'acide sulfurique.* Ger., *Schwefelsäuresyrup.* It., *siroppo di acido solforico.* Sp., *jarabe de ácido sulfúrico.* Syn. : *potus acidus, linctus acidus, syrupus vitriolatus,* seu *mineralis.* A preparation made by mixing sulphuric acid with simple syrup or a medicated syrup. The proportion of the constituents varies greatly in the different formularies ; that now official in the Belg. Ph. contains 9 per cent. of the dilute acid, corresponding to about 1·5 per cent. of the strong acid. [B, 10, 97.]—**Tinctura acidi sulphurici.** Fr., *teinture* ou *alcoolé d'acide sulfurique.* Ger., *Schwefelsäuretinctur.* It., *tintura di acido solforico.* Sp., *tintura de ácido sulfúrico.* See *A. s. aromaticum.*

ACIDUM TANNICUM [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Russ. Ph., Swiss Ph., Aust. Ph., Hung. Ph., Belg. Ph., Netherl. Ph.] (Lat.), n. n. Ta[2]n(ta[3]n)'ni[2]-ku[3]m(ku[4]m). 1. Tannic acid. 2. In the Ger. Ph., also a 5-per-cent. aqueous solution of tannic acid used as a test. [B.]—**Cereoli cum acido tannico** [Belg. Ph.]. Fr., *bougies au tannin.* It., *candelette di acido tannico.* Sp., *candelillas de ácido tánico.* Bougies, 10 centimetres in length, each containing 5 centigrammes (¾ grain) of tannic acid, 31 centigrammes of syrup, and 75 centigrammes of gum arabic. [B, 95.]—**Glycerinum acidi tannici** [Br. Ph.], **Glyceritum acidi tannici** [U. S. Ph., 1870]. Fr., *glycéré de tannin* [Fr. Cod.]. Ger., *Tanninglycerol.* It., *glicerite* o *glicerina di acido tannico.* Sp., *glicerolado de ácido tánico.* Syn. : *glyceritum cum tannino* [Fr. Cod.]. Glycerin or glycerite of tannic acid. A preparation made up of 1 part by weight of tannic acid dissolved in 4 parts by volume of glycerin [Br. Ph., U. S. Ph., 1870], or in 5 parts by weight of glycerite of starch (*glycéré d'amidon*) [Fr. Cod.]. [B.]—**Suppositoria acidi tannici** [Br. Ph., U. S. Ph., 1870]. Fr., *suppositoires de tannin.* Ger., *Tanninstuhlzäpfchen.* It., *suppositori di acido tannico* o *di tannino.* Sp., *supositorios de ácido tánico.* Suppositories of tannic acid. Suppositories containing each 5 grains of tannic acid and 25 grains of cacao butter [U. S. Ph., 1870], or 3 grains of tannic acid with 3⅜ grains of benzoated lard, ⅝ grain of white wax, and 7¼ grains of cacao butter [Br. Ph. (B)].—**Suppositoria acidi tannici cum sapone** [Br. Ph.]. Fr., *suppositoires de tannin avec sapon.* Ger., *geseifte Tanninstuhlzäpfchen.* It., *suppositori di acido tannico con sapone.* Suppositories of tannic acid with soap. Suppositories containing each 3 grains of tannic acid, 4½ grains of glycerin of starch [Br. Ph.], 8¼ grains of soap, and enough starch to make a paste of suitable consistence. [B.]—**Trochisci acidi tannici** [U. S. Ph., Br. Ph.]. Fr., *tablettes de tannin.* It., *tavolette di acido tannico.* Sp., *tabletas de ácido tánico.* Troches of tannic acid ; troches containing each 1 grain of tannic acid, 10 grains of sugar, and ¼ grain of tragacanth made into a mass with orange-flower water [U. S. Ph.], or containing ½ grain of tannic acid and 15 grains of sugar, made into a mass with gum arabic, mucilage of gum arabic, tincture of tolu and water [Br. Ph.]. [B.]—**Unguentum acidi tannici** [U. S. Ph.]. Fr., *pommade de tannin.* Ger., *Gerbsäuresalbe.* It., *pomato* o *unguento di acido tannico.* Sp., *pomada de ácido tánico.* Ointment of tannic acid ; a mixture of 1 part of tannic acid and 9 parts of benzoinated lard. [B.]

ACIDUM TARTARICUM (Lat.), n. n. Ta[3]r-ta[2]r(ta[3]r)'i[2]-ku[3]m(ku[4]m). 1. The Latin equivalent for ordinary tartaric (dextrotartaric) acid in all the Pharmacopœias except the French Codex. 2. In the Ger. Ph., also a 20 per cent. aqueous solution of tartaric acid used as a test solution. [B.]—**A. t. venale** [Belg. Ph.]. Fr., *acide tartrique du commerce.* Ger., *käufliche Weinsäure.* It., *acido tartarico del commercio.* Sp., *ácido tartárico del comercio.* Commercial tartaric acid containing various impurities, which, however, should include no free sulphuric acid and but a minimum amount of calcium tartrate. [B, 95.]—**Pulvis ex acido tartarico.** Fr., *poudre d'acide tartrique avec sucre.* It., *polvere di acido tartarico con zucchero.* A preparation formerly official in several Pharmacopœias, consisting of powdered tartaric acid mixed with sugar in varying proportions. [B, 97.] A preparation now official in the Belg. Ph. contains 6 parts of tartaric acid, 3 parts of sugar, and 1 part of oil of citron. [B, 10.]—**Syrupus acidi tartarici, Syrupus de acido tartarico** [Fr. Cod., 1818]. Fr., *sirop d'acide tartrique* [Fr. Cod.]. Ger., *Weinsäuresyrup.* It., *siroppo di acido tartarico.* Sp., *jarabe de ácido tartárico* o *tártrico.* Syrup of tartaric acid ; a syrup made up with 10 parts each of tartaric acid and distilled water and 980 parts of syrup [Fr. Cod.], or 20 parts of tartaric acid, 40 parts of water, 969 parts of syrup, and 1 part of oil of citron [Belg. Ph. (B)].

ACIDUM TARTRICUM [Fr. Cod.] (Lat.), n. n. Ta[3]r'tri[2]-ku[3]m(ku[4]m). Tartaric acid.—**Potus cum acido tartrico** [Fr. Cod.]. See LIMONADE *tartrique.*—**Syrupus cum acido tartrico** [Fr. Cod.]. See *Syrupus* ACIDI TARTARICI.

ACIDURGIA (Lat.), n. f. A[2]s(a[3]k)-i[2]d-u[6]r(ur)'ji[2](gi[2])-a[3]. From ἀκίς, a point, and ἔργον, work. Fr., *acidurgie.* Ger., *Akidurgie.* It., *achidurgia.* An old term for operative surgery. [A, 322.]

ACIDUS (Lat.), adj. A[2]s(a[3]k)'i[2]d-u[3]s(u[4]s). Acid.

ACIDYL, n. A[2]s'i[2]d-i[2]l. For deriv., see ACID and *-yl.** Fr., *acidyle.* Ger., *Acidyl.* The radicle of an organic acid (applied more particularly to the series of trivalent hydrocarbons having the general formula C_nH_{2n-1}). [B.]

ACIDYLNITRILE, n. A[2]s''i[2]d-i[2]l-ni'tri[2]l. Fr., *acidylnitrile.* Ger., *Acidylnitril.* A compound of the trivalent residue of an organic acid united with nitrogen. The term is usually applied to derivatives of this sort formed from the acids of the fatty series, such as formic acid, acetic acid, etc. They have the constitution $C_nH_{2n+1}.C{\equiv}N$, and are called also *alkyl cyanides,* because they may be regarded as compounds of cyanogen with the members of the univalent series of hydrocarbons (alkyls). [B, 4.]

ACIER (Fr.), n. A[3]-se-a. 1. Steel. 2. A crest, etc. See ACIES.—**Baume d'a.** Syn. : *baume d'aiguilles.* A liniment made by dissolving 8 parts of steel filings in 32 of nitric acid, with the aid of heat, and adding 32 parts, each, of alcohol and olive-oil ; occasionally used for pains in the joints. [A, 321.]—**Limaille d'a.** Steel filings. [A, 301.]

ACIES (Lat.), n. f. A(a[3])'si[2](ki[2])-ez(e[2]s). Gen., *aciēi.* Fr., *acier, crête, angle saillant ; arête* (5th def.). Ger., *Grat, Grath ; Gräthe* (5th def.). 1. A ridge or edge formed by the intersection of two planes (said in botany of the edges of certain stems, and in anatomy of prominent edges of bones). [B.] 2. A little eminence formed by the tænia semicircularis at the side of the foramen of Monro, about a line distant from it. [A, 314.] 3. Keenness of vision. [A, 312.] 4. The pupil of the eye. [A, 312.] 5. A collective term for the phalanges of the fingers, from their arrangement like that of a line of spears. [A, 316.] 6. The arrest. or rat-tail, often formed on the inner side of the limbs in horses ; being a horny, wart-like, or scaly excrescence. [A, 300.]—**A. digitorum manus.** See *A.* (5th def.).—**A. diurna.** See HEMERALOPIA.—**A. vespertina.** See NYCTALOPIA.

ACIESIS (Lat.), n. f. A[2](a[3])-si(ke)-e(a)'si[2]s. See ACYESIS.

ACIFORM, adj. A[2]s'i[2]-fo[2]rm. From *acus,* a needle, and *forma,* form. Fr., *aciforme.* Ger., *nadelförmig.* In botany, needle-shaped. [A, 306.]

ACIN, n. A[2]s'i[2]n. For deriv., see ACINUS, for which this word is an obsolete English equivalent in the botanical sense. [B, 39.]

ACINACEOUS, adj. A[2]s-i[2]n-a'she-u[3]s. From *acinus* (*q. v.*). Ger., *kernig.* Full of kernels. [A, 258.]

ACINACIFOLIOUS, adj. A[2]s-i[2]n-a[2]s-i[2]-fo'li[2]-u[3]s. For deriv., see ACINACIFORM. Fr., *acinacifolié.* Ger., *schwertblättrig.* Sp., *acinacifoliado.* Having scimitar-shaped leaves. [A, 306.]

ACINACIFORM, adj. A[2]s-i[2]n-a[2]s'i[2]-fo[2]rm. Lat., *acinaci-*

formis (from *acinaces* [Gr., ἀκινάκης], a scimitar, and *forma*, form). Fr., *acinaciforme.* Ger., *säbelförmig.* Sp., *acinaciforme.* Scimitar-shaped (said of a compressed, fleshy leaf having one edge convex and the other straighter and thicker, also of the fruit of certain leguminous plants). [A, 323, 345 ; B.]

ACINAIRE (Fr.), adj. A^3-si^{2}n-a^{2}r. 1. Acinous. 2. Acinarious.

ACINAL, adj. A^{2}s'i^{2}n-a^{2}l. Lat., *acinalis.* Fr., *acinal.* Ger., *beerenartig.* Acinous. Cf. TUNICA *acinalis.*

ACINÄR (Ger.), adj. A^3-tsen-ar'. 1. Acinous. [J.] 2. Acinarious.

ACINARIOUS, adj. A^{2}s-i^{2}n-a'ri^2-u^{3}s. Lat., *acinarius* (a botanical species-name ; see FICUS *acinarius*). Fr., *acinaire.* Ger., *acinär.* Sp., *acinario.* Having grape-like ampullæ on the shoots or branches. [Varron (A, 334).]

ACINE (Fr.), n. A^3-sen (as an English word, a^{2}s'i^{2}n). An acinus ; in English (obs.), an acinus in the botanical sense. [B, 39.]

ACINESES (Lat.), n. f., pl. of *acinesis = acinesia* (*q. v.*). A^{2}s-(a^{3}k)-i^{2}n-e(a)'sez(se^{2}s). Neuroses characterized by acinesia. [A, 316.]

ACINESIA (Lat.), n. f. A^{2}s(a^{3}k)-i^{2}n-e(a)'zhi^2(si^2)-a^3. Gr., ἀκινησία (from α priv., and κινεῖν, to move). Fr., *acinésie.* Ger., *Akinesie.* It., Sp., *acinesia.* Syn.: *acinesis, motus privatio.* 1. Absence of motion ; rest. [K, 4.] 2. Loss of the power of motion in a part or in the whole body, whether from paralysis, paresis, syncope, or other cause. [A, 323.] 3. The parasystole ; the stage of rest intervening between the systole and the diastole of the heart. [Galen (A, 322).]

ACINESIATROPHIA (Lat.), n. f. A^{2}s(a^{3}k)-i^{2}n-e(a)''-zhi^2(si^2)-a^2(a^3)-tro'fi^2-a^3. Fr., *acinésiatrophie.* See ACINETATROPHIA.

ACINESIC, adj. A^{2}s-i^{2}n-e'zi^{2}k. See ACINETIC.

ACINESIS (Lat.), n. f. A^{2}s(a^{3}k)-i^{2}n-e(a)'si^{2}s. Gen., *acinesios.* Gr., ἀκίνησις. Acinesia. See also ACINESES.

ACINETA (Lat.), n., n. pl. of adj. *acinetus* (Gr., ἀκίνητος), motionless. A^{2}s(a^{3}k-i^{2}n-e(a)'ta^3. 1. Epiphytal *Orchids.* [A, 252.] 2. A Central American genus of subterrestrial bulbs established by Lindley. [A, 248.]

ACINETÆ (Lat.), n. f., pl. of adj. *acinetus.* A^{2}s(a^{3}k)-i^{2}n-e(a)'te-(ta^3-e^2). Fr., *acinètes.* An old term for a section of the *Suctoria.* [B.]

ACINETARIA (Lat.), n. n. pl. A^{2}s(a^{3}k)-i^{2}n-e^{2}t-a(a^3)'ri^2-a^3. For deriv., see ACINETA. Syn.: *Tentaculifera.* A class of corticate *Protozoa*, distinguished by the absence of vibratile processes in the adult animal and by the presence of adhesive or suctorial tentacles. They are non-locomotive in the adult state. The class comprises the orders *Suctoria* and *Non-suctoria.* [E. R. Lankester (B, 77).]

ACINETARIAN, n. A^{2}s-i^{2}n-e^{2}t-a'ri^2-a^{2}n. An individual of the class *Acinetaria.* [E. R. Lankester (B, 77).]

ACINETATROPHIA (Lat.), n. f. A^{2}s(a^{3}k)-i^{2}n-e^{2}t''a^2(a^3)-tro'-fi^2-a^3. From ἀκίνητος, motionless, and ἀτροφία, atrophy. Fr., *acinétatrophie.* Syn.: *acinesiatrophia* [Hutin], *marcor e motu deficiente.* Atrophy of a part from disuse (lack of motion). [Hutin (A, 314).]

ACINETIC, adj. A^{2}s-i^{2}n-e^{2}t'i^{2}k. Lat., *acineticus.* Fr., *acinétique.* 1. Affected with acinesia. [A, 322.] 2. Having the property of abolishing or lessening the power of muscular movement (said of drugs and poisons). [A, 321.]

ACINETIDÆ (Lat.), n. f. pl. A^{2}s(a^{3}k)-i^{2}n-e^{2}t'.i^{2}d-e(a^3-e^2). See ACINETÆ.

ACINETIFORM, adj. A^{2}s-i^{2}n-e^{2}t'i^2-fo^{2}rm. In zoology, non-locomotive (said of the embryo *Infusoria*, from their resembling the *Acinetaria*). [A, 349.]

ACINETINA (Lat.), n. n. pl. A^{2}s(a^{3}k)-i^{2}n-e^{2}t-i(e)'na^3. See ACINETARIA.

ACINIER (Fr.), n. A^{3}s-i^{2}n-i^2-a. The hawthorn. [A, 321.] See CRATÆGUS *oxyacantha.*

ACINIFORM, adj. A^{2}s-i^{2}n'i^2-fo^{2}rm. Gr., ῥαγώδης. Lat., *aciniformis.* Fr., *aciniforme.* Ger., *traubenförmig, beerenförmig.* Sp., *aciniforme.* 1. Clustered like grapes. [A, 258.] 2. Resembling a grape (applied by Ingrassias to the chorioid coat of the eye, and by others to the layer of pigment on the posterior surface of the iris). [A, 255.]

ACINODENDRON (Lat.), n. n. A^{2}s(a^{3}k)''i^{2}n-o-de^{2}n'dro^{2}n. From ἄκινος (see ACINUS), and δένδρον, a tree. An old genus-name for (as supposed by De Candolle) the *Sagræa guadalupensis.* [A, 252.]

ACINODENDROUS, adj. A^{2}s''i^{2}n-o-de^{2}n'dru^{3}s. Lat., *acinodendrus.* Fr., *acinodendre.* Sp., *acinodendro.* Having the fruit arranged like grapes. [A, 306.]

ACINOS (Lat.), n. m. A^{2}s(a^{3}k)'i^{2}n-o^{2}s. Gr., ἄκινος. 1. A plant, supposed to be a species of thyme, used by the ancients for menorrhagia and diarrhœa, also, applied locally, for ulcers and erysipelas. [Dioscorides (A. 344).] 2. A genus of latiate plants. [A, 334.] 3. An acinus (*q. v.*).

ACINÖS (Ger.), adj. A^3-tsen-u^{4}s'. Acinous.

ACINOSE, adj. A^{2}s'i^{2}n-os. See ACINOUS.

ACINOSUS (Lat.), adj. A^{2}s(a^{3}k)-i^{2}n-o'su^{3}s(su^{4}s). Like grapes ; acinous.—**Acinosa tunica.** See TUNICA *acinosa.*

ACINO-TUBULAR, adj. A^{2}s''i^{2}n-o-tu^2'bu^2-la^{3}r. From *acinus* (*q. v.*), and *tubulus*, a tube. A term used to designate glands in which the secreting cavity is intermediate in form between a sac and a tube. [J, 30.]

ACINOUS, adj. A^{2}s'i^{2}n-u^{3}s. Fr., *acineux.* Ger., *acinär.* It., Sp., *acinoso.* Syn.: *acinal, acinose, aciniform.* 1. Pertaining to an acinus. [J.] 2. Having acini. See *A.* GLAND. 3. Rounded and transparent like grapes. [A, 334.] 4. In pathology, resembling a racemose gland. [A, 316.] See *A.* ADENOMA.

ACINULA CLAVUS. [A, 248.]

ACINULA (Lat.), n. f. A^{2}s-(a^{3}k)-i^{2}n'u^2(u)-la^3. 1. A genus of globular, sessile *Fungi* indigenous to Russia. [A, 348.] 2. The sclerotium stage of an ascomycetous fungus, very similar to *Sclerotium* or *Periola*, but distinguished by the diffluent coat. [A, 248 ; B.]—**A. clavus.** Ergot. [A, 248.]

ACINUM (Lat.), n. n. A^{2}s(a^{3}k)'i^{2}n-u^{3}m(u^{4}m). See ACINUS.

ACINUS (Lat.), n. m. A^{2}s(a^{3}k)'i^{2}n-u^{3}s(u^{4}s). Gr., ἄκινος. Fr., *acine.* Ger., *Beerchen, Läppchen.* It., *acino.* Sp., *ácino.* Syn.: *alveolus, insula, follicle, gland-granule, gland-vesicle.* 1. Literally, a berry, especially the grape ; also the stone of the grape. [A, 312.] 2. Formerly, a berry consisting of an aggregation of fleshy fruits ; now restricted to the separate fruits of which such a berry is composed. [B, 19, 39.] 3. The seed of a baccate fruit. [Gray (B, 39).] 4. See ACINOS. 5. The smallest lobule of an acinous, or racemose, gland [J, 30] or of the liver [J, 42]. 6. One of the smallest lobules, or lobulettes, of the lung. [Waters, 1860 (J, 42, 43).] 7. The cavity, or saccular recess, in the finest lobule of a racemose gland. [J, 30.] 8. That part of the excretory duct of a racemose gland into which the cavities of several alveoli open. [J, 33.] 9. One of the closed vesicles of a gland having no excretory duct, such as the thyroid. [J, 33.] 10. A cell of the liver containing glycogen. [J, 33.] Cf. ALVEOLUS.—**Acini biliosi.** The granular elements of the liver. [A, 341.]—**Acini glandulosi.** The acini of a gland.—**Acini interiores renales.** The Malpighian corpuscles of the kidney. [J.]—**Acini lienis.** See *Splenic* CORPUSCLES.—**Acini malpighiani, acini of Malpighi, acini renales.** See *Malpighian* CORPUSCLES.—**Drüsen'a.** (Ger.). A glandular a. [B.]

ACIOA (Lat.), n. f. A^{2}s(a^{3}k)-i^2-o'a^3. A genus of chrysobalaneous nut-bearing trees, indigenous to Guiana, established by Aublet. [A, 305.]—**A. amara.** A species of which the nut has a bitter kernel. [A, 305.]—**A. dulcis.** A species that bears a sweet, edible nut like the almond. [A, 305.]

ACIPENSER (Lat.), n. m. A(a^3)-si^2(ki^2)-pe^{2}n'su^{5}r(se^{2}r). Gr., ἀκκιπησίος, the sturgeon. Sp., *acipénser.* A genus of fishes, including the sturgeons. [B.]—**A. beluga.** A synonym of *A. huso*, from the Russian name *beluga* given to the fish. [B, 5.]—**A. Güldenstädtii** [Brand and Ratzeburg]. The osseter ; a species having the same habitat as *A. huso*, and, like it, furnishing isinglass. Its roes are made into caviare. [B. 33.]—**A. huso** [Linnæus]. Fr., *grand esturgeon.* Ger., *Hausen.* The *beluga*, or Russian sturgeon, a large fish found in the inland waters of Russia. Its swimming-bladder constitutes isinglass, the *ichthyocolla* of the U. S. Ph. [B.]—**A. ruthenus** [Linnæus]. Fr., *sterlet.* The sterlet, another Russian species, also furnishing isinglass. [B, 5, 33.]—**A. stellatus** [Pallas]. The sewruga, or starred sturgeon, another Russian species furnishing isinglass. [B, 5, 33.]—**A. sturio.** Fr., *esturgeon comnum.* Ger., *Stör.* The common sturgeon of Russia, also furnishing isinglass. [B, 5.]

ACIPHORÉ (Fr.), adj. A^3-se-fo-ra. Having the body ending in a needle (said of insects). [A, 306.]

ACIPHYLLOUS, adj. A^{2}s-i^2-fi^{2}l'lu^{3}s. Lat., *aciphyllus* (from ἀκίς, a point, and φύλλον, a leaf). Fr., *aciphylle.* Ger., *nadelblättrig.* Sp., *acífilo.* Pointed-leaved (said of plants having linear, acuminate leaves). [A, 306.]

ACI REALE (It.), n. A^3'che-ra-a^3'la. A health resort in the Sicilian province of Catania, noted for its equable temperature and the dryness of its soil. There are also mineral waters, of a temperature of 66° Fahr., which are used internally, in the form of baths, and by inhalation, in cases of chronic rheumatism, gout, the remains of old exudates, scrofula, obesity, inveterate nervous affections, chronic metallic poisoning, and syphilis ; 1,000 parts of the water contain :

Free gases	Hydrogen sulphide	0·015
	Carbonic anhydride	0·184
	Methane	0·007
	Nitrogen	0·026
Sodium chloride		2·684
Magnesium chloride		0·009
Lithium chloride		0·009
Sodium iodide		0·014
Calcium carbonate		0·169
Magnesium carbonate		0·008
Sodium carbonate		0·006

[A, 319.]

ACIS (Lat.), n. f. A(a^3)'si^{2}s(ki^{2}s). Gr., ἀκίς. 1. A point ; a splinter. [Hippocrates (A, 311).] 2. A shooting pain. [Aretæus (A, 311).] 3. A bandage. [Galen (A, 311).] 4. A genus of bulbous plants, of the order *Amaryllidaceæ*, growing in southern Europe and northern Africa. [A, 252.]

ACIURGIA (Lat.), n. f. A^{2}s(a^{3}k)-i^2-u^{5}r(ur)'ji^2(gi^2)-a^3. Fr., *aciurgie.* Ger., *Akiurgie.* See ACIDURGIA.

ACIURGY, n. A^{2}s'i^2-u^{5}r-ji^2. See ACIDURGIA.

ACKAME, n. The New Zealand name of a genus of cunoniaceous plants. [A, 348.]

ACKAWAI NUTMEG, n. The fruit of *Acrodiclidium camara ;* esteemed in Guiana as a remedy for colic, diarrhœa, and dysentery. [A, 316, 252.]

ACKELEI, ACKELEY (Ger.), n's. A^{3}k'e^{2}l-i. See AKELEI.

ACKERAMPFER (Ger.), n. A^{3}k'e^{2}r-a^{3}mp-fe^{2}r. Sheep's sorrel. [A, 248.] See RUMEX *acetosella.*

ACKERANDORN (Ger.), n. A^{3}k'e^{2}r-a^{3}n-do^{2}rn. Horehound. [A, 315.] See MARRUBIUM *vulgare*.

ACKERBACILLE (Ger.), n. A^{3}k'e^{2}r-ba^3-tsel-le^2. See SICHELKRAUT.

ACKERBALDRIAN (Ger.), n. A^{3}k'e^{2}r-ba^{3}l-dri^2-a^{3}n. The great wild valerian. [A, 315.] See VALERIANA *officinalis*.

ACKERBAUM (Ger.), n. A^{3}k'e^{2}r-ba^3-um. The sessile-fruited oak. [A, 248.] See QUERCUS *robur*.

ACKERBEERE (Ger.), n. A^{3}k'e^{2}r-bar-e^2. The dewberry. [A, 315.] See RUBUS *cæsius*.

ACKERBOHNE (Ger.), n. A^{3}k'e^{2}r-bon-e^2. The field-bean (*Vicia faba*). [B.]

ACKERBRAME, ACKERBREME (Ger.), n's. A^{3}k'e^{2}r-bra^{3}m(brem)-e^2. The dewberry. [A, 315.] See RUBUS *cæsius*.

ACKERBRAND (Ger.), n. A^{3}k'e^{2}r-bra^{3}nd. The purple cow-wheat (*Melampyrum arvense*). [A, 315.]

ACKERBROMBEERE, ACKERBROME (Ger.), n's. A^{3}k'e^{2}r-brom-bar-e^2, -brom-e^2. The dewberry. [A, 315.] See RUBUS *cæsius*.

ACKERCHAMILLE (Ger.), n. A^{3}k'e^{2}r-ch^{2}a^{3}m-i^{2}l-le^2. The field-chamomile. [A, 315.] See ANTHEMIS *arvensis*.

ACKERDISTEL (Ger.), n. A^{3}k'e^{2}r-di^{2}st-e^{2}l. The common thistle (*Serratula arvensis*). [A, 315.]

ACKERDOPPEN (Ger.), n. pl. A^{3}k'e^{2}r-do^{3}p-pe^{2}n. The acorns of the oriental gall-oak (*Quercus ægilops*). [A, 315.]

ACKEREHRENPREIS (Ger.), n. A^{3}k'e^{2}r-a-re^{2}n-pris. The field-speedwell (*Veronica agrestis*). [A, 248, 315.]

ACKEREICHEL (Ger.), n. A^{3}k'e^{2}r-ich^2-e^{2}l. The American ground-nut. [A, 305.] See ARACHIS *hypogæa*.

ACKERERBSE (Ger.), n. A^{3}k'e^{2}r-e^{2}rb-ze^2. The wild pea (*Pisum arvense*). [A, 315.]

ACKERERDE (Ger.), n. A^{3}k'e^{2}r-e^{2}rd-e^2. See HUMUS.

ACKERFADENKRAUT (Ger.), n. A^{3}k'e^{2}r-fa^3-de^{2}n-kra^3-ut. The common cotton-rose, or cudweed (*Filago germanica*). [A, 248, 315.]

ACKERFLEISCHBLUME (Ger.), n. A^{3}k'e^{2}r-flish-blum-e^2. The purple cow-wheat (*Melampyrum arvense*). [A, 315.]

ACKERFRAUENMANTEL (Ger.), n. A^{3}k'e^{2}r-fra^3-u-e^{2}n-ma^{3}n-te^{2}l. The common lady's-mantle (*Alchemilla vulgaris*). [A, 315.]

ACKERFUCHSSCHWANZ (Ger.), n. A^{3}k'e^{2}r-fuch^{2}s-shwa^{3}nts. Field fox-tail grass (*Alopecurus agrestis*). [A, 315.]

ACKERGÄNSEDISTEL (Ger.), n. A^{3}k'e^{2}r-ge^{2}n-ze^2-di^{2}s-te^{2}l. The corn sow-thistle (*Sonchus arvensis*). [A, 315.]

ACKERGAUCHHEIL (Ger.), n. A^{3}k'e^{2}r-ga^3-uch^2-hil. The common pimpernel (*Anagallis arvensis*). [A, 248, 315.]

ACKERGRAS (Ger.), n. A^{3}k'e^{2}r-gra^{3}s. Mouse-ear chickweed (*Cerastium arvense*). [A, 248, 315.]

ACKERGRINDKRAUT (Ger.), n. A^{3}k'e^{2}r-gri^{2}nd-kra^3-ut. The field scabious (*Scabiosa arvensis*). [A, 248, 315.]

ACKERGÜNSEL (Ger.), n. A^{3}k'e^{2}r-gu^{6}n-se^{2}l. The ground pine (*Ajuga chamæpitys*). [A, 248, 315.]

ACKERGYPSKRAUT (Ger.), n. A^{3}k'e^{2}r-gu^{6}ps-kra^3-ut. A German species of soapwort (*Saponaria vaccaria*). [A, 248, 315.]

ACKERHAHNENFUSS (Ger.), n. A^{3}k'e^{2}r-ha^{3}n-e^{2}n-fus. The corn crow-foot (*Ranunculus arvensis*). [A, 315.]

ACKERHAUHECHEL (Ger.), n. A^{3}k'e^{2}r-ha^3-u-he^{2}ch^2-e^{2}l. The common rest-harrow (*Ononis spinosa*). [A, 248, 315.]

ACKERHEDERICH (Ger.), n. A^{3}k'e^{2}r-he^{2}d-e^{2}r-i^{2}ch^2. The hedge-mustard (*Sisymbrium officinale*). [A, 248, 305.]

ACKERHIRTENTASCHE (Ger.), n. A^{3}k'e^{2}r-her-te^{2}n-ta^{3}sh-e^2. The penny-cress (*Thlaspi arvense*). [A, 248, 315.]

ACKERHOLDER, ACKERHOLLUNDER (Ger.), n's. A^{3}k'e^{2}r-ho^{3}ld-e^{2}r, -ho^{3}l-lund-e^{2}r. The dwarf-elder (*Sambucus ebulus*). [A, 315.]

ACKERHORNKRAUT (Ger.), n. A^{3}k'e^{2}r-ho^{2}rn-kra^3-ut. Mouse-ear chickweed (*Cerastium arvense*). [A, 248, 315.]

ACKERHYACINTHE (Ger.), n. A^{3}k'e^{2}r-hu^6-a^3-tsi^{2}nt-e^2. The purple grape-hyacinth (*Muscari comosum*). [A, 248.]

ACKERKAMILLE (Ger.), n. A^{3}k'e^{2}r-ka^{3}m-i^{2}l-le^2. The field-chamomile (*Anthemis arvensis*). [B.]

ACKERKANDELWISCH, ACKERKANNENKRAUT (Ger.), n's. A^{3}k'e^{2}r-ka^{3}n-de^{2}l-vi^{2}sh, -ka^{3}n-ne^{2}n-kra^3-ut. The corn horse-tail (*Equisetum arvense*). [A, 248, 315.]

ACKERKLAPPER (Ger.), n. A^{3}k'e^{2}r-kla^{3}p-pe^{2}r. The common cock's-comb (*Celosia cristata*). [A, 248, 315.]

ACKERKLEE (Ger.), n. A^{3}k'e^{2}r-kla. 1. Sheep's sorrel (*Rumex acetosella*). [B.] 2. Hare's-foot trefoil (*Trifolium arvense*). [A, 315.]

ACKERKLETTE (Ger.), n. A^{3}k'e^{2}r-kle^{2}t-te^2. The burdock (*Lappa officinalis*). [A, 247, 315.]

ACKERKLETTENKERBEL (Ger.), n. A^{3}k'e^{2}r-kle^{2}t-te^{2}n-ke^{2}rb-e^{2}l. Small corn-parsley (*Caucalis arvensis*). [A, 315.]

ACKERKNOBLAUCH (Ger.), n. A^{3}k'e^{2}r-kno^{2}b-la^3-uch^2. Wild (or crow-) garlic (*Allium vineale*). [A, 315.]

ACKERKNÖTERICH (Ger.), n. A^{3}k'e^{2}r-knu^{6}t-e^{2}r-i^{2}ch^2. Corn-spurrey. yarr (*Spergula arvensis*). [A, 315.]

ACKERKOHL (Ger.), n. A^{3}k'e^{2}r-kol. 1. The wild radish (*Raphanus raphanistrum*). 2. The common nipplewort (*Lapsana communis*). 3. The wild mustard (*Sinapis arvensis*). [A, 315.]

ACKERKRAUT (Ger.), n. A^{3}k'e^{2}r-kra^3-ut. 1. Common fumitory (*Fumaria officinalis*). [A, 305.] 2. Common rest-harrow (*Ononis spinosa*). [A, 305.] 3. Brook-lime (*Veronica Beccabunga*). [A, 315.]

ACKERKRONE (Ger.), n. A^{3}k'e^{2}r-kron-e^2. The genus *Agrostemma*. [B.]

ACKERKUHWEIZEN (Ger.), n. A^{3}k'e^{2}r-ku-vits-e^{2}n. The purple cow-wheat (*Melampyrum arvense*). [A, 305, 315.]

ACKERKÜMMEL (Ger.), n. A^{3}k'e^{2}r-ku^{6}m-me^{2}l. The genus *Agrostemma*.—**Schwarzer A.** The corn-cockle (*Agrostemma githago*). [A, 248, 305.]

ACKERLATTICH, ACKERLATTIG (Ger.), n's. A^{3}k'e^{2}r-la^{3}t-ti^{2}ch^2, -ti^{2}g. 1. The common corn-salad or lamb's lettuce (*Valerianella olitoria* [Wildenow], *Valeriana locusta* [Linnæus]). [A, 248, 315.] 2. The common colt's-foot (*Tussilago Farfara*). [A, 315.] 3. Prickly lettuce (*Lactuca scariola*). [A, 315.]

ACKERLEINKRAUT (Ger.), n. A^{3}k'e^{2}r-lin-kra^3-ut. Yellow toad-flax (*Linaria vulgaris*). [A, 248, 305.]

ACKERLEY (Ger.), n. A^{3}k'e^{2}r-li. Common columbine (*Aquilegia vulgaris*). [A, 248, 305.]

ACKERLICHTRÖSCHEN (Ger.), n. A^{3}k'e^{2}r-li^{2}ch^{2}t-ru^{6}s-ch^2-e^{2}n. The white-flowered lychnis (*Lychnis vespertina*). [A, 248, 315.]

ACKERMAGENWURZEL, ACKERMANN (Ger.), n's. A^{3}k'-e^{2}r-ma^{3}g-e^{2}n-vurts-e^{2}l, -ma^{3}n. The sweet flag (*Acorus calamus*). [A, 248, 315.]

ACKERMANNKRAUT (Ger.), n. A^{3}k'e^{2}r-ma^{3}n-kra^3-ut. The common bugloss (*Anchusa officinalis*). [A, 248, 315.]

ACKERMAUSEOHR (Ger.), n. A^{3}k'e^{2}r-ma^3-uz-e^2-or. Marsh scorpion-grass, mouse-ear (*Myosotis scorpioides*). [A, 248, 315.]

ACKERMELISSE (Ger.), n. A^{3}k'e^{2}r-me^{2}l-i^{2}s-se^2. Common balm (*Melissa officinalis*). [A, 248, 315.]

ACKERMENNIG (Ger.), n. A^{3}k'e^{2}r-me^{2}n-ni^{2}g. Common agrimony (*Agrimonia eupatorium*). [A, 248, 315.]

ACKERMINZE (Ger.), n. A^{3}k'e^{2}r-mi^{2}nts-e^2. 1. Corn-mint (*Mentha arvensis*). 2. Common balm (*Melissa officinalis*). [A, 248, 305.]

ACKERMOHN (Ger.), n. A^{3}k'e^{2}r-mon. Corn-poppy, the common red poppy (*Papaver rhœas*). [A, 315.]

ACKERMÜNZE (Ger.), n. A^{3}k'e^{2}r-mu^{6}nts-e^2. Corn-mint, mountain calamint (*Mentha arvensis*). [A, 315.]

ACKERNÄGELEIN, ACKERNELKENGRAS (Ger.), n's. A^{3}k'e^{2}r-ne^{2}g-e^{2}l-in, -ne^{2}l-ke^{2}n-gra^{3}s. Umbelliferous mouse-ear, jagged chickweed (*Holosteum umbellatum*). [A, 315.]

ACKERNESSEL (Ger.), n. A^{3}k'e^{2}r-ne^{2}s-se^{2}l. 1. The red hemp-nettle (*Galeopsis Ladanum*). 2. The white or the purple archangel (*Lamium purpureum*, *L. album*). [A, 248, 315.]

ACKERNIGELLE (Ger.), n. A^{3}k'e^{2}r-ne-ge^{2}l-le^2. The field fennel-flower (*Nigella arvensis*). [A, 248, 315.]

ACKERNUSS (Ger.), n. A^{3}k'e^{2}r-nus. A Dutch variety of ground-nut, the tuberous *Lathyrus* (*Lathyrus tuberosus*). [A, 248, 315; B.]

ACKEROHMKRAUT (Ger.), n. A^{3}k'e^{2}r-om-kra^3-ut. Common lady's mantle (*Alchemilla vulgaris*). [A, 248, 315.]

ACKERPFERDESCHWANZ (Ger.), n. A^{3}k'e^{2}r-pfe^{2}rd-e^2-shwa^{3}nts. The corn horse-tail (*Equisetum arvense*). [A, 248, 315.]

ACKERPFRIEMEN (Ger.), n. A^{3}k'e^{2}r-pfre-me^{2}n. Dyer's-weed (*Reseda luteola*). [A, 248, 315.]

ACKERPLATTERBSE (Ger.), n. A^{3}k'e^{2}r-pla^{3}t-e^{2}rb-ze^2. The yellow vetchling (*Lathyrus aphaca*). [A, 315.]

ACKERRADE (Ger.), n. A^{3}k'e^{2}r-ra^{3}d-e^2. The corn-cockle (*Agrostemma githago*). [A, 248, 315.]

ACKERRANUNKEL (Ger.), n. A^{3}k'e^{2}r-ra^{3}n-un^2-ke^{2}l. The corn crow-foot (*Ranunculus arvensis*). [A, 248, 305.]

ACKERRAUCH, ACKERRAUTE (Ger.), n's. A^{3}k'e^{2}r-ra^3-uch^2, -ra^3-u-te^2. Common fumitory (*Fumaria officinalis*). [A, 248, 315.]

ACKERRETTICH, ACKERRETTIG (Ger.), n's. A^{3}k'e^{2}r-re^{2}t-ti^{2}ch^2, -ti^{2}g. The wild radish (*Raphanus raphanistrum*). [A, 315.]

ACKERRIEDGRAS (Ger.), n. A^{3}k'e^{2}r-red-gra^{3}s. The turfy hair-grass (*Aira cæspitosa*). [A, 248, 305.]

ACKERRINGELBLUME (Ger.), n. A^{3}k'e^{2}r-ri^{2}ng-e^{2}l-blum-e^2. The common marigold (*Calendula officinalis*). [A, 305, 315.]

ACKERRITTERSPORN (Ger.), n. A^{3}k'e^{2}r-ri^{2}t-te^{2}r-sporn. The common larkspur (*Delphinium consolida*). [A, 305.]

ACKERRODEL (Ger.), n. A^{3}k'e^{2}r-ro-de^{2}l. The cock's-comb yellow-rattle (*Rhinanthus crista galli*). [A, 315.]

ACKERRÖSCHEN (Ger.), n. A^{3}k'e^{2}r-ru^{6}s-ch^{2}e^{2}n. Pheasant's-eye (*Adonis autumnalis*). [A, 315.]

ACKERROSE (Ger.), n. A^{3}k'e^{2}r-ro-ze^2. The field rose, white-dog (*Rosa arvensis*). [A, 248, 315.]

ACKERRÖSLEIN (Ger.), n. A^{3}k'e^{2}r-ru^{6}s-lin. See ACKERRÖSCHEN.

ACKERROSSPOLEIN, ACKERROSTPOLEI (Ger.), n's. A^{3}k'e^{2}r-ro^{2}s-po-lin, -ro^{2}st-po-li. 1. The annual hedge-nettle (*Stachys annua*). 2. The corn hedge-nettle (*Stachys arvensis*). [A, 248, 305, 315.]

ACKERROSSSCHWANZ (Ger.), n. A^{3}k'e^{2}r-ro^{2}s-shwa^{3}nts. The corn horse-tail (*Equisetum arvense*). [A, 315.]

ACKERRÖTHE (Ger.), n. A^{3}k'e^{2}r-ru^{5}t-e^2. The little field-madder (*Sherardia arvensis*). [A, 248, 315.]

ACKERSALAT (Ger.), n. A^{3}k′e^{2}r-za^{3}l-a^{3}t″. Prickly lettuce (*Lactuca scariola*). [A, 248, 305.]

ACKERSAUDISTEL (Ger.), n. A^{3}k′e^{2}r-za^3-u-di^{2}st-e^{2}l. The corn sow-thistle (*Sonchus arvensis*). [A, 315.]

ACKERSAUERAMPFER (Ger.), n. A^{3}k′e^{2}r-za^3-u-e^{2}r-a^{3}mpf-e^{2}r. Sheep's-sorrel (*Rumex acetosella*). [A, 248, 305.]

ACKERSCABIOSE (Ger.), n. A^{3}k′e^{2}r-ska^{3}b-i^2-o-ze^2. The field scabious (*Scabiosa arvensis*). [A, 248, 305.]

ACKERSCHACHTELHALM, ACKERSCHACHTELHELM, ACKERSCHACHTHALM (Ger.), n's. A^{3}k′e^{2}r-sha^{3}ch^{2}t-e^{2}l-ha^{3}lm, -sha^{3}ch^{2}t-e^{2}l-he^{2}lm, -sha^{3}ch^{2}t-ha^{3}lm. The corn horse-tail (*Equisetum arvense*). [A, 248, 315.]

ACKERSCHMELE (Ger.), n. A^{3}k′e^{2}r-shma-le^2. The turfy hair-grass (*Aira cæspitosa*). [A, 248, 305.]

ACKERSCHMIELE (Ger.), n. A^{3}k′e^{2}r-shmel-e^2. Silky bent-grass (*Agrostis spica venti*). [A, 248, 315.]

ACKERSCHNABELKRAUT (Ger.), n. A^{3}k′e^{2}r-shna^{3}b-e^{2}l-kra^3-ut. The hemlock-leaved heron's-bill (*Erodium cicutarium*). [A, 248, 305.]

ACKERSCHNALLE (Ger.), n. A^{3}k′e^{2}r-shna^{3}l-le^2. The red poppy (*Papaver rhœas*).

ACKERSCHWARZKÜMMEL (Ger.), n. A^{3}k′e^{2}r-shwa^{3}rts-ku^{6}m-me^{2}l. The field fennel-flower (*Nigella arvensis*). [A, 248, 305.]

ACKERSCHWERDSIEGWURZ (Ger.), n. A^{3}k′e^{2}r-shward-zeg-vurts. Common corn-flag (*Gladiolus communis*). [A, 248, 305.]

ACKERSENF (Ger.), n. A^{3}k′e^{2}r-ze^{2}nf. Wild mustard (*Sinapis arvensis*). [A, 305, 315.]

ACKERSINAU (Ger.), n. A^{3}k′e^{2}r-zi^{2}n-a^3-u. Parsley-piert (*Alchemilla aphanes*). [A, 248, 315.]

ACKERSISON (Ger.), n. A^{3}k′e^{2}r-ze-zon″. The corn honewort (*Sison segetum*). [A, 248, 315.]

ACKERSKABIOSE (Ger.), n. See Ackerscabiose.

ACKERSPARGEL, ACKERSPERGEL (Ger.). n's. A^{3}k′e^{2}r-spa^{3}rg-e^{2}l, -spe^{2}rg-e^{2}l. See Ackerknöterich.

ACKERSPYRE, n. A^{2}k′u^{5}r-spir. See Acrospire.

ACKERSTEINSAMEN (Ger.), n. A^{3}k′e^{2}r-stin-za^{3}m-e^{2}n. The corn gromwell (*Lithospermum arvense*). [A, 248, 305.]

ACKERSTERNKRAUT (Ger.), n. A^{3}k′e^{2}r-ste^{2}rn-kra^3-ut. See Ackermelisse.

ACKERSTORCHSCHNABELKRAUT (Ger.), n. A^{3}k′e^{2}r-sto^{2}rch^2-shna^{3}b-e^{2}l-kra^3-ut. See Ackerschnabelkraut.

ACKERSTRAUSSGRAS (Ger.), n. A^{3}k′e^{2}r-stra^3-us-gra^{3}s. See Ackerschmiele.

ACKERTÄSCHELKRAUT (Ger.), n. A^{3}k′e^{2}r-te^{2}sh-e^{2}l-kra^3-ut. See Ackerhirtentasche.

ACKERTHYMIAN (Ger.), n. A^{3}k′e^{2}r-tu^{6}m-i^2-a^{3}n. See Ackermelisse.

ACKERTRESPE (Ger.), n. A^{3}k′e^{2}r-tre^{2}sp-e^2. The smooth-rye broom-grass (*Bromus secalinus*) [A, 305]; the field broom-grass (*Bromus arvensis*) [A, 315].

ACKERVIOLE (Ger.), n. A^{3}k′e^{2}r-fe-o-le^2. 1. Venus's looking-glass (*Campanula speculum*). 2. The corn violet (*Viola arvensis*). [A, 248, 305, 315.]

ACKERVOGELMILCH (Ger.), n. A^{3}k′e^{2}r-fo-ge^{2}l-mi^{2}lch^2. A species of *Ornithogalum* (star of Bethlehem). [A, 248, 305.]

ACKERWEIDRICH (Ger.), n. A^{3}k′e^{2}r-vid-rich^2. Common *Lythrum* (*Lythrum salicaria*). [A, 305.]

ACKERWICKE (Ger.), n. A^{3}k′e^{2}r-vi^{2}k-e^2. The common vetch (*Vicia sativa*). [A, 248, 305.]

ACKERWINDE (Ger.), n. A^{3}k′e^{2}r-vi^{2}nd-e^2. The small bind-weed (*Convolvulus arvensis*). [A, 248, 305.]

ACKERWINDHALM (Ger.), n. A^{3}k′e^{2}r-vi^{2}nd-ha^{3}lm. See Ackerschmiele.

ACKERWURZ (Ger.), n. A^{3}k′e^{2}r-vurts. 1. Yellow-water (*Iris pseudacorus*). 2. The genus *Tormentilla*. 3. The sweet-flag (*Acorus calamus*). [A, 248, 305, 315.]

ACKERZWIEBEL (Ger.), n. A^{3}k′e^{2}r-tsweb-e^{2}l. See Ackervogelmilch.

ACKLYS (Lat.), n. f. See Achlys.

ACKONK, n. A native name for an East Indian plant, of unknown botany, the juice of which is a hydragogue cathartic. [Waring (A, 316)].

ACKRASBEERE (Ger.), n. A^{3}k′ra^{3}s-ba-re^2. The rough gooseberry (*Ribes grossularia*). [A, 248.]

ACLASTIC, adj. A^{2}k-la^{2}s′ti^{2}k. From α priv., and κλᾶν, to break. Fr., *aclaste*. Sp., *aclasto*. Transmitting rays of light without refracting them. [Leibnitz (A, 337).]

ACLEIDIAN, adj. A^{2}k-li′di^2-a^{2}n. From α priv., and κλείς, the collar-bone. Fr., *acléidien*. Sp., *acleido*. In zoology, destitute of clavicles. [A, 306.]

ACLEITROCARDIE (Fr.), n. A^3-klat-ro-ka^{3}r-de. From α priv., κλεῖθρον, a partition, and καρδία, the heart. Piorry's term for patency of the foramen ovale. [A, 250.]

ACLIDIEN (Fr.), adj. A^3-klę-de-a^{3}n^2. Acleidian.

ACLOWA, n. A leguminous plant of Guinea, used by the natives to cure the itch, the fresh plant being rubbed on the affected parts. [Waring (A, 316).]

ACLYTHROPHYTE, ACLYTROPHYTE (Fr.), n. A^3-kle-tro-fet. From α priv., κλεῖθρον, a bolt or bar, and φυτόν, a plant. Sp., *aclitrófito*. A plant of which the seeds have no apparent envelope. [A, 306.]

ACMÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)′me(ma^3-e^2). Gr., ἀκμαί, the prime of life. Acne.

ACMÆAMORPHA (Lat.), n. f. A^{2}k(a^{3}k)-me(ma^3-e^2)-a^2(a^3)-mo^{2}r′fa^3. For deriv., see Acmæos and Amorpha. An old term for intertrigo in adults (amorpha adultorum). [A, 322.]

ACMÆOCHLOROSIS (Lat.), n. f. A^{2}k(a^{3}k)-me(ma^3-e^2)-o-klo-ro′si^{2}s. See Acmæos and Chlorosis *adultorum*.

ACMÆOPIMELORRHŒA (Lat.), n. f. A^{2}k(a^{3}k)-me(ma^3-e^2)-o-pi^{2}m-e^{2}l-o-re′(ro^2′e^2)-a^3. For deriv., see Acmæos and Pimelorrhœa. Ger., *Fettauslaufen bei Erwachsenen*. An old term for seborrhœa oleosa in adults (pimelorrhœa adultorum). [A, 322.]

ACMÆOPOLYSARCIA (Lat.), n. f. A^{2}k(a^{3}k)-me(ma^3-e^2)-o-po^{2}l-i^2(u^6)-sa^{3}r′si^2(ki^2)-a^3. For deriv., see Acmæos and Polysarcia. Ger., *übermässige Befleischung bei Erwachsenen*. An old term for obesity in adults (polysarcia adultorum). [A, 322.]

ACMÆOS (Lat.), adj. A^{2}k(a^{3}k)-me′(ma^3′e^2)-o^{2}s. Gr., ἀκμαῖος, vigorous, in full bloom, mature. Ger., *reif*, *vollwüchsig*, *ausgewachsen*. Syn.: *vigens*, *florentis ætatis*. Full-grown, adult. [A, 322.]

ACMASTICUS (Lat.), adj. A^{2}k(a^{3}k)-ma^{2}s(ma^{3}s)′ti^2-ku^{3}s(ku^{4}s). Gr., ἀκμαστικός (from ἀκμάζειν, to be in full bloom). Fr., *acmastique*. Ger., *akmastisch*. It., *acmastico*. Sp., *acmástico*. Continuous, following a steady course without an acme (said of fevers). [A, 306.] Cf. Epacmasticus and Paracmasticus.

ACME (Lat.), n. f. A^{2}k(a^{3}k)′me(ma). Gr., ἀκμή. Fr., *acmé*. Ger., *Spitze*, *Höhepunkt*, *Gipfel*. It., *acma*. Sp., *acme*, *cima*. Syn.: *crisis*, *fastigium*. 1. The culminating point of a fever. [D, 18.] 2. An acne pimple; according to some authors, a wart. [A, 322.]

ACMELIA (Lat.), n. f. A^{2}k(a^{3}k)-me(ma)′li^2-a^3. See Acmella.

ACMELLA (Lat.), n. f. A^{2}k(a^{3}k)-me^{2}l′la^3. From ἀκωή, a point (from the pricking taste of the leaves). [A, 248.] Fr., *acmelle*. Ger., *Acmelle*. Sp., *acmelia*, *acmela*. A genus of dicotyledonous plants established by Richard, now considered as a section of the genus *Spilanthes*. [A, 321.] In general the medicinal properties are like those of *Pyrethrum*. [A, 306.]—**A. Linnæi.** An acrid, sialagogue plant of India and S. America, used for scurvy. [A, 316.]—**A. mauritiana** [Richard]. Fr., *abécédaire*. Ger., *Abcdaria*, *A-b-c-Kraut*. Syn.: *Spilanthes a.* [Linnæus] (seu *Linnæi* [Cassini]). The Indian cockweed, abecedaria (or a-b-c-daria); an annual herb employed in India for calculous nephritis; bitter, warm, and highly stimulating in taste. [A, 320.]—**A. repens** [Persoon]. Syn.: *Spilanthes Nuttallii* [Torrey and Gray]. A species found in wet places in the United States from S. Carolina to Florida, having the same medicinal properties as *A. Linnæi*. [B, 34, 46.]

ACMELLA MAURITIANA.
[A, 248.]

ACMO, n. An old term for red coral, formerly used in medicine. [A, 337.]

ACMON (Lat.), n. m. A^{2}k(a^{3}k)′mo^{2}n. Gen., *ac′monis*. Gr., ἄκμων, an anvil. See Incus.

ACNA (Lat.), n. f. A^{2}k(a^{3}k)′na^3. See Acne.

ACNE (Lat.), n. f. A^{2}k(a^{3}k)′ne(na). Gr., ἄκνη, probably a corruption of ἄκμη, the acme, bloom, or prime of life; adolescence (the time of life when a. is most likely to occur): or from ἀκή, a point (because of the acuminate form of the pustules): or from α priv., and κνῆν, to scratch (indicating the absence of pruritus): ἴονθος. Fr., *acné*. Ger., *Acne*, *Finnen*. Syn.: *varus*, *ionthus*; *stonepock*, *whelk*. 1. An inflammation of the sebaceous follicles, or of the tissue around them, characterized by disseminated conical or rounded pustules, papules, or tubercles, occurring most frequently on the face, back, or breast, and usually associated with the formation of comedones (see Comedo). 2. A generic term used by Schönlein [G, 10] for a group of skin diseases, including strôphulus, eczema, and acne. According to S., all the members of this group are characterized by the presence of "a separate pericarpium" (areola). in which an imperfectly developed fruit (*Frucht*), or efflorescence, is formed, such as a partially formed papule, vesicle, or pustule. Cf. Monocarpæ. [G.]—**A. albida.** See Milium.—**A. artificialis.** A. produced artificially, usually by the external or internal use of medicaments, such as tar, bromine, and iodine. [G.]—**A. artificialis e bromio, A. artificialis e pice, A. artificialis ex iodinio.** See *Bromine a.*, *Tar a.*, and *Iodine a.*—**A. atrophica.** Fr., *acné atrophique*. 1. A. followed by atrophic scars. 2. As employed by Cazenave and Bazin, a form of lupus erythematosus occurring usually on the nose or cheeks, and especially marked by the formation of little crusts from which prolongations descend into dilated and atrophic sebaceous follicles. [G, 20, 26.]—**A. bromata.** See *Bromine a.*—**A. cachecticorum.** An eruption occurring in broken-down, cachectic, or scrofulous persons, usually on the trunk or the lower limbs, characterized by flat, dusky-red papules and pustules varying in size from that of a pin-head to that of a lentil. [G, 3.]—**A. ciliaris.** Fr., *acné ciliaire*. Ger., *A. der Augenlidränder*. It., *a. ciliare*. Sp., *a. ciliar*. Inflammation of the sebaceous glands of the hair follicles situated close to the edge of the eyelid, causing the appearance of one or more small nodules along the ciliary margin of the lid. [F.]—**A. coagminata.** A. with the efflorescences occurring in clusters. The name has been especially applied to a form of a. due to the internal use of bromine; groups of a. pustules closely aggregated together form red, thickened patches often covered with scabs consist-

ing of dried pus mixed with sebaceous matter, beneath which the surface is dusky-red, often moist, and studded with pustular elevations. [G, 27.]—**A. contagiosa.** Ger., *englische Pocken.* An inoculable pustular disease, probably not really an a., said to be often met with in Germany in horses brought from England, and to differ from horse-pox. [W. Dieckerhoff and P. Grawitz, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," cii, 1, 1885, p. 148.]—**A. cornea.** Fr., *acné cornée* (ou *sébacée cornée* [Hardy]). Syn.: *ichthyosis follicularis.* A form characterized by hard conical, grouped or solitary, grayish or blackish, warty outgrowths, consisting of plugs of hardened sebum projecting from the follicles. [Cazenave (A, 328).]—**A. disseminata.** Fr., *dartre pustuleuse.* Sp., *a. diseminata.* A., *a. vulgaris* (in contradistinction to *a. rosacea* and *a. mentagra*). [G, 3.]—**A. ex usu picis.** See *Tar a.*—**A. frontalis.** See *A. varioliformis* (1st def.).—**A. granulosa.** See *A. cachecticorum.*—**A. hordeolans, A. hordeolaris.** Pustular a. with the pustules arranged in linear groups, like grains of barley. [G.]—**A. hypertrophica.** Fr., *acné hypertrophique.* See ROSACEA *hypertrophica.*—**A. indurata.** Fr., *acné indurée.* A. characterized by large rounded papules or tubercles, and attended usually with the formation of small, deep-seated cutaneous abscesses. [G.]—**A. iodata, A. jodata.** See *Iodine a.*—**A. medicamentosa.** A. due to the internal use of certain drugs; *a. toxica, a. artificialis.* [G.]—**A. mentagra.** An obsolete synonym of sycosis. [G.]—**A. miliaris.** 1. Milium (*q. v.*). 2. A pustular form of rosacea. [G, 50.]—**A. molluscoidea, A. molluscum, A. molluscum contagiosum** [G, 20]. See MOLLUSCUM *contagiosum.*—**A. picealis.** See *Tar a.*—**A. punctata.** Fr., *acné ponctuée, tannes.* Ger., *Comedonen, Mitesser.* It., *comedoni, tanni.* Syn.: *comedones, puncta mucosa; grubs, black heads, maggot pimples.* A disease of the skin characterized chiefly by the production of comedones, sometimes attended with slight papulation, but without marked evidences of inflammation. [G, 12.] Cf. COMEDO.—**A. punctata albida.** See MILIUM.—**A. pustulosa.** A. attended with the formation of pustules. [G.]—**A. rosacea.** Fr., *acné rosacée, couperose.* Ger., *Kupferfinne.* It., *a. rosacea.* Syn.: *a. rosacea pustulosa, a. miliaris, gutta rosea* [Sauvages]. 1. Rosacea (*q. v.*). [G, 12.] 2. Rosacea attended with the development of pustules or acne efflorescences; rosacea pustulosa. [G.]—**A. rosacea congestiva.** See ROSACEA *erythematosa.*—**A. rosacea hypertrophica.** See ROSACEA *hypertrophica.*—**A. rosacea pustulosa.** See ROSACEA *pustulosa.*—**A. scrophulosorum.** See *A. cachecticorum.*—**A. sebacea.** Fr., *acné sébacée.* See SEBORRHŒA.—**A. sebacea cerea** [G, 37]. See SEBORRHŒA *sicca.*—**A. sebacea cornea.** See *A. cornea.*—**A. sebacea exsiccata.** The xeroderma of E. Wilson and others. [G, 37.]—**A. sebacea molluscum** [G, 20]. See ATHEROMA.—**A. simplex.** Fr., *acné simple, dartre pustuleuse miliaire.* A. characterized by inflammatory lesions of a simple character. [G, 12.]—**A. solaris.** A form of a. described as occurring on the back of the nose, the lower eyelids, and the cheeks, due to exposure to the sun, and characterized by red papules that rarely suppurate. [G.]—**A. strophulosa.** See MILIUM.—**A. syphilitica.** See *Acneform* SYPHILODERM.—**A. tuberata, A. tuberculosa.** See *A. indurata.*—**A. umbilicata.** See *A. varioliformis* (2d def.).—**A. varioliformis.** Fr., *acné varioliforme.* Syn.: *a. frontalis* (1st def.). 1. A peculiar form of a., occurring usually in the form of groups upon the forehead, near the line of the hair, or upon the nape of the neck, consisting of small pustules which dry up and form flat scabs that are followed by small, depressed cicatrices. [G, 3.] 2. Molluscum contagiosum (*q. v.*). [G, 26.]—**A. varus.** An old synonym of a. [G.]—**A. vulgaris.** Fr., *varus disséminé* [Alibert]. Ger., *gewöhnliche Finne, Schönheitsblätterchen.* A term used by E. Wilson to include the a. simplex, a. punctata, and a. indurata of Willan. [G, 62.]—**A. vulgaris indurata.** See *A. indurata.*—**A. vulgaris simplex.** See *A. simplex.*—**A. vulgaris tuberata.** See *A. indurata.*—**Bromine a.** Lat., *a. bromata.* Ger., *Bromacne.* A. due to the internal use of bromine or its compounds. [G.] Cf. *A. coagminata.*—**Iodine a.** Lat., *a. iodata.* Ger., *Jodacne.* A toxic form of a. due to the internal use of iodine or its compounds. [G.]—**Joda'** (Ger.). See *Iodine a.*—**Psydracia a.** Sauvages's term for pustular a. [A, 322.]—**Syphilitic a.** See *Acneform* SYPHILODERM.—**Tar a.** Lat., *a. picealis.* Ger., *Theeracne.* A form of a. produced by the long-continued application of tar or certain of its products to the skin, and characterized by red inflammatory papules, in the centres of which appear little black points (comedones) due to the presence of tar in the orifices of the sebaceous follicles. [G.]

ACNÉ (Fr.), n. A^{3}k-na. Acne.—**A. arthritique.** A form of acne supposed to be connected with the arthritic diathesis; most common in adults, and especially in women at the menopause. [Bazin (A, 328).]—**A. atrophique.** See ACNE *atrophica.*—**A. boutonneuse.** Acne. [G, 26.] Cf. *A. sécretante.*—**A. concrète.** Seborrhœa sicca.—**A. congestive** [G, 26]. See GUTTA *rosacea.*—**A. cornée.** See ACNE *cornea.*—**A. éléphantiasique** [G, 26]. See RHINOPHYMA.—**A. éruptive.** See *A. boutonneuse.*—**A. érythémateuse.** See GUTTA *rosacea.*—**A. fluente.** See SEBORRHŒA *oleosa.*—**A. hypertrophique.** See ROSACEA *hypertrophica.*—**A. indurée.** See ACNE *indurata.*—**A. miliaire.** Alibert's term for milium. [Bazin (A, 328).]—**A. miliaire arthritique.** A term corresponding nearly to acne cachecticorum (*q. v.*). [G, 26.]—**A. miliaire scrofuleuse.** A scrofulous form of acne, occurring usually upon the forehead, characterized by small pustules, either discreet or confluent, often arranged in geometrical figures, which, after their rupture, are succeeded by red, slightly elevated patches covered with thin, white scales. [G, 26.] Cf. ACNE *varioliformis* (1st def.).—**A. molluscoïde.** See MOLLUSCUM *contagiosum.*—**A. pénicilliforme.** Seborrhœa in which the sebaceous concretions on the skin have a pencillate appearance, sometimes compared to that of asbestos. [G, 26.] Cf. TINEA *asbestina* and SEBORRHŒA *amianthacea.*—**A. pileuse.** Acne with each lesion pierced by a hair.—**A. pileuse miliaire.** A variety of *a. pileuse* in which the pustule is traversed by a hair not fully developed. [Bazin (A, 328).]—**A. pileuse ombiliquée.** A form in which the pustules are umbilicated and each is pierced by a hair. [Bazin (A, 328).]—**A. ponctuée.** See ACNE *punctata.*—**A. pustuleuse disséminée.** Bazin's term for acne simplex. [A, 328.]—**A. rosacée.** See ACNE *rosacea.*—**A. scrofuleuse.** See ACNE *cachecticorum.*—**A. sébacée.** Seborrhœa. [G, 20.]—**A. sébacée concrète.** See SEBORRHŒA *sicca.*—**A. sébacée cornée** [G, 20]. See ACNE *cornea.*—**A. sébacée croûteuse.** Seborrhœa sicca with marked crusting. [G, 26.]—**A. sébacée fluente** [G, 20]. See SEBORRHŒA *oleosa.*—**A. sébacée sèche.** Seborrhœa sicca. [G, 20.]—**A. sécretante.** A generic term used by Bazin for anomalies of sebaceous secretion, including acne punctata and acne sebacea (seborrhœa), in contradistinction to a. boutonneuse (acne). [G, 26.]—**A. simple.** See ACNE *simplex.*—**A. squammeuse.** One of Astruc's varieties, perhaps seborrhœa sicca. [Biett (A, 331).]—**A. syphilitique.** See *Acneform* SYPHILODERM.—**A. tuberculeuse ombiliquée, A. tuberculoïde, A. varioliforme.** See MOLLUSCUM *contagiosum.*—**A. variqueuse.** One of Astruc's varieties, characterized by dilated superficial capillaries. [Biett (A, 331).]

ACNEFORM, adj. A^{2}k'ne-fo^{2}rm. Lat., *acneformis* (from *acne* and *forma*, form). Resembling acne. See *A.* SYPHILODERM.

ACNEMIA (Lat.), n. f. A^{2}k(a^{3}k)-ne(na)'mi^2-a^3. From α priv., and κνήμη, the leg. Defective development of the calves of the legs. [A, 311, 316.]

ACNEMOS (Lat.), adj. A^{2}k(a^{3}k)-ne(na)'mo^{2}s. Gr., ἄκνημος. Affected with acnemia (*q. v.*). [A, 311.]

ACNESMOS (Lat.), adj. A^{2}k(a^{3}k)-ne^{2}z(ne^{2}s)'mo^{2}s. Gr., ἄκνημος (from α priv., and κνησμός, itching). Without itching or irritation. [Hippocrates (A, 311).]

ACNESTIS (Lat.), n. f. A^{2}k(a^{3}k)-ne^{2}s'ti^{2}s. Gr., ἀκνηστις (either from ἄκανος = ἄκανθα, the spine, also anything prickly [A, 311], or from α priv., and κνῆν, to scratch, because the locality can not be reached to be scratched). Ger., *Aknestis, Widerriss.* 1. An old term for the upper part of the spinal region, because quadrupeds can not reach it with the tongue; less strictly, any portion of the spinal region, especially that between the shoulder-blades and the loins, or the whole of it. [A, 311, 313, 315, 322, 325.] 2. A name given by Nicander to a plant that seems to have been the nettle. [A, 334.]

ACNIDA (Lat.), n. f. A^{2}k(a^{3}k)'ni^2-da^3. From α priv., and κνίδη, a nettle. A genus of chenopodiaceous plants. [A, 258.]—**A. cannabina.** The common Virginian hemp. [A, 258.]

ACNISOS (Lat.), adj. A^{2}k(a^{3}k)-ni(ne)'so^{2}s. Gr., ἄκνισος (from α priv., and κνῖσα, fat). Lean, spare. [Theophrastus (A, 311).]

ACNISTE (Fr.), n. A^{3}k-nest. A genus of solanaceous shrubs of tropical America. [A, 348.]

ACOATHED, adj. A^{2}k-othd'. Affected with a disease of the liver (said of sheep in Dorsetshire, England). [A, 315.]

ACOCANTHERA (Lat.), n. f. A^{2}k(a^{3}k)-o-ka^{2}nth(ka^{3}nth)-e(a)'-ra^3. From ἀκωκή, a point, and ἀνθηρός, flowering. A genus of solanaceous plants. [A, 258.]—**A. venenata.** A bush growing at the Cape of Good Hope. A decoction of the bark is used by the Hottentots for poisoning their arrows. [A, 258.]

ACOCCYGEUS (Lat.), adj. A^{2}k(a^{3}k)-o^{2}k-si^2(ku^6)'je(ga)-u^{3}s(u^{4}s). From α priv., and κόκκυξ, the coccyx. Lacking the coccyx. Cf. ACAUDATE.

ACOE (Lat.), n. f. A(a^3)'ko-e(e^2). Gr., ἀκοή. The sense of hearing. [F.] See AUDITION.

ACŒLIA (Lat.), n. f. A^2(a^3)-se'(ko'e^2)-li^2-a^3. From α priv., and κοιλία, a cavity. Ger., *Höhlenmangel.* Syn.: *defectus cavi.* Absence of a natural cavity. [A, 322.]

ACŒLIOUS, adj. A^2-se'li^2-u^{3}s. Gr., ἀκοίλιος (from α priv., and κοιλία, the belly). Lat., *acœlios, acœlius.* So emaciated as to seem to have no belly. [Galen (A, 325).]

ACŒLOMATE, ACŒLOMIC, adj's. A^2-se-lom'at, -lo^{2}m'i^{2}k. From α priv., and κοίλωμα, a cavity. In zoology, not cœlomate, having no cœloma, or distinct circumaxial body-cavity. [E. R. Lankester (B, 77).]

ACŒLOSIS (Lat.), n. f. A^2(a^3)-se(ko-e^2)-lo'si^{2}s. See ACŒLIA.

ACOEMETER, n. A^{2}k-o-e^{2}m'e-tu^{5}r. Lat., *acoëmetrum.* See ACOUMETER.

ACŒNA (Lat.), n. f. A^2(a^3)-se'(ko'e^2)-na^3. A genus of rosaceous plants of the sub-order *Sanguisorbeæ.* [A, 316.]—**A. argentea.** The *proquin* of Chili and Peru; a creeping plant found in bogs and cornfields; used as a vulnerary in the form of a poultice. [Waring (A, 316).]

ACOENOSI (Lat.), n. f., pl. of *acoenosus.* A^{2}k(a^{3}k)o-e^{2}n-o'si-(si^2). From ἀκοή, hearing, and νόσος, disease. Diseases of audition and of the ear. [F.]

ACOESIS (Lat.), n. f. A^{2}k(a^{3}k)-o-e(a)'si^{2}s. From ἀκοή, hearing. [F.] See AUDITION.

ACŒTON (Lat.), n. n. A^2(a^3)-se'(ko'e^2)-to^{2}n. See *Acetum* MEL.

ACŒTOS, ACŒTUS (Lat.), adj. A^2(a^3)-se'(ko'e^2)-to^{2}s, -tu^{3}s-(tu^{4}s). See *Acetum* MEL.

ACOGNOSIA (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}g-no'zi^2(si^2)-a^3. See ACEOGNOSIA.

ACOGNOSTICUS, ACOGNOSTUS (Lat.), n's m. A^{2}k(a^{3}k)-o^{2}g-no^{2}st'i^{2}k-u^{3}s(u^{4}s), -no^{2}st'u^{3}s(u^{4}s). For deriv., see ACEOGNOSIA. One who makes a study of materia medica and therapeutics. [A, 322.]

ACOGRAPHIC, adj. A^{2}k-o-gra^{2}f'i^{2}k. Fr., *acographique.* Sp., *acográfico.* Pertaining to acography. [A, 306.]

ACOGRAPHY, n. A^{2}k-o^{2}g'ra^{2}f-i^2. From ἄκος, a remedy, and γράφειν, to describe. Fr., *acographie.* Sp., *acografía.* A description of remedies. [A, 306.]

ACOITUS (Lat.), n. m. A^{2}k(a^{3}k)-o'i^2-tu^{3}s(tu^{4}s). See *Acetum* MEL.

ACOLABIS (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}l'a^{3}-bi^{2}s. Gen., *acolab'idis.* From ἀκίς, a point, and λαβίς, a forceps. An artery-forceps, armed with two teeth, devised by Puppi. [A, 322.]

ACOLASIA (Lat.), n. f. A^{2}k(a^{3}k)-o-la(la^{3})'zi^{2}(si^{2})-a^{3}. Gr., ἀκολασία. Fr., *acolasie.* Ger., *Akolasie.* Intemperance, licentiousness. [A, 311.]

ACOLASTIC, adj. A^{2}k-o-la^{2}s'ti^{2}k. Lat., *acolasticus, acolastus.* Fr., *acolastique.* Due to acolasia. [A, 316.] See ATROPHIA *acolastica.*

ACOLOGICUS, ACOLOGUS (Lat.), n's m. A^{2}k(a^{3}k)-ol-o^{2}j-(o^{2}g)'i^{2}k-u^{3}s(u^{4}s), -o^{2}l'o-gu^{3}s(gu^{4}s). Ger., *Akolog.* One who makes a study of aceology. [A, 322.]

ACOLOGY, n. A^{2}k-o^{2}l'o-ji^{2}. Lat., *acologia.* Fr., *acologie.* Ger., *Akologie.* It., *acologia.* Sp., *acalogia.* See ACEOLOGY.

ACOLUTHIA (Lat.), n. f. A^{2}k(a^{3}k)-o-lu^{2}(lu)'thi^{2}-a^{3}. Gr., ἀκολουθία, a following. See SEQUELA.

ACOLYCTINE, n. A^{2}k-o-li^{2}k'ten. For deriv., see ACONITUM and LYCOCTONUS. It., *acolictina.* An alkaloid discovered by Hübschmann, in 1865, in the root of *Aconitum lycoctonum ;* according to A. Wright, an impure aconine. [" Annal. di chim. med.-farm. e di farm.," Jan., 1885, p. 84 (B).]

ACOMAS, ACOMAT, n's. Names applied in Guiana to a number of trees, one of which is the *Racoubea guianensis* [Aublet] (the *Homalium spicatum* [Lamarck]), and another, according to Tussac, a species of *Achras,* the root of which is used in infusion in the West Indies for gonorrhœa. [A, 321, 344.]

ACOMIA (Lat.), n. f. A^{2}k(a^{3}k)-o'mi^{2}-a^{3}. Gr., ἀκομια, from α priv., and κόμη, hair. Fr., *acomie.* Ger., *Akomie.* It., *acomia.* 1. Baldness. [G.] 2. Acosmia (*q. v.*). [A, 322.]

ACOMIS (Sp.), n. A^{3}-ko'mi^{2}s. See ACONA.

ACOMUS (Lat.), adj. A^{2}k(a^{3}k)'o-mu^{3}s(mu^{4}s). Gr., ἄκομος. 1. Destitute of hair. 2. Acosmus (*q. v.*). [A, 322.]

ACONA (Sp.), n. A^{3}-ko'na^{3}. A West Indian name for the *Eugenia Greggii* [Swartz], a myrtaceous shrub, the fruit of which is aromatic and stimulant. [A, 321.]

ACONDYLOUS, adj. A^{2}k-o^{2}n'di^{2}l-u^{3}s. Lat., *acondylus.* Gr., ἀκόνδυλος (from α priv., and κόνδυλος, a knuckle). Fr., *acondyle.* Not jointed (said of the stalks of plants). [A, 343.]

ACONE (Lat.), n. f. A^{2}k(a^{3}k)'o-ne(na). Gr., ἀκόνη. 1. A whetstone, a stone on which to levigate. [A, 311, 343.] 2. A mortar. [A, 325.]

ACONÉINE (Fr.), n. A^{3}-ko-na-en. Aconine.

ACONELLA, ACONELLINE, n's. A^{2}k-o^{2}n-e^{2}l'la^{3}, -len. From a supposed dim. of *aconitum,* aconite. Fr., *aconelline.* Ger., *Aconellin.* It., *aconellina.* A non-poisonous alkaloid extracted, according to T. and H. Smith, from the root of *Aconitum napellus.* [B, 2.] It is isomeric, and by some said to be identical, with narcotine. Its existence is disputed. [B.]

ACONIC ACID, n. A^{2}k-o^{2}n'i^{2}k. Fr., *acide aconique.* Ger., *Aconsäure.* A monobasic crystalline acid, $C_6H_4O_4$, related to both aconitic and itaconic acids. [B, 4.]

ACONINE, n. A^{2}k'o^{2}n-en. For deriv., see ACONITE. Fr., *aconéine.* Ger., *Aconin.* A base, $C_{26}H_{39}NO_{11}$, formed by the saponification of true aconitine. [B, 5.]

ACONION (Lat.), n. n. A^{2}k(a^{3}k)-o'ni^{2}-o^{2}n. Gr., ἀκόνιον, probably from ἀκόνη, from its having been levigated on an acone (*q. v.*). An ancient remedy, consisting of a very fine powder, applied to the eyes. [A, 322 ; Dioscorides (A, 311).]

ACONIT (Fr., Ger.), n. A^{3}k-o-ne, -net'. Aconite.—**A. à grands fleurs** (Fr.). See ACONITUM *cammarum.*—**A. anthore** (Fr.). See ACONITUM *anthora.*—**A. des Pyrénées** (Fr.). See ACONITUM *Pyrenaicum.*—**A'extract** (Ger.). See *Extractum* ACONITI.—**A. féroce** [Fr. Cod.]. See ACONITUM *ferox.*—**A'kraut** (Ger.). Aconite leaves and tops.—**A. lycoctone** (Fr.). See ACONITUM *lycoctonum.*—**A. napel** [Fr. Cod.]. Ordinary aconite, *Aconitum napellus.* The Codex directs the employment of both the root and the leaves. [B.]—**A. néomontain** (Fr.). See ACONITUM *neomontanum.*—**A. paniculé** (Fr.). See ACONITUM *paniculatum.*—**A'pflaster** (Ger.). See *Emplastrum* ACONITI.—**A. salutaire** (Fr.). See ACONITUM *anthora.*—**A'säure** (Ger.). See the major list.—**A'tinctur** (Ger.). See *Tinctura* ACONITI.—**A. tue-chien** (Fr.). Lit., kill-dog aconite. See ACONITUM *napellus.*—**A. tue-loup** (Fr.). Lit., kill-wolf aconite ; wolfsbane. See ACONITUM *lycoctonum.*—**Alcoolature de feuille d'a.** [Fr. Cod.]. A preparation corresponding nearly to a fluid extract, made by macerating 1,000 parts of aconite leaves, collected at the beginning of inflorescence, in 1,000 parts of 90-per-cent. alcohol, and filtering. [B.]—**Alcoolature de racine d'a.** [Fr. Cod.]. A similar preparation made with the root, collected after flowering. [B.]—**Emplâtre d'a.** (Fr.). See *Emplastrum* ACONITI.—**Extrait alcoolique d'a.** (Fr.). An alcoholic extract, made by exhausting powdered aconite leaves with 56-per-cent. alcohol and evaporating to the consistence of an extract. [O. Reveil (A, 328).]—**Extrait de feuille d'a.** [Fr. Cod.]. A preparation made from aconite leaves by extracting with boiling water and evaporating to the consistence of a soft extract. [B.]—**Extrait de la racine d'a., Extrait de racine d'a. alcoolique** [Fr. Cod.]. See *Extractum* ACONITI.—**Feuilles d'a. napel** [Fr. Cod.]. Aconite leaves. [B.]—**Racine d'a. napel** [Fr. Cod.]. Aconite root. [B.]—**Sirop d'a.** [Fr. Cod.], **Sirop d'alcoolature d'a.** Lat., *syrupus de aconito* [Fr. Cod.]. A preparation made by mixing 25 parts of *alcoolature de racine d'a.* in 975 parts of syrup. [B.]—**Teinture de feuille d'a.** [Fr. Cod.], **Teinture de racine d'a.** [Fr. Cod.]. Preparations made by macerating for ten days 1 part of aconite leaves or root in 5 parts of 60-per-cent. alcohol, and filtering. [B.]—**Teinture éthérée d'a.** (Fr.). An ethereal tincture of aconite, made by displacement from 1 part of the powdered leaves and 6 parts of sulphuric ether. [O. Reveil (A, 328).]

ACONITANILIC ACID, n. A^{2}k-o^{2}n''i^{2}t-a^{2}n-i^{2}l'i^{2}k. From *aconityl* and *aniline.* Fr., *acide aconitanilique.* Ger., *Aconitanilsäure.* An amic acid, $C_{12}H_9NO_4 = O\left\{\begin{matrix}N\\H\end{matrix}\right.(C_6H_3O_3)'''.C_6H_5$, formed on the type $O\left\{\begin{matrix}NH_4\\H\end{matrix}\right.$, 3 of the hydrogen atoms in the ammonium being replaced by aconityl, and the fourth by phenyl. [B, 2.]

ACONITANILIDE, n. A^{2}k-o^{2}n''i^{2}t-a^{2}n'i^{2}l-i^{2}d. From *aconitic* and *aniline.* Fr., *aconitanilide.* Ger., *Aconitanilid.* A compound, $C_{24}H_{21}N_3O_3 = N_3(C_6H_3O_3)'''(C_6H_5)_3.H_3$, which appears to be formed, together with aconitodianil, by the action of aconitic acid or oxychlorocitric acid on aniline. [B, 2.]

ACONITANILSÄURE (Ger.), n. A^{3}k-o^{2}n-et''a^{3}n-el'zoi-re^{2}. Aconitanilic acid. [B.]

ACONITATE, n. A^{2}k-o^{2}n'i^{2}t-at. Fr., *aconitate.* Ger., *aconitsaures Salz.* It., Sp., *aconitato.* A salt of aconitic acid. The a's are of three classes, expressed by the general formulæ $C_6H_3M_3O_6$, $C_6H_3(M_2H)O_6$, and $C_6H_3(MH_2)O_6$, the first and third formulæ being doubled for salts of diatomic metals. [B, 2.]

ACONITE, n. A^{2}k'o^{2}n-it. Gr., ἀκόνιτον, ἀκόνειτον, from Aconis, a Bithynian city, where it grew in great abundance, according to Theophrastus ; according to others, from ἀκόνη, a rock, because it grew in rocky places. [A, 300.] One species was called παρδαλιαγχές (leopard's bane). [Aristotle (A, 311).] Lat., *aconitum.* Fr., *aconit.* Ger., *Aconit, Eisenhut, Sturmhut.* It., *aconito.* Sp., *acónito.* Syn. : *monkshood, wolfsbane.* The genus *Aconitum ;* in pharmacy, the leaves or the tuberous root of the *Aconitum napellus* (in the U. S. Ph., the root only). [B, 5.]—**Abstract of a.** See *Abstractum* ACONITI.—**A. leaves.** Lat., *aconiti folia* [Br. Ph.]. Fr., *feuilles d'aconit napel* [Fr. Cod.]. Ger., *Eisenhutblätter, Sturmhutblätter.* It., *foglie d'aconito.* Sp., *hojas de acónito.* In pharmacy, the leaves of *Aconitum napellus.* They are deeply palmate, with secondary indentations on the primary divisions ; dark-green on the upper and light-green on the lower surface, and glossy on both ; have a faint odor, particularly when rubbed ; and, when chewed, impart first a bitter taste, then a sense of tingling and numbness to the tongue and mouth. [B.]—**A. liniment.** See *Linimentum* ACONITI.—**A. plaster.** See *Emplastrum* ACONITI.—**A. root.** Lat., *aconitum* [U. S. Ph.], *aconiti radix* [Br. Ph.], *tubera aconiti* [Ger. Ph.]. Fr., *racine d'aconit napel* [Fr. Cod.]. Ger., *Eisenhutknollen.* It., *radice* (o *tuberi*) *d'aconito.* Sp., *raiz de acónito.* In pharmacy, the tuber, or root-stock of *Aconitum napellus.* It is a dark-brown, conical or oblong tuber, from 2 to 3 or 4 in. long, and from ½ to ¾ in. thick at its thickest part. It is covered with a thick bark marked with the scars of the rootlets. It is devoid of odor, and, when chewed, imparts a sweetish, acrid taste, followed by numbness and tingling in the mouth and tongue. It contains more of the active principle than the leaves. [B, 5.]—**American a.** See ACONITUM *Fischeri* and ACONITUM *uncinatum.*—**Etherial tincture of a.** See *Tinctura* ACONITI *œtherea.*—**Extract of a., Extract of a. root.** See *Extractum* ACONITI.—**Fleming's tincture of a.** A tincture made by macerating for four days 16 troyounces of dried and powdered a. root in 16 fluidounces of alcohol, and then percolating, alcohol being added until the percolate equals 24 fluidounces. [B.]—**Fluid extract of a.** See *Extractum* ACONITI *fluidum.*—**Indian a.** See ACONITUM *ferox.*—**Japanese a.** A term applied to several varieties found in Japan. [B, 5.]—**Liniment of a.** See *Linimentum* ACONITI.—**Mountain a.** See ACONITUM *neomontanum.*—**Nepal a.** The tubers of *Aconitum ferox,* and perhaps those of other species, growing in Nepal ; distinguished by their large size and their elongated shape. [B, 5.]—**Tincture of a.** See *Tinctura* ACONITI and *Fleming's tincture of a.*—**Tincture of a root.** See *Tinctura* ACONITI.—**Winter a.** See ERANTHIS *hiemalis.*

ACONITIA (Lat.), n. f. A^{2}k(a^{3}k)-o-ni^{2}sh(ni^{2}t)'i^{2}-a^{3}. The official name for aconitine formerly employed in the Br. Ph. ; now superseded by *aconitina.* [B.]—**Ointment of a., Unguentum aconitiæ** [Br. Ph., 1867]. See *Unguentum* ACONITINÆ.

ACONITIC ACID, n. A^{2}k-o^{2}n-i^{2}t'i^{2}k. Fr., *acide aconitique.* Ger., *Aconitsäure.* It., *acido aconitico.* Sp., *ácido aconítico.* Syn. : *achilleic* (or *equisetic*) *acid.* A tribasic crystalline acid, $C_6H_6O_6 = C_3H_3.(CO.OH)_3$, occurring in various plants of the genera *Aconitum* and *Equisetum,* also in *Delphinium consolida, Adonis vernalis, Achillea millefolium,* and beets, sugar-cane, and sorghum. It is formed also from citric acid by the action of heat or acids. [B, 3, 4, 5.]

ACONITICUM (Lat.), n. n. A^{2}k(a^{3}k)-o-ni^{2}t'i^{2}k-u^{3}m(u^{4}m). Neut. of adj., *aconiticus* (*principium* understood). The aconitic principle ; a name proposed by C. G. Kühn for aconitine. [A, 322.]

ACONITIFOLIA (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}n-i^{2}t-i^{2}-fo'li^{2}a^{3}. The *Podophyllum peltatum.* [A, 316.]

ACONITIN (Ger.), n. A^{3}k-o^{2}n-e-ten'. Aconitine.—**A'salbe.** See *Unguentum* ACONITINÆ.—**Salpetersaures A.** Aconitine nitrate. [B.]

ACONITINA (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}n-i^{2}t-i(e)'na^{3}. Syn. : *aconitia* [Br. Ph., 1867], *aconitinum* [Ger., Ph.]. Aconitine.—**Azotas aconitinæ** [Fr. Cod.]. Fr., *azotate d'aconitine.* Ger., *salpetersaures Aconitin.* Aconitine nitrate. [B.]—**Oleatum aconitinæ.** A solution of 2 grains of aconitine in 100 minims of oleic acid ; used as a topical application for neuralgia. [B, 94.]—**Unguentum aconitinæ** [Br. Ph.]. Ger., *Aconitinsalbe.* Syn. : *unguentum aconitiæ* [Br. Ph., 1867]. Ointment of aconitine ; made by dissolving 8 grains of aconitine in ½ fluidrachm of rectified spirit, and adding 1 oz. (avoirdupois) of lard. It contains 16 parts of aconitine in 1,000. [B.]

ACONITINE, n. A^{2}k-o^{2}n'i^{2}t-en. Lat., *aconitina* [Br. Ph., Fr. Cod., Belg. Ph.], *aconitinum* [Ger. Ph., 1st ed.], *aconitia* [Br. Ph., 1867]. Fr., *aconitine.* Ger., *Aconitin.* It., Sp., *aconitina.* An alkaloid, $C_{33}H_{43}NO_{12}$ (probably benzoylaconine, $C_{26}H_{38}[C_7H_6O]NO_{11}$ [B], derived from the *Aconitum napellus,* and from other species of *Aconitum.* Except some of the hydrogen compounds of arsenic,

this substance is the most deadly poison known. [B.] As produced by different makers it varies in its sensible properties, thus: 1. *Petit's.* Hard, white crystals. 2. *Morson's.* A dirty-white powder (? pseudo-aconitine) of a burning but not bitter taste. 3. *Hottot's.* A white powder. 4. *Hopkins & Williams's.* A concrete, transparent, gummy mass, of a greenish-brown color (? pseudo-aconitine). 5. *Merck's.* A yellowish or clear-brown powder. 6. *Friedländer's.* A concrete, grayish-white mass. [Plugge, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," lxxxvii, 3, p. 410.]—**A. nitrate.** Lat., *azotas aconitinæ* [Fr. Cod.], *aconitinum nitricum* (as written by the Germans). Fr., *azotate d'a.* [Fr. Cod.]. Ger., *salpetersaures Aconitin.* It., *nitrato di aconitina.* Sp., *nitrato de aconitina.* Colorless prismatic crystals, $C_{33}H_{43}NO_{12},HNO_3$, soluble in 10 parts of boiling water, less soluble in cold water. [B.]—**Amorphous a.** The official preparation of the Br. Ph.; an amorphous base, combined usually with several molecules of water of crystallization. As prepared by the process of the Br. Ph., it usually contains a variable amount of pseudo-aconitine. It is soluble in 150 parts of water, and readily soluble in alcohol, in ether, and in chloroform. [B, 5.]—**Apo-a.** See the major list.—**Crystallized a.** See *True a.*—**Duquesnel's a.** A form of crystallized a. having the constitution $C_{27}H_{40}NO_{10}$, resembling true a. in most of its physical properties, but said to differ from it in physiological action. [B, 5.] It has lately been suggested that it is not the simple alkaloid, but a nitrate. ["Ephem. of Mat. Med.," etc., Nov., 1882, p. 167 (B).]—**English a.** See *Morson's a.*, under A. —**French a.** See *True a.*—**German a.** See *Merck's a.*, under A. —**Pseuda', Pseudo-a'.** See the major list.—**True a.** Colorless tabular or prismatic crystals, having a very bitter taste, and imparting to the lips and tongue a numb, tingling sensation. It is almost insoluble in water, but soluble in alcohol and in ether, and very soluble in chloroform. This is the a. of the Fr. Cod. [B, 5.]

ACONITINUM (Lat.), n. n. A^{2}k(a^{3}k)-o^{2}n-i^{2}t-i(e)′nu^{3}m(nu^{4}m). The German official name for aconitine.—**A. anglicum.** English aconitine. See *Pseudo*-ACONITINE.—**A. nitricum.** See ACONITINE *nitrate.*

ACONITIUM (Lat.), n. n. A^{2}k(a^{3}k)-o-ni^2′shi^2(ti^2)-u^{3}m(u^{4}m). Aconitine.

ACONITO-BIANILE (Fr.), n. A^{3}k-o-ne-to-be-a^{3}n-el. See ACONITODIANIL.

ACONITODIANIL, n. A^{2}k-o^{2}n″i^{2}t-o-di′a^{2}n-i^{2}l. For deriv., see ACONITE, *Di-**, and ANILINE. Fr., *aconito-bianile.* Ger., *Aconitdianil.* It., *aconitidianilo.* A substance, $C_{18}H_{14}N_2O_3 = N_2.(C_6H_3O_3)'''(C_6H_5)_2.H$, produced, together with aconitanilide (*q. v.*), by the action of aconitic acid on aniline. [B, 2.]

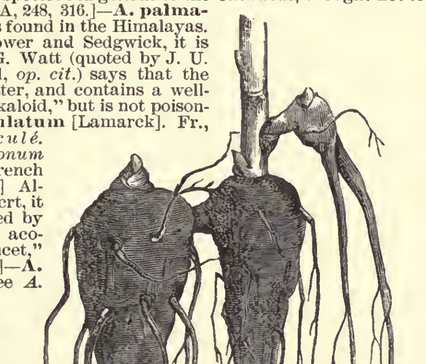
ACONITSÄURE (Ger.), n. A^{3}k-o-net′zoi″re^2. Aconitic acid. [B.]—**A.-Aethylester.** Ethyl aconitate. [B.]—**Brenzliche A.** Pyroaconitic acid. [A, 324.]

ACONITUM (Lat.), n. n. A^{2}k(a^{3}k)-o^{2}n-i(e)′tu^{3}m(tu^{4}m). For deriv., see ACONITE. 1. A genus of herbaceous plants of the natural order *Ranunculaceæ* and the tribe *Helleboreæ*, distinguished by the presence of five sepals, the upper one of which is hooded and covers in the upper petals. [B, 34.] There is a great liability to variation in the species, and the nomenclature is consequently confusing. [J. U. and C. G. Lloyd, "Drugs and Med. of N. Am.," Sept., 1885.] 2. The drug aconite (in the U. S. Ph., the tuberous root of *A. napellus*). [B.]—**Abstractum aconiti** [U. S. Ph.]. Abstract of aconite; made by extracting 200 parts of powdered aconite root with alcohol containing 2 parts of tartaric acid, and evaporating the extract with sugar of milk, which is added in sufficient quantity to make the whole weigh 100 parts. [B, 5.]—**Aconiti folia** [Br. Ph.]. The leaves of *A. napellus.* [B.]—**Aconiti heterophylli radix** [Ind. Ph.]. The root of *A. heterophyllum*, or atis. [B.]—**Aconiti radix** [U. S. Ph., 1870: Br. Ph.]. The root of *A. napellus.* [B.]—**Aconiti tuber.** The tuber of *A. napellus.*—**A. altigaleatum.** See *A. cammarum.*—**A. anthora** [Linnæus]. Fr., *aconit anthore* (ou *salutaire*). Ger., *feinblätteriger Sturmhut*, *Giftheil*, *Heilgift*, *Herzwurz.* Sp., *acónito saludable.* A European species, the rhizome of which is long and fusiform, with a thin pith, having both short and long radiating prolongations. [B, 33.] Its specific name, anthora (= antithora), came from its having formerly been regarded as an antidote to "thora," the *A. napellus* (or from its being "good against disorders of the thorax"). [Wallace, "Lancet," March 18, 1882.] The root (*radix anthoræ*), which has been used in medicine, is made up of rounded or angular fleshy masses, brown externally and white internally, having an agreeable odor, and a taste at first very acrid, afterward sweetish. [B, 97.]—**A. anthoroideum.** See *A. anthora.*—**A. barbatum.** A Siberian species. The root is used in China as a stimulant, diuretic, and alterative, also for fever and hæmorrhoids. [A, 248, 261.]—**A. bernhardianum.** See *A. cammarum* [Jacquin]. Fr., *aconit à grands fleurs.* Ger., *langhelmiger Sturmhut.* A European species, having the rhizome globular-ovate and the rays of the pith about five in number. The leaves have rhomboid segments. [B, 33.]—**A. Candollei.** See *A. anthora.*—**A. caslostomum.** A variety mentioned by Power and Sedgwick as "believed to be poisonous." [A, 316.]—**A. chinense** [Sieber]. Chinese aconite, indigenous to Japan. The rhizome is elongated, and a cross-section of the pith is circular, elliptical, or stellate. [B, 33.] It is used in China as a vulnerary and to poison arrows, and the powder of that brought from Szechwan is employed to produce local anæsthesia. [A, 261.]—**A. columbianum, A. eulophum.** See *A. anthora.*—**A. ferox** [Wallich]. Fr., *aconit féroce* [Fr. Cod.]. Indian aconite; a genus found in the Himalayas, being the source of the terrible *bish*, or *biskh.* poison of India, used as an arrow-poison. It was also used by the natives to poison the wells in places captured by the British. It has been thought to be the source of the so-called aconitine (pseudaconitine) made in England. By some it has been regarded as only a variety of *A. napellus.* The rhizome, which is used in medicine, is conical in shape, from 2 to 4 in. long, about 1 in. thick, and intensely acrid. [A, 42; B, 19, 33.]—**A. Fischeri** [Reich]. A species growing abundantly in the mountainous regions of the western section of the United States. In its physiological action it differs from *A. napellus* in not affecting tactile sensibility, or the irritability of the sensory nerves. It does not affect the contractility of muscles or the irritability of the

ACONITUM FISCHERI.

[From J. U. and C. G. Lloyd's "Drugs and Medicines of North America."]

motor nerves, but paralyzes the motor centers of the spinal cord, together with the pneumogastric nerve, and stimulates the vaso-motor center. It causes death by paralysis of respiration. [R. Bartholow, "Drugs and Med. of N. Am.," Sept., 1885, p. 229; "N. Y. Med. Jour.," Nov. 21, 1885, p. 592.]—**A. heterophyllum** [Wallich]. A species found in India. The rhizome is conical or fusiform, and devoid of acridity. [B, 33.] The plant is eaten in India as a vegetable. The root is pleasantly bitter, and is by some considered mildly antiperiodic and tonic, by others inert. [G. Watt, quoted by J. U. and C. G. Lloyd, *op. cit.*]—**A. intermedium.** See *A. neomontanum.*—**A. Jacquini.** See *A. anthora.*—**A. japonicum.** Japanese aconite (*tsaouwoo*). The rhizome, which is the part found in commerce, agrees in general characters with that of *A. chinense*, and is said to be used in China for the same purposes. Probably derived from several species. [A, 316; B.]—**A. Kusnezovii.** See *A. cammarum.* — **A. luridum** [Hooker and Thomsen]. An East Indian species, gathered along with *A. ferox.* [B, 33.] —**A. luteum.** Ger., *gelber Eisenhut.* Yellow aconite. See *A. lycoctonum.*—**A. lycoctonum** [Linnæus]. Gr., ἀκόνιτον λυκοκτόνον. [Dioscorides (A, 328).] Fr., *aconit tue-loup* (ou *lycoctone*). Ger., *Wolfstodsturmhut*, *Fuchstodsturmhut.* Syn.: *Lycoctonum vulgare flore luteo*, *Delphinium lycoctonum*, *A. vulparia.* The great yellow wolfsbane; a European species, having an oblique rhizome with several heads and conical rootlets, palmate hairy leaves, and dull-yellowish flowers, the hooded sepal of which has the shape of an extinguisher. It is less virulent than many other species, and only the root seems to be poisonous. [A, 319;



THE RHIZOME OF ACONITUM FISCHERI.
[J. U. and C. G. Lloyd, *op. cit.*]

B, 5, 19, 33.]—**A. macranthum.** See *A. cammarum.*—**A. multifidum.** A species of which the roots are said to be edible. [Hooker (A, 316).]—**A. napellus** [Linnæus]. Fr., *aconit napel* [Fr. Cod.], *char-de-Vénus, casque-de-Jupiter.* Ger., *Napell-* (oder *wahrer*) *Sturmhut.* It., *aconito napello.* Sp., *acónito napelo.* Syn.: *Delphinium a., Delphinium napellus.* Monkshood; the aconite of the pharmacopœias. Its specific name is said to be from *napus*, a kind of turnip, from the shape of its root. A European perennial herb, growing to the height of 4 ft., surmounted by a spike of dark-blue flowers. The parts used in medicine are the fleshy rhizome and the dark-green palmate leaves. [B.] Like most of the other species, *A. napellus* is a violent poison, paralyzing the heart in diastole; in medicine, it is used chiefly as a cardiac sedative and, applied locally, for the relief of pain, especially neuralgia. It yields aconitine (*q. v.*).—**A. nasutum** [Fischer]. See *A. Fischeri.*—**A. nemorosum.** See *A. anthora.*—**A. neomontanum.** Fr., *aconit néomontain.* Mountain aconite, a European species, considered by some to be only a variety of *A. paniculatum.* [A, 248, A. Richard (A, 331).]—**A. nitidum.** A species supposed not to be poisonous. [A, 316.]—**A. ochroleucum** [Willdenow]. A species indigenous to the Caucasus, thought not to be poisonous. [A, 248, 316.]—**A. palmatum.** A species found in the Himalayas. According to Power and Sedgwick, it is poisonous, but G. Watt (quoted by J. U. and C. G. Lloyd, *op. cit.*) says that the root "is very bitter, and contains a well-defined bitter alkaloid," but is not poisonous.—**A. paniculatum** [Lamarck]. Fr., *aconit paniculé.* Syn.: *Lycoctonum autumnale.* A French species. [A, 248.] Although almost inert, it is said to be used by some makers of aconitine. ["Lancet," March 25, 1882.]—**A. ponticum.** See *A. lycoctonum.*—**A. pyrenaicum** [Lamarck]. Fr., *aconit des Pyrénées.* A species indigenous to the Pyrenees, considered by some as a variety of *A. lycoctonum*, thought not to be poisonous. [A, 248, 257, 316.]—**A. racemosum.** See ACTÆA *spicata.*—**A. reclinatum** [Gray]. A rare species found on a few mountain-peaks of North Carolina and Virginia, distinguished by white or cream-colored flowers and a trailing stem; thought to be of no importance in medicine. [A. Gray, "Am. Jour. of Sci.," April, 1842, p. 34; "Drugs and Med. of N. America," Sept., 1885, p. 220; B, 34.]—**A. rostratum** [Bernhardi]. A variety of *A. cammarum.* [A, 248, O. Reveil (A. 328).]—**A. rotundifolium.** A species of which the roots are said to be edible. [Hooker (A, 316).]—**A. salutiferum.** See *A. anthora.*—**A. scandens.** See *A. uncinatum.*—**A. septentrionale.** A variety of *A. lycoctonum* found in northern Europe, the leaves of which are eaten as a pot-herb, while the root is poisonous. [A, 248, 316.]—**A. sherkanium.** A variety of *A. cammarum.* [O. Reveil (A, 328).]—**A. sinense** [Paxton]. Chinese aconite; a variety of *A. chinense.* [A, 248; B, 5.]—**A. spicatum.** A variety of *A. napellus.* [O. Reveil (A, 328).]—**A. stoerckeanum, A. stoerckianum, A. störckianum, A. störkianum** [Reichenbach]. Ger., *Störck's* (oder *grosser blauer*) *Sturmhut.* Störck's aconite, an Austrian species with leaves divided into broadly wedge-shaped segments, and a thin, conical rhizome, with the pith pentagonal in cross-section. [A, 248; B, 33.] This is supposed to be the species employed by Baron Störck, who introduced aconite into medicine in the eighteenth century; but others think that he used *A. neomontanum.*—**A. strictum.** A variety of *A. napellus.* [P. Rayer (A, 332).]—**A. tauricum.** An intensely acrid species found in Tauria [A, 248, Christison (A, 316).]—**A. uncinatum** [Linnæus]. Syn.: *A. scandens* [Muhlenberg]. American aconite; a species found sparingly in the Alleghany Mountains and elsewhere in the Middle States, having large, showy blue flowers. Although it has been said to be identical with an extremely poisonous Asiatic species, it contains but a minute quantity of an acrid, bitter, amorphous alkaloid, and may be regarded as practically inert. [V. Coblentz and R. Bartholow, "Drugs and Med. of N. Am.," Sept., 1885, p. 224 (with remarks by the editors of that publication).]—**A. variabile** [Hayne]. See *A. napellus.*—**A. variegatum** [Linnæus]. See *A. cammarum.*—**A. virosum** [Don]. See *A. ferox.*—**A. vulparia.** See *A. lycoctonum.*—**Emplastrum aconiti** [U. S. Ph., 1870]. Aconite plaster; made by extracting 16 oz. of aconite root with alcohol, evaporating to the consistence of a soft extract, and adding enough resin plaster to make the whole weigh 16 oz. According to the Belg. Ph., a plaster made of 1 part, each, of powdered extract of aconite and belladonna oil and 7 parts of Burgundy-pitch plaster. [B, 95.]—**Essentia aconiti.** See *Tinctura aconiti.*—**Extractum aconiti** [U. S., Br., and Ger. Ph's.]. Fr., *extrait de racine d'aconit alcoolique* [Fr. Cod.]. Ger., *Aconitextract* [Ger. Ph.], *Eisenhutextrakt, Sturmhutextrakt.* It., *estratto di radice d'aconito.* Sp., *extracto de acónito.* Extract of aconite. The U. S. preparation is made by exhausting 100 parts of powdered aconite root with alcohol in which 1 part of tartaric acid has been dissolved, evaporating to a pilular consistence, and adding 5 per cent. of glycerin. The French process is the same, with the omission of the tartaric acid and glycerin. The German Pharmacopœia directs that the root be macerated for six days in a mixture of alcohol and water, then three days longer in fresh alcohol and water, and the two infusions mixed and evaporated to the consistence of a thick extract. The British preparation is made by inspissating the juice of the fresh leaves and tops of aconite. [B.]—**Extractum aconiti aquosum** [Netherl. Ph.]. A thick aqueous extract of aconite leaves. [B, 95.]—**Extractum aconiti fluidum** [U. S. Ph.]. Fluid extract of aconite; made by exhausting 100 grammes of powdered aconite root with alcohol in which 1 gramme of tartaric acid has been dissolved, evaporating to the consistence of a soft extract, and adding enough alcohol to make the whole measure 100 c. c. [B.]—**Extractum aconiti herbæ** [Russ. Ph.].

ACONITUM NAPELLUS. [A, 327.]

THE ROOT OF ACONITUM NAPELLUS. [A, 260.]
The small figure at the right shows a cross section of the rhizome.

ACONITUM UNCINATUM.
[J. U. and C. G. Lloyd, *op. cit.*]

An extract of the leaves and tops of aconite. [B, 95.]—**Extractum aconiti herbæ cum dextrino** [Russ. Ph.]. An extract of the leaves and tops of aconite mixed with dextrin. [B, 95.]—**Extractum aconiti pulveratum** [Fenn. Ph.]. A mixture of extract of aconite leaves with milk sugar and licorice, containing $\frac{1}{3}$ of its weight of the extract. [B, 95.]—**Extractum aconiti radicis alcoholicum.** Alcoholic extract of aconite root [Fleming].—**Extractum aconiti siccum** [Swiss Ph.]. Extract of aconite leaves mixed with milk sugar. [B, 95.]—**Extractum aconiti spirituosum** [Netherl. Ph.]. A thick alcoholic extract of aconite leaves. [B, 95.]—**Extractum aconiti tuberum** [Russ. Ph., Swed. Ph.]. Extract of aconite root. [B, 95.] See *Extractum aconiti.*—**Extractum aconiti tuberum siccum** [Swed. Ph.]. A dried extract of aconite root mixed with dextrin and licorice ; 2 parts represent 1 part of the simple extract. [B, 95.]—**Folia aconiti.** The leaves of *A. napellus.*—**Herba aconiti.** Ger., *Aconitkraut.* The leaves and tops of *A. napellus.*—**Linimentum aconiti** [Br. Ph., U. S. Ph., 1870]. Aconite liniment ; made by extracting 20 parts by weight of aconite root and 1 part of camphor with alcohol until 20 parts by volume of extract are obtained. [Br. Ph.] The preparation of the U. S. Ph. of 1870 was made by extracting 8 parts by weight of aconite root with alcohol until 7 parts of extract were obtained, and adding 1 part of glycerin. [B.]—**Radix aconiti racemosi.** The root of *Actœa spicata.* [B.]—**Succus inspissatus aconiti, Succus spissatus aconiti napelli.** The inspissated juice of the fresh leaves of *A. napellus.* [B, 97.]—**Syrupus de aconito** [Fr. Cod.]. See *Sirop d'*ACONIT.—**Tinctura aconiti** [U. S., Br., and Ger. Ph's.]. Fr., *teinture de racine d'aconit* [Fr. Cod.]. Ger., *Aconittinctur* [Ger. Ph.]. It., *tintura d'aconito.* Sp., *tintura d'acónito.* Tincture of aconite ; made by macerating powdered aconite root with alcohol, or dilute alcohol and filtering. The U. S. Ph. directs the addition of 1 part of tartaric acid to every 100 parts of the root, previous to the extraction ; the maceration is continued for only twenty-four hours, and the process is completed by percolation. In the Br. Ph. the maceration is directed to be kept up for forty-eight hours, and then percolation employed, while in the Ger. Ph. and the Fr. Cod. maceration alone is ordered, and is directed to be kept up for a week [Ger. Ph.] or ten days [Fr. Cod.]. In the U. S. preparation 100 parts contain 40 of the drug, in the French 20, in the British 15, and in the German 10. [B.]—**Tinctura aconiti ætherea.** An ethereal tincture of the leaves of *A. napellus*, made with from 2 to 4 parts of ether ; or an alcoholic tincture of the leaves, made with 2 parts of the latter and three parts of alcohol, to which 1 part of acetic ether is added ; used as an antispasmodic and diaphoretic, especially in rheumatism. [B, 97.]—**Tinctura aconiti radicis** [U. S. Ph., 1870]. Tincture of aconite root. [B.] See *Tinctura* ACONITI.—**Tubera aconiti** [Ger. Ph.]. Aconite root. [B.]—**Tubera aconiti indica.** Indian aconite root ; the tubers of various species used in India in making bish poison. [A, 303.]

ACONITYL, n. A^{2}k-o^{2}n'i^{2}t-i^{2}l. Fr., *aconityle.* Ger., *Aconityl.* It., *aconitilo.* The trivalent radicle of aconitic acid and its derivatives, $C_6H_3O_3$. [B, 2.]

ACONIUM (Lat.), n. n. A^{2}k(a^{3}k)-o'ni^2-u^{3}m(u^{4}m). See ACONION.

ACONSÄURE (Ger.), n. A^3-kon'zoi-re^2. Aconic acid. [B.]

ACONTISMUS (Lat.), n. m. A^{2}k(a^{3}k)-o^{2}n-ti^{2}z(ti^{2}s)'mu^{3}s(mu^{4}s). Gr., ἀκοντισμός. A darting out (of liquids). [Galen (A, 311).]

ACONUSI, ACOONOSI, ACOONUSI (Lat.), n's f. pl. A^{2}k(a^{3}k)-o^{2}n(o-o^{2}n)-u^2(u, o)'si(si^2). See ACŒNOSI.

ACOPA (Lat.), n. f. A^{2}k(a^{3}k)'o-pa^3. See ACOPOS.

ACOPE, ACOPEUX (Fr.), adj's. A^3-kop, -ko-pu^5. Acopic.

ACOPHER, n. A Scriptural term supposed to have referred to the henna-plant. [A, 344.] See LAWSONIA *inermis.*

ACOPIA (Lat.), n. f. A^{2}k(a^{3}k)-o'pi^2-a^3. Gr., ἀκοπία. Freedom from fatigue. [A, 311.]

ACOPIASTOS (Lat.), adj. A^{2}k(a^{3}k)-o-pi^2-a^{2}s(a^{3}s)'to^{2}s. Gr., ἀκοπίαστος. Not fatiguing. [Aristotle (A, 311).]

ACOPIC, adj. A^{2}k-o^{2}p'i^{2}k. Gr., ἄκοπος. Lat., *acopos, acopus, acopicus.* Fr., *acope.* It., *acopo.* Sp., *acópico, acoposo.* Not wearied, not wearying ; refreshing, restorative. [Hippocrates, Galen (A, 311).]

ACOPIS (Lat.), n. m. A^{2}k(a^{3}k)'o-pi^{2}s. See ACOPOS.

ACOPOMYRON (Lat.), n. n. A^{2}k(a^{3}k)-o-po-mi(mu^6)'ro^{2}n. See MYRACOPUM.

ACOPON (Lat.), n. n. A^{2}k(a^{3}k)'o-po^{2}n. Gr., (φάρμακον) ἄκοπον (from α priv., and κόπος, weariness). Fr., *acope.* Ger., *schmerzstillendes Mittel.* It., *acopo.* In ancient pharmacy, a medicament, especially an ointment, that relieved fatigue. [A, 306.] A restorative. [Galen (A, 311).]

ACOPOS (Lat.), n. m. A^{2}k(a^{3}k)'o-po^{2}s. Gr., ἄκοπος. 1. A precious stone of a spongy texture, interspersed with gold-colored spots, boiled in oil by the ancients as a remedy for fatigue. [A, 306.] 2. A plant supposed to have the same property, thought to have been the *Menyanthes trifoliata.* [Dioscorides (A, 344).] 3. An old name for lupine. [Pliny (A, 318).]

ACOPRIA (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}p'ri^2-a^3. See ACOPROSIS.

ACOPRODES (Lat.), adj. A^{2}k(a^{3}k)-o^{2}p-ro'dez(de^{2}s). Gr., ἀκοπρώδης (from α priv., and κόπρος, excrement). Producing but little excrement (said of articles of food). [Hippocrates (A, 311).]

ACOPROSIS (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}p-ro'si^{2}s. Fr., *acoprose.* A deficient formation of excrement. [A. 322.]

ACOPROUS, adj. A^{2}k-o^{2}p'ru^{3}s. Gr., ἄκοπρος. Having but little excrement in the bowels. [Hippocrates (A, 311).]

ACOPUM (Lat.), n. n. A^{2}k(a^{3}k)'o-pu^{3}m(pu^{4}m). See ACOPON.

ACOPUS (Lat.), adj. A^{2}k(a^{3}k)'o-pu^{3}s(pu^{4}s). See ACOPIC.

ACOR (Lat.), n. m. A(a^3)'ko^{2}r(kor). Gr., ὀξύτης. A sour taste ; sourness ; an acid. [A, 312.]—**A. acceticus.** Glacial acetic acid. [A, 316.]—**A. aceticus crystallinus.** Glacial acetic acid. [B, 101.]—**A. benzoinus.** Benzoic acid. [B, 97.]—**A. boracicus.** Boric acid. [B, 97.]—**A. hydrochlorinicus.** Hydrochloric acid. [B, 101.]—**A. phosphoricus.** Phosphoric acid. [B, 101.]—**A. prussicus.** Hydrocyanic acid. [B, 101.]—**A. succineus, A. succinicus.** Succinic acid. [B, 92, 97.]—**A. sulphuris.** Sulphuric acid. [B, 92, 97.]—**A. sulphuris condensatus, A. sulphuris merus.** Purified and concentrated sulphuric acid. [B, 97.]—**A. tartaricus.** Tartaric acid. [B, 97.]—**A. ventriculi.** Acidity of the stomach. [A, 322.]

ACORACEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-o-ra(ra^3)'se(ke^2)-e(a^3-e^2). Fr., *acoracées.* See AROIDEÆ.

ACORDINA (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}rd'i^{2}n-a^3. Indian tutty, an argillaceous zinc ore found in Persia. [A, 343.]

ACORE (Fr.), n. A^3-kor. A flag, or reed. See ACORUS.—**A. bâtard, A. faux.** See IRIS *pseudacorus.*—**A. odorant, A. roseau, A. vrai** [Fr. Cod.]. The sweet-flag. [B.] See ACORUS *calamus.*—**Alcoolat d'a., Esprit d'a.** A preparation made by macerating 1 part of sweet-flag in 8 parts of 80-per-cent. alcohol for four days, and distilling. [B, 97.]—**Rhizome d'a. vrai** [Fr. Cod.]. The rhizome of the sweet-flag. [B.] See CALAMUS.

ACOREA (Lat.), n. f. A^{2}k(a^{3}k)-o-re(ra)'a^3. From α priv., and κόρη, the pupil. Fr., *acorie.* Absence of the pupil of the eye. [A, 314.]

ACOREÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-o're(ra)-e(a^3-e^2). A tribe of plants of the order *Araceœ* the representative genus of which is *Acorus.* [B.]

ACORES (Lat.), n. m., pl. of *acor* (*q. v.*). A^{2}k(a^{3}k)-o'rez(re^{2}s). See ACHOR.

ACORIA (Lat.), n. f. A^{2}k(a^{3}k)-o'ri^2-a^3. Gr., ἀκορία (from α priv. [1st def.] or intens. [2d def.], and κόρος, satiety). Fr., *acorie.* Ger., *Akorie.* Sp., *acoria.* 1. Moderation in eating. [Hippocrates (A, 311).] 2. An insatiable desire to drink. [Aretæus (A, 311).] Insatiable hunger. [A, 348.]

ACORIN, n. A^{2}k'o-ri^{2}n. Fr., *acorine.* Ger., *Acorin.* It., *acorina.* A bitter principle found in the sweet-flag (*Acorus calamus*) ; a brownish-yellow mass soluble in alcohol and in ether. [B, 10.]

ACORINÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-o-ri(re)'ne(na^3-e^2). Fr., *acorinées.* See AROIDEÆ.

ACORINÉ (Fr.), adj. A^3-ko-re-na. Resembling the *Acorus.* [A, 306.]

ACORINÉES, ACORINES (Fr.), n's pl. A^3-ko-re-na, -ren. The *Acorinœ.* See AROIDEÆ.

ACORITES (Lat.), n. m. A^{2}k(a^{3}k)-o-ri(re)'tez(te^{2}s). Gr., (οἶνος) ἀκορίτης. Ger., *Calmuswein.* Wine flavored with sweet-flag (*Acorus calamus*). [Dioscorides (A, 311).] An old preparation made by infusing for six months 8 oz., each, of sweet-flag and licorice roots in 6 gallons of wine. [A, 336.]

ACORMOSUS (Lat.), adj. A^{2}k(a^{3}k)-o^{2}rm-o'su^{3}s(su^{4}s). Acormous. [A, 322.]

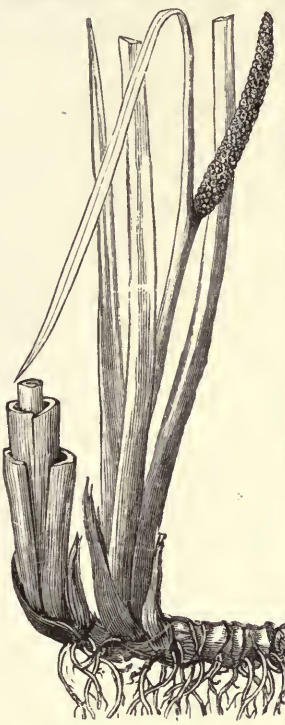
ACORMOUS, adj. A^{2}k-o^{2}rm'u^{3}s. Lat., *acormus, acormosus* (from α priv., and κορμός, the trunk of a tree). Fr., *acorme, acormose.* Ger., *stammlos, stiellos.* Sp., *acórmoso.* In botany, having no stem.

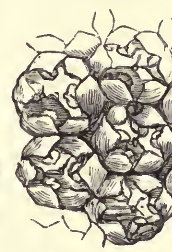
ACORMUS (Lat.), adj. and n. m. A^{2}k(a^{3}k)-o^{2}rm'u^{3}s(u^{4}s). 1. (Adj.) acormous. 2. (N.) an acardiac monster (see ACARDIACUS) consisting of an imperfectly developed head and a rudimentary trunk, the umbilical cord being inserted in the cervical region.

ACORN, n. A'ko^{2}rn. A.-S., *æcern, æceren.* Goth., *akarn.* [A, 302.] Gr., ἀδήν. Lat., *glans.* Fr., *gland.* Ger., *Eichel.* It., *ghianda.* Sp., *bellota.* The nut of the oak-tree ; conoidal in shape, covered with a brown, smooth, coriaceous envelope, and imbedded below in a scaly cupule. It has but one cell and one seed. It contains the bitter principle of the bark (quercin), tannic acid, and a peculiar sugar called quercite. A's have been used as food and as medicine. [B, 5.]—**A. coffee.** Fr., *café de gland.* An infusion of a's, with lemon and orange peel ; used in the diarrhœa of children. [A, 316.]—**Jupiter's a.** The fruit of *Fagus castanea.* [A. 316.]—**Oily a.** The fruit of *Guilandina moringa.* [A, 316.]—**Sardinian a.** The chestnut. [A, 316.]—**Sweet a.** The fruit of *Quercus ballota.* [A, 252.]

ACORNA (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}rn'a^3. See ACARNA.

ACOROID, adj. A^{2}k'o-roid. In botany, resembling the *Acorus.*





ACOROIDEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-o-ro-i^{2}d'e(e^2)-e(a^3-e^2). Fr., *acoroïdées.* Sp., *acoroideas.* See AROIDEÆ.

ACORON, ACOROS (Lat.), n's n. and f. A^{2}k(a^{3}k)'o-ro^{2}n, -ro^{2}s. See ACORUM and ACORUS.

ACORUM (Lat.), n. n. A^{2}k(a^{3}k)'o-ru^{3}m(ru^{4}m). Gr., ἄκορον. The root of the sweet-flag. [Dioscorides (A, 311).] See ACORUS.

ACORUS (Lat.), n. f. A^{2}k(a^{3}k)'o-ru^{3}s(ru^{4}s). Gr., ἄκορος (said to be from α priv., and κόρη, the pupil of the eye, because it was anciently supposed to be useful in eye diseases). Fr., *acore.* Ger., *Calmus.* Sp., *ácoro.* A genus of perennial herbs of the natural order *Aroideœ*, distinguished by the presence of a naked cylindrical spadix originating laterally from a leaf-like scape. [B, 34.] Although the word is fem., it is treated by botanists as masc., as will be seen by the species-names.—**A. adulterinus.** See IRIS *pseudacorus.*—**A. aromaticus.** See *A. calamus.*—**A. asiaticus.** See *A. indicus.*—**A. brasiliensis.** See *A. calamus.*—**A. calamus** [Linnæus]. Fr., *acore vrai* (ou *odorant*, ou *roseau*), *roseau* (ou *canne*) *aromatique, jonc odorant, iris jaune, lis de marais, poivre des abeilles.* Ger., *Calmus* [Ger. Ph.], *Kalmus, Ackermann, Ackerwurz.* It., *calamo aromatico.* Sp., *ácoro verdadero, cálamo aro-*

mático, caña aromática, pimienta de las abejas. Syn.: *Calamus aromaticus.* The sweet-flag; a species growing throughout the United States and in Europe, the thick, running rhizome of which is employed in medicine as an aromatic and carminative. [B, 5.] See CALAMUS. In Turkey the root is candied and used as a preservative against infectious diseases. [Coxe (A, 344).]—**A. falsus.** Fr., *acore bâtard* (ou *faux*). See IRIS *pseudacorus*.—**A. gramineus, A. indicus.** Syn.: *A. asiaticus, radix sanley* (seu *sanlay*). Species (perhaps identical) indigenous to India, China, and Japan, the root-stock of which is much thinner than that of *A. calamus*, but more aromatic. [A, 322, H. Baillon (A, 328).]—**A. odoratus.** See *A. calamus*.—**A. palustris.** See IRIS *pseudacorus*.—**A. terrestris.** A species used by the Chinese as a tonic, stimulant, anti-spasmodic, etc. [A, 261.]—**A. verus.** Fr., *a.-vérus, grand galanga.* Ger., *grosse Galangal-Wurzel.* See *A. calamus*.—**A. vulgaris.** See IRIS *pseudacorus*.—**Radix acori.** The rhizome of *A. calamus*; sweet-flag. [B.]

ACORUS CALAMUS. [A, 260.]
The small figure shows the portion of inflorescence.

ACOS (Lat.), n. m. A(a^3)′ko^{2}s. Gen., *aceos.* Gr., ἄκος. A remedy. [A, 311.]

ACOSMIA (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}z(o^{2}s)′mi^2-a^3. Gr., ἀκοσμία (from α priv., and κόσμος, order, ornament). Fr., *acosmie.* Ger., *Akosmie.* Sp., *acosmia.* 1. Disorder or irregularity, especially of the critical days of a disease. [A, 306.] 2. Ataxia. [A, 322.] 3. Any deformity affecting the regularity of the features. [F. W. Heydenreich (A, 322).] 4. An old term for baldness (bald persons being called ἄκοσμοι, because deprived of their chief ornament). [G, 16.]

ACOSMUS (Lat.), adj. A^{2}k(a^{3}k)-o^{2}z(o^{2}s)′mu^{3}s(mu^{4}s). Gr., ἄκοσμος. Fr., *acosme.* Affected with acosmia (*q. v.*).

ACOSMY, n. A^{2}k-o^{2}z′mi^2. See ACOSMIA.

ACOSTE (Lat.), n. f. A^{2}k(a^{3}k)-o^{2}s′te(ta). Gr., ἀκοστή. An ancient name for barley. [Nicander (A, 311).]

ACOTYLÉ (Fr.), adj. A^3-ko^{2}t-i^{2}l-a. Acotyledonous. [A, 301.]

ACOTYLEDON, n. A^{2}k-o^{2}t-i^{2}l-e′do^{2}n. Lat., *acotyledo* (from α priv., and κοτυληδών, a cup-like depression). Fr., *acotylédone.* Ger., *Akotyledon.* An acotyledonous plant; a cryptogam. [B.] See ACOTYLEDONEÆ.

ACOTYLÉDONE (Fr.), adj. A^3-ko^{2}t-i^{2}l-a-don. Acotyledonous.

ACOTYLEDONEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-o-ti^{2}l(tu^{6}l)-e^{2}d-o′ne-(ne^2)-e(a^3-e^2). Fr., *acotylédones.* Ger., *Acotyledonen.* The acotyledonous plants (acotyledons); A. L. Jussieu's name for one of the three great divisions of the vegetable kingdom, consisting of the single class *Acotylédonie*, i. e., the cryptogams. [B, 38.]

ACOTYLEDONIA (Lat.), n. f. A^{2}k(a^{3}k)-o-ti^{2}l(tu^{6}l)-e^{2}d-o′ni^2-a^3. Fr., *acotylédonie.* [B, 1.] A. L. Jussieu's term for the state of being destitute of cotyledons (said of plants). [A, 306, 321.]

ACOTYLÉDONIE (Fr.), n. A^3-ko^{2}t-i^{2}l-a-do-ne. 1. Acotyledonia (*q. v.*). 2. In Jussieu's classification of plants, a class forming the whole of the grand division *Acotyledoneæ*, or cryptogams. [B, 38.]

ACOTYLEDONOUS, adj. A^{2}k-o^{2}t-i^{2}l-e^{2}d′o^{2}n-u^{3}s. Lat., *acotyledonus.* Fr., *acotylédone, acotylédoné.* Ger., *nacktkeimend, samenlappenlos.* Destitute of cotyledons; a term often applied to the cryptogams. [B.]

ACOTYLEDONS, n. pl. A^{2}k-o-ti^{2}l-e′do^{2}nz. See ACOTYLEDONEÆ.

ACOTYLOPHOROUS, adj. A^{2}k-o^{2}t-i^{2}l-o^{2}f′o-ru^{3}s. Fr., *acotylophore.* Sp., *acotilóforo.* Destitute of suckers (said of a family of worms). [A, 306.]

ACOTYLOUS, adj. A^{2}k-o^{2}t′i^{2}l-u^{3}s. Fr., *acotyle.* Sp., *acotilo.* In zoology, destitute of vertebræ, and having neither a central mouth nor lateral cavities. [A, 306.]

ACOUCHI BALSAM, n. Ger., *Acuchibalsam.* A balsam or resin consisting of the inspissated juice of *Icica heterophylla.* [A, 252.]

ACOUCROBA, n. A Guinea plant which, boiled in wine, is esteemed by the natives as a remedy for small-pox. [A, 344.]

ACOUÉDIN (Fr.), adj. A^3-ku-a-da^{2}n^2. Curative of deafness. [A, 306.] See EAU *acouédine.*

ACOUISTICUS (Lat.), adj. A^{2}k(a^{3}k)-u-i^{2}st′i^{2}k-u^{3}s(u^{4}s). A false spelling of *acousticus.* [A, 322.] See ACOUSTIC.

ACOULIARANNE, n. The Arabic name for the *Euphorbia capitata.* [A, 344.]

ACOUMETER, n. A^{2}k-u′me^{2}t-u^{5}r. Lat., *acoumetrum* (from ἀκούειν, to hear, and μέτρον, a measure). Fr., *acoumètre.* Ger., *Akumeter, Akoumeter, Gehörmesser.* It., *acumetro, misuratore dell' udito.* Sp., *acometro.* An instrument originally devised by Wolke and Itard for measuring the acuteness of hearing. Politzer's a., the most recent, consists of a horizontal steel cylinder, 28 mm. long and 4·5 mm. thick, connected by means of a tightly fitting screw with a vertical vulcanite column. Above the place of attachment of the cylinder, a percussion hammer, which can be turned round its axis, is fastened in an oval orifice of the vulcanite column, and produces the tone by falling on the steel cylinder. As the intensity of the sound depends on the height from which the hammer falls, in order to produce in all instruments an equal height, a small piece of vulcanite, furnished with a soft-rubber plate, is fixed at the posterior periphery of the column as a check, on which the posterior (short) arm of the hammer is pressed. At either end of the column there is a flat semicircle, for grasping the instrument with two fingers. Below the upper semicircle, parallel with the axis of the percussion hammer, there is a ring on the vulcanite column, into which a pin, to which a round metal plate is attached, can be inserted. This is for testing the conduction of the cranial bones, by bringing the metal plate into contact with the temple or with the mastoid process, while the meatuses are closed. [F.]

POLITZER'S ACOUMETER.

ACOUMETRY, n. A^{2}k-u′me^{2}t-ri^2. Measurement of the acuteness of hearing.

ACOUOMETER, n. A^{2}k-u-o^{2}m′e^{2}t-u^{5}r. See ACOUMETER.

ACOUOPHONIA (Lat.), n. f. A^{2}k(a^{3}k)-u-o-fon′i^2-a^3. From ἀκούειν, to hear, and φωνή, sound. See *Auscultatory* PERCUSSION.

ACOUOXYLON (Lat.), n. n. A^{2}k(a^{3}k)-u-o^{2}x′i^{2}l(u^{6}l)-o^{2}n. From ἀκούειν, to hear, and ξύλον, wood. Ger., *Hörholz.* It., *acuoxilon.* A stethoscope devised by P. Niemeyer, being a simple solid cylinder of well-seasoned pine. [A, 314.]

ACOUPHONIA (Lat.), n. f. See ACOUOPHONIA.

ACOUROA, n. Fr., *dartrier.* A Guiana tree, the seeds of which, beaten up with lard, are used as a remedy for skin diseases, especially the dartrous. [A, 306.]

ACOUSIA (Lat.), n. f. A^{2}k(a^{3}k)-u′zi^2(si^2)-a^3. Gr., ἀκουσία. Involuntary action. [Sophocles (A, 311).]

ACOUSMA (Lat.), n. n. A^{2}k(a^{3}k)-uz(us)′ma^3. Gr., ἄκουσμα, anything heard. Fr., *acousmate.* A depraved condition of the hearing in which imaginary sounds are heard. [F.]

ACOUSMETRIC, ACOUSMOMETRIC, adj's. Fr., *acousmétrique, acousmométrique.* Relating to the sense of hearing or to the power of perceiving the relative distance of sounds. [Récamier (A, 306, 316).]

ACOUSTIC, adj. A^{2}k-ust′i^{2}k. Gr., ἀκουστικός. Lat., *acousticus.* Fr., *acoustique.* Ger., *akustisch.* It., *acustico.* Sp., *acústico.* Syn.: *auditory.* 1. Relating to sound or to hearing. 2. Having the effect of improving the hearing (said of mechanical appliances and formerly of drugs). [A, 306.] See *A.* CENTRE, *A.* DUCT, *A.* FOCUS, *A.* NERVE, and *A.* PICTURE.

ACOUSTICA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ust′i^{2}k-a^3. Remedies for deafness. [A, 316.]

ACOUSTICIAN, n. A^{2}k-ust′i^{2}sh′a^{2}n. An investigator of acoustics. [A, 258.]

ACOUSTICO-MALLÆUS (Lat.), n. m. A^{2}k(a^{3}k)-ust″i^{2}k-o-ma^{2}l(ma^{3}l)-le′(la^3′e^2)-u^{3}s(u^{4}s). Fr., *acoustico-malléen.* Ger., *grosser Erschlaffer des Paukenfelles.* Chaussier's name for a small, indistinct muscle extending from the bony groove which receives the membrana tympani to the handle of the malleus. [A, 320.]

ACOUSTICS, n. A^{2}k-ust′i^{2}ks. Fr., *acoustique.* Ger., *Akustik, Schalllehre, Gehörkunde.* It., *acustica.* Sp., *acústica.* The science of sound, or of hearing, including diacoustics and catacoustics (*q. v.*). [B, F.]

ACQUA (It.), n. A^{3}k′kwa^3. Water; in pharmacy, a distilled water. [B.]—**A. acetosa.** The name of three springs in Italy: 1. An alkaline chalybeate spring near Rome, containing sodium chloride and sulphate, calcium sulphate and carbonate, iron oxide, and a large amount of carbonic acid; used as an aperient tonic and in mucous diarrhœa. 2. An alkaline chalybeate spring near Baccano, not far from the Lago Bracciano, containing free carbonic acid; used in anæmia. 3. A carbonated alkaline saline spring near Capronica. [A, 316.]—**A. acidola.** An alkaline chalybeate spring in Italy, near the baths of Montolceto, of the temperature of 22° C.

(71·6° F.), containing calcium, magnesium, and iron carbonates, carbonic acid, and traces of hydrogen sulphide. [A, 316.]—**A. acidula.** 1. Carbonic-acid water. [A, 314.] 2. A cold ferruginous spring in Italy, near Viterbo; used for anæmia and debility. [A, 321.]—**A. acustica di Ludwig.** See Aqua *acoustica Ludovici.*—**A. aereata.** Carbonic-acid water. [A, 314.]—**A. aereata ossigenata.** Water charged with nitrogen monoxide (laughing gas). [A, 352.]—**A. africana.** See *A. d'Egitto.*—**A. Albule.** A cold spring in Italy, near Tivoli, containing calcium bicarbonate and sulphate and an abundance of carbonic acid; the water is drank and used as baths for urinary and catarrhal affections and inveterate syphilis. [A, 321.]—**A. albuminosa.** See Eau *albumineuse.*—**A. alcalina gazosa.** See Aqua *alcalina effervescens.*—**A. alle gambe.** Grease (a disease of horses). [A, 314.] See Eaux *aux jambes.*—**A. alle gambe vaccinogene.** Horse-pox. [A, 314.]—**A. alluminosa.** A solution of 1 part of alum in 100 parts of water. [A, 314.]—**A. alluminosa composta.** A solution of 30 parts, each, of alum and sulphate of iron in 1,500 of water. [A, 314.]—**A. alluminosa di Falloppio.** See *Aluminous* solution *of Fallopius.*—**A. amara.** 1. Bitter water. [A, 314.] See Friedrichshall. 2. A mixture made by adding 5 parts, each, of solution of ammonium carbonate and dilute sulphuric acid to a solution of 120 of magnesium sulphate in 480 of water. [A, 352.]—**A. angelica.** A mild purgative consisting of 8 parts of potassium bitartrate, 60 of manna, 250 of water, and 15 of lemon-juice, clarified with white of egg, and with the addition of a little orange-peel. [A, 314.]—**A. anhaltina.** See Aqua *anhaltina.*—**A. anodina di Praga.** 1. Aqua pragensis. 2. A liniment of 180 parts of alcoholic ammonia, 30 of essence of saffron, and 2 of oil of lavender; used for rheumatic pains. [A, 314.]—**A. antiblennorragica.** A clear liquid, of an unpleasant smell and a spirituous, styptic taste, made by distilling a mixture of mint, dittany, *Iris florentina*, rue, and lettuce, each, 7 parts, turpentine 100, and white wine 650, until three quarters of the amount are obtained; used internally and locally in the late stages of blennorrhœa. [A, 314.]—**A. antiepilettica di Langio.** See Aqua *epileptica Langii.*—**A. antierpetica di Luynes.** See *A. del Cardinale di Luynes.*—**A. antiottalmica di Loche.** A lotion for chronic ophthalmia, epiphora, etc.; a mixture of 96 parts, each, of melilotus-water and distilled water, 4 of alcohol, 1, each, of alum and sulphate of zinc, and 0·60 of tincture of aloes. [A, 314, 352.]—**A. antipediculare di Cadet.** A mixture of 70 parts of rose-water and 10 of *a. mercuriale* (*q. v.*); used for killing lice. [A, 314.]—**A. antipestilenziale della scala.** A limpid, reddish liquid, of a pleasant smell and an acrid and bitter taste, used for weakness of digestion and as a preservative against infectious diseases; containing 3 handfuls, each, of rosemary, spikenard, rue, mint, absinthium, and horseradish, 60 grammes of angelica root, 120 of zedoary, 3,200 of alcohol, and (added after distillation) 160 of red sandal wood, 40 of camphor, and 32 of hard Peruvian balsam. [A, 314.]—**A. antipsorica di Ranque.** A lotion consisting of extract of poppy dissolved in decoction of stavesacre. [A, 314.]—**A. antiputrida di Beaufort.** A mineral lemonade made with sulphuric acid. [A, 314.]—**A. antisterica.** A mixture of 2 parts of essence of mint, 1 part of essence of tansy, and 288 parts of dilute alcohol, with the addition, after distillation, of a few drops of essence of cedar, tincture of vanilla, and essence of peppermint. [A, 352.]—**A. antisterica con castoro.** A mixture made by distilling 16 parts of castoreum, 4 of lavender flowers, 3 of cinnamon, 2, each, of sage and rosemary, and 1, each, of mace and cloves in 250 of alcohol. [A, 352.] Cf. Aqua *anti-hysterica cum castoreo.*—**A. antisterica di Poterie.** A milky, aromatic, bitter liquid made from 107 grammes of valerian root, 3 handfuls, each, of absinthium, mint, and marjoram, 6,500 grammes of white wine, 27, each, of galanga, ginger, long pepper, opium, and camphor, and 2,000 of alcohol; used in hysteria, hypochondriasis, etc. [A, 314.]—**A. antisterica di S. Maria Novella.** See *Aqua* melissæ *composita.*—**A. antisterica fetida.** See Aqua *fœtida pragensis.*—**A. ardente.** Brandy.—**A. argenta.** Mercury. [A, 314.]—**A. argentina.** A solution of silver in nitric acid, and one of potassium cyanide in water; used, mixed with powdered chalk, for rapid silver-plating. [A, 314.]—**A. aromatica, A. aromatica spiritosa.** See *Aqua* melissæ *composita.*—**A. arsenicale antipediculare.** A mixture of 100 grammes of arsenious acid, 2 kilogrammes of green soap, and 15 litres of water; applied to sheep to kill lice. [Clater (A, 314).]—**A. arzente.** Alcohol. [A, 352.]—**A. benedetta della carità.** A solution of 0·30 gramme of tartar emetic in 276 grammes of water; taken in two doses for the relief of lead colic. [A, 314.]—**A. benedetta di Ruland.** Wine of antimony. [A, 314.]—**A. bianca.** See *Liquor* plumbi *subacetatis dilutus.*—**A. Bolle.** A cold carbonated alkaline chalybeate spring on the Lanzo, in Tuscany; used in urinary concretions. [A, 316.]—**A. Buja.** A disused spring near Pietramala, in Italy, which dries up in summer. The water is agitated by a continual disengagement of hydrogen. [A, 344.]—**A. cefalica.** See *Aqua* melissæ *composita.*—**A. celeste.** See Aqua *cœlestis.*—**A. chinese.** See *A. d'Egitto.*—**A. cotta.** 1. A hot spring near Ascoli, in Italy, containing sulphur and sodium chloride; used in diseases of the skin and scrofula. 2. A colder spring, near Voltri, containing sodium sulphide; used in the same diseases. [A, 321.]—**A. d'Alibour.** See Collirio *di Saint-Jermernon.*—**A. d'Anhalt.** See Aqua *anhaltina.*—**A. d'Armagnac.** See *A. di Bonferme.*—**A. d'Egitto.** A solution of silver nitrate, used for dyeing the hair. [A, 314.]—**A. degli Inglesi.** See Aqua *natro-efferves-cens.*—**A. dei Carmelitani.** See *Aqua* melissæ *composita.*—**A. dei metalli.** Mercury. [A, 314.]—**A. del Cardinale di Luynes.** A mixture of 250 grammes of rose-water, 6 of corrosive sublimate, 15 of carbonate of lead, and 12 of alum, with the white of an egg; used as an application for herpes. [A, 314.]—**A. del Landini.** See Alcoolature *vulnéraire.*—**A. della regina d'Ungheria.** A preparation made by distilling 1 part of fresh rosemary and 2 parts of 32-per-cent. alcohol. [A, 314.]—**A. delle archibugiate.** See Alcoolature *vulnéraire.*—**A. del Pagliari.** See *A. di Pagliari.*—**A. del Quercetano.** So called from the Latinized name of Duchesne. [a, 6.] A liquid obtained by distilling over a sand-bath a mixture of the juices of garlic, radishes, onions, parietaria, and cedar; formerly esteemed in the treatment of lithiasis. [A, 314.]—**A. dentifricia.** A tonic dentifrice containing 50 parts of tincture of cinchona, 10 of tincture of catechu, 30 of spirit of cochlearia, 10 of sodium hypochlorite, and 2 of essence of cloves. [A, 314.]—**A. di archibugiate.** See Alcoolature *vulnéraire.*—**A. di Belloste.** An old resolvent preparation made of equal parts of hydrochloric acid, brandy, and saffron, with or without the addition of water. [A, 314.]—**A. di Binelli.** A hæmostatic, supposed to be a solution of creasote. [A, 314.]—**A. di bolo.** A liquid obtained by shaking a bolus of tartrate of iron and potassium in water; used as a wash for wounds and contusions. [A, 314.]—**A. di Bonferme.** Syn.: *tintura aromatica, essenza cefalica.* A preparation made by digesting 16 parts, each, of nutmeg and cloves, and 12, each, of cinnamon and broom flowers in 276 of alcohol for eight days at 85° C. (185° F.), expressing, and filtering. [A, 314.]—**A. di Botot.** See Eau *dentifrice de Botot.*—**A. di Clauder.** See *A. di* fuliggine *composta.*—**A. di Colonia.** Cologne water. [A, 352.] See Spiritus *odoratus.*—**A. di Condillac.** See Condillac.—**A. di Dardel.** An imitation of the *a. di mellisa.* [A, 314.] See *Aqua* melissæ *composita.*—**A. d'idratazione.** See Water *of hydration.*—**A. di Falconieri.** A solution of potassium carbonate; reputed to be an antilithic. [A, 314.]—**A. di Fra Ilarione.** See Alcoolature *vulnéraire.*—**A. di Giambattista la Porta.** A tonic mouth-wash containing a great number of ingredients; a red liquid, of an aromatic odor and bitterish taste. [A, 314.]—**A. di giovinezza.** Water of youth; a liquid credited with the power of renewing youth. [A, 314.]—**A. di Gondran.** A mixture of 4 grammes of petroleum and 120 of hydrochloric acid; to be added to the water of a partial bath in the treatment of rheumatism. [A, 314.]—**A. di Goulard.** See *Liquor* plumbi subacetatis *dilutus.*—**A. di Guerlain.** A lotion containing corrosive sublimate, cherry-laurel water, lead water, tincture of benzoin, and alcohol. [A, 314.]—**A. di Hepp.** A slight modification of the *a. di Pagliari* (*q. v.*). [A, 314.]—**A. di Husson.** See Eau *médicinale d'Husson.*—**A. di Javelle.** See *Javelle* water.—**A. di Labarraque.** See *Liquor* sodæ chloratæ.—**A. di lavanda.** 1. A cosmetic mixture of essence of lavender, 60 parts; tincture of amber, 30; cologne water, 500; and alcohol, 1,000. [A, 314.] 2. A distilled water of lavender-tops. [B. 10.]—**A. di Léchelle.** See Eau *de Léchelle.*—**A. di magnanimità.** See Aqua *magnanimitatis simplex.*—**A. di mare.** Sea-water. [A, 314.]—**A. di Marte.** See *A. di bolo.*—**A. di Mettemberg.** A solution of 1·80 gramme of corrosive sublimate in 320 grammes of distilled water, with the addition of 60 of *alcoolature vulnéraire* (*q. v.*) and 1·80 of nitric ether; used against the itch. [A, 314.]—**A. di Monsel.** See *Monsel's* solution.—**A. di Monterossi.** See *A. stagnotica di Monterossi.*—**A. di Napoli.** See *A. tofana.*—**A. di Neljubin.** See Eau *hémostatique de Neljubin.*—**A. di Pagliari.** A styptic made by boiling 8 parts of benzoin and 16 of alum in 160 of water for six hours. [A, 314.]—**A. di Perugia.** See *A. tofana.*—**A. di Praga.** See Aqua *fœtida pragensis.*—**A. di Prassuvin.** A watery solution of tartrate of potassium and mercury. [A, 314.]—**A. di Proserpina.** See *A. d'Egitto.*—**A. di Rabel.** Rabel water. [B.] See Mixtura *sulfurica acida.*—**A. di Renaison.** See Renaison.—**A. di Royer.** A hæmostatic containing 30 parts of oil of tar, 1,000 of peppermint-water, and 4,000 of distilled water. [A, 314.]—**A. di Ruland benedetta.** See Aqua *benedicta Rulandi.*—**A. di San Giovanni.** An aqueous solution of copper and zinc sulphates, with the addition of camphorated spirit and tincture of saffron. [A, 314.]—**A. di San Nicola alla Dogana.** An anthelminthic consisting of mint-water with enough nitric acid to give it a pleasant sour taste. [A, 314.]—**A. di Schultz.** A hæmostatic containing 8 grammes of empyreumatic oil of tobacco, 12 drops of Dippel's animal oil, and 250 grammes of distilled water. [A, 314.]—**A. di Sedlitz artificiale.** See Eau *saline purgative.*—**A. di Seltz artificiale.** See Eau *de Seltz artificielle.*—**A. di Smith.** See *A. di lavanda.*—**A. dissolvente.** An old term for nitric acid. [A, 314.]—**A. distillata.** Distilled water; in pharmacy, a distilled water. [B.]—**A. di Theden.** See Aqua *traumatica vegeto-mineralis Thedeni.*—**A. di Tisserand.** See Eau *hémostatique de Tisserand.*—**A. di Trevez.** See *A. fondente di Trevez.*—**A. di Villate.** A turbid astringent and escharotic mixture of 51 parts, each, of copper and zinc sulphates, 798 of vinegar, and 100 of liquor plumbi subacetatis. [A, 352.]—**A. divina.** See Collyre *de sels fondus.*—**A. di violette.** An alcoholic preparation distilled from the *Iris florentina*; so called from its odor of violets. [A, 314.]—**A. di vipere.** An old remedy for scurvy; made by distilling a mixture of beccabunga, nasturtion, skinned vipers, and water. [A, 314.]—**A. dolce.** Soft water. [B.]—**A. dura.** Hard water. [B.]—**A. epatica.** Brugnatelli's variety of the *aqua hepatica* (*q. v.*, under Aqua). [A, 314.]—**A. essenziale.** An essential water; a preparation made by distilling a succulent plant without the addition of water. [B, 10.]—**A. eterea.** A mixture of 1 part of sulphuric ether and 10 parts of distilled water; used as an antispasmodic. [A, 314.]—**A. eterea canforata.** A solution of 1 part of camphor in 3 parts of sulphuric ether, with the addition of 56 of water. [A, 314.]—**A. etiopica.** See *A. d'Egitto.*—**A. fagedenica, A. fagedenica gialla, A. fagedenica nera.** See *Lotio* hydrargyri *flava* and *Lotio* hydrargyri *nigra.*—**A. ferruginosa gazosa.** See Eau *ferrée gazeuse.*—**A. fondente di Trevez.** A solution of 30 grammes of crystallized sodium sulphate, 1·20 of potassium acetate, 0·90 of potassium nitrate, and 0·03 of tartarized antimony in a kilogramme of water. [A, 314.]—**A. forte.** Nitric acid. [A, 352.]—**A. gazosa semplice.** See Aqua *acidula simplicior.*—**A. gengivale.** See Aqua *ad gingivas.*—**A. greca.** See *A. d'Egitto.*—**A. idrosolforata.** Hydrosulphureted water; water charged with hydrogen sulphide. [B.]—**A. igienica.** Hygienic water; a solution of 15 grammes of alum, 1 gramme of sulphate of iron, and 1 of sulphate of copper in a litre of water, with the addition of some aromatic; used as an injection for leucorrhœa and metrorrhagia. [A, 314.]—**A. igienica di Memphis.** See Eau *de Léchelle.*—**A. imperiale.** A mixture of 10 parts of tartrate of potassium and

boron (soluble cream tartar), 375 of water, 15 of syrup, and 5 of essence of lemon. [A, 314.]—**A. iodo-ferrata.** A mixture of 15 grammes of tincture of iodine and 0·05 gramme of tannin, to which are added 250 of distilled water and 4 of ammonio-ferric or potassio-ferric tartrate; used as a substitute for iodide of iron. [A, 314.]—**A. lanfa.** Orange-flower water. [A, 352.]—**A. lassativa di Vienna.** See INFUSUM *laxativum vienneuse.*—**A. madre.** See *Mother* LIQUOR.—**A. magnesiaca, A. magnesiaca aerata.** See EAU *magnésienne.*—**A. marina.** Sea-water. [B.]—**A. mercuriale.** Mercury-water; water that has been boiled for two hours with half its weight of mercury. [B, 10.]—**A. mercuriale calcare.** See AQUA *phagedænica.*—**A. miele.** See AGUAMIEL.—**A. mulsa.** See HYDROMEL.—**A. nanfa.** Orange-flower water. [B.]—**A. nanna.** See *A. tofana.*—**A. odontalgica O'Meara.** A tincture made with 4 grammes of *Triticum repens*, 15 of pyrethrum, 30 of cloves, 0·60, each, of iris, coriander, anchusa, and essence of mint, 0·30, each, of essence of bergamot and essence of cedar, 160 of creasote, and 60 of 90-per-cent. alcohol. [A, 314.]—**A. oftalmica di Yvel.** A collyrium made by digesting 8 parts of zinc sulphate, 3 of copper sulphate, and 9, each, of saffron and camphor in 1,000 of water. [A, 314.]—**A. ossigenata.** 1. Hydrogen peroxide. 2. A name formerly applied to a preparation of nitric acid used in the treatment of syphilis. [A, 314.]—**A. ozonizzante.** See EAU *ozonisante.*—**A. panata.** See *Toast*-WATER.—**A. per la bocca.** Compound spirit of pyrethrum.—**A. picea.** Tar-water.—**A. plumbica.** See *Liquor* PLUMBI SUBACETATIS *dilutus.*—**A. prima.** A name given by Albertus Magnus to nitric acid. [A, 314.]—**A. purgativa salina.** See EAU *saline purgative.*—**A. putrillica.** See *A. saturnina.*—**A. Puzzolente.** A saline, sulphurous spring in Italy, near Livorno; used in scabies, herpes, psoriasis, and rheumatism. [A, 316.]—**A. ragia.** Oil of turpentine. [A, 352.]—**A. Raineriana.** A warm sulphurous spring in Venetia, Italy, near the Lake of Arqua; used in skin diseases, scrofula, and digestive torpor. [A, 316.]—**A. regia.** Nitrohydrochloric acid. [A, 314.]—**A. romana.** See ALCOOLATURE *vulnéraire.*—**A. rossa dell' Ospitale di S. Luigi.** See EAU *rouge d'Alibert.*—**A. salina acidula.** See EAU *acidule saline.*—**A. sans pareille.** See EAU *sans pareille.*—**A. Santa.** 1. A mineral spring near Ascoli, Italy, containing sodium sulphide; used internally and in the form of baths for scrofulous diseases of the glands and joints. [A, 316.] 2. A hot spring, containing sulphur and lime, near Voltri, in Piedmont; used in the form of baths for herpetic eruptions and scrofula. [A, 316.]—**A. Santa di Buyhuto.** A spring of cold carbonated bitter water, springing from limestone, near Palermo, Sicily; purgative. [A, 316.] A 1-to-49 solution of subacetate of lead in distilled water. [A, 352.]—**A. sclopetaria.** See AQUA *vulneraria.*—**A. sclopetaria spiritosa.** See SPIRITUS *vulnerarius.*—**A. sedativa, A. sedativa di Raspail, A. sedativa fortissima, A. sedativa media.** See EAU *sédative de Raspail.*—**A. senza pari.** See EAU *sans pareille.*—**A. sodica.** See AQUA *alcalina effervescens.*—**A. solforata.** See EAU *sulfurée.*—**A. spiritosa.** See ALCOOLAT.—**A. stagnotica di Monterossi.** A hæmostatic water distilled from various aromatic and astringent plants, with the addition of pitch and white agaric. [A, 314.]—**A. stitica clementina.** 150 parts, each, of sodium chloride and potassium subcarbonate and 100 of cream tartar are dissolved in a mixture of the fresh juices of 150, each, of betonica, *Achillea millefolium*, origanum, pimpinella, *Sanicula europæa*, *Sedum telephium*, and verbena, and 75 of *Teucrium marum*; a mixture of 37 of socotrine aloes and 300 of dilute acetic acid is added, and the whole is macerated for three days in a sealed retort, and then distilled; the residue is dried, powdered, and macerated for three days in the liquid obtained by distillation; this process is then repeated twice more, and the liquid obtained by the third distillation is preserved in a well-stoppered bottle. [A, 352.]—**A. stitica di Loff.** A watery solution of perchloride of iron. [A, 314.]—**A. terlacale.** See *Spiritus* ANGELICÆ *compositus.*—**A. Tofana.** Syn.: *a.* (o *acquetta*) *di Napoli*, *a. di Perugia* (o *della Tofa*), *manna di S. Nicola di Bari.* A poison invented by a woman named Tofana, and extensively used in the sixteenth century; a clear liquid sold in little bottles labeled "Manna di S. Nicola di Bari," and bearing the image of the saint. The fatal dose was from 4 to 6 drops. Its real composition is unknown, but it is supposed to have been an arsenical preparation. According to Garelli, physician to Charles VI, of Austria, it was a solution of arsenious acid in distilled cymbalaria-water, with the addition of an alcoholic preparation of cantharis. [A, 314; Chapuis, "Lyon méd.," May 28, 1882, p. 109 (H).]—**A. traumatica.** See AQUA *vulneraria.*—**A. turca.** A mixture of 10 parts of sulphuric ether and 100 of distilled water; used as an antispasmodic. [A, 314.]—**A. vegeto-minerale, A. vegeto-minerale spiritosa.** See *Liquor* PLUMBI *subacetatis dilutus.*—**A. verde di Desault.** A detergent solution of 0·10 gramme of corrosive sublimate and 0·30 of copper sulphate in 300 grammes of plantain-water. [A, 314.]—**A. verde di Hartmann.** A wash for scorbutic ulcers; made by boiling a handful, each, of the leaves of *Hypericum perforatum*, rosemary, rue, and sage, 3 grammes, each, of savine tops and elder flowers, 50 of honey of roses, and 25 of flowers of sulphur in 600 of white wine and water, and adding 25, each, of alum and verdigris. [A, 314.]—**A. verginale.** Syn.: *iniezione per le donne.* A vaginal injection containing 5 parts, each, of lead acetate and zinc sulphate, 60 of cologne, and 125 of distilled water. [A, 314.]—**A. vulneraria.** See ALCOOLATURE *vulnéraire.*—**A. vulneraria cremeuse.** A mixture of 4 parts of dilute sulphuric acid, and 24, each, of alcohol and acetic acid. [A, 352.]—**A. vulneraria di Theden.** See AQUA *traumatica vegeto-mineralis Thedeni.*—**A. vulneraria rossa.** See ALCOOLATURE *vulnéraire.*—**A. vulneraria spiritosa.** See ALCOOLAT *vulnéraire.*—**A. zeffirina.** An astringent and resolvent collyrium containing 300 grammes of lime-water, 1 gramme of ammonium chloride, and 0·30 of verdigris. [A, 314.]

ACQUAVITA, ACQUAVITE (It.), n's. A^{3}k-kwa^3-ve'ta^3, -ta. Brandy.—**A. tedesca.** See *Teinture de* JALAP *composée.*

ACQUETTA (It.), n. A^{3}k-kwe^{2}t'ta^3. Dim. of *acqua.* See ACQUA *Tofana.*—**A. della Tofa, A. di Napoli, A. di Perugia.** Acqua Tofana.

ACQUI (It.), n. A^{3}k'kwe. Lat., *Aquæ Statiellæ.* A village in the Italian province of Alessandria, containing sulphurous springs of a temperature of from 46° to 75° C. (115° to 167° F.), the mineral constituents of which are chiefly calcium sulphide, sodium chloride, calcium chloride, and silica; used for chronic skin diseases, paralyses, gout, and rheumatism. [A, 304.]

ACQUISITUS (Lat.), adj. A^{2}k(a^{3}k)-kwi^2-zi(se)'tu^{3}s(tu^{4}s). Perf. part. of *acquirire*, to acquire. Fr., *acquis.* Ger., *erworben.* It., *acquisito.* Sp., *adquirido.* Acquired, as opposed to inherited and congenital (said of diseases).

ACRACHOLIA (Lat.), n. f. A^{2}k(a^{3}k)-ra^2-ko(ch^{2}o^2)'li^2-a^3. Gr., ἀκραχολία. Passionateness; a burst of passion. [Hippocrates (A, 311).]

ACRACONITINE, n. A^{2}k-ra^{2}k-o^{2}n'i^{2}t-en. From ἄκρος, extreme (on account of its virulence), and *aconitine* (*q. v.*). Fr., *acraconitine.* Ger., *Acraconitin.* Nepaline, napelline, or pseudaconitine. [B, 49.]

ACRACY, n. A^{2}k'ra^{2}s-i^2. See ACRASIA.

ACRÆA (Lat.), n. f. A^{2}k(a^{3}k)-re'(ra^3'e^2)-a^3. A genus of Central American terrestrial orchids. [A, 252.]

ACRÆPALA (Lat.), n. n. pl. A^{2}k(a^{3}k)-re^{2}p'(ra^3'e^{2}p)-a^3-la^3. Gr., ἀκραίπαλα (from α priv., and κραιπάλη, the effects of a debauch). Fr., *acraïpales.* Sp., *acraipalos.* 1. Wines that do not cause nausea. 2. Remedies that relieve nausea from a debauch. [Dioscorides (A, 311).]

ACRAI (Ar.), n. Morbid sexual excitement; a sort of satyriasis. [Avicenna (A, 325).]

ACRAIPALA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ra^3-i^{2}p'a^3-la^3. See ACRÆPALA.

ACRALDEHYDE, n. A^{2}k-ra^{2}l'de-hid. From ἄκρος, extreme, and *aldehyde.* Fr., *acraldéhyde.* Ger., *Acraldehyd.* An old name for aldol, on the supposition that it was a true polymer of aldehyde. [B, 2.]

ACRALEA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ra(ra^3)'le(le^2)-a^3. Sp., *acrálea.* See ACROCOLIA.

ACRAMPHIBRYON (Lat.), n. n. A^{2}k(a^{3}k)-ra^{2}m(ra^{3}m)-fi^{2}b'-ri^2(ru^6)-o^{2}n. From ἄκρος, topmost, ἀμφί, on both sides, and βρύειν, to swell or burst forth. Fr., *acramphibryé*, *acramphigène.* Ger., *Endumsprosser.* A plant that grows both at the apex and at the periphery of the axis. In Endlicher's classification, the *Acramphibrya* form a grand subdivision, including all dicotyledonous plants, comprising the cohorts *Monochlamydeæ* (with the gymnosperms), *Gamopetalæ*, and *Dialypetalæ.* [B, 48, 104.]

ACRAMPHIGÈNE (Fr.), n. A^3-kra^{3}m-fi^2-zhe^{2}n. See ACRAMPHIBRYON.

ACRANIA (Lat.), n. f. A^{2}k(a^{3}k)-ra(ra^3)'ni^2-a^3. From α priv., and κρανίον, the cranium. Fr., *acrânie.* Ger., *Akranie*, *Schädelmangel.* It., Sp., *acrania.* Syn.: *defectus cranii*, *microcephalia*, *hemicephalia.* A monstrosity characterized by entire or partial absence of the cranium. [A, 306.]

ACRANIA (Lat.), n. n. pl. Pronunc. and deriv. the same. Fr., *acrâniens.* Haeckel's name for acranial vertebrates, represented by *Amphioxus.* [A, 258.]

ACRANIAL, adj. A^{2}k-ra'ni^2-a^{2}l. Lat., *acranius*, *acranicus.* Fr., *acrâne.* Ger., *schädellos.* Sp., *acráneo.* Destitute of the skull. [A, 320.]

ACRANICUS (Lat.), adj. A^{2}k(a^{3}k)-ra^{2}n(ra^{3}n)'i^{2}k-u^{3}s(u^{4}s). Acranial.

ACRÂNIENS (Fr.), n. pl. A^3-kra^{3}n-i^2-a^{3}n^2. See ACRANIA, pl.

ACRASIA (Lat.), n. f. A^{2}k(a^{3}k)-ra(ra^3)'zi^2(si^2)-a^3. From α priv., and κρᾶσις, moderation, or a mixing (1st and 2d def's); ἀκρασία (= ἀκράτεια), debility (3d def.). Fr., *acrasie.* Ger., *Akrasie.* Sp., *acrasia*, *acracia.* 1. Intemperance. [A, 306.] 2. Any dyscrasia. [A, 305.] 3. Debility, especially impotence. [A, 311.] In this sense it is synonymous with *acratia.*

ACRASIEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-ra(ra^3)-zi(se)'e(e^2)-e(a^3-e^2). Fr., *acrasiées.* Ger., *Acrasieen.* Van Tieghem's name for a division of *Fungi* related to the *Myxomycetes*, but distinguished from the latter by their swarm-spores not fusing to form a plasmodium, but remaining distinct. They are found in animal excrement and in decaying vegetable tissue. [B, 54.]

ACRASIS (Lat.), n. f. A^{2}k(a^{3}k)'ra(ra^3)-si^{2}s. A genus of *Fungi* belonging to the *Acrasieæ.* [B, 54.]

ACRASY, n. A^{2}k'ra-zi^2. See ACRASIA.

ACRATEIA (Lat.), n. f. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-i(a)'a^3. Gr., ἀκράτεια. See ACRATIA.

ACRATES (Lat.), adj. A^{2}k(a^{3}k)'ra^{2}t(ra^{3}t)-ez(e^{2}s). Gr., ἀκρατής. Weak, debilitated. [A, 322.]

ACRATIA (Lat.), n. f. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-i(e)'a^3. Gr., ἀκράτεια, ἀκρατία (from α priv., and κράτος, force). Fr., *acratie.* Ger., *Akratie.* 1. Loss of strength, impotence. [A, 320.] 2. Incontinence. [A, 322.] 3. Intemperance. [A, 322.]

ACRATISMA (Lat.), n. n. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-i^{2}z(i^{2}s)'ma^3. Gen., *acratis'matos* (*-tis*). Gr., ἀκράτισμα (from ἀκρατίζεσθαι, to drink pure wine). Fr., *acratisme.* Sp., *acratismo.* An old name for breakfast (because this meal consisted of bread dipped in wine). [A, 343.]

ACRATISMUS (Lat.), n. m. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-i^{2}z(i^{2}s)'mu^{3}s-(mu^{4}s). See ACRATISMA.

ACRATOCHOLUS (Lat.), adj. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-o^{2}k(o^{2}ch^2)'o-(o^2)-lu^{3}s(lu^{4}s). Gr., ἀκρατόχολος (from ἄκρατος, unmixed, and χολή, bile). "Caused by sheer bile." [Hippocrates (A, 311).]

ACRATOMELI (Lat.), n. n. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-o^{2}m'e(e^2)-li(le). Gen., *acratomelitos.* From ἄκρατον, pure wine, and μέλι, honey. A mixture of wine and honey. [A, 334.]

ACRATON (Lat.), n. n. A^{2}k(a^{3}k)'ra^{2}t(ra^{3}t)-o^{2}n. See ACRATUM.

ACRATOPEGÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-o-pe(pa)'-je(ga^3-e^2). From α priv., κράτος, strength, and πηγή, a spring. "Mineral waters having no marked chemical qualities." [A, 313, 316.]

ACRATOPOSIA (Lat.), n. f. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-o-po'zi^2(si^2)-a^3. Gr., ἀκρατοποσία (from ἄκρατος, unmixed, and πόσις, a drink. Sp., *acratoposia.* The drinking of pure wine. [Hippocrates (A, 311).]

ACRATOS (Lat.), adj. A^{2}k(a^{3}k)-ra(ra^3)'to^{2}s. See ACRATUS.

ACRATOUS, adj. A^{2}k-ra'tu^{3}s. See ACRATUS.

ACRATUM (Lat.), n. n. A^{2}k(a^{3}k)-ra(ra^3)'tu^{3}m(tu^{4}m). Neut. of *acratus* (*vinum* understood). Gr., ἄκρατον, ἄκρατος οἶνος. Undiluted wine. [A, 311.]

ACRATURESIS (Lat.), n. f. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-u^2(u)-re(ra)'-si^{2}s. Gen., *acratureseos.* From ἀκρατεία, want of strength, and οὔρησις, urination. Inability to urinate from paralysis of the bladder. [A, 313, 316.]

ACRATUS (Lat.), adj. A^{2}k(a^{3}k)-ra(ra^3)'tu^{3}s(tu^{4}s). Gr., ἄκρατος (from α priv., and κεραννύναι, to mix. It., *acrato.* Unmixed, pure (said of the humors and of potable liquids). [A, 314.]

ACRE (Lat.), n. n. A^{2}k(a^{3}k)'re(re^2). 1. Neut. of adj. *acer.* Generally used in the pl. See ACRIA. 2. Gr., ἄκρα. Any sharp point (e. g., that of the nose). [A, 358.]

ÂCRE (Fr.), adj. and n. A^{3}kr. 1. Acrid. 2. Pungent, burning (said of the heat of the skin in fever). [A, 314.] 3. (N.) in the old humoral pathology, an acrid principle in the humors (e. g., *â. vénérien, â. dartreux*). [A, 306.]

ACREA (Lat.), n. n. pl. A^{2}k(a^{3}k)'re(re^2)-a^3. Gr., ἄκρεα (= ἀκραῖα). Sp., *acrea.* The extremities of the body. [A, 311.]

ACREBITE (Sp.), n. A^3-kra-be'ta. Ar., *al-kibrît.* Sulphur. [Ruland (A, 334).]

ACREDO (Lat.), n. f. A^{2}k(a^{3}k)-re(ra)'do. Gen., *acredinis.* A sharp or pungent taste; acridity. [A, 312.]

ACRÉMONIEN (Fr.), adj. and n. A^3-kra-mo-ni^2-a^{3}n^2. 1. Resembling the *Acremonion.* 2. (N.) that fungus itself. [A, 306.]

ACREMONION, ACREMONIUM (Lat.), n's n. A^{2}k(a^{3}k)-re(ra)-mo'ni^2-o^{2}n, -u^{3}m(u^{4}m). From ἀκρέμων, the extremity of a branch. Fr., *acrémonion, acrémonien.* Sp., *acremónion.* A genus of *Fungi,* established by Link, of the order *Peronosporeæ,* that grow on dead branches and leaves. [A, 248, 305, 334; B, 1.]

ÂCRETÉ (Fr.), n. A^{3}kr-ta. Acridity. [A, 306.]

ACRETOPOSIA (Lat.), n. f. A^{2}k(a^{3}k)-ra^{2}t(ra^{3}t)-o-po'zi^2(si^2)-a^3. See ACRATOPOSIA.

ACRIA (Lat.), n. n. pl. A^{2}k(a^{3}k)'ri^2-a^3. Neut. pl. of adj. *acer.* Gr., στρυφνά. Fr., *âcres.* Ger., *scharfstoffige Mittel.* Acrid, irritating drugs or applications. [A, 305.] Acrid vegetable poisons. [B, 95.]—**A. abortiva.** Irritant abortifacients. [Bernatzik (A, 319).]—**A. anthelminthica.** Acrid drugs which operate as anthelminthics. [Bernatzik (A, 319).]—**A. antiscorbutica.** Those which, like mustard, are of benefit in scurvy. [Bernatzik (A, 319).]—**A. aphrodisiaca.** Those which, like cantharides, stimulate the sexual appetite. [Bernatzik (A, 319).]—**A. chemica.** Fr., *âcres chimiques.* Chemical irritants.—**A. diuretica.** Acrid drugs which act as diuretics. [Bernatzik (A, 319).]—**A. drastica.** See *A. purgantia.*—**A. ecbolica.** See *A. abortiva.*—**A. emetica.** Acrid drugs which expend their irritating action in causing vomiting. [Bernatzik (A, 319).]—**A. emeto-cathartica.** Those which cause vomiting and purging. [Bernatzik (A, 319).]—**A. emmenagoga.** Those which stimulate menstruation. [Bernatzik (A, 319).]—**A. epispastica.** Epispastics. [Bernatzik (A, 319).]—**A. expectorantia.** Stimulating expectorants. [Bernatzik (A, 319).]—**A. mechanica.** Fr., *âcres mécaniques.* Mechanical irritants. — **A. phlogoga.** Irritants which, applied locally, cause hyperæmia and finally inflammation. [Bernatzik (A, 319).]—**A. pruriginantia.** Those which cause slight redness, heat, and a sense of itching or tingling. [Bernatzik (A, 319).]—**A. purgantia.** Those which cause abdominal pain and purging. [Bernatzik (A, 319).]—**A. rubefacientia.** Those which cause rubefaction followed by desquamation or a serous transudation. [Bernatzik (A, 319).]—**A. sialagoga.** Irritant sialagogues. [Bernatzik (A, 319).]—**A. stomachica.** Acrid drugs which, in moderate doses, act only as stomachics. [Bernatzik (A, 319).]—**A. suppurantia.** Those which, locally applied, cause suppuration. [Bernatzik (A, 319).]—**A. urentia.** See *A. pruriginantia.*—**A. vesicantia.** Those which vesicate. [Bernatzik (A, 319).]

ACRIBOMETER, n. A^{2}k-ri^2-bo^{2}m'e^{2}t-u^{3}r. From ἀκριβής, exact, and μέτρον, a measure. Lat., *acribometrum.* Fr., *acribomètre.* Ger., *Acribometer.* An instrument for measuring minute objects. [Zincken (A, 301).]

ACRICULUS (Lat.), adj. A^{2}k(a^{3}k)-ri^{2}k'u^2(u)-lu^{3}s(lu^{4}s). Somewhat acrid. [A, 318.]

ACRID, adj. A^{2}k'ri^{2}d. Gr., ἄκρος. Lat., *acer.* Fr., *âcre.* Ger., *scharf.* It., Sp., *acre.* Sharp, pungent, irritating.

ACRIDIA (Lat.), n. f. A^{2}k(a^{3}k)-ri^{2}d'i^2-a^3. See ACRIDIUM.

ACRIDIAN, adj. A^{2}k-ri^{2}d'i^2-a^{2}n. For deriv., see ACRIS. Fr., *acridien.* Sp., *acridiano.* In entomology, resembling the locust. [A, 306.]

ACRIDIC ACID, n. A^{2}k-ri^{2}d'i^{2}k. For deriv., see ACRIDINE. Fr., *acide acridique.* Ger., *Acridinsäure.* A dibasic crystalline acid prepared by the oxidation of acridine, having the constitution $C_{11}H_7NO_4 = C_6$(H,H,H,H,N.C[CO.OH]—C[CO.OH]-CH,⌒—), being that of quinoline in which two adjacent hydrogen atoms are replaced by the acid characteristic CO.OH. [B, 79.]

ACRIDINE, n. A^{2}k'ri^{2}d-en. From *acer,* acrid, on account of its irritant action. Fr., *acridine.* Ger., *Acridin.* It., Sp., *acridina.* An artificial alkaloid first obtained from crude anthracene by Gräbe and Caro ["Ann. d. Chem. u. Pharm.," clviii, p. 265], who assigned it the formula $C_{12}H_9N$. More recent analyses give it the formula

$C_{13}H_9N = C_6(H,H,H,H,\overbrace{CH,N,)(\underbrace{}}—,—, H,H,H,H,)C_6$. It forms

colorless laminar crystals, soluble in alcohol and in ether, which cause marked irritation when brought into contact with the skin or a mucous surface. [B, 79.]—**A. ethyl iodide.** Ger., *Acridinäthyljodid.* A derivative of a. having the formula $C_{13}H_9N.C_2H_5I$. [B, 79.]—**A. octohydride.** Ger., *Acridinoctohydrür.* A substance forming lamellar crystals of the molecular composition of a. with the addition of 8 atoms of hydrogen, $C_{13}H_{17}N$. [B, 79.]

ACRIDINSÄURE (Ger.), n. A^{3}k-ri^{2}d-en'zoi-re^2. Acridic acid. [B.]

ACRIDITY, n. A^{2}k-ri^{2}d'i^2-ti^2. Lat., *acritas.* Fr., *âcreté.* Ger., *Schärfe.* It., *acredine.* Sp., *acrimonia.* The quality of being acrid.

ACRIDIUM (Lat.), n. n. A^{2}k(a^{3}k)-ri^{2}d'i^2-u^{3}m(u^{4}m). An old name for the scammony plant. [A, 312.]

ACRIDNESS, n. A^{2}k'ri^{2}d-ne^{2}s. See ACRIDITY.

ACRIDOPHAGUS (Lat.), n. m. A^{2}k(a^{3}k)-ri^{2}d-o^{2}f'a^{2}g(a^{3}g)-u^{3}s(u^{4}s). Gr., ἀκριδοφάγος (from ἀκρίς, the locust, and φάγειν, to eat). Fr., *acridophage.* Ger., *Heuschreckenfresser.* Sp., *acridófago.* A locust-eater. [A, 320.]

ACRIDOPHAGY, n. A^{2}k-ri^{2}d-o^{2}f'a^2-ji^2. Lat., *acridophagia.* Fr., *acridophagie.* Ger., *Heuschreckenessen.* Sp., *acridofagia.* 1. The practice of locust-eating. [A, 320.] 2. A disease prevalent in Ethiopia, attributed to the penetration of the skin by locusts or other insects, or to their having been eaten immoderately. [Herodotus (A, 322).] 3. The formation of sores infested with maggots. [C. G. Kuhn (A, 322).]

ACRIFOLIUM (Lat.), n. n. A^{2}k(a^{3}k)-ri^2-fo'li^2-u^{3}m(u^{4}m). From *acer,* acrid, and *folium,* a leaf. Ger., *Spitzblatt* (3d def.). Sp., *acrifolio.* 1. An unknown tree considered by the ancients as of ill omen. [A, 312.] 2. A plant with acrid leaves, supposed to be the *Lotus.* [A, 316.] 3. A general name for any plant having prickly leaves. [A, 315.]

ACRIMONIA (Lat.), n. f. A^{2}k(a^{3}k)-ri^2-mo'ni^2-a^3. From *acer,* acrid. Gr., δριμύτης. Fr., *acrimonie.* Ger., *Acrimonie.* It., Sp., *acrimonia.* 1. The irritation or smarting of a sore. [A, 312.] 2. In the old humoral pathology, an acrid state of the humors. According to Boerhaave, the acrimoniæ were the mechanical, the saline, the oily, the soapy, and the mixed; according to Sylvius, the acid and the alkaline. [A, 321.]

ACRIMONIATÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-ri^2-mo-ni^2-a(a^3)'-te(ta^3-e^2). Sp., *acrimoniadas.* A family of rosaceous plants. [A, 334.]

ACRINIA (Lat.), n. f. A^{2}k(a^{3}k)-ri^{2}n'i^2-a^3. From α priv., and κρίνειν, to separate. Fr., *acrinie.* It., Sp., *acrinia.* 1. Diminution or absence of a secretion. [A, 306.] 2. An insufficient critical evacuation. [Andral (A, 322).]

ACRINYL, n. A^{2}k'ri^{2}n-i^{2}l. From *acer,* acrid. Fr., *acrinyle.* Ger., *Acrinyl.* It., *acrinile.* Sp., *acrinilo.* A univalent radicle having the constitution C_7H_7O. [B.]—**A. cyanide.** A crystalline substance having the constitution $C_8H_7NO = C_7H_7O.CN$. [B. 18.]—**A. sulphocyanate, A. thiocyanate.** An oily liquid, $C_7H_7O.SCN$, of acrid taste, formed from sinalbin (the irritant principle of white mustard). [A, 264; B, 81.]

ACRIS (Lat.), n. f. A^{2}k(a^{3}k)'ri^{2}s. Gen., *acris* (1st def.), *acridis* (2d and 3d def's). Gr., ἄκρις (1st def.), ἀκρίς (2d and 3d def's). Ger., *Schärfe* (1st def.), *Heuschrecke* (2d def.). Sp., *langosta* (2d def.). 1. A prominent bony point. [Hippocrates (A, 325).] 2. The locust. [A, 322.] 3. Acrisia (*q. v.*). [Hippocrates (A, 311).]

ACRISIA (Lat.), n. f. A^{2}k(a^{3}k)-ri^{2}z(ri^{2}s)'i^2-a^3. Gr., ἀκρισία. Fr., *acrisie.* Ger., *Akrisie.* It., *acrisia.* Sp., *acrisis.* Syn.: *defectus criseos* (1st def.). 1. An irregular course of a disease, one in which no crisis occurs. [A, 306.] 2. An unfavorable crisis. [Galen (A, 325).] 3. Such a disorderly state of symptoms that their import is quite uncertain. [A, 322.]

ACRISIS (Lat.), n. f. A^{2}k(a^{3}k)'ri^{2}s-i^{2}s. Gen., *acris'eos.* See ACRISIA.

ACRISY, n. A^{2}k'ri^{2}s-i^2. See ACRISIA.

ACRITA (Lat.), n. pl. A^{2}k(a^{3}k)'ri^{2}t-a^3. Neut. pl. of adj. *acritus* (*q. v.*), *animalia* being understood. The acritans; according to Owen, the lowest of the sub-kingdoms into which invertebrate animals are divided [A, 251; B]; according to Macleay, those in which no distinct nervous system has been observed [A, 258; B, 7, 39].

ACRITANS, n. pl. A^{2}k'ri^{2}t-a^{2}nz. See ACRITA.

ACRITAS (Lat.), n. f. A^{2}k(a^{3}k)'ri^{2}t-a^{2}s(a^{3}s). Gen., *acrita'tis.* Acridity, acrimony. [A, 320.]

ACRITE, adj. A^{2}k'rit. Pertaining to the *Acrita.* [Owen (A, 258).]

ACRITICAL, adj. A^{2}k-ri^{2}t'i^{2}k-a^{2}l. Lat., *acriticus* (from α priv., and κρίσις, a crisis). Fr., *acritique.* Ger., *unkritisch.* It., *acritico.* Sp., *acrítico.* Non-critical, taking place without a crisis, not significant of a crisis. [A, 306, 320.]

ACRITOCHROMACY, n. A^{2}k-ri^{2}t-o-kro'ma^2-si^2. From ἄκριτος, indistinguishable, and χρῶμα, color. Fr., *acritochromatie.* Ger., *Akritochromatie.* It., Sp., *acritocromatia.* An inability to distinguish or discriminate between colors. [F.]

ACRITOS (Lat.), adj. A^{2}k(a^{3}k)'ri^{2}t-o^{2}s. See ACRITUS.

ACRITUDE, n. A^{2}k'ri^{2}t-u^{2}d. Lat., *acritudo.* See ACRIDITY.

ACRITUS (Lat.), adj. A^{2}k(a^{3}k)'ri^{2}t-u^{3}s(u^{4}s). Gr., ἄκριτος. 1. Confused, indistinguishable. [B.] 2. Acritical. [A, 313.]

ACRITY, n. A^{2}k'ri^{2}t-i^2. See Acridity.

ACRIVIOLA (Lat.), n. f. A^{2}k(a^{3}k)-ri^2-vi(we)'o-la^3. From *acer*, sharp, and *viola*, the violet. An old name for the Indian cress. [A, 323.] See Tropæolum.

ACRO (Lat.), n. m. Gen., *acro'nis*. See Acron.

ACROÆSTHESIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-e^{2}s(a^3-e^{2}s)-the(tha)'-zi^2(si^2)-a^3. Ger., *Akroästhesie*. Syn.: *oxyæsthesia*. Exaggerated sensibility (one of the phenomena of hysteria). [R. Arndt (A, 319).]

ACROASIS (Lat.), n. f. A^{2}k(a^{3}k)-ro-a(a^3)'si^{2}s. Gen., *acroa'seos*. Gr., ἀκρόασις (from ἀκροᾶσθαι, to listen). The use of the sense of hearing in the diagnosis of diseases. [Hippocrates (A, 337).] See Auscultation.

ACROBAPTUS (Lat.), adj. A^{2}k(a^{3}k)-ro-ba^{2}p(ba^{3}p)'tu^{3}s(tu^{4}s). From ἄκρον, a point, and βαπτός, dipped, dyed. Fr., *acrobaphe, acrobaphte*. Sp., *acrobapto*. Having a spot at the end of the wing (said of a genus of insects). [A, 306.]

ACROBLAST, n. A^{2}k'ro-bla^{2}st. From ἄκρος, extreme, and βλαστός, a germ. Fr., *acroblaste*. Ger., *Akroblast, Spitzkeim*. The a's are cells lying between the ectoblast and the endoblast, but independent of the mesoblast, which take up food in an amœboid manner. They also give rise to bodies called poreutes (*q. v.*). [Kollmann, "Recueil zoöl. suisse," 1884, p. 259 (J).]

ACROBLASTIC, adj. A^{2}k-ro-bla^{2}st'i^{2}k. Gr., ἀκρόβλαστος, budding at the end. [Theophrastus (A, 311).] Fr., *acroblastique*. Ger., *akroblastisch, spitzkeimend*. Monocotyledonous. [A, 315.]

ACROBRYON (Lat.), n. n. A^{2}k(a^{3}k)-ro'bri(bru^6)-o^{2}n. From ἄκρον, an extremity, and βρύειν, to swell or burst forth. Fr., *acrobryé*. Ger., *Gipfelsprosser*. Sp., *acrobrio*. A plant growing at its apex only. In Endlicher's classification, the *Acrobrya* form a grand subdivision of the *Cormophyta*, or vascular plants, including all those in which the growth of the vascular bundles takes place at the apex. [B, 48.]—**Acrobrya anophyta.** Fr., *acrobryés anophytes*. A division including the classes of mosses (*Musci*) and liverworts (*Hepaticæ*). [B, 48, 104.]—**Acrobrya hysterophyta.** Fr., *acrobryés hystérophytes*. A division including the class *Rhizantheæ*. [B, 48, 104.]—**Acrobrya protophyta.** Fr., *acrobryés protophytes*. A division including the classes *Calamariæ* (*Equisetaceæ*), *Filices* (ferns), *Hydropterides*, *Selagines*, and *Zamiæ* (*Cycadaceæ*). [B, 48, 104.]

ACROBUSTITIS (Lat.), n. f. A^{2}k(a^{3}k)-ro-bu^{3}st(bust)-i(e)'ti^{2}s. See Acrobystitis.

ACROBYSTIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-bi^{2}st(bu^{6}st)'i^2-a^3. Gr., ἀκροβυστία (from ἄκρον, a point, and βύειν, to cover). Ger., *Akrobystie*. Sp., *acrobistia*. 1. The prepuce. [A, 337.] 2. Circumcision. [A, 322.]

ACROBYSTICUS (Lat.), adj. A^{2}k(a^{3}k)-ro-bi^{2}st(bu^{6}st)'i^{2}k-u^{3}s-(u^{4}s). Preputial. [A, 322.]

ACROBYSTIOLITH, n. A^{2}k-ro-bi^{2}st'i^2-o-li^{2}th. From ἀκροβυστία, the prepuce, and λίθος, a stone. Fr., *acrobystiolithe*. A preputial calculus. [E.]

ACROBYSTITIS (Lat.), n. f. A^{2}k(a^{3}k)-ro-bi^{2}st(bu^{6}st)-i(e)'ti^{2}s. Gen., *acrobystit'idis*. For deriv., see Acrobystia and *-itis**. Fr., *acrobystite*. Ger., *Vorhautentzündung*. It., *acrobustite*. 1. Inflammation of the sheath of the penis in the domestic animals, especially the horse. 2. Posthitis (*q. v.*). [A, 306.]

ACROCARPÆ, ACROCARPI (Lat.), n's f. and m. pl. A^{2}k-(a^{3}k)-ro-ka^{3}rp'e(a^3-e^2), -i(e). From ἄκρον, an extremity, and καρπός, fruit. Fr., *acrocarpes*. Ger., *Gipfelfrüchtige*. Sp., *acrocarpias*. A division of mosses (*Bryaceæ*), comprising those in which the reproductive organs are situated at the extremity of the main stem, and not laterally. [B, 19, 35, 75.]

ACROCARPIDIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-ka^{3}r-pi^{2}d'i^2-u^{3}m-(u^{4}m). A genus of piperaceous plants indigenous to tropical America and the West Indies. [B, 19.]—**A. hispidulum.** A species growing in the West Indies, employed there as a bitter tonic. [B, 19.]

ACROCARPOUS, adj. A^{2}k-ro-ka^{3}rp'u^{3}s. Gr., ἀκρόκαρπος, fruiting at the top. [A, 311.] Lat., *acrocarpus*. Fr., *acrocarpe*. Ger., *akrokarpisch*. Sp., *acrocarpo*. In botany, bearing the fruit at the summit of the axis. [Berkeley (B, 39).]

ACROCARPUS (Lat.), adj. and n. m. A^{2}k(a^{3}k)-ro-ka^{3}rp'u^{3}s-(u^{4}s). 1. Acrocarpous (*q. v.* for deriv.). 2. A member of the *Acrocarpi* (*q. v.*). 3. A genus of *Algæ*, including *A. crinalis* (*q. v.*).—**A. crinalis.** One of the species that produce Corsican moss. [A, 316.]

ACROCEPHALIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-se^{2}f(ke^{2}f)-a(a^3)'-li^2-a^3. From ἄκρον, the summit, and κεφαλή, the head. Fr., *acrocéphalie*. Ger., *Akrokephalie*. It., Sp., *acrocefalia*. A deformity of the head in which it is increased in its vertical diameter and more or less pointed or conical at the top. [Broca (D, 43).]

ACROCEPHALIC, ACROCEPHALOUS, adj's. A^{2}k-ro-se^{2}f-a^{2}l'i^{2}k, -se^{2}f'a^{2}l-u^{3}s. Lat., *acrocephalus*. Fr., *acrocéphale*. Ger., *akrokephalisch*. Sp., *acrocéfalo*. Affected with acrocephalia (*q. v.*).

ACROCEPHALUS (Lat.), adj. and n. m. A^{2}k(a^{3}k)-ro-se^{2}f(ke^{2}f)'-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). 1. Acrocephalous. 2. A genus of herbaceous labiate plants of the tribe *Ocimoideæ*, indigenous to India and Madagascar. [Bentham (A, 305), A, 306.]

ACROCEPHALY, n. A^{2}k-ro-se^{2}f'a^{2}l-i^2. See Acrocephalia.

ACROCERIDIAN, adj. A^{2}k-ro-se^2-ri^{2}d'i^2-a^{2}n. From ἄκρον, a summit, and κέρας, a horn. Fr., *acrocéride*. Resembling the *Acroceras* (a genus of vesicular *Diptera*). [A. 306.]

ACROCHEIR (Lat.), n. f. A^{2}k(a^{3}k)'ro-kir(ch^{2}e^2-i^{2}r). Gen., *acrochei'ris*. Gr., ἀκρόχειρ (from ἄκρον, an extremity, and χείρ, the hand). Fr., *acrochire*. Ger., *Akrochir*. Sp., *acroquir, acroqueiris*. 1. The extremity of the hand; the tips of the fingers. [A, 320.] 2. The forearm. [Hippocrates (A, 320).]

ACROCHEIRON (Lat.), n. n. A^{2}k(a^{3}k)-ro-ki'(ch^{2}e^2'i^2)-ro^{2}n. See Acrocheir.

ACROCHIR (Lat.), n. f. A^{2}k(a^{3}k)'ro-ku^{5}r(ch^{2}er). See Acrocheir.

ACROCHOLIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-ko(ch^{2}o^2)'li^2-a^3. Gr., ἀκροχολία (from ἄκρος, extreme, and χολή, bile). An excitable, choleric temperament. [Hippocrates (A, 325).]

ACROCHORDON (Lat.), n. f. A^{2}k(a^{3}k)-ro-ko^{2}rd(ch^{2}o^{2}rd)'o^{2}n-(on). Gen., *acrochord'onis*. Gr., ἀκροχορδών (from ἄκρον, an extremity, and χορδή, a string [of a lyre], because, according to Aetius, its tip resembled the cut end of a piece of catgut). Fr., *acrochordon, verrue avec pédicule, molluscum granuleux*. Ger., *Akrochordon, Saitenwarze*. It., *acrochordon, bitorzolo*. Sp., *acrocordon*. 1. According to Celsus, a little hard tumor under the skin, several being arranged in clusters, commonly affecting children. [G, 13.] Cf. Molluscum *contagiosum*. 2. As used by Sir E. Wilson and Hans Hebra, a little soft tumor, often pendulous, of areolar (Wilson) or glandular (Hebra) structure, occurring on the eyelids, the neck, etc., of elderly persons; the *verruca pensilis* (seu *filiformis*). [G, 2, 75.]

ACROCHORDUS (Lat.), n. m. A^{2}k(a^{3}k)-ro-ko^{2}r(ch^{2}o^{2}r)'du^{3}s-(du^{4}s). See Acrochordon.

ACROCHORISMUS (Lat.), n. m. A^{2}k(a^{3}k)-ro-ko(ch^{2}o^2)-ri^{2}z-(ri^{2}s)'mu^{3}s(mu^{4}s). Gr., ἀκροκορισμός (from ἄκρος, extreme, and χορεύειν, to dance). Sp., *acrocorismo*. An ancient method of exercise by dancing. [A, 325, 337.]

ACROCINESIS (Lat.), n. f. A^{2}k(a^{3}k)-ro-si^{2}n(ki^{2}n)-e(a)'si^{2}s. Gen., *acrocine'seos*. From ἄκρος, extreme, and κίνησις, movement. Ger., *Akrokinesie*. Syn.: *oxycinesis*. An increase of the ease, freedom, and completeness of the normal muscular movements (one of the phenomena of hysteria, to be distinguished from *hypercinesis*). [R. Arndt (A, 319).]

ACROCLIDIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-kli^{2}d'i^2-u^{3}m(u^{4}m). See Acrodiclidium.

ACROCOLIA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ro-ko'li^2-a^3. Gr., ἀκροκώλια. Ger., *Akrokolia*. Sp., *acrocolias*. 1. The extremities of the body, especially in the lower animals, including the snout, ears, trotters, etc. [A, 311.] 2. In ancient pharmacy, the extremities of certain animals, used in making gelatin. [A, 337.]

ACROCOLIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-ko'li^2-u^{3}m(u^{4}m). See pl., Acrocolia.

ACROCOMIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-ko'mi^2-a^3. From ἄκρον, a summit, and κόμη, hair. Fr., *acrocomie*. Ger., *Schopfpalm*. Sp., *acrócomo*. A genus of palms, established by Martius, having thorny stems and a luxuriant mass of leaves at the top. [A, 304, 306.]—**A. lasiospatha** [Martius]. A Brazilian tree, the fruit of which is edible. [A, 304.]—**A. sclerocarpa** [Martius]. Fr., *palmier mocaya*. Ger., *Macoya, grosser Macaobaum*. Syn.: *Cocos aculeata* [Jacquin] (seu *fusiformis* [Willdenow]). A tree indigenous to the West Indies and the northern part of South America. The nut (Ger., *Palmkohl*) furnishes palm oil, and is used in an emulsion for catarrh in Brazil; the young leaves are eaten. [A, 303, 304, 321.]

ACROCORIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-ko'ri^2-u^{3}m(u^{4}m). Sp., *acrocorion*. A plant mentioned by Pliny; supposed by some to have been a kind of onion, and by others the violet. [A, 312, 337.]

ACRODACTYLUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-da^{2}k(da^{3}k)'ti^{2}l-(tu^{6}l)-u^{3}m(u^{4}m). From ἄκρος, topmost, and δάκτυλος, a finger. Fr., *acrodactyle*. Ger., *Zehenrücken*. In zoölogy, the upper surface of a digit. [A, 347.]

ACRODICLIDIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-di(de)-kli^{2}d'i^2-u^{3}m(u^{4}m). From ἄκρον, the top, and δικλίς (gen., δικλίδος), double-folding. Sp., *acrodiclidea*. A genus of lauraceous plants established by Nees von Esenbeck. [A, 258, 321.]—**A. camara.** The typical species, indigenous to Brazil. The wood is bitter and aromatic, and the fruit (the Ackawai nutmeg) is used by the Indians in dysentery. [A, 260, 321.]

ACRODONT, adj. A^{2}k'ro-do^{2}nt. From ἄκρον, a summit, and ὀδούς (gen., ὀδόντος), a tooth. Fr., *acrodont*. In zoölogy, having the teeth attached by their bases to the summit of the parapet of the jaw. [L, 12.]

ACRODRYON (Lat.), n. n. A^{2}k(a^{3}k)-ro^{2}d'ri^2(ru^6)-o^{2}n. Gr., ἀκρόδρυον. Sp., *acrodrio*. Syn.: *Nauclearia* [De Candolle]. A genus of rubiaceous plants. [A, 305.] In the pl., *acrodrya*, fruit-trees or fruits, especially nuts. [A, 311.]

ACRODYNIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-di^{2}n(du^{6}n)'i^2-a^3. From ἄκρον, an extremity, and ὀδύνη, pain. Fr., *acrodynie, mal des pieds et des mains, maladie de Paris*. Ger., *Akrodynie*. It., Sp., *acrodinia*. Syn.: *erythema epidemicum* [Alibert] (seu *acrodynia*), *chiropodalgia* [Bally]. Lit., pain in the extremities. 1. A name given by Chardon to an acute general disease, usually occurring as an epidemic, especially in Eastern countries, but also elsewhere (having prevailed extensively in France from 1828 to 1830); attended with disorders of the nervous system, the mucous membranes, and the skin, but specially characterized by pains in the extremities, together with a rash beginning on the hands and feet as erythematous spots, which coalesce and extend over the upper and lower limbs and sometimes portions of the trunk. The affected portions of the skin undergo desquamation, thickening, and pigmentation, while the remaining portions also become darker in color. These phenomena are mentioned as among the symptoms of ergotism. [A, 314; D, 1; G.] Cf. Dengue. 2. A rheumatic affection of the nerves. [J. C. A. Clarus (A. 322).]

ACRODYNY, n. A^{2}k'ro-di^{2}n-i^2. See Acrodynia.

ACROE (Sp.), n. A^3-kro'a. A plant indigenous to Guinea. Boiled in wine, it is used as a tonic. [A, 337.]

ACROGENOUS, adj. A^{2}k-ro^{2}j'e^{2}n-u^{3}s. From ἄκρον, the summit, and γεννᾶν, to grow. Lat., *acrogenus.* Fr., *acrogène.* Sp., *acrójeno.* 1. Growing especially at the summit (said of acotyledonous plants). [Lindley (A, 306).] 2. Derived from a rhomboid by loss of substance at the angles and borders (said of crystals). [A, 306.]

ACROGENS, n. pl. A^{2}k'ro-je^{2}nz. For deriv., see ACROGENOUS. Lat., *acrogenæ.* Fr., *acrogènes.* Sp., *acrójenas.* Syn.: *acrobrya* [Endlicher]. Lindley's term for a province of cryptogams, including all those which increase by growth at the apex of the axis and not laterally; comprising the single class *Angiosporæ* and the cohorts *Sporogamia*, *Thallogamia*, and *Axogamia.* [B, 34, 39.]

ACROGONIDIA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ro-go-ni^{2}d'i^2-a^3. From ἄκρος, topmost, and γόνος, a seed. Fr., *acrogonidies.* Ger., *Acrogonidien.* In botany, gonidia formed at the apex of the filaments which bear them. [B, 54.]

ACROGYRATÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-ro-ji(gu^6)-ra(ra^3)'-te(ta^3-e^2). Acrogyrous plants. [Bernhardt (A, 316).] See ACROGYROUS.

ACROGYRATE, ACROGYROUS, adj's. A^{2}k-ro-ji'rat, -ro^{2}j'-i^2-ru^{3}s. From ἄκρον, a summit, and γῦρος, a circle. Fr., *acrogyre.* Sp., *acrójiro.* In botany, having the fruits surrounded by a ring (said of ferns). [A, 306.]

ACROISA, n. A^{2}k-roi'sa^3. Blindness. [Du Tresne (A, 258).]

ACROKINESIS (Lat.), n. f. A^{2}k(a^{3}k)-ro-ki^{2}n-e(a)'si^{2}s. Gen., *acrokine'seos.* See ACROCINESIS.

ACROL, n. A^{2}k'ro^{2}l. For deriv., see ACROLEIN. Acrolein deprived of an atom of oxygen, $C_3H_4'' = CH_2{=}CH.CH{=}$. [B, 4.]—**A. dichloride.** Ger., *Acroldichlorür.* A liquid of the composition $C_3H_4Cl_2 = CH_2{=}CH.CH{=}Cl_2$. [B, 4.]

ACROLACTIC ACID, n. A^{2}k-ro-la^{2}k'ti^{2}k. From ἄκρος, extreme, and *lac* (gen., *lactis*), milk. Fr., *acide acrolactique.* An acid formed from lactic acid by dropping 2 atoms of hydrogen, $C_3H_4O_3 = CH(OH){=}CH{-}CO_2H$. [B, 2.]

ACROLASIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-la(la^3)'zi^2(si^2)-a^3. See MENTZELIA.

ACROLEATE, n. A^{2}k-ro'le-at. Fr., *acroléate.* Ger., *acrylsaures Salz.* See ACRYLATE.

ACROLEIC ACID, n. A^{2}k-ro-le'i^{2}k. From *acer*, sharp, and *oleum*, oil. Fr., *acide acroléique.* Ger., *Acroleïnsäure.* See ACRYLIC ACID.

ACROLEIN, n. A^{2}k-ro'le^2-i^{2}n. For deriv., see ACROLEIC ACID. Fr., *acroléine.* Ger., *Acroleïn.* It., Sp., *acroleina.* Syn.: *acrylic aldehyde.* A thin, colorless, highly volatile liquid, the fumes of which are highly pungent and irritating, produced by the dry distillation of glycerin and in other ways, $C_3H_4O = CH_2{=}CH.CH{=}O$. It forms addition compounds with various radicals, and has an isomeric form, *metacrolein.* [B, 2, 4.]—**A. acetate.** Allylene diacetate. [B, 2.]—**A. dibromide.** Fr., *dibromure d'acroléine.* Ger., *Acroleïndibromür*, $C_3H_4Br_2O = CH_2Br.CHBr.CH{=}O$. [B, 4.]—**A. dichloride.** Fr., *dichlorure d'acroléine.* Ger., *Acroleïndichlorür*, $C_3H_4Cl_2O = CH_2Cl.CHCl.CH{=}O$. [B, 4.]—**A. hydrochlorate.** Fr., *chlorhydrate d'acroléine.* Ger., *Chlorwasserstoffacrolein.* A salt of hydrochloric acid and a., $C_3H_4O.HCl$. Supposed to be really metacrolein hydrochlorate. [A, 2.]—**A. oxethylchloride.** See ETHYLGLYCIDIC ETHER *hydrochloride.*—**A. with sodium sulphite.** A deliquescent syrup formed by evaporating an aqueous solution of acid sodium sulphite to which a. has been added. [B, 2.]

ACROLEINACETAL, n. A^{2}k-ro''le^2-i^{2}n-a^{2}s'e^{2}t-a^{2}l. From *acrolein* and *acetal.* Fr., *acroléine-acétal.* Ger., *Acroleinacetal.* Diethylglycidic ether. [B, 2.]

ACROLEINAMMONIA, n. A^{2}k-ro''le^2-i^{2}n-a^{2}m-mo'ni^2-a^3. From *acrolein* and *ammonia.* Fr., *acroléine-ammoniaque.* Ger., *Acroleïnammoniak.* An amorphous solid, C_6H_9NO, formed by the action of ammonia on acrolein. It forms salts with acids. [B, 4.]

ACROLEINSULPHUROUS ACID, n. A^{2}k-ro''le^2-i^{2}n-su^{3}lf'-u^2-ru^{3}s. From *acrolein* and *sulphurous.* Fr., *acide acroléine-sulfureux.* Ger., *Acroleïnschwefligsäure.* An acid, $CH_2.CH(SO_3H).-CHO = (C_3H_4O)(SO.OOH)$, derived from sulphacroleinsulphurous acid in the process of formation of oxypropanesulphonic acid. [Müller (B, 2).]

ACROLENION (Lat.), n. n. A^{2}k(a^{3}k)-ro-le^{2}n'i^2-o^{2}n. Gr., ἀκρωλένιον (from ἄκρον, a point, and ὠλένη, the elbow). The point of the elbow. [A, 311.] See OLECRANON.

ACROMANIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-ma(ma^3)'ni^2-a^3. From ἄκρος, complete, and μανία, madness. Fr., *acromanie.* Confirmed or incurable insanity. [A, 316.]

ACROMASTHIUM, ACROMASTIUM (Lat.), n's n. A^{2}k-(a^{3}k)-ro-ma^{2}s(ma^{3}s)'thi^2-u^{3}m(u^{4}m), ti^2-u^{3}m(u^{4}m). From ἄκρον, a summit, and μαστός, the breast. The nipple. [A, 322.]

ACROMIA (Lat.), n. f. A^{2}k(a^{3}k)-ro'mi^2-a^3. Gr., ἀκρωμία, the point of the shoulder. 1. The acromion (*q. v.*). 2. The withers (of a horse). [A, 311.]

ACROMIAL, adj. A^{2}k-ro'mi^2-a^{2}l. Lat., *acromialis.* Fr., *acromial.* Ger., *akromial.* It., *acromiale.* Sp., *acromial.* Pertaining to the acromion (*q. v.*).

ACROMIO-CLAVICULAR, adj. A^{2}k-ro''mi^2-o-kla^{2}v-i^{2}k'u^2-la^{3}r. Lat., *acromio-clavicularis.* Fr., *acromio-claviculaire.* It., *acromio-clavicolare.* Sp., *acromio-clavicular.* Pertaining to the acromion and the clavicle. [A, 314.]

ACROMIO-CLAVICULARIS (Lat.), n. m. A^{2}k(a^{3}k)-ro''mi^2-o-kla^2(kla^3)-vi^{2}k(wi^{2}k)-u^2(u)-la(la^3)'ri^{2}s. A muscle (*musculus* understood) extending from the acromion to the clavicle.—**A.-c. lateralis.** An anomalous muscle arising from the scapular end of the clavicle, and inserted into the acromion or into the aponeurosis of the deltoid muscle. [A, 262.]

ACROMIO-CORACOID, adj. A^{2}k-ro''mi^2-o-ko^{2}r'a^{2}k-oid. Lat., *acromio-coracoideus.* Fr., *acromio-coracoïdien.* It., *acromio-coracoideo.* Sp., *acromio-coracoideo.* Pertaining to the acromion and to the coracoid process. [A, 306.] See *A.-c.* LIGAMENT.

ACROMIO-HUMERALIS (Lat.), n. m. A^{2}k(a^{3}k)-ro''mi^2-o-hu^2(hu)-mu^{5}r(me^{2}r)-a(a^3)'li^{2}s. Fr., *acromio-huméral.* It., *acromio-omerale.* Sp., *acromio-humeral.* Chaussier's name for the deltoid muscle. [A, 320.]

ACROMION (Lat.), n. n. A^{2}k(a^{3}k)-ro'mi^2-o^{2}n. Gen., *acromii.* Gr., ἀκρώμιον, ἀκρωμία (from ἄκρον, an extremity, and ὦμος, the shoulder). Fr., *acromion.* Ger., *Akromion, Schulterhöhe.* It., *acromio.* Sp., *acrómion.* A massive outward prolongation of the spine of the scapula, which articulates with the clavicle, overhangs the articulation of the os brachii with the scapula, and forms the point of the shoulder. See figures under SCAPULA.

ACROMIORRHEUMA (Lat.), n. n. A^{2}k(a^{3}k)-ro''mi^{2}o-ru^2(ru)'-ma^3. Gen., *acro''miorrheu'matos (-tis).* From ἀκρώμιον, and ῥεῦμα, a flux (see RHEUMATISM). Fr., *acromio-rhume.* Ger., *Schulterrheumatismus.* Rheumatism of the shoulder. [A, 322.]

ACROMIO-THORACIC, adj. A^{2}k-ro''mi^2-o-tho-ra^{2}s'i^{2}k. For deriv., see ACROMION and THORAX. Lat., *acromio-thoracicus.* Fr., *acromio-thoracique.* It., *acromio-toracico.* Sp., *acromio-torácico.* Pertaining to the acromion and the thorax. [C.] See *A.-t.* ARTERY.

ACROMIS, ACROMIUM (Lat.), n's f. and n. A^{2}k(a^{3}k)-ro'-mi^{2}s, -mi^2-u^{3}m(u^{4}m). See ACROMION.

ACROMPHALIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro^{2}m-fa(fa^3)'li^2-u^{3}m(u^{4}m). Gr., ἀκρομφάλιον (from ἄκρον, a point or extremity, and ὀμφάλιον = ὀμφαλός, the navel). Fr., *acromphale.* Ger., *Akromphalon.* It., *acronfalo.* Sp., *acrónfalo.* 1. The middle, or point, of the navel. 2. Prominence of the navel; incipient umbilical hernia. 3. The stump of the umbilical cord attached to the child. [A, 311, 314, 320.]

ACROMPHALON, ACROMPHALUM, ACROMPHALUS (Lat.), n's n. and m. A^{2}k(a^{3}k)-ro^{2}mf'a^{2}l(a^{3}l)-o^{2}n, -u^{3}m(u^{4}m), -u^{3}s(u^{4}s). See ACROMPHALIUM.

ACROMYLE (Lat.), n. f. A^{2}k(a^{3}k)-ro^{2}m'i^{2}l(u^{6}l)-e(a). From ἄκρον, a point, and μύλη, the patella. The patella. [A, 322.]

ACRON (Lat.), n. m. A^{2}k(a^{3}k)'ro^{2}n. Gen., *acro'nis.* Gr., ἄκρων (1st def.). 1. An extremity of the body or of the stem of a plant. [A, 312.] 2. A strong ointment. [Hippocrates (A, 337).]

ACRO-NARCOTIC, adj. A^{2}k''ro-na^{3}r-ko^{2}t'i^{2}k. For deriv., see ACRID and NARCOTIC. Fr., *narcotico-âcre.* Ger., *scharf-narkotisch.* Having both acrid and narcotic properties. See POISON.

ACRONE (Fr.), adj. A^{3}k-ron. In botany, not enlarged at the base (said of the ovary). [Necker (A, 345).]

ACRONIA (Lat.), n. f. A^{2}k(a^{3}k)-ro'ni^2-a^3. Gr., ἀκρωνία. 1. Acroteriasis (*q. v.*). [A, 322.] 2. A genus of orchids. [A, 305.] See PLEUROTHALLIS.

ACRONORRHEUMA (Lat.), n. n. A^{2}k(a^{3}k)-ro^{2}n-o-ru^2(ru)'-ma^3. Gen., *acronorrheu'matos (-tis).* See ACROMIORRHEUMA.

ACRONOTINE, adj. A^{2}k-ro^{2}n-o'ti^{2}n. In zoölogy, pertaining to the genus *Acronotus.* [Griffith (A, 258).]

ACRONUS (Fr.), adj. A^{3}k-ro-nu^6. See ACRONE.

ACRONYCHIA (Lat.), n. f. A^{2}k(a^{3}k)-ro^{2}n(ron)-i^{2}k(u^{6}ch^2)'i^2-a^3. Gr., ἀκρωνυχία (from ἄκρον, a point, and ὄνυξ, the nail). Fr., *acronychie.* Ger., *Akronychie.* 1. The extremity of the nail. [A, 311.] 2. A genus of rutaceous plants, established by Forster, indigenous to tropical Asia and Australia. [A, 321.]—**A. laurifolia** [Blume]. A species indigenous to Java. The bark, which is bitter and astringent, is used for diarrhœa. [A, 321.]—**A. odorata** [Forster]. Syn.: *Jambolifera odorata* [Loureiro]. A Chinese species. [A, 321.]—**A. pedunculata.** Syn.: *Jambolifera pedunculata* [Vahl], *Cyminosma pedunculata* [De Candolle]. An East Indian species. The roots are used in preparing stimulating baths, and the fruit is edible. [A, 321.]—**A. resinosa** [Forster]. Syn.: *Jambolifera resinosa* [Loureiro]. A Chinese species. The roots are employed for poisoning fish, and they furnish a resin which is used as a stimulating application in chronic rheumatism. [A, 321.]

ACRONYCHIOUS, adj. A^{2}k-ro-ni^{2}k'i^2-u^{3}s. Fr., *acronyque.* Belonging to or resembling the genus *Acronychia.*

ACRONYCHOUS, adj. A^{2}k-ro^{2}n'i^{2}k-u^{3}s. Gr., ἀκρώνυχος. Lat., *acronychus.* Having nails, claws, hoofs, etc. [A, 311.]

ACRONYX (Lat.), n. m. A^{2}k(a^{3}k)'ro^{2}n-i^{2}ks(u^{6}ks). Gen., *acron'ychos (-chis).* From ἄκρος, inmost, and ὄνυξ, the nail. "Growing in of the nail." [A, 313.] See *Ingrowing* NAIL.

ACROPARALYSIS (Lat.), n. f. A^{2}k(a^{3}k)''ro-pa^2(pa^3)-ra^{2}l(ra^{3}l)'-i^{2}s(u^{6}s)-i^{2}s. Gen., *acroparalys'eos.* From ἄκρον, an extremity, and παράλυσις, paralysis. Paralysis of the extremities. [A, 313, 316.]

ACROPATHIC, ACROPATHOUS, adj's. A^{2}k-ro^{2}p'a^{2}th-i^{2}k, -u^{3}s. Fr., *acropathique.* Ger., *akropathisch.* Sp., *acropático.* Pertaining to acropathy (*q. v.*). [A, 306.]

ACROPATHY, n. A^{2}k-ro^{2}p'a^{2}th-i^2. Gr., ἀκρόπαθος (from ἄκρος, extreme, topmost, and πάθος, disease). Lat., *acropathos.* Fr., *acropathie.* Ger., *Akropathie.* It., *acropatia.* Sp., *acropatia.* 1. Disease at any extremity of the body. 2. A disease of the os uteri, not clearly defined, apparently at a high situation. [Hippocrates (A, 322).]

ACROPELTE (Lat.), n. f. A^{2}k(a^{3}k)-ro-pe^{2}l'te(ta). From ἄκρον, a summit, and πέλτη, a little shield. Fr., *acropelte.* A genus of *Algæ* the sporidia of which are concealed in buckler-shaped disks at the end of the fronds. [A, 348.]

ACROPETAL, ACROPETALOUS, adj's. A^{2}k-ro^{2}p'e^{2}t-a^{2}l, -ro-pe^{2}t'a^{2}l-u^{3}s. From ἄκρον, a summit, and *petere*, to seek. Fr., *acropète.* Ger., *akropetal.* In botany, developing from the base toward the summit. [B, 39, 54.]

ACROPHALLI (Lat.), n. m. pl. A^{2}k(a^{3}k)-ro-fa^{2}l(fa^{3}l)'li(le). From ἄκρον, an extremity, and φαλλός, the penis. A division of the nematode worms having the male genital organ at the extremity of the tail. [Deesing (L, 15).]

ACROPHOBIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-fo'bi^2-a^3. Ger., *Akrophobie.* Hydrophobia. [A, 305.]

ACROPHORUS (Lat.), n. m. A^{2}k(a^{3}k)-ro^{2}f'o-ru^{3}s(ru^{4}s). Fr., *acrophore.* Sp., *acróforo.* A genus of polypodiaceous ferns established from a plant of Java. [A, 306.]

ACROPHYLLOUS, adj. A^{2}k-ro-fi^{2}l'lu^{3}s. Gr., ἀκρόφυλλος. Sp., *acrófillo.* Having leaves at the top. [Theophrastus (A, 311).]

ACROPHYTON, ACROPHYTUM (Lat.), n's n. A^{2}k(a^{3}k)-ro^{2}f'i^{2}t(u^{6}t)-o^{2}n, -u^{3}m(u^{4}m). From ἄκρον, an extremity, and φυτόν, a plant. The *Tussilago farfara.* [Dioscorides (A, 344).]

ACROPINACONE, n. A^{2}k-ro-pi^{2}n'a^{2}k-on. From *acrolein* and *pinacone.* Syn.: *acrylic pinacone.* A substance produced by the action of nascent hydrogen on acrolein, having the composition $C_8H_{10}O_2$. [B, 2.]

ACROPIS (Lat.), adj. A^{2}k(a^{3}k)'ro-pi^{2}s. Gr., ἄκροπις. Sp., *acrópis.* Disabled (said usually of the tongue). [Hippocrates (A, 311).]

ACROPLETHYSMOGRAPH, n. A^{2}k''ro-ple^{2}th-i^{2}z'mo-gra^{3}f. From ἄκρος, extreme, πληθύνειν, to fill, and γράφειν, to write. A plethysmograph (*q. v.*). [B.]

ACROPODIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-po'di^2-u^{3}m(u^{4}m). From ἄκρον, a summit, and πόδιον (dim. of πούς), the foot. Ger., *Fussrücken.* Sp., *acrópodo.* In zoölogy, the upper surface of the foot.

ACROPOSAPES (Lat.), adj. A^{2}k(a^{3}k)-ro-po^{2}s'a^{2}p(a^{3}p)-ez(e^{2}s). A word said to have been used by Hippocrates to indicate rapidity of digestion in infants. [A, 337.] Perhaps a corruption of *acrosapes* (*q. v.*).

ACROPOSTHIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-po^{2}s'thi^2-a^3. Gr., ἀκροποσθία (from ἄκρος, extreme, and πόσθη, the prepuce). Ger., *Akroposthia.* Sp., *acropostia.* The prepuce, especially the extreme portion that is removed in circumcision. [A, 311, 323.]

ACROPOSTHIOLITH, n. A^{2}k-ro-po^{2}s'thi^2-o-li^{2}th. Lat., *acroposthiolithus* (from ἀκροποσθία, the prepuce, and λίθος, a stone). A preputial calculus. [A, 322.]

ACROPOSTHION (Lat.), n. n. A^{2}k(a^{3}k)-ro-po^{2}s'thi^2-o^{2}n. Gr., ἀκροπόσθιον. See ACROPOSTHIA.

ACROPOSTHITIS (Lat.), n. f. A^{2}k(a^{3}k)-ro-po^{2}s-thi(the)'ti^{2}s. Gen., *acroposthit'idis.* For deriv., see ACROPOSTHIA and *-itis*.* Fr., *acroposthite.* Inflammation of the prepuce. [E.]

ACROPSILON (Lat.), n. n. A^{2}k(a^{3}k)-ro^{2}p'si^{2}l-o^{2}n. For deriv., see ACROPSILOS. It., *acropsilo.* That portion of the glans penis which is not covered by the prepuce. [A, 314.]

ACROPSILOS (Lat.), adj. A^{2}k(a^{3}k)-ro^{2}p'si^{2}l-o^{2}s. Gr., ἀκρόψιλος (from ἄκρον, an extremity, and ψιλός, naked). Having the glans penis uncovered. [A, 322.]

ACROPSOLOS (Lat.), adj. A^{2}k(a^{3}k)-ro^{2}p-so'los. Gr., ἀκρόψωλος (from ἄκρον, an extremity, and ψωλή [fem. of ψωλός], the penis with the prepuce retracted). Having the penis erect and the glans uncovered. [A, 311, 322.]

ACROR (Lat.), n. m. A^{2}k(a^{3}k)'ro^{2}r. Gen., *acro'ris.* Acridity. [A, 312.]

ACRORIA (Lat.), n. f. A^{2}k(a^{3}k)-ro-ri(re)'a^3. Gr., ἀκρώρεια, a mountain ridge. The vertex. [A, 311, 322.]

ACRORRHEUMA (Lat.), n. n. A^{2}k(a^{3}k)-ro-ru^2(ru)'ma^3. Gen., *acrorrheumatos (-tis).* From ἄκρον, an extremity, and ῥεῦμα, a flux (see RHEUMATISM). Rheumatism of the extremities. [A, 313, 316.]

ACRORRHIZES (Fr.), n. pl. A^3-kro-rez. The acrogens (*q. v.*). [B.]

ACROS (Lat.), n. m. A^{2}k(a^{3}k)'ro^{2}s. Gr., ἄκρος. Any prominent point, like those of the nose, the fingers, etc. [A, 323.]

ACRO-SALINE, adj. A^{2}k''ro-sa'lin. Acrid and saline. [B, 39.]

ACROSAPES (Lat.), adj. A^{2}k(a^{3}k)-ro^{2}s'a^{2}p(a^{3}p)-ez(e^{2}s). Gr., ἀκροσαπής (from ἄκρον, an extremity, and σήπεσθαι, to rot). Lit., rotten at the end; readily perishable, easily prepared, easily digestible (said of articles of food, the old idea being that digestion was a sort of putrefaction). [Hippocrates (A, 311, 325, 343).]

ACROSARCA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ro-sa^{3}r'ka^3. From ἄκρον, an extremity, and σάρξ (gen., σαρκός), flesh. Fr., *acrosarques.* Plants having round, fleshy, berry-like fruits with the calyx adherent. [Desvaux (A, 345).]

ACROSARCOUS, adj. A^{2}k-ro-sa^{3}r'ku^{3}s. Lat., *acrosarcus.* Fr., *acrosarque.* Sp., *acrosarco.* Having a fleshy end or fruit. [A, 322.]

ACROSPELOS, ACROSPELTON (Lat.), n's m. and n. A^{2}k(a^{3}k)-ro^{2}s'pe^{2}l-o^{2}s, -pe^{2}l'to^{2}n. Old Greek names for certain oat-grasses, supposed to have been the *Bromus sterilis* and the *Avena sativa.* [A, 343, 344.]

ACROSPERMUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-spu^{5}rm(spe^{2}rm)'u^{3}m(u^{4}m). From ἄκρον, a summit, and σπέρμα, a seed, because the apex swells and emits the sporules. Fr., *acrosperme.* Sp., *acrospermo.* A genus of minute *Fungi*, established by Tode, parasitic on decaying vegetables. [A, 248.]

ACROSPIRE, n. A^{2}k'ro-spir. From ἄκρος, topmost, and σπεῖρα, a coil, or σπείρειν, to sow. Fr., *acrospire.* Sp., *acrospiro.* The first shoot to make its appearance in the sprouting of corn, being the elongated plumule of the seed. First used by Grew, in 1674. [B, 19, 39.]

ACROSPIRE, v. intr. A^{2}k'ro-spir. Ger., *keimen.* To sprout (said of corn). First used in 1616. [B, 39.]

ACROSPORÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-ro^{2}s'po-re(ra^3-e^2). Fr., *acrospores.* Ger., *Akrosporen.* Acrosporous *Fungi;* those in which the spores are developed at the extremities of their filaments, and not in asci. [B, 54.]

ACROSPORE, n. A^{2}k'ro^2-spor. From ἄκρος, topmost, and σπορά, a seed. Fr., *acrospore.* A spore generated at the extremity, or summit, of the hyphe of a *Fungus;* a basidiospore. [B, 39.]

ACROSPORIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-spo'ri^2-u^{3}m(u^{4}m). See OIDIUM.—**A. cerasi.** A pyrenomycetous *Fungus* not essentially different from *Cladosporium;* a parasite of the mazard, the fruit of which it causes to become stunted and dry. [A, 303.]

ACROSPOROUS, adj. A^{2}k-ro^{2}s'po-ru^{3}s. Fr., *acrosporé.* Sp., *acrósporo.* Pertaining to an acrospore, furnished with acrospores. [B, 39.]

ACROSTETHION (Lat.), n. n. A^{2}k(a^{3}k)-ro-ste^{2}th'i^2-o^{2}n. Gr., ἀκροστήθιον. The chest. [Aristotle (A, 311).]

ACROSTICHACEÆ, ACROSTICHEÆ (Lat.), n's f. pl. A^{2}k(a^{3}k)-ros-ti^{2}k(ti^{2}ch^2)-a(a^3)'se(ke^2)-e(a^3-e^2), -ti^{2}k(ti^{2}ch^2)'e^2-e(a^3-e^2). Fr., *acrostichacées.* Sp., *acrosticáceas.* A section of polypodineous ferns having the sori occupying nearly or quite the whole fructiferous surface. [A, 252, 337.]

ACROSTICHUM (Lat.), n. n. A^{2}k(a^{3}k)-ro^{2}s'ti^{2}k(ti^{2}ch^2)-u^{3}m(u^{4}m). Supposed to be from ἄκρον, a point or end, and στίχος, a line of poetry, because the reverse of the leaves shows traces of lines like the beginning of lines of verse. [A, 248.] Fr., *acrostic, acrostique.* Ger., *Zeilfarn.* Sp., *acróstico.* A genus of polypodiaceous ferns established by Linnæus. [A, 304, 305, 335.]—**A. alcicorne** [Willdenow]. See *A. furcatum.*—**A. aureum** [Linnæus]. Syn.: *Lonchitis palustris.* The typical species, found in tropical marshes. A decoction of the root is used in Jamaica for dysentery and disease of the spleen, and a salt prepared from the leaves is applied to ulcers. [A, 316, 352.]—**A. dichotomum** [Forskål]. Syn.: *Asplenium radiatum* [Swartz]. An Arabian species, termed *medjabese* or *mejahoese.* The bruised leaves are applied to burns. [A, 316, 344.]—**A. flavens** [Humboldt, Bonpland, and Kunth]. A New Granada species, used as a laxative. [Humboldt (A, 328).]—**A. furcatum** [Forster]. Fr., *acrostic corne d'elan.* Syn.: *A. alcicorne* [Willdenow]. *Lingua cervina.* Elk's-horn; a New Holland and New Zealand tree. The tuberous roots are eaten. [O. Reveil (A, 328).] According to others, a species that grows as a parasite on tropical trees. [A, 304.]—**A. huascaro** [Ruíz and Pavón]. A Peruvian species, said to be solvent, deobstruent, sudorific, and anthelminthic. [A, 258, 316.]—**A. polypodioides.** The *Polypodium incanum* (*q. v.*). [A, 313.]—**A. punctulatum** [Swartz]. A species used medicinally by the Chinese. [Fothergill (A, 344).]—**A. sorbifolium** [Willdenow]. A Jamaica species, the juice of which, "mixed with oil, ginger, and pepper," is used topically for sick headache. [A, 248; Waring (A, 316).]

ACROSTOMA (Lat.), n. n. A^{2}k(a^{3}k)-ro^{2}s'to-ma^3. From ἄκρος, a point, and στόμα, the mouth. Fr., *acrostome.* Sp., *acróstomo.* A genus of vesicular entozoa. [A, 334.]—**A. amnii.** A species that has been found in the amnion of the cow; supposed to be an immature *Cysticercus.* [Lesauvage (L, 18).]

ACROTARSIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-ta^{3}r'si^2-u^{3}m(u^{4}m). From ἄκρος, topmost, and ταρσός (see TARSUS). Fr., *acrotarse.* Ger., *Fussrücken.* Sp., *acrotarso.* The upper aspect of the tarsus in birds. [A, 306.]

ACROTERIA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ro-te(ta)'ri^2-a^3. Gen., *acroterio'rum.* Gr., ἀκρωτήρια. Fr., *acrotères.* Ger., *Akroterien.* Sp., *acroteria.* The extremities. [A, 305.]

ACROTERIASIS (Lat.), n. f. A^{2}k(a^{3}k)-ro-te(ta)-ri^2-a(a^3)'si^{2}s. Gen., *acroteria'seos.* From ἀκρωτηριάζειν, to mutilate by removing a prominent part. Fr., *acrotériasme.* Ger., *Akroteriasie.* It., *acroteriasi.* Sp., *acroteriasmo.* 1. Mutilation by the loss of the distal portion of a limb. 2. A monstrosity characterized by absence of the same part. [A, 311, 314.]

ACROTERIASMA, ACROTERIASMUS (Lat.), n's n. and m. A^{2}k(a^{3}k)-ro-te(ta)-ri^2-a^{2}z(a^{3}s)'ma^3, -mu^{3}s(mu^{4}s). Gen., *acroterias'matos (-tis), acroterias'mi.* See ACROTERIASIS.

ACROTERION (Lat.), n. n. A^{2}k(a^{3}k)-ro-te(ta)'ri^2-o^{2}n. See pl., ACROTERIA.

ACROTERIOSIS (Lat.), n. f. A^{2}k(a^{3}k)-ro-te(ta)-ri^2-o'si^{2}s. See ACROTERIASIS.

ACROTHAMNIUM (Lat.), n. n. A^{2}k(a^{3}k)-ro-tha^{2}m(tha^{3}m)'ni^2-u^{3}m(u^{4}m). From ἄκρον, a summit, and θαμνίον, dim. of θάμνος, a bush. Sp., *acrotamnio.* A genus of *Fungi* growing among mosses at the foot of trees. [A, 306.]

ACROTHIALDINE, n. A^{2}k-ro-thi'a^{2}l-den. For deriv., see ACROLEIC ACID and THIALDINE. A base produced by the action of ammonium sulphydrate on acrolein; a tertiary triamine, $C_9H_{13}NS_2 = N(C_3H_5)(C_3H_4SH)_2$. [B, 2.]

ACROTHOREX (Lat.), adj. A^{2}k(a^{3}k)-ro-tho're^{2}ks. Gr., ἀκροθώρηξ. Sp., *acrotórex.* 1. Easily intoxicated with wine. [Aristotle (A, 325).] 2. In the first (or, as occasionally used, an extreme) stage of intoxication. [A, 337.]

ACROTHYMION (Lat.), n. n. A^{2}k(a^{3}k)-ro-thi^{2}m(thu^{6}m)'i^2-o^{2}n. From ἄκρος, pointed, and θύμιον, a wart. Fr., *acrothymion.* Ger., *Akrothymion.* It., *acrotymion.* Sp., *acrotimion.* See CONDYLOMA *acuminatum.*

ACROTHYMIOSIS, ACROTHYMIUM (Lat.), n's f. and n. A^{2}k(a^{3}k)-ro-thi^{2}m(thu^{6}m)-i^2-o'si^{2}s, -thi^{2}m(thu^{6}m)'i^2-u^{3}m(u^{4}m). See ACROTHYMION.

ACROTICA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ro^{2}t'i^{2}k-a^3. From ἄκρος, outermost. J. M. Good's term for morbid conditions of the cutaneous glands and their secretions. [A, 357.]

ACROTISMUS (Lat.), n. m. A^{2}k(a^{3}k)-ro-ti^{2}z(ti^{2}s)'mu^{3}s(mu^{4}s).

From *α* priv., and *κρότος*, the pulse. Pulselessness, asphyxia. [Plouquet (A, 357).]

ACROZYMUS (Lat.), adj. A^{2}k(a^{3}k)-ro-zim(zu^{6}m)'u^{3}s(u^{4}s). Gr., *ἀκρόζυμος*. Slightly leavened. [Galen (A, 311).]

ACRUCIA, n. See ACROISA.

ACRUS (Lat.), n. m. A^{2}k(a^{3}k)'ru^{3}s(ru^{4}s). From *ἄκρος*, complete. A state of perfect health. [Hippocrates (A, 316).]

ACRYDIUM (Lat.), n. n. A^{2}k(a^{3}k)-ri^{2}d(ru^{6}d)'i^2-u^{3}m(u^{4}m). See ACRIDIUM.

ACRYL, n. A^{2}k'ri^{2}l. From *acer*, sharp, sour. Fr., *acryle*. Ger., *Acryl*. See ALLYL.

ACRYLATE, n. A^{2}k'ri^{2}l-at. Fr., *acrylate*. Ger., *acrylsaures Salz*. A salt of acrylic acid. [B.]

ACRYLIC ACID, n. A^{2}k-ri^{2}l'i^{2}k. Fr., *acide acrylique*. Ger., *Acrylsäure*. Syn.: *acroleic acid*. 1. A monobasic acid, $CH_2 \equiv CH.CO.OH = C_3H_4O_2$, which may be considered as the oxide of acrolein; a colorless liquid. 2. A general term for organic acids of the group $C_nH_{2n-2}O_2$, comprising two groups, the *normal acrylic* and the *isoacrylic* acids. The former either occur in vegetable or animal organisms or are derived from natural products; the latter are formed synthetically by the abstraction of the elements of water from certain acid ethers, which in turn are derived from oxalic acid by the substitution of 2 molecules of an alcohol radicle of the series C_nH_{2n+1} for an atom of oxygen. The general formula for the latter series is $C_2H_2O_3.2(C_nH_{2n+1}).H_2O = C_{2+2n}H_{4n+2}O_2 = C_mH_{2m-2}O_2$, where $m = 2n+2$. [B, 2, 4.]

ACRYLIC ALDEHYDE, n. Fr., *aldéhyde acrylique*. Ger., *Acrylaldehyd*. See ACROLEIN.

ACRYLSÄURE (Ger.), n. A^3'kru^{6}l-zoi''re^2. Acrylic acid. [A, 305.]—**A'äthylester.** Ethyl acrylate. [B.]

ACSUO, n. An alchemical name for red coral. [Ruland (A, 325).]

ACT, n. A^{2}kt. Lat., *actus* (from *agere*, to put in motion). Fr., *acte*. Ger., *Akt, Handlung, That, Werk*. It., *atto, azione*. Sp., *acto, hecho, acción*. The performance of a function or of a particular part of a function (e. g., a's of respiration).—**Imperative a.** The a. of a lunatic in obedience to an imperative morbid impulse. [D, 36.]—**Parturient a.** See PARTURITION.—**Sexual a.** See COITUS,

ACTÆA (Lat.), n. f. A^{2}k(a^{3}k)-te'(ta^3'e^2)-a^3. From *ἀκτῆ*, the elder-tree, from the resemblance of the berry and leaf to those of the elder. Fr., *actée*. Ger., *Actäa*. It., Sp., *actea*. Syn.: *Christophoriana* [Tournefort]. A genus of perennial herbaceous plants established by Linnæus, of the order *Ranunculaceæ*, tribe *Cimicifugeæ*, distinguished by the inflorescence being composed of numerous white flowers disposed in short racemes. [B.]—**A. alba.** [Bigelow]. White cohosh, white baneberry, necklace-weed, white beads, Noah's-ark, coral-and-pearl; a species formerly classed as a variety of *A. spicata*, found in most parts of the United States. It closely resembles the *A. spicata*, var. *rubra*. [J. U. and C. G. Lloyd, "Drugs and Med. of N. America," Sept., 1885, p. 232.]—**A. americana** [Pursh]. Under this genus-name were formerly included *A. alba* and *A. spicata*, var. *rubra*. [J. U. and C. G. Lloyd, *l. c.*]—**A. brachypetala** [De Candolle]. Syn.: *A. spicata* [Michaux]. A North American species having the same medicinal properties as *A. spicata*, and formerly confounded with it. [A, 260, 328, 344.]—**A. christophoriana.** See *A. spicata*.—**A. cimicifuga, A. monogyna, A. racemis longissimis.** See *A. racemosa*.—**A. racemosa** [Linnæus]. Fr., *actée à grappes* (ou *cimicifuge*), *chasse-punaise*. Ger., *traubenförmiges Schwarzkraut, schwarze Schlangenwurzel*. It., *actea en grappoli*. Syn.: *A. racemis longissimis* [Linnæus], *A. monogyna* [Walter], *Botrophis actœoides* [Rafinesque], *Serpentaria phylla, rich weed, black snakeroot*. See CIMICIFUGA *racemosa*.—**A. rubra** [Bigelow]. Red cohosh, red baneberry. A species having a hemispherical raceme and acute petals; considered by some botanists as *A. spicata* (seu *americana*), var. *rubra*. [B, 5.]—**A. spicata** [Linnæus]. Fr., *actée epiée* (ou *en épi*, ou *compacte*, ou *des Alpes*), *herbe St.-Christophe*, *faux ellébore noir*. Ger., *Schwarzkraut, ährentragendes Christophskraut*. It., *erba di S. Cristoforo, falso elleboro nero*. Syn.: *A. christophoriana, Aconitum racemosum*. Baneberry, herb Christopher; a species found widely distributed through Europe and (in the var. *rubra*, together with *A. alba*) in the United States. Its root (*radix actææ spicatæ*, seu *christophorianæ*, seu *aconiti racemosi*) is fusiform, blackish externally and yellowish within, and has a disagreeable odor, which it loses on drying. [B, 97.] The medicinal properties are probably the same as those of *cimicifuga racemosa* (*q. v.*). For the *A. spicata* of Michaux, see *A. brachypetala*.—**Radix actææ americanæ.** The root of *cimicifuga racemosa* (*q. v.*). [B.]—**Radix actææ spicatæ.** The root of *A. spicata*. [B.]

ACTÆA ALBA.
[J. U. and C. G. Lloyd.]

ACTÆA SPICATA. [A, 257.]

ACTÆÆ (Lat.), n. f., pl. of *actœa*. A^{2}k(a^{3}k)-te'(a^3'e^2)-e(a^3-e^2). Fr., *actées*. Ger., *Actäen*. See CIMICIFUGEÆ.

ACTE (Lat.), n. f. A^{2}k(a^{3}k)'te(ta). Gen., *actes*. Gr., *ἀκτῆ, ἀκτέα*. Fr., *acté*. Ger., *Attich*. An ancient name for a species of elder, probably the *Sambucus nigra* or the *Sambucus ebulus*. [Hippocrates (A, 311), Pliny (A, 312).]—**A's baccæ, A's granæ.** Elderberries. [A, 305.]

ACTE (Fr.), n. A^{3}kt. An act.—**Délire des a's.** See under DÉLIRE.

ACTÉE (Fr.), n. A^{3}k-ta. The genus *Actœa*. [B.]—**A. à grappes, A. cimicifuge.** See CIMICIFUGA *racemosa*.—**A. compacte, A. des Alpes, A. en épi, A. épiée.** See ACTÆA *spicata*.

ACTENBEERE (Ger.), n. A^{3}k'te^{2}n-bar-e^2. The dwarf-elder. [A, 315.] See SAMBUCUS *ebulus*.

ACTINÆSTHESIA (Lat.), n. f. A^{2}k(a^{3}k)''ti^{2}n-e^{2}s(a^3-e^{2}s)-the-(tha)'zi^2(si^2)-a^3. From *ἀκτίς*, a ray, and *αἴσθησις*, perception. Fr., *actinesthésie*. The faculty, possessed by certain larvæ, not only of perceiving light, but of distinguishing the direction from which it comes, although in that state they have no apparent external visual organ. [G. Pouchet (A, 321).]

ACTINAL, adj. A^{2}k'ti^{2}n-a^{2}l, a^{2}k-ti'na^{2}l. From *ἀκτίς*, a ray. Pertaining to that portion of a radiate which is in relation with the mouth, the most prominent organs being imagined to radiate from that point. [L. Agassiz (B, 39).]

ACTINARIA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ti^{2}n-a(a^3)'ri^2-a^3. Kent's name for the *Non-suctoria*. [B, 77.]

ACTINENCHYMA (Lat.), n. n. A^{2}k(a^{3}k)-ti^{2}n-e^{2}n'ki^2(ku^6)-ma^3. Gen., *actinenchym'atos* (*-is*). From *ἀκτίς*, a ray, and *ἔγχυμα*, a juice or a succulent material. Fr., *actinenchyme*. Ger., *strahlzelliges Gewebe*. Sp., *actinénquimo*. The cellular tissue of a plant when it has a radiated arrangement. [Hayne (A, 322).]

ACTINIÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-ti^{2}n'i^2-e(a^3-e^2). A division of the *Coralligena*, comprising the *Actinia* and allied genera. [B, 100.] Several of these animals were formerly used as aphrodisiacs, as depilatories, and as remedies for gravel. [A, 344.]

ACTINIC, adj. A^{2}k-ti^{2}n'i^{2}k. From *ἀκτίς*, a ray. Fr., *actinique*. Ger., *aktinisch*. 1. Having the power of exciting chemical action (see *A.* RAYS). 2. Pertaining to that power or its manifestation. [J. Herschel (B, 39).]

ACTINIDÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-ti^{2}n'i^{2}d-e(a^3-e^2). Fr., *actinidiens, anémones* (ou *orties*) *de mer*. Ger., *Aktinien, Seeanemonen, Seelilien*. The sea anemones; a family of marine animals of the class *Actinozoa*, order *Zoantharia*, sub-order *Malacodermata*, distinguished by having no evident corallum, by being rarely compound, and by having the power of locomotion. [A, 359.]

ACTINIFORM, adj. A^{2}k-ti^{2}n'i^2-fo^{2}rm. From *ἀκτίς*, a ray, and *forma*, form. Fr., *actiniforme*. Ger., *strahlenförmig*. Sp., *actiniforme*. Radiate; having the shape of a ray. [B, 39.] Cf. ACTINOID.

ACTINIIDÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-ti^{2}n-i(e)'i^{2}d-e(a^3-e^2). See ACTINIDÆ.

ACTINIOCHROME, n. A^{2}k-ti^{2}n'i^2-o-krom. From *ἀκτίς*, a ray, and *χρῶμα*, color. The red coloring matter of certain ACTINIAS. [A, 316.]

ACTINISCEÆ (Lat.), n. f. pl. A^{2}k(a^{3}k)-ti^{2}n-i^{2}s'se(ke^2)-e(a^3-e^2). In botany, a sub-family of the *Diatomaceæ*, having cells and stellate bristles. [A, 316.]

ACTINISM, n. A^{2}k'ti^{2}n-i^{2}zm. 1. The actinic property of rays of light. 2. The science of radiant light or heat. [R. Hunt, Craig (B, 39).]

ACTINIUM (Lat.), n. n. A^{2}k(a^{3}k)-ti^{2}n'i^2-u^{3}m(u^{4}m). A metal, said to have been discovered by Phipson in 1881, having the property of growing dark in direct sunlight. ["Chem. News," xliii, p. 283 (B).]

ACTINOBOLIA (Lat.), n. f. A^{2}k(a^{3}k)-ti^{2}n-o-bo'li^2-a^3. Gr., *ἀκτινοβολία* (from *ἀκτινοβολεῖν*, to send forth rays). Fr., *actinobolisme*. Ger., *Strahlenwerfen*. It., Sp., *actinobolismo*. Syn.: *diradiatio*. 1. Diradiation, irradiation; an old term for the process by which "the spirits" conveyed the impulses of the will to the various parts of the body. [A, 358.] 2. A term applied by Van Helmont to certain phenomena characterized by insensibility (constituting what is now called hypnotism), observed in 1646 by Kircher, in birds and other animals, as the result of their being made to look steadily at a brilliant object. [A, 314, 321.] Cf. MESMERISM and SYNCHYSIS.

ACTINOBOLISM, n. A^{2}k-ti^{2}n-o^{2}b'o-li^{2}zm. See ACTINOBOLIA.

ACTINOBOLISMUS (Lat.), n. m. A^{2}k(a^{3}k)-ti^{2}n-o^{2}b-o-li^{2}z(li^{2}s)'-mu^{3}s(mu^{4}s). See ACTINOBOLIA.

ACTINOCARPOUS, adj. A^{2}k-ti^{2}n-o-ka^{3}rp'u^{3}s. Lat., *actinocarpus* (from *ἀκτίς*, a ray, and *καρπός*, fruit). Fr., *actinocarpe*. Ger., *strahlenfrüchtig*. Sp., *actinocarpo*. In botany, having radiate fruits. [A, 306.]

ACTINOCERATE, ACTINOCEROUS, adj's. A^{2}k-ti^{2}n-o^{2}s'-e^{2}r-at, -u^{3}s. Lat., *actinoceratus, actinocerus* (from *ἀκτίς*, a ray, and

κέρας, a horn). In zoology, having horns or analogous parts arranged in a radiated form.

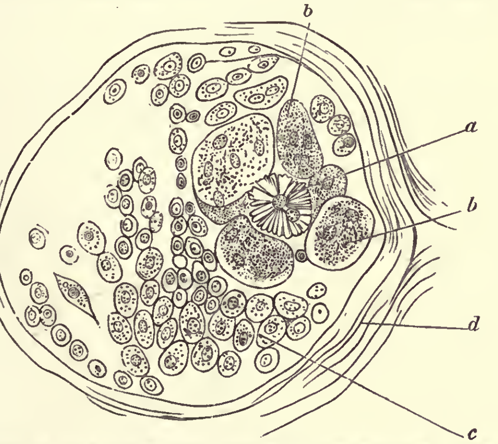
ACTINO-CHEMISTRY, n. A^{2}k″ti^{2}n-o-ke^{2}m′i^{2}st-ri^2. See under CHEMISTRY.

ACTINOGASTRA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ti^{2}n-o-ga^{2}s(ga^{3}s)′-tra^3. From ἀκτίς, a ray, and γαστήρ, the stomach. Haeckel's term for the star-fishes, from their having a radiated digestive apparatus. [B.]

ACTINOGRAPHY, n. A^{2}k-ti^{2}n-o^{2}g′ra^{2}f-i^2. From ἀκτίς, a ray, and γράφειν, to write. Fr., *actinographie*. See ACTINOLOGY.

ACTINOID, adj. A^{2}k′ti^{2}n-oid. Gr., ἀκτινοειδής, ἀκτινώδης. Lat., *actinodes, eradians*. Fr., *actinoïde*. Ger., *strahlenähnlich*. Having a radiate form (said of certain zoophytes in which the body-cavity is partitioned off by radial septa). [B, 39.]

ACTINOLOGY, n. A^{2}k-ti^{2}n-o^{2}l′o-ji^2. From ἀκτίς, a ray, and λόγος (see *-logy**). Fr., *actinologie*. Ger., *Strahlenlehre* (1st def.). 1. The science of radiant light. 2. That part of zoology which deals with the *Radiata*. [A, 306.]

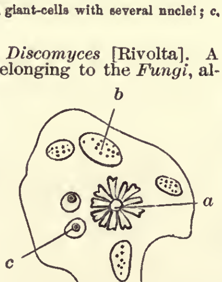


ACTINOMERE, n. A^{2}k-ti^{2}n′o-mer. From ἀκτίς, a ray, and μέρος, a part. Fr., *actinomère*. Sp., *actinómera*. A segment of a ctenophorous radiate animal included between two adjacent ctenophores. [A, 359.]

ACTINOMERIS (Lat.), n. f. A^{2}k(a^{3}k)-ti^{2}n-o^{2}m′e^2-ri^{2}s. From ἀκτίς, a ray, and μερίς, a portion. A genus of North American perennial herbs of the *Compositæ*, established by Nuttall; allied to the *Helianthus*. [A, 252, 360.]—**A. helianthoides** [Nuttall]. Gravel-weed; a species found on the Western prairies. Said to be useful for gravel and dropsy. ["Therap. Gaz.," Sept., 1881 (A, 247), A, 360.]—**A. squarrosa** [Nuttall]. Syn.: *Coreopsis alternifolia* [Linnæus]. A species found in western New York and the Western States. [A. 360.]

ACTINOMOMETRY, n. A^{2}k-ti^{2}n-o-mo^{2}m′e^{2}t-ri^2. From ἀκτίς, a ray, and μέτρον, a measure. Measurement of the heat radiated from a surface. [B, 39.]

ACTINOMORPHIC, ACTINOMORPHOUS, adj's. A^{2}k-ti^{2}n-o-mo^{2}rf′i^{2}k. -u^{3}s. From ἀκτίς, a ray, and μορφή, form. Fr., *actinomorphe*. Ger., *strahlenförmig*. Having a radiated form; developed symmetrically from a common center (said especially of flowers). [B, 75.]

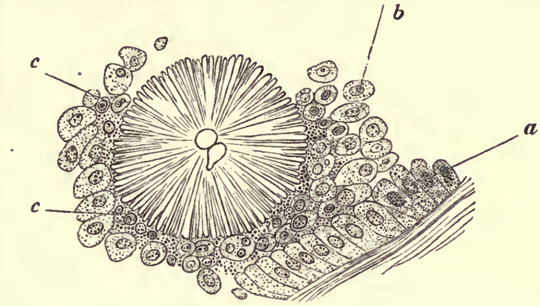


ACTINOMYCES (Lat.), n. m. A^{2}k(a^{3}k)-ti^{2}n-o^{2}m′i^2(u^6)-sez-(ke^{2}s). Gen., *actinomyce′tos* (*-is*). From ἀκτίς, a ray, and μύκης, a

SECTION OF AN ACTINOMYCOSIS NODULE IN A BRONCHIOLE. (AFTER MARCHAND [A, 319].)

a, an *Actinomyces* collection of recent formation; *b*, giant-cells with several nuclei; *c*, epithelioid cells; *d*, the fibrous wall of the bronchiole.

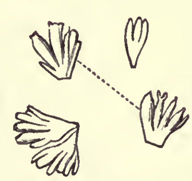
mushroom. Ger., *Strahlenpilz*. Syn.: *Discomyces* [Rivolta]. A genus of parasitic organisms probably belonging to the *Fungi*, although its affinities are uncertain. [B, 54.]—**A. bovis** [Harz]. The species that produces the disease termed actinomycosis (*q. v.*). A colony of A., as seen in the abscess-like cavities of actinomycosis, occurs in the form of small grains of a spherical or irregular shape and of a sulphur-yellow color, presenting an internal granular mass and an outer zone composed of the mycelia disposed in a radiating manner. These elements are cylindrical, claviform, or moniliform, and sometimes bifurcated. At its inner extremity each one of them terminates in a fibrilla which loses itself in the granular central zone of the nodule amidst a multitude of similar interlacing fibrillæ. The maximum diameter of the elements is from 3 to 10 μ, and their maximum length from 20 to 30 μ. They resist the action of strong acids, alkalies, ether, and chloroform, and do not present the reactions of albuminoids. [Firket, "Rev. de méd.," April, 1884, p. 273 (B).] See also ACTINOMYCOSIS.



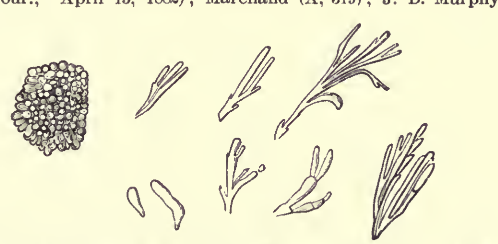
A STILL SMALLER ACTINOMYCES IN THE INTERIOR OF A GIANT-CELL. (AFTER MARCHAND [A, 319].)

a, the *Actinomyces*; *b*, lymph corpuscles; *c*, a nucleus of the giant-cell.

ACTINOMYCOMA (Lat.), n. n. A^{2}k(a^{3}k)-ti^{2}n-o-mi(mu^6)-ko′-ma^3. Gen., *actinomycom′atos* (*-tis*). For deriv., see ACTINOMYCES and *-oma.** Ger., *Actinomykom*. Johne's term for a tumor-like mass formed as a characteristic of the disease actinomycosis (*q. v.*). [Marchand (A, 319).]



ACTINOMYCOSIS (Lat.), n. f. A^{2}k(a^{3}k)-ti^{2}n-o-mi(mu^6)-ko′si^{2}s. Gen., *actinomyco′seos*. Fr., *actinomycose*. Ger., *Actinomycose*,



A LARGER ACTINOMYCES IN A LONGITUDINAL SECTION OF A BRONCHIOLE. (AFTER MARCHAND [A, 319].)

a, the epithelia of the bronchiole; *b*, epithelioid cells; *c*, lymph corpuscles.

Wurm, Knochenwurm, Strahlenpilzerkrankung. It., *actinomicosi*. Sp., *actinomicosis*. An infectious disease of cattle, first described by Bollinger, characterized mainly by tumor-like growths of the jaws, due to the lodgment and growth of the *Actinomyces bovis*. The substance of the tumors, which spring mostly from the alveoli of the lower molars, resembles that of certain sarcomata in having a granulation-like structure, but the growths contain abscess-like cavities inclosing sulphur-yellow bodies consisting of felted masses of the mycelia of the *Actinomyces*. The disease has also been observed in man, in connection with sinuses leading to the sockets of the teeth, or first making its appearance in the internal organs. It is chronic in its course, and, when it begins in the jaw, is prone to extend by continuity to the neck, the chest, or the vertebræ, and to end fatally. [Bollinger, Ponfick (abstr. in "Brit. Med. Jour.," April 15, 1882); Marchand (A, 319); J. B. Murphy,

THE SEPARATE PARTS, ISOLATED BY PRESSURE. (AFTER MARCHAND [A, 319].)

ELEMENTS OF ACTINOMYCES FROM A TUMOR OF AN OX'S JAW. (AFTER MARCHAND [A, 319].)

C. Fenger, W. T. Belfield, *et al.* ("N. Y. Med. Jour.," Jan. 3, 1885, p. 17).]

ACTINOMYCOTIC, adj. A^{2}k-ti^{2}n-o-mi-ko^{2}t′i^{2}k. Fr., *actinomycotique*. Ger., *actinomycotisch*. Pertaining to or depending on actinomycosis or the *Actinomyces*.

ACTINOPHOROUS, adj. A^{2}k-ti^{2}n-o^{2}f′o-ru^{3}s. Gr., ἀκτινοφόρος. Lat., *actinophorus*. Fr., *actinophore*. Sp., *actinóforo*. Spine-bearing, spiny. [B, 39.]

ACTINOPHRYIDÆ, ACTINOPHRYINA (Lat.), n's f. and n. pl. A^{2}k(a^{3}k)-ti^{2}n-o-fri(fru^6)′i^{2}d-e(a^3-e^2), -fri^2(fru^6)-i(e)′na^3. Ger., *Sonnenthierchen*. [A, 316.] A family of rhizopods, of which the typical genus is the *Actinophrys*. [A, 258.]

ACTINOPHTHALMIC, adj. A^{2}k-ti^{2}n-o^{2}p(o^{2}f)-tha^{2}l′mi^{2}k. Lat., *actinophthalmus* (from ἀκτίς, a ray, and ὀφθαλμικός, pertaining to the eye). Fr., *actinophthalme*. In zoology, having eyes the chorioidal tapetum of which reflects light to a high degree. [A, 306.]

ACTINOPHYLLUM (Lat.), n. n. A^{2}k(a^{3}k)-ti^{2}n-o-fi^{2}l(fu^{6}l)′lu^{3}m-(lu^{4}m). From ἀκτίς, a ray, and φύλλον, a leaf. Fr., *actinophylle*. Sp., *actinófila*. A genus of araliaceous trees, established by Ruiz and Pavón, indigenous to Peru. Two species, *A. angulatum* and *A. pediculatum*, furnish a gum resembling gum arabic. [A, 305, 344.]

ACTINOPHYTA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ti^{2}n-o^{2}f′i^{2}t(u^{6}t)-a^3. From ἀκτίς, a ray, and φυτόν, a plant. Fr., *actinophytes*. Ger., *Actinophyten*. Sp., *actinófitos*. Plants of the *Compositæ* the flowers of which are arranged in a radiate form. [A, 334.]

ACTINOSOMA (Lat.), n. n. A^{2}k(a^{3}k)-ti^{2}n-o-so′ma^3. Gen., *actinoso′matos* (*-tis*). From ἀκτίς, a ray, and σῶμα, a body. The entire body of an *Actinozoon*, whether simple or composed of several zooids. [A, 359.]

ACTINOSTEOPHYTE, n. A^{2}k-ti^{2}n-o^{2}s'te-o-fit. Lat., *actinosteophyton* (from ἀκτίς, a ray, ὀστέον, a bone, and φυτόν, a growth). Fr., *actinostéophyte, ostéophyte rayonné.* Ger., *Actinosteophyt, strahliges Knochengewächs.* A radiated osteophyte. [Lobstein (A, 322).]

ACTINOSTOMATOUS, adj. A^{2}k-ti^{2}n-o-sto^{2}m'a^{2}t-u^{3}s. From ἀκτίς, a ray, and στόμα, the mouth. Fr., *actinostome.* Ger., *strahlmundig.* [A, 316.] Sp., *actinóstomo.* In zoölogy, having the mouth radiated. [A, 334.]

ACTINOSTOME, n. A^{2}k-ti^{2}n'o-stom. Fr., *actinostome.* The mouth of a radiate animal. [L. Agassiz (B, 39).]

ACTINOSTOMOUS, adj. A^{2}k-ti^{2}n-o^{2}s'to-mu^{3}s. See ACTINOSTOMATOUS.

ACTINOTHYRIUM (Lat.), n. n. A^{2}k(a^{3}k)-ti^{2}n-o-thi^2(thu^6)'ri^2-u^{3}m(u^{4}m). From ἀκτίς, a ray, and θύριον, a cover, from the radiated integument of the sporidia. [A, 248.] Sp., *actinótiro.* A genus of *Fungi* of the *Pyrenomycetes*, established by Kunz. [A, 305.]

ACTINOTIC, adj. A^{2}k-ti^{2}n-o^{2}t'i^{2}k. Gr., ἀκτινωτός. Fr., *actinotique.* Ger., *actinotisch.* Radiate, provided with radii. [A, 305.]

ACTINOZOA (Lat.), n. n. pl. A^{2}k(a^{3}k)-ti^{2}n-o-zo'a^3. From ἀκτίς, a ray, and ζῷον, an animal. Fr., *actinozoaires.* Ger., *Strahlenthiere.* Sp., *actinozoarios.* Blainville's name for a class of marine animals, of which the sea-anemones are the type, of the sub-kingdom *Cœlenterata*, in which the alimentary canal, although opening below into the general body-cavity, is separated from the body-wall by a circumvisceral space frequently subdivided into compartments by radiating vertical partitions (mesenteries). [A, 328, 359; B, 28.]

ACTINOZOARIUS (Lat.), adj. A^{2}k(a^{3}k)-ti^{2}n-o-zo-a(a^3)'ri^2-u^{3}s(u^{4}s). Fr., *actinozoaire.* Ger., *strahlenthierig.* In zoölogy, having a regular radiated arrangement, either of the body itself or of the different organs. [Blainville (A, 316).]

ACTINOZOON (Lat.), n. n. A^{2}k(a^{3}k)-ti^{2}n-o-zo'o^{2}n. See pl., ACTINOZOA.

ACTINULA (Lat.), n. f A^{2}k(a^{3}k)-ti^{2}n'u^2(u)-la^3. A name given by Allman to the larval condition of the *Hydrophora*, when tentacles first form at the oral extremity. [B, 100.]

ACTION, n. A^{2}k'shu^{3}n. Lat., *actio, actus* (from *agere*). Gr., πρᾶξις, ἐνέργεια. Fr., *action, acte.* Ger., *Wirkung, Bewegung.* It., *azione.* Sp., *acción.* 1. In mechanics, the effect of a force, whether apparent or concealed. [B.] 2. Any chemical change. Cf. REACTION. 3. In physiology, the performance of a function. 4. In pathology, a morbid process (e. g., *febrile a.*). 5. In therapeutics, the operation of a drug.—**A. current.** See under CURRENT.—**A. of arrest.** See INHIBITION.—**Animal a's.** Lat., *actiones animales.* Fr., *a's animales.* Ger., *Seelenverrichtungen.* The operations of the mind and the voluntary movements of the body. [A, 322, 343.]—**Automatic a.** See *Reflex a.*—**Capillary a.** See *Capillary* ATTRACTION.—**Catalytic a., Contact a.** See CATALYSIS.—**Convulsive a.** See CONVULSIVE.—**Cumulative a.** See CUMULATIVE.—**Diastaltic a.** See *Reflex a.*—**Electro-capillary a.** The development of electrical phenomena as the result of chemical reaction taking place between two dissimilar liquids connected with each other by a capillary space the walls of which act to a certain extent as a conducting agent, and complete the circuit between the two liquids considered as a galvanic couple. When one of the liquids is a solution of a metallic salt, the metal set free by the reduction of the latter is deposited on the walls of the capillary space, often in sufficient quantity to shatter the containing medium. Electro-capillary a. has been thought by Becquerel and by Wartmann to play an important part in facilitating the processes of tissue-respiration and in the development of electrical currents in muscles and nerves. [B, 2.]—**Inhibitory a.** See INHIBITION.—**Local a.** 1. Chemical a. producing currents between different parts of the same cell of a galvanic battery, and detracting from the efficiency of the current external to the cells. [B.] 2. The a. of a remedy upon the parts with which it comes in contact, as distinguished from its a. on the system at large.—**Natural a's.** Lat., *actiones naturales.* Fr., *actions naturelles.* Ger., *natürliche Verrichtungen.* Those that serve the needs of organic life, like the ingestion and digestion of food. [A, 322, 343.]—**Peristaltic a.** See PERISTALSIS.—**Private a's.** An old term for those which concern only individual parts. [A, 343.]—**Pseudo-motor a.** Ger., *pseudomotorische Wirkung.* A term applied by Heidenhain to the phenomena observed as the result of stimulation of the chorda tympani after section of the hypoglossal nerve. Movements of the tongue result which he regards as due to increased secretion of the intramuscular lymphatics. [Landois (K).]—**Public a's.** An old term for those that concern the body as a whole, as opposed to *private a's.* [A, 343.]—**Reflex a.** Lat., *actio reflexa.* Fr., *acte* (ou *mouvement*, ou *phénomène*) *réflexe.* Ger., *Reflexbewegung.* It., *azione riflessa.* Sp., *acción reflexa.* Syn.: *automatic a., diastaltic a.* [M. Hall], *reflex.* An a. (usually an involuntary muscular movement) which takes place as the result of an impression made upon a sensory nerve, conveyed to the central nervous system, and thence reflected along an efferent or motor nerve to the part in which the a. occurs. [A, 321.]—**Respective a's.** Those peculiar to one organ. [A, 316.]—**Safety-valve a.** A condition described by Hunter, in which the tricuspid valve does not close completely, but allows a certain amount of blood to regurgitate from the ventricle into the auricle. The phenomenon occurs especially in cases of resistance in the pulmonary circulation. [K.]—**Sexual a.** The operation of the generative apparatus. [A, 336.]—**Vital a's.** Lat., *actiones vitales.* Fr., *actes* (ou *mouvements*) *vitaux.* Ger., *Lebensverrichtungen.* A's which, like those of the brain, the heart, and the lungs, are essential to the continuance of life. [A, 322.] Cf. REACTION.

ACTIVATE, v. tr. A^{2}k'ti^{2}v-at. Ger., *wirksam machen.* Sp., *activar.* To make active. [A, 361.]

ACTIVE, adj. A^{2}k'ti^{2}v. Lat., *activus.* Fr., *actif.* Ger., *aktiv, thätig, wirkend, wirksam.* It., *attivo.* Sp., *activo.* Acting or capable of acting, as opposed to *passive, inert, latent*, etc. For special applications of the word, see under ANEURYSM, ATROPHY, CONGESTION, DEMENTIA, DROPSY, ELECTRICITY, ELECTRODE, EXERCISE, FLUXION, HÆMORRHAGE, LIFE, PRINCIPLE, REMEDY, and TREATMENT.—**Optically a.** Ger., *optisch aktiv* (oder *wirksam*). Capable of rotating the plane of polarization of polarized light through a certain measurable arc. [B.]

ACTIVITY, n. A^{2}k-ti^{2}v'i^2-ti^2. Gr., ἐνέργεια. Lat., *activitas.* Fr., *activité.* Ger., *Activität, Thätigkeit, Wirksamkeit.* It., *attività.* Sp., *actividad.* Capability of action; vitality; sensibility. [A, 305.]—**Sense of muscular a.** See *Muscular* SENSE.

ACTON, n. A^{2}k'to^{2}n. A village in England, near London, having a spring of bitter, purgative waters, now disused, rich in magnesium sulphate. [A, 341, 343, 344.]

ACTUAL, adj. A^{2}kt'u^2-a^{2}l. Gr., ἐνεργός. Lat., *actual.* Fr., *actuel.* Ger., *wirklich.* It., *attuale.* Sp., *actual.* Acting immediately and manifestly, as opposed to *potential.* See *A.* CAUTERY.

ACTUARIUS (Lat.), n. m. A^{2}kt(a^{3}kt)-u^2(u)-a(a^3)'ri^2-u^{3}s(u^{4}s). Anciently, a scribe; a title of dignity (corresponding to that of subquæstor) conferred upon certain physicians in Constantinople. [A, 314.]

ACTUATION, n. A^{2}kt-u^2-a'shu^{3}n. Lat., *actuatio, incitatio ad agendum.* Ger., *Actuation, Anregung zu Thätigkeit.* Sp., *actuación.* 1. An old term expressing the supposed reaction of the vital powers on a drug after its ingestion, whereby it was made to exert its effect. [A, 358.] 2. See ACTINOBOLIA (1st def.).

ACTUS (Lat.), n. m. A^{2}kt(a^{3}kt)'u^{3}s(u^{4}s). Gen., *act'us.* From *agere*, to act. See ACT.

ACUA, n. A Brahmanic name for zedoary. [A, 344.]

ACUARIA (Lat.), n. f. A genus of *Filaridæ.* [Bremser (L, 6).]

ACUATE, v. tr. A^{2}k'u^2-at. Lat., *acuare.* Ger., *acuiren.* To sharpen, to make pungent or corrosive. [A, 315.]

ACUATE, adj. A^{2}k'u^2-at. Lat., *acuatus.* Sharp, sharpened. [A, 302.]

ACUCHIBALSAM (Ger.), n. A^3-ku'ch^{2}e-ba^{3}l''za^{3}m. See ACOUCHI BALSAM.

ACUCLAUSUR (Ger.), n. A^3-ku-kla^3-u-zur'. See ACUPRESSURE.

ACUDUCTOR (Lat.), n. m. A^{2}k(a^{3}k)-u^2(u)-du^{3}kt(dukt)'o^{2}r. Gen., *acuducto'ris.* From *acus*, a needle, and *ducere*, to conduct. Fr., *porte-aiguille.* Ger., *Nadelführer.* Syn.: *rhaphidagogus.* A needle-conductor. [A, 322.]

ACUFILOPRESSURE, n. A^{2}k-u^2-fi'lo-pre^{2}s-shur. From *acus*, a needle, *filum*, a thread, and *pressura*, pressure. Ger., *Acufilopressur.* It., *agofilopressura.* Billroth's term for a method of acupressure (*q. v.*) in which the vessel is confined between the needle on one side and a ligature which binds it against the needle on the other. [A, 314; E, 21.]

ACUI, n. A'ku-i^2. See AGUE.

ACUIREN (Ger.), v. tr. A^3-ku-e're^{2}n. See ACUATE.

ACUITCE-HUARIACUA (Sp.), n. A^3-kwet'tha-wa^3-re-a^3'-kwa^3. A West Indian plant, the juice of the root of which is used as a febrifuge, as a cardiac tonic, as an antidote in cases of poisoned wounds, to allay renal colic and ardor urinæ, and for various other purposes. [A, 337.]

ACUITION, n. A^{2}k-u^2-i^2'shu^{3}n. Lat., *acuitio* (from *acuere*, to sharpen). A sharpening or intensification of the action of a drug by the use of another drug. [A, 322.]

ACUITRE-HUARIACUA (Sp.), n. A^3-kwet'ra-wa^3-re-a^3'-kwa^3. See ACUITCE-HUARIACUA.

ACUITY, n. A^{2}k-u^2'i^{2}t-i^2. Gr., ὀξύτης. Lat., *acuitas.* Fr., *acuité.* Ger., *Schärfe.* It., *acutezza.* Sp., *agudeza.* 1. Acuteness, keenness. [A, 306.] 2. Acrimony. [A, 322.]—**Visual a.** Fr., *acuité visuelle.* Ger., *Sehschärfe.* It., *acutezza visuale.* Sp., *agudeza de la vista.* The keenness or perfection of vision at the macula lutea. [F.]

ACULA (Lat.), n. f., dim. of *acus.* A^{2}k(a^{3}k)'u^2(u)-la^3. Gr., ῥαφίδιον. A little needle. [A, 312.]

ACULARANTO (Ar.), n. A species of *Euphorbia.* [A, 337.]

ACULEATA (Lat.), n. n. pl. A^{2}k(a^{3}k)-u^2(u)-le(la)-a(a^3)'ta^3. See ACULEATES.

ACULEATE, ACULEATED, adj's. A^{2}k-u^2'le-at, -at-e^{2}d. Lat., *aculeatus.* Fr., *aculé.* Ger., *stachelig.* It., *aculeato.* Sp., *aculeado.* 1. In botany, provided with prickles. [B.] 2. In zoölogy, provided with a sting. [B, 39.]

ACULEATES, n. pl. A^{2}k-u^2'le-atz. Lat., *aculeata.* Fr., *aculés.* Ger., *Stachelträger.* Sp., *aculeíferos.* Cuvier's name for a division of hymenopterous insects having no ovipositor, but (except the males) a sting capable of being withdrawn. [A, 305.]

ACULEATO-CILIATUS (Lat.), adj. A^{2}k(a^{3}k)-u^2(u)-le(le^2)-a(a^3)''to-si^{2}l(ki^{2}l)-i^2-a(a^3)'tu^{3}s(tu^{4}s). From *aculeatus*, aculeate, and *cilium*, an eyelash. In botany, beset with bristles or points like the eyelashes. [A, 343.]

ACULEIFORM, adj. A^{2}k-u^2-le'i^2-fo^{2}rm. Fr., *aculéiforme.* Ger., *stachelförmig.* Sp., *aculeiforme.* Having the shape of a spine. [B, 39.]

ACULEOLATE, adj. A^{2}k-u^2'le-o-lat. From *aculeolus* (dim. of *aculeus*), a little prickle. Covered with small prickles or points. [Gray (A, 302).]

ACULEOUS, adj. A^{2}k-u^2'le-u^{3}s. Having the form of a prickle or sting. [B, 39.]

ACULEUS (Lat.), n. m. A^{2}k(a^{3}k)-u^2(u)'le(le^2)-u^{3}s(u^{4}s). Fr., *aigu-*

illon, épine. Ger., *Stachel*, *Legestachel* (3d def.). It., *aculeo.* 1. In botany, a prickle. [B.] 2. In zoology, a sting. [B, 39.] 3. The ovipositor of an insect. [A, 305.] 4. A thorn or a splinter-like foreign body. [A, 315.]

ACULON, ACULOS (Lat.), n's n. and m. A^{2}k(a^{3}k)'u^2(u)-lo^{2}n, -lo^{2}s. Gr., ἄκυλος. Sp., *áculos.* The ancient name of an edible acorn. [A, 311, 315, 337.]

ACUMEN (Lat.), n. n. A^{2}k(a^{3}k)-u^2(u)'me^{2}n. Gen., *acu'minis.* From *acuere*, to sharpen. Ger., *Vorspitze.* Sp., *acumen.* A point, a sting; a bony prominence, especially the tuberosity of the ischium. [Deventer (A, 325).] In botany, a sharp-pointed prolongation. [B.] —**A. nasi.** The pinching or pointed contraction of the nose that precedes death. [A, 312.]

ACUMETER, n. A^{2}k-u^2'me^{2}t-u^{5}r. See Acoumeter.

ACUMINATE, ACUMINATED, adj's. A^{2}k-u^2'mi^{2}n-at, -ate^{2}d. Gr., ἄκρος. Lat., *acuminatus.* Fr., *acuminé.* Ger., *zugespitzt.* It., *acuminato.* Sp., *acuminado, acumíneo.* In botany, becoming gradually narrow and pointed (said of leaves). A leaf is *a. at the base* when the narrowing begins near the base; but, if the leaf begins to be narrow only near its apex, it is said to be a. without any qualifying expression. [B.] Pointed (said of papules, etc.).

ACUMINATION, n. A^{2}k-u^2-mi^{2}n-a'shu^{3}n. Lat., *acuminatio.* Ger., *Zuspitzen.* The process of becoming or the state of being acuminate.

ACUMINIFEROUS, adj. A^{2}k-u^2-mi^{2}n-i^{2}f'e^{2}r-u^{3}s. From *acumen*, a point, and *ferre*, to bear. Fr., *acuminifère.* Ger., *spitztragend.* Sp., *acuminífero.* In zoology, having tubercles somewhat pointed. [A, 306.]

ACUMINIFOLIOUS, adj. A^{2}k-u^2-mi^{2}n-i^2-fo'li^2-u^{3}s. From *acumen*, a point, and *folium*, a leaf. Fr., *acuminifolié.* Ger., *spitzblättrig.* Sp., *acuminifoliado, foliagudo.* In botany, having acuminate leaves. [A, 306.]

ACUMINOSE, ACUMINOUS, adj's. A^{2}k-u^2'mi^{2}n-os, -u^{3}s. See Acuminate.

ACUMINULATE, adj. A^{2}k-u^2-mi^{2}n'u^2-lat. Dim. of *acuminate.* Having an abruptly tapered point. [A, 316.]

ACUOPHONIA (Lat.), n. f. A^{2}k(a^{3}k)-u^2(u)-o-fo'ni^2-a^3. See Acouophonia.

ACUPONCTURE (Fr.), n. A^3-ku^6-po^{2}n^2-tu^{6}r. Acupuncture.

ACUPRESS, v. tr. A^{2}k-u^2-pre^{2}s'. To treat by acupressure (*q. v.*). [A, 313.]

ACUPRESSION, n. A^{2}k-u^2-pre^{2}s'shu^{3}n. Lat., *acupressio.* See Acupressure.

ACUPRESSURE, n. A^{2}k-u^2-pre^{2}s'shur. Lat., *acupressura, acupressio* (from *acus*, a needle, and *premere*, to press). Fr., *acupressure, acupression.* Ger., *Acupressur, Acuclausur, Nadeldruck, Nadeldruckung.* It., *acupressura, agopressura, agopressione* [Rizzoli]. Sp., *acupresura, acupresión.* A process of arresting hæmorrhage from divided blood-vessels, or impeding the flow of blood through vessels that are not divided, by means of pressure with a needle passed into the tissues; advocated in 1859 by Sir J. Y. Simpson as "a new hæmostatic process founded on the principle of the temporary metallic compression of arteries." Similar procedures are said to have been employed before by Petit and Rizzoli. [Sir J. Y. Simpson, "Edinburgh Med. Jour.," Jan., 1860, p. 645; G. A. Peters, "N. Y. Med. Jour.," June, 1869, p. 225; L. Prengrueber, "Gaz. hebdom. de méd. et de chir.," July 8, 1870, p. 420; Hofmokl (A, 319).] Simpson's *first method* "consists in passing a needle through the flaps or sides of the wound, so as to cross over and compress the mouth of the bleeding artery or its tube, just in the same way as, in fastening a flower in the lapel of our coat, we cross over and compress the stalk of it with the pin which fixes it, and with this view push the pin twice through the lapel." [Peters, *l. c.*] In Simpson's *second method*, a pin or a needle armed with fine annealed iron wire, to facilitate its removal, is thrust into the fresh surface of the wound at a short distance from the bleeding vessel; passed on and its point made to emerge as near the vessel as possible without transfixing it; then on again over the vessel, completely compressing it; then its point dipped once more into the fresh surface close to the vessel on the opposite side; and forced on farther until its point emerges a second time on the cut surface. [Peters, *l. c.*] In Simpson's *third method*, a needle, threaded with twisted annealed iron wire, is thrust into the soft parts on one side of the artery, and carried on behind it, and the point is made to emerge on the opposite side of the vessel; a loop of wire is now passed over the point of the needle, brought back over the tract of the artery and behind the eye-end of the needle, drawn upon with force enough to close the vessel, and then

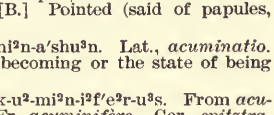


FIG. 1.—ACUPRESSURE BY SIMPSON'S FIRST METHOD. (AFTER PIRRIE AND KEITH [PETERS, *l. c.*].)
Cutaneous surface of the flap.

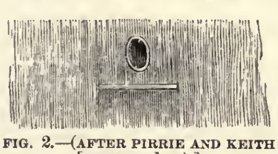

FIG. 2.—(AFTER PIRRIE AND KEITH [PETERS, *l. c.*).]
The inner surface of the same flap.

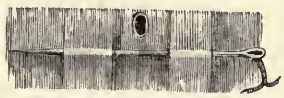

FIG. 3.—SIMPSON'S SECOND METHOD. (AFTER PIRRIE AND KEITH [PETERS, *l. c.*].)

fixed by a half-twist around the shank of the needle. J. C. Hutchison has modified this method, for application to the continuity of vessels, as follows: "The artery is first exposed by the usual incisions: a loop of wire about eight inches long is laid in the wound, parallel with and on the side of the vessel next the head-end of the pin; the pin is now carried through the flap, from its cutaneous surface, half an inch more or less (according to the depth of the vessel) back from the edge of the incision—say to bring it down to the level or plane of the artery, and then over the wire and beneath the vessel, without disturbing its . . . . relations . . . . . . When the pin has emerged from beneath the artery, the wire noose is thrown over the point-end, which is then carried through the opposite flap at a point corresponding to that at which it entered. The wire loop is next brought over the 'tract' of the vessel, which is now compressed between the pin below and the wire above; and, lastly, the wire is fixed by a half-turn around the pin." [Peters, *l. c.*] Simpson's *fourth method* is the same as the third, except that a pin is used instead of the threaded needle. [Peters, *l. c.*] The *fifth*, or *Aberdeen, method*, or *Aberdeen twist*, was devised independently by Knowles, of Aberdeen, and Simpson. There are two varieties. In the first variety, a pin or needle is passed under the artery as in Fig. 5; a half-rotation is then given to it, and its point is fixed in the tissues as in Fig. 6. In the second variety, the pin or needle is passed into the tissues by the side of and parallel with the artery; a quarter-rotation is then given to it, and it is fixed as in the first variety. [Peters, *l. c.*] In the *sixth method*, devised by Keith, of Aberdeen, a pin is passed under the artery; a loop of annealed iron wire is then thrown over its point, the two ends are crossed behind its shaft, the loop is drawn tight enough to compress the artery, and the wire is fixed by twisting it around the pin. [Peters, *l. c.*] In the *seventh method* (two varieties of which are shown in Fig. 8), the pin is passed through the tissues on either side of the artery, over which its middle portion rests, compressing the vessel upon the bone beneath. In a procedure the reverse of this (see Fig. 9), the needle is passed under the artery in

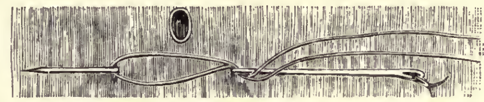

FIG. 4.—SIMPSON'S THIRD METHOD. (AFTER PIRRIE AND KEITH [PETERS, *l. c.*].)

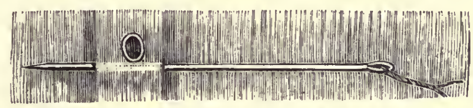

FIG. 5.—SIMPSON'S FIFTH METHOD. (AFTER PIRRIE AND KEITH [PETERS, *l. c.*].)
First step in the first variety.

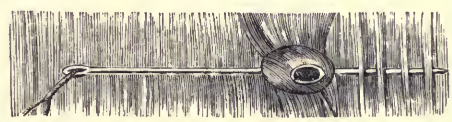

FIG. 6.—(AFTER PIRRIE AND KEITH [PETERS, *l. c.*].)
The same, after rotation.

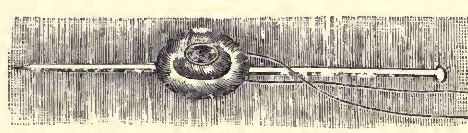

FIG. 7.—SIXTH METHOD. (AFTER PIRRIE AND KEITH [PETERS, *l. c.*].)

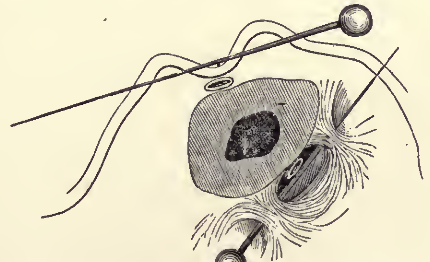

FIG. 8.—SEVENTH METHOD. (AFTER HOFMOKL [A, 319].)

such a manner that the tension of the included integument produces the necessary pressure. [Peters, *l. c.*; Hofmokl (A, 319).] In the *eighth method*, or *New York twist*, devised by G. Buck, the mouth of the bleeding vessel is seized with a thumb-forceps and given at least two full twists; a needle is then passed through the twisted artery and fixed by being thrust into the tissues beyond. [Peters, *l. c.*] Cf. ACUFILOPRESSURE and ACUTORSION.—**Compound a.** A method in which two needles are used, so made as to be capable of interlocking at the ends. [N. J. Aiken, "Am. Jour. of the Med. Sci.," July, 1865, p. 276.]

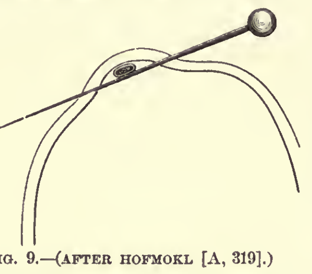

FIG. 9.—(AFTER HOFMOKL [A, 319].)

ACUPUNCTATION, ACUPUNCTUATION, n's. A^{2}k-u^2-pu^{3}nk-ta′shu^{3}n, -tu^2-a′shu^{3}n. See ACUPUNCTURE.

ACUPUNCTURAL, adj. A^{2}k-u^2-pu^{3}nk′tu^2-ra^{2}l. Used for acupuncture (said of needles, etc.). [A, 306.]

ACUPUNCTURATION, n. A^{2}k-u^2-pu^{3}nk-tu^2-ra′shu^{3}n. See ACUPUNCTURE.

ACUPUNCTURE, n. A^{2}k-u^2-pu^{3}nk′tu^{2}r. Gr., βαθύστιξις. Lat., *acupunctura* (from *acus*, a needle, and *punctura*, a puncture). Fr., *acupuncture, acuponcture, ponction capillaire.* Ger., *Acupunctur, Nadelstich, Nadelstechen, Tiefstechen.* It., *agopuntura.* Sp., *acupuntura.* The *kingking, zin king*, or *xinkien* of the Chinese; a method of treating diseases by plunging one or more needles deep into the body. It was introduced into Europe from China or Japan toward the close of the seventeenth century, and was much resorted to for a time. It is still used occasionally, mostly for neuralgia.—**Electrolytic a.** See *Electro-*PUNCTURE.—**Multiple a.** Fr., *a. multiple.* The procedure of making a number of punctures (e. g., into an abdominal cyst, to excite adhesion between the cyst and the abdominal wall, so that the former can be opened without opening the peritoneal cavity). [A. Trousseau, "Bull. gén. de thérap.," 1862, p. 517.]

ACURE, n. A^{2}k-u^{2}r′. See ACUITION.

ACUREB (Ar.), n. An alchemical name for glass. [Ruland (A, 325).]

ACURET (Ar.), n. An alchemical name for lead. [A, 337.]

ACURGIA (Lat.), n. f. A^{2}s(a^{3}k)-u^{5}r(ur)′ji^2(gi^2)-a^3. See ACIDURGIA.

ACURNIER (Fr.), n. A^3-ku^{6}r-ni^2-a. See CORNUS *mas.*

ACUROA (Sp.), n. A^3-ku-ro′a^3. A Guiana tree, the fruit of which is used for diseases of the skin. [A, 337.]

ACURON (Lat.), n. n. A^{2}k(a^{3}k)-u^2(u)′ro^{2}n. From α priv., and κυρεῖν, to happen, because it had no effect when taken internally. An old name for the water-plantain (*Alisma plantago*). [A, 343, 358.] Cf. ACYRUS.

ACURU, n. See ACUYARI.

ACUS (Lat.), n. f. A(a^3)′ku^{3}s(ku^{4}s). Gen., *a′cus.* Gr., ῥαφίς, βελόνη. Fr., *aiguille* (1st def.). Ger., *Nadel* (1st def.). It., *ago* (1st def.). Sp., *aguja* (1st def.). 1. A needle. 2. A probe. [Celsus (A, 312).] 3. An old botanical genus-name. 4. In anatomy, a median groove on the upper surface of the lamina medullaris transversa. [I, 6; K.]—**A. ad cataractam.** See *Cataract* NEEDLE.—**A. cannulata.** 1. A trocar and cannula. [A, 323.] 2. A hollow needle. [A, 316.]—**A. capitata.** A pin. [A, 313.]—**A. caroliuensis.** See *Carlsbad insect-*NEEDLE.—**A. cataractaria.** See *Cataract* NEEDLE.—**A. exploratoria.** See *Exploring* NEEDLE.—**A. interpunctoria.** See *Cataract* NEEDLE.—**A. invaginata.** See *Sheathed* NEEDLE.—**A. larga.** A broad, flat needle. [A, 356.]—**A. moschata.** An old name for alum-root (*Geranium maculatum*). [A, 358.]—**A. ophthalmica.** See *Cataract* NEEDLE.—**A. paracentetica, A. paracentica.** See TROCAR.—**A. pastoris.** The plant shepherd's-needle, or Venus's-comb (*Scandix pecten*). [A, 358.]—**A. pro ligatura.** See *Aneurysm* NEEDLE.—**A. pro setaceo.** See *Seton* NEEDLE.—**A. sutoria.** Ger., *Nähnadel.* A suture needle. [A, 356.]—**A. triangularis.** A triangular needle. [B.]—**A. triquetra.** 1. See *A. cannulata* (1st def.). 2. A triangular needle. [A, 316.]—**A. Veneris.** An old pharmaceutical name for the *Eryngium campestre.* [A, 344.]

ACUS (Lat.), n. n. A(a^3)′ku^{3}s(ku^{4}s). Gen., *a′ceris.* See ACHYRON.

ACUSIA (Lat.), n. f. A^{2}k(a^{3}k)-u^2(u)′zi^2(si^2)-a^3. From ἀκούειν, to hear. See AUDITION.

ACUSIMETER, ACUSIOMETER, n's. A^{2}k-u^2-si^{2}m′e^{2}t-u^{5}r, -zi^2-o^{2}m′e^{2}t-u^{5}r. See ACOUMETER.

ACUSIOS (Lat.), adj. A^{2}k(a^{3}k)-u^2(u)′zi^2(si^2)-o^{2}s. Gr., ἀκούσιος (from α priv., and ἑκούσιος, willing). Involuntary. [A, 322.]

ACUSIS (Lat.), n. f. A^{2}k(a^{3}k)-u^2(u)′si^{2}s). Gen., *acu′seos.* Gr., ἄκουσις. See AUDITION.

ACUSMA (Lat.), n. n. A^{2}k(a^{3}k)-u^{2}z(us)′ma^3. Gen., *acus′matos* (-*tis*). See ACOUSMA.

ACUSMETRICUS, ACUSMOMETRICUS (Lat.), adj's. A^{2}k(a^{3}k)-u^{2}z(us)-me^{2}t′ri^{2}k-u^{3}s(u^{4}s), -mo-me^{2}t′ri^{2}k-u^{3}s(u^{4}s). See ACOUSMETRIC.

ACUSTICA (Lat.), n. f. A^{2}k(a^{3}k)-u^{2}z(us)′ti^{2}k-a^3. See ACOUSTICS.

ACUSTICUS (Lat.), adj. A^{2}k(a^{3}k)-u^{2}z(us)′ti^{2}k-u^{3}s(u^{4}s). Acoustic. As a n. (*nervus a.*), the auditory nerve. [A, 343.]—**A'kerne** (Ger.). The auditory nuclei. [I, 6, 17; K.]—**A'strang** (Ger.). The fibers of origin of the auditory nerve. [I, 6; K.]—**A'wurzel** (Ger.). The root of the auditory nerve. [I, 17; K.]

ACUSTO (Ar.), n. An alchemical name for nitre. [Ruland (A, 325).] See POTASSIUM *nitrate.*

ACUTANGULATUS (Lat.), adj. A^{2}k(a^{3}k)-u^{2}t(ut)″a^{2}ng(a^{3}ng)-gu^2(gu)-la(la^3)′tu^{3}s(tu^{4}s). From *acutus*, acute, and *angulatus*, angular. Fr., *acutangulé.* Ger., *scharfeckig, spitzwinkelig.* Sp., *acutangulado.* Acute-angled (said of those parts of a plant that present acute and projecting angles; used also substantively as a species-name). [A, 320; B.]

ACUTE, adj. A^{2}k-u^{2}t′. Gr., ὀξύς. Lat., *acutus.* Fr., *aigu, chaud.* Ger., *acut, scharf, hitzig.* It., *acuto.* Sp., *agudo.* 1. Sharp-pointed. [B.] 2. Sharp and quick, as opposed to *chronic* (said of diseases). [D, 1.] Cf. SUBACUTE. 3. Sharp and severe (said of pain).

ACUTELLA (Lat.), n. f. A^{2}k(a^{3}k)-u^2(u)′te^{2}l′la^3. See ONONIS *spinosa.*

ACUTENACULUM (Lat.), n. n. A^{2}k(a^{2}k)″u^2(u)-te^{2}n-a^{2}k(a^{3}k)′-u^2(u)-lu^{3}m(lu^{4}m). From *acus*, a needle, and *tenaculum*, a holder. Gr., ῥαφιδαγωγός. Fr., *acuténacle.* Ger., *Nadelhalter.* Sp., *acutenáculo.* A needle-holder. [Hester (A, 358).]

ACUTICAUDAL, adj. A^{2}k-u^{2}t″i^2-ka^4′da^{2}l. From *acutus*, pointed, and *cauda*, a tail. Fr., *acuticaude.* Ger., *spitzschwanzig.* Sp., *acuticaude.* In zoölogy, pin-tailed, having the tail pointed. [A, 306.]

ACUTICORNOUS, adj. A^{2}k-u^{2}t″i^2-co^{2}rn′u^{3}s. From *acutus*, pointed, and *cornu*, a horn. Fr., *acuticorne.* Ger., *spitzgehörnt.* Sp., *acuticórneo.* Having the horns or the antennæ pointed. [A, 306.]

ACUTICOSTAL, adj. A^{2}k-u^{2}t″i^2-ko^{2}s′ta^{2}l. From *acutus*, pointed, and *costa*, a rib. Fr., *acuticosté.* Sp., *acuticosto.* Having the ribs or the sides of the body salient. [A, 337.]

ACUTIFLOROUS, adj. A^{2}k-u^{2}t-i^{2}f′lo-ru^{3}s. From *acutus*, pointed, and *flos*, a flower. Fr., *acutiflore.* Sp., *acutiflor, acutifloro.* In botany, having the segments of the corolla and of the calyx pointed. [A, 306.]

ACUTIFOLIATE, adj. A^{2}k-u^{2}t″i^2-fo′li^2-at. From *acutus*, pointed, and *folium*, a leaf. Fr., *acutifolié.* Ger., *spitzblättrig.* In botany, having the leaves pointed. [A, 306.]

ACUTILOBATE, adj. A^{2}k-u^{2}t″i^2-lo′bat. Lat., *acutilobus* (from *acutus*, pointed, and *lobus*, a lobe). Sp., *acutilóbulo.* In botany, having the lobes of the leaves pointed. [A, 306.] The Latin form is used as a species-name (e. g., *Hepatica acutiloba*).

ACUTIPENNATE, adj. A^{2}k-u^{2}t″i^2-pe^{2}n′nat. From *acutus*, pointed, and *penna*, a feather. Fr., *acutipenne.* Sp., *acutipenno.* In ornithology, having the tail-feathers terminating in a point. [A, 306.]

ACUTIROSTRATE, adj. A^{2}k-u^{2}t″i^2-ro^{2}s′trat. From *acutus*, pointed, and *rostrum*, a beak. Fr., *acutirostré.* Sp., *acutirostro.* In zoölogy, having a pointed beak. [A, 306.]

ACUTISSIMUS (Lat.), adj. A^{2}k(a^{3}k)-u^{2}t(ut)-i^{2}s′si^2-mu^{3}s(mu^{4}s). Superl. of *acutus*, acute. Extremely acute, malignant (e. g., *variola acutissima* = malignant small-pox).

ACUTITIGUEPO, n. The *Thalia geniculata.* [A, 344.]

ACUTORSION, n. A^{2}k-u^2-to^{2}r′shu^{3}n. From *acus*, a needle, and *torsio* (from *torquere*), a twisting. Fr., *acutorsion.* Ger., *Acutorsion.* It., *agotorsione.* Sp., *acutorción.* A method of applying acupressure (*q. v.*) by twisting the artery with the needle and fixing the latter by thrusting it into the tissues. [E.]

ACUTOSPINOUS, adj. A^{2}k-u^{2}t″o-spi′nu^{3}s. From *acutus*, pointed, and *spina*, a spine. Fr., *acuto-épineux.* Sp., *acuto-espinon.* Having several rows of sharp spines on the body (said of caterpillars). [A, 306.]

ACUTUS (Lat.), adj. A^{2}k(a^{3}k)-u^2(u)′tu^{3}s(tu^{4}s). From *acuere*, to sharpen. Acute.

ACUTUS (Lat.), adj. A^{2}k(a^{3}k)′u^2(u)-tu^{3}s(tu^{4}s). From α priv., and κύειν, to conceive. Barren. [A, 343.]

ACUYARI, n. An East Indian term for the aromatic wood of the *Icica altissima.* [A, 252, 258.]

ACVA, ACVARIUS (Lat.), n. f. and adj. A^{2}k(a^{3}k)′va^3(wa^3), -va(wa^3)′ri^2-u^{3}s(u^{4}s). See AQUA and AQUARIUS.

ACYANOBLEPSIA (Lat.), n. f. A^{2}s(a^{3}k)-i(u^6)″a^{2}n(a^{3}n)-o-ble^{2}p′si^2-a^3. From α priv., κυάνεος, blue, and βλέπειν, to see. Fr., *acyanoblepsie, cécité pour bleu.* Ger., *Acyanoblepsie, Nichtblausehen, Blaublindheit.* It., *cecità per azzurro.* Sp., *ceguera por azul.* Syn.: *acyanopsia.* See *Blue-*BLINDNESS.

ACYANOBLEPTIC, adj. A^{2}s-i″a^{2}n-o-ble^{2}p′ti^{2}k. Lat., *acyanoblepticus.* Pertaining to, or affected with, acyanoblepsia. [A, 322.]

ACYANOPSIA (Lat.), n. f. A^{2}s(a^{3}k)-i(u^6)″a^{2}n(a^{3}n)-o^{2}p′si^2-a^3. From α priv., κυάνεος, blue, and ὄψις, sight. Ger., *Acyanopsie.* See *Blue-*BLINDNESS.

ACYCLIA (Lat.), n. f. A^{2}s(a^{3}k)-i^{2}k(u^{6}k)′li^2-a^3. From α priv., and κυκλεῖν, to circulate. Fr., *acyclie.* Ger., *Stillstand des Säfteumlaufs.* A general suspension of the circulation of the fluids of the body. [Grossi (A, 322).]

ACYCLIC, adj. A^{2}s-i^{2}k′li^{2}k. From α priv., and κύκλος, a circle. Fr., *acyclique.* Ger., *acyklisch.* 1. In botany, having the parts of the flower arranged in spirals instead of in distinct whorls, and with no line of separation between the different groups of organs composing the flower. [B, 75.] 2. Irregular (said of the sequence of phenomena in disease). [B.]

ACYESIS (Lat.), n. f. A^{2}s(a^{3}k)-i(u^6)-e(a)'si^{2}s. Gen., *acye'seos.* Gr., ἀκύησις (from α priv., and κυεῖν, to conceive). Fr., *acyésie.* Ger., *Akyesis.* 1. The non-existence of pregnancy. 2. Sterility in the female. [A, 305.] 3. According to some authors, incapability of being delivered naturally. [A, 320.]

ACYETERION (Lat.), n. n. A^{2}s(a^{3}k)-i(u^6)-e^{2}t-e(a)'ri^2-o^{2}n. Gr., ἀκυητήριον. Ger., *Akyeterion.* 1. A means of preventing conception. [A, 305.] 2. An abortifacient drug. [A, 311.]

ACYETIC, adj. A^{2}s-i-e^{2}t'i^{2}k. Lat., *acyeticus.* Pertaining to, or the subject of, acyesis (*q. v.*). [A, 322.]

ACYISIS (Lat.), n. f. A^{2}s(a^{3}k)-i^2(u^6)-i(e)'si^{2}s. See Acyesis.

ACYLOS (Lat.), n. f. A^{2}s(a^{3}k)'i^{2}l(u^{6}l)-o^{2}s. Gr., ἄκυλος. The acorn of the holm-oak. [Pliny (A, 312).]

ACYMON (Lat.), adj. A^{2}s(a^{3}k)'i^{2}m(u^{6}m)-o^{2}n. Gen., *acym'onos* (*-is*). Gr., ἀκύμων (from α priv., and κύειν, to conceive). Barren. [A, 311.]

ACYNOS (Lat.), n. m. A^{2}s(a^{3}k)'i^{2}n(u^{6}n)-o^{2}s. See Acinos.

ACYOBLEPSIA (Lat.), n. f. A^{2}s(a^{3}k)-i(u^6)-o-ble^{2}p'si^2-a^3. See Acyanoblepsia.

ACYRUS (Lat.), n. n. A^{2}s(a^{3}k)-i(u^6)'ru^{3}s(ru^{4}s). Gen., *acyr'eis.* From α priv., and κῦρος, authority, from its slight repute. [A, 343.] An old name for German leopard's-bane (*Doronicum scorpioides*), a plant allied to the genus *Arnica.* [A, 358.] According to others, the *Arnica montana.* [A, 313, 316, 336, 343.]

ACYSIS (Lat.), n. f. A^{2}s(a^{3}k)'i^{2}s(u^{6}s)-i^{2}s. Gen., *acys'eos.* From α priv., and κύειν, to conceive. Fr., *acysie.* See Acyesis.

ACYSTIA (Lat.), n. f. A^{2}s(a^{3}k)-i^{2}st(u^{6}st)'i^2-a^3. From α priv., and κύστις, the bladder. Fr., *acystie.* A monstrosity characterized by absence of the urinary bladder. [A, 306.]

ACYSTINERVIA, ACYSTONERVIA (Lat.), n's f. A^{2}s(a^{3}k)-i^{2}st(u^{6}st)''i^2-nu^{6}r(ne^{2}r)'vi^2(wi^2)-a^3, -o-nu^{6}r(ne^{2}r)'vi^2(wi^2)-a^3. From α priv., κύστις, the bladder, and νεῦρον, a nerve. Fr., *acystinervie.* Paralysis of the bladder. [A, 301.]

ACYSTURONERVIE (Fr.), n. A^3-si^{2}st-u^6-ro-ne^{2}r-ve. From α priv., κύστις, the bladder, οὖρον, urine, and νεῦρον, a nerve. Piorry's term for paralysis of the urinary bladder. [A, 250.]

ACYSTUROTROPHIE (Fr.), n. A^3-si^{2}st-u^6-ro-tro-fe. From α priv., κύστις, the bladder, οὖρον, urine, and τρέφειν, to nourish. Piorry's term for atrophy of the urinary bladder. [A, 250.]

ACYTERION, ACYTERIUM (Lat.), n's n. A^{2}s(a^{3}k)-i^{2}t(u^{6}t)-e(a)'ri^2-o^{2}n, -u^{3}m(u^{4}m). See Acyeterion.

ACYTTARIA (Lat.), n. n. pl. A^{2}s(a^{3}k)-i^{2}t(u^{6}t)-ta(ta^3)'ri^2-a^3. From α priv., and κύτταρος, a cell. In zoology, the lowest legion of rhizopods. [Haeckel (A, 258).]

ADA, n. 1. The root of an extremely poisonous Numidian plant. [A, 337.] 2. An East Indian name for ginger. [Roxburgh (A, 328).]

ADABADANI, n. A British Guiana tree, the fresh bark of which is a rapid vesicant. [Hooker and Waring (A, 316).]

ADACA, n. A Malabar name for the *Sphæranthus indicus* (*q. v.*).

ADACRYA (Lat.), n. f. A^{2}d(a^{3}d)-a^{2}k(a^{3}k)'ri^2(ru^6)-a^3 From α priv., and δακρύειν, to shed tears. Ger., *Thränenmangel.* A deficient secretion of tears. [A, 322.]

ADACTYL, ADACTYLE, n's. A^{2}d-a^{2}k'ti^{2}l. From α priv., and δάκτυλος, a finger. A limb destitute of digits. [A, 347.]

ADACTYLIA (Lat.), n. f. A^{2}d(a^{3}d)-a^{2}k(a^{3}k)-ti^{2}l(tu^{6}l)'i^2-a^3. It., *adactilia.* A monstrosity characterized by lack of all or a portion of the digits. [A, 314.]

ADACTYLOUS, adj. A^{2}d-a^{2}k'ti^{2}l-u^{3}s. Lat., *adactylus.* Fr., *adactyle.* Sp., *adáctilo.* Without digits (said of crustaceans having the anterior limbs without digits). [A, 306.]

ADAGGREGATED, adj. A^{2}d-a^{2}g'gre^{2}g-a-te^{2}d. From *ad*, to, and *aggregare*, to attach to. Fr., *adagrégé.* United by some part of the body (said of individual organisms). [A, 316.]

ADAI, n. An Abyssinian name for the *Salvadora persica* (*q. v.*). [A, 316.]

ADAIGES, n. Sal ammoniac. [A, 358.] See Ammonium *chloride.*

ADA-KODIEN, n. The Malabar name of a plant, supposed to belong to the *Apocynaceæ*, much used in India as an astringent and antophthalmic. [A, 321.]

ADAL, n. A term used by Paracelsus to denote that part of a plant which contained the active principle. [A, 325.]

ADALI, ADALY, n's. 1. A verbenaceous plant, the juice of which, mixed with powdered pepper, is esteemed in India an antidote to the venom of certain snakes. [A, 306.] 2. The Malabar name of the *Zapania nodiflora* (*q. v.*). [A, 321, 348.]

ADAM-AND-EVE, n. A^{2}d'a^{2}m-a^{2}nd-ev'. Ger., *gefleckte Knabenkraut.* 1. The *Orchis maculata.* [A, 258, 315.] 2. The *Aplectrum hiemale.* [A, 252.]

ADAMANT, n. A^{2}d'a^{2}m-a^{2}nt. Gr., ἀδάμας (from α priv., and δαμάζειν, to overpower). Lat., *adamas.* Fr., *diamant.* Ger., *Demant, Diamant.* It., Sp., *adamante.* 1. The diamond. 2. A magnet. [A, 315.]

ADAMANTINA (Lat.), n., f. of adj. *adamantinus* (*substantia* understood). A^{2}d(a^{3}d)-a^{2}m(a^{3}m)-a^{2}n(a^{3}n)'ti^{2}n-a^3. Enamel. [B.]—**Organon adamantinæ.** See *Enamel* organ.

ADAMANTINE, adj. A^{2}d-a^{2}m-a^{2}nt'i^{2}n. Gr., ἀδαμάντινος. Lat., *adamantinus.* Fr., *adamantin.* Ger., *demantähnlich.* It., Sp., *adamantino.* 1. Pertaining to the enamel of the teeth. [J.] 2. Resembling the diamond. [B.]—**A. substance.** Fr., *croûte* (ou *couche*) *a.* See Enamel.

ADAMANTINUS (Lat.), adj. A^{2}d(a^{3}d)-a^{2}m(a^{3}m)-a^{2}n(a^{3}n)'ti^{2}n-u^{3}s(u^{4}s). Adamantine. [J.]—**Crusta dentium adamantina.** See Enamel.

ADAMANTIS (Lat.), n. f. A^{2}d(a^{3}d)-a^{2}m(a^{3}m)-a^{2}n(a^{3}n)'ti^{2}s. Gen., *adamant'idis.* Fr., *adamante.* An ancient magic herb—so called because it could not be bruised or crushed, or, according to some, because it was supposed to have the power of taming lions. [A, 306, Pliny (A, 312).]

ADAMAS (Lat.), n. m. A^{2}d(a^{3}d)'a^{2}m(a^{3}m)-a^{2}s(a^{3}s). Gen., *adamant'is.* Gr., ἀδάμας. 1. Enamel. [J.] 2. The diamond. 3. An old name for the hardest metal, probably steel. [A, 311.] 4. A compound of gold and steel. [A, 311.] 5. The Apuleian name of *Hyoscyamus.* [Waring (A, 316).]

ADAMBULACRAL, adj. A^{2}d-a^{2}m-bu^2-la^{2}k'ra^{2}l. From *ad*, against, and *ambulacrum*, a walk planted with trees. See *A.* ossicles.

ADAMENON (Lat.), n. n. A^{2}d(a^{3}d)-a^{2}m(a^{3}m)'e^{2}n-o^{2}n. See Adamnon.

ADAMICUS (Lat.), adj. A^{2}d(a^{3}d)-a^{2}m(a^{3}m)'i^{2}k-u^{3}s(u^{4}s). Fr., *adamique.* Lit., relating to Adam (formerly applied to any red earth, from the notion that Adam was made of red earth). [A, 322.] See Terra *adamica.*

ADAMI MORSUS (Lat.), n. m. A^{2}d(a^{3}d)-a(a^3)'mi(me)-mo^{2}r'-su^{3}s(su^{4}s). Sp., *adamimorso.* See Pomum *Adami.*

ADAMITA (Lat.), n. f. A^{2}d(a^{3}d)-a^{2}m(a^{3}m)-i(e)'ta^3. A vesical calculus. [Paracelsus (A, 325).]

ADAMITUM (Lat.), n. n. A^{2}d(a^{3}d)-a^{2}m(a^{3}m)-i(e)'tu^{3}m(tu^{4}m). Lithiasis. [Paracelsus (A, 325).]

ADAMNON (Lat.), n. n. A^{2}d(a^{3}d)-a^{2}m(a^{3}m)'no^{2}n. From ἄδαμνος, insuperable. See Adamas (5th def.).

ADÄMONIE (Ger.), n. A^3-da-mon-e'. See Ademonia.

ADAMSAPFEL (Ger.), n. A^{3}d'a^{3}mz-a^{3}p-fe^{2}l. Adam's apple: 1. The fruit of the *Citrus medica cedra.* 2. That of the *Lycopersicum esculentum.* [A, 305.] 3. The *Yucca gloriosa.* [B.] 4. The prominence of the thyreoid cartilage. See Pomum *Adami.*—**A'baum.** See Citrus.

ADAM'S APPLE, n. A^{2}d'a^{2}mz-a^{2}p'pl. Fr., *pomme d'Adam.* Ger., *Adamsapfel.* It., *pomo d' Adamo.* Sp., *adaminorso.* 1. See Pomum *Adami.* 2. The fruit of the plantain-tree (*Musa paradisiaca*). [A, 248.]

ADAMS COUNTY SPRINGS, n. pl. A^{2}d'a^{2}mz-ku^5'un-ti^2-spri^{2}ngz'. Two springs in Ohio, 94 miles from Cincinnati, of a temp. of 56° F., containing magnesium chloride, calcium sulphate, carbonate, and chloride, sodium chloride, and iron oxide. [A, 363.]

ADAM'S-FLANNEL, n. Fla^{2}n'ne^{2}l. Ger., *weisses Wollkraut.* The mullein. [B.] See Verbascum *thapsus.*

ADAM'S-NEEDLE, n. Ne'dl. Ger., *Adamsnadel.* The botanical genus *Yucca.* [A, 315.]

ADAMS SPRINGS, n. pl. Springs in Lake Co., California, about 2 miles from Cobb Valley, between the Geysers and Seigler's. The waters are said to resemble those of Vichy. One pint contains:

Sodium carbonate	7·129 grains.
Magnesium carbonate	12·378 "
Iron carbonate	0·064 grain.
Calcium carbonate	3·589 grains.
Sodium chloride	0·514 grain.
Potassium salts } Nitric acid }	traces.
Silica	0·902 grain.
Organic matter	0·351 "
Carbon dioxide	38 cubic in.

["Second Bienn. Rep. of the State Bd. of Health of California" (A, 363).]

ADANE (Fr.), n. A^3-da^{3}n. The sturgeon that furnishes caviare [A, 306.]

ADANSONIA (Lat.), n. f. A^{2}d(a^{3}d)-a^{2}n(a^{3}n)-so'ni^2-a^3. Fr., Ger., *Adansonie.* A genus of trees, established by Linnæus, of the natural order *Bombaceæ*, distinguished by their great size; named in honor of Michel Adanson, a French botanist of the eighteenth century. [B.]—**A. baobab** [Gärtner]. See *A. digitata.*—**A. digitata** [Linnæus]. Ger., *Affenbaum, Affenbrodbaum.* Baobab; a species indigenous to Africa, having a trunk 70 or 80 feet high and very thick, sometimes attaining a diameter of 30 feet. The branches also are very large and spreading, and bear pendent white flowers and a woody fruit from 8 to 18 inches long, resembling a gourd. [B, 19.] The fruit, called *bouï* or monkey-bread (Fr., *pain de singe, calebasse du Sénégal*), is highly esteemed as a food and medicine; its pulp, mixed with sugar, is used in preparing a drink used in the treatment of putrid and pestilential fevers. The bark is emollient. The leaves, dried and powdered, constitute *lalo*, which the negroes use as a remedy for hæmoptysis, dysentery, and intermittent fever. [A, 260, 321.]—**A. Gregorii.** Sour-gourd, cream-of-tartar tree; an Australian species. The pulp of the fruit has a refreshing acid taste, like cream of tartar, and contains gum, starch, sugar, and malic acid. [A, 252.]

ADANSONINE, n. A^{2}d-a^{2}n'so^{2}n-en. Fr., *adansonine.* Ger., *Adansonin.* A white, crystallizable, bitter alkaloid obtained from the bark and leaves of the *Adansonia digitata*; used as a febrifuge. [S. Martin, "Bull. gén. de thérap.," lxxii, 1867, p. 360.]

ADAPTATION, n. A^{2}d-a^{2}p-ta'shu^{3}n. Lat., *adaptatio* (from *adaptare*, to adjust). Fr., *adaptation.* Ger., *Adaptation, Anpassung.* It., *adattamento.* Sp., *adaptación.* 1. The faculty possessed by an organism of accommodating itself to varying surroundings. [W. Preyer (A, 319).] See Acclimatization. 2. The adjustment of the size of the pupil in accordance with the amount of light that reaches the eye, or, as used by some authors, the func-

tion of accommodation (*q. v.*). [W. Preyer (A, 319).] 3. See COAPTATION.

ADAPTER, n. A^{2}d-a^{2}p'tu^{5}r. From *adaptare*, to adjust. Fr., *allonge*. Ger., *Vorstoss*. Sp., *alagadera*. A piece of tube, of more or less conical form, used to elongate the neck of a retort so as to connect it with a receiver. [B, 2.]

ADAPTION, n. A^{2}d-a^{2}p'shu^{3}n. An obs. form of *adaptation* (*q. v.*).

ADAPU CURRIE, n. A Tamul name for charcoal. [A, 344.]

ADARCA (Lat.), n. f. A^{2}d(a^{3}d)-a^{3}r'ka^3. See ADARCE.

ADARCE (Lat.), n. f. A^{2}d(a^{3}d)-a^{3}r'se(ka). Gen., *adar'ces*. Gr., ἀδαρκη. Fr., *adarce*, *adarcès* (2d def.). Ger., *Meerschaum*. Sp., *adarce*. 1. An ancient name for a spongy saline incrustation formed on the herbage of salt marshes; formerly used in the treatment of freckles and other blemishes of the skin. [Dioscorides (A, 311), A, 321, 334, 358.] 2. A calcareous deposit from certain mineral waters. [A, 337, 348.]

ADARCION, ADARCIS, ADARCOS (Lat.), n's. n., f. and m. A^{2}d(a^{3}d)-a^{3}r'si^2(ki^2)-o^{2}n, -si^{2}s(ki^{2}s), -ko^{2}s. See ADARCE.

ADARIGO, n. An alchemical name for orpiment. [Ruland (A, 325).]

ADARNECH, n. See AZARNET.

ADARTICULATION, n. A^{2}d''a^{3}r-ti^{2}k-u^2-la'shu^{3}n. Lat., *adarticulatio*. Fr., *adarticulation*. Ger., *Gelenkverbindung*. It., *adarticolazione*. Sp., *adarticulación*. Ingrassias's name for arthrodia (*q. v.*). [A, 314.]

ADAS, n. A Japanese name for fennel (*Anethum fœniculum*), also for *Hyoscyamus niger*. [A, 362.]—**A. pedas.** A Malay name for *Hyoscyamus niger*. [A, 362.]

ADASARA PAKU, n. A Teloogoo name for the *Justicia adhatoda*. [A, 362.]

ADATINA-PALAY, n. Fr., *adatinapalé*. An East Indian name for the *Aristolochia bracteata*. [A, 321.]

ADATODA, n. See ADHATODA.

ADATODEY ELLEY, n. A Tamul name for the *Justicia adhatoda*. [A, 362.]

ADAXOMA (Lat.), n. n. A^{2}d(a^{3}d)-a^{2}x(a^{3}x)-o'ma^3. Gen., *adaxom'atos* (*-tis*). From ἀδάξασθαι (= ὀδάξασθαι), to feel a biting, stinging pain. Sp., *adaxoma*. An itching, lancinating, or burning pain. [Hippocrates (A, 325).]

ADCLIVITAS (Lat.), n. f. A^{2}d(a^{3}d)-kli^2'vi^2(wi^2)-ta^{2}s(ta^{3}s). More properly written *acclivitas*. Gen., *adclivita'tis*. Fr., *adclivité*. Ger., *Adclivität*. It., *adclività*. An acclivity, an elevation.—**A. tibiæ.** Ger., *Adclivität der Tibia*. The rough projection on the summit of the tibia, between the two articular surfaces. [Loder (A, 320).]

ADDA (Ar.), n. Lat., *Scincus officinalis*. Fr., *scinque officinal*. A small species of lizard, esteemed in Eastern countries as a remedy for various skin diseases. [A, 251, 348.]

ADDAD, n. See ADA (1st def.).

ADD-ADD, n. An Oriental name for the leaves of the *Celastrus obscurus*. [B.]

ADDALEY UNNAY, n. An East Indian name for the *Jatropha glauca*. [A, 344.]

ADDATINAPALEY, n. See ADATINA-PALAY.

ADDENTAL, n. A^{2}d-de^{2}nt'a^{2}l. From *ad*, to, and *dens*, a tooth. Geoffroy's name for the maxillary bone of Owen in fishes. [L, 27.]

ADDEPHAGIA (Lat.), n. f. A^{2}d(a^{3}d)-de^{2}f-a(a^3)'ji^2(gi^2)-a^3. See ADEPHAGIA.

ADDEPHAGOUS, adj. A^{2}d-de^{2}f'a^{2}g-u^{3}s. See ADEPHAGOUS.

ADDERLOCK, n. A Dutch name for the *Allium victoriale*. [A, 344.]

ADDER'S-GRASS, n. A^{2}d'du^{5}rz-gra^{3}s. Ger., *Knabenkraut*. The botanical genus *Cynosorchis*. [A, 258.]

ADDER'S-MOUTH, n. A^{2}d'du^{5}rz-mu^5-uth. An American name for the botanical genus *Microstylis*. [A, 252.]

ADDER'S-TONGUE, n. A^{2}d'du^{5}rz-tu^{3}ng. Ger., *Natterzunge*, *Schlangenzunge*. The botanical genus *Ophioglossum*. [A, 248.]—**Yellow a.-t.** The *Erythronium americanum*. [A, 252.]

ADDER'S-WORT, ADDERWORT, n's. A^{2}d'du^{5}rz(du^{5}r)-wu^{5}rt. Ger., *Natterwurz*. An old English name for bistort (*Polygonum bistorta*), because of its convolute roots. [B, 39.]

ADDIMODRUM, n. A Tamul name for licorice (*Glycyrrhiza glabra*). [A, 362.]

ADDISON'S DISEASE, n. A^{2}d'di^2-su^{3}nz. See under DISEASE.

ADDISON'S KELOID, n See MORPHŒA (2d def.).

ADDITAMENTUM (Lat.), n. n. A^{2}d(a^{3}d)-di^{2}t-a^3-me^{2}nt'u^{3}m-(u^{4}m). From *addere*, to add. Ger., *Ansatz*. In anatomy, any formation that, like an epiphysis, may be regarded as an addition to the main structure or an extension of the latter. [A, 325.]—**A. ad sacro-lumbalem.** See ACCESSORIUS *sacro-lumbalis*.—**A. coli.** See APPENDIX *cœci vermiformis*.—**A. necatum.** A process of the ulna; the olecranon. [Vesalius (A, 325), A, 336.]—**A. suturæ lambdoidalis.** An old term for the occipito-mastoid suture. [A, 280.]—**A. ulnæ.** The radius. [A, 313.]—**A. uncatum ulnæ.** The olecranon. [A, 313.]

ADDITION, n. A^{2}d-di^{2}sh'u^{3}n. Lat., *additio* (from *addere*, to add). Fr., *addition*. Ger., *Zusatz*. It., *addizione*. Sp., *adición*. In chemistry, the formation of a new molecule by the direct union of two or more different molecules. Many cases, however, which are apparently illustrative of this process are really instances of double decomposition. [B, 6.]—**A. compound, A. product.** See *A.* COMPOUND.

ADDIVITELLA GUDDALU, n. A Teloogoo name for the *Erythronium indicum*. [A, 362.]

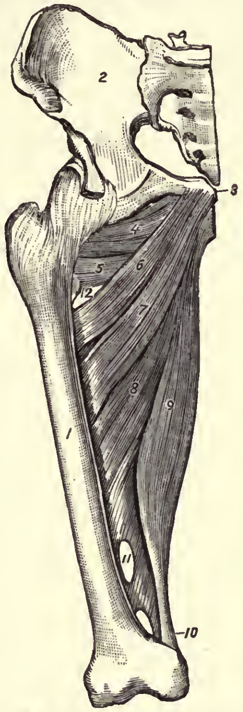
ADDLE, n. A^{2}d'dl. From A.-S., *adl*, diseased, or Welsh, *hadl*, *hadyl*, decayed, corrupt. [A, 302.] An English provincial (Somersetshire) name for an abscess. [A, 315.]

ADDOUA, n. A Central African name for the *Balanites œgyptiaca*. [A, 321.]

ADDUCENS (Lat.), adj. A^{2}d(a^{3}d)-du^2(du)'se^{2}nz(ke^{2}ns). Pres. partic. of *adducere*, to draw toward. Fr., *adducteur*. Ger., *anziehend*. Adductive, acting as an adductor; used also as a n. in the sense of adductor.—**A. ad anteriora** [Spigelius]. See ADDUCTOR *auris* and PLATYSMA *myoides*.—**A. humeri.** See PECTORALIS *major*.—**A. maxillam** [Spigelius]. See MASSETER.—**A. oculi.** See RECTUS *oculi internus*.—**A. pedem** [Spigelius.] See TIBIALIS *posticus*.—**Musculi adducentes.** Adductor muscles.

ADDUCENT, adj. A^{2}d-du^2'se^{2}nt. See ADDUCENS.

ADDUCT, v. tr. A^{2}d-du^{3}kt'. Gr., προσάγειν. Lat., *adducere*. Ger., *adduciren*, *zuführen*. Sp., *adducir*. To draw a part toward the median line of the body or (as used by most writers) toward the median line of a limb.

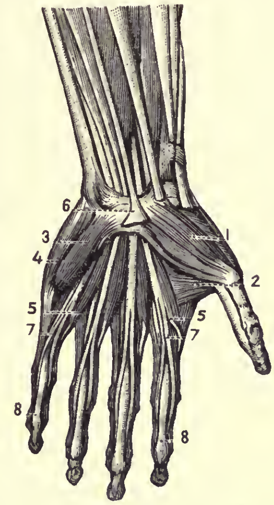


ADDUCTEUR (Fr.), adj. and n. A^{3}d-du^{6}k-tu^{5}r. Adductive; an adductor muscle (in the strict sense of one that draws a part toward the median line of the body—including, therefore, some muscles which we call abductors).—**A's de la cuisse.** The adductors of the thigh.—**A. de l'œil.** See RECTUS *oculi internus*.—**A. de l'oreille.** See ADDUCTOR *auris* and TEMPORO-AURICULARIS *externus*.—**A. du bras.** See TERES *major*.—**A. du gros orteil.** See ADDUCTOR *pollicis pedis*.—**A. du petit doigt.** See OPPONENS *minimi digiti*.—**A. du pouce.** See ADDUCTOR *pollicis manus*.—**A. moyen de la cuisse.** See ADDUCTOR *femoris longus*.—**A. premier de la cuisse, A. quatrième de la cuisse.** Both these terms have been applied to the pectinæus.—**Court a. de la cuisse.** See ADDUCTOR *femoris brevis*.—**Court a. de la jambe.** The gracilis.—**Deuxième a. superficiel de la cuisse.** Syn.: *premier a.* [Boyer], *moyen a.* [Bichat]. See PECTINÆUS.—**Grand a. de la cuisse, Grand a. profond de la cuisse.** See ADDUCTOR *femoris magnus*.—**Grand rond a. de la cuisse.** See TERES *major*.—**Long a. de la cuisse.** See ADDUCTOR *femoris longus*.—**Long a. de la jambe.** See *Long* ADDUCTOR *of the leg*.—**Moyen a. de la cuisse.** See ADDUCTOR *femoris longus* and PECTINÆUS.—**Petit a. de la cuisse, Petit a. profond de la cuisse.** See ADDUCTOR *femoris brevis*.—**Premier a. de la cuisse, Premier a. superficiel de la cuisse.** See PECTINÆUS.—**Second a. de la cuisse** [Boyer]. See ADDUCTOR *femoris brevis*.—**Troisième a. de la cuisse** [Boyer]. See ADDUCTOR *femoris magnus*.—**Vaisseaux a's** [Hedwig]. See PROSPHYSES.

ADDUCTION, n. A^{2}d-du^{3}k'shu^{3}n. Gr., προσαγωγή. Lat., *adductio*. Fr., *adduction*. Ger., *Adduction*, *Anziehung*, *Zuführung*. It., *adduzione*. Sp., *aducción*. A drawing of a part toward the median line of the body or (in the case of the fingers and toes) toward the middle line of a limb. As applied to the hand, flexion toward the ulnar border of the forearm.—**A'sprismen** (Ger.). See under PRISMA.

ADDUCTIVE, adj. A^{2}d-du^{3}k'ti^{2}v. Fr., *adductif*, *adducteur*. Ger., *anziehend*. Pertaining to or producing adduction. [A, 348.]

ADDUCTOR (Lat.), n. m. A^{2}d(a^{3}d)-du^{3}k(duk)'to^{2}r. Gen., *adducto'ris*. From *ad*, toward, and *ducere*, to lead, to draw. Gr., προσαγωγός. Fr., *adducteur*. Ger., *Anzieher*, *Anziehmuskel*. It., *adduttore*. Sp., *adductor*. Syn.: *adducens*. 1. A muscle that adducts a part. See ADDUCT. 2. As applied to the *Lamellibranchiata*, a muscle that closes the valves of the shell. [A, 349.] 3. In botany, a very delicate filamentous structure found in the thecæ of mosses. [B.] See PROSPHYSES.—**A. ad minimum digitum.** See *A. pollicis manus*.—**A'es anguli oris.** The levator labii superioris proprius and the levator labii inferioris. [Theile (L, 31).]—**A. auris.** Syn.: *adducens ad anteriora* [Spigelius]. A term applied to certain fleshy fibers of the platysma myoides which are attached to the lower part of the auricle of the ear. [Valsalva (L, 32).]—**A. auris inferior.** It., *adduttore inferiore dell' orecchio*. See ZYGOMATICO-AURICULARIS.—**A. auris superior.** See TEMPORO-AURICULARIS *externus*.—**A. brevis femoris.** See *A. femoris brevis*.—**A. digiti tertii pedis.** The second plantar interosseous muscle. [L.] The term has been incorrectly applied to a dorsal interosseous muscle which is really an abductor. [A, 358.]—**A. femoris brevis.** Fr., *sous-pubio-fémoral* [Chaussier], *court* (ou *second* [Boyer], ou *petit* [Bichat]) *adducteur de la cuisse*, *petit adducteur profond de la cuisse* [Cruveilhier], *second muscle du triceps* [Winslow]. Ger., *kurzer Anzieher* (oder *Zuzieher*) *des Oberschenkels* (oder *Schenkels*). It., *adduttore breve* (o *corte*) *del femore*, *piccolo* (o *secondo*) *adduttore del femore*, *sotto-pubico-femorale*. Sp., *a. breve del muslo*. Syn.: *a. femoris secundus* [Douglas], *triceps secundus* [Winslow], *subpubio-femoralis* [Chaussier], *caput breve tricipitis*, *alterum caput tricipitis* [Riolan]. The short a. of the thigh; it arises from the anterior surface of the body and inferior ramus of the pubic bone, runs backward and outward, and is inserted flat and tendinous into a line extending from the lesser trochanter of the femur to the linea aspera. [C; L, 31, 33, 35, 43, 44, 45.]—**A. femoris longus.** Fr., *pubio-fémoral* [Chaussier], *premier muscle du triceps* [Winslow], *spino-pubio-fémoral* [L, 33]. Ger., *langer Schenkelanzieher*, *langer Anzieher des Schenkels* (oder *Oberschenkels*). It., *adduttore lungo* (o *primo*, o *secondo*, o *medio*) *del femore*, *pubico-femorale*. Sp., *a. longo del muslo*. Syn.: *pubio-femoralis* [Chaussier], *a. femoris primus* [Douglas], *triceps primus* [Winslow] (seu *minor*), *primum caput tricipitis* [Riolan]. The long a. of the thigh; it arises from the body of the pubic bone, below the crest and near the angle, and is inserted by a tendinous aponeurosis, which is closely united with the vastus internus and the a. femoris magnus, into the inner margin of the linea



aspera. [C; L, 22, 33, 35, 43, 44.]—**A. femoris magnus.** Fr., *ischio-fémoral* [Chaussier], *grand* [Bichat] (ou *troisième* [Boyer], ou *long* [L, 43]) *adducteur de la cuisse, ischio-pubio-fémoral* [L, 33], *grand adducteur profond* [Cruveilhier], *troisième muscle du triceps* [Winslow]. Ger., *grosser Anzieher* (oder *Zuzieher*) *des Oberschenkels* (oder *Schenkels*). It., *pubo-ischio-femorale, adduttore maggiore* (o *grande*, o *terzo adduttore*) *del femore*. Sp., *a. magno del muslo*. Syn.: *tertium caput* [Riolan] (seu *caput magnum* [A, 314]) *tricipitis*. The great a. of the thigh; it arises from the whole length of the inner margin of the pubic arch and the lower part of the tuberosity of the ischium, and, running outward and downward, is inserted into the posterior surface of the femur, inside the gluteal ridge, into the linea aspera and the internal supracondylar line, and a part of it also into the a. tubercle on the inner condyle. Douglas divides it into two muscles, the *a. femoris tertius* and the *a. femoris quartus* (*q. v.*). [C; L, 33, 35, 43, 44, 45.]—**A. femoris minimus.** A term applied by some anatomists to the upper, transverse fibers of the a. femoris magnus, considered as a separate muscle. [C; L.]—**A. femoris primus.** The a. femoris longus. [Douglas (L, 33).]—**A. femoris quartus.** Douglas's term for that portion of the a. femoris magnus which arises from the tuberosity of the ischium. [L.]—**A. femoris secundus.** Douglas's term for the a. femoris brevis. [L.]—**A. femoris tertius.** Douglas's term for that portion of the a. femoris magnus which arises from the outer edge of the pubic bone. [L.]—**A. femoris tertius cum quarto.** The a. femoris magnus. [L, 23.]—**A. gracilis.** See Gracilis.—**A. hallucis.** Fr., *métatarso-sous-phalangien* [Chaussier] (ou *tarso-métatarsi-phalangien* [L, 33]) *du pouce* (ou *du gros orteil*), *adducteur du gros orteil, antithénar* [Winslow]. Ger., *Anzieher der grossen Zehe*. It., *adduttore* (o *tarso-meta-tarso-falangeo*) *dell' alluce*. Sp., *a. del dedo grande del pié*. Syn.: *a. pollicis pedis, metatarso-subphalangeus pollicis, a. hallucis obliquus* [L, 33], *alius musculus transversus* [Riolan]. An a. of the great toe; it arises from the tarsal ends of the third and fourth metatarsal bones and from the sheath of the peroneus muscle, runs obliquely forward, and is inserted into the base of the first phalanx of the great toe. Henle and Luschka regard the *transversus pedis* as a portion of this muscle. [C; L, 9, 31, 33, 35, 43, 44, 45.]—**A. hallucis obliquus.** An a. of the great toe found in some of the apes. [L, 14.]—**A. hallucis transversalis.** An a. of the great toe, also found in some of the apes, arising from the outer side of the first phalanx and inserted along with the tendon of the *perforatus*. [L, 14.]—**A. indicis pedis.** A term improperly applied to the first dorsal interosseous muscle of the foot, which is really an abductor. [L.]—**A. longus.** The great a. of the thigh in many of the *Mammalia*. [Percivall (L, 13).]—**A. longus femoris.** See *A. femoris longus*.—**A. mandibulæ.** A muscle in the cray-fish, attached to the posterior edge of the mandible. [B, 100.]—**A. medii digiti pedis.** The first plantar interosseous muscle. [L.] The term has been incorrectly applied to a dorsal interosseous muscle which is really an abductor. [A, 358.]—**A. medius auris.** See Levator *auris brevis*.—**A. metacarpi minimi digiti manus, A. minimi digiti manus.** See Opponens *minimi digiti*.—**A. minimi digiti pedis.** The a. of the little toe, the third plantar interosseous muscle. [L.]—**A. minimus.** See *A. femoris minimus*.—**A. obliquus, A. obliquus hallucis.** See *A. hallucis obliquus*.—**A. oculi.** See Rectus *oculi internus*.—**A. of the arm.** Fr., *adducteur du bras, grand rond, sous-scapulo-huméral*. Ger., *grosser Schulterarmbeinmuskel, Niederzieher* (oder *Einwärtszieher*, oder *innerer Benger*) *des Oberarmbeins* (oder *Armbeins*). It., *adduttore del braccio, grande rotondo, sotto-scapolo-omerale*. Syn.: *teres major* [Percivall], *subscapulo-humeralis* [Girard], *great scapulo-humeral* [Leyh]. A muscle of the *Mammalia* analogous to the teres major in man. [L, 13, 44.]—**A's of the foot.** The plantar interossei and the a. hallucis. [L.]—**A's of the glottis.** See Constrictors *of the glottis*.—**A's of the hand.** The palmar interossei, the a. pollicis, and the a. minimi digiti. [L.]—**A's of the thigh.** Some confusion has arisen in the naming of these muscles; usually they are held to include the *a. femoris brevis*, the *a. femoris longus*, the *a. femoris magnus*, the *gracilis*, and the *pectinæus* (*q. v.*). Spigelius regarded the adductores brevis, longus, and magnus, together with the pectinæus, as oblique flexors of the thigh; he named the a. femoris brevis, the a. femoris longus, and the a. femoris magnus the *tertius femur flectentium*, the a. femoris brevis and the a. femoris magnus the *musculus moventium femur quintus*, and the pectinæus the *quartus femur flectentium*. Vesalius regarded the a. femoris magnus and the pectinæus as one muscle,

THE ADDUCTORS OF THE THIGH. (AFTER SAPPEY.)

1, the femur; 2, the ilium; 3, the pubes; 4, the obturator externus; 5, the upper portion of the adductor femoris magnus; 6, 7, the upper and lower portions of the adductor brevis; 8, 9, the middle and lower portions of the adductor magnus; 10, the tendinous insertion of the latter; 11, the opening for the femoral vessels; 12, the opening for the internal circumflex artery and veins.

which he named the *musculus moventium femur octavus*. [L.]—**A. ossis metacarpi digiti auricularis, A. ossis metacarpi minimi digiti manus.** See Opponens *minimi digiti*.—**A. pectinæus.** See Pectinæus.—**A. pollicis, A. pollicis ad minimum digitum** [Douglas]. See *A. pollicis manus*.—**A. pollicis manus.** Fr., *métacarpo-phalangien du pouce* [Chaussier], *adducteur du pouce, mésothénar* [Winslow], *antithénar* [Riolan]. Ger., *Anzieher des Daumens*. It., *metacarpo-falangeo del pollice, adduttore del pollice della mano, semi-interosseo del pollice*. Sp., *a. del pulgar*. Syn.: *interosseus pertingens ad indicem* [Bucrat], *flexor primus secundi internodii pollicis* [Spigelius], *a. pollicis ad minimum digitum* [Douglas], *metacarpo-phalangeus pollicis* [L, 45]. The a. of the thumb; it arises from the outer edge of the third metacarpal bone, and is inserted into the base of the first phalanx of the thumb. [C; L, 33, 35, 43, 44, 45.]—**A. pollicis manus ad indicem.** See Abductor *indicis*.—**A. pollicis pedis.** See *A. hallucis*.—**A. prostatæ** [Santorini]. See Compressor *prostatæ*.—**A. tertii digiti pedis.** See *A. digiti tertii pedis*.—**A. tibialis.** Percivall's name for the semimembranosus and semitendinosus in the solipeds. [L, 13.]—**A. transversalis hallucis.** See *A. hallucis transversalis*.—**A. triceps femoris.** The a. femoris brevis, a. femoris longus, and a. femoris magnus considered as a single muscle having three heads. [L.]—**Great a. of the thigh.** Lat., *a. longus* [Percivall], *posterior pubio-femoralis* [Leyh]. Fr., *grand adducteur de la cuisse, portion postérieure du biceps* (ou *du sous-pubic*) *fémoral* (2d def.). Ger., *dicker Einwärtszieher* [Gurlt] (oder *grosser Zuzieher* [Müller]) *des Oberschenkels, hinterer Schambackbeinmuskel* [Leyh] (2d def.). It., *adduttore grande della coscia*. 1. The a. femoris magnus (*q. v.*). 2. A muscle in many of the *Mammalia* analogous to the a. femoris brevis and a. femoris magnus of man combined. [L, 13, 44.]—**Long a. of the leg.** Lat., *sartorius* [Percivall], *sublumbo-tibialis* [Girard], *internal ilio-rotuleus* [Leyh]. Fr., *long adducteur de la jambe, sous-lumbo-tibial* [Girard]. Ger., *dünner* (oder *schmaler*) *Einwärtszieher des Hinterschenkels* [Günther], *innerer Darmschenkelbeinmuskel, Schneidermuskel*. It., *adduttore longo della gamba, sotto-lombo-tibiale*. A muscle of the solipeds analogous to the sartorius in man. [L, 13, 44.]—**Short a. of the leg.** Lat., *gracilis* [Percivall], *sub-pubio-tibialis* [Girard], *pubiotibialis* [Leyh]. Fr., *sous-pubio-tibial* [Girard], *court adducteur de la jambe*. Ger., *breiter Einwärtszieher des Hinterschenkels* [Gurlt, Günther], *Schamschenkelbeinmuskel*. It., *adduttore corto della gamba, sotto-pubicotibiale*. A muscle of many of the *Mammalia* analogous to the rectus internus in man. [L, 13, 44.]—**Small a. of the thigh.** Fr., *petit adducteur de la cuisse*. Ger., *langer Einwärtszieher* [Günther] (oder *kurzer Zuzieher* [Müller]) *des Oberschenkels, mittlerer Schambackbeinmuskel* [Leyh]. It., *adduttore piccolo della coscia*. A muscle of the solipeds analogous to the a. femoris longus in man. [L, 13, 44.]—**Triceps a. femoris.** See *A. triceps femoris*.

THE SUPERFICIAL PALMAR MUSCLES. (AFTER SAPPEY.)

1, the abductor pollicis; 2, the adductor pollicis; 3, the flexor brevis minimi digiti; 4, the abductor minimi digiti; 5, 5, the lumbricales; 6, the lower end of the tendon of the palmaris brevis; 7, 7, the tendons of the perforatus; 8, 8, the tendons of the perforans.

ADDUCTORIUS (Lat.), adj. A^{2}d(a^{3}d)-du^{3}k(du^{4}k)-to′ri^{2}u^{3}s-(u^{4}s). Adducent.—**Fila adductoria.** See Prosphyses.

ADEC (Ar.), n. Sour milk. [Ruland (A, 325).]

ADECH (Ar.), n. The vital spirit in man. [Paracelsus (H).]

ADECIDUATA (Lat.), n. n. pl. A^2(a^3)-de^2-si^{2}d(ki^{2}d)-u^2(u)-a(a^3)′ta^3. See Non-deciduata.

ADECIDUOUS, adj. A^2-de^2-si^{2}d′u^2-u^{3}s. Belonging to the non-deciduata (*q. v.*).

ADECTA (Lat.), n., n. pl. of adj. *adectus* (*q. v.*). A^{2}d(a^{3}d)-e^{2}k′ta^3. 1. Corrigents. [A, 306.] 2. Demulcents. [A, 322.] 3. Antidotes. [A, 321.]

ADECTOS, ADECTUS (Lat.), adj's. A^{2}d(a^{3}d)-e^{2}k′to^{2}s, -tu^{3}s-(tu^{4}s). Gr., ἄδηκτος (from α priv., and δάκνειν, to bite), not biting or pungent. Fr., *adecte*. It., Sp., *adecto*. Corrigent; mild, bland (said of drugs). [A, 306, 322, 337.]

ADEHEMEST (Ar.), n. An alchemical synonym of lamina (*q. v.*). [Ruland (A, 325).]

ADEL (Ger.), n. A^3′de^{2}l. A whitlow. [A, 317.]

ADEL-ADAGAM, n. An East Indian name for the *Justicia adhatoda* (*q. v.*). [A, 321.]

ADELARTHROSOMATA (Lat.), n. n. pl. A^{2}d(a^{3}d)-e^{2}l-a^{3}r-thro-so^{2}m-a^3-ta^3. From ἄδηλος, obscure, ἄρθρον, a joint, and σῶμα, the body. An order of *Arachnida* having the articulations inconspicuous. [A, 258; B, 25.]

ADELASTER (Lat.), n. n. A^{2}d(a^{3}d)-e^{2}l-a^{2}s(a^{3}s)′tu^{5}r(te^{2}r). Gen., *adelasteros* (*-ris*). From ἄδηλος, obscure, uncertain, and ἀστήρ, a plant. A provisional genus-name for plants which, not having been seen in flower, have not been classified. [A, 258.]

ADELBEERE (Ger.), n. A^3′de^{2}l-ba-re^2. The fruit of the wild service-tree (*Sorbus torminatilis*). [A, 304, 315.]

ADELBERTSKRAUT (Ger.), n. A^3'de^{2}l-be^{2}rtz-kra^3-ut. The *Medicago sativa.* [A, 315.]

ADELESCHE (Ger.), n. A^3'de^{2}l-e^{2}sh-e^2. The *Sorbus domestica.* [A, 305.]

ADELFA (Sp.), n. A^3-de^{2}l'fa^3. The *Nerium oleander.* [A, 344.]

ADELHEIDBRUNNEN (Ger.), n. A^3'de^{2}l-hid-brun-ne^{2}n. See SCHWALBACH.

ADELHEIDSQUELLE (Ger.), n. A^3'de^{2}l-hidz-que^{2}l-le^2. Fr., *source d'Adélaïde.* A cold spring in the village of Heilbrunn, Bavaria, praised by von Nussbaum for its effects in cases of scrofulous disease of bones, and resorted to for the cure of sterility, etc.; 1,000 parts, by weight, contain:

Sodium chloride	4·9560
Sodium iodide	0·0286
Sodium bromide	0·0478
Sodium carbonate	0·8090

The water contains also free carbon dioxide. [A, 305, 319.]

ADELHOLZEN (Ger.), n. pl. A^3'de^{2}l-holts-e^{2}n. Three hot springs (containing, respectively, potassium nitrate, sulphur, and alum) in Upper Bavaria, south of Traunstein; used for gout, rheumatism, paralysis, and chronic skin diseases. [A, 304.] According to Buchner, a pound of the water contains:

Calcium carbonate	1·670 grains.
Magnesium carbonate	0·180 grain.
Potassium nitrate	0·010 "
Sodium chloride	0·090 "
Sodium carbonate	0·020 "
Sodium sulphate	0·015 "
Calcium sulphate	0·015 "

Traces of iron carbonate, bromine, humic acid, silex, and lithium. [A, 319.]

ADELIA (Lat.), n. f. A^{2}d(a^{3}d)-e(a)'li^2-a^3. Fr., *adélie.* A genus of euphorbiaceous plants, established by Linnæus, found in Jamaica. [A, 305.]—**A. venenata.** See ADENIA *venenata.*

ADÉLICÂTER (Fr.), v. intr. A^3-da-le-ka^3-ta. To become delicate in health. [E. Souvestre (A, 306).]

ADELIDUS (Lat.), adj. A^{2}d(a^{3}d)-e^{2}l'i^{2}d-u^{3}s(u^{4}s). See ADELUS.

ADELIPARIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}l-i^{2}p-a(a^3)'ri^2-a^3. From ἄδην, abundant, and λιπαρία, fatness. Fr., *adéliparie.* Ger., *Fettleibigkeit.* It., *adeliparia.* Obesity; the first class of Alibert's *Ethmoplecoses.* [A, 322.]

ADELOBRANCHIATE, adj. A^{2}d''e^{2}l-o-bra^{2}ng'ki^2-at. From ἄδηλος, unseen, and βράγχια, gills. Fr., *adélobranche.* Sp., *adelobranquio.* In zoology, having the branchiæ concealed. [A, 306.]

ADELOCEPHALOUS, adj. A^{2}d''e^{2}l-o-se^{2}f'a^{2}l-u^{3}s. From ἄδηλος, unseen, and κεφαλή, the head. Fr., *adélocéphale.* Sp., *adelocéfalo.* In zoology, having the head almost invisible. [A, 306, 348.]

ADELOCERATOUS, ADELOCEROUS, adj's. A^{2}d-e^{2}l-o-se^2'ra^{2}t-u^{3}s, -o^{2}s'e^2-ru^{3}s. From ἄδηλος, unseen, and κέρας, a horn. Fr., *adélocère.* Sp., *adelócero.* In zoology, having the horns or antennæ concealed. [A, 306.]

ADELOCODONIC, adj. A^{2}d''e^{2}l-o-ko-do^{2}n'i^{2}k. From ἄδηλος, unseen, and κώδων, a bell. In zoology, closed and bell-like (said of the genital buds of the *Hydrozoa* when they are closed by the union of their margins). [Allmann (B, 77).]

ADEL-ODAGAM, n. A Malabar name for the *Justicia bivalvis* (*q. v.*). [A, 344.]

ADELODERMATOUS, ADELODERMOUS, adj's. A^{2}d''-e^{2}l-o-du^{5}rm'a^{2}t-u^{3}s, -du^{5}rm'u^{3}s. From ἄδηλος, unseen, and δέρμα, the skin. Fr., *adéloderme.* Sp., *adelodermo.* See ADELOBRANCHIATE.

ADELOMORPHOUS, adj. A^{2}d''e^{2}l-o-mo^{2}rf'u^{3}s. From ἄδηλος, uncertain, and μορφή, form. Fr., *adélomorphe.* An epithet applied by Rollett (1870) to the columnar cells forming the greater part of the lining of the gastric glands. [J.] Cf. DELOMORPHOUS and *Principal* CELLS.

ADELOPNEUMONOUS, adj. A^{2}d''e^{2}l-o-nu^2'mo^{2}n-u^{3}s. From ἄδηλος, concealed, and πνεύμων, the lung. Fr., *adélopneumoné.* Sp., *adeloneumo.* Having the respiratory organs concealed in the interior of the body (said of a group of mollusks). [A, 306.]

ADELOPODA (Lat.), n. n. pl. A^2(a^{3}d)-e^{2}l-o^{2}p'o-da^3. From ἄδηλος, concealed, and πούς, the foot. Fr., *adélopodes.* Ger., *Adelopoden.* Sp., *adelópodos.* Adelopods, adelopodous animals; those that have the organs of locomotion concealed or indistinctly formed. [A, 305, 334.]

ADELOS (Lat.), adj. A^{2}d(a^{3}d)-e(a)'lo^{2}s. See ADELUS.

ADELOSTOMATA (Lat.), n. n. pl. A^{2}d(a^{3}d)-e^{2}l-o-sto^{2}m'a^3-ta^3. From ἄδηλος, concealed, and στόμα, the mouth. Fr., *adélostomes.* Sp., *adelostómitos.* Adelostomatous animals; those that have the mouth concealed. [A, 306.]

ADELPHE (Fr.), adj. A^3-de^{2}lf. Adelphous.

ADELPHEOUS, adj. A^{2}d-e^{2}lf'e-u^{3}s. Having the quality of adelphia (*q. v.* [3d def.]). [A, 316.]

ADELPHIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}lf'i^2-a^3. From ἀδελφός, a brother. Fr., *adelphie.* Ger., *Adelphie, Brüderschaft, Verbrüderung.* Sp., *adelfía.* Lit., a brotherhood. 1. A general term for monstrosities in which two or more organisms are separated below and united above. [A, 321.] 2. In botany, a group of stamens united at their bases. [B.] See MONADELPHIA, DIADELPHIA, and POLYADELPHIA. 3. A term by which Hippocrates implied the relationship of certain diseases to each other. [A, 358.]

ADELPHISM, n. A^{2}d-e^{2}lf'i^{2}zm. Lat., *adelphismus.* See ADELPHIA.

ADELPHIUS (Lat.), adj. A^{2}d(a^{3}d)-e^{2}lf'i^2-u^{3}s(u^{4}s). Gr., ἀδελφικός, ἀδελφιός. Having the quality of adelphia (*q. v.* [3d def.]).

ADELPHIXIA, ADELPHIXIS (Lat.), n's f. A^{2}d(a^{3}d)-e^{2}lf-i^{2}x'i-a^3, -i^{2}s. Gr., ἀδελφιξία, ἀδέλφιξις. Fr., *adelphixie.* Ger., *Verbrüderung.* Sp., *adeljixia.* The relationship or sympathy of the different component parts of the body. [Hippocrates (A, 322).]

ADELPHOUS, adj. A^{2}d-e^{2}lf'u^{3}s. Lat., *adelphus.* Fr., *adelphe, adelphique.* Ger., *brüderig.* Sp., *adelfo.* In botany, said of stamens which are united by their filaments so that several anthers are supported on a single base. [B.] See MONADELPHOUS, DIADELPHOUS, and POLYADELPHOUS.

ADELSBEERE (Ger.), n. A^3'de^{2}lz-ba-re^2. See ADELBEERE.

ADELUS (Lat.), adj. A^{2}d(a^{3}d)-e(a)'lu^{3}s(lu^{4}s). Gr., ἄδηλος. Fr., *adélide* [Bégin]. Sp., *adelido.* 1. Invisible, insensible (said of the cutaneous transpiration). 2. Obscure, uncertain, ill-defined (said of symptoms). [A, 306, 334.]

ADEMONIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}m-o'ni^2-a^3. Gr., ἀδημονία. Fr., *adémonie.* Ger., *Ademonie, Ueberdruss.* It., *ademonia.* Sp., *ademonía.* Restlessness, anxiety, extreme agitation, mental depression. [A, 305, 306.]

ADEMOSYNE (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}m-o^{2}s'i^{2}n(u^{6}n)-e(a). Gr., ἀδημοσύνη. See ADEMONIA.

ADEN (Lat.), n. m. and f. A(a^3)'de^{2}n. Gen., *ad'enis.* Gr., ἀδήν, ἀδήν. 1. A gland. [Hippocrates (A, 311).] 2. As sometimes used, a bubo. [A, 343.]—**A'es canadenses.** Potatoes. [A, 358.]

ADENALGIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From ἀδήν, a gland, and ἄλγος, pain. Fr., *adénalgie.* Ger., *Drüsenschmerz.* It., Sp., *adenalgia.* Pain in a lymphatic gland. [E.]

ADENALGIC, adj. A^{2}d-e^{2}n-a^{2}l'ji^{2}k. Fr., *adénalgique.* Sp., *adenálgico.* Pertaining to adenalgia. [A, 306.]

ADENANDRA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-a^{2}n(a^{3}n)'dra^3. From ἀδήν, a gland, and ἀνήρ, a man. Fr., *adénandre.* Sp., *adenandra.* A genus of plants, established by Willdenow, including a part of Linnæus's genus *Diosma,* indigenous to southern Africa; so called from their having glandular anthers. Several of the species are used as stimulants and diuretics and to allay cough. [A, 305, 306, 321.]—**A. uniflora** [Willdenow]. The leaves of this species, with those of several other plants of the same tribe, are found in the buchu of commerce. [A, 321.]

ADENANTHERA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-a^{2}n(a^{3}n)-the(tha)'-ra^3. From ἀδήν, a gland, and ἀνθηρός, blooming. Fr., *adénanthère.* Ger., *Drüsenblume.* A genus of tropical mimosaceous trees established by Linnæus; so called from its gland-tipped anthers. [A, 252, 305, 306, 321, 344.]—**A. pavonina** [Linnæus]. The *mandsjadi,* or *mandsiadi,* of Malabar and Ceylon; in India the root is used as an emetic, and a decoction of the leaves for chronic rheumatism; the seeds (the *condoris, pois-corail,* or *fèves d'Amérique,* of the French), which are red and lenticular, have been recommended for hydrophobia and epilepsy. [A, 321, 344.]

ADENANTHEREÆ (Lat.), n. f. pl. A^{2}d(a^{3}d)-e^{2}n-a^{2}n(a^{3}n)-the(tha)'re(re^2)-e(a^3-e^2). Fr., *adénanthérées.* A tribe of leguminous plants of the sub-order *Mimosaceæ.* [B, 93.]

ADENANTHOUS, adj. A^{2}d-e^{2}n-a^{2}n'thu^{3}s. Fr., *adénanthe.* In botany, having the pedicels springing from the base of glandular organs. [A, 306.]

ADENECTOPIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-e^{2}k-to'pi^2-a^3. From ἀδήν, a gland, and ἐκτόπιος, out of place. Fr., *adénectopie.* Ger., *Adenektopie.* It., *adenectopia.* The displacement of a gland from its natural situation. [A, 322.]

ADENECTOPIC, adj. A^{2}d-e^{2}n-e^{2}k-to^{2}p'i^{2}k. Lat., *adenectopicus.* Pertaining to adenectopia. [A, 322.]

ADENEMPHRACTIC, adj. A^{2}d-e^{2}n-e^{2}m-fra^{2}k'ti^{2}k. Lat., *adenemphracticus.* Pertaining to adenemphraxis (*q. v.*). [A, 322.]

ADENEMPHRAXIS (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-e^{2}m-fra^{2}x-(fra^{3}x)'i^{2}s. Gen., *adenemphrax'eos.* From ἀδήν, a gland, and ἔμφραξις, a stoppage. Fr., *adénemphraxie.* Ger., *Drüsenverstopfung.* It., *adenemfrasia.* Sp., *adenenfraxia.* Engorgement or obstruction of the lymphatic glands. [A, 305, 320.]

ADENIA (Lat.), n. f. A^{2}d(a^{3}d)-e(a)'ni^2-a^3. From ἀδήν, a gland. Fr., *adénie* [Trousseau]. Ger., *Drüsenübel.* It., Sp., *adenia.* See PSEUDO-LEUCOCYTHÆMIA.—**Leucæmic a.** That form in which the white corpuscles of the blood are increased in number. [Langhans (D, 48).]—**Simple a.** That form in which no change in the blood can be detected, or at most only a diminution in its quantity. [Langhans (D, 48).]

ADENIA (Lat.), n. f. A^{2}d(a^{3}d)-e(a)'ni^2-a^3. From *aaden,* the Arabic name of *A. venenata.* A genus of passifloraceous plants indigenous to Arabia and Africa. [B, 52.]—**A. venenata** [Forskahl]. Syn.: *Adelia venenata* [De Candolle]. According to Forskahl, an Arabian tree, which is the source of an extremely active poison; thought to be the same as the *Modecca abyssinica.* [A, 321.] The juice is said to be caustic. [De Candolle (A, 344).] According to Schweinfurth, an African climbing passion-flower, used as a vesicant. [A, 308.]

ADÉNIE (Fr.), n. A^3-da-ne. Trousseau's term for Hodgkin's disease. [D, 4.] See PSEUDO-LEUCOCYTHÆMIA. In the pl., a general term for diseases of the glands.—**A's angibromiques.** Piorry's term for diseases of the glands annexed to the digestive tube (under which head he enumerates the salivary glands, the pancreas, the liver, the spleen, and the kidneys). [A, 250.]

ADENIFORM, adj. A^{2}d-e^{2}n'i^2-fo^{2}rm. Lat., *adeniformis* (from ἀδήν, a gland, and *forma,* shape). Fr., *adéniforme.* Ger., *drüsenförmig.* See ADENOID.

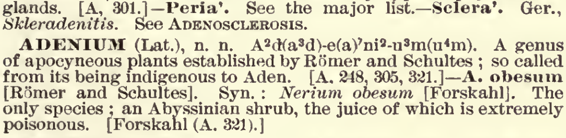
ADENINE, n. A^{2}d'e^{2}n-en. From ἀδήν, a gland. Fr., *adénine.* Ger., *Adenin.* It., Sp., *adenina.* A crystalline alkaloid, $C_5H_5N_5$, a polymer of hydrocyanic acid, obtained by Kossel from the pancreas and spleen, and also from beer-yeast. It forms acicular crystals soluble in hot water and in ammonia water, and in chemical prop-

erties it is related to hypoxanthine and guanine. [" Brit. and Colon. Druggist," Feb., 1885, p. 41 (A); "Ann. di chim. med.-farm. e di farmacol.," July, 1885, p. 52 (B).]

ADENISATION, n. A^{2}d-e^{2}n-i^{2}z-a'shu^{3}n. See ADENIZATION.

ADÉNITE (Fr.), n. A^3-dan-et. See ADENITIS.—**A. cervicale syphilitique.** A swollen state of the cervical lymphatic glands due to syphilis; according to Ricord, one of the most trustworthy signs of infection at the outset, and also to be detected when no other trace of the disease remains, being then almost certainly prognostic of subsequent relapse. [A, 301.]—**A. chancreuse.** Chancrous adenitis. [G.] See *Virulent* BUBO.—**A. syphilitique primitive.** See *Syphilitic* BUBO.

ADENITIS (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-i(e)'ti^{2}s. Gen., *adenit'idis.* For deriv., see ADEN and *-itis.** Fr., *adénite.* Ger., *Drüsenentzündung.* It., *adenite.* Sp., *adenitis.* Inflammation of a gland, especially of a lymphatic gland. [E.]—**A. axillaris.** Inflammation of the lymphatic glands of the axilla.—**A. cervicalis syphilitica.** See ADÉNITE *cervicale syphilitique.*—**A. cubitalis.** Ger., *Ellbogenbubo, Cubitaldrüsenentzündung.* Inflammation of the epitrochlear lymphatic gland, from infection by the hand or forearm. [Grünfeld (A, 319).]—**A. e blennorrhœa.** See *Gonorrhœal* BUBO.—**A. e sclerosi.** See ADENOSCLEROSIS and *Indolent* BUBO.—**A. exulcerata.** Ger., *Drüsenschanker.* A suppurating bubo followed by ulceration of the affected gland and the overlying tissue. [Grünfeld (A, 319).]—**A. ex ulcere contagioso.** See *Virulent* BUBO.—**A. femoralis.** Inflammation of the lymphatic glands in the subinguinal triangle. [Grünfeld (A, 319).]—**A. gangrænosa.** A bubo of a pronounced phlegmonous character, leading to gangrenous destruction of the gland. [Grünfeld (A, 319).]—**A. hyperplastica.** Ger., *hyperplastische A.* An a. in which plastic exudation predominates, leading to hyperplasia. [Grünfeld (A. 319).]—**A. inguinalis.** See BUBO.—**A. lymphatica.** Fr., *adénite lymphatique.* See LYMPHADENITIS.—**A. mesenterica.** Inflammation of the mesenteric glands. [A, 311.]—**A. palpebrarum contagiosa.** Fr. *adénite contagieuse des paupières.* Ger., *ansteckende Liddrüsenentzündung.* It., *adenite contagiosa delle palpebre.* Sp., *a. contagiosa de los parpados.* See *Purulent* CONJUNCTIVITIS.—**A. pubica.** A rare form of bubo in the middle of the pubic region, generally accompanied with suppurative lymphangeitis on the dorsum of the penis. [Grünfeld (A, 319).]—**A. scrofulosa equorum.** Fr., *gourme.* Ger., *Drüse.* It., *adenite equina, piccionaja, barbone, stranguglioni.* Syn.: *morbus glandulosus.* The strangles; a disease of the horse, beginning as a nasal catarrh, which extends to the contiguous mucous membranes, and is accompanied with inflammatory swelling of the submaxillary lymphatic glands. At first a purely local disease, it extends by infection, producing inflammation of the cervical and thoracic lymphatic vessels and glands. [A, 314.]—**A. universalis.** The induration of various lymphatic glands (the cervical, epitrochlear, axillary, etc.) that accompanies the first cutaneous manifestations of syphilis. [Grünfeld (A, 319).]—**A. venerea.** See *Venereal* BUBO.—**A. vulvo-vaginalis.** Inflammation of the vulvo-vaginal gland.—**Chancrous a.** Fr., *adénite chancreuse.* See *Virulent* BUBO.—**Meibomian a.** Fr., *adénite meibomienne.* 1. Inflammation of the Meibomian glands. 2. Chalazion, considered as an inflammatory hypertrophy of those glands. [A, 301.]—**Peria'.** See the major list.—**Sclera'.** Ger., *Skleradenitis.* See ADENOSCLEROSIS.



ADENIUM (Lat.), n. n. A^{2}d(a^{3}d)-e(a)'ni^2-u^{3}m(u^{4}m). A genus of apocyneous plants established by Römer and Schultes; so called from its being indigenous to Aden. [A. 248, 305, 321.]—**A. obesum** [Römer and Schultes]. Syn.: *Nerium obesum* [Forskahl]. The only species; an Abyssinian shrub, the juice of which is extremely poisonous. [Forskahl (A. 321).]

ADENIZATION, n. A^{2}d-e^{2}n-i^{2}z-a'shu^{3}n. Fr., *adénisation.* See *Adenoid* DEGENERATION.

ADENOBLASTS, n. pl. A^{2}d'e^{2}n-o-bla^{2}stz. From ἀδήν, a gland, and βλαστός, a germ. Ger., *Adenoblasten, Drüsenzellen.* Syn.: *gland cells.* A general term used by Häckel ("Jenaische Ztg.," xviii, 1884) to designate the cells which form glands, their function being excretory or secretory, according to the gland. [J.]

ADENOCALYCAL, adj. A^{2}d''e^{2}n-o-ka^{2}l'i^{2}k-a^{2}l. From ἀδήν, a gland, and κάλυξ, a calyx. Fr., *adénocalicé.* Sp., *adenocalíceo.* In botany, having a calyx that presents glandular points. [A, 306.]

ADENO-CARCINOMA (Lat.), n. n. A^{2}d(a^{3}d)''e^{2}n-o-ka^{3}r-si^{2}n-(ki^{2}n)-o'ma^3. Ger., *Drüsencarcinom, Drüsenkrebs.* Adenoid cancer, carcinomatous adenoma; an adenoma in which carcinomatous degeneration has taken place, the walls of the glandular spaces having given way and the gland cells having invaded the interstitial connective tissue and the radicles of the lymphatics. [Birch-Hirschfeld (A, 319).]

ADENO-CARCINOMA OF THE RECTUM. (AFTER BILLROTH.)

ADENOCELE (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-o-se(ka)'le(la) or, considered as an English word, a^{2}d-e^{2}n'o-sel. From ἀδήν, a gland, and κήλη, a tumor. A rare form of tumor of the breast, first described by Sir B. Brodie, consisting of a cyst or cysts of the ducts or sinuses containing adenomatous growths apparently springing from the walls. [J. Birkett (A, 279).] Cf. *Proliferative* CYST.

ADENOCHEIRAPSOLOGY, ADENOCHIRAPSOLOGY, n's. A^{2}d''e^{2}n-o-ki-ra^{2}ps-o^{2}l'o-ji^2. Lat., *adenochirapsologia* (from ἀδήν, a gland [hence scrofula], and χειραψία, a laying on of hands [see also *-logy**]). Ger., *Adenochirapsologie.* It., *adenochirapsologia.* The doctrine or practice of the pretended cure of scrofula by the king's touch. Browne, physician to Charles II, wrote a book with this title. [A, 322.]

ADENOCHŒRADOLOGIA, ADENOCHOIRADOLOGIA (Lat.), n's f. A^{2}d(a^{3}d)''e^{2}n-o-ke(ch^{2}o-e^2)-ra^3-do-lo'ji^2(gi^2)-a^3. From ἀδήν, a gland, and χοιράς (gen., χοιράδος), a scrofulous swelling in the neck. 1. Adenocheirapsology (*q. v.*). [A, 322.] 2. A treatise on scrofula. [A, 313.]

ADENOCHONDRIUS (Lat.), adj. A^{2}d(a^{3}d)''e^{2}n-o-ko^{2}n-(ch^{2}o^{2}n)'dri^2-u^{3}s(u^{4}s). From ἀδήν, a gland (in this case probably in the sense of scrofula), and χόνδρος, cartilage. An old term, probably meaning scrofulous and at the same time affecting cartilage. [L.] See ARTHROPHYMA *adenochondrium.*

ADENO-CYSTOMA (Lat.), n. n. A^{2}d(a^{3}d)''e^{2}n-o-si^{2}st(ku^{6}st)-o'ma^3. Gen., *adeno-cystom'atos (-tis).* For deriv., see ADEN and CYSTOMA. An adenoma in which cysts have formed. [E.]

ADÉNODERMIE (Fr.), n. A^3-da-no-de^{2}r-me. A general term for diseases of the cutaneous glands. [A, 250.]

ADENODES (Lat.), adj. A^{2}d(a^{3}d)-e^{2}n-o'dez(de^{2}s). From ἀδήν, a gland, and εἶδος, an appearance. Gland-like. [A, 322.] See ADENOID.—**Corpora adenodea.** See under CORPUS.

ADENODIASTASIS (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o-di(de)-a^{2}s-(a^{3}s)'ta^3-si^{2}s. Gen., *adenodiasta'seos.* From ἀδήν, a gland, and διάστασις, a separation. Fr., *adénodiastase.* 1. An abnormal separation of the lobes of a gland. [A, 305, 306.] 2. Adenectopia (*q. v.*). [Ludwig (A, 322).]

ADENODIASTATIC, adj. A^{2}d''e^{2}n-o-di-a^{2}s-ta^{2}t'i^{2}k. Lat., *adenodiastaticus.* Pertaining to adenodiastasis. [A, 322.]

ADENODYNIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-o-di^{2}n(du^{6}n)'i^2-a^3. From ἀδήν, a gland, and ὀδύνη, pain. See ADENALGIA.

ADENO-FIBROMA (Lat.), n. n. A^{2}d(a^{3}d)''e^{2}n-o-fi(fe)-bro'ma^3. Fr., *adéno-fibrome.* An adenoma having a fibrous stroma. [E.]

ADENOGENESIS (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o-je^{2}n(ge^{2}n)'e^2-si^{2}s. Gen., *adenogene'seos.* From ἀδήν, a gland, and γένεσις, a creation. Ger., *Drüsenbildung.* The formation of glands. [A, 322.]

ADENOGRAPHER, n. A^{2}d-e^{2}n-o^{2}g'ra^{2}f-u^{6}r. From ἀδήν, a gland, and γράφειν, to write. Fr., *adénographe.* Ger., *Drüsenbeschreiber.* Sp., *adenógrafo.* A writer on glands. [A, 306.]

ADENOGRAPHIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-o-gra^{2}f(gra^{3}f)'i^2-a^3. See ADENOLOGY.

ADENOGRAPHIC, adj. A^{2}d-e^{2}n-o-gra^{2}f'i^{2}k. Lat., *adenographicus.* Fr., *adénographique.* Ger., *adenographisch.* Sp., *adenográfico.* Pertaining to adenography. [A 306.]

ADENOGRAPHY, n. A^{2}d-e^{2}n-o^{2}g'ra^{2}f-i^2. Lat., *adenographia.* Fr., *adénographie.* Ger., *Adenographie, Drüsenbeschreibung.* It., *adenografia.* Sp., *adenografia.* See ADENOLOGY.

ADENOID, adj. A^{2}d'e^{2}n-oid. Gr., ἀδενοειδής (from ἀδήν, a gland, and εἶδος, an appearance). Lat., *adenoides, adenodes.* Fr., *adénoïde.* Ger., *adenoid, drüsenartig.* It., Sp., *adenoide.* 1. Resembling a gland in structure; as a n., a glandular tumor. See ADENOMA. 2. Pertaining to glands. In 1860 His applied the term to the felt-like or reticular connective tissue forming the framework of lymphatic glands and some other parts. [J.] See *A.* TISSUE. For further uses of the word, see *A.* BODY, *A.* DEGENERATION, and *A.* VEGETATIONS.—**A. cancer.** See ADENO-CARCINOMA.—**A. muscle.** See THYRO-ADENOIDENS.—**A. tumor.** See ADENOMA.

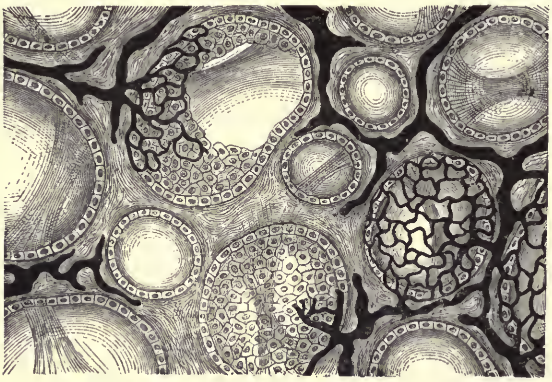
ADENOIDES (Lat.), adj. A^{2}d(a^{3}d)-e^{2}n-o-i(e)'dez(de^{2}s. Adenoid. As a n. (*corpus* understood), an old term for the prostate. [Galen (A, 255).]

ADENOLOGADITIS (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o-lo^{2}g-a^3-di(de)'ti^{2}s. Gen., *adenologadit'idis.* From ἀδήν, a gland, and λογάδες, the eyes (see also *-itis**). Fr., *adénologadite.* Ger., *Drüsenbindehautentzündung.* An old term for ophthalmia neonatorum. [A, 305.]

ADENOLOGICAL, adj. A^{2}d''e^{2}n-o-lo^{2}j'i^{2}k-a^{2}l. Lat., *adenologicus.* Fr., *adénologique.* Ger., *adenologisch.* Sp., *adenológico.* Pertaining to glands or to adenology. [C.]

ADENOLOGY, n. A^{2}d-e^{2}n-o^{2}l'o-ji^2. Lat., *adenologia.* Fr., *adénologie.* Ger., *Adenologie, Drüsenlehre.* It., *adenologia.* Sp., *adenología.* That part of anatomy which relates to the glands.

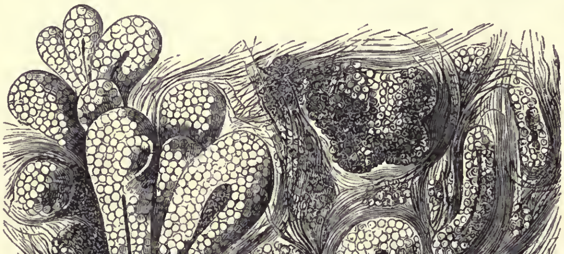
ADÉNOLYMPHATOCÈLE (Fr.), n. A^3-da-no-li^{2}n-fa^3-to-se^{2}l. See LYMPHATOCELE.



ADENO-LYMPHITIS (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o-li^{2}m(lu^{6}m)-fi(fe)'ti^{2}s. Gen., *adeno-lymphit'idis.* Fr., *adéno-lymphite.* See LYMPHADENITIS.

ADÉNOLYMPHOCÈLE (Fr.), n. A^3-da-no-li^{2}n-fo-se^{2}l. 1. A name given by Nélaton to certain lymphangiomata in which the distended lymphatics may be traced into the neighboring glands. [E.] 2. Anger's term for the *lymphangiectasie ganglionnaire* of Verneuil (*q. v.*).

ADENO-LYMPHOMA (Lat.), n. n. A^{2}d(a^{3}d)''e^{2}n-o-li^{2}m(lu^{6}m)-fo'ma^3. Gen., *adeno-lymphom'atos* (*-ti^{2}s*). See LYMPHADENOMA.



ADENOM (Ger.), n. A^3-de^{2}n-om'. See ADENOMA.—**Schweissdrüsena'.** See ADENOMA *sudoriparum.*—**Talgdrüsena'.** See ADENOMA *sebaceum.*

ADENOMA (Lat.), n. n. A^{2}d(a^{3}d)-e^{2}n-o'ma^3. Gen., *adenom'atos* (*-tis*). For deriv., see ADEN and *-oma.** Fr., *adénome.* Ger., *Adenom, Drüsengeschwulst.* It., Sp., *adenoma.* Syn.: *glandular* (or *adenoid*) *tumor.* A tumor having a glandular structure. [A, 321.] An homologous neoplasm characterized by the presence of the elements of acinous or tubular glands; or a tumor chiefly

ADENOMA OF THE THYREOID. (AFTER BILLROTH.)

made up of an agglomeration of altered glands (as in the skin or a mucous membrane). [P. Broca (A, 328).] The adenomata are less sharply defined than most other classes of tumors. Glandular tissue, more or less resembling that of the organ from which they spring, is usually the predominating element. They are generally encapsulated, but are prone to penetrate the surrounding textures, and in rare instances supplant them, and are apt to give rise to the formation of cysts. As a rule, they do not recur after removal, but some of them tend to malignant degeneration. [A, 291.] Förster distinguishes three forms: 1. Tumors formed by the proliferation of single lobes of normal glands. 2. Those formed by proliferation of the connective tissue in or adjacent to normal glands. 3. Those of a glandular structure that are developed independently of normal glands. Those last named are generally thought, however, to be of the sort defined under *Heterotopous a.* [Birch-Hirschfeld (A, 319).] A. of the breast (*chronic mammary tumor, hydatid disease of the breast* [Sir A. Cooper], *pancreatic sarcoma* [Abernethy], *mammary glandular tumor, proliferative cysts* [Sir J. Paget], *carcinoma hydatides* [Sir C. Bell], *sero-cystic sarcoma* [Sir B. Brodie], *tuberous cystic tumor* [C. Hawkins], *tumeur adénoïde* (ou *fibrineuse,* ou *fibreuse*) [Velpeau], *tumeur fibreuse* [Cruveilhier], *tumeur par hypertrophie partielle de la mamelle* [Vidal], *fibröses lappige Adenom* [Billroth]) forms a round or nodulated, highly movable, circumscribed, somewhat elastic lump, in the gland or adjacent to it, made up of new-formed acini, occurring for the most part in young, newly married women, or during the

ADENOMA OF THE BREAST. (AFTER BILLROTH.)

puerperal period. Microscopically, it is a partial hypertrophy of the mammary lobules. [A, 222; J. Birkett (A, 279), Albert (A, 319).] Cf. ADENOCELE. In the liver, where it is included as one of the forms of cancer, it presents nodules of various sizes, either on the surface of the organ or in its substance, having a granular appearance. [C. A. Ewald (A, 319).] In the nose it often undergoes cystic degeneration or forms mucous polypi. [Gottstein (A, 319).] In the pharynx it forms adenoid vegetations. [B. Fraenkel (A, 319).] In the rectum it forms very vascular polypi, which bleed readily, or vegetations. [Englisch (A, 319).] For a. of the ovary, see *A. cylindro-cellulare.* In the uterus it consists of a degeneration of the endometrium by overgrowth of the utricular glands, either diffused or in the form of a polypus. The former variety is prone to relapse and to undergo carcinomatous degeneration. [Bandl (A, 319).] According to Fritsch, carcinoma of the body of the uterus is really malignant a. [A, 224.]—**Acinous a.** Ger., *acinöses Adenom.* Syn.: *racemose a.* One that contains acinous gland structure; it is the form developed in compound racemose glands, especially the mamma, forming tumors that are usually rounded, circumscribed, and easily enucleated, varying in their gross appearances according as they affect one or more of the lobes of the gland, as the acini or stroma predominate, and as cysts have or have not been formed. [A, 291, 365.]—**A. carcinomatosum.** See ADENO-CARCINOMA.—**A. cylindro-cellulare.** Proliferating (or myxoid or colloid) cystoma; clinically, the commonest form of ovarian cystoma, the outer wall of which consists of fibrous connective tissue and is poor in cells, while the inner wall contains an abundance of spindle-cells and round cells, and is lined with cylindrical epithelium having crypts resembling the acini of a gland or showing papillomatous growths. [Pernice (A, 319).] See CYSTOMA *proliferum glandulare* and CYSTOMA *proliferum papillare.*—**A. diffusum.** Hyperplasia of a mucous membrane, with a predominance of the glandular elements. [A, 326.]—**A. fibrosum.** A fibrous neoplasm in the stroma of a gland. [A, 326.]—**A. lupiforme.** A name proposed by Tilbury Fox for lupus erythematosus. [G, 69.]—**A. myomatosum.** An a. in which the stroma has been invaded by myoma. [R. J. Godlee (A, 364).]—**A. myxomatosum.** 1. An a. in which the stroma has been invaded by myxoma. [R. J. Godlee (A, 364).] 2. A myxoma developed in the stroma of a gland; such formations, either nodular or diffused, have been found in the thyroid gland. [A, 326; Birch-Hirschfeld (A, 319).]—**A. polyposum.** A collection of polypi made up of exuberant glands. [A, 326.]—**A. sarcomatosum.** A sarcoma developed in the stroma of an a. or of a gland. [R. J. Godlee (A, 364), A, 326.]—**A. sebaceum.** Ger., *Talgdrüsenadenom.* A cutaneous a. the structure of which corresponds in type to that of the sebaceous glands. [Birch-Hirschfeld (A, 319).]—**A. sudoriparum.** Ger., *Schweissdrüsenadenom.* A cutaneous a. the structure of which corresponds in type to that of the sudoriparous glands; it may form a nodule under the skin or project in a wart-like mass. [Birch-Hirschfeld (A, 319).]—**Blepharo-a.** See the major list.—**Carcinomatous a.** See ADENOCARCINOMA.—**Cutaneous a.** Ger., *cutanes Adenom.* In Auspitz's classification of skin diseases, the cutaneous a'ta form a subdivision of the family *Hyperakanthoses,* comprising those produced by hyperplasia of the follicles, under which is included *idrotadenoma* (*q. v.*). [G, 4.] See also *A. lupiforme, A. sebaceum,* and *A. sudoriparum.*—**Cylindrical a.** See *Tubular a.*—**Cystic a.** An a. that contains cysts. [E.] Cf. ADENOCELE and ADENO-CYSTOMA.—**Heterotopous a.** Ger., *heterotopes Adenom.* A rare form, supposed to be developed from elements originally belonging to normal glands, but which have found their way to other parts of the organism. [Birch-Hirschfeld (A, 319).]—**Idrota'.** See the major list.—**Lympha'.** See the major list.—**Multiglandular a.** Fr., *adénome multiglandulaire, polyadénome.* An a. made up of a mass of altered small glands. [P. Broca (A, 328).]—**Racemose a.** See *Acinous a.*—**Tubular a.** Ger., *tubulöses Adenom.* A form observed in mucous membranes possessed of sacciform glands, in which the latter are changed into tubular glands. The term is also applied to ovarian cystomata in their early stages. [Birch-Hirschfeld (A, 319).]—**Uniglandular a.** Fr., *adénome uniglandulaire, monadénome.* An a. affecting a single gland. [P. Broca (A, 328).]

ADENOMALACIA (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o-ma^{2}l(ma^{3}l)a(a^3)'si^2(ki^2)-a^3. From ἀδήν, a gland, and μαλακία, softness. Fr., *adénomalacie.* Ger., *Drüsenerweichung.* It., *adenomalacia.* Softening of the glands. [E.]

ADENO-MENINGEAL, adj. A^{2}d''e^{2}n-o-me^{2}n-i^{2}n'je-a^{2}l. For deriv., see ADEN and MENINGEAL. Lat., *adeno-meningeus.* Fr., *adéno-méningé.* Ger., *adenomeningeïsch.* It., *adeno-meningeo.* Sp., *adeno-meníngeo.* Affecting the glands of a membrane. [Pinel (A, 306).] See *A.-m.* FEVER.

ADENO-MESENTERITIS (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o-me^{2}s-e^{2}n-te^{2}r-i(e)'tis. Gen., *adeno-mesenterit'idis.* For deriv., see ADEN, MESENTERY, and *-itis.** Fr., *adéno-mésentérite.* Inflammation of the mesenteric glands. [A, 320.]

ADENO-MYXOMA (Lat.), n. n. A^{2}d(a^{3}d)''e^{2}n-o-mi^{2}x(mu^{6}x)-o'ma^3. Gen., *adeno-myxomatos* (*-tis*). For deriv., see ADEN and MYXOMA. An adenoma having its stroma invaded by myxoma. [R. J. Godlee (A, 364).]

ADENONCOSIS (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-o^{2}n^2-ko'si^{2}s. Gen., *adenonco'seos.* From ἀδήν, a gland, and ὄγκωσις, an enlargement. Fr., *adénoncose.* Ger., *Adenonkosis, Drüsengeschwulst.* It., *adenoncosi.* Sp., *adenóncosis.* A glandular swelling or the process of its formation. [A, 305.]

ADENONCUS (Lat.), n. m. A^{2}d(a^{3}d)-e^{2}n-o^{2}n^2'ku^{3}s(ku^{4}s). From ἀδήν, a gland, and ὄγκος, a mass. Ger., *Adenonkos.* A glandular swelling or tumor.

ADENO-NERVOUS, adj. A^{2}d''e^{2}n-o-nu^{5}r'vu^{3}s. Lat., *adeno-nervosus* (from ἀδήν, a gland, and *nervus,* a nerve). Fr., *adéno-nerveux.* It., *adeno-nervoso.* Sp., *adeno-nervioso.* See ADENO-NEUROTIC.

ADENO-NEUROTIC, adj. A^{2}d''e^{2}n-o-nu^2-ro^{2}t'i^{2}k. Lat., *adenoneuroticus, adenoneurosus* (from ἀδήν, a gland, and νεῦρον, a nerve). Fr., *adéno-neurotique.* Ger., *adenoneurotisch.* Affecting glands and nerves. See *A.-n.* FEVER.

ADENONKOS, ADENONKOSIS (Lat.), n's. See ADENONCUS and ADENONCOSIS.

ADENOPATHIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-o-pa^{2}th(pa^{3}th)'i^2-a^3. From ἀδήν, a gland, and πάθος, a disease. See ADENOPATHY.

ADÉNOPATHIE (Fr.), n. A^3-da-no^{2}p-a^3-te. See ADENOPATHY.—**A's angibromiques.** See ADÉNIES *angibromiques*.—**A. du chancre infectant.** See *Syphilitic bubo*.—**A. trachéo-bronchique, A. trachéo-laryngienne.** See *Tracheo-bronchial* and *Tracheo-laryngeal* ADENOPATHY.

ADENOPATHY, n. A^{2}d-e^{2}n-o^{2}p'a^{2}th-i^2. Lat., *adenopathia* (*q. v.* for deriv.). Fr., *adénopathie*. Ger., *Adenopathie*. It., *adenopatia*. A general term for any morbid state of the lymphatic glands, especially a lymphadenitis due to infection.—**Primary a.** Fr., *adénopathie primaire*. The lymphadenitis that follows an infecting chancre, as distinguished from subsequent glandular manifestations of syphilis. [H. Leloir, "Progr. méd.," Feb. 6, 1886, p. 103.]—**Syphilitic adenopathies.** Fr., *adénopathies syphilitiques*. Enlarged and indurated lymphatic glands symptomatic of syphilis; most commonly the inguinal, the posterior cervical, and the cubital. [G.]—**Tracheo-bronchial a.** Fr., *adénopathie trachéo-bronchique*. Hypertrophy of the peribronchial glands, observed in certain infectious diseases and those of the air-passages, especially at the outset of pulmonary tuberculosis, in typhoid fever, in measles, etc., giving rise to spasmodic cough. [A, 321.]—**Tracheo-laryngeal a.** Fr., *adénopathie trachéo-laryngienne*. A disease of the lymphatic glands lying between the larynx and trachea in front and the œsophagus behind. [Gouguenheim, "Gaz. hebd. de méd. et de chir.," Sept. 9, 1881; "Ann. des mal. de l'oreille," etc., May, 1882, p. 102.]

ADENO-PHARYNGEAL, adj. A^{2}d''e^{2}n-o-fa^2-ri^{2}n'je-a^{2}l. For deriv., see ADEN and PHARYNX. Lat., *adenopharyngeus*. Fr., *adéno-pharyngien*. Ger., *adenopharyngeïsch*. It., *adeno-faringeo*. Sp., *adeno-faringeo*. Pertaining to the thyreoid gland and to the pharynx. [A, 305. 306.]—**A.-p. muscle.** See THYREO-ADENOIDEUS.

ADENOPHARYNGITIS (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o-fa^2(fa^3)-ri^{2}n(ru^{6}n)-ji(ge)'ti^{2}s. Gen., *adenopharyngit'idis*. For deriv., see ADEN, PHARYNX, and *-itis*.* Fr., *adéno-pharyngite*. It., *adenofaringite*. Sp., *adenofaringítis*. Inflammation of the pharynx and tonsils. [A, 305.]

ADÉNO-PHLEGMON (Fr.), n. A^3-da-no-fle^{2}g-mo^{2}n^2. A phlegmonous lymphadenitis (applied by Siredey to phlegmonous forms of pelvic lymphadenitis). [A, 62.]

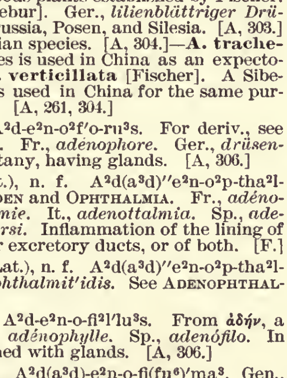
ADENOPHORA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-o^{2}f'o-ra^3. From ἀδήν, a gland, and φορεῖν, to bear. Fr., *adénophore*. Ger., *Drüsenträger*. A genus of campanulaceous plants established by Fischer. [A, 304. 305.]—**A. liliifolia** [Ledebur]. Ger., *lilienblättriger Drüsenträger*. A species found in Prussia, Posen, and Silesia. [A, 303.]—**A. stylosa** [Fischer]. A Siberian species. [A, 304.]—**A. trachelioides.** The root of this species is used in China as an expectorant and emollient. [A, 261.]—**A. verticillata** [Fischer]. A Siberian species, the root of which is used in China for the same purposes as that of *A. trachelioides*. [A, 261, 304.]

ADENOPHOROUS, adj. A^{2}d-e^{2}n-o^{2}f'o-ru^{3}s. For deriv., see ADENOPHORA. Lat., *adenophorus*. Fr., *adénophore*. Ger., *drüsentragend*. Sp., *adenóforo*. In botany, having glands. [A, 306.]

ADENOPHTHALMIA (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o^{2}p-tha^{2}l-(tha^{3}l)'mi^2-a^3. For deriv., see ADEN and OPHTHALMIA. Fr., *adéno-ophthalmie*. Ger., *Adenophthalmie*. It., *adenottalmia*. Sp., *adenoftalmia*. Syn.: *ophthalmia tarsi*. Inflammation of the lining of the Meibomian glands, or of their excretory ducts, or of both. [F.]

ADENOPHTHALMITIS (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o^{2}p-tha^{2}l-(tha^{3}l)-mi(me)'ti^{2}s. Gen., *adenophthalmit'idis*. See ADENOPHTHALMIA.

ADENOPHYLLOUS, adj. A^{2}d-e^{2}n-o-fi^{2}l'lu^{3}s. From ἀδήν, a gland, and φύλλον, a leaf. Fr., *adénophylle*. Sp., *adenófilo*. In botany, having the leaves furnished with glands. [A, 306.]



ADENOPHYMA (Lat.), n. n. A^{2}d(a^{3}d)-e^{2}n-o-fi(fu^6)'ma^3. Gen., *adenophym'atos* (*-tis*). From ἀδήν, a gland, and φῦμα, a swelling. Ger., *Drüsengeschwulst*. A glandular swelling. [G.]—**A. inguinale.** See BUBO.

ADENOPODOUS, adj. A^{2}d-e^{2}n-o^{2}p'o-du^{3}s. Lat., *adenopodus* (from ἀδήν, a gland, and πούς, a foot). Fr., *adénopode*. Ger., *drüsenfüssig*. Sp., *adenópodo*. In botany, having glands on the petioles. [A, 306, 316.]

ADENOS, n. A^{2}d-e'no^{2}s. Fr., *adénos, coton de marine*. Ger., *Seebaumwolle*, Syn.: *marine cotton*. A fine quality of cotton-wool from the Levant; so called from Adena. [A, 305, 315, 316.]

ADENÖS (Ger.), adj. A^3-de^{2}n-u^{5}s'. Glandular. [A, 305.]

ADENO-SARCOMA (Lat.), n. n. A^{2}d(a^{3}d)''e^{2}n-o-sa^{3}r-ko'ma^3. Gen., *adeno-sarcom'atos* (*-tis*). For deriv., see ADEN and SARCOMA. Fr., *adéno-sarcome*. Ger., *Adenosarcom*, *Drüsensarkom*. An adenoma with its stroma infiltrated with sarcomatous elements, or a sarcoma developed in a gland. [A, 365, R. J. Godlee (A, 364).]—**Cystic a.-s.** Fr., *adéno-sarcome kystique*. Syn.: *cysto-sarcoma phyllodes* (seu *proliferum*) [Müller], *phylloid cyst* [Müller], *proligerous cyst* [Sir J. Paget]. An a.-s. that has undergone cystic degeneration.

ADENO-SARCOMA OF THE MAMMA. (AFTER BILLROTH.)

ADENO-SCIRRHUS (Lat.), n. m. A^{2}d(a^{3}d)''e^{2}n-o-si^{2}r(ski^{2}r)'-ru^{3}s(ru^{4}s). For deriv., see ADEN and SCIRRHUS. Fr., *adéno-squirrhe*. Scirrhus of a gland, or an adenoma with its stroma infiltrated with carcinoma. [A, 322, R. J. Godlee (A, 364).]

ADENOSCLEROSIS (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o-skle^2-ro'si^{2}s. Gen., *adenoscleros'eos*. For deriv., see ADEN and SCLEROSIS. Fr., *adénosclérose*. Ger., *Adenosklerose*, *Drüsenverhärtung*. It., *adenosclerosi*. Syn.: *scleradenitis*. Swediaur's term for an indolent induration and tumefaction of a gland not of a scirrhous nature. [A, 320, 322.] Cf. *Indolent* BUBO.

ADENOSE, adj. A^{2}d'e^{2}n-os. From ἀδήν, a gland. Lat., *adenosus*. Ger., *adenös*, *drüsig*. 1. Resembling a gland. [A, 302.] 2. Abounding in glands. [A, 316.]

ADENOSIS (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}n-o'si^{2}s. Gen., *adenos'eos*. For deriv., see ADEN and *-osis*.* Fr., *adénose*. Ger., *Drüsenbildung* (1st def.), *Drüsenkrankheit*. It., *adenosi*. Sp., *adenósis*. 1. Adenogenesis (*q. v.*). [A, 322.] 2. Any glandular disease, especially (as in Alibert's classification) if chronic. [A, 320.] 3. Scrofula. [A, 305.] 4. Hodgkin's disease. See PSEUDO-LEUCOCYTHÆMIA.—**A. scrofulosa.** Scrofula. [A, 313.]

ADENOSKLEROSIS (Lat.), n. f. See ADENOSCLEROSIS.

ADENOSTEMONOUS, adj. A^{2}d''e^{2}n-o-ste^{2}m'o^{2}n-u^{3}s. From ἀδήν, a gland, and στημόνιον, an upright stick. Fr., *adénostémone*. Ger., *drüsenstaubfadig*. In botany, having glands on the filaments of the stamens. [A, 316, 348.]

ADENOSTYLEÆ (Lat.), n. f. pl. A^{2}d(a^{3}d)''e^{2}n-o-sti(stu^6)'le^2-e(a^3-e^2). From ἀδήν, a gland, and στῦλος, a column. Fr., *adénostylées*. Sp., *adenostíleas*. In botany, a name given by Cassini to a subdivision of the natural order *Compositæ*, comprising those genera in which the branches of the style are beset with glandular hairs. [A, 345; B, 7.]

ADENOSTYLES, ADENOSTYLIS (Lat.), n's f. A^{2}d(a^{3}d)-e^{2}n-o^{2}s'ti^{2}l(tu^{6}l)-ez(e^{2}s), -i^{2}s. For deriv., see ADENOSTYLEÆ. Fr., *adénostyle, adénostylis*. Ger., *Drüsengriffel*. Sp., *adenóstilis*. 1. A genus of plants of the natural order *Compositæ*, formerly a part of Tournefort's genus *Cacalia*. [A, 303, 321; B, 19.] 2. A genus of orchids, founded on a single species indigenous to Java. [A, 306.]—**A. albifrons** [Reichenbach]. A species found in the south of Europe.—**A. alpina.** Syn.: *Cacalia alpina* [Jacquin] (seu *glabra* [Villars]). An Alpine species. An infusion of the leaves was formerly used as a remedy for coughs. [A, 303.]—**A. glabra.** A species found in the south of Europe (perhaps identical with *A. alpina*), the leaves of which have been used for the same purpose. [B, 19.]

ADENOSTYLOUS, adj. A^{2}d-e^{2}n-o-stil'u^{3}s. Fr., *adénostylé*. In botany, resembling the genus *Adenostyles*. [A, 348.]

ADENOSUS (Lat.), adj. A^{2}d(a^{3}d)-e^{2}n-o'su^{3}s(su^{4}s). From ἀδήν, a gland. Glandular. [E.]

ADENO-SYNCHITONITIS (Lat.), n. f. A^{2}d(a^{3}d)''e^{2}n-o-si^{2}n-(su^{6}n)-ki^{2}t(ch^{2}i^{2}t)-o^{2}n-i(e)'ti^{2}s. Gen., *adeno-synchitonit'idis*. From ἀδήν, a gland, σύν, with, and χιτών, a skin, membrane, or tunic (see also *-itis**). Fr., *adénosynchitonite*. Ger., *Adenosynchitonitis*. According to von Graefe and Sonnemayer, inflammation of the Meibomian glands. According to the older writers, ophthalmia neonatorum. [F.]

ADENOTOMICAL, adj. A^{2}d-e^{2}n-o-to^{2}m'i^{2}k-a^{2}l. Fr., *adénotomique*. Sp., *adenotómico*. Pertaining to adenotomy (*q. v.* for deriv.). [A, 306.]

ADENOTOMY, n. A^{2}d-e^{2}n-o^{2}t'o-mi^2. Lat., *adenotomia* (from ἀδήν, a gland, and τέμνειν, to cut). Fr., *adénotomie*. Ger., *Adenotomie*, *Drüsenzergliederung*. It., *adenotomia*. Sp., *adenotomía*. The dissection of glands. [A, 305.]

ADENO-TYPHUS (Lat.), n. m. A^{2}d(a^{3}d)''e^{2}n-o-ti(tu^6)'fu^{3}s-(fu^{4}s). For deriv., see ADEN and TYPHUS. It., *adeno-tifo*. See *Typhoid* FEVER.

ADENOUS, adj. A^{2}d'e^{2}n-u^{3}s. See ADENOSE.

ADEN ULCER, n. See under ULCER.

ADEPHAGIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}f-a(a^3)'ji^2(gi^2)-a^3. Gr., ἀδηφαγία (from ἄδην, to satiety, and φαγεῖν, to eat). Fr., *adéphagie*. Ger., *Adephagie*, *Gefrässigkeit*, *unersättliches Essen*. It., *adefagia*. Sp., *adefagia*. Syn.: *intemperantia edendi*. An insatiable craving for food; regarded by Hofmann as one of the chief causes of intestinal worms in children. [A, 320, Jourdan (A, 330).]

ADEPHAGOUS, adj. A^{2}d-e^{2}f'a^{2}g-u^{3}s. Fr., *adéphage*, *adéphagique*. Sp., *adéfago*. Having a voracious appetite; in zoology, voracious, carnivorous. [A, 334, 337.]

ADEPS (Lat.), n. m. and f. A^{2}d(a^{3}d)'e^{2}ps. Gen., *ad'ipis*. Gr., λίπος, πιμελή. Fr., *graisse*. Ger., *Fett*, *Schmeer*. It., *adipe*. Sp., *grasa*. 1. Animal fat, grease. 2. Fatness. 3. In alchemy, that portion of a liquid which is the last to distill over. 4. Lard [U. S. Ph.]. [A, 318; B, 50.] Cf. AXUNGIA, SEBUM, and SERUM.—**A. anserinus, A. anseris.** Fr., *graisse d'oie*. Ger., *Gänsefett*. Goose grease; formerly used in pharmacy, and still employed as a domestic remedy, both internally and externally.—**A. benzoatus** [Br. Ph.], **A. benzoinatus** [U. S. Ph.]. Fr., *graisse* (ou *axonge* [Fr. Cod.]) *benzoïnée*. Ger., *benzoinirtes Schmalz*. It., *adipe benzoato*. Syn.: *axungia balsamica* (seu *benzoata*), *unguentum benzoini* [U. S. Ph., 1870]. Benzoinated, or benzoated, lard; made by suspending 1 part of powdered benzoin, loosely wrapped in muslin, in 50 parts of melted lard, and heating on a water-bath, at a temperature not exceeding 60° C., for two hours, when the benzoin is removed and the lard strained. [U. S. Ph.] The Br. Ph. directs mixing 1 part of benzoin with 48 parts of lard, melting, and removing the residual benzoin by straining. The Fr. Cod. orders 5 parts of tincture of benzoin (representing less than 1 part of benzoin) to be added to 1,000 parts of melted lard. [B.]—**A. caninus.** Fr., *graisse de chien*. Ger., *Hundefett*. Dog's fat; formerly used in pharmacy. [Vogl (A, 319).]—**A. cantharidibus medicatus.** Fr., *pommade épispastique verte*. See *Pomatum viride cum* CANTHARIDE.—**A. colli equini.** Ger., *Kammfett*. Fat prepared from the upper part of the neck of the horse (under the mane); used in vete-

rinary practice. [A, 303, Vogl (A, 319).]—**A. cortice daphnes gnidii medicatus.** Fr., *pommade épispastique au garou.* See *Pomatum epispasticum cum extracto* GNIDII.—**A. curatus** [Finn. Ph.]. A mixture of 1 part of Peruvian balsam with 48 parts of lard. [B, 95.]—**A. ex fele.** Cat's grease ; used by Celsus as an emollient. [B, 45.]—**A. humanus.** Human fat. [A, 316.]—**A. hydrargyri muriate oxygenato medicatus.** See POMMADE *de Cirillo.*—**A. hydrargyri nitrate medicatus.** See *Unguentum* HYDRARGYRI NITRATIS.—**A. hydrargyri oxido rubro et plumbi acetate medicatus.** Fr., *pommade de Régent.* See POMATUM *de Regent.* —**A. hydrargyro medicatus.** See *Unguentum* HYDRARGYRI.—**A. lauro medicatus.** Fr., *pommade* (ou *onguent*) *de laurier.* See POMATUM *laurinum.*—**A. medullæ bovis.** Fr., *moëlle de bœuf.* Ger., *Rindsmarkfett.* Beef marrow ; formerly used in pharmacy. [Vogl (A, 319).]—**A. mineralis.** See PETROLATUM.—**A. muris alpini.** Fr., *graisse de marmotte.* Ger., *Murmelthierfett.* Marmot's grease ; formerly used in pharmacy. [Vogl (A, 319.]—**A. myristicæ.** See *Oleum* MYRISTICÆ *expressum.*—**A. nitrate hydrargyri** (seu **mercurii**) **medicatus.** See *Unguentum* HYDRARGYRI *nitratis.*—**A. nucistæ.** See *Oleum* MYRISTICÆ *expressum.*—**A. odoriferus.** Aromatic lard ; equal parts of lard and magnolia pomade. [A, 316.]—**A. ovillus, A. ovis.** Fr., *suif.* Ger., *Hammelfett, Hammeltalg.* It., *sevo.* Sp., *sebo.* Mutton tallow. Cf. SEBUM.—**A. oxido zinci medicatus.** See *Unguentum* ZINCI *oxidi.*—**Adeps oxygenatus.** Fr., *graisse oxigénée.* Syn. : *unguentum acidi nitrici* (seu *nitrosi*). Oxygenated lard ; made by melting 8 parts of lard in a porcelain capsule over a slow fire, stirring continually with a glass rod, adding 1 part of nitric acid (35°), removing the mixture from the fire when bubbles begin to form, and pouring it into paper molds to solidify. [Bav. Ph. (1822), Sp. Ph. (1798), Fr. Cod. (1837), Finn. Ph. (1819), Gr. Ph. (1837), Han. Ph. (1833), Hess. Ph. (1827), Port. Ph. (1836), Pol. Ph. (1817), Sax. Ph. (1837), Swed. Ph. (1817), Turin Ph. (1833). The U. S. Ph. (1820), Dutch Ph. (1805), Belg. Ph. (1823), Ed. Ph. (1813), and Hamb. Ph. (1835) direct 16 parts of lard and 1 part of acid ; the Dub. Ph. (1826) 4 of lard, 4 of olive-oil, and 1 of acid : the Antw. Ph. (1812) 12 of lard and 1 of acid ; and the Padua Ph. (1832) 12 of lard and 1½ of acid.] Formerly in great repute for tinea, scabies, eczema, and venereal diseases. [A, 362.]—**A. papavere, hyoscyamo et belladonna medicatus.** See POMATUM *populeum.*—**A. pedum tauri.** Ger., *Rindsklauenfett.* See *Neat's-foot* OIL.—**A. petrolei.** See PETROLATUM. —**A. porci, A. porcina.** See *A. suillus.*—**A. præparatus** [Br. Ph.]. Prepared lard. [B.]—**A. stibiatus.** Fr., *graisse* (ou *pommade*) *stibiée.* See *Unguentum* ANTIMONII *tartratis.*—**A. suillus** [Ger. Ph.]. Fr., *graisse de porc.* Ger., *Schweinefett, Schweineschmalz.* It., *adipe porcino.* Sp., *manteca.* Syn.: *a. porcina, axungia porci* (seu *porcina*). Hog's grease, lard ; prepared from the adipose tissue of the omentum, and that surrounding the kidneys, of the hog (*Sus scrofa*) by heating the tissue sufficiently to liquefy the fat and set it free, after which it is strained. It is a soft, white substance, melting between 38° and 42° C. into a clear liquid free from any rancid odor. It consists of about 62 per cent. of liquid fat (olein) and 38 per cent. of solid fat (glycerides of stearic and palmitic acids). [Vogl (A, 319).]—**A. suillus benzoatus** [Russ. Ph.]. See *A. benzoinatus.*—**A. suillus curatus** (seu **depuratus**, seu **præparatus**). See *A. præparatus.*—**A. sulfure et ammoniæ muriate medicatus, A. sulfure et carbonate potassæ medicatus.** See *Unguentum* SULPHURIS *alkalinum.*—**A. tartaro stibii medicatus.** See *Unguentum* ANTIMONII *tartratis.*—**A. taxi.** Ger., *Dachsfett.* Badger's grease, the fat of the *Meles taxus ;* formerly used in pharmacy. [Vogl (A, 319).]—**Ceratum adipis** [U. S. Ph., 1860]. Simple cerate. See CERATUM.—**Oleum adipis** [U. S. Ph.]. Fr., *huile de graisse.* Ger., *Schmalzöl, Specköl.* Lard oil ; a fixed oil (olein) expressed from lard. Used in the preparation of unguentum hydrargyri nitratis. [A, 247, 304, 327.]—**Unguentum adipis** [U. S. Ph., 1860]. Simple ointment. See UNGUENTUM.

ADEPT, n. A^{2}d-e^{2}pt′. Lat., *adeptus* (from *adipisci*, to attain to). Fr., *adepte.* It., Sp., *adepto.* In alchemy, a master (one who professed to have succeeded in the objects of the art). The name was afterward assumed by Paracelsus and others. [A, 300, 303, 304, 305.]

ADEPTAM, n. An old term for alchemy. [A, 305.]

ADEPTUS (Lat.), adj. A^{2}d(a^{3}d)-e^{2}pt′u^{3}s(u^{4}s). See ADEPT, *Adepta* MEDICINA, and *Adepta* PHILOSOPHIA.

ADEQUACY, n. A^{2}d′e-kwa-si^2. From *adæquare*, to be equal. The possession of sufficient functional activity to meet the requirements of the organism (said of the organs of the body).

ADER, n. An alchemical term for "lac recens sine butyro." [B, 50.] (? Buttermilk.)

ADER (Ger.), n. A^3′de^{2}r. 1. In general, any vessel serving to convey a juice in an animal organism, including the blood-vessels and the lymphatics ; in particular, a vein. [A, 301, 303, 304.] 2. In botany, a vein of a leaf. [B.]—**A'ähnlich.** Resembling a blood-vessel. [A, 355.]—**A'beschreibung.** See ANGEIOGRAPHY.—**A'binde.** The fillet or bandage used to obstruct the current of blood in the superficial veins of a limb, to facilitate the operation of venesection. [A, 305.]—**A'bruch.** See the major list.—**A'chen.** A venule. [A, 315.]—**A'druck.** Venous pressure. [B.]—**A'entzündung.** See PHLEBITIS.—**A'falten.** The valves of the veins. [A, 355.]—**A'fistel.** A term applied to a lesion that sometimes forms after venesection in the horse ; a hard, painful swelling, with the opening into the vein persisting and discharging a thin, watery, reddish fluid. [A, 305.]—**A'flügler.** See HYMENOPTERA.—**A'gang.** See DUCTUS *venosus.*—**A'gebäude.** The vascular system. [A, 315.]—**A'geflecht.** See the major list.—**A'geschwulst.** 1. An aneurysm. 2. A varix. 3. A thrombus. [A, 305.]—**A'gewebe.** A vascular plexus, especially the chorioid plexus. [A, 315, 320.] See also RETE *vasculosum.*—**A'haut, A'häutchen, A'höhle.** See the major list.—**A'icht.** Resembling veins. [A, 315.]—**A'ig.** 1. Venous. [J.] 2. Veined. [A, 315.]—**A'igrippig.** See NERVATOVENOSUS.—**A'knoten, A'krampf.** A varix. [A, 305, 315, 320.]—**A'krebs.** A cancer excessively rich in blood-vessels. [A, 305.]—**A'kropf.** 1. A varix. 2. A thrombus. [A, 305.]—**A'kropf des Thränensacks.** See DACRYOCYSTALGIA *varicosa.*—**A'lass.** Bloodletting.—**A'lassanhänger.** An advocate of bloodletting. [A, 315.]—**A'lassbäuschen.** The compress applied after bloodletting. [A, 305.]—**A'lassbecken.** A basin used to receive the blood in venesection. [A, 305.]—**A'lassbinde.** See *A'binde.*—**A'lassblut.** Blood obtained by venesection. [K, 13.]—**A'lasseisen.** A phlebotomy lancet. [A, 305.]—**A'lassen.** See the major list.—**A'lasser.** A bloodletter ; an advocate of bloodletting. [A, 305.]—**A'lassfreund.** An advocate of bloodletting. [A, 315.]—**A'lassgeräth.** See *A'lasszeug.*—**A'lasskunst.** The art of letting blood. [A, 305.]—**A'lasslancette.** A phlebotomy lancet. [A, 305.]—**A'lasslehre.** The doctrine or the art of bloodletting.—**A'lassschnäpper.** A spring-lancet used in bloodletting. [A, 305.]—**A'lassverband.** See *A'binde.*—**A'lassvertheidiger.** See *A'lassfreund.*—**A'lasswerkzeug.** See *A'lasszeug.*—**A'lasswuth.** An excessive fondness for bloodletting. [A, 355.]—**A'lasszeit.** The time of year for being bled. [A, 315.]—**A'lasszeug.** A set of bloodletting instruments. [A, 305.]—**A'los.** In botany, not veined or nerved. [A, 315.]—**A'messer.** See PULSIMETER.—**A'netz.** See the major list. —**A'öffnung.** Bloodletting. [A, 305.]—**A'pilz.** See MERULIUS *lacrimans.*—**A'presse.** A tourniquet. [A, 305.]—**A'reich.** Rich in veins. [A, 315.]—**A'rippig.** In botany, nerved. [A, 315.]—**A'riss.** Rupture of a vein. [A, 355.]—**A'schlag.** A pulsation, the pulse. [A, 315.]—**A'schlagmesser.** See PULSIMETER.—**A'schwamm.** See the major list.—**A'staar.** See CATARACTA *chorioidalis.*—**A'strang.** A vascular plexus. [A, 315.]—**A'verrenkung.** In vet. med., a straining of the tendons of the foot. [A, 305.]—**A'vorfall.** See *Chorioidal* STAPHYLOMA.—**A'wasser.** Blood-serum. [A, 315.]—**Bluta'.** A blood-vessel. [A, 304.]—**Goldene A'n.** The hæmorrhoidal veins ; hæmorrhoids. [A, 315, 320.] —**Güldene A.** A hæmorrhoid. [A, 303.]—**Halsa'.** The jugular vein. [A, 315.]—**Pulsa'.** An artery. [A, 304.]—**Scheinbare A.** The saphenous vein. [A, 355.]

ADERBRUCH (Ger.), n. A^3′de^{2}r-bruch^2. 1. Rupture of a vein. 2. A varix. 3. A mixed aneurysm. 4. Varicocele. [A, 305, 320.]—**Wässeriger A.** Varicocele with œdema of the scrotum. [A, 355.]

ADERGEFLECHT (Ger.), n. A^3′de^{2}r-ge^2-fle^{2}ch^{2}t. 1. A venous plexus, especially the chorioid plexus. [A, 305 ; I, 17.] 2. A lateral anastomosis. [A, 305.]—**A. der mittleren Hirnhöhle.** The chorioid plexus of the third ventricle. [I, 17.]—**A. der Seitenhöhlen.** The chorioid plexuses of the lateral ventricles. [I, 17.]—**A'schlagadern.** The chorioid arteries. [A, 320.]—**A'sfalte.** A fold of the chorioid plexus in the descending cornu of the lateral ventricle. [I, 17.]—**A'sfurche.** See FISSURA *chorioidea* (2d def.). —**A'venen.** The chorioid veins. [A, 320.]

ADERHAUT (Ger.), n. A^3′de^{2}r-ha^3-ut. The chorioid coat of the eye. [A, 305.]—**A'ablösung.** See DETACHMENT *of the chorioid.* —**A'colobom.** See COLOBOMA *chorioideæ.*—**A'commissur.** The commissure of the chorioid. [B.] See under *Ciliary* BODY.—**A'conus.** See CONUS and STAPHYLOMA *posticum Scarpæ.*—**A'entzündung.** See the major list.—**A'muskel.** The ciliary muscle. [B.]—**A'schwinden.** Atrophy of the chorioid. [A, 317.]—**A'spalt.** See COLOBOMA *chorioideæ.*—**A'spanner.** The ciliary muscle.—**A'staar.** See CATARACTA *chorioidealis* (2d def.).—**A'staphylom.** See *Chorioidal* STAPHYLOMA.—**A'tuberkeln.** See CHORIOIDITIS *tuberculosa.*—**A'verknöcherung.** Ossification of the chorioid. [B.]

ADERHÄUTCHEN (Ger.), n. A^3′de^{2}r-hoit-ch^{2}e^{2}n. 1. The chorioid coat of the eye. 2. The chorion. [A, 355.]—**A. der Nachgeburt.** The chorion. [A, 320.]—**Glattes A.** See CHORION *læve.*

ADERHAUTENTZÜNDUNG (Ger.), n. A^3′de^{2}r-ha^3-ut-e^{2}nt-tsu^{6}nd-ung Inflammation of the chorioid. [B.]—**A. der Greisen.** See CHORIOIDITIS *senilis.*—**Areoläre A.** See CHORIOIDITIS *areolaris.* —**Arthritische A.** See CHORIOIDITIS *arthritica.*—**Ausschwitzende A.** See CHORIOIDITIS *exsudativa.*—**Centrale A.** See CHORIOIDITIS *centralis.*—**Eiternde A., Eitrige A.** See CHORIOIDITIS *suppurativa.*—**Embolische A.** See CHORIOIDITIS *embolica.*—**Metastatische A.** See CHORIOIDITIS *metastatica.*—**Parenchymatöse A.** See CHORIOIDITIS *parenchymatosa.*—**Plastische A.** See CHORIOIDITIS *plastica.*—**Pyämische A.** See CHORIOIDITIS *pyæmica.*—**Rheumatische A.** See CHORIOIDITIS *rheumatica.*—**Ringförmige A.** See CHORIOIDITIS *areolaris.*—**Scrofulöse A.** See CHORIOIDITIS *scrofulosa.*—**Seröse A.** See CHORIOIDITIS *serosa.*—**Syphilitische A.** Syphilitic or specific disseminated chorioiditis. [B.]—**Tuberculöse A.** See CHORIOIDITIS *tuberculosa.*

ADERHÖHLE (Ger.), n. A^3′de^{2}r-hu^{5}l-e^2. A venous sinus. [A, 355.]—**A. am Hinterhaupte.** The occipital sinus. [A, 355.] —**A'n an der Augenhöhle.** The cavernous sinuses. [A. 355.]—**A'n des Gehirns.** The sinuses of the dura mater. [A, 355.]—**A'n des Steinbeins.** The petrosal sinuses. [A, 355.]—**Cavernöse A'n.** The cavernous sinuses. [A, 355.]

ADERLASSEN (Ger.), n. A^3′de^{2}r-la^{3}s-se^{2}n. Bloodletting. [A, 305.]—**Derivationsa'.** Derivative bloodletting.

ADERMENNIG (Ger.), n. A^3′de^{2}r-me^{2}n-ni^{2}g. See AGRIMONIA *eupatoria.*

ADERMIA (Lat.), n. f. A^{2}d(a^{3}d)-u^{5}rm(e^{2}rm)′i^2-a^3. From α priv., and δέρμα, skin. Fr., *adermie.* Ger., *Adermie, Hautmangel.* Congenital absence of the skin of a part ; usually associated with defective development of the deeper structures, as in spina bifida. [G.]

ADERMIN (Ger.), n. A^3′de^{2}r-men. See AGRIMONIA *eupatoria.*

ADERMONERVIA (Lat.), n. f. A^{2}d(a^{3}d)-u^{5}rm(e^{2}rm)-o-nu^{5}r-(ne^{2}r)′vi^2(wi^2)-a^3. From α priv., δέρμα, the skin, and *nervia*, nerves. See DERMATANEURIA.

ADERMOTROPHIA (Lat.), n. f. A^{2}d(a^{3}d)-u^{5}rm(e^{2}rm)-o-tro′-fi^2-a^3. From α priv., δέρμα, the skin, and τροφή, nourishment. Fr., *adermotrophie.* Thinning or atrophy of the skin. [A, 306.]

ADERNETZ (Ger.), n. A^3'de^{2}r-ne^{2}ts. A network of blood-vessels, particularly the chorioid plexus. [A, 305.]—**A'e der Seitenhöhlen.** The chorioid plexuses of the lateral ventricles. [I, 30.]—**A'arterien, A'pulsadern.** The chorioid arteries. [A, 305, 317.]—**Chorioideïsches A.** The chorioid plexus. [A, 355.]

ADERSCHWAMM (Ger.), n. A^3'de^{2}r-shwa^{3}m. A common name for the *Cantharellus cibarius* and the *Merulius lacrimans.* [A, 305.]—**Thränender A., zerstörender A.** See MERULIUS *lacrimans.*

ADESMACEOUS, adj. A^{2}d-e^{2}z-ma'she-u^{3}s. From α priv., and δεσμός, a band. Fr., *adesmacé.* Sp., *adesmáceo.* Having no ligament uniting the valves of the shell (said of certain molluscs). [A, 306.]

ADESMIA (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}z(e^{2}s)'mi^2-a^3. From α priv., and δεσμός, a band. 1. In botany, defective union. [Morren (A, 316).] 2. A genus of South American leguminous plants established by De Candolle. [A, 248; B, 19.]—**A. balsamifera.** A Chilian species, furnishing a balsam used as a vulnerary. [B, 19.]

ADESMOSIS (Lat.), n. f. A^{2}d(a^{3}d)-e^{2}z(e^{2}s)-mo'si^{2}s. Gen., *adesmos'eos.* From α priv., δεσμός a band (and so connective tissue). See also *-osis.** Ger., *Adesmose.* Atrophy or defective development of the connective tissue, more particularly of the skin. [G.] Cf. HYPERDESMOSIS and PARADESMOSIS.

ADESMY, n. A^{2}d-e^{2}z'mi^2. See ADESMIA (1st def.).

ADFLUXION, n. A^{2}d-flu^{3}k'shu^{3}n. See AFFLUXION.

ADGUSTAL, n. A^{2}d-gu^{3}st'a^{2}l. Geoffroy's name for the pterygoid bone of Owen in fishes. [L, 27.]

ADHADOTA (Lat.), n. f. A^{2}d(a^{3}d)-ha^3-do'ta^3. See ADHATODA.

ADHÆRENS (Lat.), adj., pres. part. of *adhærere.* A^{2}d(a^{3}d)-he'(ha^3'e^2)-re^{2}nz(re^{2}ns). Adherent. [B.]

ADHÆRENTIA (Lat.), n. f. A^{2}d(a^{3}d)-he(ha^3-e^2)-re^{2}n'shi^2(ti^2)-a^3. Adherence. [B.]

ADHÆSIO (Lat.), n. f. A^{2}d(a^{3}d) he'(ha^3'e^2)-zhi^2(si^2)-o. Gen., *adhæsio'nis.* Adhesion.

ADHÆSIVUS (Lat.), adj. A^{2}d(a^{3}d)-he^{2}s(ha^3-e^{2}s)-i(e)'vu^{3}s(wu^{4}s). Adhesive. [B.]

ADHATODA (Lat.), n. f. A^{2}d(a^{3}d)-ha^3-to'da^3. A Latinized form of a Malabar name for a genus of acanthaceous plants established by Nees von Esenbeck, corresponding in part to the Linnæan genus *Justicia ;* also the fruit of one of the species, known as the *Malabar nut,* used as an emmenagogue and to expel the dead fœtus (especially brought into notice by Boerhaave). [A, 321; B, 19, 57, 69.]—**A. hyssopi foliis, A. indica.** Fr., *noyer des Indes* (ou *de Ceylan*), *carmantine.* The snap-tree, or willow-leaved Malabar nut-tree. [A, 343; B.]—**A. tranquebariensis.** An Indian species; the juice of the leaves, reputed cooling and aperient, is given to children with small-pox; the bruised leaves are applied to contusions. [A, 316.]—**A. vasica.** See JUSTICIA *a.*—**A. Zeylonensium.** The common Malabar nut. [B.]

ADHEHE, n. See ADEC.

ADHERENCE, n. A^{2}d-he're^{2}ns. Lat., *adhærentia.* Fr., *adhérence.* Ger., *Ankleben.* It., *aderenza.* Sp., *adherencia.* See ADHESION.

ADHERENT, adj. A^{2}d-he're^{2}nt. Lat., *adhærens.* Fr., *adhérent.* Ger., *verwachsen.* It., *aderente.* Sp., *adherente.* In botany, growing fast to a dissimilar organ or part. [B.]—**A. attraction.** See *Capillary* ATTRACTION.

ADHESION, n. A^{2}d-he'zhu^{3}n. Lat., *adhæsio.* Fr., *adhésion.* Ger., *Adhäsion, Verwachsung.* It., *adesione.* Sp., *adhesion.* Syn.: *agglutination, cohesion.* 1. The act of sticking or growing fast to, or the condition resulting therefrom. 2. The molecular force which causes bodies to attach themselves to each other when brought into contact. [B.]—**A. figures.** See under FIGURE.—**Primary a.** The process of healing of a wound *per primam intentionem* ("by the first intention"), *i. e.,* by a rapid union of its lips, without the occurrence of granulation or suppuration.—**Secondary a.** The healing of a wound "by the second intention," *i. e.,* by the union of opposed granulating surfaces.

ADHESIVE, adj. A^{2}d-he'si^{2}v. Lat., *adhæsivus.* Fr., *adhésif.* Ger., *adhäsiv, verwachsend, anklebend.* It., *adesivo.* Sp., *adhesivo.* 1. Having the property of adhering. 2. Resulting in or accompanied by adhesion. See *A.* INFLAMMATION and *A.* PLASTER.

ADHESIVENESS, n. A^{2}d-he'si^{2}v-ne^{2}s. Fr., *adhésivité.* 1. The quality of being adhesive (said of inanimate objects). 2. In phrenology, the quality that leads persons to love or cling to other persons. [A, 306.] 3. The faculty of clinging tenaciously to a particular set of ideas, the organ of which is referred to the upper occipital convolutions. [Broussais (A, 301).]

ADHIB, n. A^{2}d'hi^{2}b. The plant eye-bright. [A, 258.] See EUPHRASIA *officinalis.*

ADHIBENDUM (Lat.), n. n. A^{2}d(a^{3}d)-hi^{2}b-e^{2}nd'u^{3}m(u^{4}m). From *adhibere,* to employ. Ger., *anzuwendendes Mittel.* A remedy recommended or ordered to be used. [A, 304.]

ADHIBITION, n. A^{2}d-hi^{2}b-i^{2}sh'u^{3}n. Lat., *adhibitio.* The employment or administration of a drug. [A, 312.]

ADHO (Ar.), n. An alchemical term for milk. [B, 50.]

ADHOTODA, n. See ADHATODA.

ADI, n. A West Indian palm-tree, the source of *abanga* (*q. v.*). [A, 337.]

ADIÆTETICUS (Lat.), adj. A^{2}d(a^{3}d)-i(e)-e^{2}t(a^3-e^{2}t)-e^{2}t'i^{2}k-u^{3}s(u^{4}s). From α priv., and διαιτητικός, dietetic. Ger., *adiätetisch.* 1. Unsuitable for food. 2. Living in disregard of dietetic requirements. [A, 322.]

ADIAGNOSTISCH (Ger.), adj. A^3-de-a^{3}g-no^{2}s'ti^{2}sh. Difficult or impossible of diagnosis. [A, 305.]

ADIANTACEÆ (Lat.), n. f. pl. A^{2}d(a^{3}d)-i^2-a^{2}nt(a^{3}nt)-a(a^3)'-se^2(ke^2)-e(a^3-e^2). Fr. *adiantacées.* A tribe of ferns the typical genus of which is the *Adiantum.* [A, 321.]

ADIANTACEOUS, adj. A^{2}d-i^2-a^{2}nt-a'shu^{3}s. Lat., *adiantaceus.* Fr., *adiantacé.* Sp., *adiantáceo.* Belonging to the *Adiantaceæ* (*q. v.*).

ADIANTEÆ (Lat.), n. f. pl. A^{2}d(a^{3}d)-i^2-a^{2}nt(a^{3}nt)'e^2-e(a^3-e^2). See ADIANTACEÆ.

ADIANTHUM, ADIANTHUS (Lat.), n's n. and m. A^{2}d(a^{3}d)-i^2-a^{2}n(a^{3}n)'thu^{3}m(thu^{4}m), -thu^{3}s(thu^{4}s). See ADIANTUM.

ADIANTUM (Lat.), n. n. A^{2}d(a^{3}d)-i^2-a^{2}nt(a^{3}nt)'u^{3}m(u^{4}m). Gr., ἀδίαντος, ἀδίαντον, (from α priv., and διαίνειν. to moisten, because it sheds water). Fr., *adiante, capillaire.* Ger., *Saumfarn, Krullfarn, Haarfarn.* It., *adianto.* Sp., *adianto, capilera, culantrillo.* A genus of ferns, established by Linnæus, distinguished by special coverings (*indusia*) for the fruit-dots (*sori*), formed by a reflection of distinct portions of the edge of the frond. The ultimate segments of the frond are dimidiate, the midvein being on the lower margin. [B, 34.]—**A. æthiopicum.** Fr., *capillaire d'Éthiopie.* A species indigenous to the Cape of Good Hope, used there as a pectoral. [Thunberg (A, 344).]—**A. album.** Fr., *capillaire blanc.* See ASPLENIUM *ruta muraria.*—**A. aureum.** See ASPLENIUM *trichomanes.*—**A. bechicæ.** See POTIO *bechica* and SYRUPUS *bechicus.* —**A. canadense.** See *A. pedatum.*—**A. capillus Veneris** [Linnæus]. Fr., *capillaire de Montpellier* [Fr. Cod.], *capillaire, adiante capillaire, cheveux de Vénus.* Ger., *Frauenhaar, Venushaar.* It., *adianto capelvenere.* Sp., *capilera de Montpeller.* Maiden-hair; a European species distinguished by its capillary stipe and branches; reputed to be expectorant. [A, 255; B, 34.] See also CAPILLUS VENERIS, *Syrupus* CAPILLORUM VENERIS, and CAPILLAIRE.—**A. concinnum** [Willdenow]. A South American species. [A, 304.]—**A. coriandrifolium.** See *A. capillus Veneris.*—**A. cuneatum.** A South American species. [A, 303.]—**A. curvatum** [Kaulfuss]. A Brazilian species. [A, 304.]—**A. formosum** [R. Brown]. A New Zealand species. [A, 304.]—**A. fragile** [Swartz]. A Jamaica species; recommended for ulcerating and suppurative lung affections. [Browne (A, 344).]—**A. hispidulum** [R. Brown]. A New Zealand species. [A, 304.]—**A. magnum.** See *A. capillus Veneris.*—**A. melanocaulon.** A species used in India as a tonic [Ainslie (A, 344).]—**A. nigrum.** Fr., *capillaire noir.* Ger., *schwarzes Frauenhaar.* See *A. capillus Veneris.*—**A. patens.** See *A. pedatum.*—**A. pedatum** [Willdenow]. Fr., *capillaire du Canada* [Fr. Cod.] (ou *en pédale*). Ger., *canadisches* (oder *fussförmiges*) *Frauenhaar.* It., *adianto del Canadà.* Sp., *capilera del Canadá, culantrillo de pozo.* Syn.: *A. canadense.* Canadian (or American) maiden-hair; distinguished by the frond being pedate; indigenous to North America. It contains mucilage, tannin, and a bitter substance; used as an expectorant, chiefly in France, and often substituted for *A. capillus Veneris.* [A, 255, 304, 319; B, 33.]—**A. rubrum.** Fr., *capillaire rouge.* Ger., *Steinfarn, rothe Streiffarn.* See ASPLENIUM *trichomanes.*—**A. tenerum.** A South American species; used for the same purposes as *A. capillus Veneris.* [A, 316.]—**A. trapeziforme** [Linnæus]. Fr., *capillaire du Mexique.* A species indigenous to Mexico, South America, and the West Indies; used in those countries as a pectoral. [A, 304, 344.]—**A. verum nigrum** [Linnæus], **A. vulgare.** See *A. capillus Veneris.*—**Herba adianti, Herba adianti canadensis.** Old pharmaceutical terms for the leaves of *A. pedatum.* [B, 97.]—**Herba adianti magni.** Syn.: *herba capillorum Veneris, folia capilli.* An old pharmaceutical term for the leaves of *A. capillus Veneris.*—**Syrupus adianti canadensis.** Fr., *sirop de capillaire du Canada* [Fr. Cod.]. A syrup made with 100 parts of the leaves of *A. pedatum* infused for six hours, in a closed vessel, with 1,500 parts of boiling distilled water. The infusion is expressed, allowed to cool, and decanted; white sugar is then added, in the proportion of 180 parts to 100 of the infusion, and the liquid is rapidly brought to the boiling point and strained. [Fr. Cod.]

ADIANTUM CAPILLUS VENERIS.
(AFTER MARCHAND [A, 260].)

ADIAPHANIE (Fr.), n. A^3-de-a^3-fa^3-ne. Lack of transparency; opacity.—**A. périchrysallique.** See ACHRYSALLODIAPHANIE.

ADIAPHORA (Lat.), n. f. A^{2}d(a^{3}d)-i(i^2)-a^{2}f(a^{3}f)'o-ra^3. See ADIAPHORUM.

ADIAPHORA (Lat.), n. n. pl. Adiaphorous substances. See ADIAPHOROUS.

ADIAPHORACY, n. A^{2}d-i-a^{2}f'o-ra^2-si^2. See ADIAPHORIA.

ADIAPHORESIS (Lat.), n. f. A^{2}d(a^{3}d)-i(e)-a^3-fo-re(ra)'si^{2}s. Gen., *adiaphore'seos.* From **α** priv., and **διαφόρησις**, a sweating. Fr., *adiaphorèse.* Ger., *Adiaphorese.* It., *adiaforesi.* Sp., *adiaforesis.* Deficiency or suppression of the perspiration. [K.] See ANHIDROSIS.

ADIAPHORETIC, adj. A^{2}d-i-a^{2}f-o-re^{2}t'i^{2}k. Lat., *adiaphoreticus.* Fr., *adiaphorétique.* See *A.* SPIRIT.

ADIAPHORIA (Lat.), n. f. A^{2}d(a^{3}d)-i(e)-a^3-fo'ri^2-a^3. Gr., **ἀδιαφορία**, indifference. Fr., *adiaphorie.* Ger., *Adiaphorie, Gleichgültigkeit.* It., *adiaforia.* Sp., *adiaforia.* 1. In chemistry, the quality of being adiaphorous (*q. v.*). [A, 305.] 2. Morbid indifference, apathy (said of persons). [A, 322.]

ADIAPHOROSIS, (Lat.), n. f. A^{2}d(a^{3}d)-i(e)-a^3-fo-ro'si^{2}s. Gen., *adiaphoro'seos.* See ADIAPHORESIS.

ADIAPHOROUS, adj. A^{2}d-i-a-^{2}f'o-ru^{3}s. Gr., **ἀδιάφορος**, indifferent. Lat., *adiaphoros, adiaphorus.* Fr., *adiaphore.* Ger., *adiaphor, gleichgültig.* It., *adiaforo.* Sp., *adiáforo.* 1. In chemistry, neutral. [A, 315.] 2. Inert (said of drugs). [A, 313.] Cf. INDIFFERENT.

ADIAPHORUM (Lat.), n., n. of adj. *adiaphorus* (*principium* understood). A^{2}d(a^{3}d)-i(e)-a^{2}f(a^{3}f)'o-ru^{3}m(ru^{4}m). See *Adiaphorous* SPIRIT.

ADIAPHORY, n. A^{2}d-i-a^{2}f'o-ri^2. See ADIAPHORIA.

ADIAPLAST, n. A^{2}d-i'a^3-pla^{2}st. From **ἀδιάπλαστος** (from **α** priv., and **διαπλάσσειν**, to form). It., *adiaplasto.* An abortion (in the sense of an undeveloped fœtus). [A, 314.]

ADIAPNEUSTIA (Lat.), n. f. A^{2}d(a^{3}d)-i(e)-a^{2}p(a^{3}p)-nu^{2}s'ti^2-a^3. Gr., **ἀδιαπνευστία** (from **α** priv., and **διαπνευστεῖν**, to perspire). Fr., *adiapneustie.* Ger., *Adiapneustie.* It., Sp., *adiapneustia.* Suppression of the cutaneous transpiration. See ANHIDROSIS.

ADIAPNEUSTIC, adj. A^{2}d-i-a^{2}p-nu^{2}s'ti^{2}k. Lat., *adiapneusticus, adiapneustus.* 1. Pertaining to adiapneustia. [A, 322.] 2. Not perspiring.

ADIAPTOTOS (Lat.), n. m. A^{2}d(a^{3}d)-i(e)-a^{2}p(a^{3}p)-to'to^{2}s. From **ἀδιάπτωτος**, infallible. Fr., *adiaptote.* Sp., *adiaptoto.* An ancient carminative; an electuary of parsley, hyoscyamus seeds, white pepper, etc. [A, 306, 343.]

ADIARRHŒA (Lat.), n. f. A^{2}d(a^{3}d)-i(e)-a^{3}r-re(roi)'a^3. Gr., **ἀδιάῤῥοια.** Fr., *adiarrhée.* Ger., *Adiarrhöe.* It., Sp., *adiarrea.* 1. Constipation. [Hippocrates (A, 311).] 2. The retention or suppression of any excretion. [A, 305, 306, 314.]

ADIARTHROTOS (Lat.), adj. A^{2}d(a^{3}d)-i(e)-a^{3}r-thro'to^{2}s. Gr., **ἀδιάρθρωτος.** 1. Not articulated, without joints. [A, 322.] 2. Inarticulate (said of the speech). [A, 311.]

ADIATHERMIC, adj. A^{2}d-i-a^3-thu^{6}rm'i^{2}k. From **α** priv., **διά**, through, and **θερμαίνειν**, to heat. Impervious to heat. [A, 302.]

ADIATHETIC, adj. A^{2}d-i-a^3-the^{2}t'i^{2}k. Lat., *adiathesicus* (from **α** priv., and **διάθεσις** [see DIATHESIS]). Fr., *adiathésique.* Ger., *adiathetisch.* It., *adiatesico.* Not due to a diathesis (said of diseases). [A, 305, 306.]

ADIB (Ar.), n. The wolf (the liver, intestines, and excrement of which were formerly used as drugs). [Avicenna (A, 325).]

ADIBAT, n. Ar., *zibaq.* An alchemical name for mercury. [B, 50, 52.]

ADICE (Lat.), n. f. A^{2}d(a^{3}d)'i^2-se(ka). Gen., *ad'ices.* Gr., **ἀδίκη.** The nettle. [Dioscorides (A, 311).]

ADIEVEDYUM, n. The East Indian name of a very bitter root used as a tonic and stomachic. [Ainslie (A, 344).]

ADIKE (Lat.), n. f. A^{2}d(a^{3}d)'i^2-ke(ka). See ADICE.

ADIMA, n. A name applied in French Guiana to a species of *Sauvagesia* (*q. v.*). [A, 344.]

ADIOWAEN, ADIOWAN, n's. Ajowan. See AMMI *copticum.*

ADIPALIS (Lat.), adj. A^{2}d(a^{3}d)-i^{2}p-a(a^3)'li^{2}s. From *adeps*, fat. Fatty, greasy. [A, 312.]

ADIPATE, n. A^{2}d'i^{2}p-at. Fr., *adipate.* Ger., *adipinsaures Salz.* A salt of adipic acid. The general formula of the normal a's is $(C_6H_8O_4).P_2$, or $(C_6H_8O_4).Q$, where P is a univalent and Q a bivalent radicle. The sodium salt, however, is sesquibasic, and several of the other a's are combined with one or more molecules of water of crystallization. [B, 2.]

ADIPATUS (Lat.), adj. A^{2}d(a^{3}d)-i^{2}p-a(a^3)'tu^{3}s(tu^{4}s). From *adeps*, fat. Adipose. [A, 312.]

ADIPEUX (Fr.), adj. A^3-de-pu^8. Adipose.

ADIPIC ACID, n. A^{2}d-i^{2}p'i^{2}k. Fr., *acide adipique.* Ger., *Adipinsäure.* It., *acido adipico.* Sp., *ácido adipico.* A dibasic crystalline acid, $C_6H_{10}O_4 = \left\{ \begin{matrix} CH_2CH_2.COOH \\ CH_2CH_2.COOH \end{matrix} \right.$, produced by the action of nitric acid on oleic acid, suet, spermaceti, and other fatty bodies; being the fifth term of the oxalic or succinic series. [B, 2, 4.]

ADIPIC ETHERS, n. pl. Fr., *éthers adipiques.* Ger., *Adipinsäure-Estern.* It., *eteri adipici.* Ethyl adipate, $C_6H_8O_4.(C_2H_5)_2$, is an example of these compounds. [B.]

ADIPIDE, n. A^{2}d'i^{2}p-i^{2}d. Fr., *adipide.* Ger., *Adipid.* Sp., *adipide.* Any fatty proximate principle of animal origin. [A, 303.]

ADIPINSÄURE (Ger.), n. A^3-de-pen'zoi-re^2. Adipic acid.

ADIPO-CELLULAR, adj. A^{2}d''i^{2}p-o-se^{2}l'lu^2-la^{3}r. Fr., *adipo-celluleux.* Ger., *fettigzellig.* It., *adipo-celluloso.* Consisting of connective tissue and fat.

ADIPOCERA (Lat.), n. f. A^{2}d(a^{3}d)-i^{2}p-o-se(ka)'ra^3. Adipocere (*q. v.*).—**A. cetosa.** Spermaceti. [A, 362.]

ADIPOCERATION, n. A^{2}d-i^{2}p-o^{2}s-e^{2}r-a'shu^{3}n. Ger., *Adipocire-Umbildung.* A conversion into adipocere. [A, 315.] In some cases of extra-uterine gestation the dead fœtus undergoes this change. [Kleinwächter (A, 319).]

ADIPOCERE, n. A^{2}d'i^{2}p-o-ser. Lat., *adipocera* (from *adeps*, fat, and *cera*, wax). Fr., *adipocire, gras des cadavres* (ou *des cimetières*). Ger., *Adipocire, Fettwachs, Leichenwachs.* It., Sp., *adipocera.* Corpse fat; a peculiar soft, white, cheese-like material consisting chiefly of a mixture of the fatty acids (especially palmitic acid) produced by the decomposition of animal matter under the influence of moisture without the access of air; discovered by Fourcroy in Paris in 1786. It has been regarded as a soap. Buried corpses have often been found converted into a. The name is sometimes applied also to spermaceti and cholesterin. [A, 306, 314; O. Reveil (A, 328); B, 2; D.]

ADIPOCEROUS, adj. A^{2}d-i^{2}p-o^{2}s'e^2-ru^{3}s. Fr., *adipocireux.* Ger., *fettwachsig.* Pertaining to adipocere. [A, 324.]

ADIPOCIRA (Lat.), n. f. A^{2}d(a^{3}d)-i^{2}p-o-si(ke)'ra^3. See ADIPOCERA.

ADIPOCIRE (Fr.), n. A^3-de-po-ser. Adipocere.—**A. de baleine.** See ADIPOCERA *cetosa.*

ADIPOCIRIFORM, adj. A^{2}d''i^{2}p-o-si^2'ri^2-fo^{2}rm. Fr., *adipociriforme.* Resembling adipocere. [A, 306.] See TUMEUR *adipociriforme.*

ADIPOMA (Lat.), n. n. A^{2}d(a^{3}d)-i^{2}p-o'ma^3. Gen., *adipom'atos* (*-tis*). For deriv., see ADEPS and *-oma.** Fr., *adipome.* Ger., *Adipom.* Cruveilhier's term for lipoma (*q. v.*). [A, 301.]

ADIPOMALIC ACID, n. A^{2}d''i^{2}p-o-ma'li^{2}k. For deriv., see ADEPS and MALIC. See HYDROXYADIPIC ACID.

ADIPOSE, adj. A^{2}d'i^{2}p-os. Gr., **πιμελής, λιπαρός.** Lat., *adiposus* (from *adeps*, fat). Fr., *adipeux, gras.* Ger., *adipös, fettig, fettartig.* It., Sp., *adiposo.* Fatty, pertaining to fat, especially to the tissue containing fat. [J.] See *A.* ARTERIES, *A.* CUSHION *of the ear*, *A.* DUCTS, *A.* SARCOMA, *A.* SYSTEM, *A.* TISSUE, and *A.* VEINS.

ADIPOSE (Ger.), n. A^3-de-po'ze^2. Adiposis.

ADIPOSIS (Lat.), n. f. A^{2}d(a^{3}d)-i^{2}p-o'si^{2}s. Gen., *adipo'seos.* For deriv., see ADEPS and *-osis.** Ger., *Adipose, Fettbildung, Fettsucht, Fettleibigkeit.* It., *adiposi.* 1. A general term for the formation of fat, fatty degeneration, and fatty infiltration. [A, 314; D.] 2. Obesity. [Birch-Hirschfeld (A, 319).]

ADIPOSITY, n. A^{2}d-i^{2}p-o^{2}s'i^{2}t-i^2. See ADIPOSIS.

ADIPOSURIA (Lat.), n. f. A^{2}d(a^{3}d)-i^{2}p-o-su^2(su)'ri^2-a^3. From *adeps*, fat, and **οὖρον**, urine. See PIMELURIA.

ADIPOSUS (Lat.), adj. A^{2}d(a^{3}d)-i^{2}p-o'su^{3}s(su^{4}s). Adipose.

ADIPOTARTARIC ACID, n. A^{2}d''i^{2}p-o-ta^{3}r-ta^{3}r'i^{2}k. From *adeps* and *tartaric.* Fr., *acide adipotartrique.* See DIHYDROXYADIPIC ACID.

ADIPOUS, adj. A^{2}d'i^{2}p-u^{3}s. See ADIPOSE.

ADIPSA (Lat.), n., n. pl. of adj. *adipsus* (*q. v.*). A^{2}d(a^{3}d)-i^{2}p'sa^3. Gr., **ἄδιψα.** Fr., *adipsons.* Ger., *durstlöschende Mittel.* 1. Articles of food that do not cause thirst. [A, 322.] 2. Remedies for thirst. [A, 306.]

ADIPSATHEON (Lat.), n. n. A^{2}d(a^{3}d)-i^{2}ps-a(a^3)'the(the^2)-o^{2}n. From **ἄδιψος**, quenching thirst, and **θεός**, a god. The ancient name of a shrub which had the power of quenching thirst. [A, 312.]

ADIPSIA (Lat.), n. f. A^{2}d(a^{3}d)-i^{2}ps'i^2-a^3. Gr., **ἀδιψία** (from **α** priv., and **δίψα**, thirst. Fr., *adipsie.* Ger., *Adipsie, Durstlosigkeit.* It., Sp., *adipsia.* Absence of thirst; a phenomenon observed in certain grave diseases, but a natural condition in some aged persons. [A, 321.] Classed by nosologists as a disease, being a genus of Alibert's *gastroses* and of Cullen's *locales dysorexiæ*, and a species of Good's *dipsosis.* [A, 320, 336, 357.]

ADIPSIC, adj. A^{2}d-i^{2}ps'i^{2}k. Lat., *adipsicus.* 1. Pertaining to adipsia. [A, 322.] 2. Quenching, or not producing, thirst.

ADIPSON (Lat.), n. n. A^{2}d(a^{3}d)-i^{2}ps'o^{2}n. 1. A beverage relieving thirst. [N. Biggs (B, 39).] 2. An old name for a species of mallow. [A, 322.] For the pl., see ADIPSA.

ADIPSOS (Lat.), n. m. A^{2}d(a^{3}d)-i^{2}ps'o^{2}s. 1. An ancient name for the Egyptian palm-tree which furnishes the myrobalani. [B, 69.] 2. An old name for licorice. [Pliny (A, 312).]

ADIPSOUS, adj. A^{2}d-i^{2}ps'u^{3}s. See ADIPSIC.

ADIPSUM (Lat.), n. n. A^{2}d(a^{3}d)-i^{2}ps'u^{3}m(u^{4}m). See ADIPSON.

ADIPSUS (Lat.), adj. A^{2}d(a^{3}d)-i^{2}ps'u^{3}s(u^{4}s). Adipsic. [A, 322.]

ADIPSY, n. A^{2}d'i^{2}ps-i^2. See ADIPSIA.

ADIR (Ar.), n. An Arabian plant, the fresh leaves of which are used in decoction as a purgative. [Waring (A, 316).]

ADIRIGE, n. "Ammoniacum; most probably the salt." [A, 343).]

ADIRONDACKS, n. pl. A^{2}d-i^2-ro^{2}n'da^{2}ks. A wild, mountainous region in the northeastern part of the State of New York, including portions of Clinton, Essex, Franklin, and Hamilton counties, recommended as a resort for phthisical patients, sufferers from hay fever, and others. A sanitarium has been established, called the "Adirondack Cottages." [A, 327, 368; A. L. Loomis, "N. Y. Med. Jour.," June 13, 1885, p. 653.] A cold spring, in the

town of Whitehall, at the base of one of the spurs of the A. mountains, contains in an imperial gallon :

Free carbon dioxide	67·257 grains.
Calcium carbonate	18·543 "
Magnesium "	16·618 "
Sodium "	5·317 "
Potassium "	5·040 "
Lithium "	0·023 "
Iron "	5·040 "
Manganum "	traces.
Sodium chloride	14·340 grains.
Calcium sulphate	11·134 "
Alumina	traces.
Silica	0·742 grains.

The water is a diuretic, aperient, and tonic, and has been used successfully in rheumatism, ascites, and calculous affections. [J. Bell, "Med. Record," 1870, p. 33 ; "Phila. Med. Times," 1871, p. 144 (*D*).]

Longitude East 3 from Washington

Longitude West 74 from Greenwich

ADISCAL, adj. A^{2}d-i^{2}sk'a^{2}l. Lat., *adiscalis* (from α priv., and δίσκος, a disk). In botany, without the intervention of a disk (said of the insertion of stamens). [Lestiboudois (A, 345).]

ADIS MANIS, n. A Japanese name for anise. [A, 344.]

ADITUS (Lat.), n. m. A^{2}d(a^{3}d)'i^{2}t-u^{3}s(u^{4}s). Gen., *ad'itus.* From *adire*, to go to. Gr., πρόσοδος. Ger., *Zugang.* It., *adito.* Sp., *adite.* An approach ; a term applied to the entrance or approach to various canals. [A, 318, 334.]—**A. ad aquæductum Sylvii.** Ger., *Eingangsöffnung* (oder *Zugang*) *der Sylvius'schen Wasserleitung.* It., *adito dell' acquedotto di Silvio.* Syn. : *anus.* The entrance to the Sylvian aqueduct, situated at the lower posterior angle of the third ventricle of the brain. [I, 17.]—**A. ad infundibulum.** Ger., *Trichtereingang.* It., *adito dell' infundibolo.* Syn. : *vulva.* A small canal leading from the third ventricle into the infundibulum. [I, 3.]—**A. ad laryngem, A. laryngis.** The upper aperture of the larynx.

ADIULISTOS (Lat.), n. m. A^{2}d(a^{3}d)-i^2-u^2(u)-li^{2}st'o^{2}s. From ἀδιύλιστος (from α priv., and διυλίζειν, to strain), not strained or filtered. [Galen (A, 311).] An old name for unstrained wine. [A, 325.]

ADIVAS (Sp.), n. pl. A^3-de'va^{3}s. From Ar., *adiva.* An inflammatory affection of the throat in domestic animals, corresponding to quinsy in man. [A, 255, 338.]

ADIVIE AMIDA, n. An Oriental name for the *Jatropha curcas.* [A, 344.]

ADIVI GORANTA, n. An East Indian name for the *Erythroxylon monogynum.* [L. A. Waddell, "Indian Med. Gaz.," Sept., 1885, p. 281.]

ADIYLISTOS (Lat.), n. m. A^{2}d(a^{3}d)-i^2-i^{2}l(u^{6}l)-i^{2}st'o^{2}s. See ADIULISTOS.

ADJACENT, adj. A^{2}d-ja'se^{2}nt. From *adjacere*, to lie near to. In chemistry, adjoining one another in the structural formula of a body, or attached to two carbon atoms so adjoining (said of two atoms or groups of atoms). [B.]

ADJECTIO (Lat.), n. f. A^{2}d(a^{3}d)-je^{2}k(ye^{2}k)'shi^2(ti^2)-o. Gen., *adjectio'nis.* From *adjicere*, to add to. See ADJUNCTION.

ADJECTIVE, adj. A^{2}d'je^{2}k-ti^{2}v. From *adjicere*, to add to. Fr., *adjectif.* Ger., *adjectiv.* It., *adiettivo, aggettivo.* Sp., *adjetivo.* Accessory. See *A.* ALIMENT.

ADJOUR DJEBEL, ADJOUR EL AMAR, n's. Persian names for species of *Cucumis* used in that country as purgatives. [Olivier (A, 344).]

ADJOWAN, n. Ajowan. See AMMI *copticum.*

ADJUMENTUM (Lat.), n. n. A^{2}d(a^{3}d)-ju^2(yu)-me^{2}nt'u^{3}m(u^{4}m). Contr. from *adjuvamentum* (from *adjuvare*, to help). An adjuvant. [A, 356.]

ADJUNCT, n. A^{2}d'-ju^{3}n^{2}kt. Lat., *adjunctum* (from *adjungere*, to join to). See ADJUVANT.

ADJUSTER, n. A^{2}d-ju^{3}st'u^{5}r. From *adjustare*, to adjust. Ger., *Berichtiger.* An instrument or mechanism for bringing parts into their proper relations.—**Jarvis's a.** A mechanical contrivance formerly used for making forcible extension and counter-extension in the reduction of dislocations. [E.]—**Sims's a.** See *Sims's* SHIELD.

ADJUSTMENT, n. A^{2}d-ju^{3}st'me^{2}nt. 1. A process of adjusting. 2. A mechanism for carrying out the process (thus, the *coarse a.* of a compound microscope is the device by which the barrel of the instrument is brought rapidly to about the proper distance from the stage ; the *fine a.*, consisting of a fine screw, completes the process of focusing.)

ADJUTOR (Lat.), n. m. A^{2}d(a^{3}d)-ju^2(yu)'-to^{2}r. Gen., *adjuto'ris.* From *adjutare*, to assist. Ger., *Helfer.* Sp., *adjutor.* See ADJUVANT. —**A. partus.** An obstetrician. [A. 313.]

ADJUTORIUM (Lat.), n., n. of adj. *adjutorius.* A^{2}d(a^{3}d)-ju^2-(yu)-to'ri^{2}u^{3}m(u^{4}m). 1. An adjuvant. [A, 322.] 2. An old term for the os brachii. [A, 322, 323, 325.]

ADJUTORIUS (Lat.), adj. A^{2}d(a^{3}d)-ju^2(yu)-to'ri^2-u^{3}s(u^{4}s) Adjuvant. [A, 322.]

ADJUTUS (Lat.), adj. A^{2}d(a^{3}d)-ju^2(yu)'tu^{3}s(tu^{4}s). Mediating. See *Mediating* AFFINITY.

ADJUVANT, adj. and n. A^{2}d'ju^2-va^{2}nt. Lat., *adjuvans, adjutor.* Fr., *adjuvant, auxiliaire.* Ger., *begünstigend, Hülfsmittel.* It., *adjuvante.* Sp., *adyuvante.* Auxiliary, assisting ; in therapeutics, a measure or drug designed to assist the action of the principal means. [B.]

ADJUVANTIA (Lat.), n., n. pl. of adj. *adjuvans.* A^{2}d(a^{3}d)-ju^2(yu)-va^{2}n(wa^{3}n)'shi^2(ti^2)-a^3. Adjuvants.

ADLERBEERE (Ger.), n. A^{3}d'le^{2}r-ba-re^2. The wild serviceberry (*Cratægus torminalis*). [B, 48.]

ADLERBLUME (Ger.), n. A^{3}d'le^{2}r-blu-me^2. Columbine ; the genus *Aquilegia.* [A.]

ADLERBOHNE (Ger.), n. A^{3}d'le^{2}r-bo-ne^2. A sort of kidney-bean. [L, 46.]

ADLERBRUNNEN (Ger.), n. A^{3}d'le^{2}r-brun-ne^{2}n. One of the hot springs of Wiesbaden.

ADLERFARN, ADLERFARRN (Ger.), n. A^{3}d'le^{2}r-fa^{3}rn. The common bracken (*Pteris aquilina*). [B ; L, 30.]

ADLERHOLZ (Ger.), n. A^{3}d'le^{2}r-holtz. Eagle wood, aloes wood ; the wood of *Aquilaria agallocha*, of *Excœcaria agallocha.* or of *Aloexylon agallochum.* [B ; L, 37, 46.] See ALOES *wood.*—**A'baum.** The *Aquilaria agallocha*, or *Excœcaria agallocha.* [L, 46.]

ADLERKRAUT (Ger.), n. A^{3}d'le^{2}r-kra^3-ut. The female fern (*Athyrium filix fœmina*). [A.]

ADLERMENNIG (Ger.), n. A^{3}d'le^{2}r-me^{2}n-ni^{2}g. Agrimony (*Agrimonia eupatoria*). [A.]

ADLERSALZ (Ger.), n. A^{3}d'le^{2}r-za^{3}ltz. Mineral salt; sodium chloride occurring native as a mineral. [B, 48.]

ADLERSAUMFARREN (Ger.), n. A^{3}d'le^{2}r-za^3-um-fa^{3}r-re^{2}n. See ADLERFARRN.

ADLERSBEERBAUM (Ger.), n. A^{3}d'le^{2}rs-bar-ba^3-um. The wild service-tree (*Cratægus torminalis*). [A; B.]

ADLERSTEIN (Ger.), n. A^{3}d'le^{2}r-stin. See AETITE.

ADLERVITRIOL (Ger.), n. A^{3}d'le^{2}r-fe-tre-ol. Sulphate of copper containing some sulphate of iron. [B, 49.]

ADLESBEERBAUM (Ger.), n. A^{3}d'le^{2}s-bar-ba^3-um. See ALDLERSBEERBAUM.

ADLIGATUS (Lat.), adj. A^{2}d(a^{3}d)-li^{2}g-a(a^3)'tu^{3}s(tu^{4}s). In botany, fixed to an object by means of tendrils or aerial roots. [L, 38.]

ADLINIMENTUM (Lat.), n. n. A^{2}d(a^{3}d)-li^{2}n-i^2-me^{2}n'tu^{3}m-(tu^{4}m). Ger., *lindernde Mittel.* A soothing application. [A, 355.]

ADLUMIA (Lat.), n. f. A^{2}d(a^{3}d)-lu^2(lu)'mi^2-a^3. From the name of J. Adlum, an American botanist. A genus of North American fumariaceous plants established by Rafinesque. [B, 34; L, 30, 64.]

ADMASTON, n. A^{2}d'ma^{2}s-to^{2}n. A salt spring in Shropshire, England. [L, 63.]

ADMELLA (Lat.), n. f. A^{2}d(a^{3}d)-me^{2}l'la^3. See ACMELLA.

ADMINICLE, n. A^{2}d-mi^{2}n'i^{2}kl. Lat., *adminiculum.* Fr., *adminicule.* Ger., *Unterstützung* (1st def.), *Hülfe, Beihülfe* (3d def.). It., *amminicolo.* Sp., *adminiculo.* Syn.: *fulcrum* (2d def.). 1. A prop; the support of a plant. 2. A name given by Scopoli to all the accessory parts of a plant, such as the sheaths, petioles, stipules, involucres, bracts, hairs, bristles, etc. 3. One of the small spicula found on the abdomen of certain insects in the pupa stage. 4. Anything which aids the effects of a medicine; an adjuvant. [B, 1; L, 46, 56, 106.]

ADMINICULAR, adj. A^{2}d-mi^{2}n-i^{2}k'u^2-la^{3}r. Sp., *adminicular.* Adjuvant. [L, 56.]

ADMINICULUM (Lat.), n. n. A^{2}d(a^{3}d)-mi^{2}n-i^{2}k'u^2(u)-lu^{3}m-(lu^{4}m). See ADMINICLE.

ADMINISTER, v. t. A^{2}d-mi^{2}n'i^{2}s-tu^{3}r. Lat., *administrare* (2d def.). Fr., *administrer, faire prendre* (1st def.). Ger., *darreichen* (1st def.). Sp., *administrar.* 1. To enforce or superintend the application of a remedy. 2. To attend to, to serve. [L.]

ADMINISTRATION, n. A^{2}d-mi^{2}n''i^{2}s-tra'shu^{3}n. Fr., *administration.* Ger., *Darreichung.* Sp., *administración.* The act or process of administering.

ADMIRABILIS (Lat.), adj. A^{2}d(a^{3}d)-mi^{2}r-a^{2}b(a^{3}b)'i^{2}l-i^{2}s. Wonderful. An epithet applied to a certain artificial mineral. [L, 53.] See LAPIS *a*.

ADMISCIREN (Ger.), n. A^{3}d-mi^{2}s-tze're^{2}n. An admixture.

ADMISTIO (Lat.), n. f. A^{2}d(a^{3}d)-mi^{2}s'chi^2(ti^2)-o. Gen., *admistio'nis.* See ADMIXTIO.

ADMISURAB, n. An alchemical name for earth. [L, 53.]

ADMIX, v. intr. A^{2}d-mi^{2}x'. From *ad*, to, and *miscere*, to mix. Ger., *beimischen.* To add something during the preparation of a mixture. [L.]

ADMIXTIO (Lat.), n. f. A^{2}d(a^{3}d)-mi^{2}xt'shi^2(i^2)-o. Gen., *admixtio'nis.* Admixtion, admixture. [L, 50, 58.]

ADMIXTION, n. A^{2}d-mi^{2}xt'yu^{3}n. A mingling or union of different bodies together. It differs from *composition* in that the nature of the substances mixed is not altered. [L, 56.]

ADMIXTURE, n. A^{2}d-mi^{2}x'tu^{2}r. Lat., *admistio, admixtio.* Ger., *Mischung, Beimischung, Zusatz* (1st def.). *Gemischte* (2d def.). 1. The act of mixing or of adding to a mixture. 2. The compound formed by mixing different substances together. [L, 41, 56.]

ADMIXTUS (Lat.), adj. A^{2}d(a^{3}d)-mi^{2}x'tu^{3}s(tu^{4}s). Part. of *admiscere*, to mix with. Admixed. [L.]

ADMOTIVUS (Lat.), adj. A^{2}d(a^{3}d)-mo-ti(te)'vu^{3}s(wu^{4}s). Fr., *admotif.* An epithet applied by C. Richard to that form of germination in which the episperm enveloping the extremity of a cotyledon remains laterally attached near the sheath of the cotyledon. [B, 1.]

ADMOVE, ADMOVEATUR (Lat.), v. tr., imperat. sing. and 3d pers. sing., subj., pass., of *admovere*, to apply. A^{2}d(a^{3}d)'mo-ve-(wa). -mo-ve(we^2)-a(a^3)'tu^{3}r(tu^{4}r). Directions used in prescriptions signifying "apply" and "let there be applied." [L, 107.]

ADNASAL, n. A^{2}d-na'sa^{2}l. From *ad*, near to, and *nasus*, the nose. Sp., *adnasal.* The name used by Geoffroy for the premaxillary bone (Owen) of fishes. [L, 27.]

ADNASCENS (Lat.), n. n. A^{2}d(a^{3}d)-na^{2}s(na^{3}s)'se^{2}nz(ke^{2}ns). Gen., *adnascen'tis.* From *ad*, to, and *nasci*, to be born. Fr., *cayeu.* Ger., *Stechling, Auswuchs.* Syn.: *adnatum.* 1. A bulbet, or bulbil (*q. v.*). 2. A branch sprouting from the main stock; a sort of adventitious root. [B, 1, 89.]

ADNASCENT, adj. A^{2}d-na^{2}s'se^{2}nt. Growing upon another body or thing. [L, 56.]

ADNATA (Lat.), n., f. of adj. *adnatus* (*tunica* understood). A^{2}d(a^{3}d)-na(na^3)'ta^3. Fr., *adnée.* It., Sp., *adnata.* 1. The conjunctiva of the eye; or, more properly, the tendinous expansion of the motor muscles of the eye lying between the conjunctiva and the sclerotic. 2. The tunica albuginea of the testicle. [L, 30, 73, 84.]

ADNATA (Lat.), n. n. pl. Gen., *adnato'rum.* Ger., *Auswüchse.* 1. The plural of *adnatum.* [B.] See ADNASCENS. 2. Natural growths, such as hair, wool, etc., found on the external surface of animals or plants; also excrescences upon the surface, such as fungi, etc. [L, 97.]

ADNATE, adj. A^{2}d'nat. Lat., *adnatus, adnexus* (from *ad*, to, and *nasci*, to be born). Fr., *adné.* Ger., *angewachsen.* Sp., *adnato.* Grown to, attached to. A term applied in botany to an anther when it is attached by its entire length to a filament; to the floral leaves when they are adherent to the flower-stalk; and to the gills of a mushroom when their internal extremities are adherent to the stipe. [B, 1, 34.]

ADNATION, n. A^{2}d-na'shu^{3}n. From *adnasci* (part., *adnatus*), to grow to. Fr., *adnation.* Sp., *adnexión.* In botany, the consolidation of two dissimilar parts or organs, like the calyx and corolla, into a single piece. [B, 75.]

ADNATUM (Lat.), n. n. A^{2}d(a^{3}d)-na(na^3)'tu^{3}m(tu^{4}m). See ADNASCENS.

ADNATUS (Lat.), adj. A^{2}d(a^{3}d)-na(na^3)'tu^{3}s(tu^{4}s). Past. part. of *adnasci*, to be born or grow to. Adnate.

ADNÉ (Fr.), adj. A^{3}d-na. Adnate.

ADNÉE (Fr.), n. f. A^{3}d-na. See ADNATA.

ADNEXA (Lat.), n. n., pl. of *adnexum.* A^{2}d(a^{3}d)-ne^{2}x'a^3. Gen., *adnexo'rum.* Fr., *annexes.* Ger., *Adnexe.* Appendages.—**A. uteri.** See *Uterine* APPENDAGES.

ADNEXE (Ger.), n. A^{3}d'ne^{2}x-e^2. An appendage.—**A'n des Eies.** See *Fœtal* APPENDAGES.

ADNEXION (Fr.), n. A^{3}d-ne^{2}x'yu^{3}n. The state of union or consolidation of one part with another. [L, 41.]

ADNEXUM (Lat.), n. n. A^{2}d(a^{3}d)-ne^{2}x'u^{3}m(u^{4}m). Ger., *Adnexe.* An appendage. Usually employed in the pl., *adnexa.*

ADNEXUS (Lat.), adj. A^{2}d(a^{3}d)-ne^{2}x'u^{3}s(u^{4}s). Adnate.

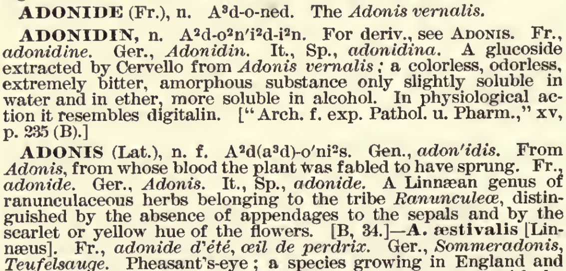
ADOC, n. An alchemical term for milk. [B, 50.]

ADOLESCENCE, ADOLESCENCY, n's. A^{2}d-o-le^{2}s'se^{2}ns, -se^{2}ns-i^2. Lat., *adolescentia.* Fr., *adolescence, jeunesse.* Ger., *Adolescenz, Jugend, Jünglingsalter.* It., *adolescenza, gioventù.* Sp., *adolescencia.* Syn.: *youth.* "The period between puberty and full development." This is between 14 and 25 in men and between 12 and 21 in women. [K, 4.]

ADOLESCENT, adj. and n. A^{2}d-o-le^{2}s'se^{2}nt. Lat., *adolescens.* Fr., *adolescent, jeune* (1st def.). Ger., *jung* (1st def.). It., *giovane, adolescente.* Sp., *joven, adolescente.* 1. (Adj.) pertaining to adolescence; at the age of adolescence; also growing. 2. (N.) one at the age of adolescence. [K; L, 56.]

ADOLFSBERG (Swed.), n. A^{3}d'olfs-barg. A cold alkaline spring near Oërebro (Sweden) containing, according to Berzelius, carbon dioxide, sulphate, chloride, and carbonate of potassium, carbonate of calcium, and oxides of iron, manganese, and silicon. [L, 105.]

ADOLIA (Lat.), n. f. A^{2}d(a^{3}d)-o'li^2-a^3. Fr., *adoli, adolie.* Sp., *adolia.* Syn.: *vetadagou.* A plant found in Malabar, the leaves of which, mixed with oil, are applied locally to assist labor. [L, 105.]



ADOLODE, n. A^{2}d'o^2-lod. From α priv., and δόλος, wile. An instrument sometimes used for discovering fraud in distillation. [L, 73.]

ADONIDE, n. A^{2}d'o-nid. Fr., *adoniste.* Ger., *Adonist.* Sp., *adonista.* A gatherer of herbs; also one who describes and catalogues exotic and cultivated plants. [A, 315; L, 95, 96, 98, 109.]

ADONIDE (Fr.), n. A^{3}d-o-ned. The *Adonis vernalis.*

ADONIDIN, n. A^{2}d-o^{2}n'i^{2}d-i^{2}n. For deriv., see ADONIS. Fr., *adonidine.* Ger., *Adonidin.* It., Sp., *adonidina.* A glucoside extracted by Cervello from *Adonis vernalis;* a colorless, odorless, extremely bitter, amorphous substance only slightly soluble in water and in ether, more soluble in alcohol. In physiological action it resembles digitalin. ["Arch. f. exp. Pathol. u. Pharm.," xv, p. 235 (B).]

ADONIS (Lat.), n. f. A^{2}d(a^{3}d)-o'ni^{2}s. Gen., *adon'idis.* From *Adonis*, from whose blood the plant was fabled to have sprung. Fr., *adonide.* Ger., *Adonis.* It., Sp., *adonide.* A Linnæan genus of ranunculaceous herbs belonging to the tribe *Ranunculeæ*, distinguished by the absence of appendages to the sepals and by the scarlet or yellow hue of the flowers. [B, 34.]—**A. æstivalis** [Linnæus]. Fr., *adonide d'été, œil de perdrix.* Ger., *Sommeradonis, Teufelsauge.* Pheasant's-eye; a species growing in England and on the Continent of Europe, bearing small crimson flowers with the corolla much longer than the calyx. It is used as a vesicant, and by Parkinson an infusion of the seeds is recommended for colic. [B, 19, 49; L, 105.]—**A. anomala.** A European species, the leaves of which are used as a vesicant. [L, 105.]—**A. apennina.** A

ADONIS AUTUMNALIS. [A, 257.]

species the leaves of which are used by the Siberians as an abortifacient and vesicant. [L, 105.]—**A. autumnalis** [Linnæus]. Fr., *adonide d'automne, goutte de sang.* Ger., *Adonisblume,*

Adonisröschen, Teufelsauge. Syn.: *flos a.* A European species cultivated in the United States. It is an annual herb, about 1 foot in height, bearing crimson flowers having from 5 to 8 petals, which are of nearly equal length with the sepals. [B, 19, 34, 49.] —**A'blume** (Ger.) See *A. autumnalis.*—**A. capensis.** Ger., *blasenziehender A.* A species found at the Cape of Good Hope; the leaves are used in lieu of cantharides. [L, 105.]—**A. cupaniana** [Gussone]. It., *fiore di Marzo* (*o di San Giuseppe*). A Sicilian species; an annual herb with a solitary red flower, nearly related in botanical characters to *A. æstivalis*, if not identical with it. It contains a glucoside apparently identical with adonidin. It has been recommended as a substitute for *A. vernalis.* [V. Cervello, "Ann. di chim. medico-farm. e di farmacol.," April–May, 1885, p. 295 (B).]—**A. flos.** See *A. autumnalis.*—**A. gracilis.** A South African species; the leaves are used by the natives as a vesicant. [L, 105.]—**A'röschen, A'röslein.** See *A. autumnalis.*—**A. verna, A. vernalis** [Linnæus]. Fr., *adonide printanière, adonide.* A species indigenous to Europe and cultivated in the United States, so called because blooming early in the spring. It is a perennial herb about 1 foot in height, bearing lemon-yellow flowers with 10 to 12 petals. The plant contains adonidin, and the leaves contain 10 per cent. of aconitic acid. The fresh plant is a vesicant, but its irritant property is lost by drying. The roots are used in England as a purgative, and the leaves also are said to be drastic. The plant is employed on the Continent as a cardiac tonic and in Siberia as an abortifacient, and the rhizome has been used to adulterate black hellebore. [Huchard, "Gaz. hebd. de méd. et de chir.," Jan. 1, 1886, p. 13 (A); B, 19, 34, 49; L, 105.]—**A. vesicatoria.** See *A. capensis.* —**Blasenziehender A.** (Ger.). See *A. capensis.*—**Flos a.** A common name for *A. autumnalis.* [B, 19.]—**Sommera'** (Ger.). See *A. æstivalis.*

ADOPTER, n. A2d-o2p′tu3r. See Adapter.

ADOR (Lat.), n. n. A2d(a3d)′or. Gen., *ado′ris.* 1. A sort of corn; spelt, *Triticum spelta.* 2. Also wheat flour. [L, 48, 102, 105.]

ADORAL, adj. A2d-o′ra2l. From *ad*, near to, and *os*, the mouth. Near or in relation to the mouth. [B, 39.]

ADORBITAL, n. A2d-o3r′bi2t-a2l. From *ad*, near to, and *orbita*, the orbit. Fr., *adorbital.* The name used by Geoffroy for the lachrymal bone (Owen) of fishes. [L, 27, 41.]

ADORF (Ger.), n. A3d′o3rf. A place in Saxony at which are mineral springs containing sodium chloride with traces of bromine, lithium, etc. [L, 49.]

ADORNKRAUT (Ger.), n. A3d′o3rn-kra3-ut. The *Ballota nigra.* [B, 92.]

ADOS, n. From ἄδος, satiety. An alchemical term for water in which red-hot iron has been quenched. [L, 53.]

ADOS (Fr.), adj. A3-do. Oblique. [L, 101.]

ADOSCULATION, n. A2d-o2s″ku2-la′shu3n. From *adosculari*, to kiss. Ger., *Befruchtung, Schwängerung* (1st def.). 1. A term formerly employed to denote impregnation taking place in plants or animals by superficial contact alone. 2. A form of articulation in which one part is fitted into a cavity in another part. [B, 39.]

ADOSSETTE (Fr.), n. A3d-o2s-se2t. A genus of mosses. [L, 41.]

ADOSSEMENT (Fr.), n. A3d-o2s-ma3n2. The application of two surfaces to each other, as in the case of two membranes which are applied to each other by their opposite faces. [L, 41.]

ADOUCIR (Fr.), v. tr. A3-du-ser. To dilute; said of acids. [L, 52.]

ADOUCISSANT (Fr.), n. A3-du-se-sa3n2. A demulcent. [L, 41.]

ADOXA (Lat.), n. f. A2d(a3d)-o2x′a3. From α priv., and δόξα, estimation, because of its inconspicuousness. [B, 71.] Fr., *adoxe.* Ger., *Bisamkraut.* Sp., *adoxa.* A genus of plants now assigned to the *Caprifoliaceæ*, although formerly classed among the *Araliaceæ* and *Saxifragaceæ.* [B, 19, 71.]—**A. moschatellina** [Willdenow]. Ger., *Bisamkraut.* Musk crow's-foot. A species growing in Europe, England, and North America. It has been used as a detergent and antispasmodic. [L, 37, 46, 105.]

ADPHALANGINE (Fr.), n. A3d-fa3-la3n2-zhen. An accessory phalanx. [L, 41.]

ADPLICITUS (Lat.), adj. A2d(a3d)-pli2s(pli2k)′i2-tu3s(tu4s). From *ad*, to, and *plicare*, to fold. Appressed. [B, 121.]

ADPLUMBATUM (Lat.), n. n. A2d(a3d)-plu3m(plu4m)-ba(ba3)′-tu3m(tu4m). From *ad*, to, and *plumbare*, to solder. Syn.: *ferruminatum.* Solder. [L, 53.]

ADPRESSED, adj. A2d-pre2st′. See Appressed.

ADPRESSUS (Lat.), adj. A2d(a3d)-pre2s′su3s(su4s). See Appressed.

ADRACALA, n. See Adrachne.

ADRACANTHINE, ADRACANTINE (Fr.), n's. A3d-ra3-ka3n-ten. Adraganthin. [L, 43.] See Tragacanthin.

ADRACHNE (Lat.), n. f. A2d′a3d)-ra2k(ra3ch2)′ne(na). Gen., *adrach′nes.* Gr., ἀδράχνη. Fr., *adrachné.* Ger., *Adrachne.* Sp., *adracne.* 1. A tree mentioned by Pliny; the strawberry bay, or *Arbutus adrachne* of Linnæus, an evergreen shrub of the Island of Candia. [B, 114; L, 103.]

ADRADIAL, adj. A2d-ra′di2-a2l. From *ad*, to, near to, and *radius*, a ray. Near, or in relation with, a ray; in the *Hydrozoa*, disposed on either side of one of the primary radii passing from the centre to the angles of the oral aperture. [E. R. Lankester (B, 77).] Cf. Perradial and Interradial.

ADRADIALLY, adv. A2d-ra′di-a2l-i2. In an adradial manner, having an adradial relation. [B, 77.]

ADRAGANT, ADRAGANTH, n's. A2d′ra2-ga2nt, -ga2nth. Fr., *adragant, adraganthe.* Ger., *Adragant, Adraganth.* It., *adragante.* Sp., *adraganta, adraganto.* See Tragacantha.

ADRAGANTHIN, n. A2d-ra2-ga2n′thi2n. Lat., *adraganthina, adragantina.* Fr., *adragantine, adracanthine.* Ger., *Adraganthin.* Sp., *adragantina.* See Tragacanthin.

ADRAGO (Sp.), n. A3d-ra3′go. Syn.: *adrazo.* A distilling apparatus used by the early Spanish navigators. [L, 95, 99.]

ADRAKA, n. See Ada (2d def.).

ADRAM, n. An alchemical name for sodium chloride. [B, 50.]

ADRARAGI, n. An alchemical name for garden saffron (some species of *Crocus*). [B, 50.]

ADRA RHIZA (Lat.), n. f. A2d(a3d)′ra3 ri(re)′za3. From ἀδρά ῥίζα, a thick root. Fr., *adrarize.* Sp., *adrariza.* See Aristolochia.

ADRASTÉE (Fr.), n. A3d-ra3s-ta. Sp., *adrastea.* A small shrub growing in New Holland. [L, 98, 109.]

ADRAZO (Sp.), n. A3d-ra3′th2o. See Adrago.

ADRELWURT, n. A2d′re2l-wu5rt. An old name for feverfew (? *Matricaria parthenium*). [Halliwell (L, 73).]

ADRENAL, n. A2d-re′na2l. From *ad*, to, and *ren*, the kidney. See *Suprarenal* capsule.

ADRIANUM (Lat.), n. n. A2d(a3d)-ri2-a(a3)′nu3m(nu4m). A medicine, invented by the Emperor Hadrian, used in all diseases caused by cold. [L, 53.]

ADROBOLON, ADROBOLUM (Lat.), n's n. A2d(a3d)-ro-bo′lo2n, -lu3m(lu4m). From ἁδρός, thick, and βῶλος, a lump. Indian bdellium; so called because occurring in larger lumps than the Arabian. [B, 69.] More properly written *hadrobolon.*

ADROP, n. An alchemical term denoting lead used in the preparation of the philosopher's stone; also the philosopher's stone itself. [L, 53.]

ADROS (Lat.), adj. A2d(a3d)′ro2s. Gr., ἁδρός, thick, plump. More properly written *hadros.* Full, as applied to the habit of body or to the pulse. [L, 45.]

ADROSTRAL, adj. and n. A2d-ro2s′tra2l. From *ad*, to, near to, and *rostrum*, a beak. Fr., *adrostral.* Sp., *adrostral.* 1. (Adj.) attached to the front portion of the face. 2. (N.) a portion of the superior maxilla in certain of the lower animals. [L, 41, 63, 95.]

ADROSTRO-LABIAL, adj. and n. A2d-ro2s″tro-la′bi2-a2l. For deriv., see Adrostral and Labial. Fr., *adrostro-labial.* Sp., *adrostro-labial.* 1. (Adj.) attached to the front part of the face and to the lip. 2. (N.) a muscle of the frog's mouth. [L, 41, 95.]

ADROTERON (Lat.), n. n. A2d(a3d)-ro2t′e2r-o2n. Gr., ἁδρότερον, comp. of ἁδρός, thick, full. See Alica.

ADSAMAR, n. An old name for the urine. [L, 53.]

ADSARIA PALA, ADSARIA PALLA, n. A Ceylon name for *Mucuna pruriens.* [L, 45, 105.]

ADSCAPÉAL (Fr.), n. A3d-ska3-pa-a3l. Sp., *adscapeal.* One of the bony pieces of the internal ear. [L, 41.]

ADSCAPULO-HUMERAL, n. A2d-ska2p″u2-lo-hu2′me2r-a2l. From *ad*, to, near to, *scapula*, and *humerus* (*q. v.*). Fr., *adscapulo-huméral.* Sp., *adscapulo-humeral.* A muscle in the arm of the salamander. [L, 41, 95.]

ADSCAPULUM (Lat.), n. A2d(a3d)-ska2p(ska3p)′u2(u)-lu3m-(lu4m). Sp., *adscápulo.* One of the pieces of the scapula. [L, 109.]

ADSELLARE (Lat.), v. intr. A2d(a3d)-se2l-la(la3)′re(re2). Also written *assellare.* 1. To go to stool. [L, 58.] 2. As a n., the act of defecation. [L, 53.]

ADSCENDENT, adj. A2d-se2n′de2nt. See Ascending.

ADSCENSUS (Lat.), n. A2d(a3d)-se2n(ske2n)′su3s(su4s). Gen., *adscen′sus.* 1. A flow of blood to the head. [L, 50.] 2. In botany, the stem of a plant. [B, 1.]

ADSIA (Jap.), n. The *Bignonia catalpa.* [L, 105.]

ADSI MAMI (Jap.), n. The *Faba vulgaris.* [L, 105.]

ADSPECTION, n. A2d-spe2k′shu3n. From *adspicere*, to view. See Inspection.

ADSPERGO (Lat.), n. f. A2d(a3d)-spu3r(spe2r)′go. Gen., *Adsper′ginis.* 1. A sprinkling with water. 2. A fine dusting powder, especially lycopodium. [L, 46, 50, 81.]

ADSPERSIO (Lat.), n. f. A2d(a3d)-spu3r(spe2r)′shi2(si2)-o. Gen., *adspersio′nis.* See Adspergo.

ADSPERSUS (Lat.), p. p. of *adspergere.* A2s(a3s)-pu3r(pe2r)′-su3s(su4s). Spotted. [L, 63.]

ADSPIRATIO (Lat.), n. f. A2d(a3d)-spi2r-a(a3)′shi2(ti2)-o. Gen., *adspiratio′nis.* Aspiration, inspiration (*q. v.*). [J.]

ADSTANS (Lat.), adj. and n. A2d(a3d)′sta2nz(sta3ns). Gen., *adstan′tis.* From *adstare*, to stand by. 1. An accessory organ; an old term for the prostate. [L, 45.] 2. One who ministers to the sick. [L, 53.]

ADSTITES CONGLOMÉRÉES (Fr.), n. pl. A3d-stet co2n2-glo2m-a-ra. A name given by Terraneus to Cowper's glands, which he supposed he had discovered. [L, 55.]

ADSTRICTIO (Lat.), n. f. A2d(a3d)-stri2k′shi2(ti2)-o. Gen., *adstrictio′nis.* From *adstringere*, to draw together. Fr., *astriction.* Ger., *Adstriction, Zusammenziehung.* Sp., *adstricción.* 1. The action of an astringent. [A, 300.] 2. The retention of any natural evacuation, especially constipation. [Galen, Celsus (L, 83), L, 102.] 3. In surgery, the ligation of a blood-vessel. [A, 300.]—**A. alvi.** Constipation. [L, 50.]

ADSTRICTION, n. A2d-stri2k′shu3n. See Adstrictio and Constriction.

ADSTRICTORY, adj. A^{2}d-stri^{2}k'to-ri^2. Astringent. [L, 46, 56.]

ADSTRICTUS (Lat.), adj. A^{2}d(a^{3}d)-stri^{2}k'tu^{3}s(tu^{4}s). Constricted. [L, 80.]

ADSTRINGENS (Lat.), adj. and n. A^{2}d(a^{3}d)-stri^{2}n(stri^{2}n^2)'je^{2}nz(ge^{2}ns). Astringent. Cf. ADSTRINGENTIA.—**A. Fothergillii.** Kino. [L, 45.]

ADSTRINGENT, adj. and n. A^{2}d-stri^{2}n'je^{2}nt. See ASTRINGENT.

ADSTRINGENTIA (Lat.), n., n. pl. of *adstringens* (*q. v.*). A^{2}d(a^{3}d)-stri^{2}n(stri^{2}n^2)-je^{2}n(ge^{2}n)'shi^2(ti^2)-a^3. Astringents.

ADSTRINGIREND (Ger.), adj. A^{3}d-stri^{2}n-ge're^{2}nd. Astringent.

ADTERMINAL, adj. A^{2}d-tu^{5}rm'i^{2}n-a^{2}l. From *ad*, to, and *termen*, an end. See *A.* CURRENT.

ADUCA (Sp.), n. A^3-du'ka^3. A drug formerly used for venereal diseases. [L, 95.]

ADULESCENS (Lat.), adj. A^{2}d(a^{3}d)-u^2(u)-le^{2}s'se^{2}nz(ke^{2}ns). See ADOLESCENS.

ADULESCENTIA (Lat.), n. f. A^2(a^{3}d)-u^2(u)-le^{2}s-se^{2}n(ke^{2}n)'shi^2(ti^2)-a^3. See ADOLESCENTIA.

ADULT, adj. and n. A^{2}d-u^{3}lt'. Lat., *adultus* (from *adolescere*, to come to maturity). Fr., *adulte.* Ger., *erwachsen* (adj.), *Erwachsene* (n.). It., Sp., *adulto.* 1. Adj., having reached the stage of full development (said of living organisms). 2. N., a fully developed individual. [L.] See *A.* TEXTURE.

ADULTERANT, n. A^{2}d-u^{3}lt'e^2-ra^{2}nt. 1. A substance with which an article is adulterated. 2. One who adulterates. [L, 46, 73.]

ADULTERATE, v. tr. A^{2}d-u^{3}lt'e^2-rat. Lat., *adulterare.* Fr., *adultérer.* Ger., *verfälschen.* It., *adulterare.* Sp., *adulterar.* To debase the quality of a medicine or article of food or drink by the fraudulent admixture of foreign matter. [B.]

ADULTERATION, n. A^{2}d-u^{2}lt-e^2-ra'shu^{3}n. Lat., *adulteratio.* Fr., *adultération, falsification.* Ger., *Verfälschung* (1st def.), *Verfälschtsein* (2d def.). It., *adulterazione.* Sp., *adulteración.* Syn.: *sophistication.* 1. The fraudulent addition of worthless or injurious material to a drug or an article of food or drink. 2. The state of being adulterated. [B.] 3. A substance used in adulterating.

ADUMBA, n. A species of fig. The fruit and bark, boiled in fish soup with cardamoms and a plant called awhintey-whinting, are used by the Ashantees to induce abortion. [Bowditch and Waring (L, 63).]

ADUNATOS (Lat.), adj. A^{2}d(a^{3}d)-u^{2}n(un)'a^{3}t-o^{2}s. Gr., ἀδύνατος. See ADYNAMIC.

ADUNCATIO (Lat.), n. f. A^{2}d(a^{3}d)-u^{3}n(un)-ka(ka^3)'shi^2(ti^2)-o. Gen., *aduncatio'nis.* From *ad*, to, and *uncus*, a hook. A hook-like curvature.—**A. unguium.** Incurvation of the nails. [G.] See ONYCHOGRYPOSIS.

ADUNCIROSTRATE, adj. A^{2}d-u^{3}n''si^2-ro^{2}s'trat. From *ad*, to, *uncus*, a hook, and *rostratus*, beaked. Fr., *aduncirostre.* Having a curved beak (said of birds). [L, 109.]

ADUNCITY, n. A^{2}d-u^{3}n'si^2-ti^2. Lat., *aduncitas.* The state of being curved like a hook. [A, 312.]

ADUNCOUS, adj. A^{2}d-u^{3}n^{2}k'u^{3}s. Lat., *aduncus* (from *aduncatus*, hooked). Ger., *hakenförmig, gekrümmt.* It., Sp., *adunco.* Hooked; curved like the talons of an eagle. [B, 39; L, 46, 93, 95.]

ADURE, v. tr. A^{2}d-u^{2}r'. Lat., *adurere.* Ger., *verbrennen.* Sp., *adurer.* To burn. [L, 46, 95.]

ADURENT, adj. A^{2}d-u^2're^{2}nt. Lat., *adurens.* Ger., *adurirend* Burning (said of the heat of fever); caustic. [L, 41, 63.]

ADURENTIA (Lat.), n., n. pl. of adj. *adurens.* A^{2}d(a^{3}d)-u^2(u)-re^{2}n'shi^2(ti^2)-a^3. Ger., *adurirende Mittel.* Caustics. [L, 50.]

ADURION (Ar.), n. The *Rhus coriaria.* [L, 109.]

ADUST, ADUSTED, adj's. A^{2}d-u^{3}st', -u^{3}st'e^{2}d. Lat., *adustus* (from *adurere*, to burn). Fr., *aduste.* Ger., *hitzig.* It., Sp., *adusto.* Lit., burned; hot and dry (said formerly of a condition characterized by dryness and heat of the skin, thirst, and a dark color of the blood). [L, 41, 45, 46, 55, 93, 95.]

ADUSTIO (Lat.), n. f. A^{2}d(a^{3}d)-u^{3}s(us)'ti^2-o. Gen., *adustio'nis.* From *adurere*, to burn. See AMBUSTIO.

ADUSTION, n. A^{2}d-u^{3}st'shu^{3}n. Lat., *adustio.* Fr., *adustion.* Ger., *Verbrennung.* It., *adustione.* Sp., *adustión.* 1. Cauterization. [L, 30.] 2. The state of being adust (*q. v.*). [L, 41, 45, 46.]

ADUSTUS (Lat.), adj. A^{2}d(a^{3}d)-u^{3}st(ust)'u^{3}s(u^{4}s). See ADUST.

ADUTÉRIN (Fr.), adj. A^{3}d-u^6-ta-ra^{2}n^2. Pertaining to the ad-uterum (*q. v.*). [L, 109.]

AD-UTERUM (Lat.), n. A^{2}d(a^{3}d)-u^2(u)'te^2-ru^{3}m(ru^{4}m). From *ad*, to, and *uterus*, the womb (*aditus, iter, canalis*, or some such word being understood, and the gender being determined by that word). Fr., *adutérum.* Sp., *aduťero.* G. St. Hilaire's term for the oviduct in birds, or for the lower, dilated portion of it in which the egg acquires its shell. [L, 43, 95, 109.]

ADVANCEMENT, n. A^{2}d-va^{2}ns'me^{2}nt. Old Fr., *advancement.* [A, 302.] Fr., *avancement.* Ger., *Vorlagerung, Vornähung.* It., *avanzamento.* Sp., *avanzamiento.* 1. An operation by which an ocular muscle is detached from its insertion, and attached at a point farther removed from its origin; the object being to give the action of the muscle increased power over the movements of the eye, for the cure of squint, usually of a paretic or paralytic nature. There are several ways of operating, but in all cases the tendon of the impaired muscle is loosened and, by means of sutures, drawn forward to a point in advance of its original insertion. Division of the opposing muscle may precede or follow the operation of a. [F.] 2. An operation in which the same end is accomplished by shortening the muscle (or any like structure).—**Capsular a.** Fr., *avancement capsulaire.* A modified form of the operation in which the incision and the sutures involve the capsule of Tenon as well as the tendon of the muscle to be advanced, and the entire correction of the strabismus is effected by a. of this muscle without dividing the tendon of the opposing muscle. [De Wecker, "Progr. méd.," Feb. 14, 1885, p. 135.]—**A. of the round ligaments.** Fr., *raccourcissement chirurgical des ligaments ronds.* Ger., *Verkürzung der ligamenta rotunda uteri.* It., *raccorciamento dei legamenti rotondi.* Syn.: *shortening of the round ligaments, Alexander's* (or *Adams's*) *operation.* An operation for overcoming inveterate and troublesome backward displacements of the uterus by pulling out "the slack of the round ligaments." "The operation is performed by cutting down upon each abdominal ring, gathering up the ends of the ligaments, freeing each from its nerve, and gradually releasing them, by patient and cautious traction, from the neighboring tissues, until the position of the uterus, as ascertained by the finger in the vagina, satisfies the operator. The ligament is then stitched to the tissues around the ring." [W. Alexander, "Med. Times and Gaz.," April 1, 1882; "N. Y. Med. Jour.," xxxvi, 1882, p. 83.]

ADVEHENS (Lat.), adj. A^{2}d(a^{3}d)'ve(wa)-he^{2}nz(he^{2}ns). From *advehere*, to carry to. Afferent. [L, 45.]—**Venæ hepaticæ advehentes.** See *Hepatic* VEINS.

ADVENTITIA (Lat.), n., f. of adj. *adventitius* (*tunica* or *membrana* being understood). A^{2}d(a^{3}d)-ve^{2}n(we^{2}n)-ti^2'shi^2(ti^2)-a^3. Fr., *tunique adventice.* Ger., *Adventitia.* It., *membrana adventizia.* 1. The outer, or adventitious, coat of a vessel or tube, so called from its being made up of a condensation of the surrounding (and therefore foreign) areolar tissue, the fibres of which are intimately interwoven, but have a general longitudinal direction. [J, 30, 35.] 2. As sometimes used, the perineurium (*q. v.*). [Krause, "Arch. f. mikr. Anat.," 1881, p. 53 (J).]—**A. capillaris.** See PERITHELIUM.

ADVENTITIAL, adj. A^{2}d-ve^{2}n-ti^{2}sh'a^{2}l. See ADVENTITIOUS.—**A'scheide** (Ger.). See PERITHELIUM.—**A'zelle** (Ger.). See *A.* CELL.

ADVENTITIOUS, adj. A^{2}d-ve^{2}n-ti^{2}sh'u^{3}s. Lat., *adventitius, adventicius* (from *advenire*), foreign. Fr., *adventif, adventice, accidentel.* Ger., *adventitial, adventitiell, adventiv, zufällig.* It., *adventizio.* Sp., *adventicio.* Syn.: *adventitial, adventine, adventive.* 1. Out of place, occurring in an anomalous or extraordinary manner or situation. [B.] 2. Acquired, not hereditary (said of diseases). [D, 20.] See DEMENTIA *adventitia.* 3. In botany, developed in an unnatural situation (said of entire plants and of individual organs). [B.] 4. Added to anything which may already be considered complete. [J.] See ADVENTITIA. 5. Pertaining to an adventitia (*q. v.*). [J.]

ADVENTIV (Ger.), adj. A^{3}d-fe^{2}nt-ef'. Adventitious.—**A'knospe.** See *Adventitious* BUD.—**A'wurzel.** See *Adventitious* ROOT.

ADVERSE, adj. A^{2}d-vu^{5}rs'. Lat., *adversus* (from *advertere*, to turn toward). Fr., *adverse.* Sp., *adverso.* In botany, having the lower surface of the leaves turned toward the sun. [B, 7.]

ADVERSIFOLIATE, ADVERSIFOLIOUS, adj's. A^{2}d-vu^{5}r-si^2-fo'li^2-at, -u^{3}s. From *adversus* (see ADVERSE), and *folium*, a leaf. In botany, having the leaves opposite. [B, 39.]

ADVOCATENBAUM, ADVOGATOBAUM, ADVOGATOLORBEER (Ger.), n's. A^{3}d-fo-ka^3'te^{2}n-ba^3-um, -ga^3'to-ba^3-um, -lo^{2}r-bar. See AVOGATOBAUM.

ADY, n. The *Palma ady;* a species of palm growing on the island of St. Thomas, furnishing the fruit called *abanga* (*q. v.*). [B, 38, 44.] An oil extracted from the kernels of the fruit is used as butter. [L, 63.]

ADYAO, n. A verbenaceous shrub, of the genus *Premna*, used locally for headache, colic, and ulcers. [L, 63.]

ADYNAMIA (Lat.), n. f. A^{2}d(a^{3}d)-i^{2}n(u^{6}n)-a^{2}m(a^{3}m)'i^2-a^3. Gr., ἀδυναμία (from α priv., and δύναμις, power). Fr., *adynamie.* Ger., *Adynamie, Kraftlosigkeit.* It., Sp., *adinamia.* A temporary but decided impairment of the bodily and mental powers, especially such as occurs in the course of an essential fever. [A, 321.] In Cullen's nosology, the *adynamiæ* were the second order of diseases of the class *neuroses*, embracing syncope, dyspepsia, hypochondriasis, and chlorosis. [L, 84.]—**A. uteri.** See ATONY *of the uterus.*—**A. virilis.** See IMPOTENCE.

ADYNAMIC, adj. A^{2}d-i^{2}n-a^{2}m'i^{2}k. Lat., *adynamus, adynamicus.* Fr., *adynamique.* Ger., *adynamisch.* It., *adinamico.* Sp., *adinámico.* Pertaining to adynamia.—**A. fever.** See *Typhoid* FEVER.

ADYNAMICO-ATAXIC, adj. A^{2}d-i^{2}n-a^{2}m''i^{2}k-o-a^{2}t-a^{2}x'i^{2}k. Lat., *adynamico-ataxicus, adynamico-atacticus.* Fr., *adynamico-ataxique.* Ger., *adynamisch-ataktisch.* Sp., *adinámico-atáxico.* Having the characteristics of adynamia and those of ataxia. [L, 41.]

ADYNAMON, ADYNAMUM (Lat.), n's, n. of adj. *adynamos*, or *adynamus* (*vinum* understood). A^{2}d(a^{3}d)-i^{2}n(u^{6}n)'a^3-mo^{2}n, -mu^{3}m(mu^{4}m). Gr., ἀδύναμον. An ancient weakened wine, made by evaporating a mixture of 2 parts of must and 1 part of water until only two thirds of the whole remained. [L, 104.]

ADYNAMY, n. A^{2}d-i^{2}n'a^{2}m-i^2. See ADYNAMIA.

ADYNASIA, ADYNATIA (Lat.), n's f. A^{2}d(a^{3}d)-i^{2}n(u^{6}n)-a(a^3)'zi^2(si^2)-a^3, -shi^2(ti^2)-a^3. See ADYNAMIA.

ADYNATOCOMIUM (Lat.), n. n. A^{2}d(a^{3}d)-i^{2}n(u^{6}n)''a^3-to-ko'mi^2-u^{3}m(u^{4}m). From ἀδύνατος, a sick person, and κομεῖν, to take care of. A hospital. [L, 50.]

ADYNATOCRASIA (Lat.), n. f. A^{2}d(a^{3}d)-i^{2}n(u^{6}n)''a^3-to-kra-(kra^3)'zi^2(si^2)-a^3. From ἀδύνατος, weak, and κρᾶσις, a mixing. Ger., *Adynatokrasie.* Barthels's term for an unnatural laxity of the organic parts. [L, 50.]

ADYNATODOCHIUM (Lat.), n. n. A^{2}d(a^{3}d)-i^{2}n(u^{6}n)″a^3-to-do′ki^2(ch^{2}i^2)-u^{3}m(u^{4}m). From ἀδύνατος, a sick person, and δοχή, entertainment. See Adynatocomium.

ADYNATOS, ADYNATUS (Lat.), adj's. A^{2}d(a^{3}d)-i^{2}n(u^{6}n)′a^3-to^{2}s, -tu^{3}s(tu^{4}s). Unhealthy, sickly ; as a n., an invalid. [L, 50.]

ADYSETON, ADYSETUM (Lat.), n. n. A^{2}d(a^{3}d)-i^{2}s(u^{6}s)-e(a)′-to^{2}n, -tu^{3}m(tu^{4}m). A section of the botànical genus *Alyssum*. [L, 30, 41.]

ÆCIDIACEI (Lat.), n. m. pl. E^2(a^3-e^2)-si^{2}d(ki^{2}d)-i^2-a(a^3)′se-(ke^2)-i(e). In the old classifications of *Fungi*, a division of the *Coniomycetes*, including those that are parasitic upon plants and contain a distinct cellular peridium. They comprise the genera *Æcidium*, *Peridermium*, *Rœstelia*, etc. [B, 61.]

ÆCIDIOLUM (Lat.), n. n. E^2(a^3-e^2)-si^{2}d(ki^{2}d)-i(e)′o-lu^{3}m(lu^{4}m). A supposed genus of *Fungi* the members of which are now known to be only the spermogones of other genera. [B, 76.]

ÆCIDIOMYCETES (Lat.), n. m. pl. E^2(a^3-e^2)-si^{2}d(ki^{2}d)-i^2-o-mi-(mu^6)-se(ka)′tez(te^{2}s). From αἰκία, a wheal, and μύκης, a fungus. A collective name for the *Uredineæ* and the *Ustilagineæ*. [B, 49.]

ÆCIDIOSPORE, n. E^{2}s-i^{2}d′i^2-o-spor. For deriv., see Æcidium and Spore. One of the conidia, or rounded spores, developed in the æcidium stage of *Fungi* of the order *Uredineæ*. [B.] See Æcidium.

ÆCIDIUM (Lat.), n. n. E^2(a^3-e^2)-si^{2}d(ki^{2}d)′i^2-u^{3}m(u^{4}m). From αἰκία, a blow with a whip. Ger., *Kelchbrand* (2d def.). 1. A wheal. [L, 46, 73.] 2. In botany, a name formerly given to a number of *Fungi*, supposed to constitute a distinct genus, distinguished by the globose shape of the spores, which are arranged in little fragile necklaces radiating from a thin cellular base. The forms grouped under this head are now known to be merely stages in the development of certain *Carposporeæ* (*Fungi*) belonging to the order *Uredineæ*. The latter, at a certain period of their development (called the æcidium stage), form globular masses beneath the epidermis of various plants. These masses consist of an agglomeration of rounded yellowish cells, called æcidiospores, surrounded by a cellular investment called the peridium. By the rupture of the latter the æcidiospores are set free and subsequently develop into a new individual, which then usually passes into what is called the uredo stage. [B, 19, 75.] See Uredo.—**Æ. berberidis** [Persoon]. Barberry rust (or cluster-cups) ; the æ. stage of *Puccinia graminis*, formerly thought to constitute a distinct species of fungus. It forms bright-red rounded spots on the leaves and fruit of the barberry (*Berberis vulgaris*), containing orange-colored æcidiospores, which subsequently develop on wheat, oats, and other cereals, constituting the so-called red rust and black rust. [B, 19, 35, 54, 75, 76.] See Puccinia *graminis*.

AECKER (Ger.), adj. A′ke^{2}r. See Agrestis.

ÆDEPSOS, ÆDEPSUS (Lat.), n's m. E(a^3-e^2)-de^{2}p′so^{2}s, -su^{3}s(su^{4}s). See Dipso.

AEDERCHEN (Ger.), n. A′de^{2}r-ch^{2}e^{2}n. An arteriole. [L, 80.]

AEDERIG (Ger.), adj. A′de^{2}r-i^{2}g. Venous. [L, 59.]

AEDES (Lat.), n. f. A(a^3)-e(a)′dez(de^{2}s). Gen., *ae′deos*. From ἀηδής, unpleasant. That which is unpleasant to the taste. [L, 53.]

ÆDODES (Lat.), adj. E^{2}d(a^3-e^{2}d)-o′dez(de^{2}s). See Ædœodes.

ÆDŒA (Lat.), n. n. pl. E^{2}d(a^3-e^{2}d)-e(oi)′a^3. Gr., αἰδοῖα. Ger., *Aedöa*. The genitals. [L, 50.]

ÆDŒAGRA (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e′(o^2′e^2)-a^{2}g(a^{3}g)-ra^3. For deriv., see Ædœa and *-agra.** Ger., *Aedöagra*. Pain in the genitals. [L, 30, 50.]

ÆDŒAGRAPHY, n. E^{2}d-e-a^{2}g′ra^{2}f-i^2. See Ædœography.

ÆDŒALOGY, n. E^{2}d-e-a^{2}l′o-ji^2. See Ædœology.

ÆDŒATOMY, n. E^{2}d-e-a^{2}t′o-mi^2. See Ædœotomy.

ÆDŒAUXE (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(oi)-a^{4}x(a^3-ux)′e(a). Gen., *œdœaux′es*. From αἰδοῖα, the genitals, and αὔξη, growth, increase. Swelling of the genitals. [L, 50.]

ÆDŒBLENNORRHÉE (Fr.), n. A-da-bla^{3}n-no-ra. See Ædœoblennorrhœa.

ÆDŒCI (Lat.), n. m. pl. E^{2}d(a^3-e^{2}d)-e(oi)′si(ke). From αἰδοιϊκός, belonging to the genitals. See Ædœa.

ÆDŒERYSIPELAS (Lat.), n. n. E^{2}d(a^3-e^{2}d)″e(oi)-e^2-ri^2(ru^6)-si^{2}p′e^{2}l-a^{2}s(a^{3}s). Gen., *œdœerysipel′atos*. Erysipelas of the genitals. [L, 50.]

ÆDŒICUS (Lat.), adj. E^{2}d(a^3-e^{2}d)-e(oi)′i^{2}k-u^{3}s(u^{4}s). Gr., αἰδοιϊκός. Pertaining to the genitals. [L, 50.]

ÆDŒITIS (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(oi)-i(e)′ti^{2}s. Gen., *œdœit′idis*. For deriv., see Ædœa and *-itis.** Fr., *œdœite*. Inflammation of the genitals. [L, 49, 50.]—**Æ. gangrænosa.** Gangrenous inflammation of the genitals. [L, 63.]—**Æ. gangrænosa puellarum.** The same in young girls. [L, 63.] See Noma.—**Æ. puerperarum.** Inflammation of the genitals in puerperal women. [L, 63.]

ÆDŒITITIS (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(oi)-i^{2}t-i(e)′ti^{2}s. See Ædœitis.

ÆDŒMANIA (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(o^2-e^2)-ma(ma^3)′ni^2-a^3. For deriv., see Ædœa and Mania. Nymphomania (*q. v.*). [L, 45.]

ÆDŒOAGRA (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(o^2-e^2)-o(o^2)′a^{2}g(a^{3}g)-ra^3. See Ædœagra.

ÆDŒOBLENNORRHŒA (Lat.), n. f. E^{2}d(a^3-ed)-e(oi)-o-ble^{2}n-no^{2}r-re(roi)′a^3. For deriv., see Ædœa and Blennorrhœa. Fr., *œdœoblennorrhée*. Ger., *Acdöoblennorrhöe*. Blennorrhœa of the genital mucous membrane. [L, 50, 55.]—**A. feminarum.** Leucorrhœa. [L, 45.]

ÆDŒODES (Lat.), adj. E^{2}d(a^3-e^{2}d)-e(oi)-o′dez(de^{2}s). From αἰδοῖα, the genitals, and εἶδος, shape. Pertaining to the genitals. [L, 50.]

ÆDŒODYNIA (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(oi)-o-di^{2}n(du^{6}n)′i^2-a^3. For deriv., see Ædœa and *-odynia.** Fr., *œdœodynie*. Ger., *Aedöodynie*. Sp., *edeodinia*. Pain in the genitals. [L, 30, 43, 50, 70.]

ÆDŒOGARGALICUS (Lat.), adj. E^{2}d(a^3-e^{2}d)-e(oi)-o-ga^{3}r-ga^{2}l(ga^{3}l)′i^{2}k-u^{3}s(u^{4}s). From αἰδοῖα, the genitals, and γαργαλίζειν, to tickle. Pertaining to masturbation. [L, 50.]

ÆDŒOGARGALISMUS (Lat.), n. m. E^{2}d(a^3-e^{2}d)-e(oi)-o-ga^{3}r-ga^{2}l(ga^{3}l)-i^{2}z(i^{2}s)′mu^{3}s(mu^{4}s). From αἰδοῖα, the genitals, and γαργαλισμός, a tickling. 1. Masturbation. 2. Nymphomania. [L, 30.]

ÆDŒOGARGALUS, ÆDŒOGARGARISMUS (Lat.), n's m. E^{2}d(a^3-ed)-e(oi)-o-ga^{3}r′ga^{2}l(ga^{3}l)-u^{3}s(u^{4}s), -ga^{3}r-ga^{3}r-i^{2}z(i^{2}s)′mu^{3}s-(mu^{4}s). See Ædœogargalismus.

ÆDŒOGRAPHY, n. E^{2}d-e-o^{2}g′ra^{2}f-i^2. For deriv., see Ædœa and *-graphy.** Lat., *œdœographia*. Fr., *œdœographie*. A description of the genital organs. [L, 41.]

ÆDŒOIDES (Lat.), adj. E^{2}d(a^3-e^{2}d)-e(oi)-o-i(e)′dez(de^{2}s). See Ædœodes.

ÆDŒOITIS (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(oi)-o-i(e)′ti^{2}s. See Ædœitis.

ÆDŒOLOGY, n. E^{2}d-e-o^{2}l′o-ji^2. See *-logy.** Lat., *œdœologia*. Fr., *œdœlogie*. The anatomy, physiology, etc., of the genital organs. [L, 50.]

ÆDŒOMYCODERMA, ÆDŒOMYCODERMIS (Lat.), n's n. and f. E^{2}d(a^3-e^{2}d)-e(oi)o-mi(mu^6)-ko-du^{5}r(de^{2}r)′ma^3, -mi^{2}s. Gen., *œdœomycoderm′atos*, *-derm′idis*. For deriv., see Ædœa and Mycoderma. The genital mucous membrane. [L, 50.]

ÆDŒOMYCODERMITIS (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(oi)-o-mi-(mu^6)-ko-du^{5}rm(de^{2}rm)-i(e)′ti^{2}s. Gen., *œdœomycodermit′idis*. See *-itis.** Better written *œdœomycodermatitis*. Fr., *œdœomycodermite*. Inflammation of the genital mucous membrane. [L, 50.]

ÆDŒON (Lat.), n. n. E^{2}d(a^3-e^{2}d)-e(oi)′o^{2}n. Gr., αἰδοῖον. The pudendum. [L, 50.] See Ædœa.

ÆDŒOPALMUS (Lat.), n. m. E^{2}d(a^3-e^{2}d)-e(oi)-o-pa^{2}l(pa^{3}l)′-mu^{3}s(mu^{4}s). Gr., αἰδοιοπαλμός (from αἰδοῖα, the genitals, and παλμός, a throbbing). Ger., *Klopfen der Schamtheile*. A word supposed by Kraus to mean morbid palpitation or throbbing of the genitals. [L, 50.]

ÆDŒOPSIA, ÆDŒOPSIS (Lat.), n's f. E^{2}d(a^3-ed)-e(oi)-o^{2}p′-si^2-a^3, -si^{2}s. Gen., *œdœop′siœ* (*-seos*). From αἰδοῖα, the genitals, and ὄψις, sight. See Ædœoscopy.

ÆDŒOPSOPHESIS, ÆDŒOPSOPHIA (Lat.), n's f. E^{2}d-(a^3-ed)-e(oi)-o-pso-fe(fa)′si^{2}s, -pso′fi^2-a^3. Gen., *œdœopsophes′ios*, *œdœopso′phiœ*. From αἰδοῖα, the genitals, and ψόφησις (from ψοφεῖν, to make a noise). Fr., *œdœopsophie*. See Physometra and *Cunni* garrulitas.—**Æ. uterina.** See Physometra and *Cunni* garrulitas.

ÆDŒOPTOSIS (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(oi)-o^{2}p-to′si^{2}s. Gen., *œdœopto′seos*. From αἰδοῖα, the genitals, and πτῶσις, a falling. Lit., a falling of the genitals, but applied also to the bladder. [L, 45.]—**Æ. uteri.** Prolapse of the uterus. [L, 45.]—**Æ. uteri inversa.** Inversion of the uterus. [L, 45.]—**Æ. uteri retroversa.** Retroversion of the uterus. [L, 45.]—**Æ. vaginæ.** Prolapse of the vagina. [L, 45.]—**Æ. vesicæ.** Prolapse of the bladder. [L, 45.]

ÆDŒORRHAPHE, ÆDŒORRHAPHIA (Lat.), n's f. E^{2}d(a^3-e^{2}d)-e(oi)-o^{2}r′ra(ra^3)-fe(fa), -ra(ra^3)′fi^2-a^3. Gen., *œdœor′rhaphes* (*-rhaph′iœ*). From αἰδοῖα, the genitals, and ῥαφή, a suture. Ger., *Schamnaht*. See Episiorrhaphy.

ÆDŒOS (Lat.), adj. E^{2}d(a^3-e^{2}d)-e(oi)′o^{2}s. Gr., αἰδοῖος. See Pudic.

ÆDŒOSCOPY, n. E^{2}d-e-o^{2}s′ko^{2}p-i^2. Lat., *œdœoscopia* (from αἰδοῖα, the genitals, and σκοπεῖν, to look at). Fr., *œdœoscopie*. Ger., *Aedöoskopie*. A physical examination of the genital organs. [L, 30, 50, 55.]

ÆDŒOTITIS (Lat.), n. f. E^{2}d(a^3-e^{2}d)-e(oi)-o-ti(te)′ti^{2}s. Gen., *œdœotit′idis*. See Ædœitis.

ÆDŒOTOMY, n. E^{2}d-e-o^{2}t′o-mi^2. Lat.. *œdœotomia* (from αἰδοῖα, the genitals, and τέμνειν, to cut). Fr., *œdœotomie*. Ger., *Aedöotomie*. The dissection of the genital organs, or a cutting operation practised upon them. [E ; L, 30, 41, 55.]

ÆDŒPALMUS (Lat.), n. m. E^{2}d(a^3-e^{2}d)-e(oi)-pa^{2}l(pa^{3}l)′mu^{3}s-(mu^{4}s). See Ædœopalmus.

ÆDŒSCOPY, n. E^{2}d-e^{2}s′ko-pi^2. See Ædœoscopy.

ÆDOIA (Lat.), n. f. E^{2}d(a^3-e^{2}d)-oi′a^3. For this and other words beginning with *œdoi-*, see the corresponding words in *œdœ-*.

ÆDOPTOSIS (Lat.), n. f. E^{2}d(a^3-e^{2}d)-o^{2}p-to′si^{2}s. See Ædœoptosis.

ÆDOS (Lat.), n. m. E′(a^3′e^2)-do^{2}s. See Ædœon.

ÆDOSOPHIA (Lat.), n. f. E^{2}d(a^3-e^{2}d)-o-so′fi^2-a^3. See Ædœopsophesis.

ÆGAGROPILUS (Lat.), n. m. E^{2}g(a^3-e^{2}g)-a^{2}g(a^{3}g)-ro-pi(pe)′-lu^{3}s(lu^{4}s). From αἰγάγρος, the wild goat, and πῖλος, a felted mass. Fr., *œgagropile*. Ger., *Aegagropilus*. The ball of felted hairs sometimes found in the stomach of ruminants. [L, 41.]

ÆGALE SEPIARIA (Lat.), n. f. E^{2}g′(a^3′e^{2}g)-a^{2}l(a^{3}l)-e(a). A laxative durantiaceous plant found in Japan. [Waring (L, 63).]

ÆGEIRINON (Lat.), n. n. E^{2}j(a^3-e^{2}g)-i(a)′ri^{2}n-o^{2}n. See Ægirinon.

ÆGEIROS (Lat.), n. f. E^{2}j(a^3-e^{2}g)-i(a)′ro^{2}s. Gr., αἴγειρος. The black poplar. [A, 248.] See Populus *nigra*.

ÆGERITEI (Lat.), n. m. pl. E^{2}j(a^3-e^{2}g)-e^2-ri^{2}t′e(e^2)-i(e). Fr., *œgérites*. In the old classifications of *Fungi*, a tribe of the *Gasteromycetes*, sub-order *Trichodermacei*. [B, 48.]

AEGERTLING (Ger.), n. A'ge^{2}rt-li^{2}ng. A mushroom, or agaric. [L, 30.]

ÆGIAS (Lat.), n. f. E'(a^3'e^2)-ji^2(gi^2)-a^{2}s(a^{3}s). Gen., *ægi'ados.* Gr., αἰγιάς. An ancient term for a spot or speck on the eye. [Hippocrates (A, 311).]

ÆGICERACEÆ (Lat.), n. f. pl. E^{2}j(a^3-e^{2}g)-i^2-se^2(ke^2)-ra(ra^3)'-se^2(ke^2)-e(a^3-e^2). A natural order of plants, established by Blume, consisting of the single genus *Ægiceras*, which is included by most writers in the order *Myrsinaceæ.* [B, 19.] It is distinguished from the latter by the seeds being exalbuminous. [B, 7.]

ÆGICERAS (Lat.), n. n. E^{2}j(a^3-e^{2}g)-i^2'se^2(ke^2)-ra^{2}s(ra^{3}s). Gen., *ægicer'atos.* From αἴξ (gen., αἰγός), a goat, and κέρας, a horn. Fr., *ægicère.* A genus of trees, of the natural order *Myrsinaceæ* (or of the *Ægiceraceæ* according to Blume), growing in tropical India and Australia. [B, 7, 19.]

ÆGIDION (Lat.), n. n. E^{2}g(a^3-e^{2}g)-i^{2}d'i^2-o^{2}n. Gr., αἰγίδιον (dim. of αἴξ, a goat). The name of an ancient collyrium, said to have been so called on account of the prevalence of eye troubles in goats. [L, 53, 104.]

ÆGILOPICAL, adj. E^{2}j-i^{2}l-o^{2}p'i^{2}k-a^{2}l. Pertaining to or affected with ægilops (*q. v.*). [L, 46.]

ÆGILOPINÉ (Fr.), adj. A-zhil-o-pe-na. Resembling the botanical genus *Ægilops.* [L, 109.]

ÆGILOPINEÆ (Lat.), n. f. pl. E^{2}j(a^3-e^{2}g)-i^{2}l-o-pi^{2}n'e^2-e(a^3-e^2). Fr., *ægilopinées.* A tribe of gramineous plants, the sole genus of which is the *Ægilops.* [L, 41.]

ÆGILOPIUM (Lat.), n. n. E^{2}j(a^3-e^{2}g)-i^{2}l-o'pi^2-u^{3}m(u^{4}m). See ÆGILOPS.

ÆGILOPS (Lat.), n. f. E^{2}j'(a^3'e^{2}g)-i^{2}l-o^{2}ps. Gen., *ægilo'pos (-pis).* Gr., αἰγίλωψ (from αἴξ, a goat, and ὤψ, the eye). Fr., *égilops* (1st def.), *égilope* (2d def.). Ger., *Ziegenauge* (1st def.), *Hasengras* (2d def.). 1. An old term for a lachrymal abscess that has opened externally. [F; L, 43.] 2. Hard-grass; a genus of grasses allied to wheat, supposed by some to be the original from which the latter has been developed. [B, 19; L, 46.]

ÆGINETIA (Lat.), n. f. E^{2}j(a^3-e^{2}g)-i^{2}n-e(a)'shi^2(ti^2)-a^3. Fr., *æginétie.* A genus of orobanchaceous plants, named in honor of Paulus Æginetus. [B. 19; L, 41, 73.]—**Æ. indica.** Prepared with sugar and nutmeg, this species is used in Malabar as an antiscorbutic, under the name of *isjem-cumula.* [B, 19; A. A. Black (L, 67), L, 105.]

ÆGINIDÆ (Lat.), n. f. pl. E^{2}j(a^3-e^{2}g)-i^{2}n'i^{2}d-e(a^3-e^2). A family of *Hydrozoa*, of the order *Narcomedusæ.* [E. R. Lankester (B, 77).]

ÆGIPHILA (Lat.), n. f. E^{2}j(a^3-e^{2}g)-i^{2}f'i^{2}l-a^3. From αἴξ, a goat, and φίλος, fond of. Fr., *ægiphile, bois de Cabri.* Ger., *Ziegenstrauch.* A genus of South American verbenaceous plants; the leaves are applied to the bites of poisonous serpents. [A, 315; L, 41.]

ÆGIPHILEÆ (Lat.), n. f. pl. E^{2}j(a^3-e^{2}g)-i^2-fl^{2}i'e^2-e(a^3-e^2). Fr., *ægiphilées.* Ger., *Ziegenbäumchen.* A sub-order of verbenaceous plants. [L, 41, 64.]

ÆGIRINON (Lat.), n. n. E^{2}j(a^3-e^{2}g)-i^2'ri^{2}n-o^{2}n. Gr., αἰγείρινον (from αἴγειρος, the black poplar). An ancient ointment made from the fruit or flower of the poplar. [L, 53, 104.]

ÆGIS (Lat.), n. f. E'(a^3'e^2)-ji^{2}s(gi^{2}s). Gen., *æ'gidis.* See ÆGIAS.

ÆGLE (Lat.), n. f. E'(a^3'e^2)-gle(gla). Gen., *æg'les.* From Αἴγλη, one of the Hesperides. A genus of plants of the sub-order *Aurantieæ*, of the order *Rutaceæ;* distinguished from the genus *Citrus* by its many discrete stamens. [B, 7, 19.]—**A. marmelos** [Correa]. Ger., *Schleimapfelbaum.* Syn.: *Cratæva marmelos* [Linnæus] (seu *religiosa* [Ainslie]). An East Indian species, bearing the fruit known as *bhel, bael,* or Bengal quince. [B, 33; L, 65, 110.] See BELÆ *fructus.*

ÆGLIA [Lat.], n. f. E^{2}g'(a^3'e^{2}g)-li^2-a^3. See ÆGIAS.

ÆGOBRONCHOPHONY, n. E''go-bro^{2}n^2-ko^{2}f'o-ni^2. Lat., *ægobronchophonia* (from αἴξ, a goat, βρόγχια, the bronchial tubes, and φωνή, the sound of the voice). See ÆGOPHONY.

ÆGOCERAS (Lat.), n. n. E^{2}g(a^3-e^{2}g)-o^{2}s(o^{2}k)'e^{2}r-a^{2}s(a^{3}s). Gen., *ægocer'atos.* Gr., αἰγοκέρας (from αἴξ, a goat, and κέρας, a horn). Ger., *Ziegenhorn, griechische Heu.* Syn.: *fœnum græcum* [Galen (A, 311)]. The common fenugreek (*Trigonella fœnum græcum*). [A, 248; L, 50.]

ÆGOLETHRON, ÆGOLETHROS (Lat.), n's n. and m. E^{2}g-(a^3-e^{2}g)-o^{2}l'e^{2}th-ro^{2}n, -ro^{2}s. Gr., αἰγόλεθρον, αἰγόλεθρος (from αἴξ, a goat, and ὄλεθρος, death). Fr., *ægoléthron.* Ger., *Ziegentod, Ziegenpest.* Goat's-bane; an old term for the *Azalea pontica* and the *Ranunculus flammula.* [A, 248, 311; L, 50, 103.]

ÆGONICHON (Lat.), n. n. E^{2}g(a^3-e^{2}g)-o^{2}n'i^{2}k(i^{2}ch^2)-o^{2}n. From αἴξ, a goat, and ὄνυξ, a hoof. The *Lithospermum officinale.* [L, 58, 109.]

ÆGONY, n. E^{2}g'o-ni^2. Lat., *ægonia.* See ÆGOPHONY.

ÆGONYCHON (Lat.), n. n. E^{2}g(a^3-e^{2}g)-o^{2}n'i^{2}k(u^{6}ch^2)-o^{2}n. See ÆGONICHON.

ÆGOOR, n. A bitter, astringent substance used in India as an antidote to poisons. [L, 63.]

ÆGOPHONIC, adj. E^{2}g-o-fo^{2}n'i^{2}k. Lat., *ægophonicus.* Fr., *égophonique.* Ger., *ägophonisch.* Pertaining to ægophony. [L.]

ÆGOPHONY, n. E-go^{2}f'o-ni^2. Lat., *ægophonia* (from αἴξ, a goat, and φωνή, the sound of the voice). Fr., *égophonie, voix de chevre* (ou *de polichinelle*) [Laennec]. Ger., *Aegophonie, Meckerton.* It., Sp., *egofonia.* A morbid modification of the sound of the voice as heard on auscultation, of a tremulous character supposed to resemble that of the bleating of a goat; heard in cases of pleurisy with effusion and in certain cases of pneumonia complicated with pleurisy. Some writers distinguish *ægony* (*ægobronchophony*) as intermediate between æ. and bronchophony (*q. v.*). [A, 314, 321, 322; D, 26; L, 50.]

ÆGOPODIUM (Lat.), n. n. E^{2}g(a^3-e^{2}g)-o-po'di^2-u^{3}m(u^{4}m). From αἴξ, a goat, and πόδιον, dim. of πούς, a foot. Fr., *ægopode, herbe aux goutteux.* Gout-weed; a genus of umbelliferous plants. [L, 37, 41, 63, 103.]—**Æ. podagraria.** Fr., *boucage.* Ger., *Geissfuss.* Syn.: *Ligusticum podagraria.* The common gout-weed, gout-wort, ash-weed, herb-Gerard, or English masterwort. [L, 67, 105, 110.]

ÆGOPROSOPHON, ÆGOPROSOPON (Lat.), n's n. E^{2}g-(a^3-e^{2}g)-o-pro-so'fo^{2}n, -so'po^{2}n. From αἰγοπρόσωπος, goat-faced. See ÆGIDION.

ÆGOTOXICUM (Lat.), n. n. E^{2}g(a^3-e^{2}g)-o-to^{2}x'i^{2}k-u^{3}m(u^{4}m). From αἴξ, a goat, and τοξικόν, a poison. A genus of euphorbiaceous (or, as recently classed, monimiaceous) plants. [Black (L, 67).]

ÆGRIPPA (Lat.), n. m. E^{2}g(a^3-e^{2}g)-ri^{2}p'pa^3. See AGRIPPA.

ÆGRITUDO (Lat.), n. f. E^{2}g(a^3-e^{2}g)-ri^2-tu^2(tu)'do. Gen., *ægritu'dinis.* Sickness, whether bodily or mental. [A, 312; L, 58.]—**Æ. bovina.** A disease of cattle, most common in Arabia, due to the lodgment of a worm (supposed by some to be a *Dracunculus*) under the skin. [L, 104.]—**Æ. ventriculi.** Nausea. [L, 83.]

ÆGROTAT, n. E-gro'ta^{2}t. Third pers. sing. pres. indic. of the verb *ægrotare*, meaning *he is sick;* the name applied in the English universities to a medical certificate setting forth that a student is sick and unable to pursue his studies. [L, 56.]

ÆGROTATIO (Lat.), n. f. E^{2}g(a^3-e^{2}g)-ro-ta(ta^3)'shi^2(ti^2)-o. Gen., *ægrotatio'nis.* From *ægrotare*, to be sick. Sickness. [L, 58.]

ÆGROTUS (Lat.), adj. E^{2}g(a^3-e^{2}g)-ro'tu^{3}s(tu^{4}s). Sick, diseased. [L, 58.]

ÆGYLOPS (Lat.), n. f. E^{2}g'(a^3'e^{2}g)-i^{2}l(u^{6}l)-o^{2}ps. See ÆGILOPS.

ÆGYPTENKRAUT (Ger.), n. A-gu^{6}pt'e^{2}n-kra^3-ut. The *Melilotus cærulea.* [A, 305.]

ÆGYPTIA (Lat.), n. n., pl. of *ægyption.* E(a^3-e^2)-ji^{2}p(gu^{6}p)'-shi^2(ti^2)-a^3. See ÆGYPTIACUM.

ÆGYPTIACUM (Lat.), n. n. E(a^3-e^2)-ji^{2}p(gu^{6}p)-ti(te)'a^3-ku^{3}m-(ku^{4}m). Gr., αἰγυπτιακόν. Fr., *égyptiac.* Ger., *ägyptische Mittel.* An ancient term for a number of pharmaceutical preparations, chiefly preparations of copper and other detergents and styptics, especially the *unguentum æ.* (Fr., *onguent égyptiac;* Ger., *ägyptische Salbe, ägyptischer Honig.*) [A, 305, 322, 323, 325; L, 43.] See *Oxymel* ÆRUGINIS.

ÆGYPTION (Lat.), n. n. E(a^3-e^2)-ji^{2}p(gu^{6}p)'shi^2(ti^2)-o^{2}n. See ÆGYPTIACUM.

ÆHAL, ÆHALAGUAS, n's. Ceylon names for the *Cassia fistula.* [L, 105.]

AEHATSWEIDE (Ger.), n. A'ha^{3}ts-vi-de^2. The *Salix viminalis.* [D.]

AEHNLICHKEIT (Ger.), n. An'li^{2}ch^2-kit. Similitude, analogy, affinity. [L, 46, 80.]—**A'smittelpunkt.** See CENTRE *of similitude.*

AEHNLICHMACHUNG (Ger.), n. An'li^{2}ch^2-ma^{3}ch^2-ung. Assimilation. [A, 305.]

AEHRCHEN (Ger.), n. Ar'ch^{2}e^{2}n. A spikelet. [B.]

AEHRE (Ger.), n. Ar'e^2. An ear of corn; in botany, a spike. [B.]—**A'n-Ehrenkraut.** The *Veronica spicata.* [L, 88.]—**A'n-farren.** 1. A species of fern. See STACHIOPTERIDES. 2. The *Lycopodium clavatum.* 3. The *Ophioglossum vulgatum.* [A, 315.]—**A'nförmig.** In the form of ears or spikes; spiked. [A, 305; L, 43.]—**A'nhabend.** Spiked. [A, 305.]—**A'nfrucht.** Grain. [L, 46.]—**A'nreich.** Spicate, abounding in spikes. [A, 305; L, 46.]—**A'nspitze.** See AWN. The *Lythrum salicaria.* [A, 315.]

AEICHRYSON (Lat.), n. n. A(a^3)-i(a)-kri(kru^6)'so^{2}n. A crassulaceous plant; emetic, cathartic, and vesicant. [L, 104.]

AEIDES (Lat.), adj. A(a^3)-i(a)'dez(de^{2}s). Gr., ἀειδής. Deformed. [L, 53.]

AEIDIA (Lat.), n. f. A(a^3)-i'(e^2'i^2)-di^2-a^3. Gr., ἀειδία. A deformity.

AEIGLEUCES, AEIGLUCES, AEIGLUCIS (Lat.), n's n. and f. A(a^3)-i-(e^2-i^2)-glu^2'ses(ke^{2}s), -glu^2(glu)'ses(ke^{2}s), -sis. Gr., ἀειγλευκές (from ἀεί, always, and γλεῦκος, must). Ancient names for a kind of sweet wine. [L, 53.]

AEIPATHIA (Lat.), n. f. A(a^3)-i(a)-pa^{2}th(pa^{3}th)'i^2-a^3. Gr., ἀειπαθεία (from ἀειπαθής, ever-suffering). 1. Relative health (according to an old doctrine that there never could be perfect health, inasmuch as the germs of disease were constantly present in the system). [Galen (A, 322).] 2. Enduring (incurable) disease; a state of constant suffering. [A, 322.]

AEITHALIS (Lat.), n. f. A(a^3)-i(a)'tha^{2}l(tha^{3}l)-i^{2}s. From ἀειθαλής, evergreen. An old name for the *Sedum majus* (*q. v.*). [L, 97.]

AEIZOON (Lat.), n. n. A(a^3)-i(a)-zo'o^{2}n. Gr., ἀείζωον. See SEMPERVIVUM.

ÆLISPHACOS, n. An Arabian name for the *Salvia officinalis.* [L, 109.]

ÆLUROPE (Fr.), n. A-lu^6-rop. From αἴλουρος, a cat, and πούς, a foot. The plant cat's-foot. [L, 109.] See GNAPHALIUM *dioicum.*

ÆLUROPSIS (Lat.), n. f. E^{2}l(a^3-e^{2}l)-u^2(u)-ro^{2}p'si^{2}s. Gen., *ælurop'seos.* From αἴλουρος, a cat, and ὄψις, appearance. Fr., *œil de chat.* Ger., *Katzenauge.* It., *occhio di gatto.* Sp., *ojo de gato.* Cat's-eye; a peculiarity of the Mongol race, due to obliquity of the interpalpebral aperture. [F.] See also *Cat's*-EYE.

ÆNANTHE, ÆNANTHERA (Lat.), n's f. See ŒNANTHE and ŒNANTHERA.

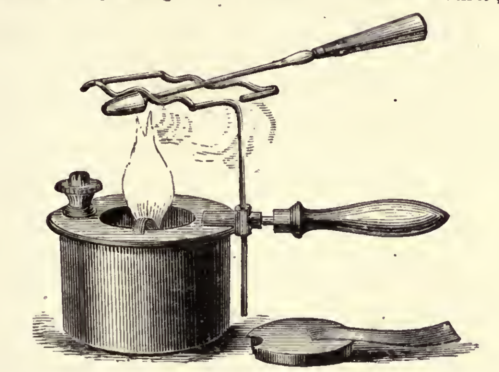
ÆNAS (Lat.), n. m. See ŒNAS.

AENCEPHALUS (Lat.), adj. See ANENCEPHALUS.

ÆNEA (Lat.), n. f. E′(a^3′e^2)-ne^2-a^3. From *æneus*, made of copper or bronze. An old term for a catheter. [L, 104.]

ÆNEUS (Lat.), n. m. E′(a^3′e^2)-ne^2-u^{3}s(u^{4}s). See ÆNEA.

ÆNOTHIONIC, adj. See ŒNOTHIONIC.



ÆODŒOTOMIA (Lat.), n. f. E(a^3-e^2)-o-de(doi)-o-to′mi^2-a^3. See ÆDŒOTOMY.

ÆOLANTHUS (Lat.), n. m. E(a^3-e^2)-o-la^{2}n(la^{3}n)′thu^{3}s(thu^{4}s). Fr., *æolanthe*. A genus of labiate plants. [L, 41.]—**Æ. suavis.** A Brazilian plant, used as a diuretic. [L, 63.]

ÆOLECTHYMA (Lat.), n. n. E(a^3-e^2)-o^{2}l-e^{2}k-thi(thu^6)′ma^3. Gen., *æolecthym′atos*. From αἰόλος, variegated, speckled, and ἔκθυμα, a pustule. An old term for small-pox. [L, 50.]

ÆOLECTHYMATICUS (Lat.), adj. E(a^3-e^2)-o^{2}l-e^{2}k-thi^{2}m-(thu^{6}m)-a^{2}t(a^{3}t)′i^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with small-pox. [L, 50.]

ÆOLIPYLE, n. E-o^{2}l′i^2-pil. From αἰόλος, windy, and πύλη, a narrow passage. Fr., *éolipyle*. A peculiar form of spirit-lamp used for heating cautery-irons. A tight receptacle containing alcohol is heated by setting fire to a little free alcohol beneath it; this

causes the vapor from the contained alcohol to escape from a narrow orifice under great pressure; it takes fire and is projected forcibly in a stream against the article to be heated. [A, 321; L.]

ÆOLLION (Lat.), n. n. E(a^3-e^2)-o^{2}l′li^2-o^{2}n. Varicella. [Plouquet (A, 322).]

ÆOLOCRENE (Lat.), n. f. E(a^3-e^2)-o-lo-kre(kra)′ne(na). From αἰόλος, windy, and κρήνη, a spring. Ger., *Aeolsbrunnen, Windbrunnen, Waldquelle.* One of the springs at Marienbad, so called from the efficiency of its waters in expelling wind. [A, 322.] See MARIENBAD.

ÆOLODERMUS (Lat.), adj. E(a^3-e^2)-o-lo-du^{5}rm(de^{2}rm)′u^{3}s-(u^{4}s). Gr., αἰολόδερμος. Having a variegated skin, as in urticaria. [L, 50.]

AEOLSBRUNNEN (Ger.), n. A′o^{2}lz-brun-ne^{2}n. See ÆOLOCRENE.

ÆON (Lat.), n. m. and f. E′(a^3′e^2)-o^{2}n. Gen., *æo′nos*. Gr., αἰών. 1. A life-time; one's time of life. 2. The spinal cord. [A, 311.]

ÆONESIS (Lat.), n. f. E(a^3-e^2)-o^{2}n-e(a)′si^{2}s. Gen., *æone′seos*. Gr., αἰόνησις. A fomenting. [Hippocrates (A, 311).]

ÆONION, ÆONIUM (Lat.), n's n. E(a^3-e^2)-o′ni^{2}o^{2}n, -u^{3}m-(u^{4}m). From αἰώνιος, everlasting. A genus of crassulaceous plants. [L, 64.] Cf. SEDUM and SEMPERVIVUM.

ÆORA (Lat.), n. f. E(a^3-e^2)-o′ra^3. Gr., αἰώρα. 1. A suspension apparatus for swinging the body. [A, 311.] 2. Passive exercise, as by swinging in a hammock, being carried in a litter, sailing, driving, etc. [L, 104.]

AEPFEL (Ger.), n., pl. of *Apfel*, an apple. Ap′fe^{2}l.—**A′baum.** See PYRUS *malus*.—**A′eisentinctur.** See *Tinctura* FERRI *pomata*.—**A′mark.** Apple must. [L, 80.]—**A′most.** Cider. [L.]—**A′säure.** See the major list.—**A′wein.** Cider.

AEPFELSÄURE (Ger.), n. Ap′fe^{2}l-zoi-re^2. Malic acid. [B.]—**Brenzliche A.** Maleic acid. [L, 52.]

AEPPICH (Ger.), n. See EPPICH.

ÆQUABILITER (Lat.), adv. E^{2}k(a^3-e^{2}k)-wa^3-bi^{2}l′i^{2}t-u^{5}r(e^{2}r). Equably, uniformly. [L, 58.] See PELVIS *æ. justo major* and PELVIS *æ. justo minor*.

ÆQUALIS (Lat.), adj. E(a^3-e^2)-kwa(kwa^3)′li^{2}s. Gr., ἴσος, ὁμαλός. Ger., *gleich, gleichmässig*. Equable, homogeneous. [A, 322.] See PULSUS *æqualis* and PUS *æquale*.

ÆQUATOR OCULI (Lat.), n. m. E(a^3-e^2)-kwa(kwa^3)′to^{2}r(tor). Gen., *æquato′ris*. From *æquare*, to make equal to. Fr., *équateur de l'œil*. Ger., *Aequator des Auges*. It., *equatore dell' occhio*. Sp., *ecuador del ojo*. That circumference of the eyeball which bounds its central transverse vertical plane; practically, that portion of the circumference of the globe which lies just behind the ciliary region. [F.]

ÆQUATORIAL, adj. See EQUATORIAL.

AEQUILIBRIOMETHODE, AEQUILIBRIRMETHODE (Ger.), n's. A-kwi^{2}l-i^{2}b′ri^2-o-ma-to″de^2. -rer′ma-to″de^2. Mjsisovics's method of treating fractures of the femur by suspension and extension. [L, 57.]

ÆQUILIBRIUM (Lat.), n. n. E^{2}k(a^3-e^{2}k)-wi^2-li^{2}b′ri^2-u^{3}m(u^{4}m). See EQUILIBRIUM.

ÆQUIMANUS (Lat.), adj. E(a^3-e^2)-kwi^{2}m′a^{3}n-u^{3}s(u^{4}s). From *æquus*, equal, and *manus*, the hand. See AMBIDEXTROUS.

AEQUINOCTIALBLUMEN (Ger.), n. pl. A-kwi^{2}n-o^{2}k-ti^2-a^{3}l′blu″me^{2}n. Flowers that open at stated hours. [L, 46.]

AEQUIVALENT (Ger.), adj. A-kwi^{2}f-a^{3}l-e^{2}nt′. See EQUIVALENT.

ÆQUIVALVIS (Lat.), adj. E^{2}k(a^3-e^{2}k)-wi^2-va^{2}l(wa^{3}l)′vi^{2}s(wi^{2}s). See EQUIVALVE.

ÆQUIVOCUS (Lat.), adj. E^{2}k(a^3-e^{2}k)-kwi^2(kwe)′vo(wo)-ku^{3}s-(ku^{4}s). From *æquus*, equal, and *vocare*, to call. Gr., ὁμώνυμος. Fr., *équivoque*. Ger., *gleichnamig*. Equivocal, ambiguous. [A, 322.]—**Generatio æquivoca.** See *Spontaneous* GENERATION.

ÆQUORIDÆ (Lat.), n. f. pl. E^{2}k(a^3-e^{2}k)-wo^{2}r-i(e)′de(da^3-e^2). A family of *Hydrozoa*, of the order *Calyptoblastea* (*Leptomedusæ*). [E. R. Lankester (B, 77).]

AER (Lat.), n. m. A(a^3)′u^{5}r(e^{2}r). Gen., *a′eris*. Gr., ἀήρ, air. 1. Air or gas. 2. An oil or tincture. [Paracelsus (H).]—**A. dephlogisticatus.** Dephlogisticated air; oxygen. [B, 97.]—**A. factitius.** The air inherent in a body and extracted only by the destruction of the latter or by means of the air-pump. [L, 51.]—**A. fixus.** See the major list.—**A. ingenitus, A. innatus.** The air contained in the tympanic cavity. [L, 51.]—**A. mephiticus.** Mephitic air; carbon dioxide. [B, 97.]—**A. perflabilis.** The open air. [L, 73.]—**A. purus.** Oxygen. [B, 97.]—**A. vitalis.** Vital air; oxygen. [B, 97.]

ÆRA (Lat.), n. f. E(a^3-e^2)′ra^3. From αἶρα, darnel. See LOLIUM.

AERÆMOTOXIA (Lat.), n. f. A(a^3)-u^{3}r(e^{2}r)em(a^3-e^{2}m)-o-to^{2}x′-i^2-a^3. From ἀήρ, air, αἷμα, blood, and τοξικόν, poison. Fr., *aérhémotoxie*. It., *aerematossia*. Syn.: *aerhæmotoxia, aerhæmoctonia*. The morbid condition produced by the introduction of air into the veins. [L, 41, 50.] See *Air* EMBOLISM.

AÉRAGE (Fr.), n. A^3-a-ra^{3}zh. Aeration. [J; L, 42.]

AERANTHES, AERANTHUS (Lat.), n's f. A(a^3)-u^{5}r(e^{2}r)-a^{2}n(a^{3}n)′thez(the^{2}s), -thu^{3}s(thu^{4}s). From ἀήρ, air, and ανθος, a flower. A genus of epiphytal orchids established by Lindley. [B, 19; L, 64.]

AËRAT (Ger.), n. A^3-a-ra^{3}t′. Carbonic-acid water. [A.] See *Aqua* ACIDI CARBONICI.

AERATE, v. tr. A′e^{2}r-at. From *aer*, air. Fr., *aérer*. Ger., *auslüften*. It., *aerificare*. 1. To supply with air, especially new or fresh air; to ventilate. 2. To charge with gas, especially carbon dioxide; to expose to the action of carbon dioxide. 3. To arterialize; first used in this sense by Erasmus Darwin (1794). [B; J; L, 56.]

AERATED, p. p. of *aerate*. A′e^{2}ra-te^{2}d. Lat., *aeratus*. Fr., *aéré*. It., *aerato*. 1. Furnished with air or gas; ventilated. 2. Arterialized. [B.] See also *A.* WATERS.

AERATING, adj. A′e^{2}r-a-ti^{2}ng. Syn.: *respiratory*. Of or pertaining to aeration or respiration (e. g., *a. organs*). [J.]

AERATIO (Lat.), n. f. A(a^3)-u^{5}r(e^{2}r)-a(a^3)′she(ti^2)-o. Gen., *aeratio′nis*. For deriv., see AER. See AEROSIS and AERATION.

AERATION, n. A-e^{2}r-a′shu^{3}n. Lat., *aeratio*. Fr., *aération, aérage*. Ger., *Auslüftung, Lüftung*. It., *sciorinamento* (1st def.). Syn.: *ventilation* (1st def.); *hæmatosis* (3d def.). 1. The act or process of supplying with air; especially the act of supplying with pure air and removing that which is vitiated. 2. The operation of combining with gas, especially with carbon dioxide. 3. Arterialization. [B; J; L, 56.]

AERATOR, n. A′u^{5}r-a-to^{2}r. For deriv., see AERATE. An apparatus for making aerated waters. [L, 63.]

ÆRATUS (Lat.), adj. E(a^3-e^2)-ra(ra^3)′tu^{3}s(tu^{4}s). For deriv., see ÆS. Made of brass or copper. [L.]

AERATUS (Lat.), adj. A(a^3)-e^{2}r-a(a^3)′tu^{3}s(tu^{4}s). Aerated. [L.]

AEREAL, adj. A-e′re-a^{2}l. See AERIAL.

AERELATEROMETER, n. A‴e^{2}r-e^{2}l-a^{2}t″e^{2}r-o^{2}m′e^{2}t-u^{3}r. Lat., *Aerelaterometrum*. Fr., *aérélatéromètre*. Ger., *Gaselaterometer, Luftelasticitätsmesser*. See ELATEROMETER.

AERENDOCARDIA (Lat.), n. f. A(a^3)-e^{2}r-e^{2}n-do-ka^{3}r′di^2-a^3. From ἀήρ, air, ἔνδον, within, and καρδία, the heart. The state or condition in which there is air in the cavity of the heart or in the endocardium. [L, 45, 63.]

AÉRENTÉRASIQUE (Fr.), adj. A^3-ar-e^{2}n-tar-a^{3}z-ek. Flatulent; tympanitic (said of the intestines). [L, 82.]

AERENTERECTASIA (Lat.), n. f. A(a^3)-e^{2}r-e^{2}n-te^{2}r-e^{2}k-taz-(ta^{3}s)′i^2-a^3. From ἀήρ, air, ἔντερον, the intestine, and ἔκτασις, an extension. Fr., *aérentérectasie*. Syn.: *enteraerectasia*. Distension of the intestines with gas; flatulence; tympanites. [L. 50.]

AERENTERECTASIS (Lat.), n. f. A(a^3)-e^{2}r-e^{2}n-te^{2}r-e^{2}k′ta^2-(ta^3)-si^{2}s. Gen., *aerenterectas′eos* (*ec′tasis*). See AERENTERECTASIA.

AÉRER (Fr.), v. tr. A^3-a-ra. To aerate.

AÉRETHMIE (Fr.), n. A^3-a-re^{2}t-me. Emphysema. [L, 41.]

AÉRETHMOPNEUMONIE (Fr.), n. A^3-a-re^{2}t-mo-nu^6-mo-ne. Emphysema beneath the pulmonary pleura. [Piorry (L, 45).]

ÆREUS (Lat.), adj. E′(a^3′a)-re(re^2)-u^{3}s(u^{4}s). For deriv., see ÆS. Pertaining to or resembling copper or brass. Bronzed. [B.] See CUTIS *ærea*.

AEREUS (Lat.), adj. A(a^3)-e(a)′re(re^2)-u^{3}s(u^4). For deriv., see AER. Also written *aerius*. Aerial; containing gas or air (e. g., *cellula aerea*). [B.]

AER FIXUS (Lat.), n. m. Fi^{2}x′u^{3}s(u^{4}s). Gen., *a′eris fix′i*. Fixed air; carbon dioxide. [B, 97.]—**Aqua aeris fixi.** See *Aqua* ACIDI CARBONICI.

AERGERLICHKEIT (Ger.), n. Ar′ge^{2}r-li^{2}ch^2-kit. Fretfulness. [L, 30.]

AERGIA (Lat.), n. f. A(a^3)-u^{5}r(e^{2}r)′ji^2(gi^2)-a^3. Gr., ἀεργία, sluggishness (said of paralytics). [L, 50.]

AERHÆMATOXIA (Lat.), n. f. A(a^3)-er-he^{2}m(ha^3-e^{2}m)-a^{2}t-(a^{3}t)-o^{2}x′i^2-a^3. See AERÆMOTOXIA.

AERHÆMOCTONIA (Lat.), n. f. A(a^3)-u^{5}r(e^{2}r)-hem(ha^3-e^{2}m)-o^{2}k-to′ni^2-a^3. From ἀήρ, air, αἷμα, blood, and κτόνος, a killing. Fr., *aérhémoctonie*. It., *aeremoctonia*. Death produced by the entrance of air into the veins. [L, 49, 63.] Cf. AERÆMOTOXIA and *Air* EMBOLISM.

AERHÆMOTOXIA (Lat.), n. f. A(a^3)-e^{2}r-he^{2}m(ha^3-e^{2}m)-o-to^{2}x′i^2-a^3. See AERÆMOTOXIA.

AERHYDROUS, adj. A-e^{2}r-hi′dru^{3}s. From ἀήρ, air, and ὕδωρ, water. Fr., *aérhydre*. Containing air and water. [L, 56.]

AERIAL, adj. A-e′ri^2-a^{3}l. Gr., ἀέριος, ἀέρινος. Lat., *aerius*, *aereus*. Fr., *aérien*. Ger., *luftig*. It., *aereo*. Sp., *aéreo*, *aeriano*. 1. Of or pertaining to air; consisting of air. 2. Resembling air. 3. Existing in the air, or in contact with air; deriving nourishment from the air. [B; L.] See *A.* ANIMAL, *A.* PLANT, *A.* RESPIRATION, *A.* ROOT, and *A.* VESSEL.—**A. acid.** Fr., *acide aérien*. An old name for carbon dioxide. [B, 7.]

AERICOLOUS, adj. A-e^{2}r-i^{2}k′o^{2}l-u^{3}s. From *aer*, air, and *colere*, to inhabit. Fr., *aéricole*. Living in the air (applied to animals and plants). [L, 42.]

AERIDES (Lat.), n. n. A(a^3)-e^{2}r′i^{2}d-ez(e^{2}s). Gen., *aerid′eos*, *aer′idis*. From ἀήρ, air, because living for a long time when suspended in air. Fr., *aéride*. Sp., *aérida*. A genus of orchids indigenous to the tropics, established by Swartz. [B, 19, 71.]—**A. tæniale.** A species found upon trees in Scythia having long flat roots in shape like a tape-worm. [B, 19.]—**A. tessellatum.** Syn.: *Vanda tessellata* [Loddiges], *Vanda Roxburghii*, *Cymbidium tesselloides* [Roxburgh]. A species indigenous to the East Indies, said to be useful as a remedy in various disorders. [B, 71; L, 63.]

AERIDUCTUS (Lat.), n. m. A(a^3)-e^{2}r-i^2-du^{3}k(du^{4}k)′tu^{3}s(tu^{4}s). Gen., *aeriduc′tus*. One of the gills of fishes, amphibia, etc. [L, 81.] See BRANCHIA.

AÉRIEN (Fr.), adj. and n. A^3-a-re-a^{3}n^2. 1. Aerial. 2. Air-breathing. [J.] 3. In the pl., *a′s*, a section of the *Fungi*, embracing those which spring from the surface of the earth. [L, 41.]

AÉRIER (Fr.), v. tr. A-a-ri^2-a. To aerate. [L.]

AERIFER (Lat.), adj. A^2(a^3)-e^{2}r′i^2-fu^{5}r(fe^{2}r). From *aer*, air, and *ferre*, to bear. See AEROPHOROUS (1st def.).

ÆRIFER (Lat.), adj. E(a^3-e^2)′ri^2-fu^{5}r(fe^{2}r). From *æs*, brass, and *ferre*, to bear. Fr., *ærifère*. Bearing or containing brass or copper. [B; L, 41.]

AÉRIFÈRE (Fr.), adj. A^3-a-re-far. See AEROPHOROUS (1st def.).

ÆRIFÈRE (Fr.), adj. A-re-fe^{2}r. See ÆRIFER.

AERIFEROUS, adj. A-e^{2}r-i^{2}f′e^{2}r-u^{3}s. For deriv., see AERIFER. See AEROPHOROUS (1st def.).

AERIFICATION, n. A-e^{2}r″i^{2}f-i^2-ka′shu^{3}n. Lat., *aerificatio* (from *aer*, air, and *facere*, to make). Fr., *aérification*. Ger., *Verflüchtigung*, *Verdampfung* (1st def.). It., *aerificazione*. Sp., *aerificación*. 1. The act or process of converting a solid or a liquid into the gaseous state. 2. The introduction of air into anything. 3. The state of being filled with air. 4. The state of being aeriform. [L, 41, 53, 56.]—**A. of the lung.** See *Pulmonary* EMPHYSEMA.

AERIFIED, adj. A-e^{2}r′i^2-fīd. Fr., *aérifié*. It., *aerificato*. Sp., *aerificado*. 1. Converted into air or gas. 2. Filled or combined with air. [L.]

AERIFLUXUS (Lat.), n. m. A(a^3)-e^{2}r(ar)-i^2-flu^{3}x(flux)′u^{3}s(u^{4}s). Gen., *aeriflux′us*. For deriv., see AER and FLUXUS. An abnormal discharge of gas from the alimentary canal; flatulence. [L, 45.]

AERIFORM, adj. A-e^{2}r′i^2-fo^{2}rm. Lat., *aeriformis* (from *aer*, air, and *forma*, form). Fr., *aériforme*. Ger., *luftartig*, *luftförmig*. It., Sp., *aeriforme*. Having the form or the nature of air or of a gas. [L, 56.]

AERIFY, v. tr. A-e^{2}r′i^2-fī. From *aer*, air, and *facere*, to make. Fr., *aérifier*, *aériser*. It., *aerificare*. Sp., *aerificar*. 1. To transform to the state of a gas. 2. To infuse or fill with air; to combine with air. [L, 56.]

ÆRINUS (Lat.), adj. E′(a^3′e^2)-ri^2-nu^{3}s(nu^{4}s). For deriv., see ÆRA. Gr., αἴρινος. Of or pertaining to darnel, or *Lolium*. [Pliny (B).]

AERIPERITONIA (Lat.), n. f. A(a^3)-e^{2}r-i^2-pe^{2}r-i^2-to′ni^2-a^3. For deriv., see AER and PERITONÆUM. Fr., *aéripéritonie*. See *Peritoneal* TYMPANITES.

AÉRIQUE (Fr.), adj. A^3-a-rek. Capable of oxidation. [L, 52.]

AÉRISER (Fr.), v. tr. A^3-a-re-za. To aerify. Reflex., *s′a.*, to be converted to the condition of a gas. [L, 41, 109.]

AÉRITES (Fr.), n. pl. A^3-a-ret. Animals which live in the air. [B, 38.]

ÆRITIS (Lat.), n. f. E(a^3-e^2)-ri(re)′ti^{2}s. Gen., *ærit′idis*. See ANAGALLIS.

AERIUS (Lat.), adj. A(a^3)-e^{2}r′i^2-u^{3}s(u^{4}s). Gr., ἀέριος (from ἀήρ, air). Aerial.

AÉRIVORE (Fr.), adj. A^3-ar-e-vor. Living upon air. [L, 41.]

AERMCHEN (Ger.), n. Arm′ch^{2}e^{2}n. A little arm. [L, 30.]

AÉROBE (Fr.), adj. A^3-ar-ob. See AEROBIOTIC (1st def.).

AEROBIA (Lat.), n. n. pl. A(a^3)-e^{2}r-o′bi^2-a^3. See AEROBION.

AEROBIAN, AEROBIC, adj's. A-e^{2}r-o′bi^{2}a^{2}n, -bi^{2}k. See AEROBIOTIC (1st def.).

AEROBION (Lat.), n. n. A(a^3)-e^{2}r-o′bi^2-o^{2}n. From ἀήρ, air, and βίος, life. Fr., *aérobie* [Pasteur]. Ger., *Aërobie*. It., Sp., *aerobio*. 1. A term introduced by Pasteur to designate an organism requiring free oxygen, either in the air, or dissolved in liquid, for respiration. [J, 4, 33.] Cf. ANAEROBION. 2. A genus of orchidaceous plants. See AEROBIUM.

AEROBIOTIC, adj. A″e^{2}r-o-bi-o^{2}t′i^{2}k. Fr., *aérobe* (1st def.), *azymique* (2d def.). Ger., *aërobisch* (1st def.). It., *aerobio* (1st def.). Sp., *aerobio* (1st def.). Syn.: *aerobic* (1st def.). 1. Pertaining to an aerobion, or to respiration or life in the presence of free oxygen; requiring free oxygen for the maintenance of life. 2. Pertaining to something opposed to fermentation. [B; J, 33.]

AEROBIOUS, adj. A-e^{2}r-o′bi^2-u^{3}s. See AEROBIOTIC (1st def.).

AEROBIUM (Lat.), n. n. A(a^3)-e^{2}r-o′bi^2-u^{3}m(u^{4}m). For deriv., see AEROBION. Fr., *aérobion*. Syn.: *aerobion*. A genus of orchids now referred to *Angræcum*. [L, 64.]

AEROCYST, n. A′e^{2}r-o-si^{2}st. From ἀήρ, air, and κύστις, a bladder. Fr., *aérocyste*. One of the air-vesicles of the *Algæ*. [B, 19.]

AERODERMECTASIA (Lat.), n. f. A(a^3)-e^{2}r-o-du^{5}r(de^{2}r)-me^{2}k-ta(ta^3)′zi^2(si^2)-a^3. From ἀήρ, air, δέρμα, the skin, and ἔκτασις, extension. Fr., *aérodermectasie*. See *Surgical* EMPHYSEMA.

AERODENSIMETER, n. A″e^{2}r-o-de^{2}n-si^{2}m′e^{2}t-u^{5}r. For deriv., see AER and DENSIMETER. See MANOMETER.

AERODIAPHANOMETER, n. A‴e^{2}r-o-di″a^2-fa^{2}n-o^{2}m′e^{2}t-u^{5}r. For deriv., see AER and DIAPHANOMETER. Lat., *aerodiaphanometrum*. Fr., *aérodiaphanomètre*. It., *aerodiafanometro*. See DIAPHANOMETER.

AERODIAPHTHORA (Lat.), n. f. A(a^3)-e^{2}r-o-di(de)-a^{2}p(a^{3}p)′-tho-ra^3. From ἀήρ, air, and διαφθορά, corruption. See AEROPHTHORA.

AERODIAPHTHOROSCOPE, n. A‴e^{2}r-o-di″a^{2}p-tho^{2}r′o^{2}s-kop. For deriv., see AERODIAPHTHORA and *-scope*.* Lat., *aerodiaphthoroscopium*. Fr., *aérodiaphthoroscope*. Ger., *Aërodiaphthoroskop*. An apparatus for determining the purity or impurity of the atmosphere. [L, 30.]

AERODUCTOR, n. A″e^{2}r-o-du^{3}k′to^{2}r. From *aer*, air, and *ducere*, to lead. Fr., *aéroductor*. A lever invented by Weidmann for the purpose of keeping the orifice of the vagina open so as to admit air in cases of difficult delivery, especially when the after-coming head is in the vagina and there is danger of asphyxia to the child. [L, 49.]

AERODYNAMIC, adj. A″e^{2}r-o-di-na^{2}m′i^{2}k. For deriv., see AER and DYNAMICS. Fr., *aérodynamique*. Ger., *aërodynamisch*. It., *aerodinamico*. Sp., *aerodinámico*. Of or pertaining to aerodynamics. [L, 56.]

AERODYNAMICS, n. A″e^{2}r-o-di-na^{2}m′i^{2}ks. Lat., *aerodynamice*. Fr., *aérodynamique*. Ger., *Aërodynamik*, *Luftkraftlehre*. It., *aerodinamica*. Sp., *aerodinámica*. That branch of physics which treats of the laws regulating the motion of elastic fluids, of atmospheric pressure, and of the mechanical effects of air in motion. [L, 42, 56.]

AEROENTERECTASIA (Lat.), n. f. A(a^3)-e^{2}r-o-e^{2}n-te^{2}r-e^{2}k-ta(ta^3)′zi^2(si^2)-a^3. Fr., *aéroenterectasie*. See AERENTERECTASIA.

AËROGAMEN (Ger.), n. pl. A^3-e^{2}r-o-ga^{3}m′e^{2}n. Phanerogams (so called because the fertilization of the stigma takes place in the open air). [B, 49.]

AÉROGASTRE (Fr.), adj. A^3-ar-o-ga^{2}str. An epithet applied to certain *Fungi* growing on the surface of the ground. [L, 109.] Cf. AÉRIENS.

AEROGNOSY, n. A-e^{2}r-o^{2}g′no-si^2. From ἀήρ, air, and γνῶσις, knowledge. Lat., *aerognosia*. Fr., *aérognosie*. Sp., *aerognosia*. The science which treats of air and its properties and functions. [L, 56.]

AEROGRAPHER, n. A-e^{2}r-o^{2}g′ra^{2}f-u^{5}r. For deriv., see AEROGRAPHY. Fr., *aerographe*. Ger., *Aerograph*. A writer on the subject of air and its properties. [L, 30.]

AEROGRAPHY, n. A-e^{2}r-o^{2}g′ra^2-fi^2. From ἀήρ, air, and γράφειν, to write. Lat., *aerographia*. Fr., *aérographie*. Ger., *Aërographie*, *Luftbeschreibung*. It., *aerografia*. Sp., *aerografia*. The branch of physics which treats of air and its properties. A treatise on air. [L, 30, 41.]

AÉROHYDRE (Fr.), adj. A^3-ar-o-hedr. Aerhydrous. [L, 109.]

AEROHYDROPATHY, n. A-e^{2}r-o-hi-dro^{2}p′a^{2}th-i^2. For deriv., see AER and HYDROPATHY. Lat., *aerohydropathia*. Fr., *aérohydropathie*. Ger., *Aërohydropathie*. It., *aeroidropatia*. Syn.: *aerydriatrica*, *aerydriasis*. A combination of hydropathic and pneumatic treatment. [L, 50.]

AÉROLE (Fr.), n. A^3-a-rol. A corn. [L, 101.] See CLAVUS.

AEROLEPTYNTER, AEROLEPTYNTERION (Lat.), n's m. and n. A(a^3)-e^{2}r-o-le^{2}p-ti^{2}n(tu^{6}n)′tu^{5}r(te^{2}r), -ti^{2}n(tu^{6}n)-te(ta)′-ri^2-o^{2}n. Gen., *aeroleptynter′os*, *aeroleptynter′ii*. From ἀήρ, air, and λεπτύνειν, to attenuate. An air-pump. [L, 50.]

AEROLOGIA (Lat.), n. f. A(a^3)-e^{2}r-o-lo′ji^2(gi^2)-a^3. See AEROLOGY.

AEROLOGICA (Lat.), n. f. A(a^3)-e^{2}r-o-lo^{2}j(lo^{2}g)′i^2-ka^3. See AEROLOGY.

AEROLOGICAL, adj. A-e^{2}r-o-lo^{2}j′i^{2}k-a^{2}l. For deriv., see

AEROLOGY. Lat., *aerologicus.* Fr., *aérologique.* Ger., *aërologisch.* Sp., *aerólogo.* Of or pertaining to aerology.

AEROLOGICE (Lat.), n. f. A(a^3)-e^{2}r-o-lo^{2}j(log)'i^{2}s(i^{2}k)-e(a). Gen., *aerolog'ices.* Aerology. [L, 50.]

AEROLOGIST, n. A-e^{2}r-o^{2}l'o-ji^{2}st. One who studies aerology. [L, 56.]

AEROLOGY, n. A-e^{2}r-o^{2}l'o-ji^2. From ἀήρ, air, and λόγος (see *-logy**). Lat., *aerologia, aerologica.* Fr., *aérologie.* Ger., *Aërologie, Luftkunde.* It., *aerologia.* Sp., *aerologia.* That branch of science treating of air, especially of air in its relations to salubrity. [L, 50, 108.]

AEROMANCY, n. A'e^{2}r-o-ma^{2}n-si^2. From ἀήρ, air, and μαντεία, prophecy. Lat., *aeromantia.* Fr., *aéromancie.* Ger., *Aëromantie.* It., *aerimanzia.* Sp., *aeromancia.* Divination practiced by observation of the atmosphere and its movements. [B, 48, 93.]

AERO-MECHANICS, n. A''e^{2}r-o-me^{2}k-a^{2}n'i^{2}ks. For deriv., see AER and MECHANICS. Fr., *aéro-méchanique.* Ger., *Aëromechanik.* See PNEUMATICS.

AEROMEL, AEROMELI (Lat.), n's n. A(a^3)-e^{2}r'o^2-me^{2}l, -o^{2}m'e^{2}l-i(e). Gen., *aeromel'lis, aeromell'itos (-is).* From ἀήρ, air, and μέλι, honey. Fr., *aéromel.* It., *aeromele.* See MANNA.

AEROMETER, n. A-e^{2}r-o^{2}m'e^{2}t-u^{6}r. From ἀήρ, air, and μέτρον, a measure. Lat., *aerometron, aerometrum.* Fr., *aéromètre.* Ger., *Aërometer, Luftdichtigkeitsmesser.* It., *aerometro.* Sp., *aerómetro.* An apparatus invented by Marcus Hunt for ascertaining the mean bulk of gases and the density of air. It consists of a glass globe of a capacity of 10 cubic inches communicating with a tube, which has a capacity of 1 cubic inch and is divided into portions of tenths of an inch by a graduated scale. The instrument is placed in a tube full of water and rises or falls in the latter with changes in the pressure of the atmosphere. [L.]

AEROMETRICAL, adj. A-e^{2}r-o-me^{2}t'ri^{2}k-a^{2}l. Fr., *aérométrique.* Ger., *aërometrisch.* Sp., *aerométrico.* Of or pertaining to aerometry. [L.]

AEROMETRY, n. A-e^{2}r-o^{2}m'e^{2}t-ri^2. Lat., *aerometria.* Fr., *aérométrie.* Ger., *Aërometrie, Luftmessen.* It., *aerometria.* Sp., *aerometria.* That branch of physics which treats of the measurement of the density of gases. [L.] See PNEUMATICS.

AEROMICROBION (Lat.), n. n. A(a^3)-e^{2}r-o-mi^{2}k-ro'bi^2-o^{2}n. From ἀήρ, air, μικρός, small, and βίος, life. Ger., *Aëromikrobie.* Lustig's name for any microscopic organism which requires free oxygen for the maintenance of its vitality. ["Ctrlbl. f. d. med. Wissnsch.," June 5, 1885, p. 403 (B).]

AEROMYCA, AEROMYCE (Lat.), n's f. A(a^3)-e^{2}r-o^{2}m'i^{2}k-(u^{6}k)-a^3, -i^{2}s(u^{6}k)-e(a). See AEROMYCES.

AEROMYCES (Lat.), n. f. A(a^3)-e^{2}r-o^{2}m'i^{2}s(u^{6}k)-ez(e^{2}s). Gen., *aeromycet'is.* From ἀήρ, air, and μύκης, a fungus. Ger., *Luftbalgpilz.* A variety of gastromycetous *Fungi.* [L, 50.]

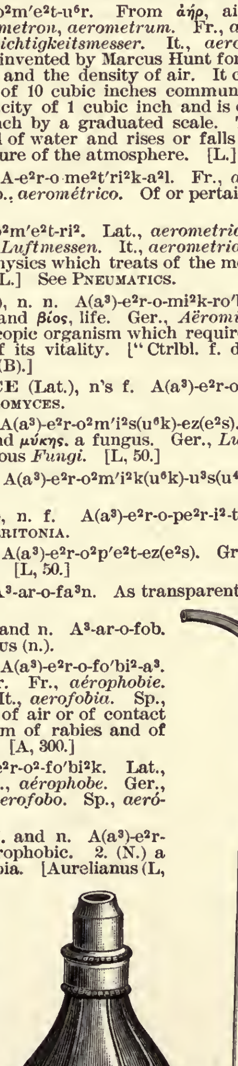
AEROMYCUS (Lat.), n. m. A(a^3)-e^{2}r-o^{2}m'i^{2}k(u^{6}k)-u^{3}s(u^{4}s). See AEROMYCES.

AEROPERITONIA (Lat.), n. f. A(a^3)-e^{2}r-o-pe^{2}r-i^2-to'ni^2-a. Fr., *aéropéritoine.* See AERIPERITONIA.

AEROPETES (Lat.), adj. A(a^3)-e^{2}r-o^{2}p'e^{2}t-ez(e^{2}s). Gr., ἀεροπέτης, flying in the air. Flying. [L, 50.]

AÉROPHANE (Fr.), adj. A^3-ar-o-fa^{3}n. As transparent as air. [L, 41, 101.]

AÉROPHOBE (Fr.), adj. and n. A^3-ar-o-fob. See AEROPHOBIC and AEROPHOBUS (n.).



AEROPHOBIA (Lat.), n. f. A(a^3)-e^{2}r-o-fo'bi^2-a^3. From ἀήρ, air, and φόβος, fear. Fr., *aérophobie.* Ger., *Aërophobie, Luftscheu.* It., *aerofobia.* Sp., *aerofobia.* Aerophoby; dread of air or of contact with air, an occasional symptom of rabies and of some other nervous affections. [A, 300.]

AEROPHOBIC, adj. A-e^{2}r-o^2-fo'bi^{2}k. Lat., *aerophobicus, aerophobus.* Fr., *aérophobe.* Ger., *aërophobisch, luftscheu.* It., *aerofobo.* Sp., *aerófobo.* Afraid of air. [L.]

AEROPHOBUS (Lat.), adj. and n. A(a^3)-e^{2}r-o^{2}f'o^2-bu^{3}s(bu^{4}s). 1. (Adj.) aerophobic. 2. (N.) a patient suffering from aerophobia. [Aurelianus (L, 84).]

AEROPHOBY, n. A^3-e^{2}r-o^{2}f'o^2-bi^2. See AEROPHOBIA.

AEROPHONE, n. A'e^{2}r-o-fon. From ἀήρ, air, and φωνή, sound. Fr., *aérophone.* Ger., *Aërophon.* An apparatus invented by Edison for rendering the voice audible at a great distance. It consists essentially of a speaking-tube in the lower part of which is a telephone-diaphragm which is set into vibration by the voice, and by its vibration opens and shuts a valve in a whistle from which at the same time a sound is produced by a blast of air. The action of the valve impresses upon the loud sound of the whistle the articulate quality of the speaking voice, so that the words uttered by the latter are transmitted with the former. [B, 49.]

GAIRAL'S AÉROPHORE. (AFTER CHARPENTIER.)

AËROPHOR (Ger.), adj. A^3-e^{2}r-o-for. Aerophorous.

AÉROPHORE (Fr.), adj. and n. A^3-ar-o-fo^{3}r. 1. (Adj.) aerophorous. [L.] 2. (N.) a tracheal insufflator invented by Gairal, in 1876, for the resuscitation of still-born children. [A, 15.]

AEROPHOROUS, adj. A-e^{2}r-o^{2}f'o^{2}r-u^{3}s. From ἀήρ, air, and φορεῖν, to bear. Lat., *aerophorus.* Fr., *aérophore, gasifère.* Ger., *aërophor.* It., *aeroforo.* Syn.: *aeriferous* (1st def.). 1. Containing or conducting air. 2. Generating gas; causing effervescence. [B; L.]

AEROPHORUS (Lat.), adj. A(a^3)-e^{2}r-o^{2}f'o^{2}r-u^{3}s(u^{4}s). Aerophorous. [B.] See PULVIS *a.*

AEROPHTHORA (Lat.), n. f. A(a^3)-e^{2}r-o^{2}p'tho^2-ra^3. From ἀήρ, air, and φθορά, corruption. Ger., *Luftverderbniss.* Syn.: *aerodiaphthora.* Impurity of the air. [A.]

AEROPHTHORICUS (Lat.), adj. A(a^3)-e^{2}r-o^{2}p-tho^{2}r'i^{2}k-u^{3}s-(u^{4}s). Produced by, dependent upon, or suffering from, the effects of impure air. [L, 50.]

AÉROPHYSE (Fr.), adj. A^3-ar-o-fes. From ἀήρ, air, and φυσᾶν, to distend. Sp., *aerofiso.* Inflated; distended with air. [L, 52, 98.]

AEROPHYTA (Lat.), n. n. pl. A(a^3)-e^{2}r-o^{2}f'i^{2}t(u^{6}t)-a^3. From ἀήρ, air, and φυτόν, a plant. Fr., *aérophytes.* Ger., *Aërophyten.* It., *aerofiti.* Sp., *aerofitos.* Aerophytes; in the older systems of botanical classification, a cohort of the *Thallogens* comprising the *Lichens.* [B, 34.]

AEROPHYTE, n. A'e^{2}r-o-fit. Lat., *aerophyton.* Fr., *aérophyte.* Ger., *Aërophyt.* It., *aerofito.* Sp., *aerofito.* 1. A plant which lives and grows wholly in the air. See *Aerial* PLANT. In the pl., a's, the *Aerophyta.* 2. A plant formerly supposed to be derived from extra-terrestrial sources, as from meteorites. [B, 19, 48.]

AÉROPLEURIE (Fr.), n. A^3-ar-o-plu^6-re. From ἀήρ, air, and πλευρόν, a rib. See PNEUMOTHORAX.

AEROPNEUMONASIA, AEROPNEUMONECTASIA (Lat.), n's f. A(a^3)-e^{2}r-o^{2}p-nu^2-mo-naz(na^{3}s)'i^2-a^3, -mo-ne^{2}k-taz(ta^{3}s)'-i^2-a^3. From ἀήρ, air, πνεύμων, the lung, and ἔκτασις, distension. Fr., *aéropneumonasie, aéropneumonectasie.* See *Pulmonary* EMPHYSEMA.

AEROPYLE, n. A'e^{2}r-o-pil. From ἀήρ, air, and πύλη, a gate. An opening, of unknown function, existing in the pods of some leguminous plants. [L, 67.]

AERORRHACHIA, AERORRHACHIS (Lat.), n's f. A(a^3)-e^{2}r-o-ra(ra^3)'ki^2(ch^{2}i^2)-a^3, -o^{2}r'ra^{2}k(ra^{3}ch^2)-i^{2}s. Gen., *aerorrhach'iæ, aerorrhach'idis.* Fr., *aérorrhachie.* An accumulation of air in the vertebral canal. [L, 41, 45, 63.]

AEROSCOPE, n. A'e^{2}r-o-skop. From ἀήρ, air, and σκοπεῖν, to observe. Fr., *aéroscope.* Ger., *Aëroskop.* An instrument devised by Pouchet for determining the purity of the air by microscopical examination. [L, 60.]

AEROSCOPY, n. A-e^{2}r-o^{2}s'ko^2-pi^2. Fr., *aéroscopie.* Sp., *aeroscopia.* The observation of the atmosphere to determine its condition. [L, 56.]

ÆROSE, adj. E'ros. Lat., *ærosus* [from *æs* (*q. v.*)]. Made of copper or brass; resembling copper. [L.]

AEROSIS (Lat.), n. f. A(a^3)-e^{2}r-o'si^{2}s. Gen., *aero'seos (-o'sis).* From ἀέρεσθαι, to become air. Ger., *Lüftung, Auslüftung.* Syn.: *aeration* (1st def.). 1. The formation of gas within the body. See PNEUMATOSIS. 2. Refrigeration by a current of air. 3. Attenuation of the blood; an imaginary resolution of the blood into vapor. [A, 305; L, 53, 97.]

AEROSPHERE, n. A'e^{2}r-o-sfer. From ἀήρ, air, and σφαῖρα, a globe. Fr., *aérosphère.* The atmosphere. [L, 56.]

AÉROSTATHMION (Fr.), n. A^3-ar-o-sta^{3}t-me-o^{2}n^2. From ἀήρ, air, and σταθμίον, a weighing. An apparatus invented by Carpi for determining variations in the weight and temperature of the atmosphere. [L, 41.]

AEROSTATIC, adj. A-e^{2}r-o-sta^{2}t'i^{2}k. For deriv., see AEROSTATICS. Fr., *aérostatique.* Ger., *aërostatisch.* It., *aerostatico.* Sp., *aerostático.* Of or pertaining to aerostatics. [L, 56.]

AEROSTATICS, n. A-e^{2}r-o-sta^{2}t'i^{2}ks. For deriv., see AER and STATICS. Lat., *aerostatica, aerostatice.* Fr., *aérostatique.* Ger., *Aërostatik, Luftgleichgewichtslehre.* It., *aerostatica.* Sp., *aerostática.* The science which treats of the conditions of equilibrium of gases. [L, 108.]

AEROTANNITES (Lat.), n. A(a^3)-e^{2}r(ar)-o-tan(ta^{3}n)-ni(ne)'tez(te^{2}s). From ἀήρ, air, and τανύειν, to stretch. Kastner's term for an aeroleptynter (*q. v.*). [L, 50.]

AEROTANYSTER (Lat.), n. m. A(a^3)-e^{2}r-o-ta^{2}n(ta^{3}n)-i^{2}s(u^{6}s)'-tu^{5}r(te^{2}r). Gen., *aerotanyster'os.* See AEROLEPTYNTER.

AEROTHERAPY, n. A-e^{2}r-o-the^{2}r'a^{2}p-i^2. From ἀήρ, air, and θεραπεύειν, to serve. Fr., *aérothérapie.* Ger., *Aërotherapie, pneumatische Therapie.* It., *aeroterapia.* See *Pneumatic* TREATMENT.

AEROTHORAX (Lat.), n. f. A(a^3)-e^{2}r-o-tho'ra^{2}x(ra^{3}x). Gen., *aerothora'cis.* From ἀήρ, air, and θώραξ, the chest. See PNEUMOTHORAX.

AEROTRACTOR, n. A-e^{2}r-o-tra^{2}k'to^{2}r. Deriv., Lat., *aer,* air, and *trahere,* to draw. Ger., *Aërotractor.* See *Air*-TRACTOR.

AEROXEROTES (Lat.), n. A(a^3)-e^{2}r(ar)-o^{2}k-zer(sar)'o-tez(tas). Gen., *aeroxerote'tos (-tis).* From ἀήρ, air, and ξερότης, dryness. Ger., *Lufttrockniss.* Dryness of the air. [L, 50.]

AEROXEROTICUS (Lat.), adj. A(a^3)-e^{2}r-o^{2}x-e^{2}r-o^{2}t'i^{2}k-u^{3}s-(u^{4}s). Pertaining to or produced by dryness of the air. [L, 50.]

AEROZOA (Lat.), n. n. pl. A(a^3)-e^{2}r-o-zo'a^3. From ἀήρ, air, and ζῶον, an animal. Fr., *aérozoés.* Ger., *Aërozoën.* Animals for whose existence air is requisite. [L, 41, 57.]

AERTERIVERSION, n. A-e^{2}r-te^{2}r-i^2-vu^{5}r'zhu^{3}n. From *arteria*, an artery, and *vertere*, to turn. A procedure devised by G. C. E. Weber for constricting the mouths of arteries in amputation-stumps by turning their ends over with the aerteriverter (*q. v.*) like a sleeve. [J. A. Lidell (A, 277).]

AERTERIVERTER, n. A-e^{2}r-te^{2}r-i^2-vu^{6}rt'u^{5}r. G. C. E. Weber's instrument for performing aerteriversion (*q. v.*), consisting of a pair of fine hooks inclosed in a sheath. [E, 4.]

ÆRUA (Lat.), n. f. E'(a^3'e^2)-ru^2(ru)-a^3. From Ar., *êrûâ*. A genus of amaranthaceous plants established by Jussieu. [L, 54.]—**Æ. lanata** [Jussieu]. An East Indian species distinguished by its woolly flowers. Its root (*chaya root*) contains a mucilaginous principle and has been used in strangury. [L, 54, 63.]

ÆRUCA (Lat.), n. f. E(a^3-e^2)-ru^2(ru)'ka^3. The same as ærugo. [Vitruvius (B).]

ÆRUGINATUS (Lat.), adj. E^2(a^3-e^2)-ru^2(ru)-ji^{2}n(gi^{2}n)-a(a^3)'-tu^{3}s(tu^{4}s). For deriv., see ÆRUGO. Containing or made with verdigris. [B, 97.]

ÆRUGINEOUS, adj. E-ru^2-ji^{2}n'e-u^{3}s. See ÆRUGINOUS.

ÆRUGINOUS, adj. E-ru^2'ji^{2}n-u^{3}s. For deriv., see ÆRUGO. Lat., *æruginosus*. Fr., *ærugineux*. Ger., *kupfergrün*, *grünspanfarbig*. Resembling verdigris ; green like verdigris. [L, 50.]

ÆRUGO (Lat.), n. f. E(a^3-e^2)-ru^2(ru)'go. Gen., *æru'ginis*. From *æs*, copper, brass. Fr., *ærugo*. Ger., *Grünspan*, *Kupfergrün*. It., *verderame*. Sp., *cardenillo*. 1. Copper rust ; verdigris. 2. Rust of any kind. [B ; L, 107.]—**Æ. crystallisata, Æ. destillata.** Crystallized acetate of copper. [B.]—**Æ. ferri.** Subcarbonate of iron. [L, 45.]—**Æ. plumbi.** Lead carbonate. [L, 50.]—**Æ. præparata.** Prepared verdigris, used as an escharotic. [B, 97.]—**Ceratum æruginis** [Russ. Ph., Ger. Ph. (1st ed.)]. Syn. : *emplastrum æruginis* [Belg. Ph. (1853)], *emplastrum viride* [Swiss Ph.]. A cerate of dark-green color containing about 4·5 per cent. [Belg. Ph., Russ. Ph., Ger. Ph. (1st ed.)] or 8·5 per cent. [Swiss Ph.] of verdigris mixed with yellow wax, pine resin, and either ordinary turpentine or larch turpentine, and in the Belg. Ph. with olive oil also. [B, 95.]—**Colica æruginis.** See *Copper* COLIC.—**Emplastrum æruginis.** See *Ceratum æruginis.*—**Linimentum æruginis** [Lond. Ph. (1824)]. Syn. : *mel ægyptiacum*. A preparation formerly employed as a topical stimulant, consisting of 1 part of verdigris dissolved in 7 parts of vinegar and boiled with 14 of honey. [B, 97.]—**Liquor æruginis.** A solution of 3 dr. each of the subacetate of copper and of the sulphates of copper and of zinc in enough water to make 8 oz. Used as an astringent application to wounds. [B, 97.]—**Oxymel æruginis** [Dubl. Ph. (1830)]. See *Linimentum æruginis.*—**Spiritus æruginis.** Syn. : *spiritus Veneris*. A name formerly applied to glacial acetic acid obtained by the distillation of crystallized acetate of copper. [B.]—**Unguentum æruginis.** 1. See *Linimentum æruginis*. 2. A preparation of the Dubl. Ph. (1830), consisting of prepared verdigris ½ oz. mixed with ointment of white wax 1 lb. The *unguentum subacetatis cupri* [Ed. Ph. (1826)] was made with 1 part of verdigris and 15 parts of resin ointment. Other preparations known as *unguentum cupratum* seu *viride*, and *unguentum acetatis cupri*, were formerly official. [B, 97.] Cf. *ceratum æruginis*.

ÆRUMNA (Lat.), n. f. E(a^3-e^2)-ru^{3}m(rum)'na^3. Distress, misery ; especially mental distress. [L, 50.]

ÆRUMNALE (Lat.), n. n. E^{2}r(a^3-e^{2}r)-u^{3}m(u^{4}m)-na(na^3)'le(la). A leathern girdle for moving a patient with a broken leg from one bed to another. [L, 50.]

ÆRUMNOSUS (Lat.), adj. E(a^3-e^2)-ru^{3}m(ru^{4}m)-no'su^{3}s(su^{4}s). Oppressed with misfortune, distressed ; melancholic. [L, 50.]

ÆRVA (Lat.), n. f. E^{2}r'(a^3'e^{2}r)-va^3(wa^3). See ÆRUA.

AERYDRIASIS (Lat.), n. f. A(a^3)-e^{2}r-i^{2}d(u^{6}d)-ri^2-a(a^3)'si^{2}s. Gen., *aerydrias'eos* (*-a'sis*). From ἀήρ, air, and ὕδωρ, water. See AEROHYDROPATHIA.

AERYDRIATRICA (Lat.), n. f. A(a^3)-e^{2}r-i^{2}d(u^{6}d)-ri^2-a^{2}t(a^{3}t)'-ri^2-ka^3. From ἀήρ, air, ὕδωρ, water, and ἰατρική, the art of healing. See AEROHYDROPATHIA.

AERYDROPATHIA (Lat.), n. f. A(a^3)-e^{2}r-i^{2}d(u^{6}d)-ro-pa^{2}th-(pa^{3}th)'i^2-a^3. See AEROHYDROPATHIA.

ÆRYSIPELAS (Lat.), n. f. E^2(a^3-e^2)-ri^2(ru^6)-si^{2}p'e^{2}l-a^{2}s(a^{3}s). Gen., *ærysipel'atos* (*-tis*). See ERYSIPELAS.

AERZEN (Ger.), v. tr. Ar'tse^{2}n. To cure. [L, 46.]

AERZTE (Ger.). n., pl. of *Arzt* (*q. v.*).

AERZTLICH (Ger.), adj. Artzt'li^{2}ch^2. Medical. [L, 30.]

ÆS (Lat.), n. n. Ez(a^3'e^{2}s). Gen., *æ'ris*. Gr., χάλκος. 1. Copper ore ; copper. 2. Brass. [B ; L.]—**Æris flores.** See *Flores viridis æris.*—**Æris squama.** See *Squama æris.*—**Æ. combustum.** Copper scale ; copper sulphide obtained by roasting copper. [Celsus (B, 45).]—**Æ. crematum.** See *Æ. combustum.*—**Æ. cyprium.** Cypriote brass ; copper. [B.]—**Æ. pauperum.** Copper ore deprived of silver. [L, 104.]—**Æ. ustum.** 1. See *Æ. combustum*. 2. Black oxide of lead prepared by exposing molten lead to the action of the air. [B, 97.]—**Æ. viride crystallisatum.** Crystallized acetate of copper. [B, 97.]—**Flores virides æris, Flores viridis æris.** Normal copper acetate. [B, 48, 81. 97.]—**Flos æris.** A name given by the ancients to hemioxide of copper obtained by pouring water on the freshly melted metal or exposing the latter to the action of a blast of air [Pliny]. It is classed by Celsus among those agents which corrode the flesh ("*exedunt corpus*"). [B, 3, 45.]—**Liquor æris cinnamomatus.** Syn. : *mixtura styptica*, *solutio cuprata*. A solution of sulphate of copper in cinnamon water, used as a styptic in internal hæmorrhages and in epilepsy. [B, 97.]—**Squama æris.** Copper scale ; peroxide of copper obtained in the form of scales. Classed by Celsus among the styptics, corrosive agents, and purgatives. [B, 45.]—**Squama æris rubri.** Red copper scale ; red oxide or hemioxide of copper obtained in the form of scales. Classed by Celsus among the styptics. [B, 45.]—**Viride æris.** Dibasic cupric acetate ; verdigris. [B.] See COPPER *acetate.*—**Viride æris præparatum.** See ÆRUGO *præparata*.

ÆSCHOS (Lat.), n. n. E^{2}s'(a^3'e^{2}s)-ko^{2}s(ch^{2}o^{2}s). Gen., *æs'cheos* (*-is*). Gr., αἶσχος. A deformity. [B, 115 ; Hippocrates (L, 63).]

ÆSCHROMYTHESIS (Lat.), n. f. E^{2}s(a^3-e^{2}s)-kro(ch^{2}ro^2)-mi^{2}th(mu^{6}th)-e'(a)'si^{2}s. Gen., *æschromythes'eos* (*-es'is*). From αἰσχρομυθεῖν, to use obscene language, a word applied by Hippocrates to the utterances of women in delirium. A non-classical word formed to designate the utterance of obscene language by delirious patients, such as occurs in puerperal mania. [B, 115 ; L, 53, 63.]

ÆSCHRURGÆ (Lat.), n. f. pl. E^{2}s(a^3-e^{2}s)-kru^{6}r(ch^{2}rur)'je(ga^3-e^2). From αἰσχρουγός, obscene. See TRIBADES.

ÆSCHYNANTHUS (Lat.), n. f. E^{2}s(a^3-es)-ki^{2}n(ch^{2}u^{6}n)-a^{2}n-(a^{3}n)'thu^{3}s(thu^{4}s). From αἰσχύνειν, to be ashamed, and ἄνθος, a flower. A genus of plants belonging to the *Cyrtandreæ*. [L, 64.]

ÆSCHYNOMENE (Lat.), n. f. E^{2}s(a^3-e^{2}s)-ki^{2}n(ch^{2}u^{6}n)-o^{2}m'-e^{2}n-e(a). Gen., *æschynomenæ*. Gr., αἰσχυνομένη (from αἰσχύνεσθαι, to be ashamed, on account of the sensitiveness of the leaves). Fr., *æschynomène*, *sensitive*. Ger., *Sinnpflanze*. 1. The sensitive plant (*Mimosa pudica*). 2. A genus of papilionaceous leguminous plants belonging to the tribe *Hedysareæ*. [L, 58, 64.]—**Æ. aspera** [Linnæus]. A species employed in India as a remedy for dropsy. [B, 92.]—**Æ. grandiflora.** A species indigenous to India, used as a febrifuge. [L, 105.]—**Æ. paludosa** [Roxburgh]. A Chinese species, the stalks of which are used in making the so-called rice-paper. [B, 93.]

ÆSCIGENIN, n. E^{2}s-si^2'je^{2}n-i^{2}n. From *æsculus* (*q. v.*), and γεννᾶν, to beget. Fr., *éscigénine*. Ger., *Aescigenin*. Also written *escigenin*. A substance said to have the composition $C_{12}H_{20}O_2$, found in the seeds of the horse-chestnut (*Æsculus hippocastanum*). [B, 2.]

ÆSCIGLYCOL, n. E^{2}s-i^2-gli-ko^{2}l'. For deriv., see ÆSCULUS and GLYCOL. Fr., *ésciglycol*, *æsciglycol*. Ger., *Æsciglycol*. Also written *esciglycol*. The first member of a series of compounds, imagined by Rochleder, which are all derivatives of the proximate principles found in the seeds of the horse-chestnut, and which may be regarded as formed from glycol and its derivatives by the addition of the molecule C_5H_4. Thus, from glycol, glycolal, glycollic acid, glyoxal, glyoxalic acid, and oxalic acid, are formed æsciglycol, æsciglycolal, æsciglycollic acid, æsciglyoxal, æsciglyoxalic acid, and æscioxalic acid. [B, 2.]

ÆSCIGLYCOLAL, n. E^{2}s-i^2-gli'ko^{2}l-a^{2}l. For deriv., see ÆSCULUS and GLYCOLAL. Fr., *ésciglycolal*, *æsciglycolal*. Ger., *Æsciglycolal*. Also written *esciglycolal*. A substance of the composition $C_7H_8O_2 = C_2H_4O_2$ (glycolal) + C_5H_4, bearing thus the same relation to glycolal that æsciglycol does to glycol. [B, 2.]—**Diformylic æ.** Æsorcin, so called because it may be regarded as æ. combined with a double molecule of formyl. [B, 2.]

ÆSCIGLYCOLLIC ACID, n. E^{2}s''i^2-gli-ko^{2}l'i^{2}k. For deriv., see ÆSCULUS and GLYCOLLIC. Fr., *acide ésciglycolique* (ou *æsciglycolique*). Ger., *Aesciglycolsäure*. Also written *esciglycollic*. A substance of the composition $C_7H_8O_3$, obtained by the action of sodium amalgam upon quercetin and bearing the same relation to glycollic acid that æsciglycol bears to glycol. [B, 2.]

ÆSCIGLYOXAL, n. E^{2}s-i^2-gli-o^{2}x'a^{2}l. For deriv., see ÆSCULUS and GLYOXAL. Fr., *ésciglyoxal*, *æsciglyoxal*. Ger., *Aesciglyoxal*. Also written *esciglyoxal*. A substance of the composition $C_7H_6O_2$, bearing the same relation to glyoxal that æsciglycol bears to glycol. [B, 2.]—**Diformylic æ.** A name given to æsculetin on the supposition that it is made up of æ. combined with a double molecule of formyl. [B, 2.]

ÆSCIGLYOXALIC ACID, n. E^{2}s''i^2-gli-o^{2}x-a^{2}l'i^{2}k. For deriv., see ÆSCULUS and GLYOXALIC ACID. Fr., *acide ésciglyoxalique* (ou *æsciglyoxalique*). Ger., *Aesciglyoxalsäure*. Also written *esciglyoxalic*. A substance of the composition $C_7H_6O_3$, bearing the same relation to glyoxalic acid that æsciglycol bears to glycol. In combination with phloroglucin it is said to constitute the tannin of the horse-chestnut. [B, 2.]

ÆSCINIC ACID, n. E^{2}s-i^{2}n'i^{2}k. For deriv., see ÆSCULUS. Fr., *acide éscinique* (ou *æscinique*). An amorphous-acid substance formed by the action of alkalies upon argyræscin and aphrodæscin. [B, 14, 81.]

ÆSCIOXALIC ACID, n. E^{2}s''i^2-o^{2}x-a^{2}l'i^{2}k. For deriv., see ÆSCULUS and OXALIC ACID. Fr., *acide éscioxalique* (ou *æscioxalique*). Ger., *Aescioxalsäure*. Also written *escioxalic*. A substance of the composition $C_7H_6O_4$, formed by the action of potash upon æsculetin, and bearing the same relation to oxalic acid that æsciglycol bears to glycol. [B, 2.]

ÆSCULACEÆ, ÆSCULEÆ (Lat.), n's pl. E^{2}s(a^3-e^{2}s)-ku^2-(ku)-la(la^3)'se(ke^2)-e(a^3-e^2). -ku^2(ku)'le^2-e(a^3-e^2). Fr., *æsculacees*. Ger., *Aesculaceen*. See HIPPOCASTANEÆ.

ÆSCULETIN, n. E^{2}s-ku^2'le^{2}t-i^{2}n. For deriv., see ÆSCULUS. Fr., *ésculétine*, *æsculétine*. Ger., *Aesculetin*. It., *esculetina*. Also written *esculetin*. A substance derived from the decomposition of æsculin, forming acicular or laminar crystals, nearly insoluble in water and in alcohol. and having the composition $C_9H_6O_4 + H_2O = C_9H_2(CH.O)(C.OH)(C.OH)(OH) + H_2O$. It has an isomeric form, paræsculetin. [B, 2, 4.]

ÆSCULETINIC ACID, n. E^{2}s-ku^2''le^{2}t-i^{2}n'i^{2}k. Fr., *acide esculétinique*. An acid produced, along with glucic and apoglucic acids, by decomposing æsculin with baryta. [B, 81.]

ÆSCULIC ACID, n. E^{2}s-ku^2'li^{2}k. Fr., *acide esculique*. It., *acido esculico*. See SAPOGENIN.

ÆSCULIN, n. E^{2}s'ku^2-li^{2}n. For deriv., see ÆSCULUS. Fr.,

ésculine, œsculine. Ger., *Aesculin.* It., *esculina.* Also written *esculin.* A glucoside of the formula $C_{15}H_{16}O_9 + 2H_2O$, obtained from the bark of the horse-chestnut (*Æsculus hippocastanum*) and other trees of the genera *Æsculus* and *Pavia.* It forms white prismatic crystals, of slightly bitter taste, dissolving readily in hot water and in alcohol, the aqueous solution having a marked blue fluorescence. On treatment with dilute acids it splits up into glucose and æsculetin. Æ. is isomeric with daphnin. It has been used as a remedy in malaria in 15-grain doses. [B, 2, 4, 5.]

ÆSCULINEÆ (Lat.), n. f. pl. E^{2}s(a^3-e^{2}s)-ku^2(ku)-li^{2}n′e(a)-e(a^3-e^2). For deriv., see Æsculus. Fr., *œsculacées.* Ger., *Aesculineen, Rosskastaniengewächse.* In Eichler's classification, an order (corresponding to a cohort of other systems) of the series *Encyclicœ.* It is distinguished by its five-parted flowers with double or triple-celled ovary and by the arrangement of the stamens, which are disposed in a double row, and are usually inserted on a disk separating them from the corolla; more rarely they are united to form a single tube. There are regularly 10 stamens, but a certain number are usually suppressed. The Æ. comprise five families (orders of other systems): *Sapindaceœ, Acerinœ, Hippocastaneœ* (both included by Bentham and Hooker among the *Sapindaceœ*), *Erythroxylaceœ,* and *Polygalinœ.* The order nearly corresponds to the classes *Acera and Polygalinœ* of Endlicher's system. [B, 35, 42, 48.]

ÆSCULUS (Lat.), n. f. E^{2}s′(a^3′e^{2}s)-ku^2(ku)-lu^{3}s(lu^{4}s). From *esca,* food. Also written *esculus.* 1. As used by the ancients, the Italian oak (*Quercus œsculus*), or perhaps the holm-oak (*Quercus ilex*) or beech (*Fagus sylvatica*). [L, 58.] 2. A Linnæan genus of trees and shrubs belonging to the natural order *Sapindaceœ,* tribe *Hippocastaneœ,* distinguished by the presence of opposite digitate leaves, a three-celled ovary with 2 ovules in each cell, coriaceous fruit with thick inseparable cotyledons, and flowers arranged in terminal panicles, racemes, or thyrses. [B, 34.]—**Æ. glabra** [Willdenow]. Syn.: *Pavia ohioensis* [Michaux]. Ohio buckeye; a small tree growing along the banks of the Ohio. A remedy obtained from it is said to be useful in portal congestion. [B, 34; L, 61.]—**Æ. hippocastanum** [Linnæus]. Fr., *marronier* (ou *châtaignier*) *d'Inde.* Ger., *Rosskastanie.* It., *castagno d'India.* Sp., *castaño de Indias.* Horse-chestnut. A species indigenous to northern Asia, but cultivated throughout Europe and North America. It is a tree 40 or 50 feet in height, bearing pink or white flowers and large dark-brown seeds. The fruit contains tannic acid, starch, a fixed oil, and a bitter glucoside *œsculin* (*q. v.*). Deprived of the latter by treatment with alkalies, it has been used as food, roasted, it has been given in atony of the uterus, and the powdered kernel of the fruit has been used as a sternutatory. The fixed oil has been employed as a local application in rheumatism and gout. The capsules of the fruit contain *capsulœseic acid* (*q. v.*). The bark contains *fraxin* and tannic acid, and has been given as a remedy in intermittents. [B, 5, 34; L, 77.]—**Æ. macrostachya** [Michaux]. Syn.: *Æ. parviflora* [Walter]. A shrub 2 to 3 feet high, growing in Georgia and South Carolina. The fruit is edible. [B, 34; L, 105.]—**Æ. ohioensis, Æ. ohiotensis.** Ohio buckeye. [L, 63.] See *Æ. pavia.*—**Æ. parviflora.** See *Æ. macrostachya.*—**Æ. pavia** [Linnæus]. Fr., *marronier à fleurs écarlates.* Syn.: *Pavia* [De Candolle]. Red buckeye. A shrub 3 to 10 feet high growing in the Southern United States, bearing irregular red flowers arranged in thyrses. The bark has been used as a febrifuge, and the fruit is said to be poisonous, producing symptoms analogous to those of strychnine poisoning. [B, 34; L, 61, 77.]—**Æ. rubicunda.** See *Æ. pavia.*

ÆSECAVUM (Lat.), n. n. E^{2}s(a^3-e^{2}s)-e^{2}k-a(a^3)′vu^{3}m(wu^{4}m). Deriv., uncertain. Brass made by the union of copper and calamine. [L, 97.]

ÆSORCEIN, n. E^{2}s-o^{3}r′se-i^{2}n. For deriv., see Æsculus and Orcein. Fr., *œsorcéine, ésorcéine.* Ger., *Aesorceïn.* Also written *esorcein.* A substance of the composition $C_9H_7NO_5$, derived from paræsculetin by the addition of ammonia. [B, 2.]

ÆSORCIN, n. E^{2}s-o^{3}r′si^{2}n. For deriv., see Æsculus and Orcin. Fr., *ésorcine, œsorcine.* Ger., *Aesorcin.* Also written *esorcin.* An acid substance, isomeric with caffeic acid, derived from æsculetin and having the composition $C_9H_8O_4$, being that of orcin with a double molecule of carboxyl added. [B, 2.]

ÆSTATES (Lat.), n. f., pl. of *œstas,* summer. E^{2}s(a^3-e^{2}s)-ta(ta^3)′tez(te^{2}s). Ephelides (see Ephelis); lentigo (*q. v.*).

AESTCHEN (Ger.), n. Ast′ch^{2}e^{2}n. Dimin. of *Ast.* A twig; a small branch. [L, 30.]

AESTE (Ger.), n., pl. of *Ast* (*q. v.*). As′te^2.

ÆSTEMATONUSI (Lat.), n. f. pl. E^{2}s(a^3-e^{2}s)-te^{2}m-a^{2}t(a^{3}t)-o-nu^2(nu)′si(ne). See Æsthematonusi.

ÆSTHEMA (Lat.), n. n. E^{2}s(a^3-e^{2}s)-the(tha)′ma^3. Gen., *œsthem′atos* (*-tis*). Gr., αἴσθημα (from αἰσθάνεσθαι, to perceive, perception, sense). Fr., *œsthème.* 1. Sensation. 2. In pl., *œsthemata,* the organs of the senses. [C.]

ÆSTHEMATOLOGY, n. E^{2}s-the^{2}m-a^{2}t-o^{2}l′o-ji^2. For deriv., see Æsthema and *-logy.** Lat., *œsthematologia.* Fr., *œsthématologie.* A treatise on sensation and the organs of sensation. [C.]

ÆSTHEMATONUSI (Lat.), n. f. pl. E^{2}s(a^3-e^{2}s)-the^{2}m-a^{2}t(ma^{3}t)-o-nu^2(nu)′si(se). From αἴσθημα, sensation, and νόσος (Ionic, νοῦσος), a disease. Diseases of sensation or of the organs of sense. [L, 50.]

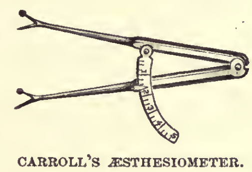
ÆSTHEMATORGANON (Lat.), n. n. E^{2}s(a^3-e^{2}s)-the^{2}m-a^{2}t-(a^{3}t)-o^{2}r′ga^{3}n-o^{2}n. From αἴσθημα, sensation, and ὄργανον, an organ. An organ of sense. [L, 50.]

ÆSTHEMATORGANONUSI, ÆSTHEMATORGANUSI (Lat.), n's f. pl. E^{2}s(a^3-e^{2}s)-the^{2}m-a^{2}t(a^{3}t)-o^{2}r-ga^{3}n-o^2-nu^2(nu)′si(se), -ga^{3}n-u^2(u)′si(se). Diseases of the organs of sensation. [L, 50.]

ÆSTHESIA (Lat.), n. f. E^{2}s(a^3-e^{2}s)-the(tha)′zi^2(si^2)-a^3. See Æsthesis.

ÆSTHESIMETER, n. E^{2}s-the^{2}s-i^{2}m′e^{2}t-u^{5}r. See Æsthesiometer.

ÆSTHÉSIOGÈNE (Fr.), n. As-taz-i^2-o^2-zhe^{2}n. A term applied by Charcot to any agent which, like the metals, exerts a specific action upon sensibility. [D, 71.]



ÆSTHESIOGRAPHY, n. E^{2}s-thez-i^2-o^{2}g′ra^2-fi^2. From αἴσθησις, sense, and γράφειν, to write. Lat., *œsthesiographia.* Fr., *œsthésiographie.* It., *estesiografia.* A description of the organs of sense. [C.]

ÆSTHESIOLOGY, n. E^{2}s-thez-i^2-o^{2}l′o-ji^2. For deriv., see Æsthesis and *-logy.** Fr., *esthésiologie.* It., *estesiologia.* Sp., *estesiologia.* See Æsthematology.

ÆSTHESIOMETER, n. E^{2}s-thez-i^2-o^{2}m′e^{2}t-u^{5}r. From αἴσθησις, sensation, and μέτρον, a measure. Fr., *esthésiomètre.* Ger., *Aesthesiometer.* It., Sp., *estesiometro.* Also written *esthesiometer* and *œsthesimeter.* An instrument invented by Sieveking for determining the degree of acuteness of tactile sensibility. In all its

SIEVEKING'S ÆSTHESIOMETER.

CARROLL'S ÆSTHESIOMETER.

modifications it consists essentially of two movable points, which, being placed upon the skin, are approximated until the two tactile sensations afforded by them are blended into one, and but a single point is felt. The distance between the two points, which is indicated by a graduated scale attached to the instrument, is inversely proportional to the delicacy of tactile sensibility. [B.]

ÆSTHESIOMETRY, n. E^{2}s-thez-i^2-o^{2}m′e^{2}t-ri^2. Fr., *esthésiométrie.* Ger., *Aesthesiometrie.* Measurement of tactile sensibility by means of the *œsthesiometer.*

ÆSTHESIONEUROSIS (Lat.), n. f. E^{2}s(a^3-e^{2}s)-thez(thas)-i^2-o-nu^2-ro′si^{2}s. Gen., *œsthesioneuro′seos* (*-ro′sis*). Ger., *Aesthesioneurose, Empfindungsneurose.* A disturbance of the sensory function of the nervous system. [D, 35.]

ÆSTHESIS (Lat.), n. f. E^{2}s(a^3-e^{2}s)-the(tha)′si^{2}s. Gen., *œsthes′eos* (*-the′sis*). From αἴσθησις, sensation, sense. Fr., *esthésie.* 1. Sensation or feeling. 2. The capacity for sensation; sensibility. [B, 78, 93.]

ÆSTHESODIC, adj. E^{2}s-the-so^{2}d′i^{2}k. From αἴσθησις, sensation, and ὁδός, a way. Fr., *esthésodique.* Serving to convey sensation, as the gray substance of the spinal cord. [K, 3.]

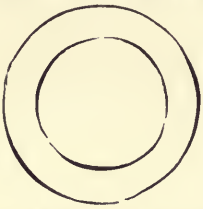
ÆSTHETERION, ÆSTHETERIUM (Lat.), n's n. E^{2}s-(a^3-e^{2}s)-the^{2}t-e(a)′ri^2-o^{2}n, -u^{3}m(u^{4}m). Gr., αἰσθητήριον. Fr., *œsthétère.* See Sensorium.

ÆSTHETIC, adj. E^{2}s-the^{2}t′i^{2}k. Gr., αἰσθητικός. Lat., *œstheticus.* Fr., *esthétique.* Ger., *ästhetisch.* It., *estetico.* Pertaining to æsthesis. [L, 107.]

ÆSTHETICA (Lat.), n. n., pl. of adj. *œstheticus.* E^{2}s(a^3-e^{2}s)-the^{2}t′i^{2}k-a^3. Lit., things which relate to the perception or understanding; in Good's nosology, an order of the fourth class of diseases (*Neurotica*), characterized by dullnes, depravation, or abolition of one or more of the external organs of sense. [L, 83.]

ÆSTHETICS, n. E^{2}s-the^{2}t′i^{2}ks. Fr., *esthétique.* Ger., *Aesthetik.* It., *estetica.* The science treating of the sensations or perceptions. [L, 107.]

ÆSTHETOS (Lat.), adj. E^{2}s(a^3-e^{2}s)-the(tha)′to^{2}s. Gr., αἰσθητός. Acquired through the medium of the senses. [B, 115; L, 50.]



AESTIG (Ger.), adj. Ast′i^{2}g. Branching; full of branches. [L, 30.]

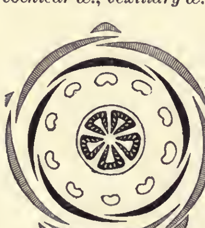
ÆSTIVAL, adj. E^{2}s-ti′va^{2}l. Lat., *œstivalis* (from *œstivus,* belonging to the summer). Fr., *estival.* It., *estivale.* Sp., *estival.* Belonging to the summer. In botany, applied to a plant which is produced, grows, and flowers during the course of one summer. [B.]

ÆSTIVATIO (Lat.), n. f. E^{2}s(a^3-e^{2}s)-ti^2-va(wa^3)′she(ti^2)-o. Gen., *œstivatio′nis.* Æstivation. [B, 1.]—**Æ. alternativa.** Alternate æstivation. [B, 1.]—**Æ. amplexa.** Convolute æstivation. [L, 63.]—**Æ. calycularis.** Calycular æstivation. [B, 1.]—**Æ. carinalis.** Carinal æstivation. [B.]—**Æ. cochlearis.** Cochlear æstivation. [B.]—**Æ. contorta.** Contorted æstivation. [B, 1.]—**Æ. convolutiva.** Convolute æstivation. [B, 1.]—**Æ. corrugativa.** Plicate æstivation; especially the irregularly plicate, or crumpled æstivation. [B, 1; L, 63.]—**Æ. equitativa.** Equitant æstivation. [B, 1; L, 63.]—**Æ. induplicativa** Induplicate æstivation. [B, 1.]—**Æ. plicativa.** Plicate æstivation. [B, 1.]—**Æ. quincuncialis.** Quincuncial æstivation. [B.]—**Æ. reduplicativa.** Reduplicate æstivation. [B, 1.]—**Æ. spiralis.** Spiral æstivation. [B, 1.]—**Æ. supervolutiva.** Supervolute æstivation. [B, 1.]—**Æ. valvaris, Æ. valvata.** Valvate æstivation. [B, 1.]—**Æ. vexillaris.** Vexillary æstivation.

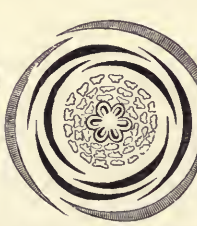
ÆSTIVATION, n. E^{2}s″ti^{2}v-a′shu^{3}n. Lat., *œstivatio.* Fr., *estivation* [Linnæus], *préfloraison.* Ger., *Knospendeckung.* It., *estivazione.* Sp., *estivación.* Syn.: *prefloration* (1st def.). 1. The arrangement of the parts of the flower, and especially of the floral envelopes, while yet in the bud. [B.] 2. The time of flowering. [L.] 3. The dormant condition of some animals during the summer. [L, 56.]—**Alternate æ.** Lat., *œstivatio alternativa.* Fr., *préfloraison alternative.* Ger., *abwechselnde Knospendeckung.* That variety of æ. in which the separate pieces of the calyx or co-

rolla are disposed in two concentric rows and in such manner that the centre of each piece in the inner row is opposite the interspace between two adjacent pieces in the outer row. *Decussate æ.* is a particular variety of this form of æ. [B, 35, 104.]—**Alternate imbricated æ.** Fr., *préfloraison imbriquée alternative.* A form of imbricate æ. in which, when there are 4 pieces in the calyx or corolla, the first is wholly external, overlapping the second and fourth by either margin, while they in turn overlap the third, which is

ALTERNATE ÆSTIVATION. (AFTER THOMÉ.)



ALTERNATE IMBRICATED ÆSTIVATION.



COCHLEAR ÆSTIVATION. (AFTER DE LANESSAN.)

wholly internal. [B, 106.]—**Calycular æ.** Lat., *æstivatio calycularis.* Fr., *préfloraison caliculaire.* A form of æ. in which the pieces of calyx or corolla are arranged in two concentric rows, the outer row covering in only the bases of the pieces in the inner row. [B, 1.]—**Carinal æ.** Lat., *æstivatio carinalis.* Fr., *préfloraison carinale.* A variety of imbricate æ. in which the carina is enlarged and is folded over the other parts, as is the vexillum in vexillary æ. [B, 77.]—**Circular æ.** A general term for æ. in which the separate pieces are situated on the same level and are parts of a single complete whorl; valvate and contorted æ. as distinguished from imbricate æ. [B, 77, 104.]—**Cochlear æ.** Lat., *æstivatio cochlearis.* Fr., *préfloraison cochléaire.* A variety of imbricate æ. in which one piece of the calyx or corolla is wholly internal, being overlapped at either edge by the two adjacent pieces, which are in turn overlapped at their farther edges by the next pair of pieces. By some, cochlear æ. is regarded as identical with vexillary æ., from which in five-parted flowers it usually differs but little except in the position of the piece which lies external to the rest. [B, 77, 104, 106.]—**Contorted æ., Contortive æ.** Lat., *æstivatio contorta.* Fr., *préfloraison tordue.* Ger., *gerollte* oder *gedrehte Knospendeckung.* That form of æ. in which each piece of the calyx or corolla overlaps one of the two pieces adjoining and is overlapped by the other. [B, 34.]—**Convolute æ.** Lat., *æstivatio convolutiva.* Fr., *préfloraison convolutive* ou *enveloppante.* Ger., *ganz umfassende Knospendeckung.* A variety of imbricate æ. in which each piece of the calyx or corolla envelops completely the pieces next within it. [B, 34, 104.]—**Corrugated æ., Crumpled æ.** Fr., *préfloraison corrugative.* See *Plicate æ.*—**Decussating æ.** Lat., *æstivatio decussativa.* Fr., *préfloraison décussée.* A variety of alternate æ. in which there are 4 pieces in the floral envelope, the first and third of which are wholly external and overlap by either edge the second and fourth, which are wholly internal. [B, 106.]—**Enveloping æ.** See *Convolute æ.*—**Equitant æ.** Lat., *æstivatio equitativa.* Fr., *préfloraison équitative.* That variety of imbricated æ. in which one piece overrides one or more others as in the *Papilionaceæ.* It comprises *vexillary* and *carinal æ.* [B, 1, 38.]—**Folded æ.** See *Plicate æ.*—**Imbricate æ., Imbricated æ., Imbricative æ.** Lat., *æstivatio imbricativa.* Fr., *préfloraison imbricative* ou *imbriquée.* Ger., *dachziegelige Knospendeckung.* That form of æ. in which one or more of the pieces of the calyx or corolla are external, overlapping by either margin the pieces adjoining. It comprises *alternate imbricated æ., triquetrous æ., convulate æ.,* and, according to some, *quincuncial æ., cochlear æ., vexillary æ.,* and *carinal æ.,* but, according to others,

CONTORTED ÆSTIVATION.

CONVOLUTE ÆSTIVATION. (AFTER CAUVET.)

DECUSSATING ÆSTIVATION. (AFTER DE LANESSAN.)

these latter should be regarded as distinct varieties of æ. [B, 34, 77, 104, 106.]—**Induplicate æ., Induplicative æ.** Lat., *æstivatio induplicativa.* Fr., *préfloraison valvaire indupliquée* ou *induplicative.* Ger., *einwärtsgeschlagene Knospendeckung.* See *Valvate æ.*—**Plicate æ.** Lat., *æstivatio plicativa.* Fr., *préfloraison chiffonée* ou *plicative.* Ger., *zerknitterte Knospendeckung.* A form of æ. occurring in monopetalous flowers in which the undivided corolla is folded or crumpled upon itself. It includes a number of varieties, of which *supervolute æ.* is one. [B, 1, 34, 104.]—**Quincuncial æ.** Lat., *æstivatio quincuncialis.* Fr., *préfloraison quinconciale.* Ger., *fünfschichtige Knospendeckung.* A variety of imbricate æ. occurring in five-parted flowers in which 2 of the five pieces of which the calyx or the corolla is made up lie wholly outside, 2 lie wholly inside, and the fifth lies with one extremity outside overlapping one of the pieces of the inner row, and with the other extremity inside overlapped by one of the pieces of the outer row. [B, 34.]—**Reduplicate æ., Reduplicative æ.** Lat., *æstivatio reduplicativa.* Fr., *préfloraison réduplicative* ou

IMBRICATE ÆSTIVATION.

QUINCUNCIAL ÆSTIVATION.

(AFTER CAUVET.)

rédupliquée. Ger., *auswärtsgeschlagene Knospendeckung.* See *Valvate æ.*—**Simple valvate æ.** Fr., *préfloraison valvaire simple.* See *Valvate æ.*—**Spiral æ.** Lat., *æstivatio spiralis.* Fr., *préfloraison spirale.* 1. Quincuncial æ. [B, 77.] 2. A variety of æ. in

SPIRAL ÆSTIVATION. (AFTER CAUVET.)

TRIQUETROUS ÆSTIVATION. (AFTER DE LANESSAN.)

which the separate pieces of calyx or corolla are very numerous and form a spiral series, each piece in which covers in in part the succeeding piece. [B, 104.]—**Supervolute æ.** Lat., *æstivatio*

VALVATE ÆSTIVATION. (AFTER CAUVET.)
a, simple; *b*, induplicate; *c*, reduplicate.

supervolutiva. Fr., *préfloraison supervolutive.* A variety of plicate æ. in which the folds of the corolla all have an oblique turn in the same direction. [B, 34.]—**Triquetrous æ.** Fr., *préfloraison triquètre.* A variety of imbricate æ. in which the pieces of calyx or corolla are arranged in sets of 3, one piece in each set lying external, another internal, and the third with one margin external and the other margin internal. [B, 34.]—**Twisted æ.** See *Contorted æ.*—**Valvate æ.** Lat., *æstivatio valvaris* seu *valvata.* Fr., *préfloraison valvaire.* Ger., *klappige Knospendeckung.* That form of æ. in which the separate pieces of the calyx or corolla meet at their margins without overlapping. It comprises *simple valvate æ.,* in which the edges of the several pieces are not turned either inward or outward; *induplicate æ.,* in which the edges are involute or bent inward; and *reduplicate æ.,* in which the edges are revolute or bent outward. [B, 34, 104.]—**Vexillary æ.** Lat., *æstivatio vexillaris.* Fr., *préfloraison vexillaire.* Ger., *fahnenförmige Knospendeckung.* That form of imbricate æ. in which a single piece (the vexillum) becomes enlarged and is folded over the other parts of the bud. [B, 34, 77.]

VEXILLARY ÆSTIVATION. (AFTER CAUVET.)

ÆSTIVUS (Lat.), adj. E^{2}s(a^3-e^{2}s)-ti(te)′vu^{3}s(wu^{4}s). Æstival.

ÆSTUANT, adj. E^{2}s′tu^2-a^{2}nt. Lat., *æstuans* (from *æstuare,* to be boiling hot). Fr., *æstuant.* That which ferments or is boiling. [L, 41.]

ÆSTUARIUM (Lat.), n. n. E^{2}s(a^3-es)-tu^2(tu)-ar(a^{3}r)′i^2-u^{3}m-(u^{4}m). From *æstus,* burning heat. 1. Lit., a place where currents of water meet, an estuary. 2. A vapor bath. 3. A tube through which a hot iron is introduced to a part to be cauterized. [B, 78.]

ÆSTUATIO (Lat.), n. f. E^{2}s(a^3-e^{2}s)-tu^2(tu)-a(a^3)′she(ti^2)-o. Gen., *æstuatio′nis.* 1. A heating; also the boiling up or agitation of liquids when mixed. [L, 50, 97.] 2. The heated state of the body or blood in fever. [Sydenham (B, 90).]

ÆSTUS (Lat.), n. m. Es(a^3-e^{2}s)′tu^{3}s(tu^{4}s). Gen., *æstus.* A burning heat; a burning. [L, 50.]—**Æ. volaticus.** A sudden transitory heat and flushing of the face. [L, 84.]

ÆTÆ LAGHAS, n. See Cassia *fistula.*

ÆTAS (Lat.), n. f. E′(a^3′e^2)-ta^{2}s(ta^{3}s). Gen., *æta′tis.* Contracted from *œvitas*, from Ævum (Gr., αἰών), age or life-time. Age; period of life. [B.]—**Æ. affecta.** Advanced age. [B.]—**Æ. bona.** See Adolescence.—**Æ. crepita, Æ. decrepita.** Extreme old age. [L, 63.]—**Æ. firmata.** The prime of life. [L, 107.]—**Æ. ineuns.** Childhood. [B.]—**Æ. infirma.** Old age. [B.]—**Æ. ingravescens.** The beginning of old age. [L, 107.]—**Æ. integra.** The flower of youth. [B.]—**Æ. mala.** Old age. [Plantus (B).]—**Æ. matura.** Mature age; manhood. [L, 107.]—**Æ. media.** Middle life. [Celsus (B).]—**Æ. provecta.** See *Æ. senecta.*—**Æ. puerilis.** Boyhood. [Celsus (B).]—**Æ. senecta, Æ. senilis.** Old age. [Celsus (B); L, 63.]—**Æ. virilis.** Manhood. [L, 63.]

ÆTHAL, n. E′tha^{2}l. For deriv., see Ethal. Fr., *éthal.* Ger., *Aethal.* Ethal. [B.] See Cetyl alcohol.

ÆTHALE (Lat.), n. f. E′(a^3′e^2)-tha^3-le(la). Gr., αἰθάλη. Soot. [B, 111.]

ÆTHALES (Lat.), n. f. E′(a^3′e^2)-tha^{3}l-ez(e^{2}s). Gen., *ætha′leos* (*-is*). Gr., αἰθαλής = ἀειθαλής, evergreen. The *Sempervivens tectorum.* [B, 109, 115.]

ÆTHALINEI (Lat.), n. m. pl. E(a^3-e^2)-tha^{3}l-i^{2}n′e^2-i(e). For deriv., see Æthalium. Fr., *œthalins.* In the older classifications, a tribe of gasteromycetous *Fungi* belonging to the suborder *Trichodermacei*, section *Myxogastres*, including the genus *Æthalium.* The members of this group are now placed among the *Myxomycetes*, and by some are regarded as belonging to the animal kingdom. [B, 48.]

ÆTHALIUM (Lat.), n. n. E^{2}th(a^3-e^{2}th)-a^{2}l(a^{3}l)′i^3-u^{3}m(u^{4}m). From αἴθαλος, soot (2d and 3d defs). 1. Ethal. [B, 120.] 2. A process having the form of a flattened cake or cushion springing directly from the plasmodium in certain *Myxomycetes*, and constituting the spore-bearing body or product of fructification. 3. A genus of *Myxomycetes*, including individuals now classed under *Fuligo.* [B, 54, 75.]—**Æ. septicum, Æ. vaporarium, Æ. violaceum, Wood æ.** See Fuligo *varians.*

AETHALSÄURE (Ger.), n. A′ta^{3}l-zoi-re. Palmitic acid. [B.]

ÆTHALUS (Lat.), n. m. E^{2}th′(a^3′e^{2}th)-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From αἴθαλος, soot. The soot-grape; a variety of grape indigenous to Egypt mentioned by Pliny. [B, 114.]

AETHAMIN (Ger.), n. A′ta^3-men. Ethylamine. [B, 48.]

AETHAN (Ger.), n. A-ta^{3}n′. Ethane. [B.]

AETHEN (Ger.), n. A-tan′. Ethene (ethylene). [B.] For compounds, see Aethylen.—**A′hydroxydisulfonsäure.** Ethylenehydroxydisulphonic acid. [B.]—**A′milchsäure.** Ethylene lactic acid. [B.] See Lactic acid.—**A′protocatechusäure.** Ethyleneprotocatechuic acid. [B.]—**A′trisulfonsäure.** Ethylenetrisulphonic acid. [B.]

AETHENYL (Ger.), n. A′ta-nu^{6}l. Ethenyl. [B.]—**A′bromürdiäthylat.** Ethenyl bromide diethylate; bromacetal. [B, 4.]—**A′chlorürätylathydrat.** Ethenyl chloride ethylate hydrate. [B, 4.]—**A′chlorürdiäthylat.** Ethenyl chloride diethylate; chloracetal. [B, 4.]—**A′chlorüroxyd.** Ethenyl oxychloride; monochloraldehyde. [B.] See Chloraldehyde.—**A′dichlorüräthylat.** Ethenyl dichloride ethylate; bichlorether. [B, 4.]—**A′hydratdiäthylat.** Ethenyl hydrate diethylate; oxyacetal. [B, 4.]—**A′hydratoxyd.** Ethenyl hydrated oxide; oxyaldehyde. [B, 4.]—**A′triacetat.** Ethenyl triacetate. [B.]—**A′triäthylat.** Ethenyl triethylate. [B.]—**A′tribromür.** Ethenyl tribromide. [B.]—**A′tricarboxylsäure.** Ethenyltricarboxylic acid. [B.]—**A′trichlorür.** Ethenyl trichloride. [B.]

ÆTHÉOGAMES (Fr.), n. pl. A-ta-o-ga^{3}m. More properly *Aéthéogames.* The cryptogams or members of the division *Aetheogamia.* [B.]

AETHEOGAMIA (Lat.), n. f. A(a^3)-e(a)-the(tha)-o-ga^{2}m(ga^{3}m)′-i^2-a^3. From ἀήθης, unusual, and γάμος, marriage. Fr., *œthéogamie, aéthéogamie.* Ger., *Aetheogamie.* Aetheogamy; a term applied by Palisot de Beauvois to the class of cryptogams; by De Candolle restricted to the vascular cryptogams (*Pteridophyta*). [B, 1, 108.]

AETHEOGAMOUS, adj. A-e″the-o^{2}g′a^2-mu^{3}s. Fr., *aéthéogame.* Ger., *aëtheogamisch.* Of or belonging to the *Aethogamia.* [B, 7.]

AETHEOGAMY, n. A-e″the-o^{2}g′a^2-mi^2. See Aetheogamia.

ÆTHER (Lat.), n. m. E′(a^3′e^2)-thu^{3}r(the^{2}r). Gen., *æth′eris.* From αἴθειν, to light up, or burn. 1. Ether. 2. A preparation containing or made from ethyl ether. [B.]—**Æ. aceticus.** See the major list.—**Æ. acetosus.** See Æ. aceticus.—**Æ. alcoholicus.** See *Spiritus ætheris.*—**Æ. ammoniacalis, A. ammoniacatus.** Fr., *éther ammonié.* Ger., *ammoniakhaltiger Aether.* Ether containing ammonia. [B, 78.]—**Æ. amylicus nitrosus, Æ. amylnitrosus** [Fr. Cod.]. **Æ. amylonitrosus.** Amyl nitrite. [B.]—**Æ. anæstheticus** [Swiss Ph.], **Æ. anæstheticus Aranii.** Fr., *éther anesthésique.* Ger., *Aran′scher* (oder *Arans*) *Aether.* A preparation named after Dr. Aran, of Paris, made by the prolonged action of chlorine upon ethyl chloride or ethylidene dichloride. It is a clear, colorless liquid of ethereal aromatic odor, sweetish aromatic taste and neutral reaction, readily miscible with alcohol, ether, and most of the fixed and volatile oils, but insoluble in water. It consists of a variable mixture of the chlorine substitution compounds of ethane (ethylidene dichloride, trichlorethane, tetrachlorethane, pentachlorethane, and sometimes carbon hexachloride). [A; B, 95.]—**Æ. anæstheticus Wiggers.** A mixture similar to the *Æ. anœstheticus Aranii*, but especially rich in the more highly chlorinated compounds. [A.]—**Æ. Aranii.** See *Æ. anœstheticus.*—**Æ. azotosus.** See Æ. nitrosus.—**Æ. benzoicus.** Benzoic ether; ethyl benzoate. [B, 49.]—**Æ. bromatus.** Ethyl bromide. [B, 108.]—**Æ. bromhydricus** [Fr. Cod.]. Hydrobromic ether; ethyl bromide. [B.]—**Æ. butyricus.** Ethyl butyrate. [B, 48.]—**Æ. cantharidatus** [Swiss Ph.]. An ethereal extract of cantharides made by exhausting 10 parts of the latter with 15 parts of ether until 10 parts of extract are obtained. [B, 95.] Cf. Liquor *epispasticus.*—**Æ. chloratus.** See the major list.—**Æ. chlorhydricus.** Hydrochloric ether; ethyl chloride. [B.]—**Æ. chlorhydricus alcoholicus.** See *Spiritus* ætheris chlorati.—**Æ. chlorhydricus chloratus.** See *Æ. anœstheticus.*—**Æ. chloricus.** Chloric ether. [B.] See *Spiritus* chloroformi.—**Æ. chlorohydricus.** See *Æ. chlorhydricus.*—**Æ. crudus.** Commercial ether. [B, 95.] See Ethyl ether.—**Æ. cypriacus.** An old name for an ethereal solution of cupric chloride, used as a remedy for epilepsy. [B, 97.]—**Æ. depuratus.** Stronger ether. [B.] See under Ethyl ether.—**Æ. ferratus.** See the major list.—**Æ. formicicus, Æ. formicus.** Formic ether; ethyl formate. [B, 81.]—**Æ. fortior.** Stronger ether. [B.] See under Ethyl ether.—**Æ. Frobenii.** Ethyl ether; so called from Frobenius, who in 1730 called attention to it. [B, 59, 88.]—**Æ. hydricus.** Ethyl ether. [A, 316.]—**Æ. hydriodicus.** Ethyl iodide. [B.]—**Æ. hydrobromicus.** Ethyl bromide. [B, 95.]—**Æ. hydrochloricus.** Hydrochloric ether; ethyl chloride. [B.]—**Æ. hydrocyanicus.** Hydrocyanic ether; ethyl cyanide. [B, 119.]—**Æ. hydroiodicus, Æ. hydrojodicus.** Ethyl iodide. [B, 95.]—**Æ. iodatus.** 1. Ethyl iodide. 2. A solution of iodine in ether. [B, 48, 108.]—**Æ. iodhydricus** [Fr. Cod.]. Hydriodic ether; ethyl iodide. [B.]—**Æ. jodatus.** See *Æ. iodatus.*—**Æ. lignosus.** Apparently, impure acetate of methyl. [B, 2.]—**Æ. lotus.** Washed ether; ethyl ether freed from alcohol by washing with water. [B, 14.]—**Æ. martialis.** See *Tinctura* ferri chlorati *œtherea.*—**Æ. mercurialis.** Fr., *éther mercuriel.* Ger., *Mercurialäther.* It., *etere mercuriale.* Sp., *éter mercurial.* An ethereal solution of corrosive sublimate containing 16 grains of the latter to an ounce of ether. [B, 97.]—**Æ. methylicus.** Methyl ether. [B, 81.]—**Æ. muriaticus.** Muriatic ether. See Ethyl *chloride.*—**Æ. muriaticus alcoholicus.** The same as *Æ. chlorhydricus alcoholicus.* [A, 316.] See *Spiritus* ætheris chlorati.—**Æ. muriaticus spurius.** A preparation made by distilling 4 parts each of ether and hydrochloric acid and 1 part of sulphuric acid. [B, 97.]—**Æ. muriaticus trichloratus.** See *Æ. anœstheticus.*—**Æ. nitrico-alcoholicus.** See *Spiritus* ætheris nitrosi.—**Æ. nitricus, Æ. nitrosus.** See the major list.—**Æ. œnanthicus.** See Œnanthic ether.—**Æ. petrolei.** See *Æ.* petrolei.—**Æ. phosphoratus.** Fr., *éther phosphoré.* Ger., *phosphorhaltiger Aether.* It., *etere fosforato.* Sp., *éter fosforado.* A preparation made by infusing phosphorus 1 part in ether 48 parts [Russ. Ph.], 60 parts [Swiss Ph.], or 80 parts [Greek Ph.]. Other proportions have been employed in other formularies. The preparation is a clear, colorless, very inflammable liquid, having the odor of ether and phosphorus, and containing, according to the strength of the ether and the circumstances of preparation, from 5 to 12 parts per mille of phosphorus. [B, 95, 97.]—**Æ. phosphoricus.** Fr., *éther phosphorique.* It., *etere fosforico.* Sp., *éter fosfórico.* Ethyl ether prepared by decomposing alcohol with phosphoric acid. [B, 88, 97.]—**Æ. phosphoro-phosphoricus.** A solution of phosphorus in *Æ. phosphoricus.* Essentially the same as *Æ. phosphoratus* (*q. v.*). [B, 97.]—**Æ. prussicus.** Ethyl cyanide. [A, 316.]—**Æ. purus.** Stronger ether. [B.] See Ethyl ether.—**Æ. pyroaceticus.** Acetone. [B, 81.]—**Æ. rectificatus.** Stronger ether. [B.] See Ethyl ether.—**Æ. spirituosus.** 1. Ethyl ether. [B, 88.] 2. Impure ethyl ether mixed with alcohol. [B, 97.] See *Spiritus ætheris.*—**Æ. sulfuricus.** [Fr. Cod.]. Fr., *éther dit sulfurique.* Sulphuric ether; ordinary ethyl ether. [B, 113.]—**Æ. sulfuricus alcoolisatus.** See *Spiritus ætheris.*—**Æ. sulphurico-alcoholicus oxydulatus ferratus, Æ. sulphurico-ferratus.** See *Tinctura* ferri chlorati *œtherea.*—**Æ. sulphuricus.** See the major list.—**Æ. terebinthinatus.** Fr., *éther térébinthiné.* An ethereal solution of oil of turpentine, formed either directly by dissolving the latter in ether, or indirectly by distilling the oil with alcohol and nitric acid; used in cholo-lithiasis. [B, 119.]—**Æ. valerianicus.** Valerianic ether; ethyl valerianate. [B, 108.]—**Æ. venalis.** Commercial ether. [B, 95.] See under Ethyl ether.—**Æ. vitrioli.** Sulphuric ether; ethyl ether. [B.]—**Æ. vitrioli aquosus.** See Liquor *anodynus mineralis aquosus.*—**Æ. vitriolicus.** See the major list.—**Æ. zinci.** See *Æ.* zinci.—**Nitrous æ.** See Nitrous ether.—**Spiritus ætheris** [U. S. Ph., Br. Ph.]. Fr., *éther officinal alcoolisé* [Fr. Cod.], *liqueur anodine d′Hoffmann.* Ger., *Aetherweingeist* [Ger. Ph.], *Hoffmann′sche Tropfen.* It., *spirito di etere.* Syn.: *Spiritus œthereus* [Ger. Ph.], *œ. sulfuricus alcoolisatus* [Fr. Cod.], *œ. sulphuricus alcoholicus* seu *alcoholisatus* [Belg. Ph.], *liquor anodynus mineralis Hoffmanni.* Spirit of ether. A solution of ether in alcohol containing in 100 parts 30 parts by weight of stronger ether [U. S. Ph.], 33 parts by volume (30 parts by weight) of ether [Br. Ph.], 25 parts by weight of stronger ether [Ger. Ph., Aust. Ph., Dan. Ph., Ph. of Campagna], 33 parts [Russ. Ph.], 50 parts by volume (47 by weight) of ether [Belg. Ph.], 50 parts by weight of absolute ether [Fr. Cod.]. It is a clear, colorless liquid of ethereal odor varying in sp. gr. from ·783 [Fr. Cod.] to ·811 [Ger. Ph.]. [B, 5, 10.]—**Spiritus ætheris aromaticus.** See *Spiritus œtheris sulphuricus aromaticus.*—**Spiritus ætheris compositus** [U. S. Ph., Br. Ph.]. Fr., *liqueur nervine de Bang.* Ger., *zusammengesetzter Aetherweingeist.* It., *spirito di etere composto.* Syn.: *Hoffmann′s anodyne.* Compound spirit of ether. A preparation made up of stronger ether 30 parts, alcohol 67 parts, and ethereal oil 3 parts. The British preparation is made up of ether 8 fluidounces (29 parts), alcohol 16 fluidounces (68·2 parts), and ethereal oil 3 fluidrachms (2·8 parts). It is a colorless liquid of sweetish burning taste and

peculiar odor. [B, 5, 94.]—**Spiritus ætheris ferratus.** See *Tinctura* FERRI CHLORATI *ætherea*. — **Spiritus ætheris nitratus.** Nitrous ether; ethyl nitrite. [B, 97.]—**Spiritus ætheris nitrosus.** See *Spiritus* ÆTHERIS NITROSI.—**Spiritus ætheris sulphuricus aromaticus** [Lond. Ph. (1824)]. Syn: *æ. sulphuricus cum alcohole aromaticus* [Ed. Ph. (1826)]. An infusion of cinnamon, cardamom, long pepper, and [in Lond. Ph.] ginger in spirit of ether. [B, 97.]—**Spiritus ætheris vinosus.** Ether more or less pure mixed with alcohol. [B, 97.] See *Spiritus ætheris*.—**Sulphuric æ.** See ETHYL ETHER.—**Syrupus ætheris, Syrupus cum æthere** [Fr. Cod.]. See *Sirop d'*ÉTHER.—**Vitriolic æ.** See ETHYL ETHER.

AETHER (Ger.), n. A'te^{2}r. Ether.—**A'artig.** Ethereal. [B.] —**A'camphersäure.** Ethylcamphoric acid. [A, 324.]—**A'dampf.** Ether vapor. [B.]— **A'doppelschwefelsäure.** Ethionic acid. [B, 48.]—**A'douche.** An apparatus for throwing a spray of ether. [A.]—**A'einathmung, A'inhalation.** The inhalation of ether vapor. [B.]—**A'narcose, A'narkose.** Narcosis produced by ether. [B.]—**A'öl.** Heavy oil of wine; ethereal oil. [B.]—**A'rausch.** Intoxication produced by ether. [B.]—**A'säure.** 1. Aldehydic acid. 2. An acid in which ethyl or some other alcohol radicle replaces part of the acid hydrogen. [B, 108, 120.]—**A'schwefelsäure.** See the major list.—**A'sulfkohlensäure.** Xanthic acid. [A, 324.]— **A'weingeist.** See the major list. — **A'weinsäure, A'weinsteinsäure.** Ethyltartaric acid. [B, 48.] See ETHYL *tartrate*.—**Aethylä'.** Ethyl ether. [B.]—**Ameisenä'.** Formic ether; ethyl formate. [B, 108.]—**Ammoniakhaltiger A.** See ÆTHER *ammoniacalis*.—**Arans A., Aran'scher A.** See ÆTHER *anæstheticus Aranii*.—**Baldrianä'.** Valerianic ether; ethyl valerianate. [B, 108.]—**Benzoeä'.** Benzoic ether; ethyl benzoate. [B, 49.]—**Bromä'.** Ethyl bromide. [B, 108.]—**Butterä'.** Butyric ether; ethyl butyrate. [B, 49.] See also SALZÄTHER.— **Schwefelä'.** Sulphuric ether; ethyl ether. [B, 49.]—**Zusammengesetzter A.** See *Compound* ETHER.

ÆTHER ACETICUS [U. S. Ph., Ger. Ph., Fr. Cod.] (Lat.), n. m. A^{2}s(a^{3}k)-e^{2}t'i^{2}k-u^{3}s(u^{4}s). Acetic ether, or ethyl acetate; especially a pharmaceutical preparation consisting of ethyl acetate with small quantities of alcohol and water. [A; B, 95.]—**Æ. a. martialis.** See *Tinctura* FERRI ACETATIS.—**Spiritus ætheris acetici.** Syn.: *liquor anodynus vegetabilis Westendorfii.* A mixture of 1 part of acetic ether (ethyl acetate) with 3 parts of alcohol. Used as a stimulant and antispasmodic. [B, 108.]

ÆTHERAN PHOSPHORATUS (Lat.), n. m. E'(a^3'e^2)-the^2-(tha)-ra^{2}n(ra^{3}n) fo^{2}s-fo-ra(ra^3)'tu^{3}s(tu^{4}s). [B, 3.] See ÆTHER *phosphoratus*.

ÆTHER CHLORATUS (Lat.), n. m. Klor-a(a^3)'tu^{3}s(tu^{4}s). Hydrochloric ether; ethyl chloride. [B.]—**Æ. c. alcoholicus.** See *Spiritus ætheris chlorati*.—**Æ. c. Aranii.** See Æ. *anæstheticus Aranii*.—**Æ. c. spirituosus.** See *spiritus ætheris chlorati*.— **Spiritus ætheris chlorati** [Ger. Ph., 1st ed.]. It., *spirito di sale dolce o muriatico-etereo.* Syn.: *æ. chlorhydricus alcoholicus, æ. c. spirituosus* [Dan. Ph.]. Alcoholic muriatic ether. A solution of ethyl chloride in alcohol, made by distilling a mixture of sodium chloride and manganese dioxide with a mixture of alcohol and sulphuric acid. It is a colorless liquid of peculiar ethereal odor and somewhat aromatic taste. [B, 10.]

ÆTHÉRÉ (Fr.), adj. A-ta-ra. Ethereal. See ÉTHÉRÉ.

ÆTHEREAL, adj. E-the're-a^{2}l. See ETHEREAL.

ÆTHEREO-OLEOSUS (Lat.), adj. E'(a^3'e^2)-the(tha)''re^2-o-ole(le^2)-o'su^{3}s(su^{4}s). Containing a volatile or essential oil. [A, 313.]

ÆTHEREUS (Lat.), adj. E(a^3-e^2)-the(tha)'re^2-u^{3}s(u^{4}s). More correctly written *ætherius*. From Gr., αἰθέριος, of or belonging to the æther or upper air. 1. Of or pertaining to the æther or upper air; hence in botany, aerial. 2. Of or pertaining to ether. Ethereal. [B, 1, 114.]

ÆTHER FERRATUS (Lat.), n. m. Fe^{2}r-ra(ra^3)'tu^{3}s(tu^{4}s). A compound of ether and iron. [B.]—**Alcohol vitriolicus ætheris ferrati.** See *Tinctura* FERRI CHLORATI *ætherea*.

ÆTHERIA (Lat.), n. f. E(a^3-e^2)-the(tha)'ri^2-a^3. Fr., *æthérie*. A genus of orchidaceous plants growing in Central Asia and in Java. [B, 19, 38.]

ÆTHERIAL, adj. E-the'ri^2-a^{2}l. Ethereal.

AETHERID (Ger.), n. A-ta-ri^{2}d'. An etheride (*q. v.*). [B, 120.]

AETHERIN (Ger.), n. A-ta-ren'. Etherin. [B.]—**A'ammonium.** See ETHERIN *ammonium*.

ÆTHERINUM (Lat.), n. n. E^{2}th(a^3-e^{2}th)-e^{2}r-i(e)'-nu^{3}m(nu^{4}m). Etherin. [B, 120.]

ÆTHERISATIO (Lat.), n. f. E(a^3-e^2)-the^2-ri^{2}z-a(a^3)'shi^2(ti^2)-o. Gen., *ætherisatio'nis*. Also written *etherisatio*. Etherization. [E.]

AETHERISATION (Ger.), n. A-ta-re-za^3-tze-on'. Etherization.

ÆTHERISATUS (Lat.), adj. E(a^3-e^2)-the^2-ri^2-za(sa^3)'tu^{3}s(tu^{4}s). Also written *etherisatus*. Etherized. [E.]

AETHERISCH (Ger.), adj. A'ta-ri^{2}sh. Ethereal.

AETHERISIREN (Ger.), v. tr. A-ta-re-ze're^{2}n. To etherize.

ÆTHERISMUS (Lat.), n. m. E(a^3-e^2)-the^2-ri^{2}z(ri^{2}s)'mu^{3}s(mu^{4}s). Ger., *Aetherismus*. Etherism.

ÆTHERIUS (Lat.), adj. E(a^3-e^2)-the(tha)'ri^2-u^{3}s(u^{4}s). The more correct form of *æthereus* (*q. v.*). [B, 114.]

ÆTHER NITRICUS (Lat.), n. m. Ni(ne)'tri^2-ku^{3}s(ku^{4}s). Nitrous ether; ethyl nitrite. [B, 97.]—**Æ. n. alcoholicus, Æ. n. alcoolisatus, Spiritus ætheris nitrici.** See *Spiritus* ÆTHERIS NITROSI.

ÆTHER NITROSUS (Lat.), n. m. Ni(ne)-tro'su^{3}s(su^{4}s). Nitrous ether; ethyl nitrite. [B.]—**Spiritus ætheris nitrosi** [U. S. Ph., Br. Ph., Ger. Ph.]. Fr., *acide azotique alcoolisé* [Fr. Cod.], *esprit de nitre dulcifié*. Ger., *versüsster Salpetergeist* [Ger. Ph.]. It., *spirito di etere nitroso, spirito di nitro dolce.* Syn.: *spiritus nitri dulcis* [Br. Ph. (1867)], *acidum nitricum alcoolisatum* [Fr. Cod.], *æ. nitricus alcoolisatus* seu *alcoholicus* [Belg. Ph.]. Spirit of nitrous ether, alcoholic nitrous ether, sweet spirit of nitre. An alcoholic solution of ethyl nitrite, prepared by the action of nitric acid upon alcohol, the nitric acid being converted in the process into nitrous acid by methods which differ in the different Pharmacopœias. The strength of the solution and its sp. gr. vary according to the method of preparation. The *spiritus ætheris nitrosi* of the U. S. Ph. has a sp. gr. of ·823, contains 5 per cent. of ethyl nitrite, and is prepared by distilling nitric acid 9 parts with a mixture of alcohol 31 parts and sulphuric acid 7 parts, washing the distillate with water, separating from it the ethereal layer of ethyl nitrite and dissolving the latter in 19 parts of alcohol. The Br. preparation has a sp. gr. of ·845, contains about 10 per cent. of ethyl nitrite, and is prepared by distilling a mixture of alcohol 20 fl. oz., sulphuric acid 2 fl. oz., nitric acid 3 fl. oz., and copper wire 2 oz., and diluting 15 fl. oz. of the distillate with 40 fl. oz. of alcohol. The preparation of the Ger. Ph. has a sp. gr. of ·840 to ·850, and is made by distilling 1 part of nitric acid and 3 parts of alcohol; that of the Fr. Codex is a simple mixture of alcohol 3 parts with 1 part of an aqueous solution of nitric acid containing 47 per cent. of the pure acid; that of the Belg. Ph. resembles the German except in the somewhat greater amount of nitric acid employed, in the addition before distillation of 1 part of sugar to every 10 parts of alcohol, and in its higher sp. gr. (·850 to ·860). Spirit of nitrous ether is a straw-colored, mobile, very volatile and inflammable liquid, having a sharp burning taste and a fragrant odor. It regularly contains a small amount of acetic aldehyde and water, and, by long exposure to the air and light, the aldehyde is converted into acetic acid, and various gaseous oxides of nitrogen are generated from decomposition of the ethyl nitrite. [B, 5, 10, 81.]

AETHEROL (Ger.), n. A-ta-rol'. Etherol. [B.]

ÆTHEROLATUM (Lat.), n. n. E(a^3-e^2)-the^{2}r-o-la(la^3)'tu^{3}m-(tu^{4}m). See ÉTHÉROLAT.

ÆTHEROLATURA (Lat.), n. f. E^{2}th(a^3-e^{2}th)-e^{2}r-o-la^3-tu^2-(tu)'ra^3. See ÉTHÉROLATURE.

ÆTHEROLEUM (Lat.), n. n. E^{2}th(a^3-e^{2}th)-e^{2}r-o'le^2-u^{3}m(u^{4}m). 1. Etherol. [B, 120.] 2. A volatile oil. [B, 48, 88.] Cf. Æ. ANETHI, Æ. ANISI, etc.

ÆTHEROLICUM (Lat.), n. n. E^{2}th(a^3-e^{2}th)-e^{2}r-o^{2}l'i^2-ku^{3}m-(ku^{4}m). For deriv., see ÆTHER. An ethereal compound, or preparation made with ether. [B, 120.]

ÆTHEROLOTIVUM (Lat.), n. n. E^{2}th(a^3-e^{2}th)-e^{2}r-o^{2}l-o-ti(te)'-vu^{3}m(wu^{4}m). See ÉTHÉROLOTIF.

AETHERSCHWEFELSÄURE (Ger.), n. A-tar-shwa'fe^{2}l-zoi-re^2. 1. Ethylsulphuric acid. [B, 49.] See ETHYL *sulphate*. 2. A sulphonic acid derived from ethyl or some other hydrocarbon radicle, or from a compound of such a radicle. [B.]—**Aromatische A.** A sulphonic acid derived from a hydrocarbon of the aromatic group. [B, 108.]

ÆTHER SULPHURICUS (Lat.), n. m. Su^{3}l(su^{4}l)-fu^2(fu)'ri^2-ku^{3}s(ku^{4}s). Sulphuric or ethyl ether; the official term in the Greek Ph. [B, 95.]—**Æ. s. acidus.** See MIXTURA *sulfurica acida*.—**Æ. s. alcoholicus, Æ. s. alcoholicatus.** A more or less pure alcoholic solution of ethyl ether. [B, 97.] See *Spiritus* ÆTHERIS.—**Æ. s. camphoratus aquosus.** A mixture of an ethereal solution of camphor with water. [B, 97.]—**Æ. s. crudus.** Commercial ether. [B.] See ETHYL ETHER.—**Æ. s. cum alcohole** [Ed. Ph. (1826)]. A mixture of ether 1 part and alcohol 2 parts. [B, 97.] See *Spiritus* ÆTHERIS.—**Æ. s. cum alcohole aromaticus.** 1. See *Spiritus* ÆTHERIS *sulphuricus aromaticus*. 2. See ACIDUM SULPHURICUM *aromaticum*.—**Æ. s. ex alcohole.** See *Spiritus* ÆTHERIS.—**Æ. s. ferratus, Æ. s. martiatus.** See *Tinctura* FERRI CHLORATI *ætherea*. —**Æ. s. phosphoratus.** See Æ. *phosphoratus*.—**Spiritus ætheris sulphurici.** See *Spiritus* ÆTHERIS.—**Syrupus cum æthere sulphurico paratus.** See *Sirop d'*ÉTHER.

ÆTHER VITRIOLICUS (Lat.), adj. Vi^{2}t(wi^{2}t)-ri^2-o^{2}l'i^2-ku^{3}s-(ku^{4}s). Vitriolic, or ethyl, ether. [B.]—**Æ. v. ferratus, Æ. v. martialis, Æ. v. martiatus.** See *Tinctura* FERRI CHLORATI *ætherea*.—**Spiritus ætheris vitriolici.** 1. Sulphuric ether. [B, 69.] 2. Ether mixed with alcohol. [B, 97.] See *Spiritus* ÆTHERIS. —**Spiritus ætheris vitriolici compositus.** A preparation of the old Lond. Ph. corresponding to *spiritus ætheris compositus*. [B, 69.]

AETHERWEINGEIST (Ger.), n. A-tarvin'gist. The official synonym for the spiritus æthereus of the Ger. Ph. See *Spiritus* ÆTHERIS.—**Chloreisenhaltiger A.** See *Tinctura* FERRI CHLORATI *ætherea*.—**Zusammengesetzter A.** See *Spiritus* ÆTHERIS *compositus*.

AETHES (Lat.), adj. A(a^3)-e(a)'thez(thas). Gr., ἀήθης, unusual. Unwonted, extraordinary; an epithet applied to the sputum. [B, 111.]

AETHIDEN (Ger.), n. A-ti^2-dan'. Ethidene (ethylidene). For compounds see under AETHYLIDEN.—**A'milchsäure.** Ethylidene lactic acid. [B.] See LACTIC ACID.

AETHIL (Ger.), n. A-tel'. Acetylene. [B, 49.]

AETHIN (Ger.), n. A-ten'. Ethine; acetylene. [B.]

AETHINYL (Ger.), n. A-te-nu^{6}l′. Ethinyl. [B.]—**A'bromür.** Ethinyl bromide. [B.]—**A'pentabromür.** Ethinyl pentabromide. [B.]—**A'pentachlorür.** Ethinyl pentachloride. [B.]—**A'tribromür.** Ethinyl tribromide. [B.]—**A'trichlorür.** Ethinyl trichloride. [B.]

AETHIONAT (Ger.), n. A-te-o-na^{3}t′. Ethionate.

ÆTHIONEMA (Lat.), n. f. E^{2}th(a^3-e^{2}th)-i^2-o-ne(na)′ma^3. Gen., *æthionem'atos* (*-tis*). From αἰθός, burnt, and νῆμα, a filament or stamen. Fr., *æthionème*. A genus of cruciferous plants established by R. Brown. [B, 48, 71.]

AETHIONSÄURE (Ger.), n. A′te-on-zoi-re^2. Ethionic acid. —**A'anhydrid.** Ethionic anhydride. [B.]

ÆTHIOPICÆ (Lat.), n. f. pl. E^{2}th(a^3-e^{2}th)-i^2-o^{2}p′i^2-se(ka^3-e^2). For deriv., see ÆTHIOPS. Medicines having a black color. [B, 59.]

ÆTHIOPICUS (Lat.), adj. E^{2}th(a^3-e^{2}th)-i^2-o^{2}p′i^{2}k-u^{3}s(u^{4}s). Of or pertaining to a negro. See ALPHOSIS *æthiopica*.

ÆTHIOPIFICATIO (Lat.), n. f. E^{2}th(a^3-e^{2}th)-i^2-o^{2}p-i^2-fi^2-ka-(ka^3)′shi^2(ti^2)-o. Gen., *æthiopificatio'nis*. From *Æthiops* (*q. v.*), and *facere*, to make. Pigmentation of the skin from the application of mercurial or sulphurous ointments or the internal use of silver nitrate. [B, 78.]

ÆTHIOPIOSIS (Lat.), n. f. E^{2}th(a^3-e^{2}th)-i-o^{2}p-i^2-o′si^{2}s. Gen., *æthiopio'seos* (*-sis*). For deriv., see ÆTHIOPS. The act of making black, or of becoming black and discolored. [B, 78.]

ÆTHIOPIS (Lat.), n. f. E^{2}th(a^3-e^{2}th)-i(e)′o-pi^{2}s. Gen., *æthiop'idis*. Ger., *Mohrenkraut*. 1. A plant described by Dioscorides and Pliny as growing abundantly in hot climates and having thick hairy leaves, quadrangular stalk, and ovaries with 2-seeded cells. It is generally supposed to be a species of sage, the Ethiopian sage or *Salvia æthiopis* of Linnæus, or the silver sage, *Salvia argentea*, but by some it is regarded as the same as the great mullein or *Verbascum thapsus*. It was used in pleurisy, catarrhal affections, and rheumatism. [B, 59, 78, 88, 114.] 2. A plant (probably a species of *Euphorbia*) mentioned by Pliny as useful in dropsy. [Waring (A, 316).]

ÆTHIOPISMUS (Lat.), n. m. E^{2}th(a^3-e^{2}th)-i^2-o-pi^{2}z(pi^{2}s)′-mu^{3}s(mu^{4}s). From αἰθιοπίζειν, to be like an Ethiopian. The act or condition of becoming black or discolored. [B, 78.]

ÆTHIOPOLEUCOPHLEGMATIA (Lat.), n. f. E^{2}th(a^3-e^{2}th)-i(e)″o-po-lu^2-ko-fle^{2}g-ma(ma^3)′shi^2(ti^2)-a^3. For deriv., see ÆTHIOPS and LEUCOPHLEGMATIA. Syn.: *phegmatia Æthiopum*. A sort of chlorosis occurring in negroes. [B, 78.]

ÆTHIOPOPOESIS (Lat.), n. f. E^{2}th(a^3-e^{2}th)-i-o″po-po-e(a)′-si^{2}s. Gen., *æthiopopoe'seos* (*-sis*). From *Æthiops*, and ποιεῖν, to make. See ÆTHIOPIOSIS.

ÆTHIOPOPROCALYMMA (Lat.), n. n. E^{2}th(a^3-e^{2}th)-i(e)″-o-po-pro-ka^{2}l-i^{2}m(u^{6}m)′ma^3. Gen., *æthiopoprocalymm'atos*. From *Æthiops*, and προκάλυμμα, a veil. See *Hottentot* APRON.

ÆTHIOPS (Lat.), n. m. E(a^3-e^2)′thi^2-o^{2}ps. Gen., *æthi'opis*. Gr., αἰθίοψ, an Ethiopian, literally, a burnt face, from αἴθειν, to burn, and ὤψ, the face. Fr., *æthiops*, *éthiops*. Ger., *Mohr*, *Metallmohr* (2d def. only). It., Sp., *etiope*. Also written *ethiops*. 1. An Ethiopian. 2. Ploucquet's name for an albino. [Good (A, 357).] 3. An old pharmaceutical term for many black, finely pulverized mineral preparations. [B, 2, 78.]—**Æ. albus.** Fr., *nègre blanc* (1st def.). Ger., *weisser Neger* (1st def.). 1. An albino. [A.] 2. Mercury with chalk. [B, 59.] See HYDRARGYRUM *cum creta*.—**Æ. alcalisatus.** Mercury with chalk; especially an old pharmaceutical preparation in which mercury was triturated with powdered crab's-eyes. [B, 88, 119.]—**Æ. animalis.** Fr., *æ.* ou *éthiops animal*. Ger., *Thiermohr*. It., *etiope animale*. Sp., *etiope animal*. 1. Impure animal charcoal obtained by the incineration of small animals. 2. A preparation made by heating together equal parts of mercury and cuttle-fish bone. [B, 78, 119.]—**Æ. antimonial** (Fr.). See Æ. ANTIMONIALIS.—**Æ. antimonial de Huxham** (Fr.). Huxham's æ. antimonialis. See Æ. ANTIMONIALIS.—**Æ. antimonial de Malouin** (Fr.). Malouin's æ. antimonialis. See Æ. ANTIMONIALIS.—**Æ. antimonialis.** See the major list.—**Æ. antimoniato-mercurialis.** See Æ. ANTIMONIALIS.—**Æ. antimonii.** See Æ. ANTIMONIALIS.—**Æ. antiphthysicus.** A mixture of mercury and balsam of Peru. [B, 59.]—**Æ. antirrheumaticus.** A mixture of mercury and guaiac resin. [B, 59.]—**Æ. auratus.** A preparation made by triturating together equal parts of mercury and antimony pentasulphide. [B, 48.]—**Æ. auripigmentalis.** Fr., *æ.* ou *éthiops orpimental*. Ger., *Arsenikmohr*. A mixture of 1 part of mercury and 2 parts of orpiment. [B, 48.]—**Æ. cretaceus.** Fr., *æ.* ou *éthiops calcaire*. It., *etiope calcare*. See HYDRARGYRUM *cum creta*.—**Æ. cupri.** A preparation consisting of a mixture of cupric carbonate and mercury, used as a remedy against epilepsy. [B, 48.]—**Æ. de Malouin** (Fr.). Malouin's æ. antimonialis. [B, 88.] See Æ. ANTIMONIALIS.—**Æ. diureticus.** A preparation made up of mercury mixed with juniper gum. [B, 59.]—**Æ. ferricus.** See *Æ. martialis*.—**Æ. graphiticus.** Fr., *æ.* ou *éthiops graphitique*. It., *etiope grafitico*. Syn.: *mercure charbonneux*. A mixture of 1 part of mercury and 2 parts of charcoal or graphite, recommended in herpes. [B, 46, 48.]—**Æ. gummosus.** Fr., *æ.* (ou *éthiops*) *gommeux*. It., *etiope gommoso*. Syn.: *pulvis mercurialis gommosus*, *mucilago mercurialis* seu *hydrargyri*. Mercury triturated to the point of extinction with gum arabic or mucilage. [B, 46, 119.] Cf. MUCILAGO *mercurialis* and *Mucilago* HYDRARGYRI.—**Æ. hypnoticus, Æ. hypopnoicus.** Fr., *Æ. hypnotique*. Ger., *Schweissmohr*. Black sulphide of mercury prepared by precipitation. It was used as a diaphoretic; hence the epithet *hypopnoicus* which was afterward corrupted to *hypnoticus*, and, from the false meaning thus attached to the term, *æ. narcoticus* was often used as a synonym. [B, 78.]—**Æ. jovialis.** Ger., *Zinnmohr*. A mixture of equal parts of tin, mercury, and sulphur, asserted to act as a tæniacide. [B, 59.]—**Æ. magnesiacus.** Fr., *æ.* ou *éthiops magnésien*. It., *etiope magnesiaco*. A preparation made by triturating together 16 parts each of mercury and manna and 1 part of magnesia, then washing with water to withdraw the manna, and adding 2 parts of magnesia. [O. Reveil (B, 46).] Other authorities give slightly different formulas.—**Æ. martialis.** Fr., *æ.* ou *éthiops martial*. Ger., *Eisenmohr*. It., *etiope marziale*. Sp., *etiope marcial*. Martial æ. Magnetic oxide of iron artificially prepared by infusing iron filings in water until they are reduced to an inky-black powder. [B, 59.]—**Æ. mercurialis.** Fr., *æ.* ou *éthiops mercuriel*. It., *etiope mercuriale*. See *Æ. mineralis* and *Æ. hypopnoicus*.—**Æ. mercurii per se.** See *Æ. per se*.—**Æ. mineral.** See *Æ. mineralis* and the major list.—**Æ. mineralis.** Fr., *æ.* ou *éthiops minéral*. Ger., *Mineralmohr*. It., *etiope minerale*. Sp., *etiope mineral*. Syn.: *sulphuretum hydrargyri nigrum* seu *simplex*, *hydrargyrus cum sulphure*, *hydrargyrus sulphuratus niger*, *mercurius cum sulphure*, *pulvis hypnoticus*. Æ. mineral, mercury with sulphur. A preparation consisting of mercury and sulphur triturated together. In the Lond. Ph. (1824), Ed. Ph. (1826), Dubl. Ph. (1830), U. S. Ph. (1820), and many others, equal parts of the two ingredients were employed; in the Fr. Codex (1818) and some other formularies, 2 parts of mercury to 1 part of sulphur were used; and still other proportions were given in other Pharmacopœias. Van Mons describes 4 kinds: (1) *Æ. mineral, sulphur triturated with mercury*, a mixture of 1½ part of sulphur and 19 parts of mercury. (2) *Æ. mineral of Harris*, made by triturating mercury with one twelfth of its weight of sulphur till the mercury is extinguished, then adding another twelfth part of sulphur, triturating once more, and repeating these successive processes of addition and trituration until an amount of sulphur equal to that of the mercury has been employed. (3) *Oxydulated æ. mineral*, Lat., *æ. mineralis oxydulatus*, made by triturating together 3 parts of sulphur, 21 of mercury (19 parts, B, 97), and 20 parts of red oxide of mercury. (4) *Double æ. mineral*, a mixture of 1½ part of sulphur and 9 parts of mercury. Æ. mineralis, although regarded as a sulphide of mercury, is probably only a simple mixture of mercury and sulphur. It was used formerly in the treatment of syphilis and as an anthelmintic. [B, 48, 97.]—**Æ. mineralis fusione paratus.** A preparation made by mixing mercury with melted sulphur. [B, 48.]—**Æ. mineralis oxydulatus.** See under *Æ. mineralis*.—**Æ. mineralis stibiatus.** See Æ. ANTIMONIALIS.—**Æ. mineralis via humida paratus.** A preparation made by triturating at a gentle heat equal parts of sulphate of mercury, sulphur, and a solution of liver of sulphur (sulphurated potassa). [B, 48.]—**Æ. minéral stibié** (Fr.). See Æ. ANTIMONIALIS.—**Æ'mohr** (Ger.). See *Æ. mineralis*.—**Æ. narcoticus.** Fr., *Æ. narcotique*. Ger., *betäubender Mohr*. It., *etiope narcotico*. See *Æ. hypnoticus*.—**Æ. orpimentalis.** See *Æ. auripigmentalis*.—**Æ. per se.** Fr., *æ.* ou *éthiops per se*. It., *etiope per se di Boerhaave*. A preparation described by Boerhaave consisting of a gray powder made either by exposing impure mercury to the air or by triturating mercury either with or without the addition of mucilage. [B, 2, 59, 93.]—**Æ. platinicus.** Ger., *Platinmohr*. Platinum black. [B, 48.]—**Æ. purgans.** A mixture of mercury with calomel or jalap. [B, 59.]—**Æ. saccharatus.** Fr., *æ.* ou *éthiops saccharin*. It., *etiope saccarato*. See HYDRARGYRUM *saccharatum*.—**Æ. vegetabilis.** Fr., *æ.* ou *éthiops végétal*. Ger., *Pflanzenmohr*. It., *etiope vegetale*. Sp., *etiope vegetal*. Vegetable æ. 1. Charcoal obtained by the combustion of sea-weed such as the *Fucus vesiculosus*. It was used as an application to scrofulous swellings. [B, 46, 59.] 2. Soot. [B, 97.] 3. Roasted opium. [B, 46.]—**A. vegetabilis suberinus.** Burnt cork. [B.]—**Animal æ.** See *Æ. animalis*.—**Antimonial æ.** See Æ. ANTIMONIALIS.—**Martial æ.** See *Æ. martialis*.—**Orpimental æ.** See *Æ. auripigmentalis*.—**Phlegmatia Æthiopum.** See ÆTHIOPOLEUCOPHLEGMATIA.—**Vegetable æ.** See *Æ. vegetabilis*.

ÆTHIOPS ANTIMONIALIS (Lat.), n. m. A^{2}n(a^{3}n)-ti^2-mo-ni^2-a(a^3)′li^{2}s. Fr., *æ.* ou *éthiops antimonial*. Ger., *Spiessglanzmohr*. It., *etiope antimoniale*. Sp., *etiope antimonial*. Syn.: *sulphuretum hydrargyri et stibii*, *sulphuretum hydrargyri stibiatum* sive *antimoniatum*, *hydrargyrum stibiato-sulphuratum*. Any combination of mercury and antimony of a black color; especially sulphide of antimony and mercury made by triturating together 4 parts of mercury, 2 of sulphur, and 3 of antimony trisulphide, until the mercury is extinguished. This is Huxham's preparation. That of Malouin was made by triturating 2 parts of antimony pentasulphide with 1 part of mercury. Other preparations were made by mixing crude antimony (native sulphide of antimony) with sea-salt and adding mercury, or by mixing 3 parts of mercury and 1 part of kermes mineral. Æ. a. was formerly official in many Pharmacopœias, and was used as a diaphoretic and alterative. [B, 10, 46, 48, 59, 119.]—**Æ. a. Huxhami.** Huxham's æ. a. See *Æ. a.*—**Pulvis ex æthiope antimoniali.** Syn.: *pulvis ex hydrargyro stibiato-sulphurato*. A mixture of 6 grains of æ. a. and 10 grains of licorice root, or of 5 grains of æ. and 15 grains of licorice root. [B, 97.]

ÆTHIOPS MINERAL, n. Mi^{2}n′u^{3}r-a^{2}l. Also written *ethiops mineral*. See *Æ. mineralis*.—**Æ. m. of Harris, Double æ. m., Oxydulated æ. m.** See *Æ. mineralis*.

ÆTHIOPUS (Lat.), n. m. E^{2}th(a^3-e^{2}th)-i(e)′o-pu^{3}s(pu^{4}s). Æthiops.—**Æ. albus.** See HYDRARGYRUM *cum creta*.

AETHMETHOXALSÄURE (Ger.), n. Atme^{2}t-o^{2}x′a^{3}l-zoi-re^2. Ethmethoxalic acid.

ÆTHMOID, adj. and n. E^{2}th′moid. See ETHMOID.

ÆTHOCES (Lat.), n. f. pl. E^{2}th′(a^3′e^{2}th)-o-sez(ke^{2}s). Gen., *æth'ocum*. Ætholices. See ÆTHOLIX.

ÆTHOGEN, n. E^{2}th′o-je^{2}n. From αἴθων, brilliant, and γίγνεσθαι, to become. Fr., *éthogène*. Ger., *Aethogen*. Also written *ethogen*. A compound of nitrogen with boron, so called on account of its intense brilliancy when heated by the blow-pipe. [B, 7.]

ÆTHOKIRRHIN, n. E^{2}th″o-ki^{2}r′ri^{2}n. From αἴθων, brilliant, and κιρρός, tawny yellow. Fr., *étho-kirrhine* [B, 107]. Ger., *Aethokirrin*. A yellow coloring matter obtained from the flowers of the

Antirrhinum linaria (*Linaria vulgaris* [Linnæus]). It is crystalline, devoid of taste or odor, very soluble in alcohol and the oils, difficultly soluble in water. [B, 2, 48, 107.]

ÆTHOLIX (Lat.), n. f. E^{2}th'(a^3'e^{2}th)-o-li^{2}x. Gen., *æthol'icis.* Gr., αἰθόλιξ (from αἴθειν, to light up, kindle). A fiery pustule of the skin [A]; or a "superficial pustule of the skin raised by heat" [B, 59], or rather a bulla produced by heat. [B, 78.]

AETHOMETHOXALSÄURE (Ger.), n. A-to-me^{2}t-o^{2}x'a^{3}l-zoi-re^2. Etemethoxalic acid.

ÆTHOMMA (Lat.), n. n. E^{2}th(a^3-e^{2}th)-o^{2}m'ma^3. Gen., *æthom'-matis.* From αἰθός, burnt, brown-red, and ὄμμα, the eye (1st def.); Gr., αἶθος, burning or heat, and ὄμμα (2d def.). Fr., *œil de loup* (ou *de mauvais garçon*) (1st def.). Syn.: *oculus leoninus* (1st def.). 1. That condition of the eye in which the humors and tunics are black or pigmented. [Ambroise Paré (B).] 2. A name given by C. G. Kühn to that morbid condition in which flashes of light and flame appear before the eye. [B, 48, 78.]

AETHOXACETSÄURE (Ger.), n. At-o^{2}x-a^{3}tz'e^{2}t-zoi-re^2. Ethoxyacetic acid.

AETHOXYBUTTERSÄURE (Ger.), n. At-o^{2}x-u^6-but'te^{2}r-zoi-re^2. Ethoxybutyric acid.

AETHOXYCHINOLIN (Ger.), n. At-o^{2}x-u^6-ch^{3}i^{2}n'o-len. Ethoxyquinoline. [B.]

AETHOXYHYDROÄTHYLCHINOLIN (Ger.), n. At-o^{2}x-u^6-hu^6-dro-at-u^{6}l-ch^{3}i^{2}n'o-len. Ethoxyhydroethylquinoline. [B.] See ETHYLKAIRINE.

AETHOXYHYDROCHINOLIN (Ger.), n. At-o^{2}x-u^6-hu^6-dro-ch^{3}i^{2}n'o-len. Ethoxhydroquinoline. [B.]—**A'bromid.** Ethoxyhydroquinoline bromide. [B, 79.]

AETHOXYHYDROMETHYLCHINOLIN (Ger.), n. At-o^{2}x-u^6-hu^6-dro-ma-thu^{6}l-ch^{3}i^{2}n'o-len. Ethyoxyhydromethylquinoline. [B, 79.]

AETHOXYKOFFEÏN (Ger.), n. At-o^{2}x-u^6-ko^{2}f'fa-en. Ethoxycaffeine. [B.]

AETHOXYL (Ger.), n. At-o^{2}x'u^{6}l. Ethoxyl.—**A'chinolincarbonsäure.** Ethoxylquinolinecarbonic acid. [B, 79.]—**A'cinchoninsäure.** Ethoxylcinchoninic acid. [B, 79.]—**A'piperidin.** Ethoxylpiperidine. [B, 79.]

AETHOXYPROPIONSÄURE (Ger.), n. At-o^{2}x-u^6-pro'pe-o^{2}n-zoi-re^2. Ethoxypropionic acid. [B.] See ETHYLLACTIC ACID.

ÆTHUSA (Lat.), n. f. E(a^3-e^2)-thu^2(thu)'sa^3. From αἴθειν, to light up, on account of the brilliancy of its leaves, or, according to others, on account of its acridity. Fr., *æthuse, éthuse.* Ger., *Gleisse.* It., *etusa.* A Linnæan genus of annual herbs belonging to the order *Umbelliferæ*, tribe *Seselineæ*, and subtribe *Œnantheæ* (Bentham and Hooker). [B, 46, 104.]—**Æ. cynapium** [Linnæus]. Fr., *petite ciguë, ciguë des jardins, ache des chiens, faux persil.* Ger., *Hundspetersilie, Gartenschierling.* It., *cicuta aglina o dei giardini o minore.* Syn.: *fool's parsley.* A species growing wild in Europe, and also found occasionally in America. It stands about 2 feet in height, has white flowers and dark-green bipinnate or tripinnate leaves, with narrow wedge-shaped segments. It somewhat resembles parsley, from which it is distinguished by its fœtid odor and by the involucels, consisting of 3 linear pendulous bracts found at the base of each partial umbel and exceeding the latter in length. It is said to be an acro-narcotic poison like conium, although recently its poisonous properties have been denied (Harley). It was formerly employed as a stomachic, diuretic, and emmenagogue. [B, 19, 34, 93.]—**Æ. meum** [Linnæus]. Fr., *æthuse meum.* See MEUM *athamanticum.*

ÆTHUSA CYNAPIUM. [B, 49.]

ÆTHUSE (Fr.), n. A-tu^{6}z. Æthusa. [B, 107.]—**Æ. fétide.** Æthusa cynapium. [B, 107.]

ÆTHUSINE, n. E^{2}th'u^2-sen. Fr., *æthusine, éthusine.* Ger., *Aethusin.* The poisonous alkaloid of *Æthusa cynapium.* It is crystalline and forms a crystalline sulphate. [A, 316.]

ÆTHYIA (Lat.), n. f. E^{2}th(a^3-e^{2}th)-i(u^6)'i^2-a^3. From αἴθυια, a sort of bird. See MERGUS.

ÆTHYL (Lat.), n. n. E^{2}th'(a^3'e^{2}th)-i^{2}l(u^{6}l). Indecl. For deriv., see ETHYL. Ethyl. The same form is also occasionally used in Ger. instead of *Aethyl.*—**Æ. bromidum.** Ethyl bromide. [B, 81.]—**Æ. iodidum.** Ethyl iodide. [B, 81.]

AETHYL (Ger.), n. A'tu^{6}l. Ethyl.—**Aepfelsaures A.** Ethyl malate. [B.]—**A'acetamid.** Ethylacetamide. [B.]—**A'acetat.** Ethyl acetate. [B.]—**A'aceton.** Ethylacetone. [B.]—**A'acetoncarbonsäure.** Ethylacetonecarbonic acid. [B.]—**A'acetylen.** Ethylacetylene. [B.] See BUTINE.—**A'aldehyd.** Acetic aldehyde. [B.]—**A'alizarin.** Ethylalizarin. [B.]—**A'alkohol.** Ethyl alcohol. [B.]—**A'allophanat.** Ethyl allophanate. [B.]—**A'allyl.** Ethylallyl. [B.]—**A'allylamin.** Ethylallylamine. [B.]—**A'allylharnstoff.** Ethylallylurea. [B.]—**A'ameisensäure.** Ethylformic (propionic) acid. [B.]—**A'amid.** Ethylamide. [B.]—**A'amidobenzoësäure.** Ethylamidobenzoic acid. [B.]—**A'amidobenzol.** Ethylamidobenzene (amidoethylbenzene). [B.]—**A'amin.** Ethylamine. [B.]—**A'amincarbonat.** Ethylamine carbonate. [B.]—**A'ammelid.** Ethylammelide. [B.] See ETHYL *amidocyanurate.*—**A'ammoniak.** Ethylamine. [B.]—**A'ammonium.** Ethylammonium. [B.]—**A'ammoniumäthylthiocarbamat.** Ethylammonium ethylthiocarbamate. [B.]—**A'ammoniumcarbamat.** Ethylammonium carbamate. [B.]—**A'ammoniumcarbonat.** Ethylammonium carbonate. [B.]—**A'ammoniumchlorür.** Ethylammonium chloride; ethylamine hydrochloride. [B.]—**A'ammoniumsulfat.** Ethylammonium (ethylamine) sulphate. [B.]—**A'amyl.** Ethylamyl. [B.]—**A'amylanilin.** Ethylamylaniline. [B.]—**A'amyläther.** Ethylamyl ether. [B.]—**A'amylharnstoff.** Ethylamylurea. [B.]—**A'amyloxalsäure.** Ethylamyloxalic acid. [B.]—**A'amylphenylamin.** Ethylamylphenylamine; ethylamylaniline. [B.]—**A'amylsulfid.** Ethylamyl sulphide. [B.]—**A'anilin.** Ethylaniline. [B.]—**A'anilinsulfonsäure.** Ethylanilinesulphonic acid. [B.]—**A'äpfelsäure.** Ethylmalic acid. [B.]—**A'arsenlat.** Ethyl arsenate. [B.]—**A'arsenit.** Ethyl arsenite. [B.]—**A'arsinsäure.** Ethylarsinic acid. [B.]—**A'äther.** Ethyl ether. [B.]—**A'äthermilchsäure.** Ethyllactic acid. [B.]—**A'äthylen.**—Ethylethylene. [B.] See BUTYLENE.—**A'benzilsäure.** Ethylbenzilic acid. [B.]—**A'benzoat.** Ethyl benzoate. [B.]—**A'benzochinolin.** Ethylbenzoquinoline. [B.]—**A'benzoësäure.** Ethylbenzoic acid. [B, 4.]—**A'benzol.** Ethylbenzene. [B, 4.]—**A'benzolmonosulfonsäure.** Ethylbenzenemonosulphonic acid. [B.] See ETHYLBENZENESULPHONIC ACID.—**A'benzolsulfonsäure.** Ethylbenzenesulphonic acid. [B.]—**A'benzyläther.** Ethylbenzyl ether. [B.] See BENZYLETHYL ETHER.—**A'bernsteinsäure.** Ethylsuccinic acid. [B.]—**A'bisulfuret.** Ethyl persulphide. [B, 48.]—**A'borat.** Ethyl borate. [B.]—**A'borsäure.** Ethylboric acid. [B.]—**A'brombenzol.** Ethylbrombenzene; bromethylbenzene. [B.]—**A'bromür.** Ethyl bromide. [B.]—**A'brucin.** Ethylbrucine. [B.]—**A'brucinhydrat.** Ethylbrucine hydrate. [B.]—**A'butyl.** Ethylbutyl. [B.]—**A'butyläther.** Ethylbutyl ether. [B.]—**A'butylketon.** Ethylbutyl ketone. [B.]—**A'butyrat.** Ethyl butyrate. [B.]—**A'caffeïdin.** Ethylcaffeidine. [B.]—**A'capronat.** Ethyl caproate. [B.]—**A'caprylat.** Ethyl caprylate. [B.]—**A'capryläther.** Ethylcapryl ether. [B.]—**A'carbamin.** Ethylcarbamine. [B.]—**A'carbammonium.** Ethylcarbammonium. [B.] See ETHYLCARBAMINE.—**A'carbimid.** Ethyl carbimide. [B.] See ETHYL *cyanate.*—**A'carbinol.** Ethylcarbinol; primary propyl alcohol. [B.]—**A'carbonat.** Ethyl carbonate. [B.]—**A'carbonsäure.** 1. Ethylcarbonic acid. 2. Propionic acid. [B.]—**A'carbopyrrolsäure.** Ethylcarbopyrrolic acid. [B.]—**A'carboxylamin.** Ethylcarboxylamine. [B.]—**A'cerotinat.** Ethyl cerotate. [B.]—**A'chinin.** Ethylquinine. [B.]—**A'chinolin.** Ethylquinoline. [B.]—**A'chinolinhydrür.** Ethylquinoline hydride. [B.]—**A'chinon.** Ethylquinone. [B.]—**A'chlorbenzol.** Chlorethylbenzene. [B.]—**A'chlorchinolin.** Ethylchlorquinoline. [B.]—**A'chlorhydrin.** Ethyl chlorhydrin. [B.]—**A'chlorür.** Ethyl chloride. [B.]—**A'citronensäure.** Ethylcitric acid. [B.]—**A'codeïn.** Ethylcodeine. [B.]—**A'coniin.** Ethylconine. [B.]—**A'crotonsäure.** Ethylcrotonic acid. [B.]—**A'cyanamid.** Ethyl cyanamide. [B.]—**A'cyanat.** See the major list.—**A'cyanür.** Ethyl cyanide. [B.]—**A'cyanuramid.** Ethyl cyanuramide. [B.]—**A'diacetsäure.** Geuther's name for ethyl acetoacetate. [B, 2.]—**A'diallylcarbinol.** Ethyldiallylcarbinol. [B.]—**A'diamidocyanurat.** Ethyl diamidocyanurate. [B.]—**A'dibromallylamin.** Ethyldibromallylamine. [B.]—**A'dibromdiallylamin.** Ethyldibromdiallylamine. [B.]—**A'dicarbopyrrolsäure.** Ethyldicarbopyrrolic acid. [B.]—**A'dicyanamid.** Ethyl dicyanamide. [B.] See ETHYL *cyanamide.*—**A'dimethyläthylen.** Ethyldimethylethylene. [B.] See HEXYLENE.—**A'dimethylbenzol.** Ethyldimethylbenzene. [B.]—**A'dimethylcarbinol.** Ethyldimethylcarbinol. [B.] See *Tertiary* AMYL ALCOHOL.—**A'dioxysulfocarbonat, A'dioxythiocarbonat.** Ethyl dioxythiocarbonate. [B.]—**A'diselenid.** Ethyl diselenide. [B.] See ETHYL *selenide.*—**A'disulfid.** Ethyl disulphide. [B.] See ETHYL *sulphide.*—**A'disulfocarbonsäure.** Ethyldisulphocarbonic (xanthic) acid. [B.]—**A'dithiocarbonat, A'dithioxycarbonat.** Ethyl dithiocarbonate. [B.]—**A'divaleriansäure.** Ethyldivaleric acid. [B.]—**A'eisencyanür.** Ethyl ferrocyanide. [B.]—**A'ester.** See the major list.—**A'eugenol.** Ethyleugenol. [B.]—**A'ferrocyanür.** Ethyl ferrocyanide. [B.]—**A'flavanilin.** Ethyl flavaniline. [B.]—**A'fluorür.** Ethyl fluoride. [B.]—**A'formamid.** Ethylformamide. [B.]—**A'formiat.** Ethyl formate. [B.]—**A'fumarsäure.** Ethylfumaric acid. [B.]—**A'glycocin, A'glycocol.** Ethylglycocine. [B.]—**A'glycol.** Ethyl glycol. [B.]—**A'glycolsäure.** Ethylglycollic acid. [B.]—**A'glykol.** Ethyl glycol. [B.]—**A'glyoxalsäure.** Ethylglyoxalic acid. [B.]—**A'grün.** Ethyl green. [B.] See *Ethyl* GREEN.—**A'harnstoff.** Ethylurea. [B, 4.]—**A'hexyläther.** Ethylhexyl ether. [B.]—**A'hydantoïn.** Ethylhydantoin. [B.]—**A'hydrazin.** Ethylhydrazine. [B.]—**A'hydrazinharnstoff.** Ethylhydrazineurea (ethyl semicarbazide). [B.]—**A'hydrin.** Ethylhydrin; ethylin. [B.]—**A'hydrochinon.** Ethylhydroquinone. [B.]—**A'hydroxybenzol.** Ethylhydroxybenzene; ethylphenol. [B.]—**A'hydroxybuttersäure.** Ethylhydroxybu-

tyric acid. [B.] See Hydroxycaproic acid.—**A'hydrür.** Ethyl hydride; ethane. [B.]—**A'iodür.** Ethyl iodide. [B.]—**A'irisin.** Ethylirisine. [B.]—**A'isoamyläther.** Ethylisoamyl ether. [B.] See Ethylamyl ether.—**A'isobutyläther.** Ethylisobutyl ether. [B.] See Ethylbutyl ether.—**A'isobutyrat.** Ethyl isobutyrate. [B.] See Ethyl *butyrate.*—**A'isocapronat.** Ethyl isocaproate. [B.] See Ethyl *caproate.*—**A'isocyanat.** Ethyl isocyanate. [B.] See Ethyl *cyanate.*—**A'isocyanür.** Ethyl isocyanide; ethyl carbamine. [B.]—**A'isocyanurat.** Ethyl isocyanurate. [B.]—**A'isoschwefelcyanat, A'isosulfocyanat, A'isothiocyanat.** Isosulphocyanate (isothiocyanate) of ethyl. [B.] See Ethyl *thiocyanate.* —**A'isovalerat.** Ethyl isovalerate. [B.] See Ethyl *valerianate.* —**A'jodid, A'jodür.** Ethyl iodide. [B.]—**A'kairin.** Ethylkairine. [B.]—**A'kairinmonobromid.** Ethylkairine monobromide. [B.]—**A'kakodyl.** Ethylcacodyl. [B.] See Diethylarsine.—**A'kakodylsäure.** Ethylcacodylic (diethylarsinic) acid. [B.]—**A'kresolsulfonsäure.** Ethylcresolsulphonic acid. [B.]—**A'lactat.** Ethyl lactate. [B.]—**A'malonat.** Ethyl malonate. [B.]—**A'malonsäure.** Ethylmalonic acid. [B.]—**A'mannit.** Ethylmannite. [B.] —**A'mekonsäure.** Ethylmeconic acid. [B.]—**A'melamin.** Ethyl melamine. [B.] See Ethyl *cyanamide.*—**A'mercaptan.** Ethyl mercaptan. [B.]—**A'mercaptid.** Ethyl mercaptide. [B.]—**A'metamidobenzoësäure.** Ethylmetamidobenzoic acid. [B.] See Ethylamidobenzoic acid.—**A'methoxalsäure.** Ethmethoxalic acid. [B.]—**A'methyl.** Ethylmethyl. [B.]—**A'methyläther.** Ethylmethyl ether. [B.] See Methylethyl ether.—**A'methyläthylen.** Ethylmethylethylene. [B.] See Amylene. —**A'methyläthylenglycol.** Ethylmethylethylene glycol. [B.] See Amylene glycol.—**A'methyläthylsulfin.** Ethylmethylethylsulphine. [B.]—**A'methylbenzol.** Ethylmethylbenzene. [B.]—**A'methylmalonsäure.** Ethylmethylmalonic acid. [B.]—**A'methylprotocatechualdehyd.** Ethylmethylprotocatechuic aldehyde. [B.] See Ethylvanillin.—**A'methylprotocatechusäure.** Ethylmethylprotocatechuic acid. [B.]—**A'methylsulfid.** Ethylmethyl sulphide. [B.]—**A'milchsäure.** Ethyllactic acid. [B.]—**A'monobrombenzol.** Ethylmonobrombenzene. [B.] See Bromethylbenzene.—**A'mononitrobenzol.** Ethylmononitrobenze. [B.] See Nitroethylbenzene.—**A'monothiocarbonsäure.** Ethylmonothiocarbonic acid. [B.]—**A'monoxybenzol.** Ethylmonoxybenzene. [B.] See Ethylphenol.—**A'morphin.** Ethylmorphine. [B.]—**A'myristat.** Ethyl myristate. [B.]—**A'naphthalen.** Ethylnaphthalene. [B.]—**A'naphthylamin.** Ethylnaphthylamine. [B.]—**A'nicotin.** Ethylnicotine. [B.]—**A'nicotinhydrat.** Ethylnicotine hydrate. [B.]—**A'nitrat.** Ethyl nitrate. [B.]—**A'nitrit.** Ethyl nitrite. [B.]—**A'nitrobenzol.** Ethylnitrobenzene. [B.] See Nitroethylbenzene.—**A'nitrolsäure.** Ethylnitrolic acid. [B.]—**A'nonoat.** Ethyl nonate (pelargonate). [B.]—**A'œnanthylat.** Ethyl œnanthylate. [B.]—**A'orthonitrobenzol.** Ethylorthonitrobenzene; orthonitroethylbenzene. [B.] See Nitroethylbenzene.—**A'oxalsäure.** Ethyloxalic acid. [B.] See Ethyl *oxalate.*—**A'oxalsäurechlorür.** Ethoxal chloride. [B.]—**A'oxalurat.** Ethyl oxalurate. [B.] —**A'oxamat.** Ethyl oxamate. [B.]—**A'oxamethan.** Ethyloxamethane. [B.]—**A'oxamid.** Ethyloxamide. [B.]—**A'oxaminsäure.** Ethyloxamic acid. [B.]—**A'oxybenzol.** Ethyloxybenzene; ethylphenol. [B.]—**A'oxybuttersäure.** Ethylhydroxybutyric acid. [B.] See Hydroxycaproic acid.—**A'oxyd.** See the major list.—**A'oxydithiocarbonsäure.** Ethyloxydithiocarbonic acid. [B.] See Xanthic acid.—**A'oxymalonsäure.** Ethyloxy malonic acid. [B.] See Tartronic acid.—**A'palmitat.** Ethyl palmitate. [B.]—**A'paralactat.** Ethyl paralactate. [B.]—**A'paranitrobenzol.** Ethylparanitrobenzene; paranitroethylbenzene. [B.] See Nitroethylbenzene.—**A'pelargonat.** Ethyl pelargonate. [B.]—**A'pentasulfid.** Ethyl pentasulphide. [B.] See Ethyl *sulphide.*—**A'perchlorat.** Ethyl perchlorate. [B.]—**A'persulfid.** Ethyl persulphide. [B.] See Ethyl *sulphide.*—**A'phenol.** Ethylphenol. [B.]—**A'phenyl.** Ethylphenyl. [B.] —**A'phenylamin.** Ethylphenylamine; ethylaniline. [B.]—**A'phenyläther, A'phenyloxyd.** Ethylphenyl ether. [B.]—**A'phenylschwefelsäure.** Ethylphenylsulphuric (ethylbenzenesulphonic) acid. [B.]—**A'phosphat.** 1. Ethyl phosphate. 2. An ethylphosphate, or salt of ethylphosphoric acid. [B.]—**A'phosphin.** Ethylphosphine. [B.]—**A'phosphinsäure.** Ethylphosphinic acid. [B.]—**A'phosphit.** 1. Ethyl phosphite. 2. An ethylphosphite. [B.]—**A'phosphorigsäure.** Ethylphosphorous acid. [B.]—**A'phosphorsäure.** Ethylphosphoric acid. [B.] See Ethyl *phosphate.*—**A'piperidin.** Ethylpiperidine. [B.]—**A'piperidinharnstoff, A. piperylharnstoff.** Ethylpiperidineurea. [B.]—**A'platinocyanür.** Ethyl platinocyanide. [B.]—**A'propan.** Ethylpropane. Normal pentane. [B.]—**A'propenyläther.** Ethylpropenyl ether. [B.]—**A'propinyläther.** Ethylpropinyl ether. [B.]—**A'propionat.** Ethylpionate. [B.]—**A'propyl.** Ethylpropyl. [B.] See Pentane.—**A'propylen.** Ethylpropylene. [B.] See Amylene.—**A'pseudocyanat.** Ethyl pseudocyanate. [B.] See Ethyl *cyanate.*—**A'pseudocyanurat.** Ethyl pseudocyanurate. [B.] See Ethyl *cyanurate.*—**A'purpurin.** Ethylpurpurin. [B.]—**A'pyridin.** Ethylpyridine. [B.]—**A'pyridinhydrat.** Ethylpyridine hydrate. [B.]—**A'pyrophosphat.** Ethyl pyrophosphate. [B.]—**A'pyrophosphit.** 1. Ethyl pyrophosphite. 2. An ethylpyrophosphite. [B.]—**A'pyrophosphorigsäure.** Ethylpyrophosphorous acid. [B.]—**A'pyrrol.** Ethylpyrrol. [B.]—**A'salicylat.** Ethyl salicylate. [B.]—**A'schleimsäure.** Ethylmucic acid. [B.]—**A'schwefelcarbaminsäure.** Ethylsulphocarbamic (ethylthiocarbamic) acid. [B.]—**A'schwefelcyanür.** Ethyl sulphocyanide (thiocyanate). [B, 48.]—**A'schwefelsäure.** Ethylsulphuric acid. [B.] See Ethyl *sulphate.*—**A'schwefelwasserstoff.** Ethyl hydrosulphide; ethyl mercaptan. [B.]—**A'schwefligsäure.** Ethylsulphurous acid. [B.]—**A'selenid.** Ethyl selenide. [B.]—**A'selenomercaptan.** Ethyl seleno-mercaptan. [B.]—**A'senföl.** Ethyl mustard oil. [B.] See Ethyl *thiocyanate.*—**A'silicat.** Ethyl silicate. [B.]—**A'silicium.** Ethylsilicon. [B.]—**A'stearat.** Ethyl stearate. [B.]—**A'strychnin.** Ethylstrychnine. [B.]—**A'strychninhydrat.** Ethylstrychnine hydrate. [B.]—**A'strychninjodür.** Ethylstrychnine iodide. [B.] —**A'succinat.** Ethyl succinate. [B.]—**A'succinsäure.** Ethylsuccinic acid. [B.]—**A'sulfat.** Ethyl sulphate. [B.]—**E. sulfhydrat.** Ethyl mercaptan. [B, 49.]—**A'sulfid.** Ethyl sulphide. [B.]—**A'sulfinacetsäure.** Ethylsulphinacetic acid. [B.]—**A'sulfinsäure.** Ethylsulphinic acid. [B.]—**A'sulfit.** Ethyl sulphite. [B.]—**A'sulfocarbonat.** Ethyl thiocarbonate. [B.]—**A'sulfocyanat.** Ethyl sulphocyanate (thiocyanate). [B.]—**A'sulfonacetsäure.** Ethylsulphonacetic acid. [B.]—**A'sulfonchlorür.** Ethylsulphonic chloride. [B.]—**A'sulfonsäure.** Ethylsulphonic acid. [B.]—**A'sulphür.** Ethyl sulphide. [B, 48.]—**A. sulphürschwefelblei.** Lead mercaptide. [B, 48.]—**A'sulphürschwefelquecksilber.** Mercury mercaptide. [B, 48.]—**A'sulphürschwefelwasserstoff.** Ethyl mercaptan. [B, 48.]—**A'superselenid.** Ethyl diselenide. [B.] See Ethyl *selenide.*—**A'supersulfid.** Ethyl disulphide. [B.] See Ethyl *sulphide.*—**A'tartrat.** Ethyl tartrate. [B.]—**A'tartronsäure.** Ethyltartronic acid. [B.]—**A'tellurid.** Ethyl telluride. [B.]—**A'terpen.** Ethylterpene. [B.]—**A'tetrahydrochinanisol.** Ethyltetrahydroquinanisol.—**A'tetrahydrochinolin.** Ethyltetrahydroquinoline. [B.]—**A'tetrahydroparachinanisol.** Ethyltetrahydroparaquinanisol; ethylthalline. [B.]—**A'tetrasulfid.** Ethyl tetrasulphide. [B.] —**A'thallin.** See the major list.—**A'thiocarbaminsäure.** Ethylthiocarbamic acid. [B.]—**A'thiocarbimid.** Ethyl thiocarbimide. [B.] See Ethyl *thiocyanate.*—**A'thiocarbonat.** Ethyl thiocarbonate. [B.]—**A'thiocyanat.** Ethyl thiocyanate. [B.]—**A'thioharnstoff.** Ethylthiourea. [B.]—**A'thioschwefelsäure.** Ethylthiosulphuric acid. [B.]—**A'toluidin.** Ethyltoluidine. [B.]—**A'traubensäure.** Ethylracemic acid; acid racemate of ethyl. [B.] See Ethyl *tartrate.*—**A'tricyanamid.** Ethyl tricyanamide. [B.] See Ethyl *cyanamide.*—**A'triisocyanat.** Triisocyanate (isocyanurate) of ethyl. [B.]—**A'trisulfid.** Ethyl trisulphide. [B.] See Ethyl *sulphide.*—**A'trisulfocarbonat.** Trisulphocarbonate of ethyl. [B.] See Ethyl *thiocarbonate.*—**A'trithionsäure.** Ethyltrithionic acid. [B.]—**A'unterschwefligsäure.** Ethylhypcsulphurous (ethylthiosulphuric) acid. [B.]—**A'valerianat.** Ethyl valerianate. [B.]—**A'vanillin.** Ethylvanillin. [B.]—**A'wasserstoff.** Ethyl hydride; ethane. [B.] —**A'weinsäure.** Ethyltartaric acid. [B.] See Ethyl *tartrate.*—**Ameisensaures A.** Ethyl formate. [B.]—**Arsenigsaures A.** Ethyl arsenite. [B.]—**Arsensaures A.** Ethyl arsenate. [B.]—**Baldriansaures A.** Ethyl valerianate. [B.]—**Bernsteinsaures A.** Ethyl succinate. [B.]—**Borsaures A.** Ethyl borate. [B.]—**Brenzschleimsaures A.** Ethyl pyromucate. [B.]—**Brenzweinsaures A.** Ethyl pyrotartrate. [B.]—**Bromä'.** Ethyl bromide. [B, 108.]—**Buttersaures A.** Ethyl butyrate. [B.]—**Caprinsaures A.** Ethyl caprate. [B.]—**Capronsaures A.** Ethyl caproate. [B.]—**Caprylsaures A.** Ethyl caprylate. [B.]—**Carbaminsaures A.** Ethyl carbamate. [B.]—**Carbonsaures A.** Ethyl carbonate. [B.]—**Cyansaures A.** Ethyl cyanate. [B.]—**Diäthylessigsaures A.** Ethyl diethylacetate. [B.] See Ethyl *caproate.*—**Dioxythiocarbonsaures A.** Ethyl dioxythiocarbonate. [B.]—**Dithiocarbonsaures A.** Ethyl dithiocarbonate. [B.]—**Essigsaures A.** Ethyl acetate. [B.]—**Isocapronsaures A.** Ethyl isocaproate. [B.] See Ethyl *caproate.*—**Isocyansaures A.** Ethyl isocyanate. [B.] See Ethyl *cyanate.*—**Isocyanursaures A.** Ethyl isocyanurate. [B.]—**Jodä.** Ethyl iodide. [B, 108.]—**Kieselsaures A.** Ethyl silicate. [B.]—**Kohlensaures A.** Ethyl carbonate. [B.]—**Malonsaures A.** Ethyl malonate. [B.]—**Milchsaures A.** Ethyl lactate. [B.]—**Oxalsaures A.** Ethyl oxalate. [B.]—**Palmitinsaures A.** Ethyl palmitate. [B.]—**Pelargonsaures A.** Ethyl pelargonate. [B.]—**Phosphorigsaures A.** Ethyl phosphite. [B.]—**Phosphorsaures A.** Ethyl phosphate. [B.]—**Propionsaures A.** Ethyl propionate. [B.]—**Salpetersaures A.** Ethyl nitrate. [B.]—**Salpetrigsaures A.** Ethyl nitrite. [B.]—**Schleimsaures A.** Ethyl mucate. [B.]—**Schwefelsaures A.** Ethyl sulphate. [B.]—**Schwefligsaures A.** Ethyl sulphite. [B.]—**Stearinsaures A.** Ethyl stearate. [B.]—**Weinsaures A.** Ethyl tartrate. [B.]

AETHYLAL (Ger.), n. A'tu⁶l-a³l. Ethylal; acetic aldehyde. [B.]

ÆTHYLAS (Lat.), n. m. and f. E²th'(a³'e²th)-i²l(u⁶l)-a²s(a³s). Gen., *œthyla'tis.* Ethylate. [B.]

AETHYLAT (Ger.), n. A'tu⁶l-a³t. An ethylate. [B.]

AETHYLCYANAT (Ger.), n. A-tu⁶l-tzu⁶-a³n-a³t'. Ethyl cyanate. [B.]—**Aechtes A.** True cyanate of ethyl. [B.] See Ethyl *cyanate.*

AETHYLEN (Ger.), n. A-tu⁶l-an'. Ethylene. [B.]—**A'acetochlorür.** Ethylene chloracetin. [B.]—**A'alkohol.** Ethylene alcohol. [B.]—**A'amin.** Ethyleneamine. [B.]—**A'aminsulfonsäure.** Ethyleneaminesulphonic acid; taurine. [B.]—**A'äthylat.** Ethylene ethylate. [B.]—**A'äthyläther.** Ethylenethyl ether. [B.] See Ethylene *ethylate.*—**A'äthylidenoxyd.** Ethylene ethylidene oxide. [B.]—**A'bernsteinsäure.** Ethylenesuccinic acid. [B.] See Ethylene *succinate.*—**A. bichlorid.** Ethylene dichloride. [B.]—**A'bromhydrin.** Ethylene bromhydrin. [B.]—**A'bromid.** Ethylene bromide (dibromide). [B.]—**A'bromjodür.** Ethylene bromiodide. [B.]—**A'chloracetin.** Ethylene chloracetin. [B.]—**A'chlorhydrin.** Ethylene chlorhydrin. [B.]—**A'chlorid.** Ethylene chloride (dichloride). [B, 49.]—**A'chloriodür.** Ethylene chloriodide. [B, 4.]—**A'chlornitrat.** Ethylene chlornitrate.—**A'chlorürsulfonsäure.** Ethylenechlorsulphonic acid. [B.]—**A'cyanhydrat, A'cyanhydrin.** Ethylene cyanhydrin. [B.]—**A'cyanid.** Ethylene cyanide (dicyanide). [B.]—**A'diacetat, A'diacetin.** Ethylene diacetin. [B.]—**A'diamin.** See the major list.—**A'diammondichlorür.** Ethylenediammonium dichloride. [B.]—**A'diammonium.** Ethylenediammonium. [B.]—**A'diäthylat, A'diäthyläther.** Ethylenediethyl ether; ethylene diethylate. [B.]—**A'diäthyldiamin.** Ethylenediethyldiamine. [B.]—**A'diäthyldiketon.** Ethylenediethyl diketone.—**A'dibromid.** Ethylene dibromide. [B.]—**A'dicarbonitril.** Ethylene dicarbonitril (dicy-

anide). [B.]—**A'dicarbonsäure, A'dicarboxylsäure.** Ethylenedicarboxylic (succinic) acid. [B.]—**A'dichlorür.** Ethylene dichloride. [B, 4.]—**A'dicyanür.** Ethylene dicyanide. [B, 4.]—**A'diformamid.** Ethylenediformamide. [B.]—**A'diformiat.** Ethylene diformate. [B.]—**A'diharnstoff.** Ethylenediurea. [B.]—**A'dihydrat.** Ethylene dihydrate; ethylene glycol. [B.]—**A'diiodür, A'dijodür.** Ethylene diiodide. [B.]—**A'dimercaptan.** Ethylene dihydrosulphide. [B.]—**A'dinitrat.** Ethylene dinitrate. [B.]—**A'dinitril.** Ethylene dinitril. [B.]—**A'diphenyläther.** Ethylenediphenyl ether. [B.]—**A'diphenyldiamin.** Ethylenediphenyldiamine. [B.]—**A'disulfhydrat.** Ethylene disulphydrate (dihydrosulphide). [B.]—**A'disulfonsäure.** Ethylenedisulphonic acid. [B.]—**A'dithiochlorür.** Ethylene dithiochloride. [B.]—**A'dithiocyanat.** Ethylene dithiocyanate. [B.]—**A'dithiodichlorür.** Ethylene dithiodichloride. [B.]—**A'eisenchlorür.** Ethylene ferrochloride. [B.]—**A'eugenol.** Ethyleneugenol. [B.]—**A'glycol, A'glykol.** Ethylene glycol. [B.]—**A'hexäthylarsonium.** Ethylenehexethylarsonium. [B.]—**A'hexäthylarsoniumdibromür.** Ethylenehexethylarsonium dibromide. [B.]—**A'hexäthylphosphonium.** Ethylenehexethylphosphonium. [B.]—**A'hexäthylphosphoniumdibromür.** Ethylenehexethyl phosphonium dibromide. [B.]—**A'hydratacetat.** Ethylene monacetin. [B.]—**A'hydratamin.** Ethylene hydramine. [B.]—**A'hydratäthylat.** Ethylene hydrate ethylate. [B.] See ETHYLENE *ethylate.*—**A'hydratbromür.** Ethylene hydrate bromide; ethylene bromhydrin. [B, 4.]—**A'hydratchlorür.** Ethylene hydrate chloride; ethylene chlorhydrin. [B, 4.]—**A'hydratcyanür.** Ethylene cyanhydrin. [B, 4.]—**A'hydratiodür, A'hydratjodür.** Ethylene hydrate iodide; ethylene iodhydrin. [B, 4.]—**A'hydratsulfat.** Ethylenehydroxysulphuric acid. [B.]—**A'hydratsulfhydrat.** Ethylene hydroxysulphide. [B.]—**A'hydroxydisulfonsäure.** Ethylenehydroxydisulphonic acid. [B.]—**A'hydroxyschwefelsäure.** Ethylenehydroxysulphuric acid. [B.]—**A'hydroxysulfonsäure.** Ethylenehydroxysulphonic (isethionic) acid. [B.]—**A'mercaptan.** Ethylene dihydroxysulphide. [B.]—**A'methylat.** Ethylene methylate. [B.]—**A'methyläthylat.** Ethylene methylethylate. [B.]—**A'milchsäure.** Ethylene lactic acid. [B.] See LACTIC ACID.—**A'monacetin.** Ethylene monacetin. [B.]—**A'monothioglycol.** Ethylene hydroxysulphide. [B.]—**A'naphthalen.** Ethylenenaphthalene; acenaphthene. [B.]—**A'nitrat.** Ethylene nitrate. [B.]—**A'nitrinitrat.** Ethylene nitri-nitrate. [B.]—**A'nitrit.** Ethylene nitrite. [B.]—**A'oxyd.** Ethylene oxide. [B.]—**A'oxythiocarbonat.** Ethylene oxythiocarbonate. [B.]—**A'phosphonium.** Ethylenephosphonium. [B.]—**A'platinochlorür.** Ethylene platinochloride. [B.]—**A'schwefelsäure.** Ethylenesulphuric acid. [B.]—**A'selenocyanat.** Ethylene selenocyanate. [B.]—**A'succinat.** Ethylene succinate. [B.]—**A'succinsäure.** Ethylenesuccinic acid. [B.]—**A'sulfid.** Ethylene sulphide. [B.]—**A'sulfonsäure.** Ethylenesulphonic acid. [B.] See ETHIONIC ACID.—**A'thiocarbonat.** Ethylene thiocarbonate. [B.]—**A'thichlorür.** Ethylene thiochloride. [B.]—**A'thiocyanat.** Ethylene thiocyanate. [B.]—**A'thiodichlorür.** Ethylene thiodichloride. [B.]—**A'thioglycol, A'thioglykol.** Ethylene dihydroxysulphide. [B.]—**A'trisulfonsäure.** Ethylenetrisulphonic acid. [B.]

AETHYLENAT (Ger.), n. A-tu^{6}l-an-a^{3}t′. An ethylenate. [B.]

AETHYLENDIAMIN (Ger.). A-tu^{6}l-an-de-a^{3}m′i^{2}n. Ethylenediamine. [B, 81.]—**Salzsaures A.** Ethylenediamine hydrochloride; ethylenediammonium chloride. [B.]

ÆTHYLENUM (Lat.), n. n. E^{2}th(a^3-e^{2}th)-i^{2}l(u^{6}l)-e(a)′nu^{3}m-(nu^{4}m). Ethylene. [B.]—*Æ***thyleni bichloridum.** Ethylene dichloride. [B, 81.]—*Æ.* **bromatum.** Ethylene dibromide. [B.]—*Æ.* **chloratum.** Ethylene dichloride. [B, 95.]

AETHYLESTER (Ger.). n. A-tu^{6}l-e^{2}s′te^{2}r. An ethyl ether; a salt of ethyl. [B, 4.]—**Ameisensäureä', Bernsteinsäureä',** etc. See under AMEISE and BERNSTEIN.

AETHYLIAK (Ger.), n. A-tu^{6}l-i^2-a^{3}k′. Ethyliac; ethylamine. [B, 48.]

ÆTHYLICES (Lat.), n. f. pl. E^{2}th(a^3-e^{2}th)-i^{2}l(u^{6}l)′l-sez(ke^{2}s). Gen., *æthyl′icum.* The same as æthollices. [B, 78.] See ÆTHOLIX.

ÆTHYLICODES (Lat.), adj. E^{2}th(a^3-e^{2}th)-i^{2}l(u^{6}l)-i^2-ko′dez-(de^{2}s). From αἰθύλιξ (an unclassical form of αἰθόλιξ), and εἶδος, likeness. Bullous (often wrongly rendered pustular). [B, 78.]

ÆTHYLICUS (Lat.), adj. E^{2}th(a^3-e^{2}th)-i^{2}l(u^{6}l)′i^2-ku^{3}s(ku^{4}s). Ethylic. [B, 95.]

AETHYLIDEN (Ger.), n. A-tu^{6}l-i^{2}d-an′. Ethylidene. [B.]—**A'acetamid.** Ethylideneacetamide. [B.]—**A'äthylendioxyd.** Ethylene ethylidene oxide. [B.]—**A'bichlorid.** Ethylidene dichloride. [B.]—**A'biuret.** Ethylidene biuret. [B.]—**A'bromacetin.** Ethylidene bromacetin. [B.]—**A'bromid.** Ethylidene bromide (dibromide). [B.]—**A'chloracetat, A'chloracetin.** Ethylidene chloracetin. [B.]—**A'chlorid, A'chlorür.** Ethylidene chloride (dichloride). [B.]—**A'chlorürätliylat, A'chlorüräthyläther.** Ethylidene chlorethylate. [B.]—**A'chlorürsulfonsäure.** Ethylidenechlorsulphonic acid. [B.]—**A'cyanhydrin.** Ethylidene cyanhydrin. [B.]—**A'cyanuramid.** Ethylidenecyanuramide. [B.]—**A'diacetat.** Ethylidene diacetate. [B.]—**A'diäthylat, A'diäthyläther, A'diäthyloxyd.** Ethylidene diethylate; acetal. [B.]—**A'dibromür.** Ethylidene dibromide. [B.]—**A'dicarbonsäure.** Ethylidenedicarbonic (isosuccinic) acid. [B.] See SUCCINIC ACID.—**A'dichlorür.** Ethylidene dichloride. [B.]—**A'dijodür.** Ethylidene diiodide. [B.]—**A'dilactaminsäure.** Ethylidene dilactamic acid. [B.] See DILACTAMIC ACID.—**A'dimethylat, A'dimethyläther.** Ethylidene dimethylate. [B.]—**A'hydramin, A'hydratamid.** Ethylidene hydramine; aldehydammonia. [B.]—**A'hydratcyanür.** Ethylidene cyanhydrin. [B.]—**A'lactaminsäure.** Ethylidene lactamic acid; alanine. [B.]—**A'methyläthylat, A'methyläthyläther.** Ethylidene methylethylate. [B.]—**A'milchsäure.** Ethylidene lactic acid. [B.] See LACTIC ACID.—**A'oxychlorür.** Ethylidene oxychloride. [B.]—**A'oxyd.** Ethylidene oxide; acetic aldehyde. [B.]—**A'propenyläther.** Ethylidenepropenyl ether; acetoglyceral. [B.] See GLYCERALS.—**A'sulfid.** Ethylidene sulphide. [B.]

ÆTHYLIDENUM (Lat.), n. n. E^{2}th(a^3-e^{2}th)-i^{2}l(u^{6}l)-i^{2}d-e(a)′-nu^{3}m(nu^{4}m). For deriv., see ETHYLIDENE. Ethylidene. [B.]—**Æ. chloratum.** Ethylidene dichloride. [B, 108.]

AETHYLIN (Ger.), n. A′tu^{6}l-en. Ethylin. [B.]

ÆTHYLIUM (Lat.), n. n. E^{2}th(a^3-e^{2}th)-i^{2}l(u^{6}l)′i^2-u^{3}m(u^{4}m). Ethyl.

AETHYLOXYD (Ger.), n. A-tu^{6}l-o^{2}x-u^{6}d′. 1. Ethyl oxide (ethyl ether). 2. Ethoxide. [B.]—**A'hydrat.** Ethyl alcohol. [B.]—**A'oxydsalz.** A salt of ether; a compound ethyl ether. [B, 48.]—**A'oxydschwefelsäure.** Ethylsulphuric acid. [A, 324.] See ETHYL *sulphate.*—**Ameisensaures A., Apfelsaures A.,** etc. See *Ameisensaures* AETHYL, *Apfelsaures* AETHYL, etc.—**Uebergechlortes A.** Perchlorether. [B, 48.]—**Zweifach gechlortes A.** Tetrachlorether (so called from the formula $C_4H_3Cl_2O$ formerly assigned to it). [B, 48.]

AETHYLTHALLIN (Ger.), n. A-tu^{6}l-ta^{3}l′li^{2}n. Ethylthalline. [B.]—**Salzsaures A.** Ethylthalline hydrochloride. [B.]

ÆTHYLUM (Lat.), n. n. E^{2}th′(a^3′e^{2}th)-i^{2}l(u^{6}l)-u^{3}m(u^{4}m). Ethyl. [B.]—**Æ. bromatum.** Ethyl bromide. [B, 108.]—**Æ. chloratum.** Ethyl chloride. [B.]—**Æ. jodatum.** Ethyl iodide. [B, 108.]

AETHYLÜR (Ger.), n. A-tu^{6}l-u^{6}r′. An ethylide. [B.]

ÆTIA (Lat.), n. f. E′(a^3-e^2)-shi^2(ti^2)-a^3. Gr., αἰτία. A cause (as of a disease). [L, 104.]

AETIOI PHLEBES (Lat.), n. m. pl. A(a^3)-e^{2}t-i(e)′oi fle(fla)′-bez(be^{2}s). Gr., ἀέτειοι φλέβες. Lit., the eagle-veins; the temporal veins. [A, 311; L, 104.]

ÆTIOLOGICAL, adj. E^{2}t-i^2-o-lo^{2}j′i^{2}k-a^{2}l. Fr., *étiologique.* Ger., *ätiologisch.* It., *etiologico.* Sp., *etiológico.* Pertaining to ætiology. [L, 50.]

ÆTIOLOGICALLY, adv. E^{2}t-i^2-o-lo^{2}j′i^{2}k-a^{2}l-li^2. As regards ætiology. [D, 50.]

ÆTIOLOGIST, n. E^{2}t-i-o^{2}l′o-ji^{2}st. Lat., *œtiologus.* One who studies the causes of disease. [A, 322.]

ÆTIOLOGY, n. E^{2}t-i^2-o^{2}l′o-ji^2. Gr., αἰτιολογία (from αἰτία, a cause). Lat., *œtiologia.* Fr., *étiologie.* Ger., *Aetiologie.* It., *etiologia, eziologia.* Sp., *etiología.* 1. That branch of pathology which deals with the causes of disease. [C.] 2. In biology, the science of the causes of biological phenomena and of their relation to general physical laws. [A, 12.]

ÆTION (Lat.), n. n. E′(a^3′e^2)-shi^2(ti^2)-o^{2}n. See ÆTIA.

ÆTIONYMOUS, adj. E^{2}t-i^2-o^{2}n′i^{2}m-u^{3}s. Gr., αἰτιώνυμος. Lat., *œtionymus.* Named from the cause (said of diseases, e. g., lead colic, mercurialism, etc.). [A, 322.]

AETITE, n. A′e^{2}t-it. Gr., ἀετίτης. Lat., *aetites.* Fr., *aétite, pierre d'aigle.* Ger., *Aëtit, Adlerstein.* The eagle-stone; a concretion of teroxide of iron, or any kind of stone having a loose nucleus, so called because, having first been found in an eagle's nest, it was fabled to have been carried there by the bird to facilitate the laying of its eggs; bound to the arm, it was supposed to prevent abortion, and, to the thigh, to assist delivery. [L, 30, 42, 50, 52, 53, 96.]

AETONYCHUM (Lat.), n. n. A(a^3)-e^{2}t-o^{2}n′i^{2}k(u^{6}ch^2)-u^{3}m(u^{4}m). From ἀετός, the eagle, and ὄνυξ, a talon. See LITHOSPERMUM.

AETZAMMONIAK (Ger.), n. Ats′a^{3}m-mon-i^2-a^{3}k. Caustic ammonia. [B.] See *Liquor* AMMONIÆ *fortior.*

AETZBAR (Ger.), adj. Ats′ba^{3}r. Corrosive, caustic. [L, 46.]—**A'keit.** Corrosiveness. [L, 46.]

AETZBARYT (Ger.), n. Ats′ba^{3}r-u^{6}t. Hydrate of baryta. [L, 37.]

AETZEN (Ger.), v. tr. and n. Ats′e^{2}n. As a v., to cauterize, to corrode, to macerate. [E.] As a n., cauterization. [L, 46.]

AETZEND (Ger.), adj. Ats′e^{2}nd. 1. Caustic, corrosive. 2. Phagedenic. [B; E.]

AETZFLÜSSIGKEIT (Ger.), n. Ats′flu^{6}s-zi^{2}g-kit. The *liquor corrosivus* of the Ger. Ph. [B.]

AETZKALI (Ger.), n. Ats′ka^3-le. Caustic potash. [B.]—**A'lauge.** See *Liquor* POTASSÆ.—**A'stängelchen.** A stick of caustic potash. [L, 57.]—**Geschmolzenes A.** See POTASSA *fusa.*

AETZKALK (Ger.), n. Ats′ka^{3}lk. Caustic lime, quick-lime. [B.]

AETZKRAFT (Ger.), n. Ats′kra^{3}ft. Causticity. [L, 46.]

AETZLAUGE (Ger.), n. Ats′la^3-u-ge^2. A solution of caustic potash or caustic soda. [L, 37.]

AETZMAGNESIE (Ger.), n. Ats′ma^{3}g-na-ze. See MAGNESIA *usta.*

AETZMITTEL (Ger.), n. Ats′mi^{2}t-te^{2}l. A caustic. [L, 46.]—**A'leiter, A'träger.** A caustic-holder. [B; L.]

AETZNATRON (Ger.), n. Ats′na^3-tron. Caustic soda. [B.]—**A'lauge.** See *Liquor* SODÆ.

AETZPASTA (Ger.), n. Ats′pa^{3}st-a^3. A caustic paste.—**Wiener A.** See POTASSA *cum calce.*

AETZPINCETTE (Ger.), n. Ats′pi^{2}n-tse^{2}t-te^2. A forceps for holding caustic. [L, 57.]

AETZPINSEL (Ger.), n. Ats′pi^{2}ns-e^{2}l. A brush for applying caustic solutions. [L, 57.]

AETZPULVER (Ger.), n. Ats′pul-fe^{2}r. A caustic powder. [L, 46.]—**Wiener A.** See POTASSA *cum calce.*

AETZQUECKSILBER (Ger.), n. Ats′kwe^{2}k-zi^{2}l-be^{2}r. Corrosive sublimate. [L, 46.]

AETZSILBER (Ger.), n. Ats'zi2l-be2r. Nitrate of silver. [L, 46.]

AETZSTÄBCHEN, AETZSTÄNGELCHEN (Ger.), n's. Ats'stab-ch2e2n, -stang-e2l-ch2e2n. A stick of caustic. [L, 57.]

AETZSTEIN (Ger.), n. Ats'stin. 1. Caustic potash. [B.] 2. Silver nitrate. [L, 46.]

AETZSTOFF (Ger.), n. Ats'sto2f. A caustic substance. [L, 46.]

AETZSUBLIMAT (Ger.), n. Ats'zub-le-ma3t. Corrosive sublimate. [L, 46.]

AETZUNG (Ger.), n. Ats'ung. Cauterization, corrosion. [E; L, 46.]

AETZWASSER (Ger.), n. Ats'va3s-se2r. Nitric acid. [L, 46.]

AEUSSERSTE (Ger.), n. Ois'se2rs-te2. An extremity. [L, 43.]

ÆXTOXICUM (Lat.), n. n. E2x(a3-e2x)-to2x'i2k-u3m(u4m). See ÆGOTOXICUM.

AFABOND, n. A dried mucilaginous fruit used in India as a tonic. [Waring (L, 63).]

AFAN, n. See ADRARAGI.

AFCOON, n. The Persian name for opium. [L, 77.]

AFÉ (Fr.), n. A3-fa. A kind of fern, the root of which is eaten in India. [L, 105.]

AFEBRILE, adj. A2f-e2b'ri2l. From *a* priv., and *febrilis*, feverish. Free from fever. [D, 69.]

AFFADIL, AFFADILL, n's. A2f'fa3-di2l. See DAFFODIL.

AFFADISSEMENT (Fr.), n. A3f-fa3-des-ma3n2. 1. Nausea. [L, 103.] 2. A perversion of the sense of taste, with loss of appetite and enfeeblement of the digestion. [L, 109.]

AFFAIBLISSEMENT (Fr.), n. A3f-fa-bles-ma3n2. Weakness, adynamia. [L, 49.]

AFFAIRES (Fr.), n. pl. A3f-fa2r. A popular term for the menses. [L, 42.]

AFFAISSEMENT (Fr.), n. A3f-fas-ma3n2. 1. The weakness and emaciation that occur as disease approaches a fatal termination. [L, 49, 92, 107.] 2. A diminution or absence of tension (said of tumors and swellings). [E; L, 55.]

AFFECTIO (Lat.), n. f. A2f(a3f)-fe2k'shi2(ti2)-o. Gen., *affectio'nis*. From *afficere*, to exert an influence upon. An affection (in the sense of disease).—**A. arthritica cordis.** See *Cardiac* GOUT.—**A. bovina.** A disease of cattle due to a small worm which penetrates the tissues. [L, 96.]—**A. sarmatica.** The Sarmatian disease. [G.] See PLICA.—**A. tympanitica.** See TYMPANITES.—**A. uterina.** An old term for hysteria. [A, 42.]

AFFECTION, n. A2f-fe2k'shu3n. Lat., *affectio* (*q. v.* for deriv.). Fr., *affection*. Ger., *Leidenschaft*, *Angegriffenwerden*. It., *affezione*. Sp., *afección*. The action or effect of any morbific influence; a disease. In the pl., grief, terror, etc. [D, 3; L, 43.]—**A. calculeuse du foie** (Fr.). See CHOLELITHIASIS.—**A. douloureuse de l'intestin** (Fr.). See *Membranous* ENTERITIS.—**A. furonculeuse** (Fr.). Horse-pox. [Hertwig (D, 72).]—**A. membraneuse de l'intestin, A. muqueuse** (Fr.). See *Membranous* ENTERITIS.—**A. polyurique** (Fr.). Lithuria. [Bouchardat (L, 45).]—**A. pneumogastro-pituiteuse** (Fr.). Whooping-cough. [D, 29.]—**A. typhoïde** (Fr.). Typhus. [L, 45.]—**A's vaporeuses** (Fr.). See VAPORS.—**Membranous a. of the intestine.** Membranous enteritis. [Goss (D).]—**Mucous a. of the intestine.** Membranous enteritis. [Whitehead (D).]—**Painful a. of the intestine.** Membranous enteritis. [Powell (D).]—**Primary a.** One that occurs without being caused by any preceding disease. [D.]—**Secondary a.** One that occurs as a complication or a sequel of a pre-existing disease. [D.]

AFFECTLOSIGKEIT (Ger.), n. A3f-fe2kt'los-i2g-kit. Apathy. [L, 80.]

AFFECTUS (Lat.), n. m. A2f(a3f)-fe2kt'u3s(u4s). Gen., *affectus*. A diseased state.—**A. flatulentus.** Hypochondriasis, melancholia. [L, 53.]—**A. hyderodes.** Dropsy. [L, 45.]—**A. hystericus.** Hysteria.—**A. implicatus.** A complicated affection; one in which several parts of the body are affected at the same time. [L, 53.]—**A. magnus.** Epilepsy. [Hippocrates (L, 53.)]—**A. melancholicus.** Melancholia. [L, 53.]—**A. mirachialis.** An old term for any disease or pain in the abdomen. [A, 325.]—**A. præcordialis.** Hypochondriasis. [L, 53.]—**A. spasmodico-convulsivus labiorum.** See TIC *douloureux*.

AFFENAH, n. An African name for a plant the seeds of which are used by the natives internally and externally in the treatment of swollen parts. [Waring (L, 63).]

AFFENBAUM (Ger.), n. A3f'fe2n-ba3-u4m. See ADANSONIA *digitata*.

AFFENBEERE (Ger.), n. A3f'fe2n-bar-e. The *Empetrum nigrum*. [A, 305.]

AFFENBEZOAR (Ger.), n. A3f'fe2n-be2tz-o-a3r''. See BEZOAR.

AFFENBLUME (Ger.), n. A3f'fe2n-blum-e2. A name applied to several species of the botanical genus *Mimulus*. [B, 20.]

AFFENBRODBAUM, AFFENBROT (Ger.), n's. A3f'fe2n-brod-ba3-u4m, -brot. See ADANSONIA *digitata*.

AFFENGESCHLECHT (Ger.), n. A3f'fe2n-ge2-shle2ch2t''. See QUADRUMANA.

AFFENGESICHT (Ger.), n. A3f'fe2n-ge2-zi2ch2t''. The *Mimosops elengi*. [A, 305.]

AFFENHAND (Ger.), n. A3f'fe2n-ha3nd. See MAIN *en griffe*.

AFFENICUM, n. An alchemical term for the mind or the soul. [Ruland, Johnson (L, 53).]

AFFENKNABENKRAUT (Ger.), n. A3f'fe2n-kna3b-e2n-kra3-u4t. The *Orchis morio*. [A, 305.]

AFFENMUSE (Ger.), n. A3f'fe2n-mu-ze2. The *Musa troglodytarum*. [L, 46.]

AFFENPOCKEN (Ger.), n. A3f'fe2n-po2k-e2n. See *Ape*-POX.

AFFENSCHÄDEL (Ger.), n. A3f'fe2n-shad-e2l. The *Antirrhinum orontium*. [A, 305.]

AFFENSPALTE (Ger.), n. A3f'fe2n-spa3lt-e2. See FISSURA *perpendicularis externa* and *interna*.

AFFENTOPF (Ger.), n. A3f'fe2n-to2pf. The *Lecythis ollaria*. [A, 305.]

AFFERENT, adj. A2f'fe2r-e2nt. Lat., *afferens* (from *adferre*, to bear to), *advehens*. Fr., *afférent*. Ger., *zuführend*. It., *afferente*. Sp., *aferente*. Syn.: *centripetal* (2d def.). 1. Serving to convey a fluid, like blood or lymph, to an organ or part (e. g., *a. vessels*). 2. Conveying anything from the periphery to the center (e. g., *a. currents*, *a. nerves*). [K.] See under CURRENT, NERVE, and VESSEL.

AFFHOLDER (Ger.), n. A3f'hold-e2r. The water-elder (*Viburnum opulus*). [L. 46.]

AFFICIRBAR (Ger.), adj. A3f-fi2tz-er'ba3r. Irritable; sensitive. [L, 46.]

AFFIDRA, n. Probably for *aphidra* from ἀφιδροῦν, to sweat. An alchemical term for white-lead, perhaps from its supposed sudorific power. [L, 53, 104.]

AFFINATIO (Lat.), n. f. A2f(a3f)-fi2n-a(a3)'shi2(ti2)-o. Gen., *affinatio'nis*. Affinity. [B.]—**A. aggregata.** See AFFINITY *of aggregation*.—**A. complicata, A. composita.** See *Compound* AFFINITY.—**A. simplex.** See *Simple* AFFINITY.

AFFINIS (Lat.), adj. A2f(a3f)-fi(fe)'ni2s. Related. [B.]

AFFINITAS (Lat.), n. f. A2f(a3f)-fi2n'i2-ta2s(ta3s). Gen., *affinita'tis*. Affinity. [B.]—**A. adjuta.** See *Mediating* AFFINITY. [B, 140.]—**A. animalium.** The relationship of animals to each other. [B, 124.]—**A. appropriata, A. approximata.** See *Mediating* AFFINITY. [B, 140.]—**A. chemica.** Chemical affinity.—**A. compositionis.** Affinity of composition. [B, 140.]—**A. divellens.** Divellent affinity. [B, 140.]—**A. mixtionis.** Affinity of composition. [B, 140.]—**A. prædisponens.** Predisposing affinity. [B, 140.]—**A. producta.** Developed affinity. [B, 140.]—**A. quiescens.** Quiescent affinity. [B, 140.]—**A. reciproca.** Reciprocal affinity. [B, 140.]—**A. synthetica.** Chemical affinity. [B.]

AFFINITÄT (Ger.), n. A3f-fi2n-i2-tat'. Affinity. [B.]—**Anhäufungsa'.** Affinity of aggregation. [L, 46.]—**Chemische A.** Chemical affinity. [B.]—**Mischungsa', Vermischende A., Zusammensetzende A.** Affinity of composition. [B.]

AFFINITÉ (Fr.), n. A3-fen-e-ta. Affinity. [L.]—**A. chimique.** Chemical affinity.—**A. complexe.** Double affinity. [B, 38.]—**A. composée.** Compound affinity. [L, 52.]—**A. d'agrégation.** Affinity of aggregation. [L, 52.]—**A. de composition.** Affinity of composition. [B.]—**A. de soi pour soi** [Geoffroy St.-Hilaire]. See AFFINITY (3d def.).—**A. de solution.** Affinity of solution. [B, 92.]—**A. divellente.** Divellent affinity. [B, 38.]—**A. double, A. double élective.** Double affinity. [L, 52.]—**A. élective.** Elective affinity. [L, 41.]—**A. élémentaire.** Elementary affinity. [L, 52.]—**A. indirecté.** Elective affinity. [L, 52.]—**A. moléculaire.** Chemical affinity. [B, 38.]—**A. morbide.** The tendency displayed by certain groups of diseases to exist simultaneously or to follow each other. [L, 49.]—**A. pour l'oxygène.** Affinity for oxygen. [L, 52.]—**A. produite.** Developed affinity. [B; L, 52.]—**A. quiescente.** Quiescent affinity. [B, 38.]—**A. réciproque.** Reciprocal affinity. [B.]—**A. secondaire.** Developed affinity. [B.]—**A. simple.** Affinity of composition. [B, 38.]—**A. simple élective.** Simple elective affinity.

AFFINITY, n. A2f-fi2n'i2t-i2. Lat., *affinitas*, *affinatio*. Fr., *affinité*. Ger., *Affinität*, *Verwandtschaft*. It., *affinità*. Sp., *afinidad*. Literally, relationship or kinship. 1. In chemistry, the attraction of substances for each other, or the tendency of dissimilar substances to unite with each other. It was formerly applied both to true chemical compounds and to mechanical mixtures forming homogeneous combinations, but is now restricted to the former. [B.] 2. In botany and zoölogy, a relationship, founded upon similarity of structure, existing between the members of a species, genus, or other natural division. It is distinguished from *analogy*, which relates to functional similarity only, and from *homology*, which has regard merely to similarity in the general plan upon which the related organisms are formed. [Dana (B, 116).] 3. In teratology, the tendency, first pointed out by Geoffroy St.-Hilaire, of double monsters to unite by their homologous surfaces, parts, or organs. [B. 38.]—**A. for oxygen.** Fr., *affinité pour l'oxygène*. Inflammability. [L, 52.]—**A. of aggregation.** Lat., *affinatio aggregata*. Fr., *affinité d'agrégation*. Ger., *Anhäufungsaffinität*. Syn.: *mechanical a.*, *cohesive attraction*. The force which unites similar molecules together and builds them up into masses. [B.]—**A. of an intermedium.** See *Mediating a.*—**A. of composition.** Lat., *affinitas compositionis* (seu *mixtionis*). Fr., *affinité simple* (ou *de composition*). Ger., *zusammensetzende* (oder *vermischende*) *Affinität*. The tendency displayed by two or more substances to unite directly to form a compound without the destruction of any previously existing compound. [B, 140.]—**A. of heat.** The supposed attraction of heat for a substance, producing the decomposition of the latter when heated. [B, 140.]—**A. of mixture.** See *A. of composition.*—**A. of solution.** Fr., *affinité de solution*. The attraction existing between a dissolved substance and its solvent. [L, 77.]—**Alternating elective a.** See *Reciprocating a.*—**Appropriate a.** Lat., *affinitas appropriata*. See *Mediating a.*—**Chemical a.** Lat., *affinitas chemica*. Fr., *affinité chimique*. Ger., *chemische Anziehungskraft* (oder *Affinität*, oder *Verwandtschaft*). It., *affinità chimica*. Sp., *afinidad quimica*. See *A.* (1st def.).—**Compound A.** Lat., *affinatio composita*. Fr., *affinité composée*. Ger., *mehrfache Verwandtschaft*. See *A. of*

composition.—**Compound elective a.** Double a. [B, 59.]—**Current a.** The electrical force developed in a galvanic battery. [Todd and Bowman (L, 73).]—**Developed a.** Lat., *affinitas producta.* Fr., *affinité produite* (ou *secondaire*). Ger., *erzeugte Verwandtschaft.* The a. manifested by a compound of two substances for a third substance with which neither of the components separately enters into combination. [B, 140.]—**Disposing a.** See *Predisposing a.*—**Divellent a.** Lat., *affinitas divellens.* Fr., *affinité divellente.* Syn.: *separating a.* Kirwan's (1782) term for the force which leads to the formation of new compounds by the decomposition of old ones. [B, 38, 59.] Opposed to *Quiescent a.*—**Double a., Double elective a.** Lat., *attractio electiva duplex.* Fr., *affinité double* (ou *double élective*). Ger., *doppelte chemische Verwandtschaft, doppelte Wahlverwandtschaft.* Syn.: *double elective attraction.* That variety of chemical force which produces double decomposition; *i. e.*, from two binary compounds, AB and CD, produces two new compounds, AC and BD. [B, 104.]—**Elective a.** Fr., *affinité élective.* Ger., *Wahlverwandtschaft.* The attraction exerted by a body A or a compound AD for one component B of a compound BC, producing decomposition of the latter and the formation of a new compound AC. [B.] See *Simple elective a.* and *Double elective a.*—**Elementary a.** Fr., *affinité élémentaire.* The a. existing between the elements of which two or more compounds are made up. [B, 144.]—**Inducing a., Inductive a., Imparted a., Intermediate a.** See *Mediating a.*—**Latent a.** See *Quiescent a.*—**Mechanical a.** See *A. of aggregation.*—**Mediating a.** Lat., *affinitas approximans* (seu *appropriata*, seu *adjuta*). Ger., *vermittelnde Verwandtschaft.* Syn.: *inducing* (or *appropriate*) *a.* The a. by virtue of which a substance which is not itself capable of entering into direct combination with a second substance becomes so capable by uniting with a third substance which can combine with the second. [B, 140.] Cf. *Predisposing a.*—**Mixing a.** A. of composition.—**Predisposing a.** Lat., *affinitas prædisponens.* Ger., *prädisponirende Verwandtschaft.* Syn.: *disposing a.* The a. of a substance D for a compound AC, which a. is supposed to be able to effect the formation of the latter when D is added to a mixture of a substance C and a compound AB, although the affinity of C for A is less than that of A for B. This sort of a. is now generally believed not to exist. [B, 140.]—**Quiescent a.** Lat., *affinitas quiescens.* Fr., *affinité quiescente.* Syn.: *latent a.* A name given by Kirwan (1782) to the force which tends to keep the dissimilar molecules of a compound united. Opposed to *Divellent a.* [B, 140, 144.]—**Reciprocal a.** Lat., *affinitas reciproca.* Fr., *affinité réciproque.* Ger., *reciproke Verwandtschaft.* Chemical a. the result of which is the exact converse of that produced by ordinary chemical a.; *i. e.*, an attraction existing between the products of composition and decomposition due to chemical action, which attraction results in the formation of the original bodies compounded or decomposed. Reciprocal a. never exists unless the circumstances under which the original chemical action took place are altered. That is, if 2 compounds AB and CD form, when brought together, 2 new compounds AD and BC, the latter will not be re-formed into the original bodies AB and CD unless from some change in the conditions under which the primary decomposition occurred. [B.]—**Resulting a., Secondary a.** See *Developed a.*—**Separating a.** See *Divellent a.*—**Simple a.** Fr., *affinité simple.* See *A. of composition.*—**Simple elective a.** Lat., *attractio electiva simplex.* Fr., *affinité simple élective.* Ger., *einfache Wahlverwandtschaft.* Syn.: *simple elective attraction.* Elective a. exerted by a simple body A upon one component of a compound BC, as distinguished from *double elective a.*, or the mutual attraction of the elements of two compound bodies, AD and BC. [B, 140.]—**Single a.** See *Simple a.*—**Single elective a.** See *Simple elective a.*—**Vital a.** The power which forms the fluids and solids of the body out of the common circulating fluids. [L, 107.]

AFFION, AFFIONI, n's. From Ar., *Afiûn*, Turk., *Afîûn*-opium (perhaps a corruption of Gr., ὄπιον, opium). Written also *affiun*, *affium*, and *offium*. 1. A name formerly given to an elect, uary containing opium, used in the East as an aphrodisiac. [A, 305; B, 52.] 2. Crude opium; especially that prepared from the red or wild poppy, containing regularly 10 per cent. of morphine. [A, 314; B, 78, 93, 111.]

AFFIUM, n. See AFFION.—**A. d'Aubergier** (Fr.). See AFFION (2d def.).

AFFIUN, n. See AFFION.

AFFIXION, n. A^{2}f-fi^{2}k'shu^{3}n. Lat., *affixio* (from *affigere*, to fasten to). Fr., *affixion.* Ger., *Anheftung.* See ADHESION.

AFFLATUS (Lat.), n. m. A^{2}f(a^{3}f)-fla(fla^3)'tu^{3}s(tu^{4}s). Gen., *affla'tus.* From *afflare*, to blow upon. 1. A blast of air which produces disease by striking the body. [L, 53.] 2. The violent expulsion of gas from the body; belching. 3. A kind of erysipelas which attacks people suddenly. [L, 84.]

AFFLEUREMENT (Fr.), n. A^{3}f-flu^{5}r-ma^{3}n^2. The act or process of bringing one surface to the same level as another. [L, 41.]—**Mettre à l'a.** To weight a hydrometer till it sinks in a liquid to the *point d'a* (*q. v.*). [B, 38.]—**Point d'a.** The fixed point on a hydrometer scale indicating the level it should be made to sink to in a liquid, in determining the sp. gr. of the latter. [B, 38.]

AFFLEURER (Fr.), v. tr. A^{3}f-flu^{6}r-a. See *Mettre à l'*AFFLEUREMENT.

AFFLICTIO (Lat.), n. f. A^{2}f(a^{3}f)-fli^{2}k'shi^2(ti^2)-o. Gen., *afflictio'nis.* From *affligere*, to strike, to cast down. Pain or suffering of mind or body. Despondency; mental disorder accompanied by bodily trouble. [B, 114; L, 50, 53.]

AFFLUENCE, n. A^{2}f'flu^2-e^{2}ns. Lat., *affluentia* (from *affluere*, to flow to). Fr., *affluence.* Ger., *Zufluss, Zuströmen.* 1. A flowing into, or influx. 2. Profusion; abundance. 3. Hence, in pathology, an afflux (*q. v.*). [B, 38, 116.]—**A's électriques.** The currents of electricity which are conveyed to an electrified body. [B, 38.]

AFFLUENT, adj. A^{2}f'flu^2-e^{2}nt. Lat., *affluens.* Fr., *affluent.* Ger., *zuströmend.* It., *afluente.* Sp., *afluente.* 1. Flowing toward; proceeding in a determinate direction. [L, 41.] 2. In pathology, accumulating in excess in one part or organ; producing an afflux. [B, 38.] 3. Confluent. [L, 103.]

AFFLUX, AFFLUXION, n's. A^{2}f'flu^{3}x, A^{2}f-flu^{3}k'shu^{3}n. Lat., *affluxus.* Fr., *afflux.* Ger., *Zufluss, Zuströmen.* It., *afflusso.* Sp., *aflujo, aflusión.* A flowing to or into; in pathology, the accumulation of an unnaturally large quantity of fluid in any part of the body. [C.]—**Idiopathic a.** Fr., *a. idiopathique.* An a. of blood or humors produced directly by irritation of the part at which the a. occurs. [L, 109.]—**Symptomatic a.** Fr., *a. symptomatique.* An a. of blood or humors produced as a symptom of irritation or disease in a part remote from the one at which the a. occurs. [L, 109.]

AFFODIL (Ger.), n. A^{3}f-fo^2-del'. The genus *Asphodelus.* [B, 48.]—**A'lilie.** The day-lily (*Hemerocallis*). [B, 48.]—**A'wurz.** Asphodelus. [B, 131.]—**A'wurzel.** The root of some species of Asphodelus, formerly official. [B, 20.]

AFFODILLE (Ger.), n. A^{3}f-fo^2-di^{2}l'le^2. See AFFODIL.

AFFODILUS (Lat.), n. m. A^{2}f(a^{3}f)-fo^{2}d'i^{2}l-u^{3}s(u^{4}s). See ASPHODELUS *luteus.*

AFFOLAGE (Fr.), n. A^{3}f-fo-la^{3}zh. From *affoler*, to render foolish. Lit., madness; a disease of anemones in which they produce leaves vigorously but do not blossom. [L, 42.]

AFFOLDERWURZEL (Ger.), n. A^{3}f-fol'de^{2}r-vur-tze^{2}l. See *Affodilwurzel*, under AFFODIL.

AFFOLÉ (Fr.), adj. A^{3}f-fo-la. Lit., crazy. Of plants, affected with *affolage*; of a magnet, made to deviate from its true position. [L, 41.] See AIGUILLE *affolée.*

AFFOLLE (Ger.), n. A^{2}f'fo^{2}l-le^2. The mistletoe. [B, 48.] See VISCUM.

AFFORMAS, n. An alchemical term for glass. [L, 53.]

AFFRENGI, n. An old term for red lead. [B, 87.]

AFFRODILE, n. A^{2}f'fro^2-di^{2}l. The daffodil. [L, 46.] See NARCISSUS *pseudo-narcissus.*

AFFRODINA, n. An alchemical name for copper. [L, 96.]

AFFRONITRUM, n. See APHRONITRUM.

AFFRONTEMENT (Fr.), n. A^{3}f-fro^{2}nt-ma^{3}n^2. The coaptation of the edges of a wound. [L, 49.]

AFFRONTER (Fr.), v. tr. A^{3}f-fro^{2}n-ta. To bring together; to coaptate the edges of a wound. [L, 55.]

AFFRUITER [S'] (Fr.), v. reflex. A^{3}f-fru^6-e-ta. To fruit. [L, 42.]

AFFRUSCH (Ger.), n. A^{3}f'frush. Also spelled *Afrusch.* The abrotonum. [L, 30.] See ARTEMISIA *abrotanum.*

AFFUNENA, n. A plant found in Guinea, which, boiled in wine, is said to be a purgative. [L, 105.]

AFFUSE, v. tr. A^{2}f-fu^{2}z'. From *affundere*, to pour upon. Fr., *affuser.* Ger., *aufgiessen, hinzugiessen.* To pour upon; to sprinkle. [L, 56.]

AFFUSIO (Lat.), n. f. A^{2}f(a^{3}f)-fu^2(fu)'zhi^2(si^2)-o. Gen., *affusio'nis.* 1. An affusion. [A.] 2. An infusion. [L, 53.] 3. Suffusion. [L, 53.] 4. A cataract. [B, 87.]—**A. frigida.** See *Cold* AFFUSION.—**A. oculi.** Cataract. [L, 53.]—**A. orbicularis.** See PLACENTA *uteri.*

AFFUSION, n. A^{2}f-fu^2'zhu^{3}n. Gr., πρόσχυσις, ἐπίχυσις. Lat., *affusio.* Fr., *affusion.* Ger., *Aufgiessung, Zuguss, Nachfülle.* It., *affusione.* Sp., *afusión.* A pouring upon; especially the discharge of liquid from a reservoir upon any part of the body. It differs from douching in that the water is poured from a height. [D; L.]—**Cold a.** Lat., *affusio frigida.* Fr., *affusion froide.* Ger., *kalte Aufgiessung.* A method of cooling the body in fevers by pouring cold water over the patient; sometimes called Currie's method, from its having been advocated and practiced by an English physician of that name toward the close of the last century.

AFHOLDER (Ger.), n. A^{3}f'hold-e^{2}r. See VIBURNUM.

AFIAC, n. A Madagascar name for the *Vitex trefolia.* [L, 105.]

AFIM, AFION, AFIOUN, AFIUN, n's. See AFFION.

AFLATUN (Ar.), n. See BDELLIUM.

AFOBA, n. A plant of Guinea, which, bruised with oil, is used in the itch. [L, 105.]

AFŒTAL, adj. A^{2}f-e'ta^{2}l. From α priv., and fœtus (*q. v.*). Having no fœtus. [L, 63.]

AFORUS (Lat.), adj. A^2(a^3)'fo^{2}r-u^{3}s(u^{4}s). From α priv., and *forare*, to pierce. In botany, not provided with an opening. [B.]

AFOUCHE (Fr.), n. A^3-fush. See AFOUTH.

AFOURANOUNOU, n. A Madagascar name for a species of *Euphorbia*, the juice of which is very acrid. [L, 109.]

AFOUTH (Fr.), n. A^3-fut. A fig-tree growing in the Isle of France, the bark of which is used to make ropes and the wood as tinder. [B.]

AFRAGAR, n. A name given by the older alchemists to verdigris. [L, 41.]

AFROB, n. An alchemical name for lead or substances resembling it; black lead, crude antimony. [B, 87; L, 53, 104.]

AFROS, n. A corruption of ἀφρός, foam. Scum, foam. [L, 104.]

AFROUSA, n. A name given in some of the Alpine cantons to the Alpine strawberry (*Fragaria vesca*). [L, 103.]

AFRUSCH (Ger.), n. A^{3}f'rush. See AFFRUSCH.

AFSANTIN (Ar.), n. Perhaps a corruption of ἀψίνθιον. Wormwood (*Artemisia absinthium*). [L, 77.]

AFTADEN-ZIDHAN (Pers.), n. Prolapse of the uterus. [L, 83.]

AFTENÄHNLICH (Ger.), adj. A^{3}f'te^{2}n-an-li^{2}ch^2. Aphthous. [L, 80.]

AFTER (Ger.), n. A^{3}f'te^{2}r. 1. The anus. 2. The buttocks.—**A'abscess.** See *Rectal* ABSCESS.—**A'atrophie.** Atrophy of the sphincter muscles of the anus. [A, 305.]—**A'ausdehner.** An anal dilator. [L, 50.]—**A'ausdehnung.** Stretching of the anus. [L, 50.]—**A'beule.** A rectal abscess.—**A'binde.** See *T*-BANDAGE.—**A'blutfluss.** 1. Rectal hæmorrhage. 2. Hæmorrhoids. [A.]—**A'blutflüssig.** Hæmorrhoidal. [E.]—**A'blutung.** Rectal hæmorrhage. [E.] See PROCTORRHAGIA.—**A'bremse.** The *Gastrophilus hæmorrhoidalis.* [B ; L.]—**A'bruch.** See PROCTOCELE and PROLAPSE *of the anus.*—**A'darm.** 1. The rectum. 2. The lowest part of the intestinal canal of the embryo ; the outermost part of the cloaca ; opposed to *Munddarm* and *Mitteldarm.* It comprises the anus and the lower end of the rectum.—**A'entzündung.** 1. Proctitis. 2. Any inflammation about the anus.—**A'falte.** The cleft between the nates. [L, 59.]—**A'finne.** An anal fin. [L, 46.]—**A'fissur.** Fissure of the anus. [A, 305.]—**A'fistel.** Fistula in ano. [A, 305.]—**A'flosse.** An anal fin. [L, 46.]—**A'fluss.** A mucous discharge from the rectum ; proctorrhœa mucosa. [A, 305 ; L, 30.]—**A'fratt.** Intertrigo about the anus. [A, 305.]—**A'geburt.** See AFTERGEBURT (2d def.).—**A'gegend.** The anal region. [L, 59.]—**A'geschwulst.** 1. A cystic tumor springing from the region of the anus. 2. A polypus protruding from the rectum. 3. Any tumor about the anus. [A, 305.]—**A'geschwür.** Ulceration of the anus. [A, 305.]—**A'gewächs.** Any excrescence about the anus. [A, 305.]—**A'hämorrhoiden.** Hæmorrhoids. [L, 80.]—**A'heber.** See LEVATOR *ani.*—**A'hypertrophie.** Hypertrophy of the sphincter ani. [A, 305.]—**A'jucken.** Pruritus ani. [L.]—**A'kerbe.** The cleft between the nates. [L, 59.]—**A'knoten.** Hæmorrhoids. [A, 305.]—**A'krampf.** Spasm of the sphincter ani ; proctospasmus. [E.]—**A'krebs.** Cancer of the rectum or anus. [A, 305.]—**A'kriecher.** The *Gastrophilus hæmorrhoidalis.* [B ; L.]—**A'lähmung.** Paralysis of the sphincter ani. [A, 305.]—**A'los.** Having no anus. [L, 80.]—**A'made.** The *Oxyuris vermicularis.* [A, 305 ; L, 30.]—**A'muskeln.** The anal muscles. [L, 30.]—**A'öffnung.** The orifice of the anus. [A, 305.]—**A'polyp.** A rectal polypus. [A, 305.]—**A'schlagader.** The inferior hæmorrhoidal artery. [L, 43.]—**A'schliesser, A'schliessmuskel.** The sphincter ani externus. [L.]—**A'schmerz.** 1. Neuralgia of the rectum. 2. Rectal tenesmus. 3. Proctagra. 4. Proctalgia. [A, 305.]—**A'spalte.** The cleft of the nates.—**A'sperre.** 1. Rectal tenesmus. 2. Stricture of the rectum. [A, 305 ; L, 46.]—**A'spiegel.** A rectal speculum. [A, 305.]—**A'verengerung.** Stricture of the anus. [E.]—**A'verschliessung.** 1. Imperforate anus or rectum. 2. Atresia ani. [A, 305.]—**A'verschluss.** Closure of the anus by contraction of the sphincter ani. [K, 16.]—**A'verwachsung.** Atresia of the anus or rectum. [A, 305.]—**A'vorfall.** Prolapse of the rectum. [A, 305.]—**A'weh.** Proctalgia. [E.]—**A'wurm.** The *Oxyuris vermicularis.* [A, 305.]—**A'zwang.** 1. Rectal tenesmus. [A, 305.] 2. Rectal obstruction. [L, 46.]—**Künstlicher A.** An artificial anus. [A, 305.—**Schrunde am A.** Fissure of the anus.—**Widernatürlicher A.** A preternatural anus. [A, 305.]

AFTER-ACTION, n. A^{2}f'tu^{3}r-a^{2}k''shu^{3}n. Ger., *Nachwirkung.* A term used by Du Bois Raymond to describe the negative variation in the current which is observed for a short time in a muscle after it has been tetanized. [B ; K, 3.]—**Inner a.-a.** Ger., *innere Nachwirkung.* A.-a. involving the entire muscle or muscular fiber. [K, 3.]—**Terminal a.-a.** Ger., *terminale Nachwirkung.* A.-a. which is confined to the ends of the muscular fibers. [K, 3.]

AFTERAHORN (Ger.), n. A^{3}f'te^{2}r-a^3-ho^{3}rn. See ACER *pseudoplatanus.*

AFTERALAUN (Ger.), n. A^{3}f'te^{2}r-a^3-la^3-un. See ALUMEN *saccharinum.*

AFTERARZT (Ger.), n. A^{3}f'te^{2}r-a^{3}rtzt. A quack, a charlatan. [L, 46.]

AFTERBIER (Ger.), n. A^{3}f'te^{2}r-ber. Beer made from malt that has been used once before. [A, 305.]

AFTERBILDUNG (Ger.), n. A^{3}f'te^{2}r-bi^{2}ld-un^{2}g. Pseudomorphosis ; including tumors, deformities, and malformations. [A, 305.]

AFTERBIRTH, n. A^{3}f'tu^{3}r-bu^{5}rth. Lat., *secundinæ.* Fr., *arrière-faix.* Ger., *Aftergeburt, Nachgeburt.* 1. The secundines (*q. v.*). 2. In a more restricted sense, the placenta.

AFTERBLATT, AFTERBLÄTTCHEN (Ger.), n's. A^{3}f'te^{2}r-bla^{3}t, -blat-ch^{2}e^{2}n. A stipule. [A, 305 ; L, 46.]

AFTERBLUT (Ger.), n. A^{3}f'te^{2}r-blut. The hæmorrhoidal flux.—**A'flüssig.** Hæmorrhoidal. [A, 315.]—**A'kraut.** The lesser burnet (*Poterium sanguisorba*). [A, 305.]

AFTERBRAIN, n. A^{3}f'tu^{3}r-bran. Ger., *Nachhirn.* See METENCEPHALON.

AFTERBÜRDE (Ger.), n. A^{3}f'te^{2}r-bu^{6}r-de^2. See SECUNDINES.

AFTER-BURTHEN, n. A^{3}f'tu^{3}r-bu^{5}r-th^{2}e^{2}n. The afterbirth. [L, 73.]

AFTER-CURRENT, n. A^{3}f'tu^{3}r-ku^{3}r''re^{2}nt. See under CURRENT.—**Polarizing a.-c.** See *Polarizing after*-CURRENT.

AFTER-DAMP, n. A^{3}f'tu^{3}r-da^{2}mp. From Ger., *Dampf*, vapor. The irrespirable mixture of carbon dioxide, carbon monoxide, and other gases formed as the result of the explosion of fire-damp in coal-mines. [B, 3, 7.]

AFTERDOLDE (Ger.), n. A^{3}f'te^{2}r-dol-de^2. A cyme. [L, 46.]—**A'nförmig.** Cymose. [L, 46.]—**A'ntragend.** Bearing cymes. [L, 46.]

AFTERDOLDIG (Ger.), adj. A^{3}f'te^{2}r-dol-di^{2}g. Cymose. [L, 46.]

AFTERDOTTER (Ger.), n. A^{3}f'te^{2}r-do^{2}t-te^{2}r. The *Myagrum sativum.* [A, 305.]

AFTERFLÜGEL (Ger.), n. A^{3}f'te^{2}r-flu^{6}g-e^{2}l. See ALULA.

AFTERGEBILDE (Ger.), n. A^{3}f'te^{2}r-ge^2-bi^{2}l-de^2. See PSEUDOMORPHOSIS.

AFTERGEBURT (Ger.), n. A^{3}f'te^{2}r-ge^2-burt. 1. The afterbirth. [L, 46.] 2. The birth of a child presenting by the breech. [A, 305.]

AFTERGEFÄSSBILDUNG (Ger.), n. A^{3}f'te^{2}r-ge^2-fas-bi^{2}ld-ung. A pseudangeioma. [L, 80.]

AFTERGELENK (Ger.), n. A^{3}f'te^{2}r-ge^2-le^{2}n^{2}k. See NEARTHROSIS.

AFTERGERÄUSCH (Ger.), n. A^{3}f'te^{2}r-ge^2-roish. 1. A secondary cardiac murmur. [L, 59.] 2. A false murmur, i. e., one not due to valvular disease, but to changes in the quantity or the composition of the blood. [L, 30, 40.]

AFTERGETREIDE (Ger.), n. A^{3}f'te^{2}r ge^2-tri-de^2. See AFTERKORN.

AFTERHAUT (Ger.), n. A^{3}f-te^{2}r-ha^3-ut. A false membrane. [L, 80.]

AFTERHORNBILDUNG (Ger.), n. A^{3}f'te^{2}r-ho^{3}rn-bi^{2}ld-un^{2}g. See PSEUDOCERATOGENESIS. [L, 80.]

AFTER-IMAGE, n. A^{3}f'tu^{3}r-i^{2}m''aj. Fr., *arrière-image.* Ger., *Nachbild.* It., *ritratto secondo, seconda imagine.* Sp., *retrato segundo, segunda imagen.* An impression of an object upon the retina which remains for a certain time after the light is withdrawn. [F.]—**Colored a.-i's.** Fr., *arrière-images colorées.* Ger., *farbige Nachbilder.* It., *seconde imagini colorate.* Sp., *segundas imagenes coloradas.* Retinal impressions of objects looked at, which remain after the object has passed away from the field of vision. They may be either of the same color as the object or of a complementary color. [F.]—**Negative a.-i's.** Fr., *arrière-images negatives.* Ger., *negative Nachbilder.* It., *seconde imagini negative.* Sp., *segundas imagenes negativas.* A.-i's in which what is bright in the image corresponds to what is dark in the object, and *vice versa.* [F.]—**Positive a.-i's.** Fr., *arrière-images positives.* Ger., *positive Nachbilder.* It., *seconde imagini positive.* Sp., *segundas imagenes positivas.* Those in which the bright parts of the image correspond to the bright parts of the object, and the dark parts to the dark parts of the object. [F.]—**Positive complementary a.-i.** Fr., *arrière-image positive complémentaire.* Ger., *positives complementäres Nachbild.* It., *positiva seconda imagine complementaria.* Sp., *positiva segunda imagen cumplimentera.* A retinal impression of varying duration and of a complementary color to that of the original object often following rapidly upon an a.-i. of the same color as the object. [F.]

AFTERING, n. A^{3}f'tu^{3}r-i^{2}ng. Ger., *Aftermilch.* The last milk drawn in milking. [L, 56.]

AFTERKAMILLE (Ger.), n. A^{3}f'te^{2}r-ka^{3}m-i^{2}l-le^2. A name given to several species of *Anthemis.* [B.]—**Edle A.** *Anthemis nobilis.*—**Stinkende A.** *Anthemis cotula.*

AFTERKIND (Ger.), n. A^{3}f'te^{2}r-ki^{2}nd. 1. A posthumous child. 2. A bastard. 3. A degenerate ovum. [A, 305.] See MOLE.

AFTERKLAUEN (Ger.), n. pl. A^{3}f'te^{2}r-kla^3-u-e^{2}n. Horny outgrowths about the feet in quadrupeds. [A, 305.]

AFTERKORN (Ger.), n. A^{3}f'te^{2}r-ko^{3}rn. Spurred grain. [A, 305.] See SECALE *cornutum.*

AFTERKRISTALLE (Ger.), n. pl. A^{3}f'te^{2}r-kri^{2}s-ta^{3}l-le^2. See PSEUDOMORPHOSIS.

AFTERMARK (Ger.), n. A^{3}f'te^{2}r-ma^{3}rk. Pseudomyeloma. [L, 80.]—**A'gebilde.** See *A.*

AFTERMEHL (Ger.), n. A^{3}f'te^{2}r-mal. Coarse meal. [L, 46.]

AFTERMILCH (Ger.), n. A^{3}f'te^{2}r-mi^{2}lch^2. See AFTERING.

AFTERMILKING, n. A^{3}f'tu^{3}r-mi^{2}lk''i^{2}ng. See AFTERING.

AFTERMILZ (Ger.), n. A^{3}f'te^{2}r-mi^{2}ltz. An erectile tumor. [A, 305.]

AFTERMINZE (Ger.), n. A^{3}f'te^{2}r-mi^{2}n-tze^2. The *Monarda didyma.* [L, 30.]

AFTERMOOSE (Ger.), n. pl. A^{3}f'te^{2}r-mo-ze^2. The liverworts, or *Hepaticæ.* [B. 49.]

AFTERORGAN (Ger.), n. A^{3}f'te^{2}r-o^{3}r-ga^{3}n. See PSEUDOMORPHOSIS.

AFTERORGANISATION (Ger.), n. A^{3}f'te^{2}r-o^{3}r-ga^{3}n-e^2-za^3-tzi^2-on. A malformation. [A, 305.]

AFTER-PAINS, n. pl. A^{3}f'tu^{3}r-panz. Lat., *dolores* (seu *tormina*) *post partum.* Fr.. *douleurs tranches* (ou *coliques*), *tranchées utérines.* Ger., *Nachwehen.* Painful contractions of the uterus after delivery.

AFTER-PERCEPTION, n. A^{3}f'tu^{3}r-pu^{3}r-se^{2}p''shu^{3}n. Fr., *perception secondaire.* Ger., *Nachempfindung.* It., *percezione secondaria.* Sp., *secundaria percepción.* The perception of a sensory impression after the cause producing the impression has been removed ; the conscious reception of an after-sensation. [B.]—**A.-p. of sound.** Fr., *perception secondaire des sons.* Ger., *Nachempfindung der Schallen.* It., *percezione secondaria dei suoni.* Sp., *secundaria percepción de los sonidos.* Perception of sound continuing for a short time after the action of the objective source of sound has ceased. By some this is regarded as a picture of the memory, by others as similar to the after-images of the retina. [F.]

AFTERPRODUCTION (Ger.), n. A^{3}f'te^{2}r-pro-duk-tse-on''. A neoplasm. [L.]

AFTERRAUPEN (Ger.), n. pl. A^{3}f'te^{2}r-ra^3-up-e^{2}n. The larvæ of *Tenthredinidæ* ; insects which infest roses and fruit-trees. [B, 20.]

AFTER-SENSATION, n. A^{3}f′tu^{3}r-se^{2}n-sa″shu^{3}n. The persistence of a sensory impression after the sensory stimulus which gives rise to it has ceased to act. [L, 63.] Cf. AFTER-IMAGE and AFTER-PERCEPTION.

AFTER-SHAFT, n. A^{3}f′tu^{3}r-sha^{3}ft. See HYPORRHACHIS.

AFTERSILBER (Ger.), n. A^{3}f′te^{2}r-zi^{2}l-be^{2}r. Silver containing dross. [L, 46.]

AFTERSKORPIONE (Ger.), n. pl. A^{3}f′te^{2}r-sko^{3}r-pi^2-o-ne^2. *Pseudoscorpiones.* [B, 49.]

AFTERSPINNEN (Ger.), n. pl. A^{3}f′te^{2}r-spi^{2}n-ne^{2}n. *Phalangidæ.* [B, 49.]

AFTERSTRAUSS (Ger.), n. A^{3}f′te^{2}r-stra^3-us. See CORYMBUS.

AFTER-TREATMENT, n. A^{3}f′tu^{3}r-tret″me^{2}nt. Ger., *Nachbehandlung.* A term generally applied to the management of a case after a surgical operation. [E.]

AFTERZEHEN (Ger.), n. pl. A^{3}f′te^{2}r-tza-he^{2}n. See AFTER-KLAUEN.

AFTERZÉLIE (Fr.), n. A^{3}f-te^{2}r-za-le. See AFZELIA.

AFTERZEUGUNG (Ger.), n. A^{3}f′te^{2}r-tzoig-ung. See PSEUDOGENESIS.

AFT-HORN, n. A^{3}ft′ho^{2}rn. See *Posterior* CORNU.

AFTO, n. A cruciferous plant of Guinea, which, dried and pulverized, is used as an errhine in headache. [L, 105.]

AFYUN, n. See AFFION.

AFZELIA (Lat.), n. f. A^{2}f(a^{3}f)-ze(za)′li^2-a^3. From Afzelius, a Swedish botanist. Fr., *afzelie.* A tropical genus of leguminous trees, belonging to the suborder *Cæsalpinieæ*, distinguished by their abruptly pinnate leaves and their large monopetalous flowers growing in terminal panicled racemes. It comprises two sections: 1. *Euafzelia*, including African species with usually seven perfect stamens and arillate seeds. 2. *Intsia*, including Asiatic and Madagascar species, with three perfect stamens and exarillate seeds. [B, 19.]

AGA CRETENSIUM (Lat.), n. f. A(a^3)′ga^3-kre(kra)-te^{2}n′si^2-u^{3}m(u^{4}m). The small Spanish milk-thistle (a species of *Silybum*). [B; L, 84.]

AGABOR, n. From Ar., *Al-ghobâr*, the powder. An alchemical term for powder. [B, 52.]

AGAÇANT (Fr.), adj. A^{3}g-a^3-sa^{3}n^2. Producing shock or irritation of the nerves; in the pl., *A's*, used as a n., medicines which act as gentle stimulants. [L, 42, 90.]

AGACEMENT, n. A^3-ga^{3}s-ma^{3}n^2. 1. A disagreeable sensation produced by the contact of acid substances with the teeth. 2. A slight irritation. [L, 42.]—**A. des dents.** See *A.* (1st def.) and HÆMODIA.—**A. des nerfs.** An irritable condition of body or mind in which irritations ordinarily unnoticed become unbearable. [L, 49.]

AGACER (Fr.), v. tr. A^{3}ga^3-sa. 1. To set the teeth on edge. 2. To irritate. [L.]

AGAH, n. Intermittent fever. [L, 45.]

AGAL, n. A^{2}g′a^{2}l. See AGALLOCHUM.—**A. wood.** See ALOES-WOOD.

AGALACTATIO (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}l(a^{3}l)-a^{2}k(a^{3}k)-ta(ta^3)′-shi^2(ti^2)-o. Gen., *agalactatio'nis.* See AGALACTIA.

AGALACTE (Fr.), adj. A^3-ga^3-la^{3}kt. See AGALACTOUS (1st and 2d def's.).

AGALACTIA, AGALACTIO (Lat.), n's. f. A^{2}g(a^{3}g)-a^{2}l(a^{3}l)-a^{2}k(a^{3}k)′shi^2(ti^2)-a^3, -o. Gen., *agalac'tiæ, -actio'nis.* From α priv., and γάλα, milk. Fr., *agalactie.* Ger., *Agalactie, Milchmangel.* It., *agalattia.* Sp., *agalatia.* A failure of the mammary secretion to appear after confinement, or its untimely disappearance.

AGALACTOS (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}l(a^{3}l)-a^{2}k(a^{3}k)′to^{2}s. Gen., *agalac'ti.* Gr., ἀγάλακτος. A woman who has no milk in her breasts. [L, 102.]

AGALACTOUS, adj. A^{2}g-a^{2}l-a^{2}k′tu^{3}s. Gr., ἀγάλακτος (from α priv., or copulative [4th def.], and γάλα, milk). Lat., *agalactus.* Fr., *agalacte* (1st and 2d def's). Ger., *milchleer, milchlos* (1st and 2d def's.), *milchvertreibend* (3d def.), *verbrüdert, verschwistert* (4th def.). Sp., *agalacto.* 1. Having no milk in the breasts; affected with agalactia. 2. Not suckled (said of children). 3. Having the power of stopping or diminishing the secretion of milk. 4. Suckled from the same breast. [B, 38, 115; L, 50, 63.]

AGAL-AGAL, n. See AGAR-AGAR.

AGALASIA (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}l(a^{3}l)-az(a^{3}s)′i^2-a^3. See AGALACTIA.—**A. contagiosa.** It., *stornarella, osciutarella, sito.* An epidemic contagious disease of sheep and goats characterized by agalactia. [L, 44.]

AGALAX (Lat.), adj. A^{2}g(a^{3}g)′a^{2}l(a^{3}l)-a^{2}x(a^{3}x). Gen., *agalac'tos (-tis).* Gr., ἀγάλαξ. Agalactous. [B, 78, 115.]

AGALAXY, n A^{2}g-a^{2}l′a^{2}x-i^2. Gr., ἀγαλαξία. Lat., *agalaxia, agalaxis.* Fr., *agalaxie.* Ger., *Agalaxie.* It., *agalasia.* Sp., *agalaxia.* See AGALACTIA.

AGALIA, n. A commercial term for musk. [A, 305.]

AGALLIS (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}l(a^{3}l)′li^{2}s. Gen., *agal'lidis.* Gr., ἀγαλλίς. A plant known to the ancients, belonging to the genus *Iris.* [B, 115.]

AGALLOCH, n. A^{2}g′a^{2}l-o^{2}k. See AGALLOCHUM.

AGALLOCHE (Fr.), n. A^{3}g-a^{3}l-osh. Agallochum. [B, 38.]—**Bois d'a.** Aloes-wood. [B, 38.]

AGALLOCHE-BLINDBAUM (Ger.), n. A^{3}g-a^{3}l′losh-bli^{2}nd-ba^{3}um. See EXCŒCARIA. [B, 49.]

AGALLOCHEHOLZ (Ger.), n. A^{3}g-a^{3}l′losh-ho^{3}ltz. Aloes-wood. [B, 49.]

AGALLOCHUM (L. Lat.), n. n. A^{2}g(a^{3}g)-a^{2}l(a^{3}l)′lo^{2}k(lo^{2}ch^2)-u^{3}m(u^{4}m). From ἀγάλλοχον. Hebr., *ahalîm, ahalôth.* Sanscr., *haloha.* Fr., *agalloche.* Ger., *Agallocheholz* (1st def.). 1. Aloes-wood. 2. The tree from which aloes-wood was obtained, especially the *Excœcaria agallocha* or the *Aquilaria agallocha.* [B.]—**Agallochi veri lignum.** Aloes-wood. [B, 144.]—**A. verum.** See *A.* (2d def.).

AGALLUGEN, AGALLUGI, n's. See AGALLOCHUM (1st def.).

AGALMIDÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)-a^{2}l(a^{3}l)′mi^{2}d-e(a^3-e^2). A family of *Hydrozoa*, of the order *Siphonophora*, suborder *Physophoridæ.* [E. R. Lankester (B, 77).]

AGALMYLA (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}l(a^{3}l)-mi(mu^6)′la^3. From ἄγαλμα, an ornament, and ὕλη, wood. A genus of tropical gesneraceous plants of the tribe *Cyrtandreæ.* [B, 19; L, 64.]

AGALORRHŒA (Lat.), n. f. A^2(a^3)-ga^{2}l(ga^{3}l)-o-re′(ro′e^2)-a^3. From α priv., γάλα, milk, and ῥεῖν, to flow. Fr., *agalorrhée.* Sp., *agalorrea.* That form of agalactia in which there is cessation of the flow of milk, as distinguished from an original absence of the secretion. [L, 43, 63, 70.]

AGALOSTÉMONE (Fr.), adj. A^{3}g-a^{3}l-o-sta-mon. From α priv., γάλως, a sister-in-law, and στήμων, a spun thread (a stamen). Of a flower, having the stamens inserted alternately upon the calyx and corolla. [L, 41.]

AGALOUE (Fr.), n. A^{3}g-a^3-lu. A sort of shrub or thorny plant growing in thickets or tufts. [L, 41.]

AGALUGI, AGALUGIN, n's. See AGALLOCHUM.

AGAMÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)′a^{2}m(a^{3}m)-e(a^3-e^2). From α priv., and γάμος, marriage. A name sometimes given to the cryptogams. [B, 1, 19; L, 50.]

AGAME (Fr.), adj. and n. A^3-ga^{3}m. 1. Agamous. 2. Agamic. 3. N. pl., *A's.* (a) The *Agamæ*; (b) a group of lacertilian reptiles established by Cuvier; (c) a class of molluscs established by Latreille, comprising all the bivalves and some of the univalves (*Gasteropoda*). [B, 1, 38, 93; L.]

AGAMEN (Ger.), n. pl. A^3′ga^3-me^{2}n. See AGAMIDÆ.

AGAMIA (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}m(a^{3}m)′i^2-a^2. From ἀγαμία, celibacy. Fr., *agamie.* Ger., *Agamie.* It., Sp., *agamia.* The class *Cryptogamia* of Linnæus. [B, 1.]

AGAMIC, adj. A^{2}g-a^{2}m′i^{2}k. Fr., *agame.* Ger., *agamisch.* In zoölogy, reproducing without impregnation, or pertaining to reproduction without impregnation. [B.]

AGAMIDÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)-a^{2}m(a^{3}m)′i^{2}d-e(a^3-e^2). From *Agama*, one of the genera. Fr., *agamides.* A family of lizards (*Lacertilia*) resembling the *Iguanidæ*, but distinguished by the double row of teeth on the posterior edge of the palate and by the scales covering the tail. [B, 28.]

AGAMIEN (Fr.), adj. and n. A^3-ga^3-mi^2-a^{3}n^2. 1. (Adj.), resembling the genus *Agama* of lizards. 2. (N. pl.), *A's*, a division of lacertilian reptiles including the *Agamidæ.* [B, 38.]

AGAMIUS (Lat.), n. m. A^{2}g(a^{3}g)-a^{2}m(a^{3}m)′i^2-u^{3}s(u^{4}s). See AGAMIA. [L, 63.]

AGAMOGENESIS (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}m(a^{3}m)-o-je^{2}n(ge^{2}n)′-e^{2}s-i^{2}s. Gen., *agamogene'sios (-gen'esis).* From α priv., γάμος, marriage, and γένεσις, birth. Fr., *agamogenèse.* Ger., *Agamogenesis.* It., *agamogenesi.* Sp., *agamogenesis.* Non-sexual reproduction; that form of generation in which the germ develops into an independent organism without undergoing the influence of any other living matter. [A, 12.]

AGAMOGENETIC, adj. A^{2}g-a^{2}m″o-je^{2}n-e^{2}t′i^{2}k. Fr., *agamogénésique, agamogénétique.* Ger., *agamogenetisch.* Non-sexually reproductive. See AGAMOGENESIS.

AGAMOID, adj. A^{2}g′a^{2}m-oid. From *Agamia*, and εἶδος, a likeness. Like the class *Agamia*, or the cryptogams. [L, 73.]

AGAMONEMA (Lat.), n. n. A^{2}g(a^{3}g)-a^{2}m(a^{3}m)-o-ne(na)′ma^3. Gen., *agamonem'atos.* From α priv., γάμος, marriage, and νῆμα, a filament. A genus of non-sexual nematode worms. [L.]—**A. piscium.** See SPIROPTERA *hominis.*

AGAMONEMATODUM (Lat.), n. n. A^{2}g(a^{3}g)-a^{2}m(a^{3}m)-o-ne(na)-ma^3-to′du^{3}m(du^{4}m). From ἄγαμος, unmarried, νῆμα, a filament, and εἶδος, likeness. A larval form of a nematode found in the intestines or the peritoneal cavity of certain animals, such as the armadillo. [L, 63.]

AGAMOUS, adj. A^{2}g′a^{2}m-u^{3}s. For deriv., see AGAMIC. Lat., *agamus.* Fr., *agame.* Ger., *agamisch.* Sp., *agamo.* In botany, belonging to the *Agamia*, or cryptogams. [B.]

AGANACTESIS (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}n(a^{3}n)-a^{2}k(a^{3}k)-te(ta)′-si^{2}s. Gen., *aganactes'is (-es'eos).* From Gr., ἀγανάκτησις, physical pain or irritation. Pain; a painful condition of a part. [L, 30.]

AGANISIA (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}n(a^{3}n)-i^{2}z(i^{2}s)′i^2-a^3. From ἀγανός, of a pleasing appearance. Fr., *aganisie.* A South American genus of orchidaceous plants. [L, 41, 64.]

AGANITE (Fr.), n. A^{3}g-a^3-net. A provincial name for spurred grain. [L, 41.]

AGANOBLEPHARON (Lat.), n. n. A^{2}g(a^{3}g)-a^{2}n(a^{3}n)-o-ble^{2}f′-a^{3}r-o^{2}n. From ἀγανοβλέφαρος, mild-eyed. It., *aganoblefaro.* Celio's name for an abnormal adhesion of the eyelids, preventing the opening of the eye. [L, 44.]

AGANOSMA (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}n(a^{3}n)-o^{2}z(o^{2}s)′ma^3. From ἀγανός, agreeable, and ὀσμή, odor. An Indian genus of apocynaceous plants established by Don. [B; L, 64.]

AGAPANTHEÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)-a^{2}p(a^{3}p)-a^{2}n(a^{3}n)′-the(the^2)-i(a^3-e^2). For deriv., see AGAPANTHUS. Fr., *agapanthées.*

Ger., *Agapantheen.* A suborder of *Liliaceæ* made by Endlicher. [B, 49 ; L, 41.]

AGAPANTHUS (Lat.), n. m. A^{2}g(a^{3}g)-a^{2}p(a^{3}p)-a^{2}n(a^{3}n)'thu^{3}s-(thu^{4}s). From ἀγαπᾶν, to love, and ἄνθος, a flower. Fr., *agapanthe.* Ger., *Schmucklilie.* Sp., *agapanto.* A South African genus of liliaceous plants belonging to the tribe *Asphodeleæ*, established by L'Héritier. [B, 19, 34.]

AGAR, n. An alchemical name for lime. [L, 53.]

AGARA, n. See Bois *de senteur.*

AGAR-AGAR, n. A^{2}g''a^{2}r-a^{2}g'a^{2}r. An East Indian word. Fr., *algue de Java, mousse de Jafna* (ou *de Ceylan*). Ger., *Ceylonmoos, Jaffnamoos.* Syn. : *aja-aja, ager-ager, agal-agal.* Ceylon-moss, Bengal isinglass. A substance resembling isinglass, consisting of a dried sea-weed brought into commerce from the East Indies under the form of transparent colorless strips, almost wholly soluble in water, forming a large quantity of thick jelly. It forms an article of food in the East Indies and is used in the arts as a substitute for gelatin. It is also employed as a medium for the cultivation of the *Bacteria* by Koch's method. It contains gelose. [A, 1 ; Fristedt, "Pharm. Ztg.," Aug. 22, 1885 ; "Indian Med. Gaz.," Nov., 1885, p. 355 (A) ; B, 19, 48, 49, 93.]—**Ceylon a.-a.** Fr., *mousse de Ceylan, lichen de Ceylan amylacé.* Ger., *Ceylonmoos.* The variety imported from Ceylon, consisting chiefly of *Gracilaria* (or *Plocaria*, or *Sphærococcus*, or *Fucus*) *lichenoides*, the *Alga* which is said (but probably erroneously) to be used by the *Hirundo esculenta* in making its edible nest. [Fristedt, *l. c.* (A) ; B, 19.]—**Japanese a.-a.** Syn. : *Japanese isinglass.* A variety derived from several *Algæ*, especially *Gelideum corneum* [Lamarck] and *Gelideum cartilagineum* [Gaill.] (*Sphærococcus cartilagineus* [Agardh]), and, according to some, also from *Gloiapeltis* (*Sphærococcus*) *tenax* [J. Agardh] and *Sphærococcus compressus* [Agardh]. It occurs in commerce in transparent pieces 2 feet long and as thick as a straw (prepared in Singapore by steeping the *Algæ* in hot water), or oftener in yellowish-white masses a foot long and upward of an inch wide. It is the kind suitable for bacterial cultivation. [Fristedt, *l. c.* (A).]—**Macassar a.-a.** A variety coming from the straits between Borneo and the Celebes Island, and consisting of impure *Eucheuma spinosum* incrusted with salt. [Fristedt, *l. c.* (A).]

AGARIC, n. A^{2}g'a^{2}r-i^{2}k. From ἀγαρικόν, A., white a., derived by Dioscorides from Agara, a town in Sarmatia, and by others from Agarci, a town in Asia ; but more probably from Pers.; *ghârîqûn*, with the art., *al*, prefixed, or perhaps from Ar., *ghâr*, belly. [B, 78.] Lat., *agaricon, agaricus.* Fr., *agaric.* Ger., *Blätterpilz, Blätterschwamm, Baumschwamm* (2d def.). It., *agarico.* Sp., *agárico.* 1. A genus of hymenomycetous *Fungi* comprising the mushrooms and toad-stools. See *Agaricus* (1st def.). 2. A name given to certain *Fungi* forming excrescences upon trees. See Agaricus (2d def.) and Polyporus. 3. Polyporus igniarius.* [B.]—**Troches of a., Trochiscs of a.** Fr., *trochisques d'a.* See *Trochisci de* agarico.—**Vin d'a.** (Fr.). A medicinal wine, containing white a. 4 parts, lesser cardamom 6, gentian 7, and Spanish wine 120. Used as a stomachic. [L, 85.]—**White a.** Lat., *agaricus albus.* Fr., *a. blanc* [Fr. Cod.]. It., *agarico bianco.* Sp., *agárico blanco. Polyporus officinalis.*

AGARICACEÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)-a^{3}r-i^{2}k-a(a^3)'se(ke^2)-e-(a^{3}e^2). Fr., *agaricacées.* Ger., *Agaricaceen.* In Cohn's classification of the thallophytes, a family of non-chlorophyllaceous plants of the order *Basidiosporeæ* and the section *Basidiomycetes.* It corresponds to the order *Hymenomycetes* of other systems. [B, 75.]

AGARIC ACID, n. A^{2}g-a^{2}r'i^{2}k. See Agaricic acid.

AGARIC AUX MOUCHES (Fr.), n. A^{3}g-a^{3}r-ek o mush. *Agaricus muscarius.* [L.]—**Marmelade d'a. a. m., Teinture d'a. a. m., Vinaigre d'a. a. m.** Unofficial preparations formerly employed, consisting of the dried *Agaricus muscarius* prepared respectively with sugar, syrup of orgeat, and sweet almonds, with wine, and with vinegar. These preparations were employed as excitants in various nervous affections. [L, 85.]

AGARIC BLANC (Fr.), n. Bla^{3}n^2. White agaric ; *Polyporus officinalis.*—**A. b. officinal** [Fr. Cod.]. Syn. : *polypore du mélèze. Polyporus officinalis.* [B.]—**Poudre d'a. b.** [Fr. Cod.]. Lat., *pulvis boleti laricis.* White agaric (*Polyporus officinalis*) pulverized and passed through a fine sieve. [B, 113.]

AGARICE (Fr.), n. A^{3}g-a^{3}r-es. See *Mineral* agaric.

AGARICÉ (Fr.), adj. and n. A^{3}g-a^{3}r-i^2-sa. Resembling an agaric. As a n. pl., *a's*, the *Agaricini.* [L, 41.]

AGARICIC ACID, n. A^{2}g-a^{2}r-i^{2}s'i^{2}k. Fr., *acide agaricique.* Ger., *Agaricinsäure.* A white crystalline acid obtained by Fleury from larch agaric (*Polyporus officinalis*). [B, 2, 10.]

AGARICICOLOUS, adj. A^{2}g-a^{2}r''i^2-si^{2}k'o^{2}l-u^{3}s. From *Agaricus* and *colere*, to inhabit. Fr., *agaricicole.* Sp., *agaricicola, agarícola.* Living on *Agarici ;* a term applied to certain insects. [B ; L, 63.]

AGARICIFORM, adj. A^{2}g-a^{2}r-i^{2}s'i^2-fo^{3}rm. Fr., It., Sp., *agariciforme.* Having the shape of a mushroom. [L, 41.]

AGARICIN, n. A^{2}g-a^{2}r'i^{2}s-i^{2}n. Fr., *agaricine.* Ger., *Agaricin.* It., Sp., *agaricina.* 1. A principle extracted by Schoonbroodt from white agaric (*Polyporus officinalis*) ; a white crystalline powder, soluble with difficulty in water and insoluble in ether, having a taste at first insipid, then sweetish, and finally bitter and acrid. It has been used to check night-sweats in phthisis. [B, 10 ; O. Seifert, "Wien. med. Wchnschr.," No. 38, 1883 (B).] 2. (Ger.) agaricine.—**A'säure** (Ger.). Agaricic acid. [L.]

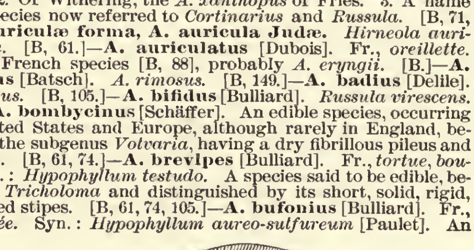
AGARICIN (Fr.), adj. A^{3}g-a^{3}r-i^{2}s-a^{2}n^2. Resembling agaric. [B, 38.]

AGARICINÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)-a^{2}r(a^{3}r)-i^{2}s(i^{2}k)-i(e)'ne-(na^3-e^2). See Agaricini.

AGARICINE, n. A^{2}g-a^{2}r'i^{2}s-i^{2}n. Fr., *agaricine.* Ger., *Agaricin.* It., Sp., *agaricina.* 1. An alkaloid obtained by Gobley from several species of *Agaricus ;* probably identical with amanitine. [B, 93.] 2. (Fr.) agaricin.

AGARICINÉES (Fr.), n. pl. A^{3}g-a^{3}r-es-e^2-na. The *Agaricini.* [B, 38.]

AGARICINEI [Fries], **AGARICINI** (Lat.), n's m. pl. A^{2}g-(a^{3}g)-a^{2}r(a^{3}r)-i^{2}s(i^{2}k)-i^{2}n'e(e^2)-i(e), -i(e)'ni(ne). Fr., *agaricinées.* Ger., *Agaricinen.* An order of hymenomycetous *Fungi* (*Carposporeæ*), characterized by the disposition of the hymenium into distinct gill-like laminæ. It comprises 20 genera, the most important of which are *Agaricus, Coprinus, Cortinarius, Paxillus, Hygrophorus, Lactarius, Russula, Cantharellus,* and *Marasmius* (*q. v.*). [B, 19, 74, 75.]



AGARICINOUS, adj. A^{2}g-a^{2}r-i^{2}s'i^{2}n-u^{3}s. Fr., *Agaricin.* Resembling an agaric. [L, 63.]

AGARICOID, adj. A^{2}g-a^{2}r'i^{2}k-oid. From Agaricus and εἶδος, likeness. Fr., *agaricoïde.* Sp., *agaricoideo.* Resembling an agaric. [L, 41, 98.]

AGARICOIDES (Lat.), n. m. A^{2}g(a^{3}g)-a^{2}r(a^{3}r)-i^{2}k-o-i(e)'dez-(das). Gen., *agaricoid'eos* (*-eis*). Fr., *agaricoïde.* 1. A sort of fungus resembling the agaric. [L, 97.] 2. In the pl., *A.*, a division of the *Agaricini* having the genus *Agaricus* as its type. [B, 38.]

AGARICON, AGARICUM (Lat.), n's n. A^{2}g(a^{3}g)-a^{2}r(a^{3}r)'i^{2}k o^{2}n, -u^{3}m(u^{4}m). Gr., ἀγαρικόν. White agaric. [L, 41, 77.] See Polyporus *officinalis.*

AGARICUS (Lat.), n. m. A^{2}g(a^{3}g)-a^{2}r(a^{3}r)'i^{2}k-u^{3}s(u^{4}s). For deriv. and foreign equivalents, see Agaric. 1. A genus of hymenomycetous *Fungi* (*Carposporeæ*) belonging to the order *Agaricini*, distinguished by the fleshy character of the hat-shaped cap, or pileus, and by the gill-like, spore-bearing laminæ which the latter bears upon its inferior surface, which are composed of 2 readily separable parallel lamellæ inclosing a filamentous tissue continuous with the substance of the pileus. It comprises about 1,300 species, which are arranged, according to the character of the spores, into 5 series, and these again are divided into 36 subgenera. Series A, the Leucospori, or *Agarici* with white spores (and with lamellæ which do not change their color), comprises the following subgenera: 1. *Amanita*, which includes the more permanent species provided with a double universal veil (*volva*), and in some cases with an enveloping ring (*annulus*). 2. *Lepiota* [Fries], in which there are a simple universal veil and a ring. 3. *Armillaria* [Fries], with a partial veil (*velum*) and a ring. 4. *Tricholoma* [Fries], with a very fugacious flocculose veil and emarginate or rounded lamellæ. 5. *Clitocybe* [Fries], without a veil, with a fleshy pileus, convex in the younger specimens, depressed in the older, and with lamellæ adnate or strongly decurrent. 6. *Collybia* [Fries], including small dry species with a fleshy-membranous flattish pileus, having its margin at first involute, and with non-decurrent lamellæ. 7. *Mycena* [Fries], including slender species with a hollow stalk (*stipes*) and a membranous bell-shaped pileus. 8. *Omphalia* [Fries], with a fleshy or fleshy-membranous pileus, umbilicated in the younger specimens. 9. *Pleurotus*, with stipes eccentric or lateral. Series B, the *Hyporrhodii*, or rose-spored *Agarici*, comprises the subgenera: 10. *Volvaria* [Fries], distinguished by the decidedly developed universal veil or volva. 11. *Annularia* [Schulz], containing a few species provided with a ring. 12. *Pluteus* [Fries], with no veil, and with the pileus and lamellæ distinct from the stipes. 13. *Entoloma* [Fries], with laminæ adnate or just parting from the fleshy stipes, which is also continuous with the pileus. 14. *Clitopilus* [Fries], with decurrent lamellæ and a fleshy pileus confluent with the fleshy or fibrous stipes. *Mouceron*, a subgenus formerly recognized, including *A. prunulus*, is now referred to *Clitopilus*. 15. *Leptonia* [Fries], including small species with a fleshy or membranous pileus which, at first convex, afterward becomes flat. 16. *Nolanea* [Fries], with a slender hollow stipes and bell-shaped pileus. 17. *Eccilia* [Fries], with an umbilicate pileus and adnate decurrent lamellæ. 18. *Claudopus* [Smith], including species by some referred to *Crepidotus* in the next series. Series C, the Dermini, or *Agarici*, with ferruginous spores (and discolored, rather persistent lamellæ), comprises the subgenera: 19. *Pholiota* [Fries], with a dry woven veil forming a ring upon the stipes. 20. *Inocybe* [Fries], with a fugacious veil formed of the longitudinal fibres of the pileus and with whitish lamellæ. 21. *Hebeloma* [Fries], with a marginal fugacious veil and emarginate lamellæ. 22. *Flammula* [Fries], with a fugacious veil, a fleshy convex pileus, and lamellæ not emarginate. 23. *Naucoria* [Fries], including small species with a flattish fleshy-membranous pileus and cinnamon-colored lamellæ. 24. *Pluteolus* [Fries], including 2 or 3 species intermediate in character between *Galera* and *Naucoria*. 25. *Galera* [Fries], with a hollow slender stipes and a bell-shaped membranous pileus. 26. *Tubaria* [Smith], comprising some species taken from *Naucoria* or other subgenera. 27. *Crepidotus* [Fries], with an eccentric or sessile pileus. Series D, the Pratelli, or *Agarici* with brownish-purple spores, comprises the subgenera: 28. *Clitonia* [Fries], with a small volva, a viscid yellowish pileus, and sooty-black lamellæ. 29. *Psalliota* [Fries], with a veil having the shape of a ring adherent to the stipes. 30. *Pilosace* [Fries], including but a single species. 31. *Stropharia* [Fries], including species with usually adnate or decurrent lamellæ, separated from *Psalliota*. 32. *Hypholoma* [Fries], with a fugacious marginal veil, emarginate lamellæ, and a bulbous stipes. 33. *Psilocybe*, with a fugacious non-annular veil, a somewhat fleshy pileus having the margin at first incurved, and the stipes not bulbous. 34. *Psathyra* [Fries], without a veil, with a somewhat membranous, often bell-shaped, pileus, and with a brittle stipes. Series E, the Coprinarii, or *Agarici* with black spores, comprises the subgenera: 35. *Panæolus*, with the veil, when present, interwoven, and the margins of the rather fleshy pileus extending beyond the lamellæ, which are somewhat clouded. 36. *Psathyrella*, with a veil not interwoven and a membranous pileus, the margin of which does not extend beyond the lamellæ. These last two subgenera are sometimes united into a single subgenus, *Coprinarius*. Some of the subgenera just given, especially *Amanita* and *Lepiota*, and less often *Armillaria*, *Tricholoma*, and *Volvaria*, are often raised to the rank of distinct genera. On the other hand, by the older writers, the genus *A.* was held to include species now grouped under other genera of the *Agaricini*, notably under *Hygrophorus* (the old subgenus *Limacium* of *A.*), *Coprinus* (the subgenus *Coprinus* of *A.*), *Cortinarius* (the subgenera *Telamonia*, *Inoloma*, *Dermocybe*, and *Myxacium* of *A.*), *Paxillus* (the subgenus *Tapinea* of *A.*), *Russula* (the subgenus *Russula* of *A.*), *Lactarius* (the subgenus *Galarrhœus* of *A.*), *Cantharellus*, *Marasmius*, *Lentinus*, *Panus*, *Bolbitius*, and *Gomphidius*. 2 A sort of fungus growing upon trees, now assigned to the genus *Polyporus* (formerly to *Boletus*); especially the *Polyporus officinalis*, *igniarius*, and *fomentarius*. 3. When used without qualification, white agaric or *Polyporus officinalis*. [B, 19, 46, 61, 71, 74, 105, 147, 148.]—**Agarici coprinarii, Agarici dermini, Agarici hyporrhodii, Agarici leucospori, Agarici pratelli.** See under *A.* (1st def.), Series E, or Coprinarii, Series C, or Dermini, etc.—**A. acris.** See Lactarius *acris*, Lactarius *controversus*, and Lactarius *piperatus*.—**A. ærugineus** [Schumacher]. See *A. odorus*.—**A. æruginosus** [Curtis]. A poisonous species belonging to the subgenus *Stropharia*, with the pileus at first of an æruginous color, afterward becoming paler, and the stipes floccose below the ring. [B, 74.]—**A. agrestis** [Withering]. A variety of *A. dealbatus*. [B, 71.]—**A. albellus** [Fries]. Fr., *mousseron de France*, *vrai-mousseron*. Syn.: *Hypophyllum aromaticum* [Paulet]. An edible French species belonging to *Tricholoma*, remarkable for its milky whiteness and its musky odor. [B, 74, 105, 106.]—**A. albus.** 1. White agaric. See Polyporus *officinalis*. 2. The name given by Schäffer to a species of *A.* belonging to the subgenus *Tricholoma*. [B, 74.]—**A. alliatus,** See Marasmius *scorodonius*.—**A. alutaceus.** 1. A species now referred to *Russula*. See Russula *alutacea*. 2. A species established by Persoon, placed in the subgenus *Annularia* of *A.* [B, 71, 74.]—**A. alutaris** [Persoon]. The *A. campestris*. [B, 149.]—**A. amanita** [Schumacher]. See *A. gracilentus*.—**A. amarus.** 1. Of Bulliard, the *A. fascicularis*. 2. Of Schäffer, the *Lactarius piperatus*. [B, 104, 105.]—**A. amethysteus** [Bulliard]. *A. laccatus*. [B, 149.]—**A. amethystinus.** Fr., *palomet*, *palomette des Béarnais*, *colombe*, *mousseron* (all of 1st def.). Syn.: *A. palometus* [De Candolle], *Hypophyllum palumbinum* [Paulet] (both of 1st def.). 1. A. a. of Scopoli. An edible European species belonging to *Tricholoma*, distinguished by the white pileus with lilac spots and the white stipes and lamellæ. 2. A. a. of Hudson. See *A. laccatus*. [B, 74, 104, 105, 149.]—**A. amygdalinus** [Curtis]. An edible American species. [B, 61.]—**A. angustissimus** [Lasch.]. A species, probably edible, belonging to *Collybia*, with white very thickly set, narrow lamellæ and a flexuous stipes. [B, 74.]—**A. anisatus** [Persoon]. Fr., *agaric anisé*. *A. odorus*. [B, 149.]—**A. annularis** [De Candolle], **A. annularius** [Bulliard]. Fr., *agaric annulaire*. See *A. melleus*. [B, 104, 105, 149.]—**A. aquifolii** [Fries]. Fr., *agaric du houx*. A European species said to be edible, belonging to *Pleurotus*, distinguished from *A. olearius* by its white stipes and the less distinctly marked lamellæ, which at their inner (posterior) extremities are joined together to form a ring. [B, 74, 104.]—**A. arcuatus** [Bulliard]. *A. geminus* [Fries]. [B.]—**A. arenarius** [Laterrade]. *A. bufonius*. [B, 105.]—**A. arvensis** [Schäffer]. Ger., *Schafchampignon*. Meadow-mushroom, horse-mushroom; an edible species belonging to the subgenus *Psalliota*, closely allied to *A. campestris*, of which it is regarded as a variety by some. It is distinguished from the latter chiefly by its hollow stipes and its broad double ring. It sometimes reaches a very great size. [B, 61, 74, 106.]—**A. atramentarius.** *Coprinus atramentarius*. [B, 105.]—**A. atramentosus** [Kalch]. A species belonging to *Collybia*, distinguished by its black flesh and the dark hue of its pileus, stipes, and closely set, rather narrow lamellæ. It is said to contain dioxyquinone. [B, 5, 74.]—**A. attenuatus.** See *A. cylindraceus*.—**A. aurantiacus** [Bulliard]. See *A. cæsareus*. [B, 51, 93, 106.] See also Lactarius *aurantiacus* and Hygrophorus *conicus*.—**A. auratus.** 1. Of Fries, a species belonging to *Tricholoma* with a smooth yellow pileus, afterward changing to red, and yellow lamellæ. 2. Of Withering, the *A. xanthopus* of Fries. 3. A name given to species now referred to *Cortinarius* and *Russula*. [B, 71, 74.]—**A. auriculæ forma, A. auricula Judæ.** *Hirneola auricula Judæ*. [B, 61.]—**A. auriculatus** [Dubois]. Fr., *oreillette*. An edible French species [B, 88], probably *A. eryngii*. [B.]—**A. aurivenius** [Batsch]. *A. rimosus*. [B, 149.]—**A. badius** [Delile]. *A. vaginatus*. [B, 105.]—**A. bifidus** [Bulliard]. *Russula virescens*. [B, 150.]—**A. bombycinus** [Schäffer]. An edible species, occurring in the United States and Europe, although rarely in England, belonging to the subgenus *Volvaria*, having a dry fibrillous pileus and solid stipes. [B, 61, 74.]—**A. brevipes** [Bulliard]. Fr., *tortue*, *bouclier*. Syn.: *Hypophyllum testudo*. A species said to be edible, belonging to *Tricholoma* and distinguished by its short, solid, rigid, dark-colored stipes. [B, 61, 74, 105.]—**A. bufonius** [Bulliard]. Fr., *dore soufrée*. Syn.: *Hypophyllum aureo-sulfureum* [Paulet]. An edible species belonging to *Tricholoma*, having an agreeable taste and a marked odor. It resembles the poisonous *A. sulfureus*, from which it is distinguished chiefly by its less pronounced sulphur color, its striated flocculose stipes, and its more closely set lamellæ. [B, 74,

A section of the young plant.

AGARICUS CAMPESTRIS. (AFTER B. FRANK [B, 49].)

105.]—**A. bulbosus.** 1. Of Sowerby, the *Cortinarius bulbosus.* 2. Of Bulliard, also called *Amanita bulbosa*, a species comprising the genera *A. virosus*, *A. phalloides*, *A. vernus*, and *A. mappa.*—**A. bullaceus** [Bulliard]. A species belonging to *Psilocybe* with a tawny-brown pileus, fibrillous stipes, and adnate iron-colored lamellæ. [B, 74.]—**A. cæsareus** [Scopoli]. Fr., *oronge.* Ger., *Kaiserling*, *Kaiserschwamm.* Syn.: *Amanita cæsarea* (seu *aurantiaca*); *Hypophyllum cæsareum* [Paulet]. Golden agaric; a very excellent edible species belonging to the suborder *Amanita*, distinguished by its orange-colored pileus, pale-yellow lamellæ, and very large volva. [B, 19, 74, 106.]—**A. cæspitosus** [Curtis]. An edible species found in the United States growing in clusters of 50 to 100 individuals. [B, 61.]—**A. campanulatus** [Schrank]. *A. hypnorum.* [B, 71.]—**A. campestris** [Linnæus]. Fr., *agaric champêtre* ou *comestible*, *champignon de couche.* Ger., *Champignon*, *Drüschling.* Sp., *hongo*, *hongo de los semilleros.* Syn.: *Hypophyllum campestre* (seu *exquisitum*, seu *globosum*). The common edible mushroom. A species belonging to *Psalliota*, distinguished by the silky floccose or finely scaly pileus, the somewhat reddish tint of the flesh, and the pinkish lamellæ changing to a dark brown. There are many varieties, some of which are cultivated on a large scale, especially in France. [B, 49, 61, 74.]—**A. canalicularis** [Schumacher]. *A. nebularis.*—**A. cantharellus.** See CANTHARELLUS *cibarius.*—**A. carneus.** 1. Of Schäffer, *A. laccatus.* 2. Of Bulliard, a species belonging to the subgenus *Tricholoma.* [B, 74, 149.]—**A. caryophylleus** [Schäffer]. *Marasmius oreades.* [B, 149.]—**A. caseus** [Withering]. *A. nebularis* [Batsch].—**A. castaneus.** Fr., *agaric châtain.* See CORTINARIUS *castaneus.*—**A. ceciliæ** [Berkeley and Br.]. A species said to be edible, belonging to *Amanita.* It is nearly the same as, if not identical with, *A. vaginatus.* [B, 61, 147.]—**A. cepæstipes** [Sowerby]. Syn.: *Lepiota cepæstipes.* A poisonous species belonging to *Lepiota*, having a bell-shaped pileus with scattered scales and a hollow ventricose stipes. It grows on the bark of trees. It presents 2 varieties, a white and a yellow, the former of which has been identified by some with the *A. cretaceus* of Bulliard. [B, 71, 74, 149.]—**A. chantarellus.** *Cantharellus cibarius.* [B, 144.]—**A. chirurgorum.** Surgeons' agaric. See POLYPORUS *igniarius.*—**A. chirurgorum præparatus.** Amadou. [L, 30.]—**A. cinnamomeus.** *Cortinarius cinnamomeus.* [B.]—**A. clavæformis**, **A. claviformis** [Schäffer]. *Hygrophorus pratensis* (seu *virgineus*). [B, 105, 149.]—**A. clavus.** 1. Of Schäffer, *A. esculentus.* 2. Of Linnæus, a species belonging to *Collybia.* [B, 74.]—**A. clypeolarius** [Bulliard]. Fr., *coulemelle*, *bouclier*, *agaric en bouclier.* Syn.: *Lepiota clypeolaria.* A poisonous species belonging to *Lepiota*, characterized by the epidermis of the pileus peeling off and being broken up into ferruginous scales, by the white numerous lamellæ, a subsquamose stipes, and a floccose fugacious ring. It is distinguished from *A. procerus* by its smaller size, its non-bulbous stipes, and, according to some, its marked odor, which, however, is frequently absent. There are several varieties, some of which are now regarded as distinct species. [B, 71, 74, 105.]—**A. coccola** [Scopoli]. Syn.: *Amanita coccola.* An edible species belonging to *Amanita*, found on the shores of the Mediterranean, having a grayish-white pileus with an incurved margin. [B, 105.]—**A. collinus.** 1. Of Scopoli, a species belonging to *Collybia.* 2. Of Persoon, the *Marasmius oreades.* [B, 74, 149.]—**A. colubrinus.** Syn.: *Lepiota colubrina.* 1. Of Persoon, a poisonous species now included with *A. clypeolarius.* 2. Of Bulliard, an edible species now referred to *A. procerus.* 3. Of Krombholz, a species allied to 1 and 2, and belonging to *Lepiota*, characterized by the imbricated tomentose scales which cover the pileus. [B, 38, 74, 93, 105.]—**A. columbetta** [Fries]. A small species belonging to *Tricholoma*, growing in sandy places in Europe and the United States, with a white pileus which, at first smooth, afterward becomes scaly and cracked, and is often covered with reddish or lilac spots; said to be edible. [B, 61, 71, 74.]—**A. comarus**, **A. comatus.** See COPRINUS *comatus.*—**A. conchatus** [Fries]. *Panus conchatus.* [B, 74, 105.]—**A. congregatus** [Bolton]. *A. melleus.* [B, 149.]—**A. conicus.** 1. Of Schäffer, the *Hygrophorus conicus.* 2. Of Picco, the *A. viperinus.* [B, 41, 46, 105.]—**A. consociatus** [Curtis]. An edible species growing in the United States. [B, 61.]—**A. contortus.** A variety of *A. fusipes* (*q. v.*). [B, 105.]—**A. controversus** [Persoon]. See LACTARIUS *controversus.*—**A. coriaceus** [Lightfoot]. *Marasmius oreades.* [B, 149.]—**A. cornucopiæ** [Persoon]. *Panus conchatus.* [B, 105.]—**A. corrugis** [Persoon]. A species belonging to *Psathyra*, with a somewhat rose-colored pileus and dark-violet lamellæ. [B, 74.]—**A. corticatus** [Fries]. *Marasmius oreades.* [B, 149.]—**A. cossus** [Sowerby]. See HYGROPHORUS *cossus.*—**A. crassipes** [Schäffer]. *A fusipes.* [B, 71.]—**A. cretaceus.** 1. Of Fries, an edible species belonging to *Psalliota*, closely allied to *A. campestris*, growing in the United States and Europe. It is distinguished by its white pileus, hollow stipes, and the white lamellæ, which retain their hue for a long time. 2. Of Bulliard, an edible species belonging to *Lepiota*, usually considered to be a variety of *A. cepæstipes*, but probably distinct from the latter. [B, 46, 61, 74.]—**A. cristatus** [Albertini and Schweinitz]. Syn.: *Lepiota cristata.* A species alleged to be poisonous, having a whitish pileus covered with reddish scales, and slender deciduous ring. It has a penetrating fœtid odor. It is closely allied to *A. clypeolarius*, of which it is sometimes regarded as a variety. [B, 46, 71, 74.]—**A. crustuliniformis** [Bulliard]. A non-edible species belonging to *Hebeloma.* [B, 74.]—**A. cumulatus** [Withering]. *A. melleus.* [B, 149.]—**A. cyanoxanthus.** *Russula cyanoxantha.* [B, 105.]—**A. cylindraceus** [De Candolle]. Fr., *agaric attenué*, *pivoulade.* Syn.: *A. attenuatus.* An edible French species belonging to *Pholiota*, with a dirty-yellow pileus, a white stipes thinned at its lower part, and lamellæ white changing to a ferruginous hue. [B, 46, 74, 151.]—**A. cylindricus** [Withering, Sowerby]. *Coprinus comatus.* [B, 71, 149.]—**A. dealbatus** [Sowerby]. An edible species with an ivory-white, somewhat shiny pileus and slender stipes, belonging to *Clitocybe.* A variety, *A. dealbatus*, var. *agrestis* (*A. agrestis* of some), is described. [B, 61, 71, 74.]—**A. deliciosus.** See LACTARIUS *deliciosus.*—**A. depluens** [Batsch]. An edible species belonging to *Claudopus* (*Crepidotus*, according to the older authorities), growing on willows and alders by river-banks, distinguished by its pale, reddish pileus and its broad grayish-red lamellæ. [B, 74, 105.]—**A. dimidiatus.** 1. Of Bulliard, *A. ostreatus.* 2. Of Schäffer, *A. dryinus.* [B, 71, 105.]—**A. dryinus** [Persoon]. Fr., *coquille du chêne.* Syn.: *Dendrosarcos quercinus* [Paulet]. An edible species, having quite an agreeable odor and taste, growing on trunks of old oaks. It belongs to *Pleurotus* and is distinguished by its hard white pileus, marked here and there with brownish scales, and by its fugacious veil. [B, 74, 105.]—**A. durus** [Bolton]. A poisonous species belonging to *Photiota*, allied to *A. præcox*, but distinguished by its harder pileus. [B, 74.]—**A. eburneus.** See HYGROPHORUS *eburneus.*—**A. echinocephalus** [Vittadini]. Fr., *oronge à pointes de trocart.* Syn.: *Amanita flandinia* [Plée], *Hypophyllum tricuspidatum* [Paulet]. A poisonous species belonging to *Amanita*, marked by its grayish-white color and the acutely pyramidal warts studding the surface of the pileus. [B, 74, 105.]—**A. edulis** [Bulliard]. *A. campestris.* [B, 149.]—**A. elæodes.** See *A. fascicularis*, var. *elœodes.*—**A. emeticus.** See RUSSULA *emetica.*—**A. epigæus** [Persoon]. *A. depluens.* [B, 105.]—**A. epixanthus** [Fries]. A species belonging to *Hypholoma* and closely allied to *A. fascicularis* [Hudson], of which it is sometimes regarded as a variety. [B, 74, 105.]—**A. ericeus** [Bulliard]. *Hygrophorus virgineus.* [B, 149.]—**A. eryngii** [De Candolle]. Fr., *oreille de chardon*, *oreillette*, *brigoule.* Syn.: *Hypophyllum eryngii* [Paulet]. A rare but very excellent edible species growing on old roots of *Eryngium campestre.* It belongs to *Pleurotus*, and is characterized by its grayish-red pileus and its decurrent fleshy-white lamellæ. [B, 74, 105.]—**A. esculentus** [Wulfen]. Fr., *agaric en clou.* Ger., *Nagelschwamm.* Nail fungus. A species belonging to *Collybia*, growing in England and on the Continent, distinguished by its rather fleshy, obtuse, clay-colored pileus supported on a smooth, yellow, fistulous stipes. In Austria, where it occurs frequently in fir plantations, it is much eaten. [B, 49, 61, 71, 74, 105.]—**A. euosmus** [Berkeley]. A species belonging to *Claudopus*, resembling *A. ostreatus*, but not edible. It has a marked odor. [B, 19, 61, 74.]—**A. excelsus** [Fries]. Syn.: *Amanita excelsa.* A species belonging to *Amanita*, with a fibrillous pileus and rounded lamellæ; by some said to be poisonous, by others regarded as nearly innocuous. [B, 46, 74.]—**A. excoriatus.** Syn.: *Lepiota excoriata.* 1. Of Schäffer, a species, probably edible, belonging to *Lepiota*, allied to *A. procerus*, but distinguished by its short equal stipes. It grows in beech-woods. [B, 61, 71, 74.] 2. Of Lasch, the same as *A. naucinus.*—**A. exquisitus** [Vittadini]. *A. campestris.* [B, 105.]—**A. farinaceus** [Hudson]. *A. laccatus.* [B, 149.]—**A. fascicularis** [Hudson]. Ger., *Schwefelkopf*, *Büschelschwamm.* Syn.: *Hypophyllum fasciculare* and *Hypophyllum ruthense* [Paulet]. A poisonous variety belonging to *Hypholoma*, distinguished by its sulphur-colored pileus, its hollow, yellow-colored stipes, and lamellæ varying in color from a sulphur-yellow to a bright green. A variety, *A. fascicularis*, var. *elœodes* [Fries], has dark-green or olive-colored lamellæ. [B, 49, 74.]—**A. fastibilis** [Fries]. A non-edible species belonging to *Hebeloma*, with a dark, tawny pileus and emarginate, rather widely separated lamellæ. It has a fœtid odor and a nauseous taste. [B, 71, 74.]—**A. ficoides.** Fr., *agaric ficoïde.* 1. Of Bulliard, the *Hygrophorus pratensis.* 2. Of Withering, the *Panus stypticus.* [B, 71, 149.]—**A. fimetarius.** See COPRINUS *fimetarius.* —**A. flabelliformis.** 1. Of Sowerby, the *Panus stypticus.* 2. Of Bolton, a species referred to Pleurotus. [B, 71.]—**A. floccosus** [Curtis]. A species corresponding to *A. squarrosus.* [B, 149.]—**A. fœnisecii** [Persoon]. A species belonging to *Psilocybe*, with a sooty-brown pileus and pale reddish stipes. [B, 74.]—**A. fœtens.** *Russula fœtens.* [B, 93.]—**A. fossulatus** [Cooke]. An edible species found on the Cabul hills. [B, 61.]—**A. fragilis** [Persoon]. See RUSSULA *fragilis.*—**A. fragrans** [Sowerby]. Fr., *godets montés.* A species valued as a food and a condiment and distinguished by its anise-like odor. It belongs to *Clitocybe* and has a pale tawny color and whitish sub-decurrent lamellæ. [B, 61, 74, 105.]—**A. frumentaceus** [Bulliard]. An edible species found in the United States and Europe, belonging to *Tricholoma*, marked by its reddish pileus and its white lamellæ changing to red. [B, 61, 74.]—**A. fulvellus** [Fries]. A species belonging to *Tricholoma*, having smooth, tawny, reddish pileus, and white lamellæ. [B, 74.]—**A. fulvosus** [Bolton]; *Hygrophorus pratensis.* [B, 149.]—**A. fulvus.** 1. Of Bulliard, the *A. fulvellus.* 2. Of Withering, the *Hygrophorus pratensis.* 3. Of Schäffer, a variety of *A. vaginatus.* [B, 74, 149.]—**A. furcatus** [Lamarck]. *Russula furcata.* [B, 105.]—**A. fusco-pallidus** [Bolton]. *A. melleus.* [B, 149.]—**A. fusipes** [Bulliard]. Fr., *chênier-ventru.* Syn.: *Hypophyllum fusipes* [Paulet.] An edible

AGARICUS CEPÆSTIPES. (AFTER LOUDON.)

AGARICUS CLYPEOLARIUS. (AFTER LOUDON.)

AGARICUS FASCICULARIS. (AFTER MARCHAND [B, 105].)

species found at the foot of oak-trees, belonging to *Collybia*, distinguished by the fusiform dilatation of the stipes, the spotted reddish pileus, and the spotted adnate lamellæ. There are 2 varieties, *A. fusipes*, var. *contortus* [Bulliard], with a tortuous stipes, and *A. fusipes*, var. *œdematopus* [Schäffer], with a fibrillous, pulverulent stipes. [B, 74, 105.]—**A. galeatus** [Léveillé.] *A. personatus.* [Fries.]—**A. gambosus** [Fries]. Ger., *Pomonaschwamm.* A very excellent edible species belonging to *Tricholoma*, found in the spring and early autumn. It has an odor of flour, is mouse-colored, has a spotted pileus with flocculose margin and a flocculose stipes. [B, 61, 74.]—**A. Gardneri.** A species which is believed to be the phosphorescent fungus of Borneo. [B, 61.]—**A. Garidelli** [Fries]. Fr., *pinédo, garidel.* Syn.: *Hypophyllum Garidelli* [Paulet]. An edible species belonging to *Clitocybe*, growing in Provence. [B, 74, 105.]—**A. geminus** [Fries]. Fr., *jumeaux-canelle.* Syn.: *Hypophyllum geminum* [Paulet]. An edible species belonging to *Tricholoma*, with a fissured cinnamon-red pileus and white lamellæ. [B, 74. 105.] —**A. gemmatus** [Fries]. Syn.: *Amanita gemmata.* An edible species belonging to *Amanita*, with a solid bulbous stipes and unprovided with a ring. [B, 46, 74.]—**A. geogenius** [De Candolle]. Fr., *bérigoule.* A species belonging to *Pleurotus*, occasionally eaten in France, although by some it is regarded as poisonous. [B, 74, 105.]—**A. Georgii.** St. George's mushroom. 1. Of Clusius, a very large edible species belonging to *Tricholoma*, closely related to *A. gambosus*, of which it is sometimes considered a variety, and from which it is distinguished by the non-flocculose margin of the pileus and other characters. 2. Of Sowerby, a large species belonging to *Psalliota*, closely allied to *A. campestris*, probably the *A. arvensis.* 3. Of Linnæus, a variety of *Russula emetica* [B, 19, 71, 74.]—**A. geotropus** [Bulliard]. Fr., *grand-aillier, entonnoir vénéneux.* A species believed to be poisonous, but edible according to Cooke, belonging to *Clitocybe*, distinguished by the brownish color of the pileus and the white hue of the decurrent lamellæ and of the flesh, changing to the same color as the pileus. [B, 61, 74, 105.] See also *A. subinvolutus.*—**A. giganteus** [Sowerby]. A large species closely allied to *A. maximus*, with which it is sometimes identified. [B, 74.]—**A. gilvus.** 1. Of Persoon, a species belonging to *Clitocybe*, related to *A. geotropus*, with which it is sometimes identified. It is distinguished by its thickly set, branching lamellæ and the ochre-color which the stipes and flesh acquire. 2. Of Schäffer, the *A. fastibilis.* 3. A synonym for *A. nebularis.* [B, 71, 74, 149.]—**A. glandulosus** [Bulliard]. The *A. ostreatus*, var. *glandulosus.* [B, 147.]—**A. glutinosus** [Curtis]. *A. semiglobatus.* [B.]—**A. gracilentus** [Krombholz]. Syn.: *Lepiota gracilenta.* A species, probably edible, belonging to *Lepiota*, distinguished by its elongated stipes, by the shape of the pileus, which, from being campanulate, becomes expanded, and by the splitting of the epidermis of the pileus into persistent appressed segments. [B, 61, 74.]—**A. gracilis.** 1. Of Fries, a species belonging to *Psathyrella.* 2. Of Withering, a species referred to *Clitocybe.* [B, 71, 74.]—**A. graveolens** [Persoon]. Fr., *mousseron, prunellé d'Italie.* Ger., *Maischwamm.* Syn., *Hypophyllum prunulum* [Paulet.] An edible species, having a very penetrating odor, growing in France and Switzerland. It belongs to *Tricholoma*, and is marked by its smooth pileus, becoming fissured when dry and having a sooty brownish margin, and by its lamellæ whitish changing to a sooty hue. [B, 49, 74, 105.]—**A. griseus** [Persoon]. *Russula rubra.* [B, 150.]—**A. hariolorum** [De Candolle]. An edible species of agreeable odor, belonging to *Collybia*, growing on dead leaves in woods. It is distinguished by its whitish-red pileus, and its reddish hairy stipes, thinned at its upper part. [B, 74, 105.]—**A. heterophyllus.** *Russula heterophylla.* [B, 150.]—**A. holosericeus** [Fries]. Syn.: *Lepiota holosericea.* A species, probably edible, belonging to *Lepiota*, having a silky-fibrillous pileus and fibrillous stipes. [B, 46, 61, 74.]—**A. hypnorum** [Batsch]. A species belonging to *Galera*, of tawny-ochre color, with striate pileus, covered with small papillæ. There are one or two varieties. [B, 74.]—**A. hypopithyus** [Curtis]. An edible species confined to the United States. [B, 61.]—**A. igneus** [Rumphius]. A phosphorescent species growing at Amboyna. [B, 61.]—**A. igniarius.** See Polyporus *igniarius.*—**A. ilicinus** [De Candolle]. An edible species growing at the foot of willow-trees. [B, 88.] Perhaps *A. cylindraceus*; by some referred to *Flammula* and *Collybia.*—**A. imperialis.** 1. Of Fries, a species belonging to *Tricholoma.* 2. Of Batsch, *A. muscarius.* [B, 74, 149.]—**A. infundibuliformis** [Schäffer]. Fr., *gyrolle.* An edible species, of agreeable though feeble odor, belonging to *Clitocybe.* It is to be distinguished from the poisonous *A. inversus* (*q. v.*). [B, 74, 105.]—**A. insidiosus** [Letellier]. Syn.: *Amanita insidiosa.* A poisonous species belonging to *Amanita.* It resembles *A. phalloides*, and has a plano-convex pileus of coppery-red color. [B, 46.]—**A. inversus** [Scopoli]. Fr., *gyrolle trompeuse.* A poisonous species belonging to *Clitocybe.* It is distinguished from *A. infundibuliformis* by its disagreeable, acidulous odor, its orange-reddish pileus, and the distinct orange tint of its whitish flesh. [B, 74, 105.]—**A. involutus.** See *Hygrophorus involutus.*—**A. laccatus** [Scopoli]. An edible species belonging to *Collybia*, devoid of odor or taste and very variable in color. It has a farinose, somewhat scaly pileus, and thick, widely separated, adnate, gayly-colored lamellæ. [B, 74, 105.]—**A. lacrimabundus** [Fries]. A species belonging to *Hypholoma*, used as seasoning, but probably not fit for food. The pileus is covered with indistinct scales, the stipes and flesh are whitish, and the lamellæ are dull-brown and emit a thin fluid. In the variety *A. lacrymabundus*, var. *velutinus* [Persoon], the pileus is tomentose, and there are black points on the lamellæ. [B, 61, 74.]—**A. lactifluus.** See Lactarius *subdulcis.*—**A. lactifluus aureus.** *Lactarius volemum.* [B, 105.]—**A. laricinus.** See *A. melleus*, var. *laricinus.*—**A. laricis.** See Polyporus *officinalis.*—**A. lateritius.** 1. Of Persoon and of Schäffer, *A. fascicularis.* 2. Of Fries, a species belonging to *Galera* with a tawny, ochre-colored pileus, yellowish-rusty lamellæ, and a white, frosted stipes. [B. 74, 105, 149.]—**A. leiocephalus** [De Candolle]. Fr., *oronge tête lisse.* Syn.: *Amanita leiocephala.* An edible species belonging to *Amanita*, having no ring and a silky pileus with smooth margin. [B, 74, 105.]—**A. leochromus** [Cooke]. An edible species belonging to *Pholiota*, with a tawny-yellow pileus, and lamellæ changing to cinnamon-color. [B, 61, 74.]—**A. lepidus.** *Russula lepida.* [B, 93.]—**A. lepista** [Fries]. *Paxillus lepista.* [B, 105.]—**A. leucocephalus** [Léveillé]. Fr., *nombril blanc.* Syn.: *Hypophyllum umbilicatum* [Paulet]. An edible species, belonging to *Tricholoma*, with a white, fleshy convex pileus, depressed in the centre, and a white, short, hollow stipes. [B, 74, 105.]—**A. lucidus** [Otto]. *A. fascicularis.* [B, 149.]—**A. luridus.** 1. *Lactarius luridus.* 2. Of Schäffer, a species of *Tricholoma.* [B, 74.]—**A. maleficus** [Roques]. Syn.: *Amanita malefica.* A poisonous variety belonging to *Amanita*, included by Letellier in *A. insidiosus.* [B, 46.]—**A. mappa** [Fries]. Fr., *oronge blanche.* Syn.: *Amanita mappa* [Fries] (seu *citrino-alba* [Vittadini]), *Hypophyllum citrino-album* [Paulet]. A very poisonous species belonging to *Amanita*, white or yellowish in color, with a dry, convex pileus, afterward becoming flat, covered with large, flat, fugacious warts, and with a loose, soft ring at the upper part of the slender stipes, which is attenuate above, bulbous below. It has a disagreeable odor and taste. [B, 74, 105.]—**A. mas.** *Polyporus officinalis.* [L, 51.]—**A. mastoideus** [Fries]. Syn.: *Lepiota mastoidea.* A species, probably edible, belonging to *Lepiota*, distinguished by its slender stipes and ovate-expanded pileus. [B, 61, 74.]—**A. maximus** [Fries]. A very large, strongly scented, white species belonging to *Clitocybe*, with a compact striate stipes. It includes, according to some, the *A. giganteus* of Sowerby. [B, 61, 74.]—**A. meleagris.** *A. clypeolarius*, var. *meleagris.* [B.]—**A. melleus** [Linnæus]. Fr., *tête de Méduse, agaric annulaire.* Ger., *Hallimasch.* Syn.: *A. annularis, A. annularius, A. polymyces; Hypophyllum polymyces* [Paulet]. An edible species belonging to *Armillaria*, growing in groups of 20 or more at the foot of trees. It has a brownish-yellow or brown pileus, with striate margin at first convex, afterward flat, and covered with felted scales; closely set, acute, decurrent lamellæ; and a brownish stipes, 3 to 4 inches long, with a white, funnel-shaped, persistent ring. It is said to cause a peculiar disease of the coniferous trees near which it grows. A variety, *A. melleus*, var. *laricinus*, growing on larch-trees, has a smooth margin. [B, 19, 49, 74, 105.]—**A. mineralis.** See *Mineral* agaric.—**A. mollis** [Bolton]. *A. nebularis.* [B, 74, 149.]—**A. muscarius** [Linnæus]. Fr., *agaric aux mouches, agaric moucheté, fausse-oronge.* Ger., *Fliegenschwamm, Fliegenpilz.* It., *agarico muscario.* Sp., *agárico pintado.* Syn.: *Amanita muscaria* [Persoon], *Hypophyllum muscarium* [Paulet]. Fly agaric; bug agaric. A very poisonous species belonging to *Amanita*, distinguished by its bright-orange or red pileus covered with soft, fugacious, whitish warts, its white, rarely yellowish lamellæ, and its white floccose stipes, bulbous at the base and bearing, at its upper attenuated extremity, a white ring. It is to be carefully differentiated from the edible *A. cæsareus.* It possesses marked excitant and narcotic properties analogous to those possessed by alcohol. The narcotic principle is excreted in the urine, and it is said that in Siberia, where the *A. muscarius* is used as an intoxicant, the urine of those who partake of it is drank as a means of prolonging the intoxication. It is used for killing flies and other insects, and in large quantity it is a fatal poison to man; yet cooking is said to render it innocuous, and it is eaten in Russia. *A. muscarius* has been used as a local application to cancerous tumors and ulcers and internally in chronic skin-diseases, in epilepsy, as an excitant in paralysis, and recently as an anti-hidrotic in phthisical sweating. It contains the alkaloids *muscarine* and *amanitine, muscaric acid*, and a volatile acrid principle not yet isolated. [B, 19, 49, 54, 61, 105, 145.]—**A. mutabilis** [Schäffer]. Ger., *Stockschwamm.* An edible species, growing on tree-trunks, belonging to *Pholiota*, with a cinnamon-colored pileus, a rigid-brown scaly stipes, and a fugacious ring changing from white to brown. [B, 49, 74.]—**A. nauciuus** [Fries]. Syn.: *Lepiota naucina.* An edible species belonging to *Lepiota*, white, with lamellæ changing from white to rose-colored. [B, 46, 74.]—**A. nauseosus.** *Russula nauseosa.* [B, 93.]—**A. nebularis** [Batsch]. Fr., *agaric piléolaire.* A large species, belonging to *Clitocybe*, regarded as edible by good authorities, although some consider it noxious. It is found growing upon dead leaves in woods, and is distinguished by its sooty-gray pileus, becoming pale in dry weather, its pale, closely set arcuate lamellæ, and its spongy elastic stipes. [B, 74, 105.]—**A. necator** [Bulliard]. Fr., *agaric meurtrier. Lactarius torminosus.* [B, 105.]—**A. nigricans** [Bulliard]. *Russu-*

AGARICUS MUSCARIUS.
(AFTER B. FRANK [B, 49].)

la nigricans. [B, 105.]—**A. nitens** [Bulliard]. *A. semiglobatus.* [B.] —**A. nitidus** [Fries]. Syn.: *Amanita nitida* [Persoon]. A poisonous species belonging to *Amanita*, having a yellowish-white pileus with dry, readily separable epidermis and thick, acutely pyramidal gray or greenish warts, large white lamellæ, and a white stipes bulbous at the base. [B, 46, 74, 105.]—**A. niveus.** 1. Of Scopoli, *Hygrophorus niveus.* 2. Of Sowerby, *A. variabilis.* 3. Of Paulet, a poisonous species, also called *Amanita nivea*, referred to *Amanita* and by some included with *A. insidiosus.* 4. Of Quelet, a species referred to *Mycena.* [B, 46, 71, 74, 149.]—**A. nobilis** [Bolton]. *A. muscarius.* [B, 149.]—**A. noctiluceus** [Léveillé]. A phosphorescent species growing in Manila. [B, 61.]—**A. nudus** [Bulliard]. Fr., *plateau violet.* Syn.: *Hypophyllum ianthinum* [Paulet]. An edible species, little employed, belonging to *Tricholoma*, distinguished by the violet hue of its pileus, lamellæ, and farinose stipes, and by its acidulous odor. [B, 74, 105.]—**A. obscurus** [Schäffer]. *A. melleus.* [B, 149.]—**A. odorus** [Bulliard]. Fr., *mousseron odorant, agaric anisé.* Ger., *Anisschwamm.* A species, probably edible, belonging to *Clitocybe*, distinguished by its fragrant anise-like odor, the green color of its pileus, and the pale color of the stipes and adnate, distant lamellæ. [B, 61, 74, 105.]—**A. olearius**

AGARICUS OLEARIUS. (AFTER MARCHAND [B, 105].)

[De Candolle]. Fr., *oreille de l'olivier, agaric de l'olivier.* Syn.: *Polymyces phosphoreus* [Battarra]. *Dendrosarcos phosphoreus* [Paulet]. A very poisonous phosphorescent species belonging to *Pleurotus.* It grows in tufts at the foot of olive-trees, and is characterized by its brownish-orange or red irregular pileus, at first convex then infundibuliform, by its golden-yellow decurrent lamellæ, and by its short reddish-brown stipes, attenuate at the lower part. [B, 61, 74, 105.]—**A. opiparus** [Fries]. An edible species, of agreeable taste, belonging to *Clitocybe*, having a shining, white, grayish, or rose-colored pileus, white lamellæ, and a white, fleshy, non-elastic pileus. [B, 74, 105.]—**A. orcella** [Bulliard]. An edible species belonging to *Clitopilus* and closely related to *A. prunulus.* It has a yellowish-white, soft, moist pileus with closely set lamellæ, and emits an odor of meal. [B, 61, 74.]—**A. oreades.** *Marasmius oreades.* [B, 49, 105.]—**A. ostreatus** [Jacquin]. Fr., *peuplière-brune.* Ger., *Austernpilz, Buchenpilz, Drehling.* Syn.: *Dendrosarcos populeus* [Paulet]. The oyster mushroom; a very excellent edible species, belonging to *Pleurotus*, growing in tufts upon oaks and poplars. It has a grayish or brown fleshy pileus, subsequently becoming paler, white decurrent lamellæ, and a white stipes, inconspicuous, sometimes suppressed. A variety, *A. ostreatus*, var. *glandulosus*, has glandular swellings upon the lamellæ. [B, 49, 74, 105, 147.]—**A. ovatus** [Schäffer]. *Coprinus ovatus.* [B, 74, 149.] —**A. ovoideus** [Bulliard]. Fr., *coucoumèle, champignon blanc, boulé.*

AGARICUS OSTREATUS. (AFTER LOUDON.)

Syn.: *Amanita alba* [Persoon] (seu *ovoidea*). An edible species belonging to *Amanita*, found in oak groves, distinguished by its white color, its large loose volva, its large thick ring, and the smooth, inflexed margin of the pileus. [B, 38, 74, 105.]—**A. pallidus** [Sowerby]. *A. prunulus.* [B, 71.]—**A. palometus** [De Candolle]. *A. amethystinus* [Fries].—**A. pantherinus** [Fries]. Fr., *oronge perlée.* Ger., *Pantherschwamm.* Syn.: *Amanita pantherina* [Krombholz], *Hypophyllum margaritiferum* [Paulet] (in part). A very poisonous species belonging to *Amanita*, distinguished by its brown pileus with viscous epidermis, covered with whitish, farinose, flat, adherent warts and with a striate margin, and by its white flesh and lamellæ, and white stipes, bulbous below, and bearing a white ring. [B, 74, 105.]—**A. pectinatus.** See Russula *pectinata.* —**A. pellitus.** 1. Of Paulet, a poisonous species belonging to *Amanita*, having a large thick stipes attenuate above, bulbous below, bearing a large floating fugacious ring, grayish or yellowish pileus with smooth margin, white lamellæ reaching the stipes, and soft volva, which in the course of its development tears into irregular fugacious plates, leaving beneath it a soft pellicle readily separable from the pileus. 2. Of Persoon, a species belonging to *Pluteus.* [B, 74, 105.]—**A. personatus** [Fries]. Fr., *mascarille, champignon masqué.* Syn.: *Lepista personata, Hypophyllum personatum* [Paulet]. Masked mushroom; a very excellent edible species, of agreeable odor and taste, belonging to *Tricholoma.* The pileus is compact, obtusely campanulate, and of a violet hue changing to brown; the margin is villous and frosted; the lamellæ are rounded and villous; the stipes is long, white with a violet tint, cylindrical, and fibrous. [B, 71, 74, 105.]—**A. phalloides** [Fries]. Fr., *oronge ciguë jaunâtre.* Ger., *Knollenblätterschwamm.* Syn.: *Amanita phalloides* (seu *viridis* [Persoon] seu *venenosa* [Persoon]). A very poisonous species belonging to *Amanita*, having a green or yellow, obtuse, viscid, rather scaly pileus with a smooth margin, bulbous half-free volva, and white or yellow stipes which becomes fistulous at the top. It is said to contain an alkaloid, *bulbosine.* [B, 46, 71, 74, 105.]—**A. pileolarius** [Bulliard]. *A. nebularis.* [B, 147, 149.]—**A. piperatus.** 1. Of Scopoli, *Lactarius piperatus.* 2. Of Bulliard, *Russula fœtens.* [B, 49, 105.]—**A. plumbeus.** 1. Of Fries, a species with a lead-colored pileus, belonging to *Mycena.* 2. Of Schäffer, a lead-colored variety of *A. vaginatus.* 3. A variety of *Lactarius turpis.* [B, 71, 74.]—**A. polymyces** [Persoon]. *A. melleus.* [B, 149.]—**A. pometi** [Fries]. An edible species belonging to *Pleurotus*, found in the United States. It is white, with an irregular pileus and an elastic, villous, rooting stipes. [B, 61, 74.]—**A. Pomonæ** [Lenz]. Ger., *Pomonaschwamm. A. gambosus.* [B, 49, 74.]—**A. præcox** [Persoon]. A poisonous species referred by some, along with the allied *A. durus*, to *A. semiglobatus*, but usually made a distinct species assigned to the subgenus *Pholiota.* It belongs to the series of terricolous *Agarici* with brownish-rusty spores, and is characterized by its soft, pale pileus and whitish, farinose-pubescent stipes. [B, 74, 147.]—**A. pratensis.** Ger., *Wiesenschwamm.* The meadow mushroom. 1. Of Schäffer, an edible species belonging to *Psalliota*, closely allied to *A. campestris*, chiefly distinguished by its ashy-white pileus and ash-colored lamellæ, rounded at their inner extremities. *A. pratensis*, var. *fulveolus* [Lasch], has yellowish lamellæ. 2. Of Persoon, the *Paxillus lepista.* 3. Of Hudson, the *Marasmius oreades.* 4. The *Hygrophorus pratensis.* [B, 49, 74, 105, 147.]—**A. procerus** [Scopoli]. Fr., *coquemelle des prés, coulemotte, parasol.* Ger., *Parasolschwamm.* Syn.: *Lepiota procera, Hypophyllum globoso-cameratum* [Paulet]. The parasol-mushroom; a very excellent edible species, of agreeable odor, belonging to *Lepiota.* It has a very tall sub-bulbous stipes, attaining sometimes a foot in height, and a white or brownish-white pileus covered with a thick epidermis which breaks up into grayish-brown imbricated scales, separating from the pileus. [B, 49, 61, 74, 105.]—

AGARICUS PHALLOIDES. (AFTER LOUDON.)

AGARICUS PROCERUS. (AFTER THURBER [B, 138].)

AGARICUS PRUNULUS. (AFTER LOUDON.)

A. prunulus [Scopoli]. Fr., *mousseron, petite-mamelle.* Ger., *Mousseron.* Syn.: *Dendrosarcos mammola* [Paulet]. A choice edible species belonging to *Clitopilus*, distinguished by its mealy odor, its ashy-white fleshy pileus, the rather widely separated lamellæ, in color, white changing to red, and the striate stipes. [B, 49, 74, 105.]—**A. pseudo-aurantiacus** [Bulliard]. *A. muscarius.* [B, 149.]—**A. pseudo-mousseron** [Bulliard]. *Marasmius oreades.* [B, 149.]—**A. pudicus** [Fries]. An edible species belonging to *Pholiota*, growing on trunks of trees, marked by its smooth, dry, white pileus and by lamellæ at first whitish then tawny-yellow. [B, 61, 74.]—**A. pulverulentus** [Bulliard]. *A. fascicularis.* [B, 105, 149.]—**A. pustulatus.** 1. Of Schäffer, *A. rubescens* (1st def.). 2. A species referred to the genus *Hygrophorus.* [B, 71, 74.]—**A. putridus** [Scopoli]. *A. melleus.* [B, 149.]—**A. pyrogalus** [Bulliard]. *Lactarius pyrogalus.* [B, 93, 105.]—**A. quercinus.** Oak agaric; *Polyporus igniarius.* [L, 51.]—**A. quercinus præparatus.** Amadou; *Polyporus igniarius* (or *fomentarius*) prepared for surgical use. [L, 57.]—**A. quercus.** See *A. quercinus.*—**A. quietus.** See Lactarius *quietus.*—**A. rachodes.** See *A. rhachodes.*—**A. radicatus** [Relhan]. An edible species belonging to *Collybia*, marked by its rugose, glutinous, whitish, or fuscous pileus, widely separated white lamellæ, and tall stipes. [B, 61, 74.]—**A. rhachodes** [Vittadini]. Syn.: *Lepiota rhachodes.* A species, regarded by some as edible, belonging to *Lepiota.* It resembles *A. procerus*, from which it is chiefly distinguished by the thin reticulate epidermis, which breaks up into persistent scales. [B, 46, 61, 74.]—**A. rimosus** [Bulliard]. Ger., *rissige Blätterschwamm.* A poisonous species belonging to *Inocybe*, with a fissured pileus, changing from a dusky hue to yellow, and a smooth sub-bulbous stipes, white at its sum-

mit. [B, 49, 74.]—**A. rosellus.** 1. Of Batsch, *A. laccatus.* 2. Of Fries, a rose-colored species belonging to *Mycena.* [B, 74, 149.]—**A. roseus** [Persoon]. *Russula fragilis.* [B, 105.]—**A. rubellus.** 1. Of Schäffer, *A. laccatus.* 2. Of Scopoli, a species belonging to *Entoloma*, with a reddish, somewhat viscid pileus and a white stipes. [B, 74, 149.]—**A. rubens** [Scopoli]. *A. muscarius.* [B, 149.]—**A. ruber.** 1. Of Trattinick, *Lactarius volemum.* 2. *Russula rubra.* [B, 105, 150.]—**A. rubescens.** 1. Fr., *golmotte, golmelle, oronge vineuse.* Ger., *Perlenschwamm, graue Fliegenschwamm.* Syn.: *Amanita rubescens, Hypophyllum vinosum* [Paulet]. A species, belonging to *Amanita*, established by Fries, considered as edible, although stated by some to be poisonous. It has a reddish or brownish pileus studded with flat or obtuse, whitish, farinose, fugacious warts, and a red or brownish, finely scaly pileus, attenuate at its upper part. Its flesh becomes red when bruised. 2. Of Withering, *Lactarius rufus.* 3. Of Scopoli, *Lactarius volemum.* 4. *Lactarius quietus.* [B, 49, 61, 71, 74, 105, 150.]—**A. rufus** [Scopoli]. *Lactarius rufus.*—**A. russula** [Schäffer]. Fr., *russule.* An edible species of agreeable odor, belonging to *Tricholoma*, having a rose-colored, more or less spotted, scaly or granular pileus, rounded sub-decurrent white lamellæ, changing to red, and a solid rose-colored stipes. [B, 38, 74, 105.]—

AGARICUS RUBESCENS. (AFTER THOMÉ.)

A. salignus [Persoon]. Fr., *oreille de noyer.* Syn.: *Dendrosarcos juglandis* [Paulet]. An edible species, said to be very good when young, belonging to *Pleurotus.* It is found growing on walnut-trees, is of a sooty-ochre color, has a horizontal spongy pileus, sub-ramose pale lamellæ, and a tomentose stipes. It is found in the United States, Continental Europe, and China. [B, 61, 74, 105.]—**A. sanguineus** [Bulliard]. *Russula sanguinea.* [B, 71, 93.]—**A. saxosus.** Syn.: *Lepiota saxosa* [Bertillon]. An edible French species, resembling *A. rhachodes*, belonging to *Lepiota.* [Bertillon (B, 46).]—**A. scorodonius.** *Marasmius scorodonius.* [B, 49, 71.]—**A. scruposus** [Fries]. Fr., *darmas des Provençaux.* Syn.: *Hypophyllum provinciale* [Paulet]. An edible species, abounding in the south of France, belonging to *Armillaria*, having the pileus rough with closely set rugæ, a white ring, and a whitish or brown stipes. It has an agreeable odor of fresh flour. [B, 46, 74, 105.]—**A. semiglobatus** [Batsch]. A species said to be poisonous, belonging to *Stropharia.* It grows on dung, is yellowish in color, glutinous, and has a smooth pileus, a slender stipes, and broad blackish lamellæ. [B, 74, 147.]—**A. semilanceatus** [Fries]. A species belonging to *Psilocybe*, with a moist, viscous, yellowish-green pileus, almost cuspidate in shape, and a pale stipes. [B, 74.]—**A. semiorbicularis** [Bulliard]. A species belonging to *Naucoria*, with the pileus changing from a tawny-reddish to an ochre color, and with a hollow, shining, rust-colored stipes. [B, 74.]—**A. semipetiolatus** [Schäffer]. *Panus stypticus.* [B, 105.]—**A. sessilis** [Bulliard]. *A. variabilis.* [B, 149.]—**A. setiger** [Fries]. Syn.: *Hypophyllum setigerum* [Paulet]. *A. silvaticus*, var. *setiger.* [B, 105.]—**A. silvaticus** [Schäffer]. Ger., *Waldchampignon.* An edible species belonging to *Psalliota*, closely allied to *A. campestris*, of which it is sometimes regarded as a variety. It is chiefly distinguished by its reddish color, and its fibrillous squamose pileus. The variety *A. silvaticus*, var. *hæmorrhoidalis* [Kalkbrenner], is covered with broad appressed scales, and the flesh when broken becomes blood-red in color. *A. silvaticus*, var. *setiger* [Fries], is distinguished by the brownish felt-like hairs covering the pileus and stipes. [B, 61, 74, 105.]—**A. silvicola.** *A. campestris*, var. *silvicola.* [B.]—**A. sinuatus** [Fries]. An edible species belonging to *Entoloma*, with a smooth, moist, yellowish-white pileus, and a fibrillous stipes. [B, 74.]—**A. solitarius** [Bulliard]. Fr., *amanite solitaire.* Syn.: *Amanita solitaria.* An edible species belonging to *Amanita*, white, with a bulbous rooting stipes, covered with imbricated scales. [B, 38, 74.]—**A. spadiceus** [Fries]. A species belonging to *Psilocybe*, with a smooth, moist pileus, reddish-brown lamellæ, and a pale stipes, used as a seasoning for ketchup, but probably dangerous. [B, 61, 74.]—**A. speciosus** [Fries]. An edible species found in the United States and Europe, and eaten in the former country. It belongs to *Volvaria*, is white, and has a smooth viscid pileus, a loose villous volva, and a villous stipes. [B, 61, 74.]—**A. spissus** [Fries]. Fr., *oronge à verrues, oronge perlée.* Syn.: *Amanita spissa, Hypophyllum margaritiferum* [Paulet] (in part). A poisonous species belonging to *Amanita*, having a dark, rusty-brown, viscid pileus with flat or obtuse ash-colored warts, white lamellæ, a white stipes, bulbous below, attenuate above, and firm white flesh. [B, 74, 105.]—**A. squamosus** [Fries]. A species belonging to *Stropharia*, having a yellow pileus covered with superficial concentric floccose scales, and a slender floccose stipes. [B, 74.] See also *A. squarrosus, A. procerus*, and *A. phalloides.*—**A. squarrosus** [Müller]. A species belonging to *Pholiota*, edible according to some, dangerous according to others. It is rusty-yellow in color, and its stipes is attenuate at the base and covered with crowded, scurfy scales. There are several varieties, distinguished by the shape or color of the pileus. [B, 61, 74.]—**A. stipitis** [Sowerby]. *A. melleus.* [B, 149.]—**A. stipticus.** *A. stypticus.* See PANUS *stypticus.*—**A. strobiliformis** [Vittadini]. Syn.: *Amanita strobiliformis.* A species, said to be edible, belonging to *Amanita.* It has a grayish-white or grayish-yellow pileus covered with flattened polyhedral tenacious warts, a white, thick, flocculose-farinose, fugacious ring, and a white thick stipes, smooth above, floccose and bulbous below. [B, 61, 74, 105.]—**A. stypticus.** *Panus stypticus.* [B, 74, 151.]—**A. suavis** [Persoon]. *A. infundibuliformis.* [B, 105.]—**A. subcarneus** [Batsch]. *A. laccatus.* [B, 149.]—**A. subdulcis.** *Lacturius subdulcis.* [B.]—**A. subinvolutus** [Saunders and Smith]. An edible species belonging to *Clitocybe*, often considered as a variety of *A. geotropus* or referred to the allied *A. gilvus.* It is distinguished from the former by its fibrillous, zoned, yellowish stipes. [B, 61, 74, 149.]—**A. sublateritius** [Schäffer]. A species, alleged to be poisonous, belonging to *Hypholoma*, with a dry, discoid, tawny pileus, whitish compact flesh, and lamellæ changing from white to dark olive-color. *A. sublateritius*, var. *silaceus* [Persoon], has an orange-red pileus, whitish at the margin, and a bulbous stipes. [B, 74.]—**A. subocreatus** [Cooke]. An edible species found in Asia, exported from China and Singapore. [B, 61.]—**A. sulfureus** [Bulliard]. Fr., *citron, agaric soufré.* Syn.: *Hypophyllum citrinum* [Paulet]. A poisonous species belonging to *Tricholoma*, having a very fœtid odor, a pronounced sulphur color, a sub-umbonate pileus, broad, widely separated lamellæ, and a smooth, striate, non-floccose stipes. [B, 74, 105.]—**A. sylvaticus, A. sylvicola.** See *A. silvaticus, A. silvicola.*—**A. tessulatus** [Bulliard]. An edible species belonging to *Pleurotus*, with a yellowish guttate pileus, uncinate adnate lamellæ, and a smooth stipes. [B, 61, 74.]—**A. theiogalus.** *Lactarius theiogalus.* [B, 74, 144.]—**A. torminosus.** *Lactarius torminosus.* [B, 105.]—**A. tortilis.** 1. Of De Candolle, *Marasmius oreades.* 2. Of Bolton, a species belonging to *Collybia*, allied to *A. laccatus.* [B, 74, 105, 149.]—**A. translucens** [De Candolle]. An edible species belonging to *Claudopus*, allied to, and by some identified with, *A. depluens.* It is sub-sessile, with lamellæ at first pale, then becoming reddish or purple. [B, 74, 105.]—**A. trochiscatus.** White agaric in the form of troches. See *Trochisci de* AGARICO.—**A. tuba** [Fries]. A white species belonging to *Clitocybe*, with an umbilicate, dry, white pileus, and broad, crowded, decurrent lamellæ. It is said to be used in diarrhœa. [B, 71, 74.]—**A. turgidus** [Greville]. *A. nebularis.* [B, 148.]—**A. turpis.** *Lactarius turpis.* [B.]—**A. typhoides** [Bulliard]. *Coprinus comatus.* [B, 105, 149.]—**A. ulmarius** [Bulliard]. Fr., *agaric* (ou *oreille*) *de l'orme, coquille noire du hêtre.* Syn.: *Dendrosarcos nigrescens* [Paulet]. A very good edible species belonging to *Pleurotus*, of acidulous, agreeable odor, growing upon elms, oaks, and other trees. It has a whitish, orange-tinted pileus, large emarginate, adnate, whitish lamellæ, and a white, firm, elastic stipes, villous, with a bulbous base. [B, 61, 74, 105.]—**A. umbellatus** [Fries]. *Lentinus umbellatus.* [B, 105.]—**A. umbratilis** [Fries]. Fr., *œil de corneille.* Syn.: *Hypophyllum corvinum* [Paulet]. A poisonous species belonging to *Omphalia*, said to be used as a poison for rats. It has a brownish-black pileus convex at first, afterward umbilicated, large, arcuate, decurrent lamellæ, and a brownish stipes. [B, 105.]—**A. urens.** Fr., *agaric brûlant.* *Marasmius urens.* [B.]—**A. vaginatus** [Fries]. Fr., *oronge satinée* (ou *rayée*), *amanite engainée.* Ger., *Scheidenschwamm.* Syn.: *Amanita vaginata* (seu *spadicea* [Persoon]), *Hypophyllum latum* [Paulet]. An edible species belonging to *Amanita*, distinguished by the absence of the ring, by the pectinate-sulcate margin of the pileus, and by the white lamellæ. [B, 19, 74, 105.]—**A. vaporarius** [Otto; Vittadini]. A variety of *A. campestris.* [B, 147.]—**A. variabilis** [Persoon]. A species belonging to *Claudopus*, allied to *A. depluens*, distinguished by its tomentose white pileus, well-separated lamellæ, and short stipes. [B, 74.]—**A. vellereus.** *Lactarius vellereus.* [B.]—**A. venenosus.** Syn.: *Amanita venenosa* [Persoon]. A species including *A. phalloides, A. virosus*, and *A. vernus.* [B, 105.]—**A. vernus** [Bulliard]. Fr., *oronge ciguë blanche.* Ger., *Frühlingsblätterschwamm.* Syn.: *Amanita bulbosa* (in part), *Agaricus bulbosus*, var. *vernus.* Spring agaric; a very poisonous species, belonging to *Amanita*, having a fœtid odor, and characterized by its white, rather scaly, campanulate pileus, reflected swollen ring, and stipes bulbous at the base. It is found in the woods in spring-time. [B, 49, 74.]—**A. verrucosus** [Bulliard]. *A. rubescens* (1st def.). [B, 105.]—**A. vesca.** *Russula vesca.* [B.]—**A. veternosus.** *Russula veternosa.* [B, 105.]—**A. villaticus** [Brond.]. A variety of *A. campestris.* [B, 147.]—**A. violaceus.** The violet mushroom. 1. Of Sowerby, *A. personatus.* 2. *Cortinarius violaceus.* [B.]—**A. viperinus** [Fries]. Fr., *oronge souris, oronge serpent.* Syn.: *Hypophyllum anguinum* [Paulet]. A poisonous species belonging to *Volvaria*, much resembling *A. cæsareus.* It has a brilliant, grayish, silky, conical pileus, yellowish-white lamellæ, a small white volva, and a grayish-white, fistulous stipes. [B, 74, 105.]—**A. virescens.** 1. Of Schäffer, *Russula virescens.* 2. A variety of *A. phalloides.* [B, 71, 150.]—**A. virgineus.** *Hygrophorus virgineus.* [B, 71, 105.]—**A. virosus.** 1. Of Fries. Fr., *oronge ciguë jaunâtre, amanite sulfurine.* Syn.: *Amanita citrina* [Persoon], *Hypophyllum virosum* [Paulet]. A poisonous species, closely related to *A. phalloides*, belonging to *Amanita.* It is distinguished chiefly by its fœtid odor, its campanulate, yellowish [B, 105], or white [B, 74] pileus, and its squamose, less bulbous stipes. As first established by Fries, it included *A. vernus.* 2. Of Sowerby, *A. semiglobatus.* [B, 74, 105, 149.]—**A. Vittadinii** [Fries]. Syn.: *Amanita Vittadinii.* A species belonging to *Amanita*, chiefly distinguished by the dense muricated warts with which the pileus is covered, and the squarrose, scaly stipes. [B, 46, 74.]—**A. volemum** [Fries]. *Lactarius volemum.* [B, 74, 105.]—**A. volvaceus** [Bulliard]. Syn.: *Fuligo vaporaria* [Persoon]. A species suspected to be poisonous, belonging to *Volvaria*, characterized by its sooty pileus striped with black, its loose volva, and its solid stipes. [B, 51, 74.]—**A. xanthopus** [Fries]. A species belonging to *Collybia*, by some regarded as a variety of *Russula alutacea*, having a light-yellowish pileus, whitish lamellæ, and a yellow stipes with hairy, rooting base. [B, 71, 74.]—**A. xerampelinus.** 1. Of Sowerby, a species assigned to *Tricholoma.*

2. *A. cæsareus.* 3. *Russula xerampelina.* [B, 71, 74.]—**Black-spored agarici.** See under *A.*, series E, or *Coprinarii.*—**Extractum agarici alcoholicum.** Fr., *extrait alcoölique d'agaric.* An extract made from white agaric (*Polyporus officinalis*) by digesting the latter with alcohol, filtering, and evaporating to a suitable consistence. [Wurtemb. Ph. (1798).] [L, 85.]—**Extractum agarici aquosum** [Fr. Cod., 1837]. Fr., *extrait aqueux d'agaric.* Made by extracting white agaric with cold water, filtering, expressing, and evaporating. [L, 85.]—**Extractum agarici gummo-resinosum.** Fr., *extrait gommo-résineux d'agaric, extrait hydralcoölique d'a.* An extract of white agaric (*Polyporus officinalis*); made by digesting 345 parts of the latter with 115 of alcohol and 2,760 of boiling water, decanting, filtering, and evaporating the filtrate to dryness. [Sp. Ph. (1798).] Other proportions were employed in unofficial formulæ. [L, 85.]—**Ferruginous-spored agarici.** See under *A.*, series C, or *Dermini.*—**Mel rosatum solutivum cum agarico.** See under Mel.—**Purple-spored agarici.** See under *A.*, series D, or *Pratelli.*—**Rose-spored agarici.** See under *A.*, series B, or *Hyporrhodii.*—**Rusty-spored agarici.** Ferruginous-spored agarici.—**Trochisci de agarico.** Fr., *trochisques d'agaric.* Syn.: *a. trochiscatus.* Troches made out of white agaric (*Polyporus officinalis*) by triturating the latter with white wine to which usually ginger and sometimes gum tragacanth were added. [Sydenham (B, 90); Disp. Palatinat. (1764), Sard. Ph. (1773), Brunsw. Ph. (1777), Wurtemb. Ph. (1793), Sp. Ph. (1798) (L, 85.)]—**White-spored agarici.** See under *A.*, series A, or *Leucospori.*

AGARIFIED (Provinc. Eng.), adj. A^{2}g-a^{2}r'-i^{2}f-id. Feverish. [L, 45.]

AGARIKON, AGARIKUN (Lat.), n's n. A^{2}g(a^{3}g)-a^{2}r(a^{3}r)'i^{2}k-o^{2}n, -u^{3}n(u^{4}n). Barbarous forms of *agaricon.* [L, 105.] See Polyporus *officinalis.*

AGARISTA (Lat.), n. f. A^{2}g(a^{3}g)-a^3-ri^{2}st'a^3. A genus of ericaceous plants, established by Don. [L, 64.]

AGARUM (Lat.), n. n. A^{2}g(a^{3}g)'a^3-ru^{3}m(ru^{4}m). A genus of olive-spored *Algæ*, distinguished from *Laminaria* chiefly by the frond being always perforated with roundish holes. [L, 67.]—**A. esculentum.** See Laminaria *esculenta.*

AGASATAMARAY, n. An Indian name for the *Pistia stratiotes.* [L, 105.]

AGASSIN (Fr.), n. A^3-ga^{3}s-sa^{2}n^2. A vine bud from which no fruit is developed. [L, 42.]

AGASSIZIA (Lat.), n. f. A^3-ga^{3}s-se'zi^2-a^3. A genus of plants, named in honor of Agassiz, belonging partly to the genus *Galvesia* and partly to the genus *Camissonia.* [L, 30.]

AGASTACHYS (Lat.), n. m. A^{2}g(a^{3}g)-a^{2}s(a^{3}s)'ta^3-ki^{2}s(ch^{2}u^{6}s). Gen., *agastach'yos.* From ἀγαστός, admirable, and στάχυς, an ear of corn, a spike. A genus of proteaceous plants, established by R. Brown. [L, 64.]

AGASTER (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}st(a^{3}st)'u^{5}r(e^{2}r). Gen., *agast'eris.* From α priv., and γαστήρ, the paunch. An animal without an alimentary canal.

AGASTOR (Lat.), n. m. A^{2}g(a^{3}g)-a^{2}st(a^{3}st)'o^{2}r. Gen., *agast'oris.* From α copul., and γαστήρ, the womb. 1. A twin. 2. An agaster (*q. v.*). [L, 50.]

AGASTRARIUS (Lat.), n. m. A^{2}g(a^{3}g)-a^{2}st(a^{3}st)-ra(ra^3)'ri^2-u^{3}s(u^{3}s). Fr., *agastraire.* An organism without a proper alimentary canal. [Blainvill (L, 63).]

AGASTREÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)-a^{2}st(a^{3}st)'re^2-e(a^3-e^2). See Cestoda.

AGASTRIA (Lat.), n. n. pl. A^{2}g(a^{3}g)-a^{2}st(a^{3}st)'ri^2-a^3. Agastric animals. [L, 108.]

AGASTRIC, adj. A^{2}g-a^{2}st'ri^{2}k. Lat., *agastricus.* Fr., *agastraire.* Ger., *magenlos.* It., *agastrico.* Sp., *agástrico.* Syn.: *anenterate.* Having no internal digestive cavities. [L, 41, 56, 98, 108.]

AGASTRICA (Lat.), n. n. pl. A^{2}g(a^{3}g)-a^{2}st(a^{3}st)'ri^{2}k-a^3. See Agastria.

AGASTRONERVIA (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}st(a^{3}st)-ro-nu^{5}r-(ne^{2}r)'vi^2(wi^2)-a^3. From α priv., γαστήρ, the stomach, and νεῦρον, a nerve. Fr., *agastronervie.* Sp., *agastronervia.* Diminished power in the nerves of the stomach. [L, 41.]

AGASTRONOMIA (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}st(a^{3}st)-ro-no'mi^2-a^3. Fr., *agastronomie.* Ger., *Agastronomie.* It., *agastronomia.* Sp., *agastronomia.* See Agastronervia.

AGASTROZOA (Lat.), n. n. pl. A^{2}g(a^{3}g)-a^{2}st(a^{3}st)-ro-zo'a^3. From α priv., γαστήρ, the stomach, and ζῷον, an animal. Fr., *agastrozoaires.* See Agastria.

AGASYLLIS (Lat.), n. f. A^{2}g(a^{3}g)-a^3-si^{2}l(su^{6}l)'li^{2}s. Gen., *agasyl'lidis.* Gr., ἀγασυλλίς (the *Heracleum gummiferum* [Dioscorides (L, 47)]). A genus of umbelliferous plants. [L, 30, 67.]—**A. galbanum.** See Dorema *ammoniacum.*

AGATE, n. A^{2}g'at. See Achates.—**A.-snail.** See Agatine.

AGATE (Fr.), n. A^{3}g-a^{3}t. 1. The agate. 2. Agaric. [A, 324.]—**A. de chêne.** See Polyporus *igniarius.*—**A. minéral.** See *Mineral* agaric.—**A. mondé.** Prepared agaric. [L, 52.]

AGATHENQUELLE, AGATHENSQUELLE (Ger.), n's. A^3'ga^3-te^{2}n(te^{2}nz)-kwe^{2}l-le^2. A Norwegian spring. [A, 305.]

AGATHIS (Lat.), n. f. A^{2}g(a^{3}g)'a^3-thi^{2}s. Gen., *agath'idis.* From ἀγαθίς, a heap or cluster, from the arrangement of the flowers. A genus of East Indian coniferous trees, established by Salisbury. [L, 64.]—**A. Dammarra.** The dammar-pine, from which dammar turpentine is extracted. [B, 5; L, 61.]

AGATHODES (Lat.), n. f. A^{2}g(a^{3}g)-a^3-tho'dez(de^{2}s). A genus of gentianaceous plants, of the family *Chironieæ*, established by Don. [A, 321.]—**A. angustifolia** [Don]. Syn.: *Swertia angustifolia* [Wallroth]. This, the only species, has a bitter root, employed in the north of India as a tonic, stomachic, and febrifuge. [A, 321.] Cf. Agathotes, Gentiana, and Ophelia.

AGATHOICUS (Lat.), adj. A^{2}g(a^{3}g)-a^3-tho'i^{2}k-u^{3}s(u^{4}s). In botany, transparent like agate. [L, 63.]

AGATHOLEPIS (Lat.), adj. A^{2}g(a^{3}g)-a^3-tho^{2}l'e^{2}p-i^{2}s. From ἀγαθός, beautiful, and λεπίς, a scale. In botany, having brilliant or colored scales. [L, 63.]

AGATHOPHYLLUM (Lat.), n. n. A^{2}g(a^{3}g)-a^3-tho-fi^{2}l(fu^{6}l)'-lu^{3}m(lu^{4}m). From ἀγαθός, beautiful, and φύλλον, a leaf. Fr., *agathophylle.* Ger., *Gewürzblatt.* A genus of plants of the laurel family. [Masters (L, 67).]—**A. aromaticum.** A Madagascar tree, the drupaceous fruit of which has an aromatic odor and a bitter, acrid, balsamic taste, and possesses stimulant properties. The kernel is known as the *Madagascar clove nutmeg.* The natives use the leaves as a condiment. [B, 97; L, 67.]

AGATHOSMA (Lat.), n. f. A^{2}g(a^{3}g)-a^3-tho^{2}z(tho^{2}s)'ma^3. From ἀγαθός, pleasing, and ὀσμή, an odor. Fr., *agathosme.* Ger., *Wohlgeruch.* A genus of diosmeous plants, established by Willdenow. [L, 37, 41, 64.]—**A. crenata.** See Diosma *crenata.*—**A. pulchella.** A blunt-leaved species constituting one of the varieties of "bucku," or "booko" (see Buchu). The dried and powdered leaves, mixed with grease, are used by the Hottentots for anointing themselves. [L, 64.]

AGATHOTES (Lat.), n. f. A^{2}g(a^{3}g)-a^{2}th(a^{3}th)'o^{2}t-ez(e^{2}s). Gen., *agathote'tos (-tis).* From ἀγαθότης, goodness. A genus of gentianaceous plants. [B, 19.]—**A. chirayta.** Syn.: *Gentiana chirayta, Ophelia chirata.* A species indigenous to northern India, containing a pure bitter, used for the same purposes as gentian and known as chiretta. [L, 67.] See Chirata.

AGATHWASSER (Ger.), n. A^{3}g'a^{3}t-va^{3}s-ser. See Achatinsquelle.

AGATI (Lat.), n. m., indecl. (really a Hindu word). A^3-ga^3'te. A genus of leguminous plants, of the sub-order *Papilionaceæ*, established by Desveaux. [A, 306; L, 87.]—**A. æschynomene grandiflora** [Linnæus], **A. grandiflora.** An East Indian tree (the *buka* of Bengal, the *yerra avesi* of Tengal), the leaves, flowers, and young pods of which are used in making curry. The juice of the flower is used for dimness of vision, and the bark, which is bitter and tonic, is used in small-pox. [L, 67, 87.]

AGATHBAD (Ger.), n. A^{3}g-a^{3}t'i^2-i^2-ba^{3}d. See Achatinsquelle.

AGATINE (Fr.), n. A^3-ga^{3}t-en. The agate-snail, a genus of terrestrial pneumonobranchous gasteropods found in the tropics. A species found on Princes' Island (*Achatina bicarinata*) was formerly made the basis of a syrup used in phthisis. [L, 49, 110.]

AGAVE (Lat.), n. f. A^{2}g(a^{3}g)-a(a^3)'ve(wa). Gen., *aga'ves, aga'væ.* From ἀγαυός, admirable, or Ἀγαυή, the name of one of the Nereids. Fr., *agavé.* A genus of herbaceous plants of the natural order *Amaryllidaceæ*, distinguished by bearing a many-flowered scape with flowers the perianth of which is destitute of a crown, straight, and adherent to the ovary, with the segments fused into a tube above the ovary. [B, 34.] Several of the species bear a considerable resemblance in appearance to plants of the genus *Aloe*, with which they are sometimes confounded. Most of the species yield a rather bitter and astringent juice. [α, 5.]—**A. americana** [Linnæus]. Fr., *agavé d'Amérique.* Ger., *Baumaloë, grosse* (oder *hundertjährige*) *Aloe.* The American aloe or century-plant (one of the *magueys* of South America, the *mezcal* of Mexico); a very large herb indigenous to tropical America and naturalized in Florida and on the shores of the Mediterranean, having a scape from 15 to 25 feet high, or even higher, surmounted by a panicle of yellow flowers. [B, 34; L, 65.] When the plant has reached maturity, which takes from ten to seventy years, according to the climate, it sends forth a stem 40 feet in height, which puts out numerous branches, each bearing flowers that continue in full bloom for several months. As soon as the flowers fall, the plant dies. [A, 327.] From an extract of the leaves balls are made which form a lather with water, like soap. The central portion of the stem, split longitudinally, is used for hones or razor-strops. A translucent gum, *gum maguey*, is obtained from the plant. The fibre is used to some extent for the same purposes as hemp fibre. The fresh juice is said to be laxative, diuretic, and emmenagogue, and has been used in scurvy and in syphilis. [L, 30, 50, 65, 85, 86.]—**A. d'Amérique** (Fr.). See *A. americana.*—**A. fœtida.** A species from which a variety of aloes is made in Spain. [L, 77.]—**A. lutea.** Sp., *maguey meco* [Mex. Ph.]. A species found in Central Mexico, from the purified juice of the leaves of which a pectoral syrup is made. [J. M. Maisch, "Am. Jour. of Pharm.," Jan., 1886, p. 20.]—**A. mexicana.** A species closely allied to *A. americana.* The juice is used in Mexico for bleaching. [L, 65, 77.]—**A. Palmeri, A. Par-**

AGAVE.

ryi. Both these species are used in making *mezcal.* [B, 66.]—**A. potatorum** [Salm]. Sp., *maguey manso* [Mex. Ph.]. Syn.: *A. salmiana.* A Mexican species. The leaves are rubefacient and epispastic, and are used in tetanus; the root is diuretic, diaphoretic, and antisyphilitic. [J. M. Maisch, *l. c.*]—**A. pulque.** Sp., *a.* (o *maguey*) *del pulque.* This species is the source of the popular Mexican drink known as *pulque.* [α, 5.] See *Vinum a's.*—**A. ramosa.** See *A. americana.*—**A. salmiana.** See *A. potatorum.* —**A. Saponaria.** A species the root of which is used in Mexico as a detergent in place of soap. [A, 252.]—**A. virginica** [Linnæus]. False aloe; a species found in the Atlantic States, from Pennsylvania southward. It has a scape from 4 to 6 feet high,

AGAVE PULQUE.
Showing the implements for collecting the juice.

with greenish-yellow fragrant flowers. [B, 34.] A tincture of the root is used in the Southern States as a remedy for colic and in the treatment of snake-bites. [L, 65.]—**A'nwein** (Ger.). See *Vinum a's.*—**American a.** See *A. americana.*—**Radix agavæ.** The root of *A. americana.* [B, 97.]—**Vinum a's** [Mex. Ph.]. Ger., *Agavenwein.* Sp., *pulque.* The slightly fermented sap of *A. pulque* (*q. v.*). The sap is collected in leather bags. At a very early stage of fermentation it is a sweet, sparkling, refreshing liquid, scarcely if at all intoxicating. Before the sap has fermented at all it is termed *aguamiel.* [α, 5.]

AGAVEÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)-a(a^3)'ve(we^2)-e(a^3-e^2). Fr., *agavées.* Ger., *Agavengewächse.* In Eichler's classification, a family (corresponding to an order of other systems) of plants belonging to the order (cohort) *Ensatæ*, class *Liliifloræ.* [B, 35.] In the ordinary classification it is included among the *Amaryllidaceæ.* [B, 34, 75.]

AGE, n. Aj. Gr., αἰών, ἡλικία. Lat., *ætas* (a contraction of *ævitas*). Fr., *âge* (in various old and provincial forms, *éage*, *aage*, *edage*, *aige*, *atge*). Ger., *Alter*, *Lebensalter*, *Lebensperiode.* It., *età.* Sp., *edad.* 1. The whole duration of the existence of an organism or an object. 2. The particular time of life of an organism; usually, in man, divided into five periods: infancy, childhood, youth, manhood (or womanhood), and old a. [A, 300, 305, 306.]—**Adult a.** Fr., *âge d'adulte.* Sp., *edad adulta.* The a. of maturity.—**A. of consent.** The a. at which a young person is capable of consenting (in the legal sense) to sexual intercourse; generally that of 14 years in boys and 12 in girls. [Bouvier (A, 302).]—**A. of maturity.** Lat., *ætas major* (seu *legitima*). Fr., *âge mûr* (ou *légal*). Ger., *Grossjährigkeit.* Syn.: *majority.* See Maturity.—**A. of puberty.** See Puberty.—**A. of virility.** See Virility.—**Marriageable a.** See Nubility.—**Mature a.** See Maturity.—**Nubile a.** See Nubility. —**Old a.** Gr., γῆρας. Lat., *senectus.* Fr., *âge avancé*, *vieillesse.* Ger., *Greisenalter* (*Matronenalter*), *höheres Alter.* Sp., *vejez.* See Senility, Senectus, and Centenarianism.—**Virile a.** See Virility.

AGE (Ger.), n. A^3'ge^2. An awn; the chaff of corn or flax. [L, 46.]

ÂGE (Fr.), n. A^{3}zh. Age.—**Â. adulte.** Adult age.—**Â. avancé.** Old age.—**Â. critique.** The period of "the change of life" in women. See Menopause.—**Â. de l'adolescence.** See Adolescence.—**Â. de puberté.** See Puberty.—**Â. de retour.** See *Â. critique.*—**Â. d'homme.** 1. The natural period of man's life. 2. The period of virility. [L, 42.]—**Â. du lait.** Lit., the age of the milk; the length of time that has elapsed since a woman's confinement (said of wet-nurses). [A, 306.]—**Â. mûr.** See Maturity.—**Â. nubile.** See Nubility.—**Â. tendre.** Infancy. [A, 306.]—**Â. viril.** See Virility.—**Bas â.** Infancy. [A, 306.]—**Bel â., Fleur de l'â.** Youth. [A, 306.]—**Jeune â., premier â.** Infancy. [A, 306.]—**Retour d'â.** See *Â critique.*

AGEDOÏDE, AGEDOÏL (Fr.), n's. A^{3}zh-do-ed(el). See Agedoite.

AGEDOITE, n. A^{2}j-e^{2}d'o-it. Fr., *agedoïde*, *agedoïl* [Caventou], *agédoïte.* A crystalline substance obtained by Robiquet from licorice-root, now known to be identical with asparagine. [B, 5.]

AGELÆA (Lat.), n. f. A^{2}j(a^{3}g)-e^{2}l-e'(a^3'e^2)-a^3. Fr., *agelée.* A genus of connaraceous plants found in tropical Asia and Africa. [L, 79.]—**A. emetica.** A species the leaves of which are used as an emetic by the natives of Madagascar. [L, 49.]—**A. Lamarckii.** A species used in Madagascar as a remedy for gonorrhœa and dysentery. [L, 49.]

AGELAST, n. A^{2}j'e^{2}l-a^{2}st. Lat., *agelastos*, *agelastus* (from α priv., and γελᾶν, to laugh). One who can not laugh. [L, 30, 58, 73.]

AGELÉE (Fr.), n. A^3-zhe^{2}l-a. See Agelæa.

AGELEI, AGELEY (Ger.), n's. A^{3}g'e^{2}l-i. See Aquilegia.

AGELENIDES (Lat.), n. f. pl. A^{2}j(a^{3}g)-e^{2}l-e^{2}n'i^{2}d-ez(e^{2}s). A family of the order *Araneida*, or spiders. [Cambridge (B, 77).]

AGELHOLZ (Ger.), n. A^{3}g'e^{2}l-ho^{3}ltz. See Aloes-wood.

AGEN, n. The Persian lilac. [L, 84.]

AGÈNE (Fr.), n. A^3-zhan. See Agenosoma.

AGÈNE (Fr.), adj. A^3-zhe^{2}n. See Agenus.

AGENEIOS (Lat.), adj. A^{2}j(a^{3}g)-e^{2}n-i(a)'o^{2}s. Gr., ἀγένειος (from α priv., and γενειάς, the beard). Beardless. [L, 47.]

AGENESIA (Lat.), n. f. A^{2}j(a^{3}g)-e^{2}n-e(a)'zhi^2(si^2)-a^3. From α priv., and γένεσις, generation, formation. Fr., *agénésie.* Ger., *Agenesie.* It., Sp., *agenesia.* 1. Impotence or barrenness. 2. As now more commonly used, defective development of a portion of the body. [D, 18, 70; L, 43, 84.] Cf. Aplasia.—**A. dysspermia.** See Dysspermasia.—**A. incongrua.** See *Relative* sterility.

AGENESIS (Lat.), n. f. A^{2}j(a^{3}g)-e^{2}n'e^{2}s-i^{2}s. Gen., *agene'seos.* See Agenesia.

AGENIA (Lat.), n. f. A^{2}j(a^{3}g)-e(a)'ni^2-a^3. See Agenosoma.

AGENNESIA, AGENNESIS (Lat.), n's f. A^{2}j(a^{3}g)-e^{2}n-ne-(na)'zhi^2(si^2)-a^3, -e^{2}n'ne^{2}s-i^{2}s. Gen., *agenne'siæ*, *agenne'seos.* See Agenesia.

AGENOSOMUS (Lat.), n. m. A^{2}j(a^{3}g)-e^{2}n-o-so'mu^{3}s(mu^{4}s). From α priv., γεννᾶν, to produce, and σῶμα, a member of the body. Fr., *agénosome*, *agéne.* A monster characterized by median or lateral eventration, especially at the lower part of the abdomen, with defective development of the genitals. [L, 49.]

AGENT, n. A'je^{2}nt. Lat., *agens* (pres. part. of *agere*, to act). Fr., *agent.* Ger., *Agent.* It., Sp., *agente.* Anything, material (like a drug) or potential (like heat), that produces an effect.

AGENTURARZT (Ger.), n. A^3-ge^{2}nt'ur-a^{3}rtzt. A physician in the employ of a company, especially a medical examiner in life-insurance. [L, 57; α, 7.]

AGENUS (Lat.), adj. A^{2}j(a^{3}g)'e^{2}n-u^{3}s(u^{4}s). From α priv., and γένος, offspring. Fr., *agène.* A term proposed by Lestiboudois to describe cellular plants, as opposed to the terms endogenous and exogenous. [L, 106.]

AGER (Lat.), n. m. A(a^3)'ju^{2}r(ge^{2}r). Gen., *ag'ri.* A field, the soil. [L, 84.]—**A. chymicus.** The chemist's field (i. e., water, since, says Dorneus, it is the field "in which the root of minerals is fixed, from whence the trunk and branches shoot into the earth"). [L, 104.]—**A. naturæ.** The uterus. [L, 84.]

AGER (Lat.), adj. See Agrestis.

AGERASIA (Lat.), n. f. A^{2}j(a^{3}g)-u^{5}r(e^{2}r)-a(a^3)'zhi^2(si^2)-a^3. Gr., ἀγηρασία (from α priv., and γῆρας, old age). Fr., *agérasie.* Ger., *Agerasie.* It., Sp., *agerasia.* Old age without the feebleness usually accompanying it. [A, 305.]

AGERASY, n. A^{2}j-e^{2}r'a^3-si^2. See Agerasia.

AGERAT (Ger.), n. A^{3}g-e^2-ra^{3}t'. See Achillea *ageratum.*

AGÉRATE (Fr.), n. A^3-zha-ra^{3}t. See Achillea *ageratum.*

AGÉRATÉ (Fr.), adj. A^3-zha-ra^3-ta. Resembling the genus *Ageratum* (*q. v.*). [L, 41.]

AGERATON (Lat.), n. n. A^{2}j(a^{3}g)-e^{2}r'a^3-to^{2}n. See Ageratum.

AGERATUM (Lat.), n. n. A^{2}j(a^{3}g)-e^{2}r'a^3-tu^{3}m(tu^{4}m). Gr., ἀγήρατον, the ancient name of the *Achillea a.* (from α priv., and γῆρας, old age, because it was supposed not to fade). Fr., *agératon.* Sp., *agerato.* 1. Sweet mandlin, maudlin tansy; a genus of composite plants, of the sub-order *Tubulifloræ*, distinguished by the following characters: the flowering head is devoid of rays, the receptacle is unprovided with pales or bristles, the pappus forms a circle of from 5 to 10 aristate chaffy scales, the lobes of the corolla are equal, and the leaves are opposite. [B.] 2. In pharmacy, the *Achillea a.* [L, 47, 84, 97, 99, 101.]—**A. altissimum.** See Eupatorium *ageratoides.*—**A. conyzoides** [Linnæus]. Bastard hemp; a plant from 12 to 18 inches high, with blue or white flowers, found in Georgia. [B, 34; L, 67.]—**A. febrifugum.** See Piqueria *trinervia.*—**A. mexicanum.** A species closely resembling *A. conyzoides*, with densely clustered lavender-blue flowers. [B, 19.]—**A. ptarmica** [Linnæus]. A species formerly used as an errhine and sialagogue, to relieve toothache, and as a remedy for palsy. [L, 97.]

AGERATUS (Lat.), n. m. A^{2}j(a^{3}g)-e^{2}r'a^3-tu^{3}s(tu^{4}s). Gr., ἀγήρατος. Syn.: *lapis a.* An ancient name for a shoemaker's polishing-stone; used as an astringent and to aid digestion. [L, 97, Galen (L, 47, 50).]

AGERAZIA (Lat.), n. f. A^{2}j(a^{3}g)-e^{2}r-a(a^3)'zhi^2(zi^2)-a^3. See Agerasia.

AGERMENNIG (Ger.), n. A^{3}g'e^{2}r-me^{2}n-ni^{2}g. The *Agrimonia eupatoria.* [A, 305.]

AGES (Lat.), adj. A(a^3)'jez(ge^{2}s). Gr., ἀγής. Lit., wicked, accursed; formerly used as a n. to designate the palm of the hand, as being generally the instrument of wicked acts. [L, 84, 104.]

AGESTER (Lat.), n. m. A^{2}j(a^{3}g)-e^{2}st'u^{5}r(e^{2}r). See Agastor.

AGEUSIA (Lat.), n. f. A^{2}j(a^{3}g)-u^2'si^2-a^3. From α priv., and γεῦσις, the sense of taste. Ger., *Ageusie*, *Geschmacksmangel.* Loss of the sense of taste. [A, 305; K; L, 43.]

AGEUSIE (Ger.), n. A^3-ge^2-u'ze. See Ageusia.—**Centrale A.** Ageusia due to a lesion of the cerebral centres of the nerves of taste. [L, 57.]—**Leitungs-A.** Ageusia due to a lesion in the nerves between their origin and distribution. [L, 57.]—**Periphere A.**

Ageusia due to disease of the terminal extremities of the gustatory nerves. [L, 57.]

AGEUSIS (Lat.), n. f. A2j(a3g)-u2'si2s. Gen., *ageu'seos.* See Ageusia.

AGEUSTIA (Lat.), n. f. A2j(a3g)-u2st'i2-a3. Gr., **ἀγευστία.** Fr., *ageustie.* Ger., *Ageustie.* Sp., *ageustia.* 1. Fasting. [A, 311.] 2. Loss of the sense of taste. [L, 46.] See Ageusia. 3. Any disease of the sense of taste. [Pinel, Alibert (L, 50).]

AGEUSTUS (Lat.), adj. A2j(a3g)-u2st'u3s(u4s). Gr., **ἄγευστος.** 1. Fasting. [A, 311.] 2. Lacking the sense of taste. 3. Untasted, untried. [L, 50.]

AGE VITA (Lat.), n. f. A(a3)'je(ga)-vi(we)'ta3. Syn.: *jugis vita.* An old name for a medicated wine used as an antidote; made with galangal-root, long and white pepper, sage, ginger, cinnamon, saffron, and cloves, boiled in wine. [L, 97.]

AGGEDULA (Lat.), n. f. A2j(a3g)-e2d'u2(u)-la3. Fr., *aggédule.* 1. The theca of most of the mosses. [Necker (B, 1).] 2. The cups (cluster-cups) of the *Pucciniæ* in the æcidium stage. [Hoffmann (B, 1).]

AGGER (Lat.), n. m. A2g(a3g)'ju5r(ge2r). Gen., *ag'geris.* Lit., a heap; in anatomy, a prominence.—**A. perpendicularis, A. ponticulus.** See Eminentia *scaphœ.*—**A. valvularum venarum.** The little projection at the junction of the valves of a vein with the wall of the vessel. [A, 305.]

AGGLET, AGGLETTE, n. A2g'le2t. Fr., *aiguillette.* 1. An anther. [Kersey (L, 73).] 2. An ament or catkin. [Gerard (L, 73).]

AGGLOMERATE, adj. A2g-glo2m'e2r-at. Lat., *agglomeratus* (from *agglomerare*, to gather into a ball or skein). Fr., *aggloméré.* Ger., *agglomerirt.* It., *agglomerato.* Sp., *aglomerado.* In botany, collected into a mass (like the stamens in some varieties of *Anona*). [B.]

AGGLOMERATION, n. A2g-glo2m-e2r-a'shu3n. Lat., *agglomeratio.* Fr., *agglomération.* Ger., *Agglomeriren, Anhäufung.* It., *agglomerazione.* Sp., *aglomeración.* 1. In chemistry, a collection of dissimilar uncombined molecules into a loose mass. [L, 109.] 2. In botany, the state of being agglomerate (*q. v.*). [L.]

AGGLUTINANT, adj. and n. A2g-glu2t'i2n-a2nt. Gr., **προσκολλάων** (adj.), **προσκολλητικόν** (n.). Lat., *agglutinans* (from *agglutinare*, to glue to). Fr., *agglutinant, agglutinatif.* Ger., *agglutinirend* (adj.), *agglutinirendes Mittel* (n.). It., *agglutinante.* Sp., *aglutinante.* 1. Promoting the repair of wounds by adhesion (said of sticking-plaster and the like). 2. As formerly used, a medicine which favored the union of wounds by promoting nutrition. [A, 321.]

AGGLUTINANTIA (Lat.), n., n. pl. of *agglutinans* (*q. v.*). A2g(a3g)-glu2(glu)-tin-a2n(a3n)'shi2(ti2)-a3. Agglutinants.

AGGLUTINATED, adj. A2g-glu2t'i2n-a-te2d. Gr., **προσκολλητός.** Lat., *agglutinatus.* Fr., *agglutiné.* Ger., *agglutinirt.* It., *agglutinato.* Sp., *aglutinado.* Adherent. In botany, adherent by means of a secretion (said of the utricles of the pollen, as in certain *Orchideœ*). [Mirbel (L, 106).]

AGGLUTINATEUR, AGGLUTINATIF (Fr.), adj's. A3g-glu6-ti2n-a3-tu5r, -tef. Agglutinant. [L, 42, 43.]

AGGLUTINATIO (Lat.), n. f. A2g(a3g)-glu2(glu)-ti2n-a(a3)'-shi2(ti2)-o. Gen., *agglutinatio'nis.* Agglutination.—**A. maxillæ inferioris.** Trismus. [L, 30.]—**A. pilorum.** The reduction of ingrowing eyelashes to their natural order by means of glutinous matter on a probe. [L, 97.]

AGGLUTINATION, n. A2g-glu2t-i2n-a'shu3n. Gr., **προσκόλλησις.** Lat., *agglutinatio.* Fr., *agglutination.* Ger., *Agglutination, Zusammenleimen, Anklebung.* It., *agglutinazione.* Sp., *aglutinación.* The state of being adherent, or the process of adhering. [L, 30, 43, 46, 50, 56, 99.]—**Immediate a.** The healing of a wound by simple adhesion. [L, 63.]—**Mediate a.** Healing by the interposition of new material. [L, 63.]

AGGLUTINATIVE, adj. A2g-glu2t'i2n-a-ti2v. Fr., *agglutinatif.* Ger., *agglutinirend.* Tending to adhesion, or having the property of promoting adhesion. [L, 43, 56.]

AGGLUTINENTIEN (Ger.), n. pl. A3g-glut-i2n-e2nt'en. Agglutinants. [L, 46.]

AGGLUTINIREND (Ger.), adj. A3g-glut-i2n-e're2nd. Agglutinative, vulnerary.—**A'e Mittel.** Agglutinants.

AGGLUTITIO (Lat.), n. f. A2g(a3g)-glu2(glu)-ti2'shi2(ti2)-o. Gen., *agglutitio'nis.* An obstruction of the œsophagus, or difficulty in swallowing. [L, 84.]

AGGRAVATION, n. A2g-gra2v-a'shu3n. From *aggravare*, to make heavier. Fr., *aggravation.* Ger., *Erschweren.* It., *aggravazione.* Sp., *agravación.* 1. An increase in the severity of a disease or of its symptoms. 2. See Aggravée.

AGGRAVE (Fr.), n. A3g-gra3v. See Aggravée.

AGGRAVÉE (Fr.), n. A3g-gra3v-a. A disease of the feet in dogs, due to fatigue in hunting, exposure of the feet to snow and ice, etc.; an inflammation of the tissue beneath the epidermis covering the plantar tubercles, sometimes ending in abscesses. [L, 41.]

AGGRAVEMENT (Fr.), n. A3g-gra3v-ma3n2. See Aggravée.

AGGREGAT (Ger.), n. A3g-gre2g-a3t'. An aggregation.—**A'körnchenhaufen.** The masses of granular matter contained in the protoplasm of the white blood-corpuscles. [K, 13.]—**A'zustand.** The manner in which molecules are bound together. [L, 50.] See Aggregation and *Molecular* affinity.

AGGREGATÆ (Lat.), n. f. pl. A2g(a3g)-gre2g-a(a3)'te(ta3-e2). Ger., *Haufblutige.* In Eichler's classification of dicotyledonous plants, an order (corresponding to a cohort in other systems) of gamopetalous plants, having the following characters: the stamens are generally adherent to the corolla, and do not correspond in number with the lobes of the latter, being usually limited to two; the calyx is small or wanting; and the ovary is inferior. It comprises the following families (orders in other systems): *Caprifoliaceœ, Rubiaceœ, Valerianaceœ, Dipsaceœ,* and *Compositœ.* [B, 35.]

AGGREGATE, n. A2g'gre2g-at. From *aggregare*, to add to a flock. Ger., *Aggregat.* A mass or assemblage of homogeneous elements. [A, 315; L, 56.]

AGGREGATE, adj. A2g'gre2g-at. Lat., *aggregatus.* Fr., *agrégé.* Ger., *aggregirt, angehäuft.* It., *aggregato.* Sp., *agregado.* 1. United into a common organized mass. [L, 56.] 2. In botany, collected into one mass or bundle. [B.] Cf. Aggregatæ and Aggregaten. 3. Agminate (*q. v.*). [J.] 4. A term used by Darwin (in 1875) to characterize the condition of the protoplasm of the cells in the tentacles of the sun-dew after its collection into amœboid masses, due to excitation. [J.]

AGGREGATEN (Ger.), n. pl. A3g-gre2g-a3t'e2n. Aggregate flowers (those composed of florets united by means of the receptacle or calyx). [A, 315.]

AGGREGATI (Lat.), n. m. pl. A2g(a3g)-gre2g-a(a3)'ti(te). In botany, fruits that are aggregated. [Lindley (L, 73).]

AGGREGATION, n. A2g-gre2g-a'shu3n. Lat., *aggregatio.* Fr., *agrégation.* Ger., *Aggregation, Aggregat, Zusammenhäufung.* It., *aggregazione.* Sp., *agregación.* The collection of matter into well-defined masses. [J.] See *A.* elements, *A.* masses, and Affinity.—**A'sform** (Ger.). See Aggregat*zustand.*

AGGREGATIVPILLEN (Ger.), n. pl. A3g-gre2g-a3t-ef'pi2l-le2n. See Pilulæ *aggregativœ.*

AGGREGATUS (Lat.), adj. A2g(a3g)-gre2g-a(a3)'tu3s(tu4s). Aggregate. [B.]

AGGUR, AGHA LUCHIE, AGHAR, n's. Oriental names for aloes-wood. [L, 105.]

AGHEUSTIA (Lat.), n. f. A2g(a3g)-hu2s'chi2(ti2)-a3. See Ageustia.

AGHIL, n. An East Indian name for aloes-wood. [B, 78.]

AGHOUL (Pers.). See Alagi.

AGI, n. A West Indian name for the red pepper. [L, 78.]

AGIAHALID, AGIHALID, n's. East Indian names for the Indian thorn, probably a species of *Prunus.* The fruit is bitter and styptic, and the leaves are sour and astringent. [L, 97.]

AGILA-WOOD, n. A3-ge'la3-wu4d. See Aloes-wood.

AGILLOCHUM (Lat.), n. n. A2g(a3g)-i2l'lo-ku3m(ch2u4m). See Aloes-wood.

AGININ, n. A2j'i2n-i2n. Fr., *aginine.* Ger., *Aginin.* A yellow substance obtained by the decomposition of axinic acid. [L, 63.]

AGIOXYLUM (Lat.), n. n. A2j(a3g)-i2-o2x'i2l(u6l)-u3m(u4m). From **ἅγιος**, sacred, and **ξύλον**, wood. Lignum vitæ. [L, 30.]

AGIS, n. An old name for the thigh. [L, 84.]

AGITATEUR (Fr.), n. A3-zhi2-ta3-tu5r. See Agitator.

AGITATION, n. A2j-i2t-a'shu3n. Gr., **δόνημα.** Lat., *agitatio.* Fr., *agitation.* Ger., *Aufgeregtheit, Erschütterung, Bewegung.* It., *agitazione.* Sp., *agitación.* 1. In pharmacy, a shaking or stirring. 2. A constant and fatiguing motion of the body; the restlessness of severe fevers. See Jactitation. 3. A perturbed state of mind. [α, 8; D; L, 43, 49.]

AGITATOR, n. A2j'i2t-a-to2r. Fr., *agitateur.* A glass rod for stirring liquids; any apparatus for shaking or stirring. [L.]

AGITATORIUS (Lat.), adj. A2j(a3g)-i2t-a(a3)-to'ri2-u3s(u4s). Convulsive. [L, 45.] In the pl., *agitatorii*, used as a n., convulsive diseases. [L, 84.]

AGITÉ (Fr.), n. A3-zhe-ta. An insane person who, on account of restlessness, needs to be restrained. [L, 49.]

AGLACTATION, n. A2g-la2k-ta'shu3n. Lat., *aglactatio.* Fr., *aglactation.* See Agalactia.

AGLAIA (Lat.), n. f. A2g(a3g)-la(la3)'i2-a3. Gr., **ἀγλαΐα**, splendor. A genus of meliaceous trees. [L, 67.]—**A. edulis.** An edible species found in Asia and Oceanica. [L, 49.]—**A. odorata.** A species the flowers of which are used in China to perfume tea. [L, 49.]

AGLANDEAU (Fr.), n. A3g-la3nd-o. A kind of olive. [L, 67.]

AGLAOPHOTIS (Lat.), n. f. A2g(a3g)-la(la3)-o-fo'ti2s. Gen., *aglaophot'idos.* Gr., **ἀγλαοφῶτις.** Fr., *aglaofotis.* The *Pœonia officinalis.* [L, 47, 50, 105.]

AGLAR (Ger.), n. A3g'la3r. The columbine. See Aquilegia. [L, 46.]—**A'kraut.** The rest-harrow (*Ononis arvensis*). [A, 315.]

AGLAURIDÆ (Lat.), n. f. pl. A2g(a3g)-la3-u2(u)'ri2d-e(a3-e2). A family of *Hydrozoa* of the order *Trachomedusœ.* [E. R. Lankester (B, 77).]

AGLAXIS (Lat.), n. f. A2g(a3g)-la2x(la3x)'i2s. See Agalactia.

AGLEI (Ger.), n. A3g'li. See Aglar.

AGLERKRAUT (Ger.), n. A3g'le2r-kra3-ut. The thorny rest-harrow (*Ononis spinosa*). [A, 305.]

AGLET, AGLETTE, n's. A2g'le2t. Old names for an anther. [L. 73.]

AGLEY (Ger.), n. A3g'li. 1. The columbine. See Aquilegia. 2. A whitlow. [A, 305.]

AGLIA (Lat.), n. f. A2g(a3g)'li2-a3. Fr., *aglie.* See Ægias.

AGLIDION, AGLIS, AGLITHES (Lat.), n's n. and f. A2g-(a3g)-li2d'i2-on, a2g(a3g)'li2s, a2g(a3g)-li(le)'thez(the2s). Gen's, *aglid'ii, aglith'os, aglith'um.* Gr., **ἄγλις** (gen., **ἄγλιθος**). A head of garlic. [A, 311.]

AGLIO (It.), n. A3l'yi2-o. Garlic (*Allium sativum*). [D.]

AGLOBULIA (Lat.), n. f. A2g(a3g)-lo2b-u2(u)'li2-a3. From *a*

priv., and *globulus*, a globule. Fr., *aglobulie*. Ger., *Aglobulie*. It., Sp., *aglobulia*. A deficiency in the number of the red globules of the blood, with an increase in the quantity of the serum; especially, as used by Beau, that condition occurring as a sequel of long-continued dyspepsia. [D, 72, 74.]

AGLOSSA (Lat.), n. n. pl. A^{2}g(a^{3}g)-lo^{2}s′sa^3. From α priv., and γλῶσσα, the tongue. Animals in which the tongue is not developed. [L, 66.]

AGLOSSE (Fr.), adj. A^3-glo^{2}s. See Aglossus.

AGLOSSIA (Lat.), n. f. A^{2}g(a^{3}g)-lo^{2}s′si^2-a^3. Gr., ἀγλωσσία. Fr., *aglossie*. Ger., *Aglossie, Zungenmangel*. It., *aglossia*. Sp., *aglosia*. 1. Dumbness. 2. Absence of the tongue. 3. Impairment of the faculty of speech in aged persons. [A, 305; L, 40, 50.]

AGLOSSOSTOMA (Lat.), n. n. A^{2}g(a^{3}g)-lo^{2}s-so^{2}s′to-ma^3. Gen., *aglossostom′atis*. From α priv., γλῶσσα, the tongue, and στόμα, the mouth. A monstrosity characterized by the presence of the mouth without the tongue. [L, 50, 63.]

AGLOSSOSTOMATOGRAPHIA (Lat.), n. f. A^{2}g(a^{3}g)-lo^{2}s″-so-sto^{2}m‴a^{3}t-o-gra^{2}f(gra^{3}f)′i^2-a^3. Fr., *aglossostomographie*. Ger., *Aglossostomatographie*. It., *aglossostomatografia*. Sp., *aglosostomografia*. A treatise on aglossostomata. [L, 44.]

AGLOSSOSTOMIA (Lat.), n. f. A^{2}g(a^{3}g)-lo^{2}s-so-sto′mi^2-a^3. Fr., *aglossostomie*. Ger., *Aglossostomie*. It., *aglossostoma*. The presence of a mouth without a tongue. [A, 305; L, 50.]

AGLOSSOSTOMOGRAPHIA (Lat.), n. f. A^{2}g(a^{3}g)-lo^{2}s″so-sto^{2}m‴o-gra^{2}f(gra^{3}f)′i^2-a^3. See Aglossostomatographia.

AGLOSSUS (Lat.), adj. A^{2}g(a^{3}g)-lo^{2}s′su^{3}s(su^{4}s). Gr., ἄγλωσσος. Ger., *zungenlos*. Tongueless; as a n., a person without a tongue. [L, 50.]

AGLOTTIA (Lat.), n. f. A^{2}g(a^{3}g)-lo^{2}t′ti^2-a^3. See Aglossia.

AGLUMACEOUS, adj. A^{2}g-lu^2-ma′shu^{3}s. From α priv., and *gluma*, a husk. In botany, devoid of glumes. [B.]

AGLUTITIO (Lat.), n. f. A^{2}g(a^{3}g)-lu^2(lu)-ti^2′shi^2(ti^2)-o. See Agglutitio.

AGLYPHODONTIA (Lat.), n. n. pl. A^{2}g(a^{3}g)-li^{2}f(lu^{6}f)-o-do^{2}n′-shi^2(ti^2)-a^3. From α priv., γλυφίς, a notch, and ὀδούς, a tooth. In zoölogy, a division of the *Ophidia* having none of the maxillary teeth grooved. [L, 66.]

AGMA (Lat.), n. n. A^{2}g(a^{3}g)′ma^3. Gen., *ag′matos (-tis)*. From ἄγμα, a fragment. See Agmos.

AGMATOLOGIA (Lat.), n. f. A^{2}g(a^{3}g)-ma^{2}t(ma^{3}t)-o-lo′ji^2-(gi^2)-a^3. Fr., *agmatologie*. Ger., *Agmatologie*. It., *agmatologia*. From ἀγμός, a fracture, and λόγος (see *-logy**). A treatise or description of fractures. [L, 41, 50.]

AGME (Lat.), n. f. A^{2}g(a^{3}g)′me(ma). Gr., ἀγμή. See Agmos.

AGMINA (Lat.), n. n., pl. of *agmen*. A^{2}g(a^{3}g)′mi^{2}n-a^3. Collected multitudes.—**A. digitorum manus.** The phalanges of the fingers. [L, 45.]

AGMINALIS (Lat.), adj. A^{2}g(a^{3}g)-mi^{2}n-a(a^3)′li^{2}s. Agminate. [J.]

AGMINATE, AGMINATED, adj's. A^{2}g′mi^{2}n-at, -at-e^{2}d. Lat., *agminatus* (from *agmen*, an array). Fr., *agminé*. Ger., *agminirt*. Syn.: *aggregate*. Grouped (said especially of the intestinal glands). [J; L, 66.] See *Peyer's* glands.

AGMINATION, n. A^{2}g-mi^{2}n-a′shu^{3}n. An arrangement in groups.

AGMOS (Lat.), n. m. A^{2}g(a^{3}g)′mo^{2}s. Gr., ἀγμός [Hippocrates (A, 311).] A fracture. [L, 63.]

AGNACAL, AGNACAT, n's. The *Persea gratissima*. The pulp of the fruit is said to be aphrodisiac. [L, 63, 97.]

AGNAGUIN, n. A plant used in Guinea as a vulnerary. [A, 105.]

AGNAIL, n. A^{2}g′nal. A.-S., *angnægl*. See Hangnail.

AGNAKOPON, n. According to Mérat and De Lens, the equivalent of a Greek word used by Dioscorides for the *Anagyris fœtida*. [L, 105.]

AGNALAHOLZ (Ger.), n. A^{3}g-na^3′la^3-ho^{3}ltz. See Aloes-wood.

AGNATA (Lat.), n. f. A^{2}g(a^{3}g)-na(na^3)′ta^3. See Adnata.

AGNATEN (Ger.), n. pl. A^{3}g-na^{3}t′e^{2}n. Monstrosities characterized by an approximation of parts that are normally separated. [A, 305.]

AGNATHIA (Lat.), n. f. A^{2}g(a^{3}g)-na(na^3)′thi^2-a^3. From α priv., and γνάθος, the jaw. Fr., *agnathie*. Ger., *Agnathie, Kiefermangel*. Congenital absence of one or both of the jaws. [L, 41, 44.]

AGNATHUS (Lat.), adj. A^{2}g(a^{3}g)′na(na^3)-thu^{3}s(thu^{4}s). Fr., *agnathe*. Affected with agnathia (*q. v.*). [L, 50.]

AGNAYL, AGNAYLE, n's. A^{2}g′nal. See Hangnail.

AGNEAU DE SCYTHIE (Fr.), n. A^{3}n-yo-d′se-te. See Cibotium *Barometz*.

AGNELE, n. A^{2}g′nel. See Hangnail.

AGNESQUELLE (Ger.), n. A^{3}g′ne^{2}s-kwe^{2}l-le^2. A cold alkaline spring in the Hungarian town of Moha. [A, 305; L, 57.]

AGNIL, n. A Malay name for the indigo plant. [L, 97.]

AGNINUS (Lat.), adj. A^{2}g(a^{3}g)-ni(ne)′nu^{3}s(nu^{4}s). From *agnus*, a lamb. Amniotic.—**Agnina membrana, Agnina tunica.** See Amnion.

AGNŒA, AGNOIA (Lat.), n's f. A^{2}g(a^{3}g)-ne′(no′e^2)-a^3, -noi′a^3. Gr., ἄγνοια (from ἀγνοιεῖν, not to perceive). Fr., *agnoïe*. Loss of the perceptive power from disease; that condition of a fever patient in which he does not recognize his friends. [Galen (L, 84).]

AGNUS CASTUS (Lat.), n. m. A^{2}g(a^{3}g)′nu^{3}s(nu^{4}s)-ka^{2}st(ka^{3}st)′-u^{3}s(u^{4}s). See Vitex *a. c.*

AGNUS CHRISTUS (Lat.), n. m. Krl^{2}st(ch^{2}ri^{2}st)′u^{3}s(u^{4}s). See Ricinus *communis*.

AGNUS SCYTHICUS (Lat.), n. m. Si^{2}th(sku^{6}th)′i^{2}k-u^{3}s(u^{4}s). Fr., *agneau de Scythie*. See Cibotium *Barometz*.

AGOAREDATE, n. A Brazilian variety of rum. [L, 30.]

AGOAS BELLAS (Port.), n. pl. A^3′gwa^{3}z-be^{2}l′ya^{3}z. A sulphurous spring near Lisbon. [L, 63.]

AGOGE (Lat.), n. f. A^{2}g(a^{3}g)-o′je(ga). Gen., *ago′ges*. Gr., ἀγωγή. Method in the treatment of disease. [Galen (A, 311).]

AGOMPHIANS, n. pl. A^{2}g-o^{2}m′fi^2-a^{2}nz. From α priv., and γομφίος, a molar tooth. Fr., *agomphes*. Ehrenberg's name for rotifers whose jaws have no teeth. [L, 108.]

AGOMPHIASIS (Lat.), n. f. A^{2}g(a^{3}g)-o^{2}m-fi^2-a(a^3)′si^{2}s. Gen., *agomphia′seos*. See Agomphosis.

AGOMPHIOUS, adj. A^{2}g-o^{2}m′fi^2-u^{3}s. Gr., αγόμφιος. Fr., *agomphe*. Toothless. [A, 311.]

AGOMPHOSIS (Lat.), n. f. A^{2}g(a^{3}g)-o^{2}m-fo′si^{2}s. Gen., *agompho′seos*. From α priv., and γόμφωσις (see Gomphosis). Fr., *agomphose*. Ger., *Agomphose*. It., *agomfosi*. Sp., *agomfosis*. Loosening of the teeth from disease. [A, 305.]

AGOMPIASIS (Lat.), n. f. A^{2}g(a^{3}g)-o^{2}m-pi^2-a(a^3)′si^{2}s. See Agomphosis.

AGON (Lat.), n. m. A(a^3)′go^{2}n. Gen., *ago′nos (-nis)*. Gr., ἀγών. 1. The death-struggle. [A, 305.] See Agony. 2. An Egyptian name for the *Cichorium intybus*. [Dioscorides (L, 105).]

AGONÉ (Fr.), adj. A^3-go-na. See Agonious.

AGONIA (Lat.), n. f. A^{2}g(a^{3}g)-o′ni^2-a^3. From ἀγωνία, a struggle (1st def.), ἄγονος, barren (2d def.). 1. The death-struggle. See Agony. 2. Sterility. [L, 84.]

AGONIADA, n. See Agoriada.

AGONIADIN, n. A^{2}g-o^{2}n-i′a^{2}d-i^{2}n. See Agoriadin.

AGONIC, adj. A^{2}g-o^{2}n′i^{2}k. See Agonious.

AGONIE (Fr., Ger.), n. A^3-gon-e, -e′. See Agony.

AGONIOUS, adj. A^{2}g-o′ni^2-u^{3}s. Gr., ἀγώνιος. Fr., *agoné*. Without an angle. [A, 311; L, 63.]

AGONISANT (Fr.), adj. A^3-go-ne-za^{3}n^2. In a dying condition. [A, 44.]

AGONISIRT (Ger.), adj. A^3-go^{2}n-ez-ert′. See Agonisant.

AGONISIS (Lat.), n. f. A^{2}g(a^{3}g)-o^{2}n′i^{2}s-i^{2}s. Gr., ἀγώνισις. See Agony.

AGONISMA, AGONISMUS (Lat.), n's n. and m. A^{2}g(a^{3}g)-o^{2}n-i^{2}z(i^{2}s)′ma^3, -mu^{3}s(mu^{4}s). Gen., *agonis′matos (-tis), agonismi*. Gr., ἀγώνισμα, ἀγωνισμός. See Agony.

AGONISTA (Lat.), n. f. A^{2}g(a^{3}g)-o^{2}n-i^{2}st′a^3. See Agony.

AGONISTIC, adj. A^{2}g-o^{2}n-i^{2}st′i^{2}k. Lat., *agonisticus*. Ger., *agonistisch*. Sp., *agónico*. Pertaining to, caused by, or occurring during, the death-agony.

AGONISTICA, AGONISTICE, AGONISTICON, AGONISTICUM (Lat.), n's f. and n. A^{2}g(a^{3}g)-o^{2}n-i^{2}st′i^{2}k-a, -i^2-se(ka), -o^{2}n, -u^{3}m(u^{4}m). Cold water considered as an antipyretic. [Ægineta (L, 53).]

AGONIZANS (Lat.), adj. A^{2}g(a^{3}g)-o^{2}n′i^{2}z-a^{2}nz(a^{3}ns). Moribund. [L, 50.]

AGONOS (Lat.), adj. A^{2}g(a^{3}g)′o^{2}n-o^{2}s. Gr., ἄγονος. 1. Unborn. 2. Unfruitful, impotent, barren. [Hippocrates (A, 311).] 3. Terminating in the death of the mother undelivered (said of labor). [A, 311.] 4. Childless. [A, 311.]

AGONOUS, adj. A^{2}g′o^{2}n-u^{3}s. See Agonos.

AGONY, n. A^{2}g′o^{2}n-i^2. Gr., ἀγωνία. Lat., *agonia*. Fr., *agonie*. Ger., *Schmerz, Angst* (1st def.), *Todeskampf* (2d def.). It., *agonia*. Sp., *agonia*. 1. Extreme suffering, bodily or mental. [D, 20.] 2. The final bodily struggle that precedes death; the death-struggle. [D, 3.]

AGOR, n. A Hindu name for aloes-wood. [L, 105.]

AGORAPHOBIA (Lat.), n. f. A^{2}g(a^{3}g)-o^{2}r-a^3-fo′bi^2-a^3. From ἀγορά, a market-place, and φόβος, fear. Fr., *agoraphobie, peur des espaces* [Legrand du Saulle]. Ger., *Agoraphobie, Platzangst. Platzschwindel*. It., *agorafobia, angoscia delle piazze*. Syn.: *kenophobia* [Gélineau]. Morbid terror at being alone in a large open space, often accompanied with vertigo. [Westphal (A, 10).]

AGORIADA (Port.), n. A^3-go-re-a′da^3. A Brazilian name for agoriadin (*q. v.*) and for the plant that furnishes it.

AGORIADIN, n. A^{2}g-o-ri′a^{2}d-i^{2}n. Fr., *agoriadine*. A crystalline substance, probably a glucoside, $C_{10}H_{14}O_6$, closely allied to arbutin, extracted by Peckolt from the bark of *agoriada* (*Plumieria lancifolia*); used in Brazil as a remedy for intermittent fever. [B, 2; L, 49.]

AGOSTOS, AGOSTUS (Lat.), n's m. A^{2}g(a^{3}g)-o^{2}st′o^{2}s, -u^{3}s-(u^{4}s). Gr., ἀγοστός. 1. The palm of the hand. 2. The forearm. [L, 84.]

AGOUMAN, n. See Solanum *nigrum*.

AGRA (Lat.), n. f. A^{2}g(a^{3}g)′ra^3. Gr., ἄγρα. 1. A seizure (generally used as a suffix—see *-agra**). 2. See Bois *de senteur*.

AGRACARAMBA, n. A Japanese sweet-smelling wood. [L, 105.]

AGRAFE (Fr.), n. A^3-gra^{3}f. 1. A hook-like instrument for holding the lips of a wound in apposition (e. g., one devised by Valentin for use after the operation for hare-lip); also Malgaigne's

hooks for the treatment of fractured patella. [L, 49, 55.] 2. In the pl., *a's*, in botany, the hami (hooked spines) of plants. [B.]

AGRAFFE (Fr.), n. A^3-gra^{3}f. See AGRAFE.

AGRAHALID (Ar.), n. See AGIAHALID.

AGRAMMATISM, n. A^{2}g-ra^{2}m'ma^{2}t-i^{2}zm. Lat., *agrammatismus* (from **ἀγράμματος**, unable to read or write). Syn.: *akataphasia.* A form of aphasia characterized by "inability to form words grammatically and to arrange them in sentences syntactically." [Kussmaul (A, 370).] Cf. PARAPHASIA.

AGRANDISSEMENT (Fr.), n. A^3-gra^{3}nd-es-ma^{3}n^2. Magnification, amplification (with a lens). [L, 52.]

AGRAPHIA (Lat.), n. f. A^{2}g(a^{3}g)-ra^2(ra^3)'fi^2-a^3. From **α** priv., and **γραφή**, the art of writing. Fr., *agraphie.* Ger., *Agraphie.* Inability to write, due to disease of the central nervous system. "In attempting to write, sometimes only lines are made, sometimes separate letters, but not words; or words may be written, but not to form sentences." [A, 370.]—**A. literalis.** A variety in which letters can not be formed, but only pot-hooks and hangers. [D, 18.]—**A. verbalis.** A variety in which, while the letters may be correctly formed, the words into which they are joined are either fanciful or entirely inappropriate. [D, 18.]

AGRÉGAT, AGRÉGATION (Fr.), n's. A^3-gra-ga^3, -ga^3-sho^{2}n^2. See AGGREGATE and AGGREGATION.

AGRÉGÉ (Fr.), adj. A^3-gra-zha. 1. Aggregate. 2. As a n., an adjunct professor. [A, 321; B.]

AGRELCOSIS (Lat.), n. f. A^{2}g(a^{3}g)-re^{2}l-ko'si^{2}s. See AGRIELCOSIS.

AGRÉMIE (Fr.), n. A^3-gra-me. The alteration of the blood that takes place in gout; also gout itself. [L, 82.]

AGRENAS (Fr.), n. A^3-gran-a^3. A Provence name for the wild plum-tree. [L, 41.]

AGREST (Ger.), n. A^3-gre^{2}st'. The juice of unripe fruit, especially of grapes; verjuice. [A, 305, 315.]—**A'ampfer.** The *Rumex scutatus.* [A, 305.]—**A'wasser.** A drink made by mixing verjuice with sugar and water. [L, 30.]

AGRESTEN, n. An old name for cream of tartar. [L, 53.]

AGRESTIS (Lat.), adj. A^{2}g(a^{3}g)-re^{2}st'i^{2}s. From *ager*, a field. Fr., *agreste.* Ger., *Acker-* (in compos.). In botany, growing spontaneously in cultivated fields; also wild, as opposed to *sativus* (cultivated). [B.]

AGRIA (Lat.), n. f. A^{2}g(a^{3}g)'ri^2-a^3. From **ἄγριος**, wild. 1. The holly. 2. A malignant pustule. [L, 84.]

AGRIACANTHA, AGRICANTHA (Lat.), n's f. A^{2}g(a^{3}g)-ri^2-a^{2}k(a^{3}k)-a^{2}n(a^{3}n)'tha^3, -ri^{2}k-a^{2}n(a^{3}n)'tha^3. From **ἄγριος**, wild, and **ἄκανθα**, a prickly plant. A plant supposed to be the *Cnicus syriacus.* [C. Sprengel (A, 322).]

AGRIAMPELOS (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-a^{2}m(a^{3}m)'pe^{2}l-o^{2}s. Gr., **ἀγριάμπελος, ἄμπελος ἀγρία** (**ἡ γενική**). An ancient name for a wild creeping plant, supposed to have been the white or black bryony. [A, 311; L, 84.]

AGRIE (Fr.), n. A^{3}gre. The gout. [L, 82.] Scrofula. [A, 310.]

AGRIELÆA, AGRIELAIA (Lat.), n's f. A^{2}g(a^{3}g)-ri^2-e^{2}l-e'(a^3'e^2)-a^3, -a(a^3)'i^2-a^3. From **ἄγριος**, wild, and **ἐλαία**, the olive-tree. The wild olive-tree. [L, 84.]

AGRIELCOSIS (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-e^{2}l-ko'si^{2}s. Gen., *agrielco'seos.* From **ἄγριος**, wild, and **ἕλκωσις**, ulceration. Fr., *agrielcose.* A malignant ulceration. [E; L, 41, 50.]

AGRIFOLIUM (Lat.), n. n. A^{2}g(a^{3}g)-ri^2-fo'li^2-u^{3}m(u^{4}m). Ger., *Stecheiche.* It., *agrifoglio.* Sp., *agrifolio.* Syn.: *aquifolium.* The holly. [L, 30, 51, 102.]

AGRIFOUS (Fr.), n. A^3-gri^{2}f-u. A popular name in the south of France for the *Ilex aquifolium.* [L, 49.]

AGRIMONIA (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-mo'ni^2-a^3. From **ἀγρός**, a field, and **μόνος**, alone (because pre-eminent among the plants of the fields as a medicine). Fr., *aigremoine.* Ger., *Ackermennig, Odermennig.* It., Sp., *agrimonia.* Agrimony, liverwort: a genus of perennial rosaceous plants, of the sub-order *Roseæ*, tribe *Rosideæ*, distinguished from the roses by having only two carpels in a dry, prickly calyx. [B, 34; L, 64.]—**A. eupatoria** [Linnæus]. Fr., *aigremoine, eupatoire des Grecs.* Ger., *Wundodermennig, Leberklette, Steinwurz.* Syn.: *A. officinalis, hemp-agrimony.* A species growing wild in the United States and Canada. It is hairy, attains a height of from 1 to 3 feet, and bears small yellow flowers set on very short pedicels. Two sub-varieties have been described: 1. *A. eupatoria hirsuta* [Torrey], smaller and more hairy. 2. *A. eupatoria parviflora* [Hooker], which is less hairy, and has smaller flowers set on longer pedicels. The latter variety is considered by some a distinct species, and called *A. parviflora* [De Candolle], but this name is applied also to a different plant. *A. eupatoria* contains a bitter principle and tannic acid, and is sometimes used as a tonic and astringent. [B, 33; L, 46, 67, 85.]—**A. officinalis.** See *A. eupatoria.*—**A. orientalis.** See *A. repens.*—**A. parviflora** [Aiton]. A species growing in the east-central region of the United States, attaining a height of 3 or 4 feet, bearing a yellow flower, and having an agreeable aromatic odor. The *A. parviflora* of De Candolle is a variety of *A. eupatoria.* [B, 34.]—**A. repens** [Linnæus]. Fr., *aigremoine rampante.* A creeping species, indigenous to the Levant. [A, 248; D, 92.]—**A. suaveolens** [Pursh]. See *A. parviflora.*—**A. vulgaris.** Fr., *aigremoine vulgaire.* See *A. eupatoria.*—**Aqua agrimoniæ** [Sard. Ph. (1773)]. Fr., *eau* (ou *hydrolat*) *d'aigremoine.* Made by macerating 1 part of agrimony in 2 parts of water, and distilling until two thirds have passed over. [D, 133.]—**Extractum agrimoniæ aquosum** [Amst. Ph. (1792)]. Fr., *extrait aqueux d'aigremoine.* Aqueous extract of agrimony; made by boiling 1 part of the herb for 2 hours in 2 parts of water, expressing, decanting, straining, and evaporating until the residue will not ad-

AGRIMONIA EUPATORIA. (AFTER DE LANESSAN.)

here to the fingers. [D, 133.]—**Herba agrimoniæ.** The herb of *A. eupatoria;* used as an astringent and tonic. [B, 97.]

AGRIMONODES (Lat.), adj. A^{2}g(a^{3}g)-ri^2-mo-no'dez(de^{2}s). Resembling agrimony. [L, 50.]

AGRIMONY, n. A^{2}g'ri^2-mo-ni^2. See AGRIMONIA and AGRIMONIA *eupatoria.*—**Hemp a.** See AGRIMONIA *eupatoria.*

AGRIOCARDAMUM (Lat.), n. n. A^{2}g(a^{3}g)-ri^2-o-ka^{3}rd'a^{2}m-(a^{3}m)-u^{3}m(u^{4}m). From **ἄγριος**, wild, and **κάρδαμον**, the cress. See NASTURTIUM *aquaticum.*

AGRIOCASTANUM (Lat.), n. n. A^{2}g(a^{3}g)-ri^2-o-ka^{2}st(ka^{3}st)'-a^{2}n(a^{3}n)-u^{3}m(u^{4}m). From **ἄγριος**, wild, and **κάστανον**, a chestnut. See BUNIUM *bulbocastanum.*

AGRIOCINARA (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-o-si^{2}n(ki^{2}n)'a^3-ra^3. From **ἄγριος**, wild, and **κινάρα**, the artichoke. The wild artichoke. [L, 51.]

AGRIOCOCCIMELA (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-o-ko^{2}k-si^2(ki^2)-me(ma)'la^3. From **ἄγριος**, wild, and **κοκκυμηλέα**, the plum-tree. The wild aloe. See PRUNUS *spinosa.*

AGRIOKRINOPULVER (Ger.), n. A^{3}g-ri^2-o-kre'no-pul-fe^{2}r. From **ἄγριος**, wild, and **κρίνον**, a lily. An irritant fecula made from the root of a species of *Iris;* said to have been used by the Greek women to give their cheeks an enduring red hue. [A, 305; D.]

AGRIOLEICHEN, AGRIOLICHEN (Lat.), n. m. A^{2}g(a^{3}g)-ri^2-o-li'(le^2'i^2)-ke^{2}n(ch^{2}e^{2}n), -li(le)'ke^{2}n(ch^{2}e^{2}n). Gr., **ἀγριολειχήν.** See LICHEN *agrius.*

AGRIOMELA (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-o-me(ma)'la^3. From **ἄγριος**, wild, and **μῆλον**, an apple. See PYRUS *mala.*

AGRION (Lat.), n. n. A^{2}g(a^{3}g)'ri^2-o^{2}n. From **ἄγριος**, wild. An ancient term for a number of plants.

AGRIOPASTINACA (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-o-pa^{2}s(pa^{3}s)-ti^{2}n-a(a^3)'ka. From **ἄγριος**, wild, and *pastinaca*, the parsnip. The Canadian saxifrage. [L, 51.]

AGRIOPHYLLON (Lat.), n. n. A^{2}g(a^{3}g)-ri^2-o-fi^{2}l(fu^{6}l)'lo^{2}n. From **ἄγριος**, harsh, and **φύλλον**, a leaf. See PEUCEDANUM.

AGRIOPHYMA (Lat.), n. n. A^{2}g(a^{3}g)-ri^2-o-fi(fu^6)'ma^3. Gen., *agriophym'atos.* From **ἄγριος**, malignant, and **φῦμα**, a swelling. A malignant swelling. [L, 50.]

AGRIOPSORIA (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-o-so'ri^2-a^3. From **ἄγριος**, vehement, and **ψώρα**, the itch. An inveterate itch. [L, 47.]

AGRIORIGANUM (Lat.), n. n. A^{2}g(a^{3}g)-ri^2-o-ri^{2}g'a^{2}n(a^{3}n)-u^{3}m(u^{4}m). From **ἄγριος**, wild, and **ὀρίγανον**, an acrid herb. The wild marjoram. [L, 84.]

AGRIOS (Lat.), adj. A^{2}g(a^{3}g)'ri^2-o^{2}s. See AGRIUS, AGRESTIS, and SILVESTRIS.

AGRIOSELINUM (Lat.), n. n. A^{2}g(a^{3}g)-ri^2-o-se^{2}l-i(e)'nu^{3}m-(nu^{4}m). From **ἄγριος**, wild, and **σέλινον**, parsley. See SMYRNIUM *olosatrum.*

AGRIOSTARI, AGRIOSTEARI (Lat.), n's n. A^{2}g(a^{3}g)-ri^2-o-sta(sta^3)'ri(re), -ste(sta)'a^3-ri(re). Gen., *agrioste'atos.* From **ἄγριος**, growing in the fields, and **στέαρ**, dough made of wheat flour. An old name for a species of wild grain (*Triticum creticum*). [L, 63, 84.]

AGRIOT, n. A^{2}g'ri^2-ot. Fr., *agriote.* A species of black cherry; used in France for making cherry brandy, etc. [L, 41, 73.]

AGRIOTHYMIA (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-o-thi^{2}m(thu^{6}m)'i^2-a^3. From **ἀγριόθυμος**, wild of temper. Fr., *agriothymie.* Ger., *Agriothymie, wilde Gemüthsart.* It., Sp., *agriotimia.* Homicidal insanity. [L, 43.]—**A. ambitiosa.** An irrepressible desire for the extermination of one's own species. [Swediaur (L, 43).]—**A. hydrophobica.** The ferocity shown in rabies. [L, 43.]—**A. reli-**

giosa. An overwhelming desire to kill those of a religion different from one's own. [Swediaur (L, 43).]

AGRIOTIER (Fr.), n. A^3-gre-o-te-a. A species of wild cherry-tree. [L, 41.] See AGRIOT.

AGRIPALMA GALLIS (Lat.), n. f. A^{2}g(a^{3}g)-ri^2-pa^{2}l(pa^{3}l)'ma ga^{2}l(ga^{3}l)'li^{2}s. Fr., *agripaume.* The *Leonurus cardiaca* (*q. v.*). [L, 84.]

AGRIPINUS (Lat.), adj. See AGRIPPINUS.

AGRIPPA (Lat.), n. m. A^{2}g(a^{3}g)-ri^{2}p'pa^3. Perhaps from ἄγριος, wild, and ἵππος, a horse (because the Greeks often observed that wild foals were born feet foremost). [A, 322.] Others, who write it *ægrippa*, derive it from *æger*, disturbed, and *partus*, labor; and still others take it to be from the Roman family name, one of the Agrippas having been born feet foremost. Sp., *agripa.* A person born feet foremost. [L, 58, 84.]

AGRIPPINUS (Lat.), adj. A^{2}g(a^{3}g)-ri^{2}p-pi(pe)'nu^{3}s(nu^{4}s). Fr., *agrippin.* Sp., *agripino.* Pertaining to an *agrippa* (*q. v.*) or to a foot presentation. [L, 109.] See PARTUS *a.*

AGRIUS (Lat.), adj. A^{2}g(a^{3}g)'ri^2-u^{3}s(u^{4}s). Gr., ἄγριος, malignant, virulent, severe. [L.] See LICHEN *a.*

AGROM, n. An East Indian name for a disease which occurs in Bengal and other parts of India, characterized by roughening and fissuring of the tongue, and sometimes by the development of white spots upon it. [D, 77, 90.]

AGROMANIA (Lat.), n. f. A^{2}g(a^{3}g)-ro-ma(ma^3)'ni^2-a^3. From ἀγρός, a field, and μανία, madness. Fr., *agromanie.* Ger., *Agromanie, Ackerbausucht.* Sp., *agromania.* An insane passion for agriculture, or simply for living in the country. [D, 77, 98, 112.]

AGROPHYMA (Lat.), n. n. A^{2}g(a^{3}g)-ro-fi(fu^6)'ma^3. See AGRIOPHYMA.

AGROPILE (Fr.), n. A^3-gro-pel. See ÆGAGROPILUS.

AGROPYRUM (Lat.), n. n. A^{2}g(a^{3}g)-ro-pi(pu^6)'ru^{3}m(ru^{4}m). Fr., *agropyron.* Ger., *Quecke.* Sp., *agropiron.* A genus of gramineous plants established by Gärtner, corresponding in part to the genus *Triticum* (*q. v.*). [D, 12.]—**A. acutum** [Römer and Schultes]. A species the roots of which are used in southern Europe as food for cattle. [D, 8.] It is regarded by some as a variety of *A.* (or *Triticum*) *repens.* [A, 264.]—**A. junceum** [P. Beauvais], **A. lævissimum, A. pungens** [Römer and Schultes]. Regarded by some as varieties of *A.* (or *Triticum*) *repens.* [A, 264; D, 8, 90.]—**A. repens** [P. Beauvais]. See TRITICUM *repens.*

AGROSTEÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)-ro^{2}st'e^2-e(a^3-e^2). Fr., *agrostées.* See AGROSTIDEÆ.

AGROSTEMMA (Lat.), n. n. A^{2}g(a^{3}g)-ro-ste^{2}m'ma^3. Gen., *agrostem'matos.* From ἀγρός, a field, and στέμμα, a garland. Fr., *agrostemme. nielle.* Ger., *Agrostemma, Ackerkrone, Raden.* Sp., *agrostema.* The rose-campion; a genus of caryophyllaceous plants, of the sub-order *Caryophyllineæ*, established by Linnæus; distinguished from the allied genus *Lychnis* by the petals being undivided and not provided with a crown, and by the capsule containing but one cell. [B, 34; D, 12, 114.]—**A. coronaria.** Ger., *Sammtnelke, Stechnelke, Vexirnelke.* A species growing wild in Germany. Two varieties are mentioned: the white-flowered (*A. coronaria alba*) and the double-flowered (*A. coronaria plena*). [D, 114.]—**A. githago** [Linnæus]. Fr., *alênes, nielle, nielle des champs* (ou *des blés*, ou *bâtarde*). Ger., *Rade, Kornrade, Ackerkümmel.* Syn.: *Githago segetum* [Desfontaines], *Lychnis githago.* The corn-cockle, an herb from 2 to 3 feet high, growing in wheat-fields, bearing large dark-purplish flowers, and having purplish-black seeds. [B, 34; D, 12, 90.]—**A. nicæensis.** The Italian corn-cockle. [D, 114.]

AGROSTEMMINE, n. A^{2}g-ro-ste^{2}m'men. Fr., *agrostemmine.* Ger., *Agrostemmin.* Syn.: *githagine.* A crystalline alkaloid obtained from the seeds of the corn-cockle (*Agrostemma githago*). [B, 2.]

AGROSTEOGRAPHY, AGROSTEOLOGY, n's. A^{2}g-ro^{2}st-e-o^{2}g'ra^{2}f-i^2, -o^{2}l'o-ji^2. See AGROSTOGRAPHY and AGROSTOLOGY.

AGROSTIDE (Fr.), n. A^3-gro^{2}s-ted. See AGROSTIS.

AGROSTIDEÆ (Lat.), n. f. pl. A^{2}g(a^{3}g)-ro^{2}st-i^{2}d'e^2-e(a^3-e^2). Fr., *agrostidées.* A tribe of grasses (*Gramineæ*), named from *Agrostis*, the typical genus; distinguished by the paniculate inflorescence and by the spikelet bearing but one flower, which is provided with glumes and thin, soft pales. [B, 34.]

AGROSTIOGRAPHY, n. A^{2}g-ro^{2}st-i^2-o^{2}g'ra^{2}f-i^2. See AGROSTOGRAPHY.

AGROSTIS (Lat.), n. f. A^{2}g(a^{3}g)-ro^{2}st'i^{2}s. Gen., *agrost'idos* (*-rost'eos*). From ἄγρωστις (the name of several different grasses). Fr., *agrostide.* Ger., *Windhalm, Straussgras.* A genus of gramineous plants established by Linnæus; bent-grass, couch-grass, quitch-grass. [D, 8, 12, 77, 78.]—**A. alba.** Ger., *Fioringras, kleine Quecke.* Syn.: *A. stolonifera.* Marsh-bent. [D, 117.]—**A. canina.** Ger., *Hundsstraussgras.* Dog-bent; said to be chewed by dogs and cats for its emetic effect. [D, 8, 117.]—**A. interrupta.** An Austrian species. [D, 12.]—**A. linearis.** A species used in India in the preparation of a refreshing beverage. [D, 108.]—**A. spica venti.** Ger., *Ackerstraussgras, Ackerschmiele, Thaugras, grosse Meddel.* The corn bent-grass, common bent. [A, 315; D, 8.]—**A. stolonifera.** See *A. alba.*—**A. verticillata.** See ANDROPOGON *muricatum.*

AGROSTOGRAPHER, n. A^{2}g-ro^{2}st-o^{2}g'ra^{2}f-u^{6}r. For deriv., see AGROSTIS. Lat., *agrostographus.* Fr., *agrostographe.* Sp., *agrostógrafo.* A writer on grasses; one skilled in agrostography. [D, 109.]

AGROSTOGRAPHIC, adj. A^{2}g-ro^{2}st-o-gra^{2}f'i^{2}k. Lat., *agrostographicus.* Fr., *agrostographique.* Ger., *agrostographisch.* It., Sp., *agrostografico.* Pertaining to agrostography. [D.]

AGROSTOGRAPHY, n. A^{2}g-ro^{2}st-o^{2}g'ra^{2}f-i^2. Lat., *agrostographia.* Fr., *agrostographie.* Ger., *Agrostographie.* It., *agrostografia.* Sp., *agrostografia.* Syn.: *agrostology.* 1. A treatise on the grasses. [D, 9.] 2. Agrostology.

AGROSTOLOGICAL, adj. A^{2}g-ro^{2}st-o-lo^{2}j'i^{2}k-a^{2}l. Lat., *agrostologicus.* Fr., *agrostologique.* Ger., *agrostologisch.* It., Sp., *agrostologico.* Pertaining to agrostology. [D, 10.]

AGROSTOLOGIST, n. A^{2}g-ro^{2}st-o^{2}l'o-ji^{2}st. Lat., *agrostologicus.* Fr., *agrostologiste.* Ger., *Agrostolog.* It., Sp., *agrostologo.* One versed in agrostology.

AGROSTOLOGY, n. A^{2}g-ro^{2}st-o^{2}l'o-ji^2. Lat., *agrostologia.* Fr., *agrostologie.* Ger., *Agrostologie.* It., *agrostologia.* Sp., *agrostologia.* The botany of the grasses. [D, 9.]

AGROSTOPHYLLUM (Lat.), n. n. A^{2}g(a^{3}g)-ro^{2}st-o-fi^{2}l(fu^{6}l)'lu^{3}m(lu^{4}m). From ἄγρωστις (see AGROSTIS), and φύλλον, a leaf. Fr., *agrostophylle.* A genus of orchids indigenous to Java. [D, 10, 117.]

AGROUELLE (Fr.), n. A^3-gru-e^{2}l. A corruption of *écrouelles.* 1. A popular term for the prawn, because it was supposed to cause ulcers in the mouths of those who ate it. 2. The blind nettle, or fig-wort, which was commonly believed to be a cure for scrofula (*écrouelles*). [D, 10.]

AGROUELLES (Fr.), n. pl. A^3-gru-e^{2}l. 1. A name by which scrofula nodosa is known in certain parts of France. 2. Small aquatic worms. [D, 106, 108.]

AGROUETTE (Fr.), n. A^3-gru-e^{2}t. See AGROUELLE.

AGRUMI (It.), n. pl. A^3-gru'me. A general name for lemons and oranges. [D, 114.]

AGRUMINA (Lat.), n. n. pl. A^{2}g(a^{3}g)-ru^2(ru)'mi^{2}n-a^3. An old name for leeks and onions. [D, 90, 100.]

AGRUNA, AGRUNELA (Lat.), n's f. A^{2}g(a^{3}g)-ru^2(ru)'na^3, -ne(na)'la^3. See PRUNUS *spinosa.*

AGRYPINA, AGRYPINE (Lat.), n's f. A^{2}g(a^{3}g)-ri^{2}p(ru^{6}p)-i(e)'na^3, -ne(na). A kind of swelling of the head; perhaps from *agrypnia*, sleeplessness. [D, 80.]

AGRYPNETIC, adj. A^{2}g-ri^{2}p-ne^{2}t'i^{2}k. Lat., *agrypneticus* (see AGRYPNIA). Ger., *agrypnetisch.* 1. Inclined to sleeplessness, incapable of sleeping. [A, 305; D, 80.] 2. Preventing sleep. [A, 305.]

AGRYPNIA (Lat.), n. f. A^{2}g(a^{3}g)-ri^{2}p(ru^{6}p)'ni^2-a^3. Gr., ἀγρυπνία (from α priv., and ὕπνος, sleep). Fr., *agrypnie.* Ger., *Agrypnie.* Sleeplessness. [D, 75.]—**A. excitata.** Sleeplessness from mental excitement. [D, 90.]—**A. pertæsa.** Sleeplessness due to external disquieting influences. [D, 90.]—**A. senilis.** The sleeplessness of aged persons. [D, 90.]

AGRYPNICUS (Lat.), adj. A^{2}g(a^{3}g)-ri^{2}p(ru^{6}p)'ni^{2}k-u^{3}s(u^{4}s). See AGRYPNETIC.

AGRYPNOCOMA (Lat.), n. n. A^{2}g(a^{3}g)-ri^{2}p(ru^{6}p)''no-ko'ma^3. Gen., *agrypnocom'atos.* For deriv., see AGRYPNIA and COMA. Fr., *agrypnocome.* Ger., *Wachschlafsucht.* See COMA-*vigil.*

AGRYPNODES (Lat.), adj. A^{2}g(a^{3}g)-ri^{2}p(ru^{6}p)-no'dez(de^{2}s). Gr., ἀγρυπνώδης. Fr., *agrypnode.* Accompanied by sleeplessness; as a n., a fever that prevents sleep. [D, 10, 80, 90.]

AGRYPNOS (Lat.), adj. A^{2}g(a^{3}g)-ri^{2}p(ru^{6}p)'no^{2}s. Gr., ἄγρυπνος. Sleepless. [A, 322.]

AGRYPNOTICA (Lat.), n. n. pl. A^{2}g(a^{3}g)-ri^{2}p(ru^{6}p)-no^{2}t'i^{2}k-a^3. Fr., *agrypnotiques.* Ger., *schlafraubende Mittel, Wachmittel.* Agrypnotics; measures or drugs that prevent sleep. [A, 305; D, 90.]

AGRYPNUS (Lat.), adj. A^{2}g(a^{3}g)-ri^{2}p(ru^{6}p)'nu^{3}s(nu^{4}s). See AGRYPNOS.

AGTSTEIN (Ger.), n. A^{3}gt'stin. 1. Amber. 2. The agate. [A, 1; D, 12.]

AGUA (Sp.), n. A^{3}g'wa^3. Water; in pharmacy, a medicated water, or distilled water.—**A. acerada.** Water impregnated with iron filings. [D, 101.]—**A. ácida gaseosa, A. acidula.** 1. Carbonic-acid water. 2. Any sparkling mineral water. [D, 101.]—**A. albuminosa.** See EAU *albumineuse.*—**A. alcalina.** See AQUA *alcalina effervescens.*—**A's. alcalinas gaseosas.** Sparkling alkaline waters. [D, 119.]—**A. alcanforada.** Camphor-water. [D, 119.]—**A. anjélica.** 1. A purgative preparation consisting mainly of manna and an infusion of senna. 2. See EAU *angélique.* [D, 101.] Cf. ACQUA *angelica.*—**A. anodina.** See ACQUA *anodina di Praga.*—**A. antiescrofulosa.** A mixture of 4 parts of calcium chloride, 50 of Corsican moss, and 350 of distilled water. [Righini (A, 371).]—**A. antiherpética.** See ACQUA *del Cardinale di Luynes.*—**A. antioftálmica.** See ACQUA *antiottalmica di Loche.*—**A. antipedicular.** See ACQUA *antipediculare di Caudet.*—**A. antipsórica.** 1. A mixture of 2·4 parts of mercuric chloride, 14·4, each, of alum and gum arabic, and 2073·6 of distilled water; an external application for scabies. [A, 371.] 2. See ACQUA *antipsorica di Ranque.*—**A. antipútrida de Beaufort.** See ACQUA *antiputrida di Beaufort.*—**A. ardiente.** Any distilled alcoholic liquor; alcohol. [D, 88.]—**A. arterial.** A solution of 14·4 parts, each, of sulphate of zinc and sulphate of aluminium, in 345·6 of rose-water; a styptic. [A, 371.]—**A. azul.** See AQUA *cœlestis.*—**A. bendita.** See ACQUA *benedetta della carità.*—**A. blanca.** See *Liquor* PLUMBI SUBACETATIS *dilutus.*—**A. calibeada.** See *A. ferrujinosa.*—**A's Calientes.** A town in Mexico with warm mineral springs in the neighborhood. [D, 12.]—**A. carmelitana.** See *Aqua* MELISSÆ *composita.*—**A. cloroformizada.** See EAU *chloroformisée.*—**A. celeste.** See AQUA *cœlestis.*—**A's compuestas.** Compound medicinal watery solutions. [D, 119.]—**A. de Alibour.** See EAU *d'Alibour.*—**A. de arcabuzazo.** See ALCOÖLATURE *vulnéraire.*—**A. de Belloste.** See ACQUA *di Belloste.*—**A. de Bonferme.** See ACQUA *di Bonferme.*—**A. de Botot.** See EAU *dentifrice de Botot.*—**A. de brea.** Tar-water, made by macerating 1 part of tar in 10 parts of water. [D, 119.]—**A. de cal.** Lime-water. [D, 119.] See *Liquor* CALCIS.—**A. de Colonia.** Cologne water. [D, 118.] See SPIRITUS *odoratus.*—

A's de Comangillas. Hot mineral springs in Mexico which flow from a basaltic rock. [D, 79.]—**A. de Dardel.** See *Aqua* MELISSÆ *composita.*—**A. de Egipto.** See ACQUA *d'Egitto.*—**A. de Esmeralda.** A preparation of certain aromatic plants macerated in alcohol. [D, 119.]—**A. de Goulard.** See *Liquor* PLUMBI SUBACETATIS.—**A. de Guerlain.** See ACQUA *di Guerlain.*—**A. de Javela, A. de Javelle.** See *Javelle* WATER.—**A. del ámnios.** The liquor amnii. [D, 119.]—**A. de la reina de Hungria.** See ACQUA *della regina d'Ungheria.*—**A. de La Vrillière.** A tonic alcoholic preparation of canella, nasturtium, and cochlearia. [D, 119.]—**A. del carmen.** See *Aqua* MELISSÆ *composita.*—**A. del mar.** Sea-water. [B.]—**A. de Luce.** See EAU *de Luce.*—**A. de magnanimidad.** See AQUA *magnanimitatis simplex.*—**A. de melisa.** See *Aqua* MELISSÆ *composita.*—**A. de Mettemberg.** See ACQUA *di Mettemberg.*—**A. de Rabel.** See MIXTURA *sulfurica acida.*—**A. de ramilete.** An alcoholic preparation containing honey. [D, 119.]—**A. de sal.** A solution of salt in water. [*a*, 5.]—**A. destilada.** 1. Distilled water. 2. A preparation made by distilling vegetable substances with water. [D, 101.]—**A's destiladas espirituosas.** See ALCOÖLAT.—**A. de tártaro mineral.** A solution of 4 grains of tartar emetic and ½ oz. of sodium sulphate in 8 oz. of water ; an emetic and cathartic. [*a*, 5.]—**A. de Theden.** See AQUA *traumatica vegeto-mineralis Thedeni.*—**A. de Van Swieten.** See CHLORURETUM *hydrargyricum aqua solutum.*—**A. de vejeto mineral.** See *Liquor* PLUMBI SUBACETATIS *dilutus.*—**A. de Verruga.** A Peruvian spring the water of which is reputed to give rise to the disease *verruga.* [D, 2.] See VERRUGA *peruana.*—**A. de vida.** See AGUARDIENTE.—**A. de violeta.** See ACQUA *di violette.*—**A. diurética alcanforada.** A mixture of 60 parts of potassium nitrate, dissolved in 500 of water of parietaria, and a solution of 60 of acetic acid and 10 of camphor in 120 of alcohol, shaken and filtered ; used for dropsy.—**A. divina.** See COLLYRE *de sels fondus.*—**A. en las piernas.** Grease (a disease of horses). [D, 119.] See EAUX *aux jambes.*—**A. espirituosa.** A pharmaceutical water in which the essential ingredient is an alcoholic solution. [D, 119.]—**A. espirituosa de Anhalt.** See AQUA *anhaltina.*—**A. estiptica.** See *A. arterial.*—**A. etérea alcanforada.** A solution of 1 part of camphor in 3 parts of sulphuric ether and 5 or 6 of water. [D, 119.]—**A. fajedénica.** See *Lotio* HYDRARGYRI *flava* and *Lotio* HYDRARGYRI *nigra.*—**A. ferrujinosa.** A ferruginous water. [*a*, 5.]—**A. filtrada.** Filtered water. [*a*, 5.]—**A. fuerte.** Aqua fortis. [B.] See NITRIC ACID.—**A. fundente de Trevez.** See ACQUA *fondente di Trevez.*—**A. griega.** See ACQUA *d'Egitto.*—**A. hepática, A. hidrosulfurosa.** Water containing hydrogen sulphide ; reputed stimulant and diaphoretic and used in chronic skin diseases. [D, 101.]—**A. iodurada.** Lugol's solution. [D, 119.] See *Liquor* IODI *compositus.*—**A. laxante de Viena.** See INFUSUM *laxativum viennense.*—**A. litontriptica.** Lithontriptic water ; a solution of potassium carbonate. [D, 101.]—**A. madre.** See *Mother* LIQUOR.—**A. madre de vitriolo.** Mother liquor of vitriol ; a solution of ferrous sulphate. [D, 101.]—**A. marcial.** 1. A ferruginous water. 2. A solution of 0·15 part of tartrate of iron and potassium in 650 parts of artificial Seltzer water. [Trousseau (A, 371).]—**A's mayores y menores.** The fæcal and urinary excretions. [D, 98.]—**A. mercurial.** See ACQUA *mercuriale.*—**A's minerales.** Mineral waters. [D.]—**A's minerales salinas.** Saline waters. [D, 119.]—**A. minero-medicinal.** A medicinal mineral water. [D, 102.]—**A. negra.** See *Lotio* HYDRARGYRI *nigra.*—**A. oriental.** See EAU *orientale.*—**A. oxigenada.** See ACQUA *ossigenata.*—**A. ozonizante.** See EAU *ozonisante.*—**A. para la boca.** See *Spirito di* PIRETRO *composto.*—**A. para la hemicránea.** See AQUA *sedativa.*—**A. que no moja.** Lit., water which does not moisten ; quicksilver, mercury. [D, 101.]—**A. regia.** Aqua regia. [B.] See NITROHYDROCHLORIC ACID.—**A. roja, A. roja del hospital de San Luís.** See EAU *rouge d'Alibert.*—**A. ras.** Oil of turpentine. [D, 119.]—**A. sal.** Hydrochloric acid. [*a*, 5.]—**A's salinas.** Saline waters. [D, 119.]—**A. Santa de Vimeiro.** A feebly saline spring in the province of Estremadura. [D, 107.]—**A. sedativa.** See EAU *sédative de Raspail.*—**A. segunda.** A mixture of 1 part of nitric acid and 2 parts of water. [D, 119.]—**A. sin igual.** Cologne water. [D, 119.] See SPIRITUS *odoratus.*—**A's sulfurosas.** Sulphurous waters. [D, 119.]—**A. sulfurosa y sulfúrica.** See *A. hidrosulfurosa.*—**A. termal.** A thermal water. [D, 98.]—**A. Tofana.** See ACQUA *Tofana.*—**A. trementinada.** A solution of 35 oz. of Venice turpentine in 12 quarts of water ; used in urinary diseases and in chronic bronchitis, also externally as a hæmostatic. [A, 371.]—**A. vegeto-mineral.** Lee *Liquor* PLUMBI SUBACETATIS *dilutus.*—**A. vital.** A mineral lemonade made of sweetened water and Rabel water. [D.]—**A. vulneraria.** See ALCOÖLATURE *vulnéraire.*—**A. vulneraria de Theden.** See AQUA *traumatica vegeto-mineralis Thedeni.*—**A. vulneraria roja.** See ALCOÖLATURE *vulneraire.*—**A. yodurada.** *A. iodurada.*

AGUACATE (Sp.), n. A^{3}g-wa^3-ka$^{3\prime}$ta. The alligator pear. [D, 77.] See LAURUS *persea.*

AGUADOS CALIENTES (Sp.), n. A^{3}g-wa$^{3\prime}$dth^{2}os Ka^3-li^2-e^{2}nt′-e^{2}s. See AGUAS *Calientes.*

AGUADURA (Sp.), n. A^{3}g-wa^3-dth^{2}u′ra^3. A disease of horses and mules, either rheumatism or a spasmodic contraction of the muscles of the limbs. [D, 102, 119.]

AGUAGUIN, n. The native name of an African plant reputed vulnerary. [D, 77.]

AGUAIGUAREL, n. A Paraguay tree yielding an aromatic resin and a balsam. [Waring (D, 90).]

AGUAJA (Sp.), n. A^{3}g-wa$^{3\prime}$ha^3. See AGUAJAS.

AGUAJAQUE (Sp.), n. A^{3}g-wa^3-ha$^{3\prime}$ka. A dirty-white resinous matter which exudes from fennel ; said to be palliative of toothache. [D, 98.]

AGUAJAS (Sp.), n. pl. A^{3}g-wa$^{3\prime}$ha^{3}z. A disease of horses, characterized mainly by ulceration about the hoofs. [D, 98.]

AGUAMIEL (Sp.), n. A^{3}g-wa^3-me-al′. 1. The unfermented juice of the *Agave pulque.* [*a*, 5.] 2. Water mixed with honey. [D, 101.]

AGUAPA (Sp.), n. A^{3}g-wa$^{3\prime}$pa^3. A West Indian tree, the shade of which is said to have a poisonous influence. [D, 98.]

AGUA-PÉ (Port.), n. A^{3}g-wa^3-pa′. 1. A nymphaceous plant of Brazil, the leaves and root of which are said to be febrifuge. [D, 108.] 2. A variety of white water-lily. [D, 92, 98.] See NYMPHÆA *alba.* 3. An inferior kind of wine made in Brazil. [A, 374.]

AGUAPIEGUAZIE, n. A Paraguay plant, an infusion of the flowers of which is said to be diuretic, emollient, aphrodisiac, and sedative. [Waring (D, 90).]

AGUARACIUNHA-ACU, AGUARACIUNHA FEDAGOSO, n's. A Brazilian borragineous plant, said to be abstergent and alterative. [D, 108.]

AGUARAIBAY, n. A South American tree, which yields a medicinal balsam. ["Rev. med.-quir. de Buenos Aires," 1865, ii, 26-28 (D, 125).]

AGUARAPONDA, n. A Brazilian species of violet of a very aromatic odor. [D, 98, 106.]

AGUARAQUIYA, n. A Brazilian name for a plant, thought to be the *Solanum oleraceum,* used as a sedative application to wounds. [D, 90.]

AGUARÁS (Sp.), n. A^{3}g-wa^3-ra^{3}s′. A Mexican variety of oil of turpentine, obtained from the *Pinus teocote ;* a balsamic stimulant. [*a*, 5 ; J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122.]

AGUARAYBAY, n. See AGUARAIBAY.

AGUARDIENTE (Sp.), n. A^{3}g-wa^{3}r-dth^{2}e-e^{2}nt′a. 1. A distilled alcoholic liquor, especially brandy. [D, 98.] 2. In pharmacy, rectified spirit, alcohol. [*a*, 5.]—**A. alcanforado.** Camphorated spirit ; a solution of 1 part of camphor in 39 parts of 60-per-cent. alcohol. [A, 371.]—**A. aleman.** "German brandy." See *Teinture de* JALAP *composée.*—**A. de maguey.** A spirit distilled from the fermented juice of the *Agave pulque.* [*a*, 5.] Cf. TEQUILA.—**A. de pisco.** See PISCO.

AGUARRAS (Sp.), n. A^{3}g-wa^{3}r-ra^{3}s′. Oil of turpentine. [D, 98.]

AGUAXIMA, n. A Brazilian name for *Piper umbellatum.* [D, 108.]

AGUE, n. A′gu^2. From Fr., *aigu,* acute. An acute disease of malarial origin, especially intermittent fever or an individual paroxysm of that disease. [D.]—**Aden a.** Probably dengue (*q. v.*). [D, 90.]—**A. and fever.** Intermittent fever. [D, 2.]—**A. cake.** Lat., *placenta febrilis.* Fr., *gâteau fébrile.* Ger., *Fieberkuchen.* Chronic enlargement of the spleen in consequence of malarial disease. [D, 110.]—**A. face.** Malarial neuralgia of the face. [D, 90.]—**A. fit.** Ger., *Fieberschauer.* A paroxysm of a. [D, 77.]—**A.-grass.** See ALETRIS *farinosa.*—**A.-plant.** See GEMIASMA.—**A. poison.** See MALARIA.—**A.-proof.** Ger., *fieberfest.* Insusceptible to a. [D, 77.]—**A. root.** See ALETRIS *farinosa.*—**A.-spell.** Ger., *Fieberzaubermittel* (2d def.). 1. See *A. fit.* 2. A charm, or spell, to prevent or cure a. [Gay (D, 20).]—**A.-struck.** Attacked with a. [D, 77.]—**A.-tree.** The *Sassafras officinale.* [D, 77.]—**A.-weed.** The *Eupatorium perfoliatum.* [D, 2.]—**Anticipating a.** See *Anticipating intermittent* FEVER.—**Brass a.** [Thackrah], **Brass-founders' a.** [Greenhow]. A form of disease common among brass-founders and those who are habitually exposed to the fumes of zinc ; characterized by a decided feeling of weariness, nervousness, shivering, and a sense of oppression in the chest, followed by heat, and then by profuse sweating. [D, 25, 46.]—**Brow a.** Neuralgia of the brow of an intermittent character, supposed to be due to malaria. [D.]—**Catenating a.** One that is associated with other diseases, such as lumbago or epilepsy. [D, 90.]—**Dead a.** See *Latent a.*—**Double quartan a., Double quotidian a., Double tertian a., Double unequal tertian a.** See under FEVER.—**Dumb a.** See *Latent a.*—**Duplicated quartan a., Duplicated tertian a.** See under FEVER.—**Fever and a.** A popular term for intermittent fever.—**Hebdomadal a.** See under FEVER.—**Irregular a.** See *Masked a.*—**Latent a.** Syn. : *dumb a.* 1. Intermittent fever in which the paroxysms are not attended with a chill. [D, 5.] 2. A form in which, instead of the ordinary well-marked paroxysms, there is a feeling of great depression and chilliness, with pains in certain parts of the body, or in some cases nausea and vomiting, and a coated tongue, the symptoms showing a certain degree of periodicity. [D, 5, 25.]—**Leaping a.** See *Dancing* MANIA.—**Masked a.** Fr., *fièvre larvée* (ou *masquée*). Ger., *larvirtes Wechselfieber.* A general term for various forms of malarial poisoning resembling intermittent fever in certain important respects, but not with sufficient exactness to warrant their classification under that head. [D.]—**Partial a.** A. accompanied by pain confined to a particular part or organ. [D, 90.]—**Postponing a., Protracted a., Quartan a., Quintan a., Quotidian a., Retarding a., Septan a., Sextan a., Tertian a., Third-day a., Triple quartan a., Triple quotidian a., Triple tertian a., Triplicated quartan a.** Various forms of intermittent fever. See the corresponding expressions under FEVER.

AGUED, adj. A′gu^{2}d. Ger., *fieberhaft.* Affected with ague. [D, 77.]

AGUILBOQUIL (Sp.), n. A^{3}g-wel-bo-kel′. The Chilian name for the berries of the *Lardizabala biternata.* [D, 117.]

AGUILLOU (Fr.), n. A^3-ge-lu. See SCANDIX *pecten.*

AGUIOS (Lat.), adj. A^{2}g(a^{3}g)′wi^2-o^{2}s. Gr., ἄγυιος. Without limbs, weak of limb. [Hippocrates (A, 311).]

AGUISH, adj. A′gu^2-i^{2}sh. Like, pertaining to, or affected with, ague. [D, 122.]

AGUISHNESS, n. A′gu^2-i^{2}sh-ne^{2}s. The state of being aguish (*q. v.*). [D, 122.]

AGUL (Ar.), n. See ALHAGI.

AGUNIE CHAR, n. A native name for a product of western India, reputed a remedy for rheumatism. [D, 90.]

AGUOMADA, n. See AGORIADA.

AGUTI-GUEPA, AGUTIGUEPOOBI BRASIL, n's. Indian names for one or more species of *Sagittaria*. [D, 100, 106.]

AGUTIGUEPO-OPI, n. An Indian name for the *Thalia geniculata*. [D, 108.]

AGY, n. A Peruvian name for the *Capsicum annuum*. [D, 108.]

AGYAGOS, n. An Austro-Hungarian sulphurous water of a temp. of 77° F. [D, 90.]

AGYION, AGYIUM (Lat.), n's n. A^{2}j(a^{3}g)-i(u^6)'i^2-o^{2}n, -u^{3}m-(u^{4}m). See AGUIOS.

AGYNARIUS (Lat.), adj. A^{2}j(a^{3}g)-i^{2}n(u^{6}n)-a(a^3)'ri^2-u^{3}s(u^{4}s). From *α* priv., and γυνή, a female. Fr., *agynaire*. In botany, having no pistils, and having the stamens changed into the form of petals. [De Candolle (B, 1).]

AGYNE (Fr.), n. A^3-zhi^{2}n. A plant the flower of which has no pistil. [D, 112.]

AGYNICUS (Lat.), adj. A^{2}j(a^{3}g)-i^{2}n(u^{6}n)'i^{2}k-u^{3}s(u^{4}s). For deriv., see AGYNARIUS. Fr., *agynique*. In botany, not adherent to the ovary (said of the insertion of the stamens). [Lestiboudois (A, 345).]

AGYNOS, AGYNUS (Lat.), adj's. A^{2}j(a^{3}g)'i^{2}n(u^{6}n)-o^{2}s, -u^{3}s-(u^{4}s). Gr., ἄγυνος. Fr., *agyne*. Ger., *unbeweibt*. In botany, without a pistil. [D, 12.]

AGYRATÆ (Lat.), n. f. pl. A^{2}j(a^{3}g)-i^2(u^6)-ra(ra^3)'te(ta^3-e^2). See DANÆACEÆ.

AGYRIACEI (Lat.), n. m. pl. A^{2}j(a^{3}g)-i^2(u^6)-ri^2-a(a^3)'se(ke^2)-i(e). A family of *Fungi*. [D, 90.]

AGYRIÆ (Lat.), n. f. pl. A^{2}j(a^{3}g)-i(u^6)'ri^2-e(a^3-e^2). A section of *Fungi* of the tribe *Cyathidæ*. [D, 90.]

AGYRIAS (Lat.), n. f. A^{2}j(a^{3}g)-i(u^6)'ri^2-a^{2}s(a^{3}s). From ἄγυρις, a gathering. Cloudiness of the crystalline lens. [Bégin (D, 80).]

AGYRIUM (Lat.), n. n. A^{2}j(a^{3}g)-i(u^6)'ri^2-u^{3}m(u^{4}m). A genus of hymenomycetous *Fungi* established by Fries, being small, dot-like perennial gregarious plants growing on wood and resembling some species of *Lecidea*. [D, 12, 114.]

AGYRTA, AGYRTES (Lat.), n's m. A^{2}j(a^{3}g)-u^{6}rt(u^{6}rt)'a^3, -ez(e^{2}s). Gr., ἀγύρτης. A quack. [Lancisius (H).]

AGYRTIA (Lat.), n. f. A^{2}j(a^{3}g)-u^{6}rt(u^{6}rt)-i(e)'a^3. Gr., ἀγυρτεία. Quackery. [D, 80.]

AGYRTODES (Lat.), adj. A^{2}j(a^{3}g)-u^{6}rt(u^{6}rt)-o'dez(de^{2}s). Gr., ἀγυρτώδης. Quackish. [D, 130.]

AHALE (Sp.), n. A^3-a^3'la. A tree of the Philippine Islands, the leaves of which are used as irritant cataplasms and in decoction as a purgative and as a remedy for vertigo. [D, 101.]

AHATA, AHATE, n's. The *Anona triloba*. [D, 108.]

AHCAI, n. See AHOUA.

AHENJE (Ar.), n. Pompholyx, ecphlysis. [D, 14.]

AHETS BOULE, AHETS MANGHA, n's. Madagascar names for *Cannabis indica*. [D, 108.]

AHI (It.), n. A^3'e. 1. See AÏ. 2. The fruit of *Inocarpus edulis*. [D, 76.]

AHIOLOU, n. A district in Roumelia, on the Black Sea, where there are several salt springs. [A, 375.]

AHIPHI, n. The *Erythrina corallodendron*. [D, 108.]

AHIUS, n. An alchemical term for rock-salt. [Ruland, Johnson (D, 90).]

AHLBAUM (Ger.), n. A^{3}l'ba^3-um. See LONICERA *xylosteum*.

AHLBECK (Ger.), n. A^{3}l'be^{2}k. A sea-bathing resort on the island of Usedom, in the Baltic Sea. [D, 18.]

AHLBEERE (Ger.), n. A^{3}l'ba-re^2. See AALBEERE.

AHLER EISENHÜTTE (Ger.), n. A^3'le^{2}r i'ze^{2}n-hu^{6}t-te^2. A mineral spring in Schaumburg. [D, 12.]

AHLKIRSCHE (Ger.), n. A^{3}l'ki^{2}rsh-e^2. See AALKIRSCHE.

AHMELLA, n. See ACMELLA.

AHORA (Lat.), n. f. A^2(a^3)-ho'ra^3. From ἄωρος, untimely, immature. Retarded development. [D, 2.]

AHORN (Ger.), n. A^3'ho^{2}rn. The genus *Acer* (*q. v.*).—**A'gewächse.** See ACERACEÆ.—**A'säure.** Aceric acid.—**A'zucker.** Maple sugar. [D, 77.]—**Felda'.** The *Acer campestre*.—**Gestreifter A.** The striped maple (*Acer pennsylvanicum*). [D, 129.]—**Rother A.** The red maple (*Acer rubrum*). [D, 8.]—**Zuckera'.** See ACER *saccharinum*.

AHOUA, AHOUAI, AHOUNI, AHOVAI, AHOVAI THEVETICLUSH, AHOVAL, n's. Names applied in various tropical countries to a poisonous plum-tree (the *Cerbera ahovai* or the *Thevetia neriifolia*). The leaves are said to be used as an application to snake-bites. [D, 10, 77, 90, 100, 101, 106.]

AHRBLEICHERT (Ger.), n. A^{3}r'bli-ch^{2}e^{2}rt. A red variety of Ahrwein (*q. v.*).

AHRWEIN (Ger.), n. A^{3}r'vin. A wine grown by the river Ahr, in the province of Coblenz, in Rhenish Prussia. [A, 303.] Cf. AHRBLEICHERT.

AHTE, n. The *Anona triloba*. [D, 108.]

AHTUA, AHUAI, n's. See AHOUA.

AHUBER, n. The fruit of the *Juniperus phœnicea*; used for gastralgia and, infused in oil, for rheumatism. [Lord, Waring (D, 90).]

AHUCK (Ar.), n. Calcium. [D, 108.]

AHUL (Ar.), n. Staphyloma. [D, 14.]

AHUND MADOO, n. An Abyssinian name for a species of *Chenopodium*, used as an application to ulcers. [Waring (D, 90).]

AHUSAL (Ar.), n. An alchemical name for orpiment. [Ruland, Johnson (D, 83).] See ARSENIC *trisulphide*.

AHYPNIA (Lat.), n. f. A^2(a^3)-hi^{2}p(hu^{6}p)'ni^2-a. Gr., ἀυπνία [Aretæus (A, 311)]. Sleeplessness. [D, 90.]

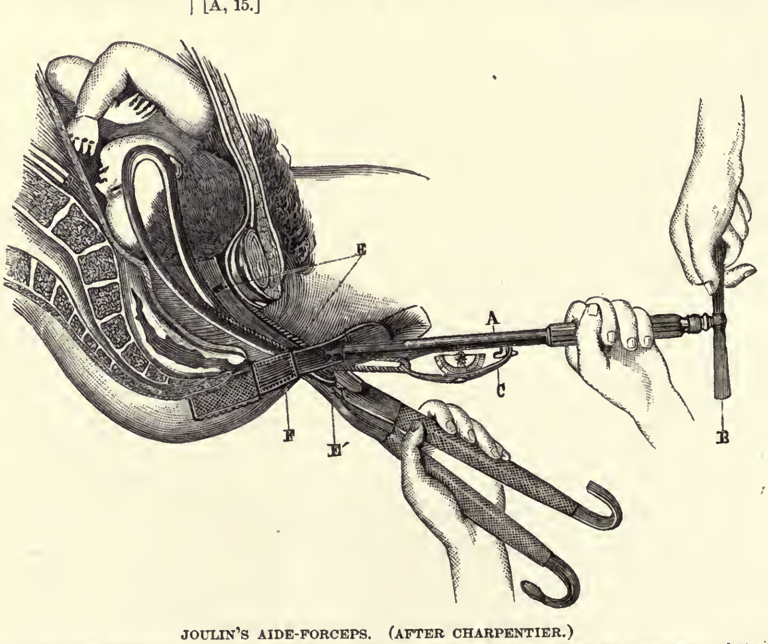
AÏ (Fr.), n. A^3-e. It., *ahi*. Syn.: *a. douloureux, laï, ténosynite crépitante, ténosite crépitante et séreuse*. A painful swelling of the forearm in those whose vocations lead them to make movements of torsion of the closed hand upon the forearm. It is probably due to an inflammation of the fibrous structures enveloping the tendons of the external radial muscles or their bursæ, or of the long abductor and short extensor of the thumb. The word itself is a common exclamation of pain. The affection is treated with rest, bandaging, flying blisters, etc. [R. Larger, "Rev. de chir.," May, 1882, p. 399 (D; L).]

AIARAZATH, n. Ar., *al-râçaç, al-râzâz*. An alchemical term for lead. [B, 50.]

AÏAULT, AÏAUT (Fr.), n's. A^3-e-o. Provincial names for the *Narcissus pseudo-narcissus*. [A, 300; D, 117.]

AIAVOE, n. Ajowan. [D, 108.] See AMMI *copticum*.

AIBEIG (Ar.), n. The *Polypodium vulgare*. [D, 101.]



AIBEN, n. A Tartar name for fermented cows' milk. [Waring (D, 90).]

AIBLING (Ger.), n. A^3'i^{2}b-li^{2}ng. A town in the valley of the Mangfall, in Upper Bavaria, between Munich and Salzburg, where there are several bathing establishments. The baths (*Sool-Mutterlaugen-Moorbäder*) are compounded of bog-mud, saline-spring water, and the mother-liquor of the latter, and are said to be very efficient in promoting the absorption of old exudates. [A, 319; D, 18.]

AICH (Ger.), n. A^3'i^{2}ch^2. A mineral spring at Kempten (*q. v.*). [D, 12.]

AICHAR, n. See ACHAR.

AIDE-FORCEPS (Fr.), n. Ad-fo^{2}r-se^{2}ps. The aid-forceps. [A, 40]; a mechanical contrivance devised by Joulin for exerting continuous traction with the obstetrical forceps by means of a fillet passed through the fenestræ. It works by a mechanism analogous to that of the handle of an *écraseur*, counter-pressure being made against the ischia, and is furnished with a small dynamometer. [A, 15.]

JOULIN'S AIDE-FORCEPS. (AFTER CHARPENTIER.)
A, B, the ecraseur mechanism; C, the dynamometer; E, a fillet passing through the fenestræ of the forceps and attached to the dynamometer.

A, ape; **A^2**, at; **A^3**, ah; **A^4**, all; **Ch**, chin; **Ch^2**, loch (Scottish); **E**, he; **E^2**, ell; **G**, go; **I**, die; **I^2**, in; **N**, in; **N^2**, tank;

AIDION, n. An ancient remedy for snake-bites; wine and the dried testicles of the stag. [Waring (D, 90).]

AIDOIAGRAPHY, n. A-doi-a^{2}g'ra^{2}f-i^2. For this and other words in *Aidoi-*, see the corresponding words in *Ædœ-*.

AIDOS (Gr.), n. A^3'i^{2}d-o^{2}s. A town in Greece having warm sulphurous springs. [D, 79.]

AIERSA (Ar.), n. The *Iris germanica*. [D, 108.]

AIES, n. See Battatas.

AIESCH, n. See Alumen *plumosum*.

AIGE (Fr.), n. Azh. See Ægias.

AIGELBEERE (Ger.), n. A^3'i^{2}g-e^{2}l-ba-re^2. The *Vaccinium myrtillus*. [D, 75.]

AIGILOPS (Fr.), n. A-zhel-o^{2}ps. See Ægilops.

AIGITIS, n. The *Anagallis arvensis*. [D, 108.]

AIGLANTINE (Fr.), n. A-gla^{3}n-ten. The *Aquilegia vulgaris*. [D, 117.]

AIGLE (Fr.), n. Agl. 1. See Eagle. 2. A French bathing resort and water-cure. [D, 87.] 3. See Bex.—**A. celeste.** An old name for ammonium hydrochlorate. [D, 108.]—**A.-impérial.** The *Pteris aquilina*. [B, 19.]

AIGLET, n. Ag'le^{2}t. See Anther.

AIGRE (Fr.), adj. Agr. 1. Unpleasantly sour, sharp. 2. Not ductile, not malleable (said of metals). [A, 300.]—**A. de vitriol.** Oil of vitriol. [D, 106.] See Sulphuric acid.—**A.-doux.** Acid and sweet at the same time. [A, 300.]

AIGRELET (Fr.), adj. Agr-la. Slightly acid. [D, 11.]

AIGRELIER (Fr.), n. Agr-le-a. The *Pyrus torminalis*. [D, 117.]

AIGREMOINE (Fr.), n. Agr-mwa^{3}n. Agrimony; the *Agrimonia eupatoria*. [Fr. Cod. (B).]—**A. eupatoire.** See Agrimonia *eupatoria*.—**Eau d'a.** See *Aqua* agrimoniæ.—**Extrait aqueux d'a.** See *Extractum* agrimoniæ *aquosum*.—**Hydrolat d'a.** See *Aqua* agrimoniæ.

AIGRET (Fr.), adj. A-gra. See Aigrelet.

AIGRETIER (Fr.), n. Agr-te-a. The *Cratægus torminalis*. [D, 79.]

AIGRETTE (Fr.), n. A-gre^{2}t. Ger., *Federchen* (1st def.). It., *pennachino* (1st def.). 1. In botany, a tuft. [B; D, 11.] See Pappus. 2. The *Rumex acetosus*. [D, 2.] 3. A peculiar phenomenon produced when a metallic ball is brought within 2 or 3 inches of a person seated on an insulated platform and charged with static electricity; being the emission of a bundle of radiating luminous striæ, enveloped in a bluish haze, from the surface of the body to that of the ball. [Charcot, "Rev. de méd.," Feb., 1881; "N. Y. Med. Jour.," June, 1881, p. 720 (B).]

AIGRETTÉ (Fr.), adj. A-gret-ta. In botany, furnished with aigrettes. [B.]

AIGREUR (Fr.), n. A-gru^{5}r. Acidity, bitterness. [D, 106.]—**A. d'estomac, A's.** See Pyrosis.

AIGU (Fr.), adj. A-gu^6. Acute. [D, 10.]

AIGUEPERSE (Fr.), n A-ge^2-pars. A cold calcareous spring, little used, in the district of Puy-de-Dôme, in France. [D, 79.]

AIGUES-BONNES, AIGUES-CHAUDES (Fr.), n's. A-ge^2-bo^{2}n, -shod. See Eaux-Bonnes and Eaux-Chaudes.

AIGUESSAC (Fr.), n. A-ge^{2}s-sa^{3}k. A village in the Department of Aveyron, in France, with three cold mineral springs. [D, 108.]

AIGUILLE (Fr.), n. A-gwe-y'. 1. A needle. 2. A disease of falcons, attributed to worms and lice. [D, 85.]—**A. à acupressure.** See *Acupressure* needle.—**A. à acupuncture.** See *Acupuncture* needle.—**A. à appareil.** A common sewing-needle, used in making bandages. [D, 75.]—**A. à bec-de-lièvre.** See *Hare-lip* needle.—**A. à cataracte.** See *Cataract* needle.—**A. à contre-ouverture.** See *Sheathed* needle.—**A. à électropuncture.** See *Electropuncture* needle.—**A. affolée.** A compass needle that has been caused to deviate from its true position by some disturbing influence. [B, 52.]—**A. à fistule.** A grooved director. [D, 10.]—**A. à gaine.** See *Sheathed* needle.—**A. à galvanopuncture.** See *Electropuncture* needle.—**A. aimantée.** See *Magnetic* needle.—**A. à injection hypodermique.** See *Hypodermic* needle.—**A. à inoculation.** See *Vaccinating* needle.—**A. à ligature.** See *Aneurysm* needle.—**A. à manche.** See *Sheathed* needle.—**A. à résection.** A blunt, angular needle which, threaded with stout silk, is used for carrying a chain-saw around a bone. [D, 92.]—**A. arrondie.** A rounded needle. [D, 75.]—**A. à séton.** See *Seton* needle.—**A. à suture, A. chirurgicale.** See *Suture* needle.—**A. courbe.** A curved needle. [D, 75.]—**A. de berger.** The plant shepherd's-needle (*Scandix pecten*). [D, 117.]—**A. de Deschamps.** See *Deschamps's* needle.—**A. de fistule.** A grooved director. [D, 10.]—**A. droite.** A straight needle. [D, 75.]—**A. emmanchée.** A needle with a handle. [D, 75.]—**A. engainée.** See *Sheathed* needle.—**A. exploratrice.** See *Exploring* needle.—**A. indicatrice.** The indicating shaft, or guide, of Tarnier's obstetrical forceps (*q. v.*, under Forceps). [A, 15.]—**A. plate.** A flat needle. [D, 75.]—**A. thermo-électrique.** See *Thermo-electric* needle.—**A. triangulaire.** A triangular needle. [D, 75.]—**Baume d'a's.** See *Baume d'*acier.

AIGUILLÉ (Fr.), adj. A-gwe-ya. Needled. [D, 85.] See Needling.

AIGUILLON (Fr.), n. A-gwe-yo^{2}n^2. An aculeus (*q. v.*); hence, figuratively, the immediate cause of an inflammation. [Vicq d'Azyr (D, 10).]

AIGUILLONNÉ (Fr.), adj. A-gwe-yo^{2}n-na. Aculeate. [D, 75.]

AIGUISEUR (Fr.), n. A-gwe-zu^{5}r. A grinder of edged tools. [A, 300.]—**Phthisie des a's.** See *Grinders'* phthisis.

AIJ-PUTI, n. A name given in the island of Bouro to the tree that furnishes oil of cajuput (the *Melaleuca leucadendron*). [A, 264.]

AIKEN, n. A'ke^{2}n. A town in S. Carolina, 585 feet above the level of the sea, having a mean winter temperature of 48·59° F., with a remarkably dry and salubrious atmosphere; an excellent resort for consumptives, especially if anæmic and sensitive to cold. [W. H. Geddings, "N. Y. Med. Jour.," xxxi, 1880, p. 1.]

AIL, v. intr. Al. To be ailing (*q. v.*).

AIL, n. Al. A popular term for disease, especially if not considered of much importance. [D.]—**Wetherbee a.** A Massachusetts popular name for progressive muscular atrophy, from its having been observed in several generations of the Wetherbee family. [D, 34.]

AIL (Fr.), n. A^3-i^2-y'. Pl., *ails* (as the name of a plant), *aulx*. Garlic. [D, 10; L, 41.] See Allium.—**Acétolature d'a.** See *Acetum* allii.—**Acétomellé d'a.** See Oxymel *alliatum*.—**A. à feuilles étroites.** See Allium *leptophyllum*.—**A. à toupé, A. à toupet.** The *Muscari comosum*. [D, 117; L, 41.]—**A. à tuniques.** The *Allium parvum*. [L, 64.]—**A. ciboule.** The *Allium fistulosum*. [L.]—**A. cultivé, A. commun.** The *Allium sativum*. [D, 92, 133.]—**A. de mulot.** The *Allium angulosum*. [D.]—**A. des bois, A. des ours.** The *Allium ursinum*. [D, 117.]—**A. d'Espagne.** The *Allium scorodoprasum*. [D, 117.]—**A. des potages.** The *Allium oleraceum*. [D.]—**A. des vignes.** The *Allium vineale*. [D.]—**A. doré.** The *Allium moly*. [D, 117.]—**A. d'Orient.** The *Allium ampeloprasum*. [D, 117.]—**A. échalotte.** The *Allium ascalonicum*. [D.]—**A. faux-poireau.** The *Allium ampeloprasum*. [D.]—**A. faux-spicanard.** The *Allium victoriale*. [D.]—**A. leptophylle.** The *Allium leptophyllum*. [D.]—**A. oblique.** The *Allium obliquum*. [D.]—**A. oignon.** The *Allium cepa*. [D.]—**A. poireau.** The *Allium porrum*. [D.]—**A. rocambole.** The *Allium scorodoprasum*. [D.]—**A. serpentin.** The *Allium victoriale*. [D.]—**A. stérile.** The *Allium ascalonicum*. [L, 64.]—**A. tubéreux.** The *Allium tuberosum*. [D.]—**Essence d'a., Huile d'a.** See *Oil of* garlic.—**Liniment d'a.** A mixture of lard and *Allium sativum*, well triturated; recommended by Buchan to be rubbed on the soles of the feet in whooping-cough and other obstinate coughs. [De Gassecourt (L, 85).]—**Oxéolé d'a.** See *Acetum* allii.—**Oxymel d'a.** See Oxymel *alliatum*.—**Pulpe d'a.** [Fr. Cod.]. A preparation made by rasping garlic and passing the powder through a sieve. [B.]—**Sirop d'a.** See *Syrupus* allii.—**Tête d'a.** A cluster of small onions. [L, 109.]—**Vinaigre d'a.** See *Acetum* allii.

AÏLANTE, AÏLANTHE (Fr.), n's. A^3-e-la^{3}nt. See Ailantus.—**A. élevé.** The *Ailantus excelsa*. [D.]—**A. glanduleux.** The *Ailantus glandulosa*. [D, 10.]

AILANTHIC ACID, n. A-la^{2}n'thi^{2}k. See Ailantic acid.

AILANTHUS (Lat.), n. f. A(a^3-e)-la^{2}n(la^{3}n)'thu^{3}s(thu^{4}s). See Ailantus.

AILANTIC ACID, n. A-la^{2}nt'i^{2}k. Fr., *acide aïlantique*. An acid derived from the bark of *Ailantus excelsa*. [B, 5, 81.]

AILANTUS (Lat.), n. f. A(a^3-e)-la^{2}n(la^{3}n)'tu^{3}s(tu^{4}s). From the Chinese *ailanto*. Fr., *aïlante, langit, vernis du Japon* (ou *de la Chine*). Ger., *Götterbaum*. Syn.: *Chinese sumach, tree of heaven*. A genus of simarubaceous trees and shrubs established by Desfontaines, distinguished by polygamous flowers with from 3 to 5 pistils, not united, 10 stamens, and, for fruit, a one-celled samara containing one seed. [B, 34; D, 12.] It is said to be poisonous to ducks, and the poisonous principle is supposed to reside in the very acrid resinous juice of the buds and leaves. [Caraven-Cachin, "Jour. de pharm. et de chim.," Dec., 1885; "Gaz. hebd. de méd. et de chir.," Dec. 18, 1885; "N. Y. Med. Jour.," Jan. 9, 1886, p. 56.]—**A. excelsa.** Fr., *aïlante élevé*. An East Indian species described by Roxburgh; the bark is used in India as a tonic and febrifuge. [D, 12, 115.]—**A. glandulosa** [Desfontaines]. Fr., *aïlante glanduleux, vernis du Japon*. Ger., *Götterbaum*. A large tree with abundant foliage and green paniculate flowers of a very disagreeable odor; a native of eastern Asia, cultivated in the United States as a shade-tree. [B, 34; D, 12.] The leaves and bark have been used as an anthelmintic. [A, 319.]—**A. integrifolia.** See *A. excelsa*.—**A. malabarica.** An East Indian species; the bark is said to be used as an antidyspeptic, tonic, and febrifuge, and the resinous juice for dysentery and bronchitis. [D, 90.]

AILE (Fr.), n. Al. 1. A wing. [B.] See Ala. 2. The axilla. 3. Ale. [L.]—**A. grise.** See Ala *cinerea*.

AILÉ (Fr.), adj. A-la. See Alate.—**Sonde a.** See *Winged* catheter.

AILEFORME (Fr.), adj. Al-fo^{2}rm. See Aliform.

AILERON (Fr.), n. Al-e^2-ro^{2}n^2. Any wing-like structure.—**A's de la matrice, A's du ligament large.** The folds of the broad ligament of the uterus. [D, 11.]

AILING, adj. Al'i^{2}ng. A popular term for out of health, especially with the idea of chronicity and lack of severity.

AILLAME, n. The *Sorbus ancuparia*. [D, 108.]

AILMAD, n. An alchemical name for antimony. [D, 132.]

AILMENT, n. Al'me^{2}nt. A disease or infirmity, especially if imperfectly developed and apparently not very severe. [D, 20.]

AIL-PUTTAY, n. A yellowish aromatic root used in India as an application for rheumatism, and given in decoction as a febrifuge. [D, 108.]

AIMA (Lat.), n. n. A'(a^3'i^2)-ma^3. Gen., *aim'atos*. See Hæma.

AIMAGOGON (Lat.), n. n. A(a^3-i^2)-ma^3-go'gon. From αἱμα-

γωγός, drawing off blood. The *Pæonia officinalis.* [A, 311 ; Dioscorides (D, 108).]

AIMANT (Fr.), n. A-ma^{3}n^{2}. A magnet, the loadstone. [D, 126.]—**A. arsenical.** A substance obtained by fusing together equal parts of sulphur, antimony, and arsenic. [D, 10.]—**A. artificiel.** See *Artificial* MAGNET.—**A. blanc.** A white aluminous mineral which has been supposed to be aphrodisiac, detersive, astringent, and antiscorbutic. [D, 108.]—**A. de fer.** A piece of iron artificially magnetized. [D, 126.]—**A. en fer à cheval.** See *Horse-shoe* MAGNET.

AIMANTATION (Fr.), n. A-ma^{3}n-ta^{3}-si^{2}-o^{2}n^{2}. Ger., *Magnetisirung.* It., *calamitazione.* Sp., *imantación.* 1. Magnetization. 2. The use of a magnet for experimental, diagnostic, or therapeutic purposes.

AIMANTÉ (Fr.), adj. A-ma^{3}n-ta. Magnetized. [B.]

AIMANTER (Fr.), v. tr. A-ma^{3}n^{2}-ta. To magnetized. [B.]

AIMANTIN (Fr.), adj. A-ma^{3}n-ta^{2}n^{2}. Magnetic. [D, 106.]

AIMA TOMATON, n. Perhaps from αἷμα, blood, and τέμνειν, to cut. A cupping and puncturing apparatus made in Rochester, N. Y. [D, 87.]

AIMORRHŒA (Lat.), n. f. A(a^{3}-i^{2})-mo^{2}r-re'(ro'e^{2})-a^{3}. Gr., αἱμόῤῥοια. A discharge of blood, a bloody flux. [Hippocrates (A, 311).]

AIMORRHŒIS, AIMORRHOIS, AIMORROIS (Lat.), n's f. A(a^{3}-i^{2})-mo^{2}r-re'(ro'e^{2})-i^{2}s, -ro'i^{2}s. Gr., αἱμοῤῥοΐς. See HÆMORRHOID.

AIMOS (Lat.), n. m. A'(a^{3}'i^{2})-mo^{2}s. Gr., αἱμός. The *Rubus fruticosus.* [Dioscorides (D, 108).]

AIMOSCOPIE (Fr.), n. A-mo^{2}s-ko-pe. See HÆMATOSCOPY.

AIN, n. Ar., *Oaîn*, a fountain. A name given in Algeria to a number of mineral springs. [B, 93.]—**A. Afouzer.** A cold ferruginous spring near Djidjelli (northwest of Constantine). [B, 93.]—**A. Ainiia.** A cold sulphurous spring near La Calle. [B, 93.]—**A. Baroud.** 1. A cold sulphurous spring near Mourzaïa-les-Mines. 2. A warm ferruginous and saline spring near Kroubs. [B, 93.]—**A. bou Chagroum.** A hot spring near Biskra. [B, 93.]—**A. bou Merzoug.** A warm spring near Constantine. [B, 93.]—**A. Chetma.** A hot spring near Biskra. [B, 93.]—**A. Dahla.** A cold ferruginous spring near Dahla. [B, 93.]—**A. des Beni-Ismaël.** A cold ferruginous spring near Sétif. [B, 93.]—**A. Djerob.** A hot spring without mineral constituents on the upper Chélif River. [B, 93.]—**A. Drouen.** A warm spring near Batna. [B, 93.]—**A. el Djerob.** A tepid sulphurous spring near Bordj-bou-Arreridj. [B, 93.]—**A. el Hammam.** 1. A spring near Sebdou. 2. A sulphurous hot spring near A. Djerob. 3. A sulphurous saline spring containing carbonic acid near Saida. 4. Several saline springs near Mascara. [B, 93.]—**A. el Hamza.** A cold spring on the road from Sétif to Bougie containing alkaline carbonates and carbonic acid. [B, 93.]—**A. el Kibrit.** A sulphurous tepid spring near Bordj-bou-Arreridj. [B, 93.]—**A. el Meïda.** A hot spring without mineral constituents near Biskra. [B, 93.]—**A. el Mouza.** A hot sulphurous mineral spring in Arabia Petræa. [D, 90.]—**A. Fesguia.** A warm spring with potable water near Constantine. [B, 93.]—**A. Garsa.** A warm sulphurous spring near Ain Beïda. [B, 93.]—**A. Guergour.** A ferruginous hot spring near Sétif. [B, 93.]—**A. Hamama.** A ferruginous spring near Milianah containing carbonic acid. [B, 93.]—**A. Hamza, A. Karsa.** A cold spring near Milianah containing iron, carbonates, and gaseous constituents. [B, 93.]—**A. Kebrit.** 1. A cold sulphurous spring near Constantine. 2. A hot sulphurous spring near Aumale. [B, 93.]—**A. Kebrita.** A cold sulphurous spring near Beni-Chaïf. [B, 93.]—**A. Kebrit M'Karta.** A spring near Bordj-bou-Arreridj. [B, 93.]—**A. Keddara.** A cold spring on the upper Chélif River. [B, 93.]—**A. Kef el Hammam.** A sulphurous hot spring near La Calle. [B, 93.]—**A. Ksar.** A warm spring near Batna without mineral constituents. [B, 93.]—**A. Ma Allah.** A warm ferruginous spring near Milah. [B, 93.]—**A. Malah.** 1. A cold spring near Orléansville containing sodium chloride. 2. A spring near Bou Saada containing sodium chloride. [B, 93.]—**A. Merdjah.** A hot saline spring on the left bank of the Tafna. [B, 93.]—**A. Mkebritza.** A cold sulphurous spring and sanitarium near Constantine. [B, 93.]—**A. Nouissy.** A tepid, ferruginous, saline, and sulphurous spring near Mostaganem, used for both bathing and drinking in cases of diseases of the lymphatic glands and anæmia. [B, 93 ; D, 18.]—**A. Okhris.** A hot sulphurous spring near Aumale, recommended in syphilis. [B, 93.]—**A. Ouled Messaoud.** A sulphurous hot spring with sanitarium near Bône. [B, 93.]—**A. Ouled Youb.** A hot sulphurous spring near La Calle. [B, 93.]—**A. Ouled Zeid.** A hot sulphurous spring near Souk-Arrhas. [B, 93.]—**A. Oumach.** A hot spring without mineral constituents near Biskra. [B, 93.]—**A. Oum el Snam.** The same as *A. Ksar.* [B, 93.]—**A. Seddoud.** A hot spring without mineral constituents in the oasis of Tolga. [B, 93.]—**A. Sefian.** A tepid spring near the border of Seggana. [B, 93.]—**A. Sennour.** A cold ferruginous gaseous spring near Souk-Arrhas. [B, 93.]—**A. Siddia.** A cold ferruginous spring near Mostaganem. [B.]—**A. Sidi-Aldelli.** A saline hot spring near the village of Isser. [B, 93.]—**A. Sidi Ait.** A hot sulphurous spring near Ain Témouchent. [B, 93.]—**A. Sidi Trad.** A hot sulphurous spring near La Calle. [B, 93.]—**A. Tahamimant.** A tepid ferruginous spring near Bordj-bou-Arreridj. [B, 93.]—**A. Tamersit el Dahraoum.** A cold sulphurous spring about 100 miles from Biskra. [B, 93.]—**A. Tamersit el Guebli.** A cold sulphurous spring nearly 100 miles distant from Biskra. [B, 93.]—**A. Zerguin.** A hot spring without mineral constituents on the upper Chélif River. [B, 93.]

AINCILLE (Fr.), n. A^{2}n^{2}-sel. A cold spring containing sodium chloride in the department of the Basses-Pyrénées in the extreme southwest of France. [B, 93.]

AINE (Fr.), n. An. The groin. [D.]—**Pli de l'a.** See FOLD *of the groin.*—**Région de l'a.** See *Inguinal* REGION.

AINGNE (Fr.), n. An. See AINE.

AINHUM, n. An African word signifying to saw or to saw off. Lat., *dactylolysis spontanea.* Fr., *ainhum.* Ger., *Absägen.* Sp., *dactilolisia.* A disease peculiar to the negro, consisting in a spontaneous amputation of the little toe. It begins with a furrow on the lower surface of the toe at the proximal interphalangeal joint. This furrow gradually surrounds the member and deepens until the bone is exposed, and finally (in the course of several years) the toe, which in the mean time becomes hypertrophied and much enlarged, drops off. By some the disease is believed to be produced artificially by a ligature. It is most commonly met with on the west coast of Africa, in Bahia, Rio de Janeiro, and Buenos Ayres, and is also said to occur occasionally in India and in the southern United States. [G.]

AINITU, n. An aromatic shrub of the Moluccas. [D, 98.]

AINSWORTHIA (Lat.), n. f. Anz-wu^{5}rth'i^{2}-a^{3}. A genus of *Umbelliferæ* established by Boissier, resembling *Tordylium*, but differing from the latter in the absence of calyx teeth and in having fruit with a smooth margin. [D, 117.]

AIOCOCHTLI, n. A name given, according to Monard, in some Spanish colonies to a small bone in the tail of the armadillo, which is made into pills and introduced into the external auditory canal for the relief of otalgia. [D, 108.]

AIOPHYLLOUS, adj. A-i-o^{2}f'i^{2}l-u^{3}s. From αἰών, a life-time, and φύλλον, a leaf. Fr., *aïophylle.* Sp., *aiofileo, aiófilo.* Having leaves which last longer than a single year ; evergreen. [D, 98, 101, 112.]

AIOUN-EL-BELLAIA (Ar.), n. A warm spring in Algeria near Ain Beida. [B, 93.]

AIOUN SKHAKNA (Ar.), n. A cold chalybeate spring in Algeria containing carbonates. The water is drank in cases of chlorosis and anæmia. [B, 93.]

AIPATHES (Lat.), adj. A(a^{3})-i^{2}p'a^{2}th(a^{3}th)-ez(e^{2}s). For deriv., see AEIPATHIA. More properly written *aeipathes.* Always complaining or being sick. [D, 80.]

AIPATHIA (Lat.), n. f. A(a^{3})-i^{2}-pa^{2}th(pa^{3}th)'i^{2}-a^{3}. See AEIPATHIA.

AIPHANES (Lat.), n. f. A(a^{3})-i^{2}f'a^{2}n(a^{3}n)-ez(e^{2}s). Gen., *aiphan'eos.* From ἀεί, ever, and φαίνεσθαι, to appear. Fr., *aïphane.* A genus of palms established by Willdenow in 1804. [B, 170 ; D, 12.]—**A. aculeata, A. praga.** South American species. [D, 12.]

AIPI, n. A South American native name. 1. The tapioca or cassava plant (*Jatropha manihot*). [D, 92, 100.] 2. A Brazilian plant probably belonging to the genus *Cynanchum.* [B, 132.]—**A. makaxata.** A Brazilian plant, from the root of which the drink *aipii* is prepared. [A, 305.]

AIPII, n. 1. A Brazilian drink prepared from the root of the *Aipi makaxata.* [A, 305.] 2. See AIPI (1st def.).

AIPIM, AIPIAM COXERA, AIPIPOCA, n's. See AIPI (1st def.).

AIR, n. Ar. From Lat., *aer*, Gr., ἀήρ. Lat., *aer.* Fr., *air.* Ger., *Luft.* It., *aere, aria.* Sp., *aire.* A name originally applied to any gas. It is now restricted to the gas forming the earth's atmosphere. The latter is made up of a mechanical mixture of nitrogen and oxygen, with a small proportion of carbon dioxide, ammonia, free nitric acid, ozone, aqueous vapor, and various adventitious inorganic and organic substances either in the form of gas or of suspended solid particles. Of these constituents, although all are constantly present, all except the first two are regarded as impurities, chemically pure a. consisting only of nitrogen and oxygen. The relative quantities of these elements vary with the locality, the season, and other factors, the proportion of oxygen ranging from 20·26 to 21 per cent. by volume, the mean being 20·96 per cent. by volume, or rather more than 23 per cent. by weight. A. is a colorless, tasteless, and odorless gas. It exhibits the properties of its constituent gases, maintaining oxidation, combustion, and respiration, like pure oxygen, but acting with less energy than the latter, on account of the diluting influence of the inert nitrogen. The sp. gr. of a. compared with hydrogen is 14·47, compared with water, $\frac{1}{773}$; a litre of it under a pressure of 760 mm. and at 0° C. weighing 1·293 grammes. A. is slightly soluble in water, its two constituents dissolving in different proportions so that the composition of the dissolved a. is different from that of atmospheric a., containing indeed nearly 35 per cent. by volume of oxygen. [B.] See, also, ATMOSPHERE.—**Acid of a.** Atmospheric carbonic acid ; carbon dioxide. [B, 3.]—**A. acide vitriolique** (Fr.). See *Vitriolic acid a.*—**A. alcalin** (Fr.). See *Vital a.*—**Alkaline a.** Fr., *a. alcalin.* It., *aria alcalina.* Sp., *aire alcalino.* Priestley's name for ammonia. [B.]—**Atmospheric a.** Lat., *aer atmosphœricus.* Fr., *a. atmosphérique.* Ger., *atmosphärische Luft.* It., *aria atmosferica.* Sp., *aire atmosférico.* Ordinary a. See *A.*—**Azotic a.** Fr., *a. azotique.* Nitrogen. [B.]—**Breathing a.** See *Tidal a.* and BREATHING *a.*—**Complemental a., Complementary a.** Fr., *a. complémentaire.* Ger., *Complementarluft.* A term introduced by Hutchinson [J, 12] to designate the volume of a. in addition to the tidal a., which may be drawn into the lungs by a forced inspiration. The average amount for an adult man is about 1,500 cu. cent. [J, 19, 40.]—**Dephlogisticated a.** Fr., *a. dephlogistiqué.* Ger., *dephlogisticirte Luft.* It., *aria deflogisticata.* Sp., *aire deflogisticado.* Priestley's name for oxygen. [A.]—**Dephlogisticated nitrous a.** Priestley's term for nitrogen monoxide. [B, 3, 86.]—**Empyreal a.** Fr., *a. empyré de Schéele.* Oxygen. [B, 158.]—**Expiratory a., Expired a.** Fr., *a. expiré, exhalation pulmonaire.* Ger., *Ausathmungsluft, Expirationsluft.* It., *alito, lena.* Sp., *aliento, halito.* Syn. : *breath, pulmonary exhalation.* The a. forced from the lungs in expiration. It differs from inspired a. in composition, an average specimen containing, at the standard temperature and pressure and when deprived of its aqueous vapor, O 16·06 per cent. by volume, N 79·56 per cent., and CO_2 4·38 per cent. The composition, moreover, varies much more than that of inspired a. Expired a. differs from the latter in the following respects also : 1. It is loaded with aqueous vapor. 2. It acquires a trace of organic matter, and frequently contains various volatile and odorous substances (alcohol, garlic, etc.) taken into the mouth and stomach or excreted by the lungs. 3. It is changed in temperature—that is, if of a lower temperature than the body it is heated, if of a higher temperature it is cooled. [J.] See *Inspired a.*—**Factitious a.** Lat., *aer factitius.* It., *aria fattizia.* Sp., *aire facticio.* Carbon dioxide. [D, 76.]—**Fixed a.** Fr., *a. fixe.* Ger., *fixe Luft.* It., *aria fissa.* Sp., *aire fijo.* A name given by J. Black to carbon dioxide. [A, 1 ; D, 108.]—**Fluor acid a.** A name given by Priestley to silicon tetrafluoride. [B, 3.]—**Heavy combustible a., Heavy inflammable a.** Ger., *schwere brennbare Luft.* Methane. [B, 140.]—**Hepatic a.** Lat., *aer hepaticus.* Fr., *a. hépatique.* Ger., *Schwefelleberluft.* It., *aria epatica.* An old term for hydrogen sulphide. [B, 86.]—**Inflammable a.** Lat., *aer inflammabilis.* Fr., *a. inflammable.* Ger., *brennbare Luft.* It., *aria infiammabile.* An old term for various inflammable gases ; usually applied to hydrogen, but also to methane and ethylene. [B, 3, 86.] See *Heavy inflammable a.*—**Inspired a.** Fr., *a. inspiré.* Ger., *Einathmungsluft, Inspirationsluft.* The a. taken into the lungs in inspiration. Its composition is that of the surrounding atmosphere (*q. v.*). [J.]—**Marine acid a.** An old term for gaseous hydrochloric acid. [B, 2, 86.]—**Mephitic a.** Lat., *aer mephiticus.* Fr., *a. méphitique.* It., *aria mefitica.* Old terms for (*a*) nitrogen, (*b*) carbon dioxide ; so called because both are fatal to animal life. [B.]—**Nitrous a.** Fr., *a. nitreux.* Ger., *Salpeterluft.* It., *aria nitrosa.* A term of Priestley's for nitrogen dioxide. [B, 3, 86.]—**Phlogisticated a.** Fr., *a. phlogistique* ou *phlogistiqué.* Ger., *phlogisticirte Luft.* It., *aria flogisticata.* Sp , *aire flogisticado.* Priestley's term for nitrogen. [B, 3, 86.]—**Phosphoric a.** A term given by Kirwan (1787) to a gas obtained by heating phosphorus with an alkali, and consisting of gaseous hydrogen phosphide mixed with a small quantity of the vapor of liquid hydrogen phosphide. [B, 3, 86.]—**Pure a.** Lat., *aer purus.* Fr., *a. pur.* Ger., *reine Luft.* It., *aria pura.* Sp., *aire puro.* One of Lavoisier's names for oxygen. [A.]—**Reserve a.** Fr., *réserve respiratoire.* Ger., *Reserveluft.* Syn. : *respiratory reserve.* A term introduced by Hutchinson (1840–1850) to designate the volume of a. that may be voluntarily forced from the lungs after an ordinary respiration. The average amount of reserve a. for an adult man is about 1,500 cu. cent. [J, 18, 19, 28, 46.]—**Residual a.** Fr., *résidu respiratoire, a. résiduel.* Ger., *Residualluft.* Syn. : *respiratory residue.* A term introduced by Hutchinson (1840–1850) to designate the volume of a. that remains in the lungs after the most forcible expiration. It amounts in the average, for an adult man, to about 1,800 cu. cent. [J, 18, 19, 28, 46.]—**Solid a. of Hales.** Fr., *a. solide de Hales.* It., *aria solida di Hales.* Sp., *aire solido de Hales.* A name given to carbon dioxide on account of its property of forming solid carbonates with the metallic oxides. [B, 125 ; D.]—**Stationary a.** Fr., *capacité pulmonaire.* The amount of a. which remains constantly in the lungs in ordinary respiration. It includes : (*a*) the *reserve a.*, which may be expelled ; and (*b*) the *residual a.*, which always remains even after the most powerful expiration. The average amount of stationary a. in an adult man is about 3,300 cu. cent. [J, 19, 41.]—**Supplemental a., Supplementary a.** See *Reserve a.*—**Tidal a.** Fr., *capacité inspiratrice ordinaire.* Ger., *Volum des mittleren Athmens.* Syn. : *breath, breathing a., breathing volume.* The volume of a. taken in at one inspiration in ordinary tranquil breathing. This averages about 500 cu. cent. in an adult man. [J.]—**Vital a.** Lat., *aer vitalis.* Fr., *a. vital.* It., *aria vitale.* Sp., *aire vital.* An old name for oxygen. [B, 86.]—**Vitriolic acid a., Vitriolic a.** Priestley's term for sulphur dioxide. [B, 3, 86.] For other applications of a. see A.-PASSAGES, A.-PUMP, *A.*-BAG, *A.*-BATH, *A.*-BATTERY, *A.*-BED, *A.*-BLADDER, *A.*-CANALS, *A.*-CAVITIES, *A.*-CELL, *A.*-CHAMBER, *A.*-CURE, *A.*-CUSHION, *A.*-DOUCHE, *A.*-DUCT, *A.*-EMBOLISM, *A.*-GAS, *A.*-LACUNULE, *A.*-PESSARY, *A.*-PILLOW, *A.*-SAC, *A.*-SINUSES, *A.*-THERMOMETER, *A.*-TRACTOR, *A.*-TRAP, *A.*-TUBE, *A.*-VESICLE, and *A.*-VESSELS.

AIRA (Lat.), n. f. A(a^3)′i^2-ra^3. From αἶρα, darnel. Fr., *aire, canche* (2d def.). Ger., *Schmiele, Haargras* (2d def.). 1. Among the Greeks, the darnel (*Lolium temulentum*). 2. A name applied by Linnæus (1737) to a genus of *Gramineæ* belonging to the tribe *Aveneæ*, distinguished by the presence of 2 perfect florets and sometimes of the rudiments of a third within the glumes. [B, 115, 170 ; D, 117.]—**A. aquatica** [Willdenow]. Fr., *canche aquatique.* Ger., *süsses Milizgras, Wasserschmiele.* Water hair-grass ; a species found in pools, eaten by cattle and water-fowl. [B, 71, 171.]—**A. cæspitosa** [Willdenow]. Fr., *canche élevée, canche des gazons.* Ger., *Ackerschniele, Rasenschmiele.* Tufted hair-grass. A species with stiff erect stalks sometimes reaching the height of 6 feet, growing in marshy meadows. It is eaten by cattle. [B, 71, 173 ; D, 8, 117.]—**A. canescens** [Linnæus]. Fr., *canche blanchâtre, erbin cendré.* Ger., *dustige Schmiele.* Syn. : *Avena canescens* [Weber], *Corynephorus canescens* [Beauvais]. A species eaten by cattle. [B, 173.]—**A. caryophyllea** [Willdenow]. Fr., *canche à feuilles d'œillet.* Ger., *Silbergras, Silberhaargras.* Syn. : *Avena caryophyllea.* Silver hair-grass ; an English and European species. [B, 71, 173.]—**A. flexuosa** [Willdenow]. Fr., *canche flexible.* Ger., *Bergschmiele.* Syn. : *Avena montana* [Weber]. Waved hair-grass. A species with a wavy peduncle and setaceous leaves. [B, 71.]—**A. holcus lanatus.** See HOLCUS *lanatus.*—**A. mollis.** See HOLCUS *mollis.*—**A. montana** [Scheuchz.], **A. setacea** [Hudson]. *A. flexuosa* [B, 173].

AIRAGE (Fr.), n. A^2-ra^{3}zh. 1. Ventilation. 2. Brass. [D.]

AIRAN (Fr.), n. A^2-ra^{3}n^2. Brass. [D.]

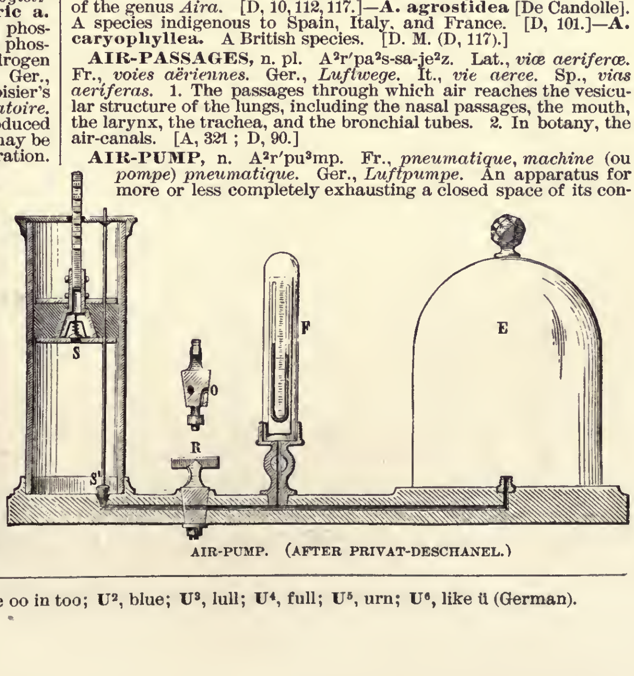
AIRE (Fr.), n. A^{2}r. See AREA, AIRA, and AMÉLIE-LES-BAINS.—**A. claire.** See *Transparent* AREA.—**A. embryonnaire.** See *Embryonic* AREA.—**A. fœtale.** See *Fœtal* AREA.—**A. germinative.** See *Embryonic* AREA.—**A. obscure.** See *Opaque* AREA.—**A. transparente.** See *Transparent* AREA.—**A. vasculaire.** See *Vascular* AREA.—**A. vitelline.** See *Vitelline* AREA.

AIRELLE (Fr.), n. A-re^{2}l. The botanical genus *Vaccinium*, also the berry borne by its members. [A, 300 ; D, 10, 133.]—**A. à fruits acides.** See OXYCOCCUS.—**A. à fruits rouges.** See VACCINIUM *vitis idœa.*—**A. à gros fruits.** See OXYCOCCUS *macrocarpus.*—**A. anguleuse.** See VACCINIUM *myrtillus.*—**A. bombeuse.** See VACCINIUM *uliginosum.*—**A. canneberge.** See OXYCOCCUS.—**A. de Cappadoce.** See VACCINIUM *arctostaphylos.*—**A. de Provence.** See ULEX *provincialis.*—**A. des marais.** See VACCINIUM *uliginosum.*—**A. en corymbe.** See VACCINIUM *corymbosum.*—**A. myrtille** [Fr. Cod.]. Cod.]. The expressed juice of the berries of *Vaccinium myrtillus*, allowed to stand for 24 hours at a temperature of from 12° to 15° C., and then decanted. [D, 125.]

AIREN, n. A Tartar name for fermented cows' milk. [D, 108.]

AIRI, n. A species of Brazilian palm. [D, 10.]

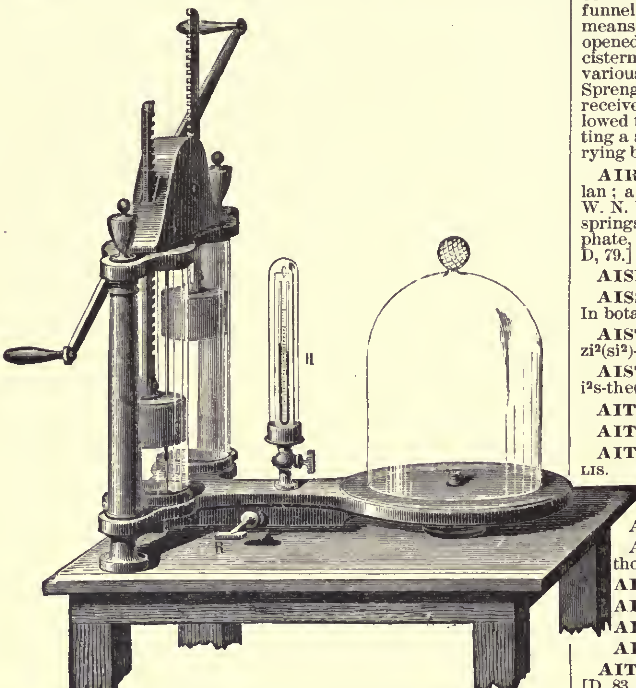
AIRIGNE, AIRINE (Fr.), n's. A-ren. More properly written *érigne.* A dissecting-hook. [D, 96.]



AIROIDEA (Lat.), n. n. pl. A(a^3)-i^2-ro-i^{2}d′e(e^2)-a^3. A division of gramineous plants made by Wahlenberg, including *Aira, Arundo*, and 6 other genera. [B, 170.]

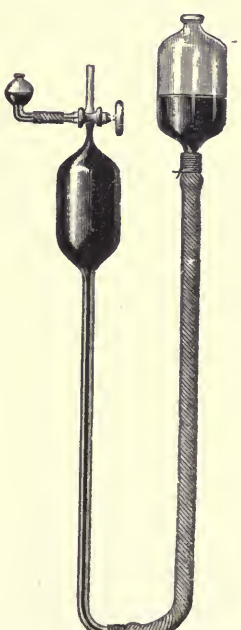
AIROPSIDEÆ (Lat.), n. f. pl. A(a^3)-i^2-ro^{2}p-si^{2}d′e^2-e(a^3-e^2). A tribe of the *Gramineæ*, including *Airopsis* and 2 other genera. [B, 170.]

AIROPSIS (Lat.), n. f. A(a^3)-i^2-ro^{2}p′si^{2}s. A genus of gramineous plants established by Desvaux ; included by Fries as a section of the genus *Aira.* [D, 10, 112, 117.]—**A. agrostidea** [De Candolle]. A species indigenous to Spain, Italy, and France. [D, 101.]—**A. caryophyllea.** A British species. [D. M. (D, 117).]



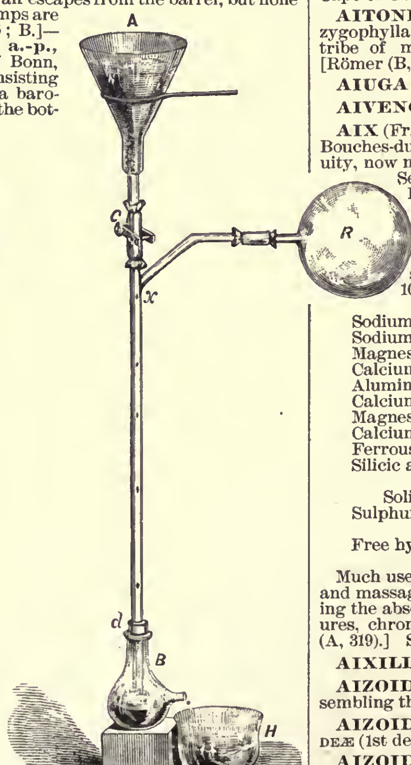
AIR-PASSAGES, n. pl. A^{2}r′pa^{2}s-sa-je^{2}z. Lat., *viæ aeriferæ.* Fr., *voies aëriennes.* Ger., *Luftwege.* It., *vie aeree.* Sp., *vias aeriferas.* 1. The passages through which air reaches the vesicular structure of the lungs, including the nasal passages, the mouth, the larynx, the trachea, and the bronchial tubes. 2. In botany, the air-canals. [A, 321 ; D, 90.]

AIR-PUMP, n. A^{2}r′pu^{3}mp. Fr., *pneumatique, machine* (ou *pompe*) *pneumatique.* Ger., *Luftpumpe.* An apparatus for more or less completely exhausting a closed space of its con-



AIR-PUMP. (AFTER PRIVAT-DESCHANEL.)

tained air, invented by Otto Guericke about 1650. The ordinary a.-p. consists of a receiver, to be exhausted, connected with a barrel and



DOUBLE-BARRELED AIR-PUMP. (AFTER PRIVAT-DESCHANEL.)

piston, the latter provided with a valve opening outward, so that at each stroke a certain amount of air escapes from the barrel, but none can enter. Double-barreled pumps are most commonly used. [A, 376; B.]—**Geissler's a.-p., Mercurial a.-p., Sprengel's a.-p.** Geissler, of Bonn, invented a mercurial a.-p. consisting of a vertical tube, serving as a barometric tube, communicating at the bottom, by means of an India-rubber tube, with a globe serving as a cistern. At the top of the tube there is a three-way stopcock by which communication can be established either with the receiver or with a funnel, the latter having an ordinary stopcock at the bottom. By means of another stopcock communication with the receiver can be opened or closed. The machine is worked by alternately raising the cistern above the level of the funnel stopcock and lowering it, the various stopcocks being opened or closed accordingly. [A, 376.] Sprengel's machine, an improvement on Geissler's, consists of a receiver connected with a vertical tube down which mercury is allowed to pass in a broken column by alternately opening and shutting a stopcock at the top, each separate portion of the column carrying before it a certain amount of air drawn from the receiver. [B.]

GEISSLER'S MERCURIAL AIR-PUMP. (AFTER LOMMEL [A, 304].)

SPRENGEL'S AIR-PUMP. (AFTER PRIVAT-DESCHANEL.)

AIRTHREY, AIRTHRIE, n. A^{2}r'thri^2. The Bridge of Allan; a popular resort in the town of Stirling, in Scotland, 31 miles W. N. W. of Edinburgh, on the river Forth, where there are cold springs containing sodium chloride, calcium chloride, calcium sulphate, and iron. The water is laxative and tonic. [A, 319, 327; D, 79.]

AISNE (Fr.), n. An. See AINE.

AISSELLE (Fr.), n. A-se^{2}l. 1. The armpit. See AXILLA. 2. In botany, an axil (*q. v.*). [D, 106.]

AISTHESIA, AISTHESIS (Lat.), n's f. A(a^3)-i^{2}s-the(tha)'-zi^2(si^2)-a^3, -si^{2}s. See ÆSTHESIS.

AITIA (Lat.), n. f. A(a^3)'i^2-shi^2(ti^2)-a^3. See ÆTIA.

AITIOLOGY, n. A-ti^2-o^{2}l'o-ji^2. See ÆTIOLOGY.

AITION (Lat.), n. n. A(a^3)'i^2-shi^2(ti^2)-o^{2}n. See ÆTIA.

AITIOPIS (Lat.), n. f. A(a^3)-i^2-ti(te)'o-pi^{2}s. See ÆTHIOPIS.

AITMAT, AITRUAD, n's. Alchemical names for antimony. [D, 83, Fallopius (D, 108).]

AITONIA (Lat.), n. f. A-to'ni^2-a^3. Fr., *aitonie.* A genus of meliaceous plants, named in honor of W. Aiton, an English gardener. [A, 248.]—**A. capensis.** A small shrub indigenous to the Cape of Good Hope. [D, 117.]

AITONIEÆ (Lat.), n. f. pl. A-to-ni(ne)'e^2-e(a^3-e^2). 1. A tribe of zygophyllaceous plants including *Aitonia.* [Harvey (B).] 2. A tribe of meliaceous plants including *Aitonia* and *Schizocalyx.* [Römer (B, 170).]

AIUGA (Lat.), n. f. A(a^3)-i^2-u^2(u)'ga^3. See ABIGA.

AIVENON, AIVENOU, n's. The *Lawsonia inermis.* [D, 108.]

AIX (Fr.), n. Ax. A city of Provence, in the department of Bouches-du-Rhone, where there are thermal baths of great antiquity, now not so much used as anciently. [D, 8.]—**A.-en-Savoie.** See *A.-les-Bains.*—**A.-la-Chapelle.** See AACHEN.—**A.-les-Bains.** The *Aquæ allobrogum* (seu *Domitiæ*, seu *Gratianæ*) of the ancient Romans; a village in the department of Savoie, in France, on the road from Lyons to Turin, having an elevated situation, a mild climate, and pure air and water, also sulphurous and aluminous springs, of a temperature of about 45° C., containing in 10,000 parts:

	The sulphur spring.	The alum spring.
Sodium chloride	0·300	0·274
Sodium sulphate	0·327	0·545
Magnesium sulphate	0·735	0·493
Calcium sulphate	0·928	0·781
Aluminium sulphate	0·081	0·003
Calcium phosphate	0·066	traces.
Magnesium carbonate	0·105	0·176
Calcium carbonate	1·894	1·623
Ferrous carbonate	0·010	0·008
Silicic acid	0·479	0·540
Solid constituents	4·925	4·443
Sulphur in the form of hyposulphites	0·0384	0·036
Free hydrogen sulphide	0·0337 to 0·0443	0·0374

Much use is made of various forms of douche, also of frictions and massage. The treatment has been found efficacious in promoting the absorption of exudates, muscular atrophy, caries, contractures, chronic skin diseases, syphilis, and catarrhs. [A. Reumont (A, 319).] See also CHALLES and MARLIOZ.

AIXILLE (Fr.), n. A^{2}x-el. The axilla. [D, 94.]

AIZOID, adj. A^3'i^2-zoid. Fr., *aïzoïdé.* Sp., *aizoideo.* Resembling the *Aizoon.* [D, 10.]

AIZOIDÆ (Lat.), n. f. pl. A(a^3)-i^2-zo'i^{2}d-e(a^3-e^2). See AIZOIDEÆ (1st def.). [Sprengel (B, 170).]

AIZOIDEÆ (Lat.), n. f. pl. A(a^3)-i^2-zo-i^{2}d'e^2-e(a^3-e^2). Fr., *aïzoïdées.* Ger., *Aïzoideen.* 1. An order of plants established by Sprengel, comprising genera now classed under *Tetragoniaceæ* and *Mesembryaceæ.* 2. A family of plants established by Reichenbach, belonging to *Rosifloræ*, and comprising as subdivisions (*a*) the

Atripliceæ (including the orders *Tetragoniaceæ*, *Mesembryaceæ*, *Neuradeæ*, and perhaps also *Phytolaccaceæ*), and (*b*) the *Tamariscineæ*. [B, 170.]

AIZOON (Lat.), n. n. A(a^3)-i^2-zo'o^{2}n. Gr., ἀείζωον. Syn.: *sempervivum*. 1. The houseleek (*Sempervivum tectorum*). 2. The *Sedum album*. 3. A genus of tetragoniaceous (according to Endlicher, portulaceous) herbs established by Linnæus. [D, 10.]—**A. canariense** [Linnæus]. Sp., *siempreviva de México* [Mex. Ph.]. A species indigenous to the Canary Islands, where it is incinerated for the soda which it contains. [D, 79.] It is used in Mexico as a dentifrice and antiscorbutic, and the juice as an astringent. [J. M. Maisch, "Am. Jour. of Pharm.," March. 1886, p. 122.]—**A. hispanicum.** A Spanish species, used as a source of soda. [D, 79.] —**A. paniculatum.** A species indigenous to the Cape of Good Hope. [D, 99.]

AIZOUM (Lat.), n. n. A(a^3)-i^2-zo'u^{3}m(u^{4}m). See AIZOON.

AJA-AJA, n. See AGAR-AGAR.

AJACCIO (It.), n. A^3-ya^{3}t'chi^2-o. A town in Corsica, somewhat popular as a health resort, chiefly on account of the evenness of its temperature. [D, 18.]

AJAME, AJAMI, n's. Japanese names for the *Iris versicolor*. [D, 112.]

AJARAZAT (Ar.), n. See AIARAZATH.

AJAS, n. A Turkish health resort in Galatea, near Angora, where there are hot springs of some repute for the cure of skin diseases. [D, 90.]

AJAVA, AJAVACID, AJAVA-SEEDS, n's. Ajowan. [D.] See AMMI *copticum*.

AJAZARATH (Ar.), n. See AIARAZATH.

AJENJO (Sp.), n. A^3-he^{2}n'ho. See ABSINTHIUM.

AJESCH, n. See AJAS.

AJICUBA, n. Fr., *ajicube*. Sp., *ajicubo*. A Japanese bush bearing a red fruit with black seeds. [D, 10, 90, 112.]

AJIHALID, n. An Egyptian bush, the leaves of which are said to be a remedy for lumbrici. [D, 101.]

AJMUD, n. An East Indian name for the fruit of *Carum* (*Ptychotis*) *roxburghianum*; carminative and stomachic. [D, 90.]

AJNAKSKÖ, n. A Hungarian spring containing free carbon dioxide, a little hydrogen sulphide, calcium sulphate, silica, iron carbonate, calcium carbonate, and a resinous material. [D, 12.]

AJO (Sp.), n. A^3'ho. Garlic (*Allium sativum*). [B.]—**A. cañete, A. castañete, A. castañuelo.** Varieties of *Allium sativum*. [D, 102.]—**A. cebollino.** *Allium schœnoprasum*. [B.]—**A. chalote.** *Allium ascalonicum*. [B.]—**A. cultivado.** *Allium sativum*. [D, 119.]—**A. de Ascalonia.** *Allium ascalonicum*. [B.]—**A. fino.** *Allium scorodoprasum*. [D, 119.]—**A. puerro.** *Allium porrum*. [D, 108.]—**A. victorial.** *Allium victoriale*. [D, 108.]

AJONEC (Ar.), n. See ADEHEMEST.

AJOUAIN, AJOWAEN, AJOWAINS, n's. Ajowan. [D, 18, 90, 117.] See AMMI *copticum*.

AJOWAN, n. See AMMI *copticum*.—**A. raphul.** A Hindûstani name for a stearoptene obtained from the essential oil of a.; the same as thymol. [B; D, 90, 126.]

AJUAGAS (Sp.), n. A^3-hwa^3'ga^{3}z. A sort of ulcer of the hoofs in horses and mules. [D, 102.]

AJUAPAR, n. A South American name for the *Hura crepitans* (*q. v.*). [D, 115.]

AJUBATIPITA, n. A native name for a Brazilian plant, the oil of which is used to improve the respiratory power. [D, 108.]

AJUGA (Lat.), n. f. A^2(a^3)-ju^2(yu)'ga^3. A form of *abiga* (*q. v.*, for deriv.). Fr., *ajuga*. Ger., *Günsel*, *Ginsel*. It., *ajuga*. Sp., *ayuga*. The bugle; a genus of herbaceous plants of the natural order *Labiatæ*, tribe *Ajugoideæ*, established by Linnæus. [B; D.] —**A. chamæpitys** [Schreber]. Fr., *chamœpitys*, *ivette* [Fr. Cod.]. Ger., *Schlagkraut*, *Erdweihrauch*. It., *camepizio*, *iva commune*. Sp., *camepiteo*. Syn.: *Teucrium chamœpitys* [Linnæus] (seu *iva*), *abiga*. The ground-pine; a small annual growing in all parts of Europe and in some parts of the United States. The flowering top, *herba chamœpityos* (seu *ivæ arthriticæ*) is official in the Fr. Cod. The plant was anciently reputed abortifacient. The leaves, which have a strong resinous odor and a bitter balsamic taste, furnish a stimulant, diuretic, and aperient volatile oil. [B, 5, 19; D, 88, 125.]—**A. Dealsingii, A. decumbens.** Himalayan species; the former is used by the natives in quartan ague. [D, 90.] —**A. foliosa.** See *A. genevensis*.—**A. fruticosa.** See ANISOMELES *malabarica*.—**A. genevensis** [Linnæus]. Fr., *bugle de Genève*. A variety of *A. pyramidalis*, indigenous to southern Europe. [B, 97; D, 99.]—**A. iva** [Schreber]. Fr., *ivette musquée* [Fr. Cod.]. Ger., *Bisamgünsel*. Syn.: *Teucrium iva* [Linnæus]. An herb much used by the Arabs in cholera and certain other diseases; the flowering top is official in the Fr. Cod. [D, 125, 126.]—**A. orientalis.** An oriental species having inverted flowers. [D, 99.]—**A. procumbens.** A Chinese species. [D, 124.] See BRUNELLA.—**A. pyramidalis** [Linnæus]. Fr., *bugle pyramidale*. Ger., *Guldengünsel*, *Berggünsel*. Syn.: *Consolida media*. Mountain bugle, indigenous to Sweden, Germany, Switzerland, and England; distinguished by its unbranched lanuginous stalk and dentate leaves. The leaves, *herba consolidæ mediæ* (seu *bugulæ*), are astringent and tonic. [B, 5, 97; D, 88, 99, 108, 132.]—**A. reptans** [Linnæus]. Fr., *bugle* [Fr. Cod.]. *bugle rampante*. Ger., *kriechender Ginsel*, *Wiesengünsel*. It., *erba mora*, *bugola*. Sp., *bugla*, *búgula*. Common, or pasture, bugle; a European species having dull-purplish leaves. The leaves, *herba bugulæ*, have a sweetish-bitter taste, and are slightly astringent; they were formerly reputed a remedy for consumption. [A, 319; B, 19, 97; D, 99.]

AJUGEÆ (Lat.), n. f. pl. A^2(a^3)-ju^2(yu)'je^2(ge^2)-e(a^3-e^2). 1. A tribe of the *Labiatæ*, including *Teucrium* and *Ajuga*. [Grisebach (B, 170).] 2. A tribe including the same and 4 other genera. [Bentham (B, 170).] 3. A sub-order of *Lamiaceæ*, nearly the same as Bentham's *Ajugoideæ*. [Lindley (B, 170).]

AJUGOIDEÆ (Lat.), n. f. pl. A^2(a^3)-ju^2(yu)-go-i^{2}d'e^2-e(a^3-e^2). Fr., *ajugoïdées*. 1. A tribe of labiate plants of which *Ajuga* is the typical genus. [D, 10.] 2. Practically the *Ajugeæ* (2d def.), somewhat modified by subsequent botanists. [Bentham (B, 170).]

AJUGOIDEOUS, adj. A^2-ju^2-go-i^{2}d'e-u^{3}s. Lat., *ajugoideus*. Fr., *ajugoïdé*. Belonging to the *Ajugoideæ*, or resembling the genus *Ajuga*. [D, 10.]

AJURATIBA, n. A Brazilian bush from which an oil is obtained with which the natives anoint their bodies. [D, 112.]

AJVAIN, AJWAIN, AJWAINS, n's. Bengal names for ajowan. See AMMI *copticum*.—**Ajwain-ka-pheúl.** See AJOWAN *raphul*.

AK, n. Ak. See AKE, n.

AK (Hindûstani), n. The *Calotropis gigantea*. [B, 172.]

AKA, n. The New Zealand name for the *Metrosideros scandens*. [L, 67.]

AKAMATHESIA, AKAMATHESIS (Lat.), n's f. A^{2}k(a^{3}k)-a^{2}m(a^{3}m)-a^{2}th(a^{3}th)-ez(as)'i^2-a^3, -e(a)'si^{2}s. Gr., ἀκαμάθησις (contracted from ἀκαταμάθησις). A blunting of the perceptive faculties. —**A. acustica.** See *Psychical* DEAFNESS.—**A. optica.** See *Psychical* BLINDNESS.

AKAMBER, n. A Turkish name for amber. [L, 77.]

AKAMPTISCH (Ger.), adj. A^{3}k-a^{3}mp'ti^{2}sh. Rigid; inflexible. [L, 40.]

AKANIA (Lat.), n. f. A^{2}k(a^{3}k)-a(a^3)'ni^2-a^3. A genus of sapindaceous trees found in East Australia. [L, 67.]

AKANTHACEEN, AKANTHEN (Ger.), n's pl. A^{3}k-a^{3}n-ta^3'-tza-e^{2}n, -ka^{3}n'te^{2}n. See ACANTHACEÆ.

AKANTHUS (Ger.), n. A^{3}k-a^{3}n'tus. See ACANTHUS.—**A'pflanzen.** See ACANTHACEÆ.

AKANTUHIA, n. A Tahiti name for the *Cassia occidentalis*. [L, 49.]

AKAR-KANTA (Hindûstani), n. The *Alangium hexapetalum*. [B, 172.]

AKAROA, n. A Maori name for the *Plagianthus betulinus*. [L, 67.]

AKAROIDHARZ (Ger.), n. A^{3}k-a^{3}r-o'i^{2}d-ha^{3}rtz. See *Acaroid* RESIN.

AKASA-GHEROODA, n. A Teloogo name for *Bryonia epigæa*. [B, 172.]

AKASGIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}z(a^{3}s)'ji^2(gi^2)-a^3. See AKAZGINE.

AKASGINE, n. A^{2}k-a^{2}z'jen. See AKAZGINE.

AKASHA-VULLE (Hindûstani), **AKASH-BULLEE** (Bengali), n's. The *Cassyta filiformis*. [B, 172.]

AKAZGA, n. An African word. Syn.: *Boundou* or *M'boundou*, *quai*. A poisonous plant growing on the west coast of Africa, probably belonging to the genus *Strychnos*. Its stem is about 6 feet high and nearly an inch thick, covered with an adherent, sometimes tubercular, bark, which is distinguished by its parenchyma cells being disposed in a continuous layer 3 or 4 cells deep. The leaves are ovate-acuminate, and from 3 to 6, sometimes 12, inches in length. The seeds are sub-globular, ⅜ inch in diameter, and provided with a central cavity. The bark and other parts have a bitter, somewhat aromatic, taste and contain *akazgine* (*q. v.*) and another alkaloid answering to some of the tests of strychnine. [Heckel and Schlagendauffen (B, 2, 5; L, 65).]

AKAZGIA (Lat.), n. f. A^{2}k(a^{3}k)-a^{2}z(a^{3}z)'ji^2(gi^2)-a^3. Akazgine. [L.]

AKAZGINE, n. A^{2}k-a^{2}z'jen. Fr., *akazgine*. Ger., *Akazgin*. It., *akazgina*. An alkaloid obtained from akazga by T. R. Fraser; a colorless, difficultly crystallizable substance, forming colorless salts with acids, and having an action similar to that of strychnine. [B, 2, 5, 10, 81.]

AKAZIE (Ger.), n. A^{3}k-a^{3}tz'i^2-e^2. Acacia.—**A'nbaum.** The false acacia or locust-tree (*Robinia pseud-acacia*). [B.]—**A'nfrucht.** The fruit of *Prunus spinosa*. [L, 30.]—**A'ngummi.** Gum acacia; gum arabic. [B.]—**A'nsaft.** See ACACIÆ *veræ succus* and ACACIA *nostras*.—**Amerikanische A.** See *A'nbaum*.—**Farnesische A.** *Acacia farnesiana*. [B, 131.]—**Unechte A.** See *A'nbaum*.

AKAZIN (Ger.), n. A^{3}k-a^{3}tz'i^{2}n. Acacin; gum arabic. [L, 30.]

AKCETHINE, n. A^{2}k'se^{2}th-en. Fr., *akcéthine*. A substance formed by the action of sulphur and ammonia upon acetone. According to some, it is the same as thiacetonine. [L, 49.]

AKE, n. Ak. From A.-S., *ac*, *æc*. Better, *ak*. The oak. [B, 39; L, 73.]

AKE, v. intr. Ak. See ACHE. [B, 39; L, 73.]

AKEBIA (Lat.), n. f. A^{2}k(a^{3}k)-e(a)'bi^2-a^3. From the Japanese name *akebi-kadsura*. Fr., *akébie*. A genus of plants belonging to the *Lardizabaleæ*, established by Decaisne. [B, 175; L, 64.]—**A. quinata** [Decaisne]. Syn.: *Rajania quinata*. A Japanese species the fruit of which is an emollient. [L. 67.]

AKEE, n. Fr., *akée*. Also written *aki*. An African term for the fruit of *Blighia sapida* or the tree itself. [L, 67, 87.]

AKÉE (Fr.), n. A^3-ka. Akee.—**A. d'Afrique.** The *Akeesia africana*. [B, 173.] See BLIGHIA *sapida*.

AKEESIA (Lat.), n. f. A^{2}k-ez'i^2-a^3. For deriv., see AKEE. Fr., *akeesie.* Tussac's name for a genus of sapindaceous trees, found in Africa and the West Indies, now referred to *Blighia* or *Cupania.* [B; L, 105, 109.]—**A. Africana** [Tussac]. See BLIGHIA *sapida.*

AKEL (Ar.), n. The *Contorta* of Good's "Nosology." [L, 83.]

AKELEI (Ger.), n. A^{3}k'e^{2}l-i. 1. The columbine. [L, 37.] See AQUILEGIA. 2. A whitlow. [L, 57.]—**Gemeiner A.** *Aquilegia communis.* [L, 80.]

AKENA, AKENIUM (Lat.), n's f. and n. A^{2}k(a^{3}k)-e(a)'na^3, -ni^2-u^{3}m(u^{4}m). Fr., *akène.* See ACHÆNIUM.

AKÉNOCARPE (Fr.), n. A^3-ka-no-ka^{3}rp. See ACHÆNOCARP.

AKÉOMINE (Fr.), n. A^3-ka-o-men. See *Teinture de* NOIX DE GALLE *composée.*

AKÉRATODIAPHANIE (Fr.), n. A^3-ka-ra^{3}t-o-de-a^{3}f-a^{3}n-e. From α priv., κέρας, a horn, and διαφανής, transparent. A corneal opacity. [L, 82.]

AKERATOPHOROUS, adj. A^{2}k-e^{2}r-a^{2}t-o^{2}f'o^{2}r-u^{3}s. From α priv., κέρας, a horn, and φορεῖν, to bear. Not provided with horns. [B, 39.]

AKERSPIRE, n. A^{2}k'u^{5}r-spir. See ACROSPIRE.

AKESTOMA (Lat.), n. n. A^{2}k(a^{3}k)-e^{2}s-to'ma^3. Gen., *akesto'-matos* (*-is*). From ἀκεῖσθαι. to heal. Ger., *Akestom.* A new growth made up of granulations; granulation tissue. [L, 54.]

AKHEZET (Ar.), n. Tetanus. [L, 83.]

AKHIL AL-MELECH (Ar.), n. Or *ajel-melekh* [Forskål]. A medicinal plant among the Arabs; according to Forskål, *Trigonella hamosa* [B, 174], or perhaps *Melilotus ægyptiaca.* [B, 121.]

AKHROOTIE (Malay), **AKHROT** (Hindústani), n's. The *Aleuritis triloba.* [B, 172.]

AKI, n. See AKEE and BLIGHIA *sapida.*

AKIBOT, n. From Ar., *al-kibrît.* An old name for sulphur. [B; L, 53.]

AKIDO-GALVANO-CAUTERY, n. A^{2}k'''i^{2}d-o-ga^{2}l''va^{2}n-o-ka^4'te^{2}ri^2. From ἀκίς, a point, and *galvano-cautery.* Mild galvanic cauterization with a needle-electrode connected with a battery not specially intended for cautery purposes. [Heitzmann, "St. Louis Courier of Med.," Jan., 1882 (A).]

AKINESIA (Lat.), n. f. A^{2}k(a^{3}k)-i^{2}n-ez(as)'i^2-a^3. Fr., *akinésie.* Ger., *Akinesie.* See ACINESIA.—**A. iridis.** Fr., *akinésie de l'iris.* Ger., *Starrheit der Regenbogenhaut.* It., *immobilità dell' iride.* Sp., *inmovilidad* (*ó rigidez*) *del iris.* An obsolete term meaning rigidity or immobility of the iris. [F.]

AKINESIC, adj. A^{2}k-i^{2}n-ez'i^{2}k. See ACINESIC and ACINETIC.

AKINESIS (Lat.), n. f. A^{2}k(a^{3}k)-i^{2}n-e(a)'si^{2}s. Gen., *akines'ios* (*-is*). See ACINESIA.—**Cerebral a.** Fr., *akinésie cérébrale.* Ger., *cerebrale Akinesie.* It., *acinesi cerebrale.* Sp., *aquinesia cerebral.* A. the cause of which lies in the cerebrum; especially an a. of which the producing lesion is seated in the middle line of the encephalon or in both hemispheres at the same time. [D, 70.]—**Crossed a.** Fr., *akinésie croisée.* Sp., *aquinesia cruzada.* A motor paralysis occurring on the side of the body opposite to that in which the causative lesion is situated. [D, 70.]—**Reflex a.** Disease of the reflex mechanism producing diminution or absence of reaction to stimuli. [D, 35.]—**Spinal a.** Fr., *akinésie spinale.* Ger., *spinale Akinesie.* It., *acinesi spinale.* Sp., *aquinesia espinal.* A. due to lesion of the spinal cord. [D, 70.]

AKIRUT, AKIRUT JOWZ, n's. See AKROOT.

AKIURGIE (Fr. and Ger.), n. A^{3}k-i^2-ur-zhe, -ge'. See ACIDURGIA.

AKKARAKAROUN (Tamil), n. The *Anacyclus pyrethrum.* [L, 77.]

AKLEI, AKLEY (Ger.), n. A^{3}k'li. See AKELEI.

AKMELLE (Ger.), n. A^{3}k-me^{2}l'le^2. Acmella.—**A'nsamen.** Acmella seeds.—**Deutsche A.** *Bidens cernua.* [L, 80.]

AKNA-RAHO (Hung.), n. An alkaline chalybeate spring in Austro-Hungary. [L, 63.]

AKNA-SUGATAGH (Hung.), n. A saline mineral spring in Austro-Hungary. [L, 63.]

AKNA-SZLATINA (Hung.), n. Salt baths at the salt mines of Szlatina in Austro-Hungary. [L, 63.]

AKNÉMIE (Fr.), n. A^{3}k-na-me. 1. See ACNEMIA. 2. One affected with acnemia. [L, 41, 49.]

AKOËMETER (Ger.), n. A^{3}k-o'e^{2}m-a-te^{2}r. See ACOUMETER.

AKOKO, n. A Kanaka name for a species of *Euphorbia,* the juice of which is used as an application to ulcers. [L, 63.]

AKOLA (Hindústani), n. The *Alangium hexapetalum.* [B, 172.]

AKOMETER (Ger.), n. A^{3}k-o'me^{2}t-e^{2}r. See ACOUMETER.

AKONITON, AKONITOS (Lat.), n's n. and m. A^{2}k(a^{3}k)-o-ni-(ne)'to^{2}n, -to^{2}s. Gr., ἀκόνιτον, ἀκόνιτος. Names given by Theophrastus and other Greek authors to plants belonging to *Aconitum* or allied to that genus. [B, 115; L, 65.]

AKOOGEL A SEMOOROOMIE, AKOOPELA SEMOONIROOMIE (Ar.), n's. The *Amyris gileadensis.* [L, 105.]

AKORWURZ (Ger.), n. A^{3}k'or-vurtz. The *Acorus calamus.* [L, 43.]

AKOSMOI (Lat.), n. m. pl. A^{2}k(a^{3}k)-o^{2}z(o^{2}s)'moi. Gr., ἄκοσμοι. Bald persons. [G.] See under ACOSMIA.

AKRA, n. An Indian name for the *Vicia sativa.* [L, 67.]

AKRATOTHERME (Ger.), n. A^{3}k'ra^{3}t-o-tar-me^2. Syn.: *indifferente Therme.* A mineral water poor in saline constituents and effective by its heat alone. [B, 20.] Cf. ACRATOPEGÆ.

AKRET (Ar.), n. Aphoria. [L, 83.]

AKRITOCHROMATIE (Ger.), n. A^{3}k-ri^{2}t-o-ch^{2}ro-ma^3-te'. See ACRITOCHROMACY.

AKROKARP (Ger.), adj. and n. A^{3}k'ro-ka^{3}rp. Acrocarpous. As a n. pl., *A'e,* the *Acrocarpæ.* [B, 49.]

AKROOT, n. Also written *akirut* and *akirut jowz.* 1. An Indian name for the walnut (*Juglans regia*). [L, 77, 105, 117.] 2. See AKHROT.

AKROSPOREN (Ger.), n. pl. A^{3}k'ro-spor-e^{2}n. See ACROSPORÆ.

AKROTERIEN (Ger.), n. pl. A^3-kro-te^2-re'e^{2}n. See ACROTERIA.

AKSIS, n. A^{2}k'si^{2}s. An old English form for access; ague, fever. [B, 39.]

AKTINIEN (Ger.), n. pl. A^{3}k-ti^2-ne'e^{2}n. See ACTINIÆ.

AKULKARA (Ar.), n. Pellitory (*Anacyclus pyrethrum*).

AKULONION (Lat.), n. n. A^{2}k(a^{3}k)-u^2(u)-lo'ni^2-o^{2}n. A name applied by Dioscorides to the genus *Lychnis.* [B, 121.]

AKUMETER (Ger.), n. A^{3}k'u-ma-te^{2}r. See ACOUMETER.

AKUND (Hindústani), n. The *Calotropis gigantea.* [B, 172.]

AKUR KHURA (Ar.), n. See AKULKARA.

AKURGIE (Ger.), n. A^{3}k-ur-ge'. See ACIDURGIA.

AKUSIMETER, AKUSIOMETER (Ger.), n's. A^{3}k'us-i^2-ma-te^{2}r, -i^2-o^{2}m'a-te^{2}r. See ACOUMETER.

AKUSTICUS (Ger.), n. A^3-kus'ti^2-kus. The auditory nerve. See ACUSTICUS.

AKUSTICUSKERN (Ger.), n. A^3-kus'ti^2-kus-karn. Also written *Acusticuskern.* The auditory nucleus.—**Aeusserer A.** See *Superior auditory* NUCLEUS.—**Innerer A.** See *Inner auditory* NUCLEUS.—**Obere Abtheilung des vorderen A's.** The superior auditory nucleus. [I, 17.]—**Oberer A.** See *Superior auditory* NUCLEUS.

AKUSTICUSWURZEL (Ger.), n. A^3-kus'ti^2-kus-vurtz-e^{2}l. The root of the auditory nerve.—**Aeussere A.** The external (superior) root of the auditory nerve. [I, 17.]

AKWA, n. A Japanese name for the *Cucumis sativa.* [L, 105.]

AKYSTIQUE (Fr.), adj. A^3-ki^{2}s-tek. Having no swimming-bladder. [L, 41.]

AL (Hindústani), n. The *Morinda citrifolia.* [B, 172.]

ALA (Lat.), n. f. A(a^3)'la^3. Gr., πτέρυξ, πτερύγιον. Fr., *aile.* Ger., *Flügel.* It., Sp., *ala.* A wing or wing-like structure. 1. The wing of a bird or insect. 2. The axilla (obsolete). 3. The whole arm or shoulder. 4. In animals, the shoulder-blade. 5. Any wing-like process of a bone, muscle, or other part of the body. 6. The pavilion of the ear. 7. One of the two wing-like lateral portions of each piece of the shell of a cirripede, when such portion is overlapped by the portion adjacent. Cf. RADIUS. 8. In botany, any thin membranous wing-like projection upon a plant, especially one of the lateral petals of a papilionaceous flower, or a membranous lateral expansion of a seed or a stalk; also the axil or axilla. [A; B, 1, 19, 77, 100; L, 48, 53, 66, 67.]—**A. alba lateralis.** The glosso-pharyngeal nucleus. [L, 2.]—**A. alba medialis.** The hypoglossal nucleus. [I, 6.]—**A. auriculæ, A. auris.** The pinna of the ear. [L, 50.]—**A. brevis.** Ger., *kurzer Flügel.* A bird's wing which when folded does not reach beyond the sides of the coccyx. [B, 7.]—**A. calcarata.** A bird's wing of which the carpus is provided with one or two horny spurs. [B, 7.]—**A. cinerea.** Fr., *aile grise.* A small triangular tract of gray matter in the lower part of the fourth ventricle of the brain, the base of which corresponds to the point of the calamus, while its apex extends upward almost to the striæ medullares. According to Stilling, it gives origin to part of the vagus roots. [I, 6.]—**A. descendens.** The pterygoid process of the sphenoid bone. [L, 117.]—**Alæ diaphragmatos.** The lateral segments of the diaphragm. [L.]—**A. elongata.** A bird's wing the length of which when folded equals or exceeds that of the body. It comprises *A. longa* and *A. perlonga.* [B, 7, 48.]—**A. ethmoidalis.** A wing-like expansion on the extremity of the crista galli of the ethmoid bone. [L, 114.]—**A. extrema.** See ALULA.—**A. fornicis.** The posterior pillar of the cerebral fornix. [I, 3.]—**A. impennata.** A bird's wing the plumes of which are equal in length, loose, and unsuited for flying. [B, 7.]—**Alæ internæ clitoridis.** It., *ali della vulva.* The labia minora of the vulva. [L, 104.]—**Alæ laterales.** 1. See *Alæ magnæ ossis sphenoidei.* 2. See *Alæ spinæ nasalis.* [L, 31, 115.]—**Alæ laterales ossis sphenoidei.** See *Alæ magnæ ossis sphenoidei.* [L, 31.]—**A. longa.** Ger., *langer Flügel.* A bird's wing which is of such a length as to reach just to the tip of the tail. [B, 48.]—**A. longissima.** Ger., *äusserst langer Flügel.* A bird's wing which extends far beyond the tip of the tail. [B, 48.]—**A. magna.** One of the *alæ magnæ ossis sphenoidei.* [L, 31.]—**Alæ magnæ ossis sphenoidei, Alæ magnæ ossis sphenoidis, Alæ majores.** Fr., *grandes ailes du sphénoïde.* Ger., *grosse Flügel des Keilbeins.* It., *ali grandi dello sfenoide.* Syn.: *alæ laterales* (seu *temporales*), *alisphenoidalia.* The great, or temporal, wings of the sphenoid bone; the wing-like processes projecting from each side of the body of the bone. They present 3 surfaces: a cerebral, forming a part of the base of the skull; an orbital, forming a part of the outer wall of the orbit; and a temporal, forming a part of the temporal and zygomatic fossæ. The posterior extremities terminate in the spinous process which is inserted in the angle between the squamous and petrous portions of the temporal bone. The alæ magnæ are separated from the *alæ parvæ ossis sphenoidei* by the sphenoidal fissure, and contain constantly 3 foramina, the foramen rotundum, foramen ovale, and foramen spinosum. [L.]—**A. mediocris.** A bird's wing which, when folded, is of a sufficient length to cover the base of the tail. [B, 7.]—**Alæ minimæ ossis sphenoidei.** Two small bony processes on each side of the ethmoidal spine of the sphenoid bone. [L, 34.]—**Alæ minores clitoridis.** The labia minora of the vulva. [L, 104.]—**Alæ minores**

ossis sphenoidei. See *Alæ parvæ ossis sphenoidei.*—**Alæ muliebres minores.** The labia minora of the vulva. [L, 63, 68.]—**Alæ narium, Alæ nasi.** Fr., *ailes du nez.* Ger., *Nasenflügel.* It., *ali del naso.* The lower lateral cartilages of the nose. [A; L.]—**Alæ of the sacrum.** Fr., *ailes du sacrum.* The wings of the sacrum; the triangular portions of the bone, on each side, which stand out laterally and are made up of outgrowths from the central portion fused together at their extremities; the supposed analogues of ribs. [A.]—**Alæ of the thyreoid cartilage.** The lateral flat portions of the thyreoid cartilage which unite anteriorly. [L.]—**Alæ of the vomer.** See *Alæ vomeris.*—**Alæ orbitales ossis sphenoidei.** See *Alæ parvæ ossis sphenoidei.*—**Alæ ossis sphenoidalis.** Fr., *ailes du sphénoïde.* Ger., *Flügel des Keilbeins, Keilbeinflügel.* It., *ali dello sfenoide.* The wing-like processes of the sphenoid bone. [A; L.] See *Alæ magnæ ossis sphenoidei, Alæ minimæ ossis sphenoidei, Alæ parvæ ossis sphenoidei,* and *Alæ ossis sphenoidei descendentes.*—**Alæ ossis sphenoidei descendentes.** Ger., *Gaumenflügel.* The pterygoid plates of the sphenoid bone. [L, 117.]—**A. palatina.** The pterygoid process of the sphenoid bone. [L.]—**Alæ parvæ Ingrassiæ, Alæ parvæ ossis sphenoidei.** Fr., *petites ailes du sphénoïde.* Ger., *kleine Flügel des Keilbeins.* It., *ali piccole dello sfenoide.* Syn.: *alæ orbitales* (seu *minores*) *ossis sphenoidei, processus ensiformes ossis sphenoidei, orbitasphenoidalia.* The lesser, or orbital, wings of the sphenoid bone; wing-like processes projecting from the upper part of each side of the body of the bone. A portion of the anterior lobes of the brain rests upon their upper surface; the lower surface forms the back part of the roof of the orbit; in their base they contain the foramen opticum, and a projection from each near the sella turcica forms the anterior clinoid process. [L.]—**A. perlonga.** Ger., *sehr lange Flügel.* A bird's wing of such a length as to extend a little beyond the tip of the tail. [B, 48.]—**A. perquam brevissima.** Ger., *äusserst kurzer Flügel.* A bird's wing which is so short as not to reach the base of the tail. [B, 48.]—**A. pontis.** Ger., *Flügel der Brücke.* Reichert's term for what Henle calls the *ponticulus,* a small transverse ridge between the pyramids of the medulla oblongata and the pons Varolii. [A.]—**Alæ processus vermiformis lobuli centralis.** Ger., *Flügel des Centralläpchens.* The lamellæ connected with the lobus centralis of the superior vermiform process of the cerebellum. [L, 63.]—**Alæ pterygoideæ.** The pterygoid processes of the sphenoid bone. [L, 63.]—**Alæ pudendi muliebris.** The labia majora and minora of the vulva. [L, 63.]—**Alæ pulmonum.** Fr., *ailes du poumon.* Ger., *Lungenflügel.* Syn.: *lobi pulmonum.* The lobes of the lungs; also the lungs themselves. [L.]—**Alæ septi cartilagineæ narium.** The superior and inferior lateral cartilages of the nose. [L, 63.]—**Alæ spinæ nasalis.** Syn.: *alæ laterales.* Wing-like processes on each side of the nasal spine of the frontal bone. [L, 31.]—**A. spuria.** See ALULA.—**A. sublonga.** Ger., *fast langer Flügel.* A bird's wing of such a length as not quite to reach to the tip of the tail. [B, 48.]—**Alæ temporales ossis sphenoidei.** Ger., *Temporalflügel.* See *Alæ magnæ ossis sphenoidei.*—**A. uvulæ.** A thin medullary lamina extending from the posterior part of the uvula of the cerebellum to the amygdalæ. [I, 6.]—**Alæ vespertilionis.** Ger., *Fledermausflügel.* It., *ali dell' utero.* Literally, the bat's wings; the broad ligaments of the uterus, from their resemblance to the outspread wings of a bat. [A.]—**Alæ vomeris.** The alæ of the vomer; the two divisions of the superior thick border of the vomer which fit under the body of the sphenoid, receiving the rostrum of the latter into the groove between them. [C.]—**Alæ vulvæ.** The labia minora. [L, 50.]—**Hircus alarum.** See under HIRCUS.

ALABA, n. See ALABE.

ALABARI, n. Ar., *al-abâr,* lead. An alchemical term for lead. [B, 52.]

ALABASTER, n. A^{2}l-a^{2}b-a^{2}s'tu^{5}r. From ἀλάβαστρος, said to be derived from a town, Alabastron, in Upper Egypt, where a. was obtained. Lat., *alabastrites* (1st def.), *alabaster, alabastrum.* Fr., *albâtre.* Ger., *Alabaster.* Sp., *alabastro.* 1. A name given to several calcareous minerals distinguished by their translucency and susceptibility of a polish. 2. Alabastrum (*q. v.*). [B.]—**Alabastri capparidis** (Lat.). Capers. See CAPPARIS *spinosa.*—**A.-glass.** See *Alabaster* GLASS.—**A'stein** (Ger.). See *A.* (1st def.).—**Common a.** Ger., *Gipsalabaster.* A compact mineral, capable of receiving a high polish, consisting of calcium sulphate (gypsum), with traces of iron oxide; obtained chiefly from Italy and employed for ornamental purposes. [B, 7, 49, 77.]—**Gipsa'** (Ger.). See *Common a.*—**Kalka'** (Ger.). See *Oriental a.*—**Oriental a.** Ger., *Kalkalabaster.* A mineral found in limestone caverns in the form of stalactites and in other places where water containing lime in solution is present. It consists of a fibrous translucent form of calcium carbonate. [B, 49, 77.]

ALABASTER CAVE, n. A^{2}l-a^2-ba^{2}s'tu^{5}r kav. A cave in El Dorado County, California, containing a mineral spring rich in calcium salts. [B, 15.]

ALABASTRINUS (Lat.), adj. A^{2}l(a^{3}l)-a^{2}b(a^{3}b)-a^{2}s(a^{3}s)-tri(tre)'-nu^{3}s(nu^{4}s). Of or pertaining to alabaster; resembling alabaster. [B, 78.] See UNGUENTUM *alabastrinum.*

ALABASTRON (Lat.), n. n. A^{2}l(a^{3}l)-a^{2}b(a^{3}b)-a^{2}s(a^{3}s)'tro^{2}n. A sort of ointment. [L, 104.]

ALABASTRUM, ALABASTRUS (Lat.), n's n. and m. A^{2}l(a^{3}l)-a^{2}b(a^{3}b)-a^{2}s(a^{3}s)'tru^{3}m(tru^{4}m), -tru^{3}s(tru^{4}s). Gr., ἀλάβαστρον, ἀλάβαστρος. Also written *alabaster* (*q. v.*). The form *alabastrus* is not classical. 1. A box for holding ointment. [Pliny.] 2. A flower-bud, so called from its resembling a box of ointment. [B, 19; Pliny (B, 134).]

ALABE (Lat.), n. f. A^{2}l(a^{3}l)'a^3-be(ba). Gr., ἀλάβη, a sort of ink. Carbon. [L, 50.]

ALABRI, n. See ALABARI.

ALACAB, ALACAP, n's. From Ar., *al-ɔoqâb,* an eagle. An alchemical term for sal ammoniac. [B, 52; L, 53.]

ALACH (Ger.), n. A^3'la^{3}ch^2. A village near Erfurt, with a weak ferruginous spring.

ALACREATINE, n. A^{2}l-a^{2}k-re'a^{2}t-i^{2}n. From ALANINE and CREATINE. Fr., *alacréatine.* Ger., *Alakreatin.* It., Sp., *alacreatina.* Syn.: *lactyl guanidine.* A base, $C_4H_9N_3O_2$, isomeric with creatine, and formed by the direct combination of alanine with cyanamide. [B, 2.]

ALACREATININE, n. A^{2}l-a^{2}k-re-a^{2}t'i^{2}n-i^{2}n. From ALANINE and CREATININE. Fr., *alacréatinine.* Ger., *Alakreatinin.* It., Sp., *alacreatinina.* A body, isomeric with creatinine, obtained by the dehydration of alacreatine, and forming long prismatic crystals of the composition $C_4H_7N_3O = CH_3.CH.NH(CO.NH):C:NH$; usually associated with one molecule of water of crystallization. [B, 2, 4.]

ALACTIA (Lat.), n. f. A^{2}l(a^{3}l)-a^{2}k(a^{3}k)'ti^2-a^3. Fr., *alactie.* Ger., *Alaktie.* See AGALACTIA.

ALACUOTH, n. An Arabic term for one who defecates during coition. [L, 53.]

ALADY, n. A Hindûstani name for the *Curcuma longa.* [L, 105.]

ALÆFORM, adj. A^{2}l'e-fo^{3}rm. See ALIFORM.

ALAFI, n. See ALKALI. [L, 53.]

ALAFOR, ALAFORT, n's. See ALKALI.

ALAFREG, n. A kind of white lead. [L, 53.]

ALAGAO, n. Syn.: *arago, tongay* (1st def.). 1. A shrub growing in the Philippines, used in diseases of the head and stomach. [L, 109.] 2. The sacrum or coccyx. [L, 45.]

ALAGHEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-a^{2}g(a^{3}g)'e^2-e(a^3-e^2). See ALHAGEÆ.

ALAGI, n. See ALHAGI.

ALAHABAR, n. See ALABARI.

ALAHATIBIS, n. See LAPIS *rubeus.*

ALAHIC, n. An alchemical name for an oven, also for charcoal or carbon. [L, 63.]

ALAIOS (Lat.), adj. A^{2}l(a^{3}l)-a(a^3)'i^2-o^{2}s. See ALAOS.

ALAIRE (Fr.), adj. A^{3}l-a^{2}r. See ALAR.

ALAIS (Fr.), n. A^{3}l-a. A sub-prefecture of the department of Gar in France, near which are several mineral springs, of which the following are the most important: 1. *Mas de Boac,* not used. 2. *Brouzen,* containing iron and arsenic and used for vaginal douches. 3. *La Marquise.* 4. *La Comtesse,* containing iron, calcium, and magnesium, and having a purgative action. [L, 87.]

ALAISE, ALAIZE (Fr.), n's. A^3-laz. See ALÈZE.

ALALIA (Lat.), n. f. A^{2}l(a^{3}l)-a^{2}l(a^{3}l)'i^2-a^3. From α priv., and λαλεῖν, to talk. Fr., *alalie.* Ger., *Alalie.* Lordat's name for an inability to utter words, especially when such inability is due to injury or disease of the vocal apparatus itself and not to central causes. [B, 108; D.] Cf. APHASIA, DYSLALIA, and PARALALIA.

ALAMAD, n. From Ar., *al-ithmud,* antimony. An alchemical name for antimony. [B; L, 104.]

ALAMBIC (Fr.), n. A^{3}l-a^{3}n^2-bek. See ALEMBIC.

ALAMBICUS (Lat.), n. m. A^{2}l(a^{3}l)-a^{2}m(a^{3}m)'bi^2-ku^{3}s(ku^{4}s). See ALEMBIC.

ALAMED, n. See ALAMAD.

ALAMEDA DE CERVERA (Sp.), n. A^{3}l-a^3-ma'da^3 da tharva'ra^3. A cold chalybeate spring in the province of Ciudad-Real in Spain. [L, 49.]

ALAMEDA WARM SPRINGS, n. A^{3}l-a^3-ma'da^3. Warm springs near San José, in Alameda County, California, containing sulphur, calcium, magnesium, and iron. [B, 15.]

ALAMPES (Lat.), adj. A^2(a^3)-la^{2}m(la^{3}m)'pez(pe^{2}s). Gr., ἀλαμπής. Obscure (said of fevers). [L, 50.]

ALAMUM, n. See ARUM *maculatum.* [L, 105.]

ALAND (Ger.), n. A^3-la^{3}nd'. See ALANT.

ALANDAHAL, n. See ALHANDAL.

ALANDINA (Lat.), n. f. A^{2}l(a^{3}l)-a^{2}n(a^{3}n)-di(de)'na^3. See MORINGA.

ALANFUTA, n. An old name of a vein, situated between the chin and the lower lip, which was cut for the cure of fœtor of the mouth. [L, 53.]

ALANGAZI, n. The name of some South American springs which contain a small amount of chlorides. [L, 49.]

ALANGE (Sp.), n. A^3-la^{3}n'ha. Warm alkaline springs in Spain, near Merida, in the province of Badajoz. [L, 49.]

ALANGI, n. A Malabar name for the *Alangium decapetalum.* [L, 49.] Also written *alingie.*

ALANGIACEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-a^{2}n(a^{3}n)-ji^2(gi^2)-a(a^3)'-se(ke^2)-e(a^3-e^2). From ALANGIUM. Fr., *alangiacées.* Ger., *Alangiaceen.* It., *alangiacee.* Alangiads; Lindley's name for an order of plants, belonging to his alliance *Onagrales,* corresponding to the *Alangieæ* of De Candolle. [B, 170.]

ALANGIACEOUS, adj. A^{2}l-a^{2}n-ji^2-a'shu^{3}s. Fr., *alangiacé.* Of or pertaining to the *Alangiaceæ* or *Alangieæ.* [B.]

ALANGIADS, n. pl. A^{2}l-a^{2}n'ji^2-a^{2}dz. The *Alangiaceæ.* [B, 19.]

ALANGIEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-a^{2}n(a^{3}n)-ji(ge)'e^2-e(a^3-e^2). Fr., *alangiées.* Ger., *Alangieen.* An order of plants whose typical genus is *Alangium;* separated by De Candolle from the *Myrtaceæ,* from which they are distinguished by the anthers being adnate and the fruit one-celled. [B, 19.]

ALANGIER (Fr.), n. A^3-la^{3}n^2-zhe-a. See ALANGIUM.

ALANGILAN, ALANGIULAN, n's. A²l-an²g'i²l-a²n, -i²-u²-la²n. See CANANGA *oil.*

ALANGIUM (Lat.), n. n. A²l(a³l)-a²n(a³n)'ji²(gi²)-u³m(u⁴m). From *alangi* or *alingie*, the Malabar name for *A. decapetalum.* Fr., *alangier.* Syn.: *Angolam* [Adanson], *Angolamia* [Scopoli], *Kara-angolam* [Adanson]. A genus of alangiaceous trees growing in India, established by Lamarck. [B, 19, 170.]—**A. decapetalum** [Lamarck]. Syn.: *Grewia salvifolia* [Linnæus]. Sage-leaved a.; akola, akar-kanta, alangi or alingi-marum, angolam. A species growing in rocky places in Malabar. The juice of the bitter, aromatic root is employed as an anthelminthic and the root itself as a hydragogue cathartic in cases of dropsy, and in the form of a powder as an antidote to snake-bites. [B, 172, 173; L, 49.]—**A. hexapetalum** [Roxburgh]. Kara-angolam. A species growing in Bengal, Malabar, and Africa, having properties similar to those of *A. decapetalum.* and also used as a hydragogue cathartic. [B, 172, 173; L, 49.]—**A. Lamarckii** [Thwaites]. See *A. hexapetalum.*—**A. tomentosum** [De Candolle]. See *A. decapetalum.*

ALANINE, n. A²l'a²n-i²n. Fr., *alanine.* Ger., *Alanin.* It., Sp., *alanina.* Syn.: *lactamic acid, amidopropionic acid.* 1. A body, isomeric with lactamide, sarcosine, and urethane, produced by the action of hydrochloric and hydrocyanic acids upon aldehyd-ammonia, and occurring under the form of prismatic crystals having the composition $C_3H_7NO_2 = CH_3.CH(NH_2).CO.OH$, or that of propionic acid in which amidogen replaces hydrogen in the acid radicle. It may also be regarded as lactic acid in which amidogen replaces hydroxyl. It unites with acids, salts, and metallic oxides to form compounds. 2. A generic term for the series of amic acids of which a. is a type, formed from the hydroxy-acids of the glycollic series, including glycocine (glycollamic acid), a. (lactamic acid), leucine (leucamic acid), etc. [B, 2, 4, 158.]

ALANT (Ger.), n. A³-la³nt'. The genus *Inula.*—**Aechter A.** Elecampane (*Inula helenium*). [L, 80.]—**A'aquavit.** A tincture of *Inula helenium* made with brandy. [A.]—**A'asterwurzel.** Elecampane root. [B, 180.]—**A'beere.** See AALBEERE.—**A'beerstrauch.** The black-currant bush. [L, 46.] See RIBES *rubrum.*—**A'bier.** Beer made from or flavored with elecampane. [A, 305.]—**A'campher.** Fr., *camphre d'aunée.* Syn.: *inulol.* Alant (or elecampane) camphor; a substance having the properties of a camphor, extracted from elecampane root, having probably the composition $C_{10}H_{16}O$, and in taste and odor resembling peppermint. It is one of the constituents of what was formerly known as helenin. [B, 2, 18.]—**A'extract.** Extract of elecampane. See *Extractum* HELENII.—**A'kampher.** See *A'campher.*—**A'meth.** Mead made from or flavored with elecampane. [A, 305.]—**A'salbe.** See *Unguentum* HELENII.—**A'säure.** Alantic acid. [B.]—**A'säureanhydrid.** Alantic anhydride. [D, 18.]—**A'stoff.** Alantin; inulin. [L.]—**A'syrup.** See *Syrupus* ENULÆ.—**A'tinctur.** See *Tinctura* HELENII.—**A'wein.** See *Vinum* ENULÆ.—**A'wurz.** See INULA *helenium.*—**A'wurzel.** Elecampane root; the root of *Inula helenium.* [A.]—**A'wurzel-extract.** See *Extractum* HELENII.—**A'wurzelsalbe.** See *Unguentum* HELENII.—**Brusta'.** *Inula helenium.* [B, 180.]—**Deutscher A.** *Inula germanica.* [L, 80.]—**Echter A.** *Inula helenium.*—**Englischer A.** *Inula britannica.* [L, 80.]—**Grosser A., Grosser officineller A.** *Inula helenium.* [B; L, 80.]—**Klebriger A.** *Inula viscosa.* [B, 180.]—**Meerfenchelähnlicher A.** *Inula crithmifolia.* [B, 180.]—**Starkriechender A.** *Inula graveolens.* [B, 180.]—**Steifhaariger A.** *Inula hirta.* [B, 180.]—**Wahrer A.** *Inula helenium.* [B.]—**Weidenblätteriger A.** *Inula salicina.* [L, 80.]

ALANTIC, adj. A²l-a²n'ti²k. Fr., *alantique.* Derived from elecampane. [B.]—**A. acid.** Fr., *acide alantique.* Ger., *Alantsäure.* Syn.: *inulic acid.* An acid of the composition $C_{15}H_{22}O_3$, formed by the union of a. anhydride with water. [B, 5, 18.]—**A. anhydride.** Fr., *anhydride alantique.* Ger., *Alantsäureanhydrid.* A crystalline substance, $C_{15}H_{20}O_2$, melting at 66° C., obtained from elecampane root and sometimes occurring as a natural efflorescence on roots which have been kept a long time. [B, 18.]

ALANTIN, n. A²l-a²n'ti²n. Lat., *alantinum.* Fr., *alantine.* Ger., *Alantin. Alantstoff.* It., Sp., *alantina.* A name given by Rose to what is now known as inulin. [B, 2, 5.]

ALANTOIS, n. See ALLANTOIS.

ALANTOL, n. A²l-a²n-to²l'. From ALANT and OLEUM. Ger., *Alantöl.* An oily liquid, boiling at 200° C., and having probably the composition $C_{10}H_{16}O$, obtained from elecampane root and forming what used to be known as helenin. [B, 2, 8.]

ALANTOTOXICON (Lat.), n. n. See ALLANTOTOXICON.

ALAOS (Lat.), adj. A²l(a³l)'a(a³)-o²s. Gr., ἀλαός, blind. Obscure, unnoticed. A term applied by Hippocrates to forms of tabes (φθίσις ἀλαή) which are latent or unobserved. [B, 115; L, 50.]

ALAOTOCUS (Lat.), adj. A²l(a³l)-a(a³)-o²t'o²k-u³s(u⁴s). Gr., ἀλαοτόκος (from ἀλαὸς, blind, and τίκτειν, to bring forth). Bringing forth the young blind, as in the case of dogs. [L, 50.]

ALAP (Hung.), n. A town in Hungary containing two mineral springs, *Felso-Alap* (Ger., *Ober-Alap*) and *Also-Alap* (Ger., *Unter-Alap*). These contain in 1,000 parts the following constituents:

	Ober-Alap.	Unter-Alap.
Magnesium sulphate	3·136	4·094
Sodium sulphate	5·711	18·149
Calcium sulphate	1·828	0·260
Sodium chloride	4·186	14·486

At Unter-Alap there is a bathing establishment. [B, 108; L, 63.]

ALAQUECA, n. A native name for a small stone found in India, used as a styptic. [L, 103, 104.]

ALAR, adj. A'la³r. Gr., πτερυγώδης. Lat., *alaris.* Fr., *alaire.* Ger., *flügelförmig, flügelartig* (1st, 2d, 3d def's), *achselständig* (4th def.). It., *alare.* Sp., *alar.* 1. Pertaining to a wing. 2. Pertaining to the shoulder or axilla. 3. Wing-like. 4. In botany, axillary.—**A'arterie** (Ger.). See *Alar thoracic* ARTERY.—**A'ligamente** (Ger.). The lateral ligaments of the knee-joint.—**A'processe** (Ger.). The pterygoid processes of the sphenoid bone.—**A'stücke des Diaphragmas** (Ger.). The lateral segments of the diaphragm. [L, 80.]—**A'vene** (Ger.). See *Alar* VEIN.—**A'venen der Nase** (Ger.). The veins of the alæ of the nose. [L.]

ALARARY, adj. A²l'a²r-a-ri². See ALAR.

ALARES (Lat.), n., m. pl. of *Alaris* (*musculi* understood) for 1st def., or f. pl. (*partes* understood) for 2d def. 1. The pterygoid muscles. 2. See ALÆ *ossis sphenoidalis.* [L, 40, 104.]

ALARIA (Lat.), n. f. A²l(a³l)-a(a³)'ri²-a³. Fr., *alarie.* 1. A genus of *Algæ* (*Oosporeæ*); belonging to the order *Fucoideæ.* [B, 19, 35.] 2. A genus of *Entozoa.* [L.]—**A. esculenta** [Greville]. Badder-locks, hen-ware, murlins, honey-ware. An edible species of *Algæ* found on the coasts of Great Britain. [B, 19, 35.]—**A. vulpis.** The *Holostomum alatum.* [Schrank (L, 8).]

ALARIS (Lat.), adj., and n. m. A²l(a³l)-a(a³)'ri²s. 1. (Adj.) alar. 2. (N. with *musculus* understood.) A name applied to certain muscles.—**A. externus.** See PTERYGOIDEUS *externus.* **A. internus.** See PTERYGOIDEUS *internus.*

ALARTAR, n. See ÆS *combustum.*

ALARY, adj. A²l'a²r-i². See ALAR and *A.* MUSCLES.

ALAS (Ar.), n. The *Myrtus communis.* [L, 105.]

ALASALET (Ar.), n. An alchemical term for sal ammoniac. [L, 84.]

ALASCHIL, n. See ALASHIL.

ALASET, n. See ALASALET.

ALASHIL (Ar.). n. Probably σκίλλα with the Ar., article *Al.* Also written *Alaschil.* Squill (*Scilla maritima*). [B; L, 105.]

ALASTAR (Ar.). n. See ALARTAR.

ALASTROB, n. Ar., *al-osrob*, lead. An alchemical term for lead; or, according to some, for lime. [B, 50, 52; L, 53.]

ALATAN (Ar.), n. See ALATON.

ALATAR, n. See ALARTAR.

ALATE, adj. A'lat. Lat., *alatus.* Fr., *ailé.* Ger., *geflügelt.* It., *alato.* Sp., *alado.* Provided with wings or alæ. [B.]

ALATED, adj. A²l'a-te²d. Alate. [L, 56.]

ALATE-PINNATE, adj. A'lat-pi²n'nat. Of a leaf, pinnate and provided with an alate petiole. [L, 63.]

ALATERN, n. A²l'a-tu⁵rn. See ALATERNUS.

ALATERNE (Fr.), n. A³l-a³-te²rn. The *Rhamnus alaternus.* [B, 173.]—**A. bâtard.** An African variety of *Ceanothus.* [B, 38.]

ALATERNOIDES (Lat.), adj. A²l(a³l)a²t(a³t)-u⁵r(e²r)-no-i(e)'-dez(de²s). Gen., *alaternoid'eos.* From *alaternus*, and εἶδος, likeness. Fr., *alaternoïde.* Resembling the *Alaternus* or *Rhamnus alaternus.*

ALATERNUS (Lat.), n. m. A²l(a³l)-a²t(a³t)-u⁵r(e²r)'nu³s(nu⁴s). Perhaps related to alder. Fr., *alaterne.* Sp., *alaterno.* 1. A plant mentioned by Pliny; the alatern (*Rhamnus alaternus*). 2. A genus made by Tournefort, including the same plant, now referred to *Rhamnus.*—**A. latifolius.** See RHAMNUS *alaternus.*

ALATION, n. A²l-a'shu³n. For deriv., see ALA. The state of being alate or winged; in zoölogy, the form and disposition of the wings of an insect. [B, 39.]

ALATON, n. Also written *alatan.* Gold litharge. [L, 84, 104.]

ALATUS (Lat.), adj. and n. m. A²l(a³l)-a(a³)'tu³s(tu⁴s). 1. (Adj.) alate. 2. (N.) a person in whom the scapulæ project backward like wings. [B; L, 84.]

ALAUDA (Lat.), n. f. A²l(a³l)-a⁴'(a³'u)-da³. Ger., *Lerche.* A lark. In zoology, a genus of insessorial birds, including the larks. [B.]—**A. arvensis** [Linnæus]. Fr., *alouette.* Ger., *Feldlerche.* The common field-lark. Its blood (*sanguis alaudæ*) was formerly given in wine for the relief of colic and of calculous affections. [B, 180; L, 53, 105.]—**Sanguis alaudæ.** Fr., *sang de l'alouette.* Ger., *Lerchenblut.* See *A. arvensis.*

ALAUN (Ger.), n. A³-la³'un. Alum.—**Aethylamina', Aethylammoniuma'.** See ALUMINIUM *and ethylamine sulphate.*—**Aftera'.** See ALUMEN *saccharinum.*—**A'ähnlich.** Resembling alum. [L.]—**A'beize.** An aluminous mordant. [L, 46.]—**A'blumen.** See *Flowers of* ALUM.—**A'erde.** See the major list.—**A'erz.** An aluminous ore; a mineral from which alum is obtained. [A, 305.]—**A'geist.** See *Spiritus* ALUMINIS.—**A'haltig.** Aluminous; containing alum. [L, 43.]—**A'hydrat.** Aluminium hydrate. [A; L.]—**A'kessel.** A pan or boiler used for the evaporation of an aluminous solution in the preparation of alum. [B, 48.]—**A'klystier.** An enema containing alum. [L, 57.]—**A'kuchen.** See ALUM *cake.*—**A'mehl.** See ALUM *meal.*—**A'molken.** Alum whey. See *Serum* LACTIS *aluminatum.*—**A'mutter.** Alum ore. [L, 46.]—**A'mutterlauge.** The mother liquor from which alum has been extracted. [B, 48.]—**A'pulver.** See ALUM *meal.*—**A'pyrophor.** See *Homberg's* PYROPHORUS.—**A'quelle.** An aluminous spring. [L.]—**A'rohlauge.** The "raw liquor" of the alum manufactories; the liquor from which alum is extracted. [B, 37, 48.]—**A'roth.** A red pigment derived from Alaunschlamm. [B, 48.]—**A'salpeter.** Aluminium nitrate. [A, 305.]—**A'salz.** Common alum occurring native. [A, 305.]—**A'sauer.** An adjective which, qualifying the name of a base, denotes the aluminate of that base. [B; L, 46.]—**A'säure.** Aluminic acid. [B.]—**A'schlamm.** A sediment containing iron, occurring as a by-product in the manufacture of alum, and used in the preparation of Alaunroth and other substances. [B, 48.]—**A'stift.** See *Alum* PENCIL.—**A'sulfat, A'sulphat.** Aluminium sulphate. [L, 46.]—**A'vergiftung.** Poisoning with alum. [A, 305.]—**A'wasser.** A medicinal aqueous solution of alum. See *Aqua* ALUMINIS *vitriolata.* In the pl., *A'wässer*, mineral waters

containing alum.—**A'welss.** Purified alumina, used as a pigment. [B, 48.]—**A'wurzel.** Alum-root; the root of *Geranium maculatum* or of *Heuchera americana*. [A, 305; B, 19, 180.]—**A'zucker.** See ALUMEN *saccharinum*.—**Ammoniaka'.** See *Ammonium* ALUM and ALUMINIUM *and ammonium sulphate*.—**Ammoniakchroma'.** Ammonio-chromic alum. [B.] See CHROMIUM *and ammonium sulphate*.—**Ammoniakeisena'.** See IRON *and ammonium sulphate*.—**Ammoniakmangana'.** See MANGANESE *and ammonium sulphate*.—**Ammoniuma', Ammoniumchroma'**, etc. See *Ammoniaka', Ammoniakchroma'*, etc.—**Basischer A.** See *Basic* ALUM.—**Cäsiuma'.** Cæsium alum. [B.] See ALUMINIUM *and cæsium sulphate*.—**Chroma'.** See *Chrome* ALUM and CHROMIUM *and potassium sulphate*.—**Eisena'.** See *Iron* ALUM and IRON *and potassium sulphate*.—**Federa'.** See *Feather* ALUM.—**Gebrannter A.** See ALUMEN *ustum*.—**Gediegener A.** See ALUMEN *de Rocca*.—**Gemeiner A.** Common native alum. [L, 30, 57.]—**Kalia'.** See *Potassium* ALUM, ALUMEN, and ALUMINIUM *and potassium sulphate*. **Kalichroma'.** Potassio-chromic alum. [B.] See CHROMIUM *and potassium sulphate*.—**Kalieisena'.** See IRON *and potassium sulphate*.—**Kalifreier A.** Ordinary alum deprived of its potassium; concentrated alum. [B, 49.]—**Kalimangana'.** See MANGANESE *and potassium sulphate*.—**Kaliuma', Kaliumchroma'**, etc. See *Kalia', Kalichroma'*, etc.—**Koncentrirter A., Konzentrierter A.** See *Concentrated* ALUM.—**Krystallisirter A.** Crystallized alum. [L, 46.]—**Kubischer A.** Cubic alum. [L, 30.]—**Künstlicher A.** Artificial alum. [L, 46.]—**Löslicher A.** See *Concentrated* ALUM.—**Magnesia-Mangana'.** See MANGANESE *and magnesium sulphate*.—**Mangana'.** See *Manganic* ALUM and MANGANESE *and potassium sulphate*.—**Methylamina', Methylammoniuma'.** See ALUMINIUM *and methylamine sulphate*.—**Natriuma', Natriumchroma'.** See *Natrona'* and *Natronchroma'*.—**Natrona'.** Sodium alum. See ALUMINIUM *and sodium sulphate*.—**Natronchroma'.** Sodio-chromic alum. [B.] See CHROMIUM *and sodium sulphate*.—**Natürlicher A.** Native alum. [L, 46.]—**Neutraler A.** See *Neutral* ALUM.—**Poröser A.** See *Porous* ALUM.—**Pseudoa'.** See *Pseudo*-ALUM.—**Roher A.** Crude alum. [L.]—**Römischer A.** See *Roman* ALUM.—**Rubidiuma'.** Rubidium alum. See ALUMINIUM *and rubidium sulphate*.—**Selena'.** See *Selenium* ALUM.—**Silbera'.** See ALUMINIUM *and silver sulphate*.—**Thalliuma'.** See ALUMINIUM *and thallium sulphate*.—**Thonerdea'.** See *Alumina* ALUM.—**Trimethylamina', Trimethylammoniuma'.** See ALUMINIUM *and trimethylamine sulphate*.

ALAUNEN (Ger.), v. tr. A^3-la^3'un-e^{2}n. To prepare with alum; to alum. [L, 46.]

ALAUNERDE (Ger.), n. A^3-la^3'un-e^{2}r-de^2. 1. An earth which yields alum. 2. Alumina. [B, 49.]—**A'nmetalloïd.** Aluminium. [A, 305.]—**Essigsaure A.** Aluminium acetate. [L.]—**Hydratische A., Reine A.** Aluminium hydrate. [B, 165; L, 57.]—**Salpetersaure A.** Aluminium nitrate. [A.]—**Schwefelsaure A.** Aluminium sulphate. [B.]

ALAUNICHT, ALAUNIG (Ger.), adj's. A^3-la^3'un-i^{2}ch^{2}t, -i^{2}g. Alumish; aluminous. [L, 46.]

ALAUNUNG (Ger.), n. A^3-la^3'un-ung. Preparation or mixing with alum.

ALAURAT, n. From Ar., *al-bûraq*, borax (often confounded by the alchemists with nitre). Nitre; potassium nitrate. [B, 52.]

ALAVEREISA (Tamil), n. The *Ficus indica*. [B, 172.]

ALBA (Lat.), n. f. A^{2}l(a^{3}l)'ba^3. Properly the fem. of *albus*, white (*substantia* understood). A name given by B. G. Wilder to the white substance of the central nervous system. [I, 80.]—**A. flora.** A sort of white wine from Minorca. [A, 305.]

ALBACA (Sp.), n. A^{3}l-ba^3'ka^3. The Peruvian name of the sweet basil, which is applied to the nostrils to dislodge maggots. [L, 63.]

ALBADARA, ALBADARAN (Ar.), n's. Also written *aldabaran*. A term applied by the Arabian and Rabbinical sages to a sesamoid bone which, as they taught, was to serve as the germ for the new formation of the body at the resurrection. [A, 305.]

ALBAGENZI, ALBAGIAZI (Ar.), n's. The sacrum. [L, 63, 84.]

ALBAMENTUM (Lat.), n. n. A^{2}l(a^{3}l)-ba^3-me^{2}n'tu^{3}m(tu^{4}m). From *albus*. The white of egg. [B, 59.]

ALBAN, n. A^{2}l'ba^{2}n. From *albus*. Fr., *albane*. Ger., *Alban*. A crystallizable resinous substance obtained, along with fluavil, by boiling gutta percha in absolute alcohol. It has the constitution $C_{10}H_{16}O$, melts at 140° C., and dissolves in ether, in chloroform, and in carbon disulphide. [B, 2, 5.]—**Madûr-A.** A substance, resembling a. in properties but having a different chemical composition, obtained from the juice of *madâr* (*Calotropis gigantea*). ["Ind. Med. Gaz.," Dec., 1885, p. 388.]

ALBANE, n. A^{2}l'ban. See ALBAN.

ALBANO (It.), n. A^{3}l-ba^3'no. A saline chalybeate spring near Rome, Italy. [L, 49.]

ALBANUM (Lat.), n. n. A^{2}l(a^{3}l)-ba(ba^3)'nu^{3}m(nu^{4}m). From Ar., *al-bûl*, urine. "Salt of urine." [L, 53.]

ALBARA (Ar.), n. See ALBARAS.

ALBARA (Port.), n. A^{3}l-ba^{3}r'a^3. A kind of *Canna* (probably the *C. angustifolia* of Linnæus) found in Brazil and used there as a vulnerary. [L, 87.]

ALBARAS, n. Ar., *al-baraç*. Also written *albarras, baras*, and *barras*. A term used by the Arabian writers for a disease of the skin which was attended with alteration of the color of the surface, and, according to some writers, with desquamation. The term is generally regarded as synonymous with the *leuce* of the Greeks, or white leprosy (comprising both certain forms of leprosy and psoriasis, and conditions which used to be classed under morphœa and vitiligo, but which are now referred to leprosy). [A; L, 53.] See *White* LEPROSY.—**A. alba.** See *White* LEPROSY.—**A. nigra.** See *Black* LEPROSY.

ALBARELLE (Fr.), n. A^{3}l-ba^{3}r-e^{2}l. An edible mushroom growing on the chestnut and poplar. [L, 42.]

ALBARAES, n. See ALBARAS.

ALBAROS, n. 1. See ALBARAS. 2. Arsenic. [L, 50.]—**A. alba, A. nigra.** See ALBARAS *alba* and ALBARAS *nigra*.

ALBARRAS, n. See ALBARAS.

ALBASTRUS (Lat.), n. m. A^{2}l(a^{3}l)-ba^{2}s(ba^{3}s)'tru^{3}s(tru^{4}s). See ALABASTRUM.

ALBATA, n. A^{2}l-ba'ta^3. From *albus*. German silver. [B, 39.]

ALBÂTRE (Fr.), n. A^{3}l-ba^{3}tr. Alabaster. [L.]—**A. calcaire.** See *Oriental* ALABASTER.—**A. gypseux.** See *Common* ALABASTER.

ALBATIO (Lat.), n. f. A^{2}l(a^{3}l)-ba(ba^3)'shi(ti^2)-o. Gen., *albatio'nis*. 1. Albation. 2. See ALBIFICATIO (2d def.).

ALBATION, n. A^{2}l-ba'shu^{3}n. From *albus*. Lat., *albatio*. Fr., *albation*. 1. The act of blanching or rendering white. 2. In alchemy, the destruction of a body by incineration in the transmutation of metals. [L, 41, 53.]

ALBATRELLUS (Lat.), n. m. A^{2}l(a^{3}l)-ba^{2}t(ba^{3}t)-re^{2}l'lu^{3}s(lu^{4}s). A genus of *Fungi* comprising *Boletus albidus* and *Boletus fuligineus*. [B, 170.]

ALBE (Ger.), n. A^{3}l'be^2. The *Populus alba*. [L, 46.]

ALBEDO (Lat.), n. f. A^{2}l(a^{3}l)-be(ba)'do. Gen., *albed'inis*. From *albus*. 1. Whiteness. 2. The white inner part of lemon or orange peel. 3. Albification. [B, 180; L, 53, 104.]—**A. aurantiorum, A. corticum citri.** See *A.* (2d def.).—**A. unguinum.** The white part of the nails; the lunule. [G.]

ALBEFACTIO (Lat.), n. f. A^{2}l(a^{3}l)-be^2-fa^{2}k(fa^{3}k)'shi^2(ti^2)-o. Gen., *albefactio'nis*. From *albus*, and *facere*, to make. See ETIOLATION.

ALBEGRAS, n. See ALBARAS.

ALBELE (Ger.), n. A^{3}l-ba'le^2. A provincial name for the *Populus alba*. [L, 46.]

ALBELURI (Ar.), n. Avicenna's name for ammonium chloride. [L, 105.]

ALBENE, n. A^{2}l-ben'. From *albus*, white. A name given by Völckel to a white substance which, according to his observations, remains undissolved when melam is boiled with water. [A, 1.]

ALBENS (Fr.), n. A^{3}l-ba^{3}n^2. A place near Aix-les-Bains, the location of a cold chalybeate spring. [L, 57.]

ALBER, ALBERBAUM (Ger.), n's. A^{2}l'be^{2}r, -be^{2}r-ba^3-um. The *Populus alba*. [L, 46.]

ALBERAS, n. 1. A pustular disease of the face (probably the same as albaras). 2. Staphisagria; so called because reputed to cure a. [L, 104.]

ALBERBAUM (Ger.), n. A^{3}l'barn-ba^3-um. The *Populus alba*. [L, 37.]

ALBERGAINE, ALBERGAME (Fr.), n's. A^{3}l-bar-gan, -ga^{3}m. See AUBERGINE.

ALBERGE (Fr.), n. A^{3}l-barzh. A sort of peach or apricot, the pulp of which is very adherent to the stone. It has been used as a depurative. [B, 52; L, 87.]

ALBERGIER (Fr.), n. A^{3}l-bar-zhe-a. The alberge-tree. [L, 42.]

ALBERGINE (Fr.), n. A^{3}l-bar-zhen. See AUBERGINE.

ALBERIK, n. "Album æris." [L, 53.]

ALBERTEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-bu^{5}r(bar)'te^2-e(a^3-e^2). From *Alberta*, one of the genera, named after Albertus Magnus, the scholastic philosopher. Fr., *albertées*. A tribe of the *Rubiaceæ*, made by Bentham and Hooker. [B, 19, 121.]

ALBERTINIA (Lat.), n. f. A^{2}l(a^{3}l)-bu^{5}r(bar)-ti^{2}n'i^2-a^3. Fr., *albertinie*. Sp., *albertinia*. A Brazilian genus of composite plants. [B; L, 67.]

ALBERTINIEÆ (Lat.), n. f. A^{2}l(a^{3}l)-bu^{5}r(bar)-ti^{2}n-i(e)'e^2-e(a^3-e^2). A section of composite plants, made by De Candolle, in the subdivision *Euvernonieæ* of the tribe *Vernonieæ*, including *Albertinia* and allied genera. [B, 170.]

ALBERTSQUELLE (Ger.), n. A^{3}l'barts-kwe^{2}l-le^2. A chalybeate spring in Elster, in Saxony. [L, 57.]

ALBESCENCE, n. A^{2}l-be^{2}s'se^{2}ns. From *albescere*, to become white. The act of becoming white or whitish.

ALBESCENT, adj. A^{2}l-be^{2}s'se^{2}nt. Lat., *albescens*. Fr., *blanchissant*. Ger., *weisswerdend*. Becoming whitish; moderately white. [L, 56, 106.]

ALBESTON, n. An alchemical term for quicklime. [L, 84.]

ALBETAD, n. Galbanum. [L, 84.]

ALBI, n. 1. An old apparatus for applying counter-extension in reducing dislocations of the shoulder. [E.] Cf. AMBE. 2. Corrosive sublimate. [L, 104.]

ALBIAN, n. See ALBINO. [L, 45.]

ALBIBARBIS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-ba^{3}r'bi^{2}s. From *albus*, white, and *barba*, a beard. Fr., *albibarbe*. Ger., *weissbartig*. White-bearded. [L, 116.]

ALBICANS (Lat.), adj. and n. n. A^{2}l(a^{3}l)'bi^2-ka^{2}nz(ka^{3}ns). Gen., *albican'tis*. 1. (Adj.) whitish. [B.] 2. (N.) the corpus a. [Wilder (I, 80).]

ALBICANT, adj. A^{2}l'bi^2-ka^{2}nt. Growing or becoming white. [L, 56.]

ALBICAUDUS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-ka^4'(ka^3'u)-du^{3}s(du^{4}s). From *albus*, white, and *cauda*, a tail. Fr., *albicaude*. Ger., *weissschwanzig*. Having a white tail. [L, 116.]

O, no; O^2, not; O^3, whole; Th, thin; Th^2, the; U, like oo in too; U^2, blue; U^3, lull; U^4, full; U^5, urn; U^6, like ü (German).

ALBICAUL, adj. A^{2}l'bi^2-ka^{4}l. From *albus*, white, and *caulis*, a stem. Lat., *albicaulis*. Fr., *albicaule*. Ger., *weissstengelig*. In botany, having the stem covered with a white down. [L, 107, 116.]

ALBICEPS (Lat.), adj. A^{2}l(a^{3}l)'bi^2-se^{2}ps(ke^{2}ps). Gen., *albicip'itis*. Having a white head. [L, 116.]

ALBICERIS (Lat.), adj. A^{2}l(a^{3}l)-bi^2(be)'se^{2}r(ke^{2}r)-i^{2}s. From *albus*, white, and κέρας, a horn. Fr., *albicère*. See ALBICORNIS.

ALBICOLLIS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-ko^{2}l'li^{2}s. From *albus*, white, and *collum*, the neck. Fr., *albicolle*. Ger., *weisshalsig*. Having a white neck. [L, 116.]

ALBICOMUS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-ko'mu^{3}s(mu^{4}s). From *albus*, white, and *coma*, hair. Having white hair. [L, 58.]

ALBICORNIS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-kor'ni^{2}s. From *albus*, white, and *cornu*, a horn. Fr., *albicorne*. Ger., *weisshornig*. Having white antennæ. [L, 116.]

ALBICOSTATUS, ALBICOSTUS (Lat.), adj's. A^{2}l(a^{3}l)-bi^2-ko^{2}s-ta(ta^3)'tu^{3}s(tu^{4}s), -ko^{2}s'tu^{3}s(tu^{4}s). Fr., *albicosté*. Ger., *weissrippig*. Having white ribs (said of shells). [L, 116.]

ALBID, adj. A^{2}l'bi^{2}d. See ALBIDUS.

ALBIDIPENNIS (Lat.), adj. A^{2}l(a^{3}l)-bi^{2}d-i^2-pe^{2}n'ni^{2}s. From *albidus*, white. and *penna*, a wing. Fr., *albidipenné*. Ger., *weissgeflügelt*. Having white wings. [L, 116.]

ALBIDULUS (Lat.), adj. A^{2}l(a^{3}l)-bi^{2}d-u^2(u)-lu^{3}s(lu^{4}s). Dim. of *albidus*. Somewhat white. [L, 58.]

ALBIDURIA (Lat.), n. f. A^{2}l(a^{3}l)-bi^{2}d-u^2(u)'ri^2-a^3. From *albidus*, white, and οὐρεῖν, to micturate. Albuminuria. [L, 81.]

ALBIDUS (Lat.), adj. A^{2}l(a^{3}l)'bi^{2}d-u^{3}s(u^{4}s). Whitish. [B.] See ANNULUS *a*.

ALBIFICATIO (Lat.), n. f. A^{2}l(a^{3}l)-bi^2-fi^2-ka(ka^3)'shi^2(ti^2)-o. Gen., *albificatio'nis*. 1. Albification. 2. The second "aqua spiritualis" of the alchemists; one of the substances formed in the process of transmutation of metals. [B, 111; L.]

ALBIFICATION, n. A^{2}l-bi^2-fi^2-ka'shu^{3}n. Lat., *albificatio*. Fr., *albification*. Ger., *Weissmachen, Metallbleichung*. It., *albificazione*. Sp., *albificación*. The process of bleaching or making anything white; especially, in alchemy, the rendering metals white in transmuting them into silver. [B; L, 42, 46.]

ALBIFLORUS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-flo'ru^{3}s(ru^{4}s). From *albus*, white, and *flos*, a flower. Fr., *albiflore*. Ger., *weissblumig*. Having white flowers. [L, 116.]

ALBIFRONS (Lat.), adj. A^{2}l(a^{3}l)'bi^2-fro^{2}nz(fro^{2}ns). Gen., *albifron'tis*. White-browed; a specific epithet of some plants, e. g., *Adenostylis a.*

ALBIGO (Lat.), n. f. A^{2}l(a^{3}l)-bi(be)'go. Gen., *albig'inis*. Mildew. [L, 63.]

ALBILABRIS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-la^{2}b(la^{3}b)'ri^{2}s. From *albus*, white, and *labrum*, a lip. Fr., *albilabre*. Ger., *weisslippig*. Having white lips or labra (said of crustaceans with white-spotted labra and of univalve shells with a white border). [L, 116.]

ALBIMANUS (Lat.), adj. A^{2}l(a^{3}l)-bi^2'ma^2(ma^3)-nu^{3}s(nu^{4}s). Fr., *albimane*. Ger., *weisshändig*. Having white hands. [L, 116.]

ALBIMEC, n. Orpiment. [L, 84.] See ARSENIC *trisulphide*.

ALBINA (Sp.), n. A^{3}l-be'na^3. A female albino. [L, 41, 95.]

ALBIN D'ŒUF (Fr.), n. A^{3}l-ba^{2}n^2-du^{5}f. The white of egg. [L, 45.]

ALBINE (Fr.), n. A^{3}l-ben. Aleurone. [B, 121.]

ALBINERVIUS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-nu^{5}r(ne^{2}r)'vi^2(wi^2)-u^{3}s(u^{4}s). From *albus*, white, and *nervus*, a nerve. Fr., *albinervé*. Ger., *weissnervig*. White-nerved, as the leaves of some plants. [L, 116.]

ALBINISM, n. A^{2}l'bi^{2}n-i^{2}zm. From *albino*. Lat., *albinismus, albor nativus, alphosis æthiopica, achromatosis congenialis, leucæthiopia*. Fr., *albinisme, albinie*. Ger., *Leucäthiopie, Leukopathie, Albinismus*. It., *albinismo, leucopatia*. Sp., *albinismo*. Syn.: *Albinoism, kakerlakism*. 1. The state of being an albino (*q. v.*). 2. Congenital achromatosis, either partial or general. See ALBINISMUS *partialis* and *universalis*. 3. The spontaneous decoloration of a plant or its parts. [A; B, 121; G; L, 79.]

ALBINISMUS (Lat.), n. m. A^{2}l(a^{3}l)-bi^{2}n-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). Albinism. [A; F.]—**A. partialis.** Fr., *vitiligo congéniale*. Syn.: *epichrosis pœcilia*. Partial or circumscribed albinism; characterized by congenital white patches of skin, sharply defined, of various sizes, which usually remain unchanged during the life of the individual, but, according to some authors, increase in extent. It has been observed most often in negroes. See VITILIGO and PIEBALD *negro*. [G.]—**A. universalis.** See ALBINISM (1st def.).

ALBINISTIC, adj. A^{2}l-bi^{2}n-i^{2}s'ti^{2}k. Presenting the phenomena of albinism. [L, 56.]

ALBINO, n. A^{2}l-bi(be)'no. From *albus*, white (through Port. and Sp., *albino*). Pl., *a's, a'es*. Lat., *æthiops albus, leucæthiops*. Fr., *albino, albinos, nègre blanc, blafard, kakerlaque*. Ger., *weisser Neger, Kakerlake*. It., Sp., *albino*. A term originally applied by the Portuguese to white negroes met with on the west coast of Africa. ["Encycl. Britann."] A person in whom the normal pigmentation of the epidermis, the hair, the iris, and the choroid is congenitally deficient, the skin being uncommonly white, the hair yellowish, resembling flax or silk in color; and the eyes pinkish and usually affected with photophobia, more or less blepharospasm, and occasionally nystagmus. The term is also applied to the lower animals having like peculiarities. [F; G.] Cf. DONDO, KAKERLAK, and BEDO.—**A.-skin.** See ALBINISM and ALPHOSIS.

ALBINOISM, n. A^{2}l-bi(be)'no-i^{2}zm. Lat., *albinoismus*. Fr., *albinoïsme*. See ALBINISM.

ALBINOS (Fr.), n. A^{3}l-be-no. An albino.

ALBINOTIC, adj. A^{2}l-bi^{2}n-o^{2}t'i^{2}k. Pertaining to an albino; affected with albinism. [B.]

ALBINUM (Lat.), n. n. A^{2}l(a^{3}l)-bi(be)'nu^{3}m(nu^{4}m). The *Gnaphalium murorum*. [L, 30.]

ALBINURIA (Lat.), n. f. A^{2}l(a^{3}l)-bi^{2}n-u^2(u)'ri^2-a^3. From *albus* and οὐρεῖν, to micturate. Fr., *albinurie*. Albuminuria. [L, 30.]

ALBION, n. See ALBINO.

ALBIPENNIS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-pe^{2}n'ni^{2}s. See ALBIDIPENNIS.

ALBIPES (Lat.), adj. A^{2}l(a^{3}l)'bi^2-pez(pe^{2}s). Gen., *albip'edis*. Ger., *weissfussig*. Having white feet. [L, 116.]

ALBIPERLE (Fr.), n. A^{3}l-bi^2-parl. Sp., *albiperla*. A substance mixed with adipocere found by Moretti in a concretion of the abdominal parietes. [L, 43, 95.]

ALBIQUE (Fr.), n. A^{3}l-bek. A kind of chalk. [L, 103.]

ALBIR, n. Pitch obtained from the yew-tree. [L, 84.]

ALBIROSTRIS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-ro^{2}s'tri^{2}s. From *albus*, white, and *rostrum*, a beak. Fr., *albirostre*. Ger., *weissschnabelig*. Having a white beak or snout. [L, 116.]

ALBISBRUNN (Ger.), n. A^{3}l'bi^{2}s-brun. A hydropathic establishment in the Canton of Zurich. [L, 57.]

ALBITARSUS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-ta^{3}r'su^{3}s(su^{4}s). From *albus*, white, and *tarsus* (*q. v.*). Fr., *albitarse*. Ger., *weissfusswurzelig*. Having white tarsi. [L, 116.]

ALBITUDO (Lat.), n. f. A^{2}l(a^{3}l)-bi^2-tu^2(tu)'do. Gen., *albitu'dinis*. See ALBINISM.

ALBIVENIUS (Lat.), adj. A^{2}l(a^{3}l)-bi^2-ve(wa)'ni^2-u^{3}s(u^{4}s). From *albus*, white, and *vena*, a vein. See ALBINERVIUS.

ALBIVENTRAL, adj. A^{2}l-bi^2-ve^{2}n'tra^{2}l. From *albus*, white, and *venter*, the belly. Lat., *albiventer, albiventris*. Fr., *albiventre*. Ger., *weissbauchig*. White-bellied. [L, 116.]

ALBIZZIA (Lat.), n. f. A^{3}l-bi^{2}tz'i^2-a^3. Fr., *albizzie*. Syn.: *Serianthus* [Bentham]. A genus of leguminous plants closely related to *Acacia*, from which they were separated by Durazzini. It comprises two sections, *Eualbizzia* and *Lophantha*. [B, 19, 170.]—**A. anthelminthica.** Syn.: *Acacia* (seu *Besenna*) *anthelminthica*. Besenna, mesenna, kumada; an Abyssinian tree bearing flowers in axillary heads, and having bipinnate leaves composed of one or two pinnæ, each provided with 3 or 4 pairs of obovate leaflets. The bark is highly esteemed by the natives as a remedy for tape-worm. [B, 19.]—**A. lebbek.** See ACACIA *lebbek*.—**A. lophantha** [Bentham]. Syn.: *Acacia lophantha* [Willdenow]. An Australian species growing to a height of about 12 feet and bearing bright-yellow flowers. It is often cultivated. Its crushed roots and seeds give out an odor due perhaps to a mustard oil or some like constituent contained or developed in them. [B, 49; L, 78.]—**A. saponaria.** A species found in India, the bark of which acts like soap, forming a lather with water. [L, 87.]

ALBKRAUT (Ger.), n. A^{3}lb'kra^3-ut. The *Eupatorium cannabinum*. [A, 305.]

ALBODACTYLOUS, adj. A^{2}l-bo-da^{2}k'ti^{2}l-u^{3}s. From *albus*, white, and δάκτυλος, a finger. Lat., *albodactylus*. Fr., *albodactyle*. Having white digitated wings. [L, 110, 116.]

ALBOFLAVESCENS (Lat.), adj. A^{2}l(a^{3}l)-bo-fla^2(fla^3)-ve^{2}s(we^{2}s)'se^{2}nz(ke^{2}ns). From *albus*, white, and *flavescens*, light-yellow. Fr., *jaunâtre*. Ger., *weissgelblich*. Yellowish-white. [L, 63.]

ALBOGUTTATUS (Lat.), adj. A^{2}l(a^{3}l)-bo-gu^{3}t(gu^{4}t)-ta(ta^3)'tu^{3}s(tu^{4}s). From *albus*, white, and *gutta*, a drop. Ger., *weissgefleckt*. Spotted with white. [L, 63.]

ALBOLACTESCENS (Lat.), adj. A^{2}l(a^{3}l)-bo-la^{2}k(la^{3}k)-te^{2}s'se^{2}nz(ke^{2}ns). From *albus*, white, and *lactescens*, milky. Ger., *weissmilchicht*. Milk-white. [L, 63.]

ALBOLITHE (Fr.), n. A^{3}l-bo-let. A cement having magnesium chloride as its base. [L, 77.]

ALBOPUBESCENS (Lat.), adj. A^{2}l(a^{3}l)-bo-pu^2(pu)-be^{2}s'se^{2}nz(ke^{2}ns). From *albus*, white, and *pubescens*, pubescent. Pubescent with white hairs; hoary-pubescent. [L, 63.]

ALBOR, n. From Ar., *al-bûl*, urine. An alchemical name for the urine. [B, 50, 52.]

ALBOR (Lat.), n. m. A^{2}l(a^{3}l)'bor. Gen., *albo'ris*. From *albus*. A whiteness, or something white. Hence: 1. The same as *albatio* and *albificatio*. 2. White of egg. [L, 53, 58.]—**A. cutis.** Achromatosis "diffused over the face or entire body." [G, 11; L, 83.] See ALBINISM (1st def.).—**A. nativus.** Albinism.—**A. ovi.** White of egg. [L, 104.]

ALBORA, n. A name given by Paracelsus to a skin disease resembling leprosy. [L, 53.] The same as ALBARAS (*q. v.*). [B, 52.]

ALBORCA, n. Mercury. [L, 84.]

ALBOSE (Fr.), n. A^{3}l-bos. Epinyctis. [L, 43.]

ALBOT, n. An alchemical term for a crucible. [L, 53.]

ALBOTAI, n. See ALBOTIN.

ALBOTAL, ALBOTAR, n's. Perhaps from Ar., *al-abâr*, molten lead. Cerussa. [B; L, 53, 84.]

ALBOTARSUS (Lat.), adj. A^{2}l(a^{3}l)-bo-ta^{3}r'su^{3}s(su^{4}s). See ALBITARSUS.

ALBOTIM, ALBOTIN, n's. Ar., *al-bot'um*. An old pharmaceutical term for the pine-tree and pine-resin. [B, 52; L, 53.] See also TERMINTHOS.

ALBOTIS, n. Ar., *al-bot'um*. See TERMINTHOS.

ALBO-TOMENTOSUS (Lat.), adj. A^{2}l(a^{3}l)-bo-to-me^{2}n-to'su^{3}s-

(su^{4}s). From *albus*, white, and *tomentosus*, woolly. Ger., *weissfilzig*. Hoary-tomentose. [L, 63.]

ALBOTRA, n. See ALBOTIN.

ALBOUCOR, n. Port., *albafor* (from Ar., *al-bukhûr*). A name formerly given to incense, or the tree furnishing incense; also to various aromatic woods, especially aloes-wood. [B, 52.]

ALBO-VARIEGATUS (Lat.), adj. A^{2}l(a^{3}l)-bo-va(wa^3)-ri^2-e^2-ga(ga^3)'tu^{3}s(tu^{4}s). From *albus*, white, and *variegatus*, variegated. Ger., *weissgefleckt*. White-spotted. [L, 63.]

ALBO-VILLOSUS (Lat.), adj. A^{2}l(a^{3}l)-bo-vi^{2}l(wi^{2}l)-lo'su^{3}s(su^{4}s). From *albus*, white, and *villosus*, shaggy. Ger., *weisszottig*. Hoary-villous; covered with tufts of white hair. [L, 63.]

ALBO-VITTATUS (Lat.), adj. A^{2}l(a^{3}l)-bo-vi^{2}t(wi^{2}t)-ta(ta^3)'-tu^{3}s(tu^{4}s). From *albus*, white, and *vitta*, a band. Having white bands or vittæ. [L, 63.]

ALBRADE (Ger.), n. A^{3}lb'ra^3-de^2. The *Artemisia abrotanum*. [L, 46.]

ALBRAUNE (Ger.), n. A^{3}l'bra^3-un-e^2. Mandragora. [L, 37.]

ALBUCA (Lat.), n. A^{2}l(a^{3}l)-bu^2(bu)'ka^3. From *albus*, white, on account of the white hue of the flowers in some species. Bastard star-of-Bethlehem. A genus of liliaceous plants belonging to the suborder *Asphodeleæ* established by Willdenow. [L, 64, 67.]—**A. major** [Willdenow]. An African species; the stalk contains mucilage and is used by the Hottentots for quenching thirst. [L, 105.]

ALBUGINE (Fr.), n. A^{3}l-bu^6-zhen. Albugo. [L, 72.]

ALBUGINÉ (Fr.), adj. A^{3}l-bu^6-zhe-na. Albugineous. [L, 49.]

ALBUGINEA (Lat.), n. f. A^{2}l(a^{3}l)-bu^2(bu)-ji^{2}n(gi^{2}n)'e^2-a^3. Fem. of adj. *albugineus* (*tunica* understood). Fr., *albuginée*. Ger., *weisse Haut*. It., Sp., *albuginea*. A layer of firm, white fibrous tissue forming the investment of an organ or part. [L.]—**A. epididymidos.** Fr., *albuginée de l'épididyme*. Ger., *weisse Haut des Nebenhodens*. It., *albuginea dell' epididimo*. Sp., *albuginea del epidídimo*. The fibrous coat of the epididymis, resembling the *A. testis*, but much less firm and strong. [B, 125.]—**A. lienis.** Fr., *albuginée de la rate*. Ger., *weisse Haut der Milz*. It., *albuginea della milza*. Sp., *albuginea del bazo*. Syn.: *tunica propria of the spleen*. The white, highly elastic fibrous coat, lying directly beneath the serous investment of the spleen, and sending into the interior of the organ trabecular projections which serve as sheaths for the splenic vessels. It contains numerous elastic fibres and a variable amount of unstriped muscular tissue. [B.]—**A. oculi.** Fr., *albuginée de l'œil*. Ger., *weisse Haut des Auges*. It., *albuginea del occhio*. Sp., *albuginea del ojo*. The sclerotic. [L.]—**A. ovarii.** Fr., *albuginée de l'ovaire*. Ger., *weisse Haut des Eierstocks*. It., *albuginea dell' ovario*. Sp., *albuginea de los ovarios*. The layer of firm fibrous tissue lying beneath the epithelial covering of the ovary. It is not properly a distinct tunic, but a part of the ovarian stroma distinguished from the rest by its density. [Quain (B).]—**A. penis.** Fr., *albuginée de la verge*. Ger., *weisse Haut der männlichen Ruthe*. It., *albuginea del pene* (o *della verga*). Sp., *albuginea del pene* (ó *del miembro viril*). A strong, very elastic white fibrous coat, forming an investment common to both corpora cavernosa of the penis, and also furnishing for each corpus cavernosum a separate sheath from which fibrous trabeculæ pass into the interior of this body. [Quain (B).]—**A. renum.** Fr., *albuginée des reins*. Ger., *weisse Haut der Nieren*. It., *albuginea dei reni*. Sp., *albuginea de los riñones*. The fibrous capsule of the kidneys; a firm, thin coat of fibrous tissue, enveloping the kidney and readily separable from the latter under normal conditions. [B.]—**A. testiculi, A. testis.** Fr., *albuginée du testicule*. Ger., *weisse Haut des Hodens*. It., *albuginea del testicolo*. Sp., *albuginea de los testiculos*. Often called simply *a.* and *tunica a.* The dense, thick, unyielding layer of white fibrous tissue lying beneath the tunica vaginalis and completely investing the body of the testicle. It gives off at its posterior border a prolongation into the substance of the testis, forming an incomplete vertical septum (the *corpus Highmori* or *mediastinum testis*), from which again are given off fibrous cords passing to the inner surface of the a. testis and dividing the gland more or less completely into lobules. The a. testis affords a support for the vessels of the testicle, which ramify upon the inner surface of this membrane and along its fibrous prolongations, forming a network called the *tunica vasculosa*. [Quain (B).]

ALBUGINEAN, adj. A^{2}l-bu^2-ji^{2}n'e-a^{2}n. Fr., *albuginé*. Resembling the albuginea. [Todd (B, 39).]

ALBUGINÉE (Fr.), n. A^{3}l-bu^6-zhe-na. The albuginea. [L.]—**A. de la rate.** See ALBUGINEA *lienis*.—**A. de la verge.** See ALBUGINEA *penis*.—**A. de l'épididyme.** See ALBUGINEA *epididymidos*.—**A. de l'œil.** The albuginea oculi. [L, 49.] See SCLEROTIC.—**A. de l'ovaire.** See ALBUGINEA *ovarii*.—**A. des reins.** See ALBUGINEA *renum*.—**A. du pénis.** See ALBUGINEA *penis*.—**A. du testicule.** See ALBUGINEA *testis*.

ALBUGINEI (Lat.), n. m. pl. A^{2}l(a^{3}l)-bu^2(bu)-ji^{2}n(gi^{2}n)'e^2-i(e). Masc. pl. of adj. *albugineus* (*fungi* understood). A division of *Uredineæ* made by Tulasne, including the genus *Cystopus*, or white rust. [B, 170.]

ALBUGINEOUS, adj. A^{2}l-bu^2-ji^{2}n'e-u^{3}s. Lat., *albugineus*. Fr., *albuginé*, *albugineux*. It., Sp., *albugineo*. 1. Of or resembling white of egg; albuminous. 2. Of or pertaining to the albuginea; especially pertaining to the albuginea oculi or sclerotic. [B, 39; L, 42, 46, 95.] Cf. *A.* FIBRE.

ALBUGINEUS (Lat.), adj. A^{2}l(a^{3}l)-bu^2(bu)-ji^{2}n(gi^{2}n)'e^2-u^{3}s(u^{4}s). Of or resembling white of egg; white like albumen. [B.] See ALBUGINEA, ALBUGINEI, HUMOR *a. oculi*, and MEMBRANA *albuginea*.

ALBUGINITE (Fr.), n. A^{3}l-bu^6-zhe-net. Albuginitis. [G.]—**A. syphilitique.** Ricord's term for syphilitic orchitis. [G.]

ALBUGINITIS (Lat.), n. f. A^{2}l(a^{3}l)-bu^2(bu)-ji^{2}n(gi^{2}n)-i(e)'ti^{2}s. Gen., *albuginit'idis*. Fr., *albuginite*. Sp., *albuginitis*. Inflammation of the albuginea, especially of the albuginea testis; orchitis. Also any inflammation of white fibrous tissue. [G; L, 45, 63.]

ALBUGINOUS, adj. A^{2}l-bu^2'ji^{2}n-u^{3}s. See ALBUGINEOUS (1st def.).

ALBUGINOUSNESS, n. A^{2}l-bu^2'ji^{2}n-u^{3}s-ne^{2}s. 1. The state of being albuginous; albuminousness. 2. The white of egg; albumen. [B, 39.]

ALBUGO (Lat.), n. f. A^{2}l(a^{3}l)-bu^2(bu)'go. Gen., *albu'ginis*. Fr., It., *albugine*. Syn.: *albula*, *macula*, *leucoma album oculi*. 1. A white spot or film upon the cornea, especially when due to a previous inflammation. (Obsolete.) 2. The white of egg. (Obsolete.) 3. A scaly eruption upon the head. 4. A section of the genus *Uredo* made by Persoon. [B, 39, 134, 170; F; L.]—**A. capitis.** See *A.* (3d def.).—**A. corallii.** See *Magisterium* CORALLIORUM.—**A. oculi.** Ger., *Weisse im Auge*. The white of the eye.—**A. oculorum.** See *A.* (1st def.).—**A. ovi.** See *A.* (2d def.).

ALBUHAR, n. See ALBOTAL.

ALBUHEN, n. See ALDOTIN.

ALBUKALIN, n. A^{2}l-bu^2'ka^{2}l-i^{2}n. A body found in the blood of leucæmic patients, having the composition $C_8H_{16}N_2O_6+H_2O$. [L, 63.]

ALBULA (Lat.), n. f. A^{2}l(a^{3}l)'bu^2(bu)-la^3. Fem. of adj. *albulus* (*macula* understood). See ALBUGO.

ALBULÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)'bu^2(bu)-le(la^{3}e^2). Properly *Aquæ Albulæ*. Fr., *albules*. The name given by the ancients to the mineral springs at Tivoli. [B, 134.] See ACQUE *Albule*.

ALBULUS (Lat.), adj. A^{2}l(a^{3}l)'bu^2(bu)-lu^{3}s(lu^{4}s). Dim. of *albus*. Somewhat white. [B.]

ALBUM (Lat.), n. n. A^{2}l(a^{3}l)'bu^{3}m(bu^{4}m). Neut. of adj. *albus*. A term applied to a number of substances distinguished by their whiteness, also (obs.) to leucorrhœa. [B, 39; L, 53.]—**A. candiense.** See *A. Hispaniæ*.—**A. canis.** See *A. græcum*.—**A. ceti.** Spermaceti. [B, 180.] See CETACEUM.—**A. græcum.** Ger., *Hundekoth*. Syn.: *spodium Græcorum*, *cynocoprus*, *stercus caninum album*. The white excrement of dogs which have been fed upon bones. It consists chiefly of calcium phosphate and has been used in medicine. [B, 7; L.]—**A. Hispaniæ, A. hispanicum.** Fr., *blanc d'Espagne*. Subnitrate of bismuth, used for cosmetic purposes. [B; Gmelin (L, 105).]—**A. nigrum.** Ger., *Mäusekoth*. The excrements of rats and mice, formerly official under this title and used as a diuretic and purgative. [L.]—**A. oculi.** Fr., *blanc de l'œil*. Ger., *Weisse im Auge*. It., *bianco dell' occhio*. Sp., *parte blanca de los ojos*. An obsolete term for the white tunic of the eye. [F.] See SCLEROTIC.—**A. ovi.** The white of egg. [L.]—**A. Rhazis.** Fr., *onguent blanc de Rhazès*. From Rhazes, an Arabian physician. An ointment made of lead carbonate and lard. [B; L, 51.] See *Pomatum cum* CARBONATE PLUMBICO.

ALBUMEN (Lat.), n. n. A^{2}l(a^{3}l)-bu^2(bu)'me^{2}n. Gen., *albu'minis*. Gr., τὸ λευκὸν τοῦ ᾠοῦ. Fr., *blanc d'œuf*, *albumine*. Ger., *Eiweiss*, *Sameneiweiss* (2d def.). It., *albume*. Syn.: *ooleucon*, *liquor ovi albus*, *lac ovis*, *candidum ovi*. 1. The white of egg; also formerly applied to the principle contained in the white of egg or albumin (*q. v.*). 2. In botany, the nutritive material deposited in the seed about the embryo and serving for the nutrition of the latter during the growth. [A; B.]—**A. aluminosum.** Fr., *albumine alumineuse*, *blanc d'œuf alumineux*. A mixture of alum 60 grs. and 1 oz. each of rose-water and elder-flower water mixed with the white of one egg; used as an eye-wash. [Ph. batav., 1805; Disp. brunsv., 1777 (L, 85).]—**A. iodatum.** A preparation consisting of iodine 1 part and egg albumin 8 parts, mixed with water and dried. [L, 63.]—**A. oculi.** See ALBUGO (1st and 2d def's).—**A. ovi.** See *A.* (1st def.), and OVI *a.*—**A. spirituosum.** A mixture of white of egg and spirit, used as an external application.—**Solution of a.** A test solution of the Br. Ph., consisting of the white of one egg triturated with 4 oz. of distilled water and filtered. [B, 5.]—**Tata a.** Ger., *Tataeiweiss*. See under *Egg* ALBUMIN.—**Test solution of a.** [U. S. Ph.]. A filtered solution of the white of one egg in 100 cu. cent. of distilled water. [B, 5.] Cf. *Solution of a.*

ALBUMENATE, n. A^{2}l-bu^2'me^{2}n-at. See ALBUMINATE.

ALBUMENIZE, v. tr. A^{2}l-bu^2'me^{2}n-iz. Fr., *albuminer*. To cover with white of egg. [B.]

ALBUMENOID, n. and adj. A^{2}l-bu^2'me^{2}n-oid. See ALBUMINOID.

ALBUMENTUM (Lat.), n. n. A^{2}l(a^{3}l)-bu^2(bu)-me^{2}n'tu^{3}m(tu^{4}m). White of egg. See ALBUMEN.

ALBUMENURIA (Lat.), n. f. A^{2}l(a^{3}l)-bu^2(bu)-me^{2}n-u^2(u)'ri^2-a^3. See ALBUMINURIA.

ALBUMIN, n. A^{2}l-bu^2'mi^{2}n. Lat., *albuminum*. Fr., *albumine*. Ger., *Albumin*. It., *albumina*. Sp., *albúmina*. A substance constituting the chief and characteristic constituent of *albumen* (white of egg), and found also in the blood, chyle, lymph, and all serous fluids, as well as in the juice of flesh, in the brain, the pancreas, and the liquor amnii, and generally in all transudations from the blood-vessels, being essentially the same under all these circumstances. In certain conditions of disease it is found in the urine. (See ALBUMINURIA.) It also exists in small quantities in vegetable juices. In its chemical behavior a. is a weak acid, apparently dibasic (or perhaps tetrabasic), forming both acid and neutral salts (*albuminates*) with bases; and it also combines with acids to form the compounds known as *acid a's*. [B, 2, 4.] For the properties and chemical composition of the different varieties of a., see *Egg a.*, *Serum a.*, *Vegetable a.*, and *Whey a.*—**A'drüse** (Ger.). See DOTTER*stock*.—**A'gang** (Ger.). The vitelline duct in *Tæniæ*. [B, 27.]—**A'stoff.** See the major list.—**Acid a.** Fr., *albumine acide*. Ger., *Acidalbumin*. It., *albumina acida*. Sp., *albúmina ácida*. Syn.: *syntonin*, *albuminide*. A compound

formed by the prolonged action of an acid upon a. or an albuminoid. The acid a. obtained from ordinary a. is distinguished by its insolubility in distilled water and in neutral saline solutions, by its solubility in weak acid and alkaline solutions, and by its not coagulating from its acid or alkaline solution when heated to 70° C., although it coagulates readily as soon as its solution is neutralized. [B, 2, 12.]—**A. peptone.** See under PEPTONE.—**Alkali a.** See ALBUMINATE.—**Animal a.** Fr., *albumine animale.* Ger., *thierisches Eiweiss.* It., *albumina animale.* Sp., *albúmina animal.* The form of a. which occurs in the animal tissues or fluids.—**Bence-Jones a.** A form which gives no precipitate with an excess of nitric acid, unless left to stand or unless heated and left to cool, when it forms a solid coagulum, which redissolves on heating and coagulates again on cooling. It is separated from ordinary a. by adding nitric acid, boiling and filtering; while the ordinary a. remains on the filter, the B.-J. a. passes through. Found in the urine in false albuminuria. [L.]—**Blood a.** Fr., *albumine du sang.* Ger., *Blutalbumin.* It., *albumina del sangue.* See *Serum a.*—**Caseiform a.** Fr., *albumine caséiforme.* The name given by Mialhe to a variety of a. precipitated by nitric and acetic acids, but not coagulable by heating. The name *incipient a.* was given to a similar body by Prout. [A. Gubler (B, 46).]—**Circulating a.** Fr., *albumine circulatoire.* Ger., *circulirendes A.* 1. Voit's term for the a. in solution in the lymph, which he supposes to be derived from the blood, in contradistinction to that derived from the tissues. [J, 52; Hoppe-Seyler, "Arch. f. ges. Physiol.," vii, 1873, p. 993 (J); C. Voit, "Ztschr. f. Biol.," x, 1874, p. 202 (J).] 2. A. in solution in the lymph, as distinguished from that stored in the tissues. [J.]—**Coagulated a.** Fr., *albumine coagulée.* Ger., *coagulirtes Eiweiss.* It., *albumina coagulata.* Sp., *albúmina coagulada.* A. converted by the action of heat or of chemical reagents into a modification insoluble in water, in neutral saline solutions, and in dilute solutions of the acids or alkalies. Its chemical constitution is not well understood. [B, 12.]—**Crystalline a.** Fr., *albumine cristalline.* Ger., *krystallinisches Eiweiss.* It., *albumina cristallina.* Sp., *albúmina cristalina.* A form of a. obtained by Grübler ["Journ. f. pract. Chem.," n. F., xxiii, 1880, p. 97] from pumpkin-seeds and by Ritthausen ["*Ib.*," xxiii, p. 481; xxv, pp. 131, 137] from various oily seeds (such as those of the hemp and castor-oil plant and sesame). Grübler's a. was obtained in the form of octahedral crystals, formed crystalline compounds with the alkaline metals and alkaline earths, and had the percentage composition: C, 53·21, H, 7·22, N, 19·22, S, 1·07, O, 19·10, ash, 0·18. Ritthausen's a. was also crystalline, and had the composition: C, 50·88 to 50·98, H, 6·92 to 6·98, N, 18·57 to 18·73, S, 0·77 to 0·82, O, 22·55 to 22·79. [B.]—**Derived a.** Fr., *albumine dérivée.* Ger., *Eiweisskörper.* A modified form of a. produced by the action of various chemical reagents. [B.] See *Acid a.* and ALBUMINATE.—**Egg a.** Lat., *ovi albumen* [Br. Ph.], *albumen ovi* [Br. Ph. (1867).] Fr., *albumine de l'œuf.* Ger., *Eiweiss, Eieralbumin.* It., *albume, albumina dell' uovo.* Sp., *albúmina del huevo.* That variety of a. occurring in white of egg, of which, under the form of an alkaline solution of sodium albuminate, it constitutes about 12 per cent. When obtained by evaporation of its aqueous solution, egg a. is a yellowish-white, transparent, brittle, amorphous mass, having a sp. gr. of 1·314; soluble in water and in dilute acid and alkaline solutions as well as in neutral saline solutions; and in solution having a specific lævorotary power of 35·5°. It is coagulated by heat, alcohol, ether, and nitric acid, and dissolves with difficulty or not at all in an excess of the latter. A variety of egg a. found by Tarchanoff in the egg of the bank-swallow and other birds, and denominated by him "*Tataeiweiss*," is thinner and more watery than ordinary a., diffuses more readily, is digested with much greater rapidity, and coagulates at a much higher temperature. In solution it is highly fluorescent. ["Ctrlbl. f. d. med. Wissensch.," 1884, p. 501.] The percentage chemical constitution of egg a. is: C, 53 to 53·4, H, 6·8 to 7·0, N, 15·1 to 15·8, S, 1·4 to 2·0, O, 22·4 to 22·8. From this have been deduced the empirical formulæ $C_{216}H_{338}N_{54}S_3O_{68}$ (Liebig), $C_{90}H_{139}N_{22}SO_{30}$ (Mulder), $C_{72}H_{112}$-$N_{18}SO_{22}$ (Lieberkühn), and $C_{204}H_{322}N_{52}S_2O_{66}$ (Harnack in "Ztschr. f. physiol. Chem.," v, p. 198). [B, 2, 4.]—**Eiera'** (Ger.). See *Egg a.*—**Imperfect a.** Fr., *albumine imparfaite.* A variety of a. which does not give all the ordinary reactions of a. [Prout (B).]—**Incipient a.** Fr., *albumine incipiente.* A name given by Prout to a variety of imperfect a. met with in chyle and chylous urine. [B.] Cf. *Caseiform a.*—**Insoluble a.** Fr., *albumine insoluble.* Ger., *unlösliches Eiweiss.* Sp., *albúmina insoluble.* 1. Coagulated a. 2. An acid a. or alkali a. (albuminate), so called because insoluble in distilled water. [A.]—**Lactoa'.** Fr., *albumine du lait.* Ger., *Lactoalbumin.* A variety of a. found in milk, differing from serum a. in the degree of its action upon the plane of polarized light. [B.] See *Whey a.*—**Meta'.** See the major list.—**Muscle a.** Fr., *albumine des muscles.* Ger., *Muskelalbumin.* A variety of a. occurring in small quantities in the aqueous extract made from muscular tissue. In neutral solutions it coagulates between 46° and 47° C. [A, 319.]—**Native a.** An a. occurring in the natural state in the animal or vegetable tissues and juices. [B.] See *Egg a., Muscle a., Serum a., Vegetable a., Crystalline a.,* and *Whey a.*—**Non-retractile a.** Fr., *albumine non-rétractile.* Ger., *nicht-retractiles Eiweiss.* See under *Retractile a.*—**Organ a.** That portion of the a. contained in the matters introduced into the organism which is directly absorbed and goes to build up the tissues. Cf. *Circulating a.* (2d def.).—**Para'.** See the major list.—**Retractile a.** Fr., *albumine rétractile.* Ger., *retractiles Eiweiss.* A. which coagulates in concrete particles and solid masses, as distinguished from *non-retractile a.*, which on coagulation remains suspended in a state of uniform diffusion. According to Bouchard, the former, when occurring in the urine, is diagnostic of nephrogenous, the latter of hæmatogenous, albuminuria. [B, 93, 108.]—**Salivary a.** Fr., *albumine salivaire.* Ptyalin.—**Sera'.** Serum a. [F. W. Pavy, "Med. Times and Gaz.," Oct. 17, 1885, p. 529.]—**Serum a.** Fr., *albumine du sérum.* Ger., *Serumalbumin.* It., *albumina del siero.* Syn.: *blood a., serosin, serin.* The variety of a. occurring in blood-serum and other animal liquids. It closely resembles egg a., but has a specific lævorotary power of 50°, is not coagulated by ether, is precipitated with difficulty by hydrochloric acid, and after precipitation by nitric acid re-dissolves in an excess of the reagent. Its percentage composition is almost precisely the same as that of egg a., although it contains a little less sulphur and a little more oxygen. [B, 4.] It is the form usually found in albuminous urine. See also METALBUMIN and PARALBUMIN.—**Soluble a.** Fr., *albumine soluble.* Ger., *lösliches Eiweiss.* Sp., *albúmina soluble.* A. that has not been coagulated nor so altered by chemical reagents as to be insoluble in distilled water. [B.]—**Vegetable a.** Fr., *albumine végétale.* Ger., *pflanzliches Eiweiss.* The variety of a. found in vegetable tissues and juices. It resembles egg a. in properties but differs from it somewhat in composition, containing from 15·5 to 17·6 per cent. of nitrogen and from 0·75 to 1·55 per cent. of sulphur. [B, 4.] See also *Crystalline a.*—**Vorrathsa'** (Ger.). Voit's term for that portion of the a. contained in the circulating fluids which is derived from the tissues and cellular elements of the body, as distinguished from the circulating a. which is derived from the food. [J, 52.]—**Whey a.** Ger., *Molkeneiweiss.* An albuminous substance, readily soluble in water, obtained, along with another less soluble a., from whey. Composition: C, 50·01 to 50·56, H, 6·89 to 7·19, N, 13·10 to 13·59, ash, 7·48 to 8·25. [Kösler, "Upsal. läkarefören. Förhandl.," xvi, 514 (B).]

ALBUMINAGE (Fr.), n. A^{3}l-bu^6-mi^{2}n-a^{3}zh. The act of albumenizing or coating with white of egg. [A, 324.]

ALBUMINAS (Lat.), n. m. or f. A^{2}l(a^{3}l)-bu^2(bu)′mi^{2}n-a^{2}s(a^{3}s). An albuminate.

ALBUMINAT (Ger.), n. A^{3}l-bu-mi^{2}n-a^{3}t′. An albuminate.—**Acida'.** An acid albumin. [A, 319.]—**Alkalia'.** An alkali albumin, an albuminate. [A, 319.]—**Antia'.** An antialbumate.

ALBUMINATE, n. A^{2}l-bu^2′mi^{2}n-at. Lat., *albuminas.* Fr., *albuminate.* Ger., *Albuminat.* It., Sp., *albuminato.* Syn.: *derived* (or *alkali*) *albumin.* A compound of albumin with a base; a salt of albumin considered as an acid. [B, 2, 4.] According to some, but less correctly, a compound of albumin with either a basic radicle (alkali a., alkali albumin), or with an acid (acid albumin). [B, 12.]—**Acid a.** Fr., *a. acide.* Ger., *Acidalbuminat.* See *Acid* ALBUMIN.—**Alkali a.** Fr., *a. alcalin.* Ger., *Alkalialbuminat.* See *A.*

ALBUMINATUS (Lat.), adj. A^{2}l(a^{3}l)-bu^2(bu)-mi^2-na(na^3)′tu^{3}s-(tu^{4}s). Containing or combined with albumin. [B, 95.]

ALBUMINE (Fr.), n. f. A^{3}l-bu^6-men. Albumin.—**A. acide.** See *Acid* ALBUMIN.—**A. alcaline.** An alkali albumin. See ALBUMINATE.—**A. alumineuse, A. aluminose.** See ALBUMEN *aluminosum.*—**A. animale.** See *Animal* ALBUMIN.—**A. caséiforme.** See *Caseiform* ALBUMIN.—**A. cérébrale.** Neurine. [B, 107.]—**A. circulatoire.** See *Circulating* ALBUMIN.—**A. coagulée.** See *Coagulated* ALBUMIN.—**A. coagulée des cheveux, des cornes, des ongles, et du sabot.** See KERATIN. [B, 107.]—**A. cristalline.** See *Crystalline* ALBUMIN.—**A. de l'œuf.** See *Egg* ALBUMIN. [B, 93.]—**A. dérivée.** See *Derived* ALBUMIN.—**A. des muscles.** See *Muscle* ALBUMIN. [B, 93.]—**A. du lait.** See *Lacto*-ALBUMIN.—**A. du petit-lait.** See *Whey* ALBUMIN.—**A. du sang.** Blood albumin. [B.] See *Serum* ALBUMIN.—**A. du sérum.** See *Serum* ALBUMIN. [B, 93.]—**A. imparfaite.** See *Imperfect* ALBUMIN.—**A. incipiente.** See *Incipient* ALBUMIN.—**A. insoluble.** See *Insoluble* ALBUMIN.—**A. modifiée des cheveux, des cornes,** etc. See *A. coagulée des cheveux, des cornes,* etc.—**A. non-rétractile.** See *Non-retractile* ALBUMIN.—**A. organique.** See *Organ* ALBUMIN.—**A. rétractile.** See *Retractile* ALBUMIN.—**A. salivaire.** Ptyalin. [B, 107.]—**A. solide.** Coagulated albumin.—**A. soluble.** Soluble albumin. [B, 46.]—**A. végétale.** Vegetable albumin. [B, 107.]—**Mét-a.** See METALBUMIN.—**Par-a.** See PARALBUMIN.

ALBUMINÉ (Fr.), p. p. A^{3}l-bu^6-mi^{2}n-a. 1. Albumenized; coated with white of egg. 2. Albuminous (2d def.). [B, 52.]

ALBUMINER (Fr.), v. tr. A^{3}l-bu^6-mi^{2}n-a. To albumenize, or coat with white of egg. [B, 52.]

ALBUMINEUSE (Fr.), n. A^{3}l-bu^6-mi^{2}n-u^{5}z. A term used by Mialhe as synonymous with peptone. [K.]

ALBUMINEUX (Fr.), adj. A^{3}l-bu^6-mi^{2}n-u^5. Albuminous. [B.]

ALBUMINIDE, n. A^{2}l-bu^2′mi^{2}n-i^{2}d. Fr., *albuminide.* Ger., *Albuminid.* A name given by Rollet ["Wien. akad. Sitzungsbericht.," lxxxiv, 3, p. 332] to acid albumin derived from serum albumin by the action of dilute acids. [B.]

ALBUMINIFEROUS, adj. A^{2}l-bu^2″mi^{2}n-i^{2}f′e^{2}r-u^{3}s. From *albumin,* and Lat., *ferre,* to bear. Fr., *albuminifère.* Producing or generating albumin. [B, 39.]

ALBUMINIFORM, adj. A^{2}l-bu^2-mi^{2}n′i^2-fo^{2}rm. From *albumin,* and Lat., *forma,* form. Fr., Sp., *albuminiforme.* Ger., *eiweissähnlich.* Resembling albumin.

ALBUMINIMETER, n. A^{2}l-bu^2″mi^{2}n-i^{2}m′e^{2}t-u^{5}r. From *albumin,* and Gr., *μέτρον,* a measure. Fr., *albuminimètre.* Ger., *Albuminimeter.* It., *albuminimetro, albuminometro.* Sp., *albuminimetro.* An apparatus for estimating the amount of albumin in a liquid. The term is ordinarily applied to a polarimeter so devised that the deviation produced in the plane of a ray of polarized light by its passage through a column of the liquid measures the amount of albumin present. Esbach's a. consists of a small graduated tube, which is filled up to a certain mark with the liquid under examination; the level of the liquid is then brought up to another mark by adding a solution containing 10 grammes of picric acid and 20 grammes of citric acid to 1 litre of water; the tube is closed with a rubber stopper, shaken and allowed to stand for 24 hours; the precipitate of albumin may then be read off in grammes to the litre. ["Allg. med. Ctrl.-Ztg."; "St. Petersb. med. Wchnschr.," Oct. 19 (31), 1885, p. 355 (A).]

ALBUMININ, n. A^{2}l-bu^2′mi^{2}n-i^{2}n. Fr., *albuminine.* Ger., *Albuminin.* It., Sp., *albuminina.* The substance forming the walls of the cells which inclose the albumin in the white of egg.

It differs from albumin in containing no nitrogen and in its different behavior toward reagents. [B, 2, 48.]

ALBUMINIPAROUS, adj. A^{2}l-bu^2″mi^{2}n-i^{2}p′a^2-ru^{3}s. From *albumin*, and *parere*, to bear. Fr., *albuminipare*. Generating albumin. [B, 39.]

ALBUMINIZATION, n. A^{2}l-bu^2″mi^{2}n-i^2-za′shu^{3}n. The act or process of conversion, or of re-conversion, of a tissue into albumin. [T. Addison, "Guy's Hosp. Rep.," 1843 (B, 39).]

ALBUMINIZE, v. tr. A^{2}l-bu^2′mi^{2}n-iz. To transform into albumin. [B, 39.]

ALBUMINO-CASEIN, n. A^{2}l-bu^2″mi^{2}n-o-ka′ze-i^{2}n. For deriv., see Albumin and Casein. Fr., *albumino-caséine*. Ger., *Albuminocasein*. It., Sp., *albumino-caseina*. Amygdalin. [A, 337.]

ALBUMINO-CASEOUS, adj. A^{2}l-bu^2″mi^{2}n-o-ka′ze-u^{3}s. Fr., *albumino-caséeux*. It., Sp., *albumino-caseoso*. Compounded of albumin and a cheesy material, or a material resembling casein; a term applied to amygdalin. [B, 38.]

ALBUMINO-CHLORIDE, n. A^{2}l-bu^2″mi^{2}n-o-klo′ri^{2}d. Fr., *albumino-chlorure*. Ger., *Albuminochlorür*. A compound of a chloride with albumin. [B, 39.]

ALBUMINO-FIBRIN, n. A^{2}l-bu^2″mi^{2}n-o-fi′bri^{2}n. For deriv., see Albumin and Fibrin. Fr., *albumino-fibrine*. Ger., *Albuminofibrin*. It., Sp., *albumino-fibrina*. A compound of albumin and fibrin. [Todd (B, 39).]

ALBUMINO-FIBRINOUS, ALBUMINO-FIBROUS, adj's. A^{2}l-bu^2″mi^{2}n-o-fi′bri^{2}n-u^{3}s, -fi′bru^{3}s. Fr., *albumino-fibreux*. It., Sp., *albumino-fibrinoso*. Compounded of albumin and fibrin. [B, 38, 39; Bryant (B, 39).]

ALBUMINO-GELATINOUS, adj. A^{2}l-bu^2″mi^{2}n-o-je^{2}l-a^{2}t′-i^{2}n-u^{3}s. Fr., *albumino-gélatineux*. Compounded of albumin and gelatin. [B, 38; Todd (B, 39).]

ALBUMINO-GLUTINOUS, adj. A^{2}l-bu^2″mi^{2}n-o-glu^2′ti^{2}n-u^{3}s. For deriv., see Albumin and Gluten. Fr., *albumino-glutineux*. Compounded of albumin and gluten. [B, 38.]

ALBUMINO-GRAISSEUX (Fr.), adj. A^{3}l-bu^6-mi^{2}n-o-gra-su^6. Containing both albumin and fat.

ALBUMINOID, adj. and n. A^{2}l-bu^2′mi^{2}n-oid. Fr., *albuminoïde, gélatinigène*. Ger., *eiweissähnlich, Albuminstoff, Eiweisskörper*. It., *albuminoide*. Sp., *albuminóide*. 1. (Adj.) resembling albumin; of or pertaining to a substance resembling albumin. For special uses of the term see *A.* disease and *A.* degeneration. 2. (N.) one of a class of nitrogenous proximate principles of which ordinary albumin is a type. The a's in part occur native, forming the essential constituents of all the animal tissues and fluids, except the bile, tears, sweat, and urine, and occurring also in vegetables; in part are derived from these native a's by the action of chemical or vital processes. All are amorphous with the exception of the crystalline albumin of plants; all when in solution rotate the plane of polarization to the left; all except the peptones are non-diffusible; and all under suitable conditions undergo putrefactive decomposition with the evolution of hydrogen, hydrogen sulphide, ammonia, carbon dioxide, leucine, tyrosine, and various other compounds consisting chiefly of the fatty acids and their derivatives. Heated with nitric acid, they become of a yellow color, which is changed to a deep orange by the addition of ammonia (xanthoproteic reaction); they are reddened by Millon's reagent, and color Fehling's solution violet; they are dissolved by strong acetic, phosphoric, and hydrochloric acids; and are precipitated by tannic acid, chlorine, and salts of the heavy metals. Their percentage composition is C, 50·6 to 54·3, H, 6·7 to 7·3, N, 12·8 to 18·4, S, 0·4 to 1·7, O, 20·6 to 26·8, with a variable amount of ash. Their molecular constitution is very complex and still undetermined, although they are believed to be compounds of amides of acids of the fatty series with urea (Schützenberger). The a's comprise: 1. Albumin. 2. Acid albumins. 3. Alkali albumins (albuminates). 4. Globulins. 5. Fibrin. 6. Coagulated albumins. 7. The amyloid substance. 8. Albumose. 9. Peptones. [B, 2, 4, 12, 13, 92, 108.] According to the usage of many authors the term *proteids* is applied to this class of bodies, the word a. being applied to substances, such as mucin, chondrin, gelatin, collagen, elastin, keratin, and nuclein, which are allied to the proteids, but differ in composition and some important properties. [B, 11, 12, 13, 108.] On the other hand, those who use the term a. in the sense here adopted call bodies of the latter class proteids.

ALBUMINOIDAL, adj. A^{2}l-bu^2″mi^{2}n-oid′a^{2}l. See Albuminoid.

ALBUMINOMETRY, n. A^{2}l-bu^2″mi^2-no^{2}m′e^2-tri^2. From *albumin*, and *μέτρον*, a measure. The determination of the proportion of albumin present in albuminous urine. [J. E. Blomfield, "Lancet," Jan. 23, 1886, p. 153 (A).]

ALBUMINONE, n. A^{2}l-bu^2″mi^2-non′. Fr., *albuminone*. Ger., *Albuminon*. A substance derived from an albuminoid, soluble in alcohol and not coagulable by heat. [Kingzett (B, 39).]

ALBUMINO-PURULENT, adj. A^{2}l-bu^2″mi^{2}n-o-pu^3′ru^2-le^{2}nt. Ger., *albuminös-eitrig*. Containing both albumin and pus.

ALBUMINORRHÖE (Ger.), n. f. A^{3}l-bu″mi^{2}n-o^2-ru^6′e^2. Albuminuria. [B.]

ALBUMINÖS, (Ger.), adj. A^{3}l-bu-mi^{2}n-u^{6}z′. Albuminous. [B.]

ALBUMINOSA (Lat.), n. n. pl. A^{2}l(a^{3}l)-bu^2(bu)-mi^{2}n-o′sa^3. Medicinal and dietetic substances containing albumin.

ALBUMINOSÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-bu^2(bu)-mi^{2}n-o′se(a^3-e^2). In Lindley's system, the first cohort of the *Polypetalæ*, including the alliances *Ranales, Anonales, Umbellales, Grossales*, and *Pittosporales*. [B, 170.]

ALBUMINOSE, adj. and n. A^{2}l-bu^2″mi^{2}n-os′. Fr., *albuminose*. Ger., *Albuminose* (2d and 3d def's). It., *albuminosio* (2d def.). 1. (Adj.) albuminous. 2. (N.) a term applied by Bouchardat to a product of the decomposition of fibrin by very dilute hydrochloric acid, and by Mialhe to a peculiar substance into which he supposed albumin to be converted by the action of gastric juice before assimilation takes place. [B, 2.] For the former, see *Acid* albumin; for the latter, see Albumose. 3. In Fr. and Ger., also albuminosis.—**A. chronique** (Fr.). Engel's name for plethora. [B, 38.]

ALBUMINÖS-EITRIG (Ger.), adj. A^{3}l-bu-mi^{2}n-u^{6}z″i′tri^{2}g. Albumino-purulent.

ALBUMINOSIC, adj. A^{2}l-bu^2″mi^{2}n-o′si^{2}k. Fr., *albuminosique*. Of or pertaining to albuminose (albumose); as *a. ferment*.

ALBUMINOSIS (Lat.), n. f. A^{2}l(a^{3}l)-bu^2(bu)-mi^{2}n-o′si^{2}s. Gen., *albumino′seos*. Fr., *albuminose*. Ger., *Albuminose*. It., *albuminosi*. That condition of the system in which the albuminous constituents of the blood or tissues are in excess of the normal amount. [B, 48.]

ALBUMINOSO-SUCRÉ (Fr.), adj. A^{3}l-bu^6-mi^{2}n-o-so-su^6-kra. Albuminous and saccharine. [B, 38.]

ALBUMINOUS, adj. A^{2}l-bu^2′mi^2-nu^{3}s. Lat., *albuminosus*. Fr., *albumineux, albuminé* (2d def.). Ger., *albuminös, eiweisshaltig*. It., *albuminoso*. Sp., *albuminoso, albuminado, albumineo* (2d def.). 1. Of or pertaining to albumin; containing albumin. 2. In botany, applied to seeds which contain albumen (endosperm) when ripe. [B, 19, 75.] For special uses of the term see under Cell, Degeneration, Exudate, Exudation, Infiltration, and Metamorphosis.

ALBUMINOUSNESS, n. A^{2}l-bu^2′mi^{2}n-u^{3}s-ne^{2}s. The condition of being albuminous. [A, 302.]

ALBUMINSTOFF (Ger.), n. A^{3}l-bu-men′sto^{2}f. An albuminoid. [B, 108.]—**Coagulirte A'e.** Coagulated albumins.—**Pflanzliche A'e.** The albuminous principles of plants. [B, 108.]

ALBUMINURETICA (Lat.), n. n. pl. A^{2}l-(a^{3}l)-bu^2(bu)-mi^{2}n-u^2-(u)-re^{2}t′i^{2}k-a^3. Gen., *albuminuretico′rum*. Drugs which cause albuminuria. [A, 305.]

ALBUMINURIA (Lat.), n. f. A^{2}l(a^{3}l)-bu^2(bu)-mi^2-nu^2(nu)′ri^2-a^3. From *albumin*, and *οὐρεῖν*, to urinate. Fr., *albuminurie*. Ger., *Albuminurie, Eiweissharnen*. It., Sp., *albuminuria*. 1. The presence of albumin in the urine. 2. That condition or habit of the body in which there is a tendency to the discharge of albumin in the urine. Under most circumstances this is indicative of disease, and the greater the quantity of albumin excreted the more serious is the lesion. A. may be a concomitant of acute disease (as scarlatina) [see *Temporary a.*], or it may indicate a permanent condition. It is often used as a synonym for Bright's disease. [D.] See also Globulinuria and Peptonuria.—**A. acuta.** See *Acute a.*—**A. gravidarum.** Fr., *albuminurie gravidique*. Ger., *Albuminurie der Schwangeren*. A. occurring during the course of pregnancy.—**A. longa.** See *Chronic a.*—**A. of parturition.** Fr., *albuminurie du travail*. A form of a. that comes on during labor or two or three days before; distinguished by certain French writers from *a. gravidarum* (*q. v.*). [A, 15.]—**A. post-operatoria.** A. occurring after a surgical operation.—**A. spuria.** See *False a.*—**A. vera.** See *True a.*—**Acute a.** Lat., *a. acuta*. Fr., *albuminurie aiguë*. Ger., *akute Albuminurie*. It., *a. acuta*. Sp., *a. aguda*. A phrase recognized by the Royal College of Physicians as a synonym for acute Bright's disease. [D.]—**Cardiac a., Cardial a.** Fr., *albuminurie cardiaque*. A. which has for its cause some disease of the heart. It is especially apt to accompany valvular disease. [D.]—**Chronic a.** Lat., *a. chronica* (seu *longa*). Fr., *albuminurie chronique* (ou *lente*). Ger., *chronische Albuminurie*. It., *a. cronica*. Sp., *a. crónica*. A synonym for chronic Bright's disease, recognized by the Royal College of Physicians. [D.]—**Cyclic a.** A name given by F. W. Pavy to "a. in the apparently healthy," "physiological a.," "intermittent a.," or "a. in adolescents," from his observation that there is a diurnal periodicity in the maximum excretion of albumin. ["Med. Times and Gaz.," Oct. 17, 1885, p. 529.]—**Dyscrasic a.** Fr., *albuminurie dyscrasique*. Ger., *dyscrasische Albuminurie*. See *Hæmatogenous a.*—**False a.** Lat., *a. spuria*. Fr., *fausse albuminurie*. Ger., *falsche Albuminurie*. 1. Apparent a.; *i. e.*, one in which the urine does not contain albumin, but throws down a precipitate resembling it on the ordinary tests. 2. A. in which some albuminous substance passes into the urine from the circulation, but not serum-albumin. [T. L. Brunton (A, 364).] 3. A. in which the albumin does not come from the kidneys. [G. Griswold, "N. Y. Med. Jour.," Jan. 17, 1885, p. 64; A, 319.]—**Fatty a.** Fr., *albuminurie graisseuse*. See Chyluria.—**Febrile a.** A. due to a febrile condition.—**Functional a.** A. due to digestive or neurotic disturbances or to alterations in the composition of the blood. [Ralfe (B).]—**Hæmatogenous a.** Ger., *hämatogene Albuminurie*. A. due to some morbid condition of the blood and not to any structural disease of the kidney. [A, 319.] Cf. *Nephrogenous a.*—**Mixed a.** Fr., *albuminurie mixte*. Ger., *gemischte* (oder *combinirte*) *Albuminurie*. A combination of true and false a.; *i. e.*, an a. in which the urine contains albumin derived from the blood circulating in the kidneys, together with blood, pus, and mucus from the uro-genital tract. [B, 108.]—**Nephrogenous a.** Ger., *nephrogene Albuminurie*. A. due to kidney disease, as distinguished from hæmatogenous a. (*q. v.*). [A, 319.]—**Neurotic a.** Fr., *albuminurie névrotique*. Ger., *neurotische Albuminurie*. A. due to nervous disturbance. [Ralfe (B).]—**Pathological a.** Ger., *pathologische Albuminurie*. A. dependent upon some diseased condition, as distinguished from physiological a. [B, 108.]—**Permanent a.** Fr., *albuminurie persistante*. Ger., *dauernde Albuminurie*. A name given by Parkes to a. which is due to permanent disease and is itself a lasting condition. [D, 1.]—**Physiological a.** Fr., *albuminurie physiologique* (ou *normale*). Ger., *physiologische Albuminurie*. Temporary a. occurring in a healthy condition of the system and having no pathological significance. Such an a. occurs frequently in new-born children, and sometimes in adults after the ingestion of food rich in albuminoids, physical exertion, emotional excitement, or the use of cold baths. [B. 108.]—**Pseudo-a.** Fr., *pseudo-albuminurie*. Ger., *Pseudoalbuminurie*. See *False a.*—**Sero-a.** Ger., *Seroalbuminurie*. A. in which only

serum albumin is found in the urine. [B, 108.]—**Spastic a.** Fr., *albuminurie spastique.* Ger., *spastische Albuminurie.* A. dependent upon a convulsive attack. [A.]—**Temporary a.** Fr., *albuminurie passagère.* According to Parkes, the presence of albumin in the urine for a few days or weeks, as a concomitant of some form of acute disease (*e. g.*, scarlatina), or from some unknown cause. [D, 1.]—**Toxic a.** Fr., *albuminurie toxique.* Ger., *toxische Albuminurie.* A. dependent upon the introduction of a poison into the system. [B.]—**True a.** Lat., *a. vera.* Fr., *albuminurie vraie.* Ger., *wahre Albuminurie.* A. in which the albumin enters the urine at the time of the secretion of the latter in the kidneys. [B, 49, 108.] Cf. *False a.*

ALBUMINURIC, adj. A^{2}l-bu^2″mi^2-nu^2′ri^{2}k. Fr., *albuminurique.* Ger., *albuminurisch.* 1. Affected with albuminuria (said of persons). 2. Accompanied with or dependent upon albuminuria (e. g., *a. convulsions, a. nephritis*).

ALBUMINURIE (Fr., Ger.), n. f. A^{3}l-bu^6-mi^2-nu^6-re, a^{3}l-bu″-mi^2 nu′re. Albuminuria. [D, 65.]—**A. anoxémique** (Fr.). Albuminuria due to asphyxia. [B.]—**A. Brightique** (Fr.). Albuminuria due to Bright's disease. [B, 105.]—**A. cachectique** (Fr.). Albuminuria due to cachexia. [B, 105.]—**A. cantharidienne** (Fr.). Albuminuria due to poisoning by cantharides. [Bouillaud (B, 105).]—**A. catarrhale** (Fr.). Albuminuria due to destruction or alteration of the renal epithelium, as in Bright's disease and the albuminuria of pyrexia. [A. Gubler (B, 46).]—**A. colliquative, A. consomptive** (Fr.). Albuminuria dependent upon excessive disassimilation of the blood-corpuscles or of the adipose tissue and the muscles. In the latter case, it is called *A. colliquative musculaire.* [A. Gubler (B, 46).]—**A. der Schwangeren** (Ger.). See ALBUMINURIA *gravidarum.*—**A. du travail** (Fr.). See ALBUMINURIA *of parturition.*—**A. dyscrasique** (Fr.). Dyscrasic (hæmatogenous) albuminuria. See also *A. cachectique.*—**A. dystrophique** (Fr.). Albuminuria due to deficient formation of the blood-corpuscles. [A. Gubler (B, 46).]—**A. exsudative** (Fr.). Albuminuria dependent partly upon filtration of albumin through the renal membranes, partly upon the presence of inflammatory products in the urine, as in the case of intense nephritis produced by toxic agents. [A. Gubler (B, 46).]—**A. globulaire** (Fr.). Albuminuria dependent upon destruction of the blood-corpuscles [A. Gubler (B, 46)], or upon the presence in the urine of blood or hæmoglobin. [Jaccoud (B, 105).]—**A. goutteuse** (Fr.). Albuminuria of gouty origin. [D, 65.]—**A. graisseuse** (Fr.). Fatty albuminuria. See CHYLURIA.—**A. gravidique** (Fr.). See ALBUMINURIA *gravidarum.*—**A. lente** (Fr.). See *Chronic* ALBUMINURIA.—**A. névrotique** (Fr.). See *Neurotic* ALBUMINURIA.—**A. normale** (Fr.). See *Physiological* ALBUMINURIA.—**A. passagère** (Fr.). See *Temporary* ALBUMINURIA.—**A. persistante** (Fr.). Chronic albuminuria not dependent upon Bright's disease. [Jaccoud (B, 105).]—**A. saturnine** (Fr.). Albuminuria due to lead poisoning. [Ollivier (B, 105).]—**A. scarlatineuse** (Fr.). Albuminuria due to scarlatina.—**A. spastique** (Fr.). See *Spastic* ALBUMINURIA.—**A. toxique** (Fr.). See *Toxic* ALBUMINURIA.—**A. transitoire** (Fr.). See *Temporary* ALBUMINURIA.—**A. transsudative** (Fr.). Albuminuria dependent solely upon filtration of albumin through the renal membranes, and not upon the presence of inflammatory products in the urine. [A. Gubler (B, 46).] Cf. *A. exsudative.*—**A. typhoïde** (Fr.). See *Typhoid* NEPHRITIS.—**A. vraie** (Fr.). See *True* ALBUMINURIA.—**Chronische A.** (Ger.). See *Chronic* ALBUMINURIA.—**Combinirte A.** (Ger.). See *Mixed* ALBUMINURIA.—**Dauernde A.** (Ger.). See *Permanent* ALBUMINURIA.—**Dyscrasische A.** (Ger.). Dyscrasic (hæmatogenous) albuminuria.—**Falsche A.** (Ger.), **Fausse a.** (Fr.). See *False* ALBUMINURIA.—**Gemischte A.** (Ger.). See *Mixed* ALBUMINURIA.—**Hämatogene A.** (Ger.). See *Hæmatogenous* ALBUMINURIA.—**Nephrogene A.** (Ger.). See *Nephrogenous* ALBUMINURIA.—**Neurotische A.** (Ger.). See *Neurotic* ALBUMINURIA.—**Pathologische A.** (Ger.). See *Pathological* ALBUMINURIA.—**Physiologische A.** (Ger.). See *Physiological* ALBUMINURIA.—**Pseudo-a.** (Fr.). See *False* ALBUMINURIA.—**Sero-A.** (Ger.). See *Sero-*ALBUMINURIA.—**Spastische A.** (Ger.). See *Spastic* ALBUMINURIA.—**Toxische A.** (Ger.). See *Toxic* ALBUMINURIA.—**Wahre A.** (Ger.). See *True* ALBUMINURIA.

ALBUMINURIOUS, adj. A^{2}l-bu^2″mi^2-nu^2′ri^2-u^{3}s. See ALBUMINURIC.

ALBUMINURIQUE (Fr.), adj. and n. A^{3}l-bu^6-mi^2-nu^6-rek. 1. Albuminuric. 2. (N.) one affected with albuminuria. [B, 93.]

ALBUMINURORRHŒA (Lat.), n. f. A^{2}l(a^{3}l)-bu^2(bu)-mi^{2}n-u^2(u)″ro-re′(ro′e^2)-a^3. From *albumin*, οὖρον, urine, and ῥοία, a flow. Fr., *albuminurorrhée* [Piorry]. Albuminuria. [Ultzmann (A, 319).]

ALBUMOR (Lat.), n. m. A^{2}l(a^{3}l)-bu^2(bu)′mo^{3}r. The same as albumen (as *a. ovi*, white of egg). [B, 59.]

ALBUMOSE, n. A^{2}l-bu^2-mos′. Fr., *albumose.* Ger., *Albumose.* It., *albumosio.* An albuminoid substance into which other albuminoid bodies are converted before their transformation into peptones in the process of natural or artificial digestion. [B.]—**Anti-a'.** Fr., *anti-albumose.* Ger., *Antialbumose.* A. produced by the digestion of that portion of an albuminoid substance which is ultimately converted into antipeptone. It closely resembles, and is perhaps identical with, syntonin. [B, 12.]—**Deutero-a'.** Fr., *deutéro-albumose.* Ger., *Deuteroalbumose.* A variety of a. distinguished by its solubility in distilled water, and by its being precipitated by the addition of acids and of sodium, but not by an excess of the latter reagent. It has a specific lævorotary power of 71·4° to 73·8°. [W. Kühne and R. H. Chittenden, "Ztschr. f. Biol."; "Cntrlbl. f. d. med. Wssnsch.," Aug. 23, 1884, p. 595 (B).]—**Dys-a'.** Fr., *dys-albumose.* Ger., *Dysalbumose.* A species of a. described by Kühne and Chittenden, distinguished by its insolubility in hot and cold water and in hydrochloric acid, and by its being precipitated from its solutions by the addition of sodium chloride in excess. [B.]—**Hemi-a'.** Fr., *hémi-albumose.* Ger., *Hemialbumose.* A. produced in the digestion of that portion of an albuminoid which is ultimately converted into hemipeptone. It is characterized by becoming soluble at 70° C., and being precipitated from its solution on cooling; and also by its solubility in a 10-per-cent solution of sodium chloride. [B, 12.]—**Hetero-a'.** Fr., *hétéro-albumose.* Ger., *Heteroalbumose.* A variety of a. described by Kühne and Chittenden (*l. c.*) which is soluble in dilute and concentrated hydrochloric acid, is precipitated by the addition of sodium chloride in excess, and is insoluble in hot and cold water. It has a specific lævorotary power of 68·65°. On further digestion this is converted into antialbumate. [B.]—**Prot-a'.** Fr., *proto-albumose.* Ger., *Protalbumose.* A variety of a. described by Kühne and Chittenden, distinguished by its solubility in both hot and cold water, being precipitated from its solutions by the addition of sodium chloride in excess. It has a specific lævorotary power of 71·4° to 79°. [B.]

ALBURNA (Lat.), n. f. A^{2}l(a^{3}l)-bu^{6}r(bur)′na^3. See ALBURNUM.

ALBURNITAS (Lat.), n. f. A^{2}l(a^{3}l)-bu^{6}r(bur)′ni^2-ta^{2}s(ta^{3}s). For deriv., see ALBURNUM. A disease of trees in which there is an arrest of the transformation of the sap-wood (alburnum) into the heart-wood, and in which, therefore, rings of the former are found mingled with the substance of the latter. [B, 19.]

ALBURNOÏDE (Fr.), adj. A^{3}l-bu^{6}r-no-ed. Resembling alburnum. [B, 38.]

ALBURNOUS, adj. A^{2}l-bu^{6}r′nu^{3}s. Pertaining to or having the characters of alburnum. [B, 39.]

ALBURNUM (Lat.), n. n. A^{2}l(a^{3}l)-bu^{6}r(bur)′nu^{3}m(nu^{4}m). From *albus*, white. Fr., *aubier.* Ger., *Splint.* Sp., *alburno, alburo.* The white sap-wood of trees. [B, 19.]

ALBUS (Lat.), adj. A^{2}l(a^{3}l)′bu^{3}s(bus). White. Cf. also ALBUM.

ALCACHINGI, n. Alkegengi. [B.] See PHYSALIS *alkegengi.*

ALCÆA (Lat.), n. f. A^{2}l(a^{3}l)-se′(ka^3′e^2)-a^3. See ALCEA.

ALCAEST, n. See ALCAHEST.

ALCAFUCHE (Port.), n. A^{3}l-ka^2-fu′zha. Hot sulphurous mineral springs situated at Viseu in the province of Beira, Portugal. They contain hydrogen sulphide and are said to differ in composition from all known springs. Employed in cutaneous and articular affections. [B, 88, 93.]

ALCAHEST, n. A^{2}l′ka^3-he^{2}st. Deriv. uncertain; perhaps a contraction for *alcali est*, it is (or it equals) alkali (potash). [B, 52, 78.] 1. A name given by Paracelsus to a liquid supposed to be curative of all sorts of congestions, and by Van Helmont to a liquid capable of dissolving every substance. 2. An alchemical name for mercury prepared for administration in diseases of the liver. [B, 44, 52, 78.]—**A. Glauberi, A. Helmontii.** Fr., *a. de Glauber.* It., *a. di Glaubero.* Sp., *a. de Glaubero.* Impure potassium carbonate. [B, 78.]—**A. Respurii.** Fr., *a. de Respour.* It., *a. di Respour.* Sp., *a. de Respour.* A substance produced by the lixiviation of the product obtained by decrepitating nitre with metallic zinc; a mixture of potash and zinc oxide. [B, 78.]—**A. Zwolferi.** Acetic acid, probably impure. [B, 78.]

ALCAHESTIC, adj. A^{2}l-ka^3-he^{2}st′i^{2}k. Ger., *alkahestisch.* Solvent. [D, 77.]

ALCAHOL, n. See ALCOHOL (2d and 5th def's).

ALCALÁ DEL REY (Sp.), n. A^{3}l-ka^3-la^3′de^{2}l-ra′e. The name of a town in New Castile, in Spain, having a mineral spring. [B, 88.]

ALCALAMIDE (Fr.), n. f. A^{3}l-ka^{3}l-a^3-med. Alkalamide. [B, 38.]

ALCALESCENCE (Fr.), n. f. A^{3}l-ka^{3}l-e^{2}s-sa^{3}ns. Alkalescence. —**A. des humeurs.** See ALKALESCENCE *of the humors.*

ALCALESCENS (Lat.), adj. A^{2}l(a^{3}l)-ka^2(ka^3)-le^{2}s′se^{2}nz(ke^{2}ns). Alkalescent.

ALCALESCENT (Fr.), adj. A^{3}l-ka^3-le^{2}s-sa^{3}n^2. Alkalescent.

ALCALESCENTIA (Lat.), n. f., and n. pl. A^{2}l(a^{3}l)-ka^2-(ka^3)-le^{2}s-se^{2}n(ke^{2}n)′shi^2(ti^2)-a^3. 1. Alkalescence. 2. Alkalinizing materials or remedies. [B, 78, 93.]

ALCALI (Lat., Fr.), n. n. A^{2}l(a^{3}l)′ka^2(ka^3)-li(le), a^{3}l-ka^3-le. Indecl. For deriv., see ALKALI. An alkali. Cf. ALCALIN.—**A. aéré** (Fr.). See *Aerated* ALKALI.—**A. ammoniacal** (Fr.). Ammonium sesquicarbonate. See AMMONIUM *carbonate.*—**A. ammoniacal anisé** Fr.). See *Spiritus* AMMONII *anisatus.*—**A. ammoniacum acetatum** (Lat.). An old term for liquor ammonii acetatis. [A, 305.]—**A. ammoniacum aquosum** (Lat.). A watery solution of ammonia. [A, 305.]—**A. ammoniacum causticum** (Lat.). See *Caustic* AMMONIA.—**A. ammoniacum fluidum** (Lat.). Liquor ammoniæ. [B, 97.]—**A. ammoniacum spirituosum** (Lat.). Spiritus ammoniæ. [B, 97.]—**A. ammoniacum succinatum** (Lat.). Ammonium succinate. [B, 119.]—**A. ammoniacum vinosum** (Lat.). See *Alcoholic* AMMONIA and *Spiritus* AMMONIÆ.—**A. ammoniacum volatile** (Lat.). Ammonium sesquicarbonate. See AMMONIUM *carbonate.* — **A. ammoniatum spirituosum.** See *Spiritus* AMMONIÆ.—**A. animal** (Fr.). Ammonia. [B, 92.]—**A. carbonaté** (Fr.). A carbonated alkali; an alkaline carbonate. [B, 51.]—**A. causticum** (Lat.), **A. caustique** (Fr.). See *Caustic* ALKALI.—**A. déliquescent** (Fr.). Deliquescent potash. [B, 93.]—**A. doux** (Fr.]. See *Mild* ALKALI.—**A. du nitre** (Fr.). Potash obtained from nitre. [B, 93.]—**A. du tartre** (Fr.). See *A. tartari.* —**A. effervescent** (Fr.). See *Effervescing* ALKALI.—**A. extemporané** (Fr.). See *A. tartari.*—**A. fixe, A. fixe minéral, A. fixe minéral aéré** (ou effervescent), **A. fixe végétal** (Fr.). See *Fixed* ALKALI, *Fixed mineral* ALKALI, *Aerated* or *Effervescing fixed mineral* ALKALI, and *Fixed vegetable* ALKALI.—**A. fixum** (Lat.). See *Fixed* ALKALI. — **A. fixum herbarum** (Lat.). See *Fixed vegetable* ALKALI.—**A. fixum tartarisatum** (Lat.). Potassium tartrate. [B, 88.]—**A. fixum vegetabile** (Lat.). See *Fixed vegetable* ALKALI. — **A. fixum vegetabile causticum** (Lat.). Caustic potash. [B.]—**A. fixum vegetabile impurum** (Lat.). Impure potassium carbonate obtained by the lixiviation of wood ashes. [B, 97.]—**A. fluor** (Lat.). Ammonia. [B, 119.]—**A. fos-**

sile (Lat., Fr.). See *Fossil* ALKALI.—**A. lignorum, A. lignorum depuratum** (Lat.). Refined potassium carbonate. [B, 88, 97.]—**A. liquor volatilis compositus.** See SPIRITUS *bezoardicus Bussii.*—**A. marin** (Fr.). Soda.—**A. marin caustique** (Fr.). See *Caustic* SODA.—**A. minéral** (Fr.). See *Mineral* ALKALI.—**A. minéral aéré** (Fr.). Normal sodium carbonate. [B, 93.)—**A. minéral boracique** (Fr.). Borax. [A, 324.]—**A. minerale** (Lat.). See *Mineral* ALKALI.—**A. minerale acetatum** (Lat.). Sodium acetate. [B, 97.]—**A. minerale muriatum** (Lat.). Sodium chloride. [B, 88.]—**A. minerale nitratum** (Lat.). Sodium nitrate. [D, 2.]—**A. minerale phosphoratum** (Lat.). Sodium phosphate. [B, 97.]—**A. minerale salitum** (Lat.). Sodium chloride. [B, 88.] —**A. minerale sulphuricum** (Lat.). Normal sodium sulphate. [B, 97.]—**A. minerale tartarisatum** (Lat.). Normal sodium tartrate [B, 88]; potassium and sodium tartrate. [B, 48, 97.]—**A. minerale vitriolatum, A. minerale vitriolicum** (Lat.). Normal sodium sulphate. [B. 48, 97.]—**A's minéraux** (Fr.). Mineral (inorganic) alkalies. See *Mineral* ALKALI (2d def.).—**A. mite** (Lat.). See *Mild* ALKALI.—**A's organiques** (Fr.). The alkaloids. [B, 38, 88.]—**A. phlogisticatum** (Lat.), **A. phlogistiqué** (Fr.). See *Phlogisticated* ALKALI.—**A. pneum** (Lat.). Borax. [Hahnemann (D, 90).]—**A. primaire** (Fr.). A primary amine. [B, 93.] —**A. secondaire** (Fr.). A secondary amine. [B, 93.]—**A. tartari** (Lat.). Fr., *a. du tartre, a. extemporané.* Ger., *Weinsteinsalz.* Sp., *álcali de tártaro.* Syn.: *sal tartari.* An old term for potassium carbonate obtained by igniting and lixiviating cream of tartar. [B, 48.]—**A. tartari acetatum, A. tartari aceto saturatum, A. tartari cum aceto** (Lat.). Potassium acetate. [B, 125.]—**A. terreux** (Fr.). An alcaline earth. [B, 46.]—**A. tertiare** (Fr.). A tertiary amine. [B.]—**A. urineux** (Fr.), **A. urinosum** (Lat.). Alkali obtained from urine; ammonia. [B, 107, 109.]—**A. vegetabile** (Lat.). See *Vegetable* ALKALI.—**A. vegetabile acetatum** (Lat.). Potassium acetate.—**A. vegetabile aeratum** (Lat.). Aerated vegetable alkali; potassium carbonate. [B.]—**A. vegetabile crystallisatum** (Lat.). Potassium bicarbonate. [B.] —**A. vegetabile cum aceto** (Lat.). Potassium acetate. [B, 97.] —**A. vegetabile fixum causticum** (Lat.). See POTASSA *fusa.*—**A. vegetabile mite depuratum** (Lat.). Purified potassium carbonate. [D, 90.]—**A. vegetabile nitratum** (Lat.). Potassium nitrate. [B, 80.]—**A. vegetabile perfecte saturatum** (Lat.). Potassium bicarbonate. [A, 314.] — **A. vegetabile salito-dephlogisticatum** (Lat.). Potassium chlorate. A substance having at the same time the functions and structure of an alcohol and a base. [B, 93.]—**Liquor a. volatilis acetici.** See *Liquor* AMMONII *acetatis.*—**Minerale a.** (Lat.). See *Mineral* ALKALI.—**Sal a.** (Lat.). An alkali. [B, 109.]—**Vegetabile a.** (Lat.). See *Vegetable* ALKALI.

ALCALICITÉ (Fr.), n. f. A^{3}l-ka^3-li^{2}s-i^2-ta. Alkalinity. [B, 38.]

ALCALIDE (Fr.), n. f. A^{3}l-ka^3-led. An alkaloid. [B, 92.]

ALCALIFIANT (Fr.), adj. A^{3}l-ka^3-li^{2}f-i^2-a^{3}n^2. Alkaligenous. [B, 52.]

ALCALIGEE (Ger.), n. A^{3}l-ka^{3}l-i^2-ga'. See ALCALIGENIUM.

ALCALIGEN, adj. and n. A^{3}l-ka^{2}l'i^2-je^{2}n. Fr., *alcaligène.* Ger., *alkaligen, alcaligen.* 1. Alkaligenous. 2. Alcaligenium.

ALCALIGENIUM (Lat.), n. n. A^{2}l(a^{3}l)-ka^2(ka^3)-li^2-je(ga)'ni^2-u^{3}m(u^{4}m). Fr., *alcaligène.* Ger., *Alkaligen, Alcaligen.* It., *alcaligeno.* Sp., *alcaligeno.* Alkaligen, alkaligene; old names for nitrogen. [B.] Cf. ALKALIGENOUS.

ALCALIGENUS (Lat.), adj. A^{2}l(a^{3}l)-ka^2(ka^3)-li^2'je^2(ge^2)-nu^{3}s-(nu^{4}s). Alkaligenous.

ALCALIMETER, n. A^{2}l-ka^2-li^2'me^2-tu^{5}r. Fr., *alcalimètre.* See ALKALIMETER.

ALCALIMÉTRIE (Fr.), n. f. A^{3}l-ka^3-li^2-ma-tre. Alkalimetry.

ALCALIMÉTRIQUE (Fr.), adj. A^{3}l-ka^3-li^2-ma-trek. Alkalimetric.

ALCALIMETRUM (Lat.), n. n. A^{2}l(a^{3}l)-ka^2(ka^3)-li^2-me^{2}t'ru^{3}m-(ru^{4}m). See ALKALIMETER.

ALCALIN (Fr.), adj. and n. A^{3}l-ka^3-la^{2}n^2. 1. Alkaline. 2. (N.) an alkaline substance or remedy. [B, 93.] The term is especially restricted to denote an alkaline salt formed by the incomplete neutralization of a base by an acid, as distinguished from *alcali* which is the base itself or its oxide. [B, 105.]

ALCALINISER (Fr.), v. tr. A^{3}l-ka^3-li^{2}n-i^2-za. To render alkaline. [B, 52.]

ALCALINITAS (Lat.), n. f. A^{2}l(a^{3}l)-ka^2(ka^3)-li^{2}n'i^2-ta^{2}s(ta^{3}s). Gen., *alcalinitat'is.* Alkalinity. [A, 320.]

ALCALINITÉ (Fr.), n. f. A^{3}l-ka^3-li^{2}n-i^2-ta. Alkalinity.

ALCALINO-CUPRIQUE (Fr.), adj. A^{3}l-ka^3-le-no-ku^6-prek. Alkaline and containing copper. [B.]

ALCALINO-FERRUGINEUX (Fr.), adj. A^{3}l-ka^3-le-no-fe^{2}r-ru^6-zhe-nu^5. Containing both alkalies and iron. [B, 38.]

ALCALINO-PLOMBIFÈRE (Fr.), adj. A^{3}l-ka^3-le-no-plo^{2}n^2-bi^2-fe^{2}r. Alkaline and containing lead. [B, 38.]

ALCALINO-TERREUX (Fr.), adj. A^{3}l-ka^3-le-no-te^{2}r-ru^5. Alkaline earthy. [B, 38.]

ALCALINULE (Fr.), adj. A^{3}l-ka^3-li^2-nu^{6}l. Slightly alkaline (said of a salt in which there is a slight excess of the basic element or radicle over the amount required to neutralize the acid element). [B, 38.]

ALCALINURIA (Lat.), n. f. See ALKALINURIA.

ALCALINUS (Lat.), adj. A^{2}l(a^{3}l)-ka^2(ka^3)-li(le)'nu^{3}s(nu^{4}s). Alkaline.

ALCALISATIO (Lat.), n. f. A^{2}l(a^{3}l)-ka^2(ka^3)-li^2-za(sa^3)'shi^2-(ti^2)-o. Gen., *alcalisatio'nis.* Fr., *alcalisation.* Alkalinization. [B, 78.]

ALCALISATUS (Lat.), adj. A^{2}l(a^{3}l)-ka^2(ka^3)-li^2-za(sa^3)'tu^{3}s-(tu^{4}s). Fr., *alcalisé.* Alkalinized. [B.]

ALCALOÏDE (Fr.), n. m. A^{3}l-ka^3-lo-ed. An alkaloid.—**A's animaux.** Animal alkaloids. [B, 52.]—**A. artificiel.** An artificial alkaloid. [B, 38.]—**A. cadavérique.** A cadaveric alkaloid. [B.] See PTOMAINE.—**A. naturel.** A natural alkaloid. [B, 38.]—**A's pyridiques.** See PYRIDINE *bases*—**A's végétaux.** Vegetable alkaloids. [B.]

ALCALOIDES (Lat.), n. n. A^{2}l(a^{3}l)-ka^2(ka^3)-lo-i(e)'dez(de^{2}s). Gen., *alcaloid'eos (-eis).* Really the neuter (Gr., ἀλκαλοειδές) of the adjective *alcaloides* (Gr., ἀλκαλοειδής), resembling an alcali. An alkaloid. [B, 78.]—**Alcaloidea acria, alcaloidea narcotica.** See ALKALOIDEA *acria* and ALKALOIDEA *narcotica.*

ALCALOIMETRIA (Lat.), n. f. A^{2}l(a^{3}l)-ka^2(ka^3)-lo-i^2-me^{2}t'-ri^2-a^3. From *alcaloides,* and μέτρον, a measure. Fr., *alcaloïmétrie.* The quantitative estimation of alkaloids. [B, 78, 92.]

ALCALOIMETRUM (Lat.), n. n. A^{2}l(a^{3}l)-ka^2(ka^3)-lo-i^2-me^{2}t'-ru^{3}m(ru^{4}m). Fr., *alcaloïmètre.* Ger., *Alkaloïmeter.* An instrument for the quantitative estimation of alkaloids. [B, 78.]

ALCALURETICA (Lat.), n. n. pl. A^{2}l(a^{3}l)-ka^2(ka^3)-lu^2(lu)-re^{2}t'i^2-ka^3. Gen., *alcaluretico'rum.* From *acali,* and οὐρεῖν, to urinate. Drugs supposed to render the urine alkaline. [A, 305.]

ALCAMO (It.), n. A^{3}l-ka^3'mo. A sulphurous mineral spring in Sicily, containing in 10,000 parts by weight:

Sulphur	7·0
Calcium carbonate	4·8
Magnesium carbonate	2·0
Sodium chloride	3·0
Hydrogen sulphide gas, about 9,000 parts by volume	13·8
Carbon dioxide gas, about 2,100 parts by volume	4·4

Temperature 74° C. Recommended for respiratory, articular, and cutaneous affections. [B, 88, 93.]

ALCAMOR, n. From Ar., *al-qamar,* the moon. An alchemical term for silver. [B, 52.]

ALCAMPHORA, n. A name given in Brazil to the *Croton perdicipes,* or to a remedy made from it. [B, 7, 19.]

ALCANA, n. See ALCANNA and ALKANNA.

ALCANETTE (Fr.), n. f. A^{3}l-ka^3-ne^{2}t. Alkanet. [A, 342.]

ALCANNA (Lat.), n. f. A^{2}l(a^{3}l)-ka^{2}n(ka^{3}n)'na^3. 1. Alkanna (*q. v.*). 2. A species of *Phillyrea.* [B, 110.]—**Alcannæ radix, Alcannæ spuriæ radix, A'roth,** etc. See under ALKANNA.

ALCANTUD (Sp.), n. A^{3}l-ka^{3}n-tud'. An acidulous mineral spring situated in the province of Cuença, Spain, containing sulphur, magnesia, and iron; recommended in digestive and nervous disorders and in anæmia. [A, 255, 321.]

ALCAOL, n. An old name for mercury (in the alchemical sense of the word). [B, 50.] See MERCURY.

ALCAPTONE (Fr.), n. f. A^{3}l-ka^{3}p-ton. Alkaptone. [B, 107.]

ALCAPTONURIE (Fr.), n. A^{3}l-ka^{3}p-ton-u^6-re. Alkaptonuria. [B.]

ALCAR (Lat.), n. n. A^{2}l(a^{3}l)'ka^{3}r. From ἄλκαρ, a defense. A remedy. [B, 111.]

ALCARA, n. From Ar., *al-qaraɔ,* a gourd. A gourd; in alchemical nomenclature, the heater (cucurbita) of an alembic. [B, 52.]

ALCARAZ (Sp.), n. A^{3}l-ka^3-ra^{3}th^2'. A sulphurous mineral spring in the province of Salamanca, Spain; recommended in nervous and alimentary disorders. [B, 130.]

ALCARAZZA, ALCARRAZA, n's. A^{3}l-ka^{3}r-ra^3'za^3. From Sp., *alcarraza* (from Ar., *al,* the, and *kurrâz,* a jug). A vessel used in hot climates, made of slightly burnt clay, which is very porous, so that the contained liquid oozes through to the outside, forming a sort of dew, by the rapid evaporation of which the vessel is cooled. [B, 2.]

ALCARSINE (Fr.), n. f. A^{3}l-ka^{3}r-sen. See ALKARSINE.

ALCARGEN, n. A^{2}l-ka^{3}r'je^{2}n. Cacodylic (dimethylarsinic) acid. [A, 346.]

ALCE (Lat.), n. f. A^{2}l(a^{3}l)'se(ka). Gen., *al'ces.* From ἀλκή, strength, defense. 1. Strength, power. 2. Defense, protection. [A, 322.]

ALCEA (Lat.), n. f. A^{2}l(a^{3}l)′se(ka)-a^3. From ἀλκέα, the mallow. Fr., *alcée*. Ger., *Alcee*. It., Sp., *alcea*. 1. A sort of mallow mentioned by Pliny and Dioscorides. 2. A subdivision made by Linnæus of the genus *Althœa*, to which the species included by him under A. are now usually referred. [B, 48, 93.]—**Alceæ ægyptiacæ.** See *Semen* ABELMOSCHI.—**Alceæ radix.** The root of *Malva alcea* (*q. v.*). [B, 97.]—**A. indica.** See ABELMOSCHUS.—**A. rosea** [Linnæus]. See ALTHÆA *rosea*.—**A. villosa.** See ABELMOSCHUS.—**A. vulgaris major.** Arnica montana. [B, 59.]

ALCEBAR, n. Agallochum, or aloes-wood. [B, 59.]

ALCEBRIS, n. From Ar., *Al-kibrît*, sulphur. An alchemical term for sulphur. [B.]—**A. vivum.** See SULPHUR *vivum*.

ALCEDA (Sp.), n. A^{3}l-tha′dth^{2}a^3. A sulphurous spring in the province of Santander, Spain, between the cities of Santander and Burgos. It has a temp. of 26° to 27° C., and contains hydrogen sulphide, sodium chloride, magnesium chloride, and calcium sulphate. It has been recommended in the treatment of elephantiasis. [A, 319, 337.]

ALCÉE (Fr.), n. f. A^{3}l-sa. The hollyhock. See ALTHÆA *rosea*. —**A. de la Floride.** The *Gordonia lasianthus*. [B, 19.]

ALCEENMALVE (Ger.), n. f. A^{3}l-tza′e^{2}n-ma^{3}l″fe^2. The *Malva alcea*.

ALCES (Lat.), n. A^{2}l(a^{3}l)′sez(ke^{2}s). Gen., *al′cis*. From ἄλκη, the elk (said to be from ἀλκή, strength, but more probably related to ἔλαφος, the deer). O. H. G., *alaho*. Also written *alchis* [Pliny]. Fr., *élan*. Ger., *Elenthier*. The elk or moose (*Cervus alces* [Linnæus]). It was believed to be subject to epilepsy and to furnish a remedy for that disease. Also the genus to which the elk belongs. [B, 28, 78, 114, 115.]—**A. palmatus.** See CERVUS *alces*.—**Alcis cornu.** Hart's horn. [B, 57.]—**Alcis cornu philosophice præparatum.** A preparation of some pharmacopœias of the last century, made by boiling stag's horn, cut into small pieces, in water, until it became soft, removing the cortical and inner spongy portions, drying, and pulverizing. [B, 57.]—**Alcis ungulæ.** Elk's hoofs; once employed as a specific for epilepsy. [B, 78.]—**Spiritus ungulæ alcis.** See *Spiritus* CORNU CERVI.—**Ungulæ alcis.** See *Alcis ungulæ*.

ALCETO (It.), n. A^{3}l-cha′to. See MONTE ALCETO.

ALCHABRIC, n. See ALKIBRIC.

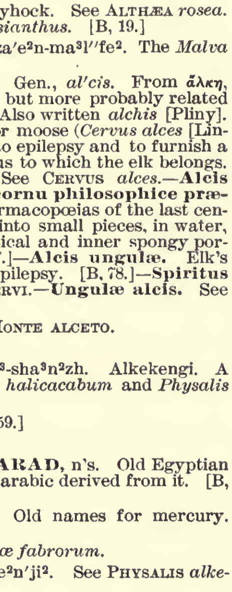
ALCHACHENGE (Fr.), n. A^{3}l-ka^3-sha^{3}n^{2}zh. Alkekengi. A term applied both to *Cardiospermum halicacabum* and *Physalis alkekengi*. [B, 88.]

ALCHACHIL, n. Rosemary. [B, 59.]

ALCHAHEST, n. See ALCAHEST.

ALCARAB, ALCARAD, ALCHARAD, n's. Old Egyptian names for *Acacia Senegal* or the gum arabic derived from it. [B, 88, 128, 130.]

ALCHARIT, ALCHARITH, n's. Old names for mercury. [B, 59, 111.]



ALCHAZONON, n. See LUTUM *rotæ fabrorum*.

ALCHECHENGI (It.), n. A^{3}l-ka-ke^{2}n′ji^2. See PHYSALIS *alkekengi*.

ALCHEMIA (Lat.), n. f. A^{2}l(a^{3}l)-ke^{2}m(ch^{2}am)-i(e)′a^3. Alchemy.

ALCHEMIC, ALCHEMICAL, adj. A^{2}l-ke^2′mi^{2}k, -ke^2′mi^2-ka^{2}l. Fr., *alchimique*. Ger., *alchemisch*. It., *alchimico*. Sp., *alquímico*. Of or pertaining to alchemy.

ALCHEMILLA (Lat.), n. f. A^{2}l(a^{3}l)-ke^{2}m(ch^{2}e^{2}m)-i^{2}l′la^3. Ar., *âl-kemelyeh*, because it was much used by the alchemists. Fr., *alchimille*. Ger., *Frauenmantel*, *Sinau*. Sp., *alquimila*. A genus of rosaceous herbs established by Linnæus, belonging to the suborder *Sanguisorbeæ*, having a persistent tubular calyx, four-parted and provided with 4 external bracteoles, 1 to 4 very short stamens inserted on the calyx, and 1 to 4 carpels with the style laterally disposed. The flowers are scattered (*i. e.*, not arranged in clusters). [B, 34, 51.]—**A. alpina** [Linnæus], **A. alpinus.** Fr., *alchimille satinée* (ou *argentée*). Ger., *Alpenfrauenmantel*. Silvery ladies'-mantle. A species of a. growing upon rocks in the mountainous districts of Europe, and, according to some authors, in America. It has occasionally been used as a substitute for *A. vulgaris* in medicine. [B, 34, 48, 71, 93.]—**A. aphanes, A. arvensis** [Scopoli]. Fr., *petit pied-de-lion*, *perce-pierre des champs*. Ger., *Ackersinau*. Syn.: *Aphanes arvensis* [Linnæus]. Parsley-piert; a small annual species with minute green flowers arranged in axillary tufts, growing in waste lands and cultivated fields in America and Great Britain. [B, 19, 34, 71.]—**A. argentea** [Lamarck]. *A. alpina*. [B, 173.]—**A. vulgaris** [Willdenow]. Fr., *alchimille*, *manteau des dames*, *pied-de-lion*. Ger., *gemeiner Frauenmantel*, *Ackerfrauenmantel*, *Alchemistenkraut*. It., *piede di leone*. Sp., *alquimila*, *pie de leon*. Ladies'-mantle; a species common in Europe, bearing petiolate, roundish, lobate leaves and small golden-green flowers. Its root is thick, fibrous, and of a black color, and has a disagreeable odor and an astringent taste. The leaves were formerly official, and the root (*radix alchemillœ majoris*, *radix pedis leonis*, *radix leontopodii*) has been used in medicine as an astringent, diuretic, and vulnerary. Two varieties of the plant are described: *A. vulgaris*, var. *alpina*, and *A. vulgaris*, var. *glabra*. [B, 19, 47, 52, 112, 173.]—**Radix alchemillæ majoris.** See *A. vulgaris*.

ALCHEMILLA VULGARIS.
[B, 106.]

ALCHEMILLEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-ke^{2}m(ch^{2}e^{2}m)-i^{2}l′-le^2-e(a^3-e^2). Gen., *alchemillea′rum*. Fr., *alchémillées*. Ger., *Alchemilleen*. 1. The name given by Reichenbach to a division of the sub-order *Sanguisorbeæ*, including the genera *Alchemilla* and *Aphanes*. 2. A sub-tribe of the *Sanguisorbeæ* comprising *Alchemilla*, *Sanguisorba*, and other genera. [B, 170.]

ALCHEMIST, n. A^{2}l′ke^{2}m-i^{2}st. Fr., *alchimiste*. Ger., *Alchemist*. It., *alchimisto*. Sp., *alquimista*. One who practises alchemy.

ALCHEMISTENKRAUT (Ger.), n. A^{3}l-ch^{2}e^{2}m-i^{2}s′te^{2}n-kra^3-ut. See ALCHEMILLA *vulgaris*.

ALCHEMY, n. A^{2}l′ke^{2}m-i^2. From Ar., *Al-kîmîâ* (probably from χημεία, chemistry, with the article *al*, the, prefixed; but perhaps from Ar., *Alchakîm*, a philosopher). The form *alchymy* was made on the theory of the derivation from χυμεία, a melting together (in Byzant.-Gr., also meaning chemistry). [A, 302, 311; B, 39, 52, 78.] Fr., *alchimie*. Ger., *Alchemie*, *Alchymie*. It., *alchimia*. Sp., *alquimia*. 1. A pretended science, much in vogue in the Middle Ages and down to the end of the 17th century, which had for its object the transmutation of the metals into gold and the discovery of the elixir of life, the panacea, and the philosopher's stone. The researches carried on by the votaries of a. laid the foundation of modern chemistry and formed the basis of much of the medical science of the 17th and 18th centuries. [B.] 2. An alloy. See ALCHYMY.

ALCHERMES, n. See ALKERMES.

ALCHERON, n. See LAPIS *a*. and BEZOAR *bovinus*.

ALCHIBERT, ALCHIBRIC, n's. See ALKIBRIC.

ALCHIEN, n. See ALKIAN.

ALCHIMELECH, n. See ALKHIL-AL-MELECH.

ALCHIMIE (Fr.), n. f. A^{3}l-shi^2-me. Alchemy.

ALCHIMILLA (Lat.), n. f. A^{2}l(a^{3}l)-ki^2(ch^{2}i^2)-mi^{2}l′la^3. 1. Of Tournefort, a genus comprising the *Alchemilla* and *Aphanes* of Linnæus. 2. Of Hallier, the *Alchemilla* of Linnæus. [B, 170.]

ALCHIMILLE (Fr.), n. f. A^{3}l-shi^2-mel. Alchemilla, especially the *Alchemilla vulgaris*. [B, 52.]—**A. Alpine.** 1. *Alchemilla alpina*. 2. *Alchemilla vulgaris*, var. *alpina*.—**A. argentée.** *Alchemilla alpina*. [B, 46.]—**A. commune.** *Alchemilla vulgaris*. [B.]—**A. des Alpes.** *Alchemilla alpina* [B, 51.]—**A. glabre.** *Alchemilla vulgaris*, var. *glabra*. [B, 173.]—**A. satinée.** *Alchemilla alpina*. [B, 173.]

ALCHIMILLEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-ki^{2}m(ch^{2}i^{2}m)-i^{2}l′le^2-e(a^3-e^2). See ALCHEMILLEÆ (1st def.).

ALCHIMINIER (Fr.), n. A^{3}l-shi^2-mi^2-ni^2-a. The medlar (*Mespilus germanica*). [B, 88.]

ALCHIMIQUE (Fr.), adj. A^{3}l-shi^2-mek. Alchemical.

ALCHIMISTE (Fr.), n. m. A^{3}l-shi^{2}m-est. An alchemist.

ALCHITRAN, ALCHITRON, n's. From Ar., *al-qat′rân* (Sp., *alquitran*), resin, pitch. Lat., *alchitrum*, *alquitranum*. Also written *alkatran*, *alkitran*, *alkitrum*, etc. 1. An alchemical term for resin, and allied substances, such as oil of juniper, tar, and bitumen. 2. Prepared arsenic. [B, 39, 48, 50.] Cf. CATRAME and GOUDRON.

ALCHOLIZATED, adj. A^{2}l-ko^{2}l′i^2-za″te^{2}d. Alcoholized.

ALCHOOL, n. A^{2}l′ko-o^{2}l. An old form of *alcohol*. [B, 109.]

ALCHORNEA (Lat.), n. f. A^{2}l(a^{3}l)-ko^{2}r(ch^{2}o^{2}r)′ne^2-a^3. Fr., *alchornée*. A genus of euphorbiaceous plants established by Solander. [B, 48.]—**A. cordata** [Bentham]. Fr., *buisson de Noël*. Syn.: *Schousbœa cordifolia*. A species growing in Senegal and Guinea, distinguished by its cordate leaves. It has been used as a sudorific. [B, 46.]—**A. iricurana** [Casar]. A Brazilian species with long-petiolate, ovoid leaves. Used in anginas and as a vulnerary. [H. Baillon (B, 46).]—**A. latifolia** [Swartz]. A species growing in Jamaica, employed as a sudorific in rheumatism and syphilis. It was at one time thought to be the source of alcornoque bark. [B, 48, 88, 93.]

ALCHORNIN, n. A^{2}l-ko^{2}r′ni^{2}n. See ALCORNIN.

ALCHUR, n. An alchemical name for sulphur. [A, 337.]

ALCHUTE (Ar.), n. An excrescence (*morum*) occurring upon the eyelids. [B, 59.] See under TRACHOMA *carunculosum*.

ALCHYMIA (Lat.), n. f. A^{2}l(a^{3}l)-ki^{2}m(ch^{2}u^{6}m)′i^2-a^3. See ALCHEMY.

ALCHYMILLA (Lat.), n. f. A^{2}l(a^{3}l)-ki^{2}m(ch^{2}u^{6}m)-i^{2}l′la^3. See ALCHEMILLA.

ALCHYMY, n. A^{2}l′ki^2-mi^2. For deriv., see ALCHEMY. Lat., *alchymia*. Fr., *alchymie*. Ger., *Alchymie*. It., *alchimia*. Sp., *alquimia*. 1. Alchemy. 2. An alloy of copper and arsenic resembling silver. [B, 59.]

ALCHYTRAN, n. Deriv. perhaps through Ar. from Gr., χύτρα, a pot. Also written *alkytran*. A remedy applied to painful and carious teeth; perhaps rock alum, or some mineral salt melted in pots. [B, 111.]

ALCIBIADIUM, ALCIBIUM (Lat.), n's n. A^{2}l(a^{3}l)-si^2(ki^2)-bi(be)-a^2(a^3)′di^2-u^{3}m(u^{4}m), -si^2(ki^2)′bi^2-u^{3}m(u^{4}m). Gr., ἀλκιβιάδιον [Galen, Dioscorides], from ἀλκή, protection, and βίος, life. The viper's bugloss (*Echium vulgare*), so called because used as an antidote to the bite of the viper. [A, 311; B, 78.]

ALCICORNIS (Lat.), adj. A^{2}l(a^{3}l)-si^2(ki^2)-ko^{2}r′ni^{2}s. For deriv., see ALCES and CORNU. Fr., *alcicorne*. Having horns resembling those of an elk. [A, 346.]

ALCIMAD, ALCIMOD, n's. Ar., *al-uthmud*, antimony. An alchemical term for antimony. [B, 52.]

ALCMELLA (Lat.), n. f. A^{2}lk(a^{3}lk)-me^{2}l'la^3. Fr., *alcmelle.* See ACMELLA.—**A. ceylanica.** A name given by Slevogt (1703) to *Spilanthes acmella.* [B, 46.]—**A. Linnæi** [Cassini]. See ACMELLA *Linnæi.*

ALCOATE, n. A^{2}l'ko-at. For deriv., see ALCOHOL. A name given by Graham (1828) to an alcoholate. [B, 39.]

ALCOB, n. See ALACAP.

ALCOCALUM (Lat.), n. n. A^{2}l(a^{3}l)-ko'ka^2(ka^3)-lu^{3}m(lu^{4}m). Perhaps from ἀλκή, strength, and κόκκαλος, a pine cone. [B, 109.] The artichoke. [B, 109.]

ALCOFOL, n. See ALCOHOL (1st def.).

ALCOGENE, n. A^{2}l'ko-jen. From *alcohol*, and γεννᾶν, to beget. The cooler of a still. [B, 39.]

ALCOGEL, n. A^{2}l'ko-je^{2}l. For deriv., see ALCOHOL and GELATIN. The gelatinous compound of alcohol and silicic acid. [B, 2.] See ALCOSOL.

ALCOHATE, n. A^{2}l'ko-hat. See ALCOHOLATE.

ALCOHOL, n. A^{2}l'ko-ho^{2}l. Deriv., Ar., *al-koᵉhl*, a collyrium, from *kaᵉhala* (Hebr., *kākhal*), to stain or paint. Lat., *alcohol* (m. or n.: gen., *alcoho'lis*). Fr., *alcool.* Ger., *Alkohol.* It., *alcool, alcol.* Sp., *alcohol.* Also written *alcaol* and *alkohol.* 1. Antimony or its trisulphide (used in the East as a pigment for the eyebrows). 2. A fine powder used as an application to the eyes. [Sandys (1615).] 3. Any very finely divided powder. "A. est pulvis subtilissimus." [B, 50.] 4. Hence, from the sense of tenuity thus acquired, the essence or inner principle of anything. 5. In its common acceptation, the essence or spirit of wine, *a. vini.* Common or ethyl a. [See ETHYL A.] 6. In chemistry, a generic term (first used in this sense by Dumas and Péligot in 1834 or 1835) for a series of compounds of which ethyl a. is a type, and which may be regarded as derived from the hydrocarbons by the replacement of one or more atoms of hydrogen in the latter by one or more molecules of hydroxyl; or they may be considered as formed by the substitution of a univalent, bivalent, or trivalent hydrocarbon for half the hydrogen in one, two, or three molecules of water (H_2O). The a's have, accordingly, the general formula $(C_nH_m)'OH$, $(C_pH_q)''(OH)_2$, $(C_rH_s)'''(OH)_3$, etc., being designated as monatomic, diatomic, triatomic, etc., according to the number of hydroxyl molecules which they contain, and receiving their specific names from that of the radicle (C_nH_m, etc.) combined with the hydroxyl (*e. g.*, $C_2H_5.OH$, ethyl a., $C_3H_5.(OH)_3$, glyceryl a.). The a's may be regarded as analogues of the inorganic hydrates, such as potassa, and, like the latter, they possess basic properties. On oxidation they are converted into aldehydes, ketones, and organic acids. [B, 2, 3, 4, 39, 50.] See also GLYCOL, GLYCERIN, CARBINOL, and PHENOL, and for the individual a's see the major list.—**Absolute a.** Lat., *a. absolutum* (seu *absolutus*). Fr., *alcool absolu.* Gr., *wasserfreier* (oder *absoluter*) *Alkohol.* It., *alcool assoluto.* Sp., *a. absoluto.* Syn.: *anhydrous a.* Ethyl a. deprived of water. See ETHYL A.—**Albuminous a.** A solution of white of egg in ordinary (ethyl) a. [B, 97.]—**A. absolutum, A. absolutus.** Absolute a. See ETHYL A.—**A. aceti.** Fr., *alcool de vinaigre.* Ger., *Essigalkohol.* Acetic acid. [B, 48.]—**A. æthereus ferratus.** See *Tinctura* FERRI CHLORATI *ætherea.*—**A. alcalisatum, A. alkalisatum.** 1. Nearly absolute ethyl a. obtained by the dehydrating action of potassium carbonate upon ordinary a. [B, 97.] See ETHYL A. 2. An alcoholic solution of potash. [B. 119.]—**A. ammoniacale aromaticum, A. ammoniacatum aromatisatum.** See *Spiritus* AMMONIÆ *aromaticus.*—**A. ammoniæ anisatum.** See *Spiritus* AMMONIÆ *anisatus.*—**A. ammoniæ et guaiaci.** See *Tinctura* GUAIACI *ammoniata.*—**A. ammoniatum, A. ammoniatum aromaticum, A. ammoniatum fœtidum.** See *Spiritus* AMMONIÆ, *Spiritus* AMMONIÆ *aromaticus*, and *Spiritus* AMMONIÆ *fœtidus.*—**A. amylicum** [Br. Ph.]. See AMYL *a.*—**A. aromaticum.** See SPIRITUS *aromaticus.*—**A. aromaticum ammoniatum.** See *Spiritus* AMMONIÆ *aromaticus.*—**A. aromaticum sulphuricum.** See ACIDUM SULPHURICUM *aromaticum.*—**A. aromaticus ammoniatus.** See *Spiritus* AMMONIÆ *aromaticus.*—**A. camphoratum.** See *Spiritus* CAMPHORÆ.—**A. camphoratum crocatum.** See AQUA *pestilentialis.*—**A. camphoratus, A. camphoratus debilior.** The equivalents for the *teinture de camphre concentré* and *teinture de camphre faible* of the Fr. Codex. [B.] See *Spiritus* CAMPHORÆ.—**A. castoriatum.** See *Tinctura* CASTOREI.—**A. concentratissimum.** Very strong ethyl a. See ETHYL A.—**A. cum aloe, A. cum aloe perfoliata.** See *Tinctura* ALOES.—**A. cum aromatibus compositus.** A preparation corresponding to the *tinctura cinnamomi composita* of the old Lond. Ph. [B, 97.] See TINCTURA *aromatica.*—**A. cum aromatibus sulphuricatus.** See ACIDUM SULPHURICUM *aromaticum.*—**A. cum citro aurantio.** See *Tinctura* AURANTII.—**A. cum crotone cascarilla.** See *Tinctura* CASCARILLÆ.—**A. cum ferri sulphate tartarizatus.** See *Tinctura* MARTIS *aperitiva.*—**A. cum guaiaco officinali ammoniatus.** See *Tinctura* GUAIACI *ammoniata.*—**A. cum opio.** See *Tinctura* OPII.—**A. cum rheo.** See *Tinctura* RHEI.—**A. cum succino.** See *Tinctura* SUCCINI.—**A. cum sulphate ferri tartarisatus.** See *Tinctura* MARTIS *aperitiva.*—**A. cum tartrate potassæ ferratus.** See *Tinctura* FERRI *tartarisata.*—**A. dehydrogenatum, A. dehydrogenatus.** Aldehyde.—**A. dilutum, A. dilutus.** Dilute a. See under ETHYL A.—**A. ethylicum** [Br. Ph.]. Absolute a. See ETHYL A.—**A. ferratum.** See *Tinctura* FERRI CHLORIDI.—**A. ferratum æthereum.** See *Tinctura* FERRI CHLORATI *ætherea.*—**A. ferratus.** See *Tinctura* FERRI CHLORIDI.—**A. formicarum distillatum.** See *Spiritus* FORMICARUM.—**A. fortius.** Stronger a.; a title official in several pharmacopœias. See ETHYL A.—**A. helenii compositum.** See SPIRITUS *carminativus.*—**A. iodii.** See *Tinctura* IODI.—**A. juniperi compositum.** See *Spiritus* JUNIPERI *compositus.*—**A. lamp.** See under LAMP.—**A. martis.** See *Alcoholized* IRON (1st def.).—**A. methylicum.** Methyl a.—**A. nitrico-æthereum.** Nitrous ether; ethyl nitrite. [B, 97.]—**A. nitricum.** See *Spiritus* ÆTHERIS NITROSI.—**A. nitricum æthereum.** See *A. nitrico-æthereum.*—**A. of crystallization.** Fr., *alcool de cristallisation.* Ger., *Krystallisationsalkohol.* It., *alcool di cristallizzazione.* Sp., *a. de cristalización.* A. which unites molecule by molecule with a crystalline substance, and, like water of crystallization, helps to maintain the crystalline form of the latter. Thus sodium ethylate, when crystallized from an alcoholic solution, contains 2 molecules of a. of crystallization, $C_2H_5O.Na + 2C_2H_6O$, and in this form consists of colorless acicular crystals, but when deprived of its a. of crystallization becomes a white amorphous powder. Both methyl a. and ethyl a. unite in this way with salts. [B.]—**A. of sulphur.** See under SULPHUR.—**A. of the fatty series.** See *Fatty a.*—**A. opii dilutum.** See *Tinctura* OPII *simplex.*—**A. potassæ.** An alcoholic solution of potash. [B, 87.]—**A. radicle.** See under RADICLE.—**A. rectificatissimum, A. rectificatum.** Rectified a. [B.] See ETHYL A.—**A. salviæ vulnerarius.** See under SALVIA.—**A. saponatum.** See *Tinctura* SAPONIS.—**A. serpylli compositum.** See *A.* SERPYLLI *compositum.*—**A. sulfurico-æthereum.** See *A. sulphurico-æthereum.*—**A. sulfuris.** See *A. of* SULPHUR.—**A. sulphuricatum.** See MIXTURA *sulfurica acida.*—**A. sulphurico-æthereum.** Impure ether mixed with ethyl a. [B, 97.]—**A. sulphurico-æthereus ferri, A. sulphurico-æthereus martiatus.** See *Tinctura* FERRI CHLORATI *ætherea.*—**A. sulphuricum.** See MIXTURA *sulfurica acida.*—**A. sulphuricum æthereum.** See *A. sulphurico-æthereum.*—**A. sulphuricus cum ferro.** See *Tinctura* FERRI CHLORATI *ætherea.*—**A. sulphuris.** See *A. of* SULPHUR.—**A. terebinthinæ.** Oil of turpentine. [B, 97.]—**A. thermometer.** See under THERMOMETER.—**A. vini.** 1. The name (meaning spirit of wine) by which ethyl a. was known before the term a. was applied to that substance exclusively. [Paracelsus (B, 50).] See *A.* 2. In the old editions of the Sp. Ph., purified spirit obtained by the re-distillation of *a. vini commune.* [B, 97.]—**A. vini alcoholizatum.** Strong ethyl a. [B, 97.]—**A. vini commune.** Rectified spirit. [B, 97.]—**Aldehyde a.** Fr., *alcool-aldéhyde.* Ger., *Aldehydalkohol.* A substance which has at once the structure and properties of an a. and an aldehyde. Aldol, $CH_3.CH(OH).CH_2.C(H){:}O$, is an example, containing the molecule $C(H){:}O$ characteristic of the aldehydes, and being converted into a monobasic acid on oxidation, while it also contains a molecule of alcoholic hydroxyl (OH). The aldehyde a's may be regarded as glycols whose conversion into aldehydes has been incomplete, they being intermediate in structure between ordinary aldehydes and double aldehydes. [B.]—**Ammoniated a.** See *Spiritus* AMMONIÆ.—**Amylic a.** See AMYL A.—**Anhydrous a.** Fr., *alcool anhydre.* Ger., *wasserfreier Alkohol.* It., *alcool anidro.* See *Absolute a.*—**Aqueous a.** See *Hydrated a.*—**Aromatic a.** Fr., *alcool aromatique.* Ger., *aromatischer Alkohol.* It., *alcool aromatico.* Sp., *alcohol aromático.* An a. the radicle of which contains phenyl or one of its homologues. The aromatic a's proper are derived from the series of hydrocarbons homologous with benzene by the substitution of hydroxyl for an atom of hydrogen not in direct connection with a carbon atom of the benzene nucleus. Their constitution is, therefore, expressed by the general formula, $C_6H_5.C_nH_{2n}(OH)$, in which the hydrogen of the benzene-residue, C_6H_5, admits of further replacement by various radicles. The aromatic a's may also be regarded as derived from the series of monatomic alcohols of the fatty series by the substitution of phenyl or any univalent radicle of the aromatic series for hydrogen. Thus, benzyl a., $C_6H_5.CH_2(OH)$, may be regarded as methyl a. in which phenyl replaces hydrogen. The aromatic a's are isomeric with the monatomic phenols, which are, indeed, frequently classed under the same head. [B, 4.] See also *Aromatic* GLYCOL and PHENOL.—**Caustic a.** Fr., *alcool caustique.* It., *alcool caustico.* Sp., *a. caústico.* Sodium ethylate. [B.]—**Common a.** Lat., *a. vini, spiritus rectificatus.* Fr., *alcool ordinaire* (ou *vinique*). Ger., *gewöhnlicher Alkohol.* Rectified spirit; the ordinary ethyl a. of the shops. See ETHYL A.—**Condensed a.** A term sometimes applied to saccharine and amylaceous substances, regarded as derivatives of the a's. [L, 63.]—**Dehydrogenated a.** Lat., *a. dehydrogenatum* (seu *dehydrogenatus*). Fr., *alcool déshydrogéné.* Aldehyde. [B.]—**Deodorized a.** Ethyl a. from which odorous and coloring matters have been removed by filtration through charcoal. [B, 14.]—**Diacid a.** Fr., *alcool bi-acide.* Ger., *zweiwerthiger Alkohol.* See DIATOMIC A.—**Diatomic a.** Fr., *alcool biatomique.* Ger., *zweiatomiger Alkohol.* It., *alcool diatomico* (o *biatomico*). Sp., *a. diatómico.* An a. formed by the substitution of a bivalent organic radicle for half the hydrogen in 2 molecules of water, or by replacing 2 atoms of hydrogen in a hydrocarbon by 2 molecules of hydroxyl. There are 3 sets of diatomic a's: 1. The *glycols*, derived from hydrocarbons of the fatty series. 2. The *aromatic glycols*, derived from the glycols by the substitution of phenyl or its homologues for hydrogen. 3. The *diatomic phenols*, derived directly from hydrocarbons of the aromatic series. The last are often considered as forming a group distinct from the a's proper. The diatomic a's are also called *dihydric a's*, *diacid a's*, and *dibasic a's*, because they contain 2 molecules of hydroxyl replaceable by acid radicles, forming two sets of derived salts or compound ethers, and on oxidation giving rise to both monobasic and dibasic acids. [B, 2, 4, 6.]—**Dibasic a.** Fr., *alcool bibasique.* Ger., *zweibasischer Alkohol.* It., *alcool dibasico* (o *bibasico*). Sp., *a. dibásico.* See *Diatomic a.*—**Diglucosic a.** Fr., *alcool diglucosique.* A generic term for a class of hexatomic a's including sugar and gum. See *Polyglucosic a.*—**Dihydric a.** Fr., *alcool bihydrique.* Ger., *dihydrischer Alkohol.* It., *alcool biidrico.* See *Diatomic a.*—**Dilute a.** Lat., *a. dilutum, spiritus dilutus* (seu *tenuior*). Fr., *alcool dilué.* Ger., *verdünnter Alkohol* (oder *Spiritus*). It., *alcool diluto.* Sp., *a. débil.* Ethyl a. containing more or less water. See ETHYL A.—**Diprimary a.** Fr., *alcool di-primaire.* Ger., *diprimärer Alkohol.* A diatomic a. in which the two alcoholic hydroxyl molecules are united to the two terminal carbon atoms of the hydrocarbon chain, *e. g.*, $CH_2(OH)-CH_2-CH_2-CH_2(OH)$. [B, 4.]—**Disecondary a.** Fr., *alcool di-secondaire.* Ger., *disekundärer Alkohol.* A diatomic a. in which both the alcoholic hydroxyl molecules are united to carbon atoms which are themselves combined each with 2 other carbon atoms, *e. g.*,

$CH_3-CH_2(OH)-CH_2(OH)-CH_3$. [B, 4.]—**Ditertiary a.** Fr., *alcool di-tertiaire.* Ger., *ditertiärer Alkohol.* A diatomic a. in which both the alcoholic hydroxyl molecules are united to carbon atoms which are themselves each combined with 3 other carbon atoms, *e. g.*, $\frac{CH_3}{CH_3}\!>\!C(OH)-C(OH)\!<\!\frac{CH_3}{CH_3}$. [B, 4.]—**Druggist's a.** Ordinary a. prepared by distillation as it is kept in the shops. [B, 14.]—**Fatty a.** An a. derived from a hydrocarbon of the fatty series. [B.]—**Hexabasic a., Hexacid a., Hexatomic a., Hexhydric a.** Fr., *alcool hexabasique* (ou *hexatomique*, ou *hexhydrique*). Ger., *sechsbasischer* (oder *sechsatomiger*, oder *hexahydrischer*) *Alkohol.* It., *alcool essabasico* (o *essatomico*, o *essaidrico*). An a. formed by replacing half the hydrogen in 6 molecules of water by a sexvalent hydrocarbon, or by substituting 6 molecules of hydroxyl for 6 hydrogen atoms in a hydrocarbon. The hexatomic a's comprise nearly all of the saccharine proximate principles, such as cane- and milk-sugar; and their anhydrides constitute starch, cellulose, glycogen, etc. [B, 2.]—**Hydrated a.** Fr., *alcool hydraté.* Ger., *wässeriger Alkohol.* It., *alcool idrato.* Sp., *a. hidratado.* Syn.: *aqueous a.* Ethyl a. still containing water from which mere distillation will not free it. [B.]—**Iso-a.** Fr., *iso-alcool.* Ger., *Isoalkohol.* It., *iso-alcool.* An a. derived from a hydrocarbon which does not present the normal form, *i. e.*, contains carbon atoms which are directly united with more than 2 other carbon atoms, *e. g.*, isobutyl a., $CH_3-C(CH_3)H-CH_2(OH)$, where the second carbon atom is directly united with 3 other carbon atoms. [B, 4.]—**Monacid a., Monad a.** Fr., *alcool monacide.* Ger., *einwerthiger Alkohol.* See *Monatomic a.*—**Monatomic a.** Fr., *alcool monoatomique.* Ger., *einatomiger Alkohol.* It., *alcool monoatomico.* Sp., *a. monoatómico.* An a. formed by the substitution of a univalent hydrocarbon for half the hydrogen in 1 molecule of water, or by replacing 1 atom of hydrogen in a hydrocarbon by a molecule of hydroxyl. The monatomic a's comprise 3 varieties: 1. *Monatomic a's of the fatty series* derived from hydrocarbons of the fatty series. 2. Aromatic a's (*q. v.*). 3. *Monatomic phenols* derived directly from the aromatic hydrocarbons. The last are by many regarded as distinct from the a's proper. The monatomic a's are called also *monacid*, *monobasic*, and *monohydric* a's, because they contain but 1 molecule of hydroxyl replaceable by acid radicles, and hence form but one set of saline derivatives (compound ethers), and by their oxidation give rise to but one set of acids which are monobasic. [B, 2, 4, 6.] See also PHENOL.—**Monobasic a., Monohydric a.** Fr., *alcool monobasique* (ou *monohydrique*). Ger., *einbasischer* (oder *monohydrischer*) *Alkohol.* It., *alcool monobasico* (o *monoidrico*). Sp., *a. monobásico* (ó *monohídrico*). See *Monatomic a.*—**Normal a.** Fr., *alcool normal.* Ger., *normaler Alkohol.* It., *alcool normale.* Sp., *a. normal.* An a. in which the hydrocarbon from which it is derived presents the normal form, *i. e.*, consists of a chain of carbon radicles no one of which is directly connected with more than 2 other carbon radicles. [B, 4.]—**Pentabasic a., Pentahydric a.** Fr., *alcool pentabasique* (ou *pentahydrique*). Ger., *fünfbasischer* (oder *pentahydrischer*) *Alkohol.* It., *alcool pentabasico* (o *pentaidrico*). Sp., *a. pentabásico* (ó *pentahídrico*). See *Pentatomic a.*—**Pentatomic a.** Fr., *alcool pentatomique.* Ger., *fünfatomiger Alkohol.* It., *alcool pentatomico.* Sp., *a. pentatómico.* An a. formed from 5 molecules of water by the substitution of a quinquivalent radicle for half the hydrogen; or derived from a hydrocarbon by replacing 5 hydrogen atoms by 5 molecules of hydroxyl. Instances of such a's are pinite and quercite. [B, 2.]—**Pentylic a.** See AMYL A.—**Polyatomic a., Polybasic a., Polyhydric a.** Fr., *alcool polyatomique* (ou *polybasique*, ou *polyhydrique*). Ger., *mehratomiger* (oder *mehrbasischer*, oder *polyhydrischer*) *Alkohol.* It., *alcool poliatomico* (o *polibasico*, o *poliidrico*). Sp., *a. poliatómico* (ó *polibásico*, ó *polihídrico*). An a. derived from a hydrocarbon by replacing more than 1 atom of hydrogen by an equivalent amount of hydroxyl, or formed by the substitution of a compound radicle for half the hydrogen in more than 1 molecule of water. [B.] See *Diatomic a.*, *Triatomic a.*, etc.—**Polyglucosic a.** Fr., *alcool polyglucosique.* A hexatomic a. which may be regarded as derived from 2 or more molecules of glucose ($C_6H_{12}O_6$) by the subtraction of a number of water molecules which is less by one than the number of molecules of glucose. They have, accordingly, the general formula $nC_6H_{12}O_6-(n-1)H_2O = C_{6n}H_{10n+2}O_{6n+1}$, and are designated as *diglucosic*, *triglucosic*, etc., according as $n = 2$, 3, etc.; but only the diglucosic a's are known. [B, 2.]—**Primary a.** Fr., *alcool primaire.* Ger., *primärer Alkohol.* It., *alcool primario.* A monatomic a. in which the alcoholic hydroxyl is united to a carbon atom which itself is connected with only one other carbon atom, *i. e.*, is united to the terminal carbon atom in the chain of radicles of which the hydrocarbon is composed. Such a's have evidently the general formula $CH_2(OH)-CH_2-CH_2-$etc., or $C_nH_{2n+1}.CH_2(OH)$, and they may be regarded as methyl a. (carbinol) in which a single hydrogen atom is replaced by a univalent hydrocarbon. See CARBINOL. The primary a's are converted by oxidizing agents into aldehydes (*q. v.*). [B, 4.]—**Primary-secondary a.** Fr., *alcool primaire-secondaire.* Ger., *primär-sekundärer Alkohol.* A diatomic a. in which one of the alcoholic hydroxyl molecules is united with a terminal carbon atom of the hydrocarbon chain, the other with a carbon atom which is itself combined with two other carbon atoms; *e. g.*, alpha oxypropylic a., $CH_3-CH(OH)-CH_2(OH)$. [B, 4.]—**Primary-tertiary a.** Fr., *alcool primaire-tertiaire.* Ger., *primär-tertiärer Alkohol.* A diatomic a. in which one of the alcoholic hydroxyl molecules is united with a terminal carbon atom of the hydrocarbon chain, the other with a carbon atom which is itself combined with three other carbon atoms; *e. g.*, primary-tertiary isobutylene glycol, $\frac{CH_3}{CH_3}\!>\!C(OH)-CH_2(OH)$. [B, 4.]—**Pseudo-a.** Fr., *pseudo-alcool*, *alcool d'hydratation.* Ger., *Pseudoalkohol.* A variety of a. so called by Wurtz on account of the facility with which it can be decomposed into water and the corresponding olefine, and which may, therefore, be regarded as the hydrate of that olefine. The term is particularly applied to the two secondary amyl a's (propylmethylcarbinol and isopropylmethylcarbinol) and to secondary hexyl a. (isobutylmethylcarbinol). [B.]—**Pyroligneous a.** Fr., *esprit pyroligneux.* Ger., *Holzgeist.* Methyl a. [B.]—**Real a.** Absolute a. [B.]—**Rectified a.** Lat., *spiritus rectificatus*, *a. rectificatum.* Fr., *alcool rectifié.* Ger., *rectificirter Alkohol* (oder *Geist*). It., *alcool rettificato.* Sp., *a. rectificado.* Ethyl a. concentrated by distillation. See ETHYL A.—**Secondary a.** Fr., *alcool secondaire.* Ger., *sekundärer Alkohol.* It., *alcool secondario.* An a. in which the carbon atom which is in combination with the alcoholic hydroxyl is also in direct combination with two other carbon atoms; *e. g.*, dimethylcarbinol, $CH_3-CH(OH)-CH_3$. Such a's have the general formula $C_mH_n-CH(OH)-C_pH_q$, and may be regarded as derived from methyl a. (carbinol) by the substitution of two univalent hydrocarbons for 2 hydrogen atoms. See CARBINOL. The secondary a's on oxidation give rise to the *ketones* (*q. v.*). [B, 2, 4.] See also *Disecondary a.* and *Primary-secondary a.*—**Secondary-tertiary a.** Fr., *alcool secondaire-tertiaire.* Ger., *sekundär-tertiärer Alkohol.* A diatomic a. in which the 2 alcoholic hydroxyl molecules are united with 2 atoms of carbon which are themselves combined directly with 2 and with 3 other carbon atoms respectively; *e. g.*, beta isoamylene glycol, $\frac{CH_3}{CH_3}\!>\!C(OH)-CH(OH)-CH_3$. [B, 4.]—**Standard a.** Ethyl a. of a sp. gr. of 0·825 in which Sikes's hydrometer registers zero at 60° F. A commercial term. [B, 2.]—**Stronger a.** Lat., *a. fortius.* See ETHYL A.—**Tertiary a.** Fr., *alcool tertiaire.* Ger., *tertiärer Alkohol.* It., *alcool terziario.* An a. in which the carbon atom with which the alcoholic hydroxyl is united is also in direct combination with 3 other carbon atoms; *e. g.*, trimethylcarbinol, $\frac{CH_3}{CH_3}\!>\!C(OH)-CH_3$. Such a's have the general formula $\frac{C_mH_n}{C_pH_q}\!>\!C(OH)-C_rH_s$, and may be regarded as methyl a. (carbinol) in which 3 atoms of hydrogen are replaced by 3 univalent radicles. [B, 2, 4.] See also *Ditertiary a.*, *Primary-tertiary a.*, *Secondary-tertiary a.*, and CARBINOL.—**Tetrabasic a., Tetracid a., Tetrahydric a., Tetratomic a.** Fr., *alcool tétrabasique* (ou *tétrahydrique*, ou *tétratomique*). Ger., *vierbasischer* (oder *tetrahydrischer*, oder *vieratomiger*) *Alkohol.* It., *alcool tetrabasico* (o *tetraidrico*, o *tetratomico*). Sp., *a. tetrabásico* (ó *tetrahídrico*, ó *tetratómico*). An a. derived from 4 molecules of water by replacement of half the hydrogen by a quadrivalent hydrocarbon, or formed by the substitution of 4 molecules of hydroxyl for 4 atoms of hydrogen in a hydrocarbon. Erythrite is an example of such an a. [B, 2, 4.]—**Thio-a.** Fr., *thio-alcool.* Ger., *Thioalkohol.* See MERCAPTAN.—**Triacid a., Triatomic a.** Fr., *alcool triacide* (ou *triatomique*). Ger., *dreiwerthiger* (oder *dreiatomiger*) *Alkokol.* It., *alcool triatomico.* Sp., *a. triatómico.* An a. formed by the substitution of a trivalent hydrocarbon for half the hydrogen in 3 molecules of water, or derived from a hydrocarbon by replacing 3 atoms of hydrogen by 3 molecules of hydroxyl. Such a's have the general formula $C_nH_m(OH)_3$, and comprise two classes: 1. The *glycerins*, derived from hydrocarbons of the fatty series. 2. The *triatomic phenols*, derived from hydrocarbons of the aromatic series. The latter, however, are by many not included among the a's. The triatomic a's are also called *tribasic* and *trihydric* because they contain 3 molecules of hydroxyl replaceable by acid radicles, and should theoretically give rise to 3 sets of saline derivatives (ethers) and to monobasic, dibasic, and tribasic acids. Few of these derivatives, however, are actually known. [B, 2, 4, 6.] See also GLYCERIN and PHENOL.—**Tribasic a.** Fr., *alcool tribasique.* Ger., *dreibasischer Alkohol.* It., *alcool tribasico.* Sp., *a. tribásico.* See *Triatomic a.*—**Triglucosic a.** Fr., *alcool triglucosique.* See *Polyglucosic a.*—**Trihydric a.** Fr., *alcool trihydrique.* Ger., *trihydrischer Alkohol.* It., *alcool triidrico.* Sp., *a. trihídrico.* See *Triatomic a.*

ALCOHOLATE, n. A^{2}l'ko-ho^{2}-lat. Fr., *alcoolate.* Ger., *Alkoholat.* Syn.: *alcohate.* 1. A chemical compound of alcohol with another body, such as *chloral a.* 2. A salt containing one or more molecules of alcohol of crystallization. 3. A preparation made with alcohol. [A, 316; B, 3, 4.]

ALCOHOLATED, adj. A^{2}l'ko-ho^{2}l-a''te^{2}d. Treated or prepared with alcohol, as *a. potash.* [B, 97.]

ALCOHOLATIVUM (Lat.), n. n. A^{2}l(a^{3}l)-ko-ho^{2}-la^{3}-ti(te)'vu^{3}m-(wu^{4}m). See ALCOOLOTIF.

ALCOHOLATUM (Lat.), n. n. A^{2}l(a^{3}l)-ko-ho^{2}-la(la^{3})'tu^{3}m-(tu^{4}m). See ALCOOLAT.

ALCOHOLATURA (Lat.), n. f. A^{2}l(a^{3}l)-ko-ho^{2}-la^{3}-tu^{2}(tu)'ra^{3}. See ALCOOLATURE. [B, 95.]

ALCOHOLETUM (Lat.), n. n. A^{2}l(a^{3}l)-ko-ho^{2}-le(la)'tu^{3}m(tu^{4}m). A medicinal substance prepared with alcohol. In the Belg. Ph. it is used to designate a class of preparations corresponding nearly to the spirits of the U. S. Ph. [B, 95.]

ALCOHOLEUM (Lat.), n. n. A^{2}l(a^{3}l)-ko-ho'le(le^{2})-u^{3}m(u^{4}m). See ALCOOLÉ.

ALCOHOLIC, adj. A^{2}l-ko-ho^{2}l'i^{2}k. Lat., *alcoholicus*, *alcoolicus.* Fr., *alcoolique.* Ger., *alkoholisch*, *spirituös* (only in 1st and 2d senses). It., *alcoolico*, *alcolico.* Sp., *alcohólico.* 1. Of or pertaining to an alcohol, especially to ethyl alcohol. 2. Prepared with or contained in alcohol, as an *a. specimen.* 3. Due to the effect of alcohol, as *a. ataxia.* 4. Suffering from the effects of alcoholism, as an *a. patient.* [B.] For special uses of the word see under DELIRIUM, ATAXIA, CIRRHOSIS, and FERMENTATION.

ALCOHOLICA (Lat.), n., n. pl. of adj. *alcoholicus.* A^{2}l(a^{3}l)-ko-ho^{2}l'i^{2}-ka^{3}. Gen., *alcoholico'rum.* Preparations containing alcohol as their active ingredient.

ALCOHOLICALLY, adv. A^{2}l-ko-ho^{2}l'i^{2}-ka^{2}l-li^{2}. Following the manner or habit of alcohol. [B, 31, 39.]

ALCOHOLICITY, n. A^{2}l-ko-ho^{2}l-i^{2}s'i^{2}-ti^{2}. Alcoholic quality or strength, as the a. of a wine. [B, 39.]

ALCOHOLIMETER, n. A^{2}l-ko-ho^{2}l-i^{2}m'e^{2}t-u^{5}r. See ALCOHOLOMETER.

ALCOHOLISATUS (Lat.), adj. A^{2}l(a^{3}l)-ko-ho^{2}l-i^2-za(sa^3)'tu^{3}s-(tu^{4}s). Alcoholized.

ALCOHOLISM, n. A^{2}l'ko-ho^{2}l-i^{2}zm. Lat., *alcoholismus, alcoolismus.* Fr., *alcoolisme.* Ger., *Alkoholismus.* It., *alcoolismo.* Sp., *alcoholismo.* A term, first used (in its Latin form) by Magnus Huss, of Stockholm, in 1848, comprising the various phenomena which collectively are traceable to the influence of alcoholic liquors taken into the system. [D, 1.]—**Acute a.** Lat., *alcoholismus acutus.* Fr., *alcoolisme aigu, délire alcoolique.* Ger., *akuter Alkoholismus.* It., *alcoolismo acuto.* Sp., *alcoholismo agudo.* 1. Acute intoxication produced by alcohol. The symptoms of acute a. occur in two stages: (*a*) A stage of excitement characterized by perversion of intellect, evidenced by want of mental balance and by hallucinations, emotional excitement, and inco-ordination of movement giving rise to a peculiar staggering gait, to difficulty of speech, and to diplopia. (*b*) A stage of coma, with the breathing stertorous, the pulse full and slow, the pupils dilated and sluggish, and complete insensibility alternating sometimes with convulsive movements. The stage of coma is followed by a period of depression of mental and physical faculties, with headache, nausea, and vomiting. In less severe cases the stage of coma may be absent altogether. 2. Acute alcoholic delirium. [B; D, 25.] See DELIRIUM *tremens.*—**Chronic a.** Lat., *alcoholismus chronicus.* Fr., *alcoolisme chronique.* Ger., *chronischer Alcoholismus, Trunksucht, Säuferkrankheit.* It., *alcoolismo cronico.* Sp., *alcoholismo crónico.* Syn.: *chronic alcohol disease, chronic alcoholic intoxication.* The series of phenomena induced by the persistent and immoderate use of alcoholic beverages. Among these phenomena are a diminished power of resistance to fatigue, disease, and the effects of injuries, a chronic gastro-intestinal catarrh producing dyspepsia. anorexia, nausea, and vomiting, a tendency to fatty and cirrhotic degeneration of various organs, especially the liver, kidneys, and heart, and various cerebral, spinal, and neural lesions, producing neuralgia, amaurosis, muscular tremors and inco-ordination of movement, circulatory disturbances, insomnia, and various forms of mental alienation, such as melancholia and general paralysis. [B.]

ALCOHOLISMUS (Lat.), n. m. A^{2}l(a^{3}l)-ko-ho^{2}l-i^{2}z(i^{2}s)'mu^{3}s-(mu^{4}s). Also written *alcoolismus.* Alcoholism.—**A. acutus.** See *Acute* ALCOHOLISM.—**A. acutus gravior.** The severer form of acute alcoholism; alcoholic delirium and mania. [D.]—**A. acutus levior.** The lighter form of acute alcoholism; ordinary alcoholic intoxication.—**A. chronicus.** See *Chronic* ALCOHOLISM. See also ALCOOLISMUS.

ALCOHOLIST (Ger.), n. m. A^{3}l'ko-ho^{2}l-i^{2}st. One suffering from alcoholism. [Westphal (B).]

ALCOHOLIZATED, adj. A^{2}l-ko-ho^{2}l'i^{2}z-a-te^{2}d. See ALCOHOLIZED.

ALCOHOLIZATION, n. A^{2}l-ko-ho^{2}l''i^{2}z-a'shu^{3}n. Fr., *alcoolisation.* Ger., *Alkoholisation, Alkoholisirung.* It., *alcoolizzazione.* Sp., *alcoholización.* 1. The act or process of reducing a solid substance to a fine powder. 2. The act or process of rendering alcoholic, either by transformation into alcohol or by mixing with alcohol; of an alcoholic liquid, conversion into a liquid containing a higher proportion of alcohol. 3. The product obtained by such transformation or mixture. 4. The production of alcoholism in the animal organism. [B, 33, 39, 78.]

ALCOHOLIZATUS (Lat.), adj. A^{2}l(a^{3}l)-ko-ho^{2}l-i^{2}z-a(a^3)'tu^{3}s-(tu^{4}s). Alcoholized.

ALCOHOLIZE, v. tr. A^{2}l'ko-ho^{2}l-iz. Fr., *alcooliser.* Ger., *alkoholisiren.* It., *alcoolizzare.* Sp., *alcoholar, alcoholizar.* 1. To convert into a very fine powder. (Obsolete.) 2. To transform into alcohol; of dilute alcohol, to free from water. 3. To mix with alcohol. [B.]

ALCOHOLIZED, adj. A^{2}l'ko-ho^{2}l-izd. Lat., *alcoholisatus, alcoholizatus, alcoolisatus.* Fr., *alcoolisé.* Ger., *alkoholisirt.* It., *alcoolizzato.* Sp., *alcoholizado.* 1. Of a solid body, reduced to the state of a very fine powder, as *a. iron.* 2. Transformed into alcohol, united or mixed with alcohol; of a liquid already containing alcohol, rendered more alcoholic. [B.]

ALCOHOLMETER, n. A^{2}l-ko-ho^{2}l'me^2-te^{2}r. See ALCOHOLOMETER.

ALCOHOLMETRICAL, adj. A^{2}l''ko-ho^{2}l-me^{2}t'ri^2-ka^{2}l. See ALCOHOLOMETRIC. [B, 37.]

ALCOHOLOMETER, n. A^{2}l-ko-ho^{2}l-o^{2}m'e^{2}t-u^{5}r. From *alcohol,* and μέτρον, a measure. Fr., *alcoomètre, alcoolomètre.* Ger., *Alkoholometer.* It., *alcoolimetro, alcoolometro.* Sp., *alcoholimetro, alcoholómetro, alcoómetro.* Syn.: *alcoholimeter.* An instrument (usually a hydrometer) for determining the amount of alcohol in a liquid. [B.] See also DILATOMETER, EBULLIMETER, VAPORIMETER, and VINOMETER.—**Cartier's a.** Fr., *alcoomètre de Cartier.* Ger., *Alkoholometer von Cartier.* It., *alcoolimetro di Cartier.* Sp., *alcoómetro de Cartier.* A hydrometer formerly much used in France for testing alcoholic liquids, having the scale so graduated as to register 10° in distilled water and 44° in absolute alcohol, the intermediate portion of the scale being divided into 34 equal parts. [B, 10, 38.]—**Centesimal a.** Fr., *alcoomètre centésimal.* Ger., *hunderttheiliges Alkoholometer.* It., *alcoolimetro centesimale.* Sp., *alcoómetro centesimal.* Gay-Lussac's a. A hydrometer so graduated that in a mixture of alcohol and water at 15° C. the reading of the scale indicates directly the number of parts by volume of absolute alcohol in 100 parts of the mixture. [B, 5, 37, 38.]—**Field's a.** An instrument for determining the alcoholic strength of a liquid by its boiling-point. It consists of a small boiler into which a very sensitive thermometer is inserted. [B, 37.]—**Gay-Lussac's a.** Fr., *alcoomètre de Gay-Lussac.* It., *alcoolimetro di Gay-Lussac.* Sp., *alcoómetro de Gay-Lussac.* See *Centesimal a.*—**Geissler's a.** An instrument for determining the alcoholic strength of a liquid by the tension of the vapor given off at the boiling-point of the latter. It consists of a flask filled with the liquid to be examined and communicating with the upper end of a reservoir of mercury occupying one extremity of a U-tube. On immersing the flask in a water-bath and heating, the liquid boils and sets free vapor which by its expansion drives the mercury before it from the reservoir into the other arm of the U-tube, which is so graduated that the height to which the column of mercury rises indicates directly the amount of alcohol in the liquid examined. [B, 37.]—**Pharmaceutical a.** Fr., *alcoomètre pharmaceutique.* Ger., *pharmaceutisches Alkoholometer.* It., *alcoolimetro farmaceutico.* An a. in use in Belgium. It is graduated like Baumé's hydrometer, except that the point to which the instrument sinks in distilled water is marked 0°, instead of 10°, and the reading of its scale is, therefore, constantly 10° less than that of Baumé's instrument. [B, 10.]—**Richter's a.** Fr., *alcoomètre de Richter.* Ger., *Richter'sches Alkoholometer.* An a. consisting of a hydrometer so graduated as to show directly the percentage by weight of alcohol in a mixture of alcohol and water. [B.]—**Tralles's a.** Fr., *alcoomètre de Tralles.* Ger., *Tralles'sches Alkoholometer.* It., *alcoolimetro di Tralles.* Sp., *alcoómetro de Tralles.* A hydrometer so graduated as to indicate directly the percentage by volume of alcohol in a mixture of alcohol and water at a temperature of 60° F. In principle it is very like the centesimal a. It is much used in the United States. [B, 5, 37.]

ALCOHOLOMETRIC, adj. A^{2}l-ko-ho^{2}l''o-me^{2}t'ri^{2}k. Fr., *alcoolométrique.* Ger., *alkoholometrisch.* Of or pertaining to alcoholometry. [B, 3.]

ALCOHOLOMETRY, n. A^{2}l''ko-ho^{2}l-o^{2}m-e^{2}t-ri^2. Fr., *alcoométrie, alcoolométrie.* Ger., *Alkoholometrie.* The determination of the quantity of alcohol present in a spirituous liquor, especially by ascertaining the density. [B, 2.]

ALCOHOLOTIVUM (Lat.), n. n. A^{2}l(a^{3}l)-ko-ho^{2}l-o-ti(te)'vu^{3}m-(wu^{4}m). See ALCOOLOTIF.

ALCOHOLOPHILIA (Lat.), n. f. A^{2}l(a^{3}l)-ko-ho^{2}l-o-fi^{2}l'i^2-a^3. From *alcohol* and φιλεῖν, to love. Inordinate craving for alcoholic beverages. [A, 316.]—**A. periodica.** Recurring paroxysmal attacks of the same. [A, 316.]

ALCOHOLOSIS (Lat.), n. f. A^{2}l(a^{3}l)''ko-ho^{2}l-o'si^{2}s. Gen., *alcoholo'seos.* See ALCOHOLISM.

ALCOHOLYDROLYTON (Lat.), n. n. A^{2}l(a^{3}l)''ko-ho^{2}l-i^2(u^6)-dro^{2}l'i^{2}t(u^{6}t)-o^{2}n. See COHOLYDROLYTON.

ALCOHOMEL, n. See ALCOOMEL.

ALCOHOMETER, n. A^{2}l-ko-ho^{2}m'e^{2}t-u^{6}r. An abbreviated form of alcoholometer. [(Craig, 1847) B, 39.] Cf. ALCOOMÈTRE.

ALCOL, n. A^{2}l'ko^{2}l. (Obsolete.) 1. Alcohol. 2. Vinegar. [B, 78, 111.]

ALCOLA (Lat.), n. f. A^{2}l(a^{3}l)'ko-la^3. Deriv. (1st sense), Ar., *alqolâɔ,* same sense, from *qalaɔ,* to tear, or *qalâ,* to fry or stew [B, 78]; or perhaps from Hebr., *alach,* to be turbid [B, 59]; (2d sense), from alcohol (3d def.). 1. In the Arabic medical works and in Paracelsus, a painful spreading ulcer of the lips and mouth, which was said to produce mania. Perhaps aphthæ or anthrax. In this sense also in the pl., *alcolæ.* 2. In Paracelsus, urinary gravel or sediment. [B, 59, 78.]

ALCOLAT (Fr.), n. m. A^{3}l-ko-la^3. See ALCOOLAT.

ALCOLISMUS (Lat.), n. m. A^{2}l(a^{3}l)-ko-li^{2}z(li^{2}s)'mu^{3}s(mu^{4}s). For deriv., see ALCOHOL (3d def.). The act or process of reducing a substance to powder by corrosion. [B, 50.]

ALCOLITUS (Lat.), adj. A^{2}l(a^{3}l)-ko-li(le)'tu^{3}s(tu^{4}s). For deriv., see ALCOLA (2d def.). In Paracelsus, pertaining to or containing urinary sediment, as *urina alcolita,* urine containing sediment. [B, 78.]

ALCOLIZATED, adj. A^{2}l-ko^2'l-i^{2}z-a''te^{2}d. See ALCOHOLIZED.

ALCOMETRICAL, adj. A^{2}l-ko-me^{2}t'ri^2-ka^{2}l. Pertaining to alcoholometry. [B, 37.]

ALCONE, n. See AURICHALCUM (2d def.).

ALCOOL (Fr.), n. A^{3}l-ko-o^{2}l. Also used by French authors as a Latin word. Alcohol.—**A. absolu.** See *Absolute* ALCOHOL.—**A. acétique.** Ethyl alcohol. [B.]—**A. acétonique.** Acetone alcohol; acetol. [B.]—**A. acéto-phénonique.** Acetophenonic (secondary phenethyl) alcohol. [B.] See PHENETHYL *alcohol.*—**A. acétylique.** Acetic aldehyde. [A, 256.]—**A'acide.** See under ACIDE.—**A. à 50° centésimaux.** A mixture of ethyl alcohol and water indicating 50° on the centesimal alcoholometer, *i. e.*, containing 50 per cent. by volume of absolute alcohol. Analogous expressions are used by French writers to designate alcoholic solutions of any degree of strength. [B.]—**A'alcali.** See under ALCALI.—**A. allylique.** Allyl alcohol. [B.]—**A. allylique bibromé.** Allyl alcohol dibromide. [B.] See DIBROMHYDRIN.—**A. allylique bichloré.** Allyl alcohol dichloride. [B.] See DICHLORHYDRIN.—**A. ammoniacal.** See *Spiritus* AMMONIÆ.—**A. ammoniacal ambré.** See *Alcoolé d'*AMMONIAQUE *ambré.*—**A. ammoniacal anisé.** See *Liquor* AMMONII *anisatus.*—**A. ammoniacal cantharidé.** A diuretic liniment made of ammonia water and oil of turpentine each 6 parts and tincture of cantharides 3 parts. [B; L, 85.]—**A. ammoniacal fétide.** See *Spiritus* AMMONIÆ *fœtidus.*—**A. ammoniacal gaïaciné.** See *Tinctura* GUAIACI *ammoniata.*—**A. ammoniacal lavandulé.** See *Alcoolé d'*AMMONIAQUE *lavandulé.*—**A. ammoniacal romariné.** See *Alcoolé d'*AMMONIAQUE *romariné.*—**A. ammoniacal savonneux.** See LINIMENTUM *saponato-ammoniatum.*—**A. ammoniacal succiné.** See *Alcoolé d'*AMMONIAQUE *succiné.*—**A. ammoniacal térébenthiné.** A liniment of ammonia water 1 part, alcohol 8 parts, and oil of turpentine 2 parts. [B; L, 85.]—**A. ammonié.** See *Spiritus* AMMONIÆ.—**A. amylénique.** Amylene glycol. [B.]—**A. amylique.** Amyl alcohol. [B.]—**A. amylique actif, A. amylique inactif.** Optically active, optically inactive, amyl alcohol. [B.] See AMYL ALCOHOL.—**A. amyl-**

thallique. Thallium amylate. [B, 93.]—**A. anhydre.** Anhydrous alcohol. See *Absolute* ALCOHOL.—**A. anisique, A. anisylique.** Anisic alcohol. [B.]—**A. aqueux.** See *Hydrated* ALCOHOL.—**A. aromatique.** See *Aromatic* ALCOHOL.—**A. aromatique ammoniacal.** See *Spiritus* AMMONIÆ *aromaticus*.—**A. arsénié.** A preparation recommended for preserving insects, consisting of a saturated solution of arsenic trioxide in alcohol of a strength of 85 per cent. by volume. [B, 92.]—**A. benzoïque, A. benzylique.** Benzyl alcohol. [B, 93, 105.]—**A. biacide, A. biatomique, A. bibasique, A. bihydrique.** See *Diatomic* ALCOHOL.—**A. brom-allylique.** Bromallyl alcohol. [B.]—**A. buténylique.** Butenyl alcohol. [B.]—**A. butinique.** Butine glycol. [B.]—**A. butylénique.** Butylene glycol. [B.]—**A. butylique.** Butyl alcohol. [B.]—**A. butylique primaire, A. butylique tertiaire.** See *Primary* and *Tertiary* BUTYL ALCOHOL.—**A. butyrique.** Butyl alcohol. [B, 38.]—**A. campholique.** A name proposed for borneol. [B, 93.]—**A. camphoratus** [Fr. Cod.]. Teinture de camphre concentrée. See *Spiritus* CAMPHORÆ.—**A. camphoratus debilior** [Fr. Cod.]. Teinture de camphre faible. See *Spiritus* CAMPHORÆ.—**A. camphré.** Teinture de camphre concentrée. See *Spiritus* CAMPHORÆ.—**A. camphré de Raspail.** A solution of 3 parts of camphor in 10 parts of alcohol of a strength of 95 per cent. by volume. [B, 92.]—**A. camphré safrané.** An alcoholic solution of camphor colored with saffron. [B, 92.]—**A. camphylique.** Camphyl alcohol; borneol. [B.]—**A. caprique.** Decatyl alcohol. [B, 93.]—**A. caproïlique, A. caproïque.** Caproyl alcohol, caproic alcohol. [B, 38, 93.] See HEXYL ALCOHOL.—**A. caprylique.** Capryl (octyl) alcohol. [B, 38.]—**A. caustique.** See *Caustic* ALCOHOL.—**A. cérotique, A. cérylique.** Ceryl alcohol. [B, 38.]—**A. cétique, A. cétylique.** Cetyl alcohol. [B, 38, 107.]—**A. chlor-éthylique.** Chlorethyl alcohol. [B.]—**A. cholestérique.** Cholesterin. [B, 107.]—**A. cinnamique, A. cinnamylique, A. cinnylique.** Cinnamic alcohol. [B, 93.]—**A. crésylique.** Cresyl alcohol; cresol. [B.]—**A. cuminique.** Cumin alcohol. [B.]—**A. d'asphodèle.** Ethyl alcohol obtained from different species of *Asphodelus*, especially *A. ramosus*. [B, 38.]—**A. de betterave.** Ethyl alcohol obtained from the sugar beet. [B, 92.]—**A. de bois.** Methyl alcohol. [B, 92.]—**A. décatylique.** Decatyl alcohol. [B.]—**A. de cristallisation.** See ALCOHOL *of crystallization*.—**A. décylique.** Decatylic alcohol. [B, 46.]—**A. de dahlia.** Ethyl alcohol obtained by fermentation of the starchy or saccharine principles in various species of *Dahlia*. [B, 105.]—**A. de fécule.** Ethyl alcohol obtained by the fermentation of starch. [B, 92.]—**A. de fer.** See *Alcoholized* IRON.—**A. de grains.** Ethyl alcohol obtained by the distillation of grain. [B, 92.]—**A. de mélasse.** Ethyl alcohol obtained by the fermentation of molasses, as that of beet sugar. [B, 38.]—**A. de Montpellier.** Ethyl alcohol obtained by the distillation of wine. [B, 92.]—**A. déphlegmé.** Absolute alcohol. [B, 88.]—**A. de pomme de terre.** Ethyl alcohol (mixed with amyl alcohol) obtained by the distillation of potatoes. [B, 92.] See *Potato* SPIRIT.—**A. d'épreuve.** Proof spirit. [B, 92.] See ETHYL ALCOHOL.—**A. de riz.** Ethyl alcohol obtained by the fermentation of rice. [A, 324.]—**A. déshydrogéné.** Aldehyde. [B, 92.]—**A. de sorgho.** Ethyl alcohol obtained by the fermentation of sorghum. [B, 105.]—**A. de soufre.** See *Alcohol* SULPHURIS.—**A. de Sylvius.** See ALCOOLAT *aromatique ammoniacal*.—**A. d'éther.** See *Spiritus* ÆTHERIS *compositus*.—**A. d'éthyle.** Ethyl alcohol. [B, 107.]—**A. de topinambour.** Ethyl alcohol obtained from the Jerusalem artichoke. [B, 105.]—**A. de vinaigre.** Acetic acid. [B, 92.] Cf. ALCOHOL *aceti*.—**A. d'hydratation.** See *Pseudo*-ALCOHOL.—**A. diacide, A. diatomique, A. dibasique.** See *Diatomic* ALCOHOL.—**A. dibromo-propylique.** Dibrompropyl alcohol. [B.]—**A. diéthylénique.** Diethylene alcohol. [B.]—**A. diglucosique.** See *Diglucosic* ALCOHOL.—**A. diglycérique.** Diglyceryl alcohol. [B, 93.]—**A. dihydrique.** Dihydric alcohol. [B.] See *Diatomic* ALCOHOL.—**A. dilué.** See *Dilute* ALCOHOL.—**A. diprimaire.** See *Diprimary* ALCOHOL.—**A. disecondaire.** See *Disecondary* ALCOHOL.—**A. distillé.** A synonym for spirit, or *alcoolat*. [B, 88.]—**A. ditertiaire.** See *Ditertiary* ALCOHOL.—**A. dodécatylique.** Dodecatyl alcohol. [B.]—**A. d'oxydation.** An alcohol produced by the oxidation of a hydrocarbon; opposed to *a. d'hydratation*, which was regarded by Wurtz as formed by the union of a hydrocarbon with water. [B, 93.] See *Pseudo*-ALCOHOL.—**A. du commerce.** Commercial alcohol. [B.]—**A. du Nord.** See *A. de betterave*.—**A. éthalique.** Cetyl alcohol. [B, 93.]—**A. éthéré.** See *Spiritus* ÆTHERIS *compositus*.—**A. éthylénique.** Ethylene glycol. In the pl., *a's éthyléniques*, the polyethylenic alcohols. [B.]—**A. éthylique.** Ethyl alcohol. [B.]—**A. formique.** Methyl alcohol. [B, 92.]—**A. furfurylique.** Furfuryl alcohol. [B.]—**A. glycérique.** Glycerin. [B.]—**A. glycidique.** Glycide alcohol; glycide. [B.]—**A. gras.** Fatty alcohol. [B, 38.]—**A. hecdécatylique.** Cetyl alcohol. [B.]—**A. heptylique.** Heptyl alcohol. [B, 93.]—**A. heptylique primaire, A. heptylique tertiaire.** Primary and tertiary heptyl alcohol. [B.] See HEPTYL ALCOHOL.—**A. hexabasique, A. hexacide, A. hexahydrique, A. hexatomique.** See *Hexatomic* ALCOHOL.—**A. hexénylique.** Hexenyl alcohol. [B.]—**A. hexéthylénique.** Hexethylene alcohol. [B.]—**A. hexhydrique.** See *Hexatomic* ALCOHOL.—**A. hexonique.** Hexone alcohol. [B.] See MANNITE and DULCITE.—**A. hexonylique.** Hexonyl alcohol. [B.] See DULCITAN.—**A. hexylénique.** Hexylene glycol. [B, 93].—**A. hexylique.** Hexyl alcohol. [B.]—**A. hexylique primaire.** Primary hexyl alcohol. [B.] See HEXYL ALCOHOL.—**A. hydraté.** See *Hydrated* ALCOHOL.—**A. hydrochlorique.** A mixture of ethyl alcohol and hydrochloric acid. [B, 92.]—**A. hydroxy-benzylique.** See HYDROXYBENZYL *alcohol*.—**A. is-amylénique, A. is-amylique.** See *A. iso-amylénique* and *A. iso-amylique*.—**A. iso-amylénique.** Isoamylene glycol. [B.] See AMYLENE *glycol*.—**A. iso-amylique.** Isoamyl alcohol. [B.] See AMYL ALCOHOL.—**A. iso-butylénique.** Isobutylene glycol. [B.] See BUTYLENE *glycol*.—**A. iso-butylique.** Isobutyl alcohol. [B.] See BUTYL ALCOHOL.—**A. iso-caprique.** Isocapric alcohol. [B.] See DECATYL *alcohol*.—**A. iso-cérylique.** Isoceryl alcohol. [B.] See CERYL *alcohol*.—**A. is-octylique.** Isooctyl alcohol. [B.] See OCTYL ALCOHOL.—**A. iso-heptylique, A. iso-heptylique primaire, A. iso-heptylique secondaire.** Isoheptyl alcohol, primary isoheptyl alcohol, secondary isoheptyl alcohol. [B.] See HEPTYL ALCOHOL.—**A. iso-hexylique, A. iso-hexylique primaire.** Isohexyl alcohol, primary isohexyl alcohol. [B.] See HEXYL ALCOHOL.—**A. iso-octylique, A. iso-octylique primaire.** Isooctyl alcohol, primary isooctyl alcohol. [B.] See OCTYL ALCOHOL.—**A. iso-pentylique.** Isopentyl alcohol. [B.] See AMYL ALCOHOL.—**A. isopropyl-éthylénique.** Isopropylethylene glycol. [B.] See AMYLENE *glycol*.—**A. iso-propylique.** Isopropyl alcohol. [B.] See PROPYL ALCOHOL.—**A. ligneux.** Methyl alcohol. [B, 93.]—**A. mélinique, A. mélissique, A. mélissylique.** Myricyl alcohol. [B, 38.]—**A. mentholique, A. menthylique.** Menthol. [B.]—**A. mésitique.** Mesitic alcohol. [B, 38.]—**A. métanitro-benzylique.** Metanitrobenzyl alcohol. [B.] See NITROBENZYL *alcohol*.—**A. méthyl-benzylique.** Methylbenzyl alcohol. [B.] See TOLYL *alcohol*.—**A. méthylé.** Methylated spirit; a mixture of methyl and ethyl alcohols. [B, 92.]—**A. méthylique.** Methyl alcohol. [B.]—**A. méthylique triéthylé.** Triethylcarbinol. [B, 93.] See HEPTYL ALCOHOL.—**A. méthylique triméthylé.** Trimethylcarbinol. [B.] See BUTYL ALCOHOL.—**A. méthyl-isocrotylique.** Methylisocrotyl alcohol. [B.]—**A. méthyl-propyl-éthylénique.** Methylpropylethylene glycol. [B.] See HEXYLENE *glycol*.—**A. méthyl-thallique.** Thallium methylate. [B, 93.]—**A. monacide, A. monoatomique, A. monobasique.** See *Monatomic* ALCOHOL.—**A. monochlor-éthylique.** Monochlorethyl alcohol. [B.] See CHLORETHYL *alcohol*.—**A. monohydrique.** See *Monatomic* ALCOHOL.—**A. muriatique.** See *A. chlorhydrique*.—**A. myricique.** Myricyl alcohol. [B, 93.]—**A. myristique.** Methal. [B, 93.]—**A. naphtaliné.** A solution of 30 parts of naphthalene in 1,000 parts of ethyl alcohol of a strength of 36 per cent. by volume. [B, 92.]—**A. nitrique.** A mixture of nitric acid and alcohol. [B, 92.] See *Spiritus* ÆTHERIS NITROSI.—**A. nitro-benzylique.** Nitrobenzyl alcohol. [B.]—**A. nonylique.** Nonyl alcohol. [B.]—**A. normal.** See *Normal* ALCOHOL.—**A. octylénique.** Octylene glycol. [B.]—**A. octylique, A. octylique primaire, A. octylique secondaire.** *Octyl* alcohol, primary octyl alcohol, secondary octyl alcohol. [B.] See *Octyl* ALCOHOL.—**A. œnanthylique.** Heptyl alcohol. [B, 38.]—**A. ordinaire.** See ETHYL ALCOHOL.—**A. orthohydroxy-benzylique, A. orthoxy-benzylique.** Orthohydroxybenzyl alcohol; saligenin. [B.]—**A. oxy-benzylique.** Hydroxybenzyl alcohol. [B.]—**A. oxy-butylique, A. oxy-isobutylique.** Oxybutylic, oxyisobutylic alcohol. [B.] See BUTYLENE *glycol*.—**A. oxy-méthyl-benzylique.** Oxymethylbenzyl (anisic) alcohol. [B.]—**A. oxy-propylique.** Oxypropyl alcohol. [B.] See PROPYLENE *glycol*.—**A. paraisopropyl-benzylique.** Paraisopropylbenzyl alcohol. [B.] See PROPYLBENZYL *alcohol* and CUMIN *alcohol*.—**A. paraméthyl-benzylique.** Paramethyl benzyl (tolyl) alcohol. [B.]—**A. paranitro-benzylique.** Paranitrobenzyl alcohol. [B.] See NITROBENZYL *alcohol*.—**A. para-oxyméthyl-benzylique.** Anisic alcohol. [B.]—**A. parapropyl-benzylique.** Parapropylbenzyl alcohol. [B.] See PROPYLBENZYL *alcohol* and CUMIN *alcohol*.—**A. para-toluylique, A. para-tolylique.** Paratolyl (ordinary tolyl) alcohol. [B, 93.]—**A. parisopropyl-benzylique, A. par-oxyméthyl-benzylique.** See *A. paraisopropyl-benzylique*, *A. para-oxyméthyl-benzylique*.—**A. pentabasique, A. pentahydrique, A. pentatomique.** See *Pentatomic* ALCOHOL.—**A. penténylique.** Pentenyl alcohol. [B.]—**A. pentéthylénique.** Pentethylene alcohol. [B.]—**A. pentylénique.** Pentylene (amylene) glycol. [B.]—**A. pentylique, A. pentylique primaire normal, A. pentylique secondaire, A. pentylique tertiaire.** Amyl alcohol, normal primary amyl alcohol, secondary amyl alcohol, tertiary amyl alcohol. [B.] See AMYL ALCOHOL.—**A. phén-allylique.** Phenallyl (cinnamic) alcohol. [B.]—**A. phén-éthylénique.** Phenethylene glycol. [B.]—**A. phén-éthylique.** Phenethyl alcohol. [B.]—**A. phenique.** Phenol; carbolic acid. [B, 92.]—**A. phéniqué au dixième.** A solution of 1 part of crystallized carbolic acid in 9 parts of alcohol. [B, 92.]—**A. phényl-allylique.** Cinnamic alcohol. [B.]—**A. phényl-éthylique, A. phényl-éthylique primaire, A. phényl-éthylique secondaire.** Phenethyl alcohol, primary phenethyl alcohol, secondary phenethyl alcohol. [B.] See PHENETHYL *alcohol*.—**A. phénylique.** Phenol; carbolic acid. [B, 92.]—**A. phényl-méthylique.** Phenylmethyl (benzyl) alcohol. [B.]—**A. phényl-propylique, A. phényl-propylique primaire, A. phényl-propylique secondaire.** Phenylpropyl alcohol, primary phenylpropyl alcohol, secondary phenylpropyl alcohol. [B.] See PHENYLPROPYL ALCOHOL.—**A. phlorylique.** Phlorol. [B, 92.]—**A. phosphoré.** 1. A solution of phosphorus in alcohol. [B, 92.] See *Alcoolé de* PHOSPHORE. 2. Ethyl phosphoric acid. [B, 93.] See ETHYL *phosphate*.—**A. pinacolique.** Pinacolyl alcohol. [B, 93.]—**A. pipéronylique.** Piperonyl alcohol. [B, 93.]—**A. polyatomique, A. polybasique.** See *Polyatomic* ALCOHOL.—**A's polyéthyléniques.** Polyethylenic alcohols. [B.]—**A. polyglucosique.** See *Polyglucosic* ALCOHOL.—**A's polyglycériques.** Polyglyceric alcohols. [B, 93.]—**A. polyhydrique.** See *Polyhydric* ALCOHOL.—**A. potassé, A. potassié** (2d def. only). 1. An alcoholic solution of potash. 2. Potassium ethylate. [B, 92.]—**A. primaire, A. primaire-secondaire, A. primaire-tertiaire.** See *Primary*, *Primary-secondary*, and *Primary-tertiary* ALCOHOL.—**A. propargylique.** Propargyl (propinyl) alcohol. [B, 93.]—**A. propénylique.** Glycerin. [B.]—**A. propinylique.** Propinyl alcohol. [B.]—**A. propionique.** Normal propyl alcohol. [B.] See PROPYL ALCOHOL.—**A. propyl-benzylique.** Propylbenzyl alcohol. [B.]—**A. propylénique, A. propylénique normal, A. propylénique primaire.** Propylene glycol, normal propylene glycol, primary propylene glycol. [B.] See PROPYLENE *glycol*.—**A. propylique, A. propylique normal, A. propylique primaire, A. propylique secondaire.** Propyl alcohol, normal propyl alcohol, primary propyl alcohol, secondary propyl alcohol. [B.] See PROPYL ALCOHOL.—**A. pseudo-amylénique.** Pseudoamylene glycol.

[B.] See AMYLENE *glycol.*—**A. pseudo-butylique.** Trimethylcarbinol. [B, 93.] See BUTYL ALCOHOL.—**A. pseudobutyl-phénylique.** Pseudobutylphenyl alcohol. [B, 38.] See PHENYL *propylcarbinol.* [B.]—**A. pseud-octylique.** Pseudooctyl alcohol; diethylpropylcarbinol. [B, 93.] See OCTYL ALCOHOL.—**A. pseudodiallylique.** Pseudodiallyl alcohol. [B.]—**A. pseudo-hexylénique.** Pseudohexylene glycol. [B.] See HEXYLENE *glycol.*—**A. pseudo-octylique.** See A. *pseud-octylique.*—**A. rectifié.** Rectified alcohol. [B, 92.] See ETHYL ALCOHOL.—**A. repurgatus.** Rectified alcohol. [A, 316.]—**A. sec.** Absolute alcohol. [B, 88.]—**A. secondaire, A. secondaire-tertiaire.** See *Secondary* and *Secondary-tertiary* ALCOHOL.—**A. silicique.** See TRIETHYL *silicol.*—**A. silico-heptylique.** Siliconheptyl alcohol. [B.]—**A. silico-nonylique.** Silicononyl alcohol. [B.]—**A. sinapique.** See ALCOOLÉ *sinapique.*—**A. sodé.** Sodium ethylate. [B, 92.]—**A. styrolylique.** Styronyl (phenethyl) alcohol. [B, 93.]—**A. styrylique.** Styryl (cinnamic) alcohol. [B, 38.]—**A. sulf-amylique.** Amyl mercaptan. [B, 107.]—**A. sulfamylmercurique.** Mercurous amyl-mercaptide. [B, 107.]—**A. sulfhydrique.** Ethyl mercaptan. [B, 107.]—**A. sulfo-mercurique.** Mercury mercaptide. [B, 93.]—**A. sulfo-plombique.** Lead mercaptide. [B, 93.]—**A. sulfo-potassique.** Potassium mercaptide. [B, 93.]—**A. sulfo-sodique.** Sodium mercaptide. [B, 93.]—**A. sycocérylique.** Sycoceryl alcohol. [B, 38.]—**A. tertiaire.** See *Tertiary* ALCOHOL.—**A. tétrabasique, A. tétracide, A. tétrahydrique.** See *Tetratomic* ALCOHOL.—**A. tétraméthyl-éthylénique.** Pinacone. [B.]—**A. tétratomique.** See *Tetratomic* ALCOHOL.—**A. tétréthylénique.** Tetrethylenic alcohol. [B.]—**A. tétrylique.** Butyl alcohol. [B.]—**A's thalliques.** Compounds of thallium with the alcohols. [B, 93.] See THALLIUM *amylate*, *ethylate*, and *methylate.*—**A. tolanique.** Tolane alcohol. [B.]—**A. toluylénique.** 1. Tolyl alcohol. 2. Tolylene glycol. [B.]—**A. toluylique.** Tolyl alcohol. [B, 93.]—**A. triacide, A. triatomique, A. tribasique.** See *Triatomic* ALCOHOL.—**A. trichlor-éthidénique, A. trichlor-éthylidénique.** Trichlorethylidene alcohol; chloral hydrate. [B.]—**A. trichloro-butidénique, A. trichloro-butylidénique.** Trichlorbutylidene alcohol; butylchloral hydrate. [B.]—**A. triéthylénique.** Triethylene alcohol. [B.]—**A. triglucosique.** See *Triglucosic* ALCOHOL.—**A. triglycérique.** Triglyceric alcohol; triglycerol. [B.]—**A. trihydrique.** See *Triatomic* ALCOHOL.—**A. triméthylénique.** Trimethylene alcohol. [B, 93.] See PROPYLENE *glycol.*—**A. tritylique.** Propyl alcohol. [B.]—**A. vinique.** Ethyl alcohol. [B, 92.]—**A. xylénique.** Tolylene glycol. [B.]—**Hydra'.** A name given by Béral to alcohol or any alcoholic preparation containing water. More particularly, ethyl alcohol mixed with an equal weight of water. [B, 92, 93.]—**Is-a., Iso-a.** See *Iso-alcohol* under ALCOHOL.—**Pèse-a.** An alcoholometer. [B.]—**Pseudo-a.** Pseudo-alcohol. [B, 93.] See under ALCOHOL.—**Thio-a.** See MERCAPTAN.

ALCOOLAT (Fr.), n. A^{3}l-ko-o^2-la^3. Lat., *alcoolatum* [Fr. Cod.], *alcoholatum* [Belg. Ph.]. It., *alcoolato.* Sp., *alcoholato.* A class of preparations, corresponding in part to the spirits of the U. S. Ph., made by distilling volatile substances, especially such as are derived from fresh or dried aromatic plants, with dilute alcohol. In the last edition of the Fr. Codex this title has been retained only for the *a's composés*, the *a's simples* being now denominated *teintures d'essences.* [B, 113.]—**A. ammoniacal.** See *Spiritus* AMMONIÆ.—**A. ammoniacal aromatique, A. ammoniacal aromatique anglais.** See *Spiritus* AMMONIÆ *aromaticus.*—**A. ammoniacal fétide.** See *Spiritus* AMMONIÆ *fœtidus* and AQUA *fœtida antihysterica.*—**A. antiscorbutique.** See *Spiritus* ARMORACIÆ *compositus.*—**A. aromatique ammoniacal** [Fr. Cod.]. Lat., *alcoolatum aromaticum ammoniacale* [Fr. Cod.]. Syn.: *esprit volatil ammoniacal huileux de Sylvius.* A preparation made by macerating for 3 or 4 days 100 parts each of orange-peel and lemon-peel, 30 parts of vanilla, 15 parts of cinnamon, 10 parts of cloves, and 500 parts of ammonium chloride in 500 parts each of cinnamon water (*eau distillée de cannelle* [Fr. Cod.]), and alcohol of a strength of 80 per cent. (by volume), then adding 500 parts of potassium carbonate and distilling 500 parts of the mixture. [B, 113.] Cf. *Spiritus* AMMONIÆ *aromaticus.*—**A. aromatique de Sylvius.** Syn.: *esprit carminatif de Sylvius.* A preparation made by macerating 24 parts each of the dried leaves of sweet basil, marjoram, rosemary, and rue, 8 parts each of angelica, anise, and lovage seeds, 6 parts each of bay-berries, nutmegs, cinnamon, and angelica root, and 3 parts each of galanga rhizome, ginger, cloves, and orange-peel, in 760 parts of alcohol of a strength of 85 per cent. by volume, and distilling the product. Formerly in much repute as a cordial and carminative. [B, 92.]—**A. composé.** An a. made from a mixture of volatile substances. [B, 92.]—**A. de Fioravanti** [Fr. Cod.]. Lat., *balsamum Fioravanti* [Fr. Cod.], *spiritus balsamicus* [Swiss Ph.]. It., *alcoolato di Fioravanti.* Sp., *alcohol de trementina compuesto* [Sp. Ph.]. Syn.: *baume de Fioravanti.* A preparation made, according to the Fr. Codex, by macerating for 4 days 2 parts each of aloes, galanga rhizome, ginger, zedoary, cinnamon, cloves, nutmeg, and the flowers of Cretan dittany, with 4 parts of laurel berries, in 120 parts of alcohol of a strength of 80 per cent. by volume; then adding 4 parts each of amber, liquid styrax, elemi and tacamahac resin, galbanum, and myrrh, and 20 parts of larch turpentine, and, after further maceration, distilling the mixture till 100 parts of the distillate are obtained. The Swiss preparation differs from this chiefly in the absence of the dittany, the resins, the amber, and the larch turpentine, and in the addition of 1 part of cubebs, 2 parts each of oil of turpentine, angelica root, helenium root, and sweet flag rhizome, and 60 parts of distilled water. The Spanish preparation is almost identical with the French, except that the aloes is omitted, and dittany leaves, solid styrax, and ordinary turpentine are substituted for dittany flowers, liquid styrax, and larch turpentine. [B, 95, 113.]—**A. de Garus** [Fr. Cod.]. Lat., *alcoolatum Gari* [Fr. Cod.]. It., *alcoolato di Garus.* Sp., *alcoholato de Garus.* Syn.: *esprit de Garus.* A preparation of the Fr. Cod., Belg. Ph., and Sard. Ph. of 1853, made by macerating 5 parts each of aloes, cloves, and saffron, 2 parts of myrrh, 10 parts of nutmeg, and 20 parts of cinnamon in 5,000 parts of alcohol of a strength of 80 per cent. by volume; and, after filtering and adding 1,000 parts of water to the filtrate, distilling until 4,500 parts of distillate are obtained. [B, 10, 113.]—**A. de labiées composé, A. polyaromatique.** See *A. vulnéraire.*—**A. sans pareil.** See EAU *sans pareille.*—**A. simple.** An a. made from a single volatile ingredient. The *a's simples* are termed *teintures d'essences* in the last edition of the Fr. Codex. [B, 113.]—**A. vulnéraire** [Fr. Cod.]. Lat., *alcoolatum vulnerarium* [Fr. Cod.]. Syn.: *eau vulnéraire spiritueuse.* A preparation made by macerating 100 parts each of the fresh leaves of wormwood, angelica, sweet basil, calamint (*Calamintha officinalis*), fennel, hyssop, marjoram, melissa, peppermint, origanum, rosemary, rue, summer savory, sage, thyme, and wild thyme (*Thymus serpyllum*), and 100 parts each of the flowering tops of hypericum (St. John's-wort) and lavender, in 4,500 parts of alcohol of a strength of 60 per cent. by volume, and, after macerating for 6 days, distilling off 3,000 parts. [B, 113.] Cf. AQUA *vulneraria spirituosa.*

ALCOOLATE (Fr.), n. A^{3}l-ko-o^2-la^{3}t. See ALCOHOLATE.

ALCOOLATIF (Fr.), n. A^{3}l-ko-o^2-la-tef. See ALCOOLOTIF.

ALCOOLATUM (Lat.), n. n. A^{2}l(a^{3}l)-ko-o^2-la(la^3)'tu^{3}m(tu^{4}m). See ALCOOLAT.—**A. aromaticum ammoniacale** [Fr. Cod.]. See ALCOOLAT *aromatique ammoniacal.*—**A. fragrans.** Cologne water. [B, 92.] See SPIRITUS *odoratus.*—**A. Gari** [Fr. Cod.]. See ALCOOLAT *de Garus.*—**A. vulnerarium** [Fr. Cod.]. See ALCOOLAT *vulnéraire.*

ALCOOLATURA (Lat.), n. f. A^{2}l(a^{3}l)''ko-o^2-la^3-tu^2(tu)'ra^3. See ALCOOLATURE.

ALCOOLATURE (Fr.), n. A^{3}l-ko-o^2-la^3-tu^{6}r. Lat., *alcoolatura* [Fr. Cod.], *alcoholatura.* It., *alcoolaturo.* Sp., *alcoholaturo.* A class of preparations of the Fr. Codex, corresponding in part to the fluid extracts of the U. S. Ph., made by macerating portions of a fresh plant in the same bulk or twice the bulk of alcohol, and filtering with expression. [B, 113.]—**A. composé.** An a. made from several different plants. [B, 107.]—**A. hydralcoolique, A. hydrolique.** An a. in which the alcohol used for extraction is dilute. [B, 93, 107.]—**A. simple.** An a. made from a single vegetable substance. [B, 107.]—**A. vulnéraire** [Fr. Cod.]. Lat., *tinctura vulneraria* [Fr. Cod.]. It., *acqua vulneraria, acqua vulneraria rossa.* Sp., *alcoholaturo vulnerario.* A preparation containing the same vegetable ingredients in the same proportions as the *alcoolat vulnéraire*, but which, instead of being distilled, are macerated for 6 days in 3,000 parts of alcohol of a strength of 80 per cent. by volume, the resulting extract being drawn off by filtration. [B, 113.]—**Hydra'.** See *A. hydralcoolique.*

ALCOOLÉ (Fr.), n. A^{3}l-ko-o^2-la. It., *alcooleo, alcoolito.* Sp., *alcoholado.* A tincture, especially one made from the dried plant. The preparations formerly so designated are denominated in the last edition of the Fr. Codex *teintures alcooliques.* [B, 38, 113.]—**A. acide.** See ACIDUM *dulcificatum.*—**A. aloétique.** See *Tinctura* ALOES.—**A. ammoniacal alcoolique.** Syn.: *teinture ammoniacale alcoolique.* An alcoholic tincture containing ammonia. [B, 85.] Cf. *Ammoniated* TINCTURE.—**A. balsamique, A. balsamique composé.** See TEINTURE *balsamique*, *Tinctura* BENZOINI *composita*, and BALSAMUM *commendatoris.*—**A. chlorhydrique.** See ACIDE CHLORHYDRIQUE *alcoolisé.*—**A's concentrés.** Alcoholic liquids containing large amounts of a volatile oil in solution; the essences of the Br. Ph. [B, 81.]—**A. nitrique.** See *Spiritus* ÆTHERIS NITROSI.—**A. sans pareil.** See EAU *sans pareille.*—**A. sinapique.** A preparation made by mixing 2 parts of black mustard flour, 4 parts of water, and 1 part of alcohol, and distilling off 1 part of the product. [B, 92.]—**A. sucré.** A sort of liqueur. [B, 92.] See RATAFIA.—**A. sulfurique aromatique.** See TEINTURE *aromatique sulfurique.*—**A. tannique.** See *Teinture de* NOIX DE GALLE *composée.*—**Saccharo-a.** See *A. sucré.*

ALCOOLICUS (Lat.), adj. A^{2}l(a^{3}l)-ko-o^{2}l'i^{2}k-u^{3}s(u^{4}s). Alcoholic.

ALCOOLIDE (Fr.), n. A^{3}l-ko-o^2-led. Sp., *alcohólido.* A preparation containing alcohol. [B, 38.]

ALCOOLIFICATION (Fr.), n. A^{3}l-ko-o^2-li^2-fi^2-ka^3-se-o^{2}n^2. The act or process of alcoholic fermentation. [B, 38.]

ALCOOLINE (Fr.), n. A^{3}l-ko-o^2-len. A balsamic preparation used as a collutory. [B, 38.]

ALCOOLIQUE (Fr.), adj. and n. A^{3}l-ko-o^2-lek. 1. (Adj.) alcoholic. 2. (N.) an alcoholic beverage. 3. (N.) one suffering from the effects of alcoholism. [B.]

ALCOOLISABLE (Fr.), adj. A^{3}l-ko-o^2-le-za^{3}bl. Capable of conversion into alcohol. [B, 38.]

ALCOOLISATION (Fr.), n. A^{3}l-ko-o^2-le-za^3-se-o^{2}n^2. Alcoholization.

ALCOOLISATUS (Lat.), adj. A^{2}l(a^{3}l)-ko-o^2-li^2-za(sa^3)'tu^{3}s(tu^{4}s). Alcoholized.

ALCOOLISÉ (Fr.), adj. and n. A^{3}l-ko-o^2-le-za. 1. (Adj.) alcoholized. 2. (N.) one suffering from the effects of alcoholism. [B.]

ALCOOLISER (Fr.), v. tr. A^{3}l-ko-o^2-le-za. To alcoholize. Reflex., *s'a.*, to become converted into alcohol. [B, 38.]

ALCOOLISME (Fr.), n. A^{3}l-ko-o^2-li^{2}zm. Alcoholism.—**A. aigu.** Acute alcoholism.—**A. à la toilette.** Alcoholism from tippling with toilet articles containing alcohol, such as cologne, etc. [Groussin, "Bull. gén. de thérap.," May 15, 1882, p. 383.]—**A. cérébro-spinal aigu.** The train of disorders of the cerebro-spinal nervous system produced by acute alcoholism. [B, 46.]—**A. chronique.** Chronic alcoholism.—**A. pulmonaire.** Pulmonary disease produced by alcoholism. [Fabre, "Gaz. des hôp.," xli, 1868, p. 493 (B).]

ALCOOLISMUS (Lat.), n. m. A^{2}l(a^{3}l)-ko-o^2-li^{2}z(li^{2}s)'mu^{3}s-

(mu[4]s). Alcoholism. [B.]—**A. gastro-intestinalis acutus.** The gastro-intestinal disorders produced by acute alcoholism. [B, 46.]

ALCOOLIZATIO (Lat.), n. f. A[2]l(a[3]l)-ko-o[2]-li[2]-za(za[3])'shi[2]-(ti[2])-o. Gen., *alcoolizatio'nis.* The rectification of spirit. [B, 87.] See ALCOHOLIZATION (3d def.).

ALCOOLOMÈTRE (Fr.), n. A[3]l-ko-o[2]-lo-me[2]tr. See ALCOHOLOMETER.

ALCOOLOMÉTRIE (Fr.), n. A[3]l-ko-o[2]-lo-ma-tre. See ALCOHOLOMETRY.

ALCOOLOMETRUM (Lat.), n. n. A[2]l(a[3]l)"ko-o[2]-lo-me[2]t'ru[3]m-(ru[4]m). See ALCOHOLOMETER.

ALCOOLOTIF (Fr.), n. A[2]l-ko-o[2]-lo-tef. Sp., *alcoholotivo.* A preparation containing alcohol and designed for external use. [B, 38.]

ALCOOMEL (Fr.), n. A[3]l-ko-o[2]-me[2]l. It., *alcoomele.* A name given by Béral to a mixture of 1 part of alcohol and 3 parts of honey. [B, 38.]

ALCOOMELLÉ (Fr.), n. A[3]l-ko-o[2]-mel-la. It., *alcoomellato.* A name given by Béral to a syrupy liquid prepared by mixing 3 parts of honey with 1 part of an extract made with dilute alcohol (*alcoolature hydrolique*). [B, 38.]

ALCOOMETER, n. A[2]l"ko-o[2]'me[2]t-u[6]r. See ALCOHOLOMETER.

ALCOOMÈTRE (Fr.), n. A[3]l-ko-o[2]-me[2]tr. Also written *alcoolomètre*, but a. is the more usual form. [B, 38, 113.] See ALCOHOLOMETER.

ALCOOMETRICAL, adj. A[2]l"ko-o[2]-me[2]t'ri[2]-ka[2]l. Fr., *alcoométrique.* Ger., *alkoholometrisch.* It., *alcoolimetrico.* Sp., *alcoométrico, alcoholimétrico.* Of or pertaining to alcoholometry. [B, 37.]

ALCOOMETRY, n. A[2]l"ko-o[2]m'e[2]t-ri[2]. Fr., *alcoométrie.* See ALCOHOLOMETRY. [B, 37.]

ALCOOTHIONIC ACID. A[2]l-ko"o[2]-thi-o[2]n'i[2]k. From *alcohol* and *thionic.* See ALTHIONIC ACID.

ALCOPHYRE, n. A[2]l'ko-fir. Fr., *alcophyre.* Ger., *Alkophyr.* An albuminoid substance or mixture of substances prepared by treating fibrin with a digestive ferment together with phosphoric acid, adding calcium carbonate, evaporating the mixture, extracting the residue with 95-per-cent. alcohol, and again evaporating to dryness. [Brücke, "Sitzungsb. d. Wien. Akad. der Wssnsch.," lxxxvii, 3, pp. 111, 141 (B).]

ALCOR, n. Calcined copper. [B, 87, 111.] See *Æs ustum.*

ALCORNÉE (Fr.), n. A[3]l-ko[3]r-na. See ALCHORNEA.

ALCORNIN, n. A[2]l-ko[3]r'ni[2]n. For deriv., see ALCORNOQUE. Fr., *alcornine.* Ger., *Alcornin.* It., Sp., *alcornina.* Also written *alchornin.* A fatty crystallizable principle obtained by Blitz from alcornoque bark. [B, 7, 93.]

ALCORNOC (Lat.), n. n. A[2]l(a[3]l)-ko[3]r'no[2]k. Indecl. Alcornoque.—**A'extract** (Ger.). Extract of alcornoque bark.—**A'rinde** (Ger.). Alcornoque bark.—**Cortex a.** Alcornoque bark.

ALCORNOCO (Lat., Sp.), n. A[2]l(a[3]l)-ko[2]r-no'ko. 1. Alcornoque. 2. A name given in South America to *Bowditchia virgilioides.* [B.]—**A'rinde** (Ger.). Alcornoque bark.—**Extractum cabarro a.** Extract of alcornoque bark.

ALCORNOQUE (Sp.), n. A[3]l-kor-no'ka. From Ar., *al*, the, and *qôrq*, a sandal with a cork sole [A, 334], or from Celtic *cran-airke*, the cork-tree [A, 338]. Also written *alcornoqué, alcornoc*, and *alcornoco.* 1. The cork-tree. 2. A South American tree; according to the older writers, *Alchornea latifolia;* according to others, *Bowdichia virgilioides*, or a species of *Byrsonima*, furnishing a. bark. [B, 5, 19, 88, 92, 93.]—**A. bark.** Lat., *cortex a.* (seu *alcornoc*). Fr., *écorce d'a.* Ger., *Alcornocrinde.* A bark obtained from the a. (2d def.), first imported into Europe in 1784, and vaunted as a sudorific and remedy for phthisis. It occurs in commerce under the form of thick fragments presenting two layers, an external, spongy in consistence and astringent in taste, and an internal, woody and possessed of a bitter taste and emetic properties. [B, 5, 88.]—**A. of Brazil.** Fr., *a. du Brésil.* The *Bowdichia major.* [B, 92.]—**American a.** See *A.* (2d def.).—**Cortex a.** (Lat.), **écorce d'a.** (Fr.). See *A. bark.*—**European a. bark, Spanish a. bark.** The bark of the young cork-tree, used in tanning. [B, 39.]

ALCOSOL, n. A[2]l'ko-so[2]l. For deriv., see ALCOHOL and SILICIC (2d def.). Syn.: *alcogel* (2d def.). 1. An alchemical name for antimony. 2. A gelatinous body obtained by the action of ethyl alcohol upon colloidal silicic acid. [A, 337; B, 2.]

ALCUBA, n. An old name for butter; "butyrum crudum." [A, 335.]

ALCUBRID, ALCUBRITH, n's. From Ar., *al-kibrîth*, sulphur. Alchemical names for sulphur. [A, 305; B, 59.]

ALCULA (Lat.), n. f. A[2]l(a[3]l)'ku[2](ku)-la[3]. See ALCOLA.

ALCUR, n. An alchemical name for sulphur. [A, 305, 325.]

ALCYON (Fr.), n. A[3]l-se-o[2]n[2]. The botanical genus *Alcyonium.* [B, 93.]

ALCYONARIA (Lat.), n. n. pl. A[2]l(a[3]l)-si[2](ku[6])-o-na(na[3])'ri[2]-a[3]. Gen., *alcyonario'rum.* For deriv., see ALCYONIUM. Fr., *alcyonaires.* Syn.: *Ctenocera* [Blainville]. A name given by Milne-Edwards to an order of *Cœlenterata*, belonging to the class *Actinozoa*, the individuals of which are made up of polyps provided with 8 pinnately fringed tentacles and divided into parts which are always some multiple of four. The A. are divided into the families *Alcyonidæ, Tubiporidæ, Pennatulidæ*, and *Gorgonidæ*, the latter including also the *Isididæ* and *Corallidæ*, which by some are regarded as distinct families. [B, 28, 93.] See also OCTACORALLA.

ALCYONEUM (Lat.), n. n. A[2]l(a[3]l)-si[2](ku[6])-o-ne(na)'u[3]m(u[4]m). Really an adjective agreeing with *medicamen.* From ἀλκυόνειον, ἀλκυόνεον, bastard sponge. Also written *alcionium* and *halcionium.* A sort of sponge believed by the ancients to be the nest of a sea-bird or to resemble a sea-bird's nest, made out of the inspissated foam of the sea. According to Pliny, it was used to remove spots from the face, and Celsus gives it a place in his list of astringents ("rodentia"). [B, 45, 111, 113, 114.]—**A. foraminosum, A. molle, A. supposum, A. tuberosum, A. vermiculatum.** Varieties of a. described by Dioscorides and others. [B, 59.]

ALCYONIDÆ (Lat.), n. f. pl. A[2]l(a[3]l)-si[2](ku[6])-o[2]n'i[2]d-e(a[3]-e[2]). Fr., *alcyonidées.* Ger., *Alcyoniden.* A family of *Alcyonaria* comprising those genera in which the body is fixed and contains calcareous spicula of sclerodermic corallum imbedded in its substance, but no hard central axis. [B, 28.]

ALCYONIDEÆ (Lat.), n. f. pl. A[2]l(a[3]l)-si[2](ku[6])-o[2]n-i[2]d'e[2]-i-(a[3]-e[2]). Gray's name for a division of *Algæ* (*Thalassiophytæ*) comprising *Alcyonidium* and allied genera. [B, 170.]

ALCYONIDIEÆ (Lat.), n. f. pl. A[2]l(a[3]l)-si[2](ku[6])-o[2]n-i[2]d-i(e)'-e[2]-i(a[3]-e[2]). An order of *Thalassiophytæ* made by Lamouroux, comprising the single genus *Alcyonidium.* [B, 170.]

ALCYONIDIUM (Lat.), n. n. A[2]l(a[3]l)-si[2](ku[6])-o[2]n-i[2]d'i[2]-u[3]m-(u[4]m). Lamouroux's name for a genus of *Algæ* now referred to *Nostoc.* [B, 173.]

ALCYONIUM (Lat.), n. n. A[2]l(a[3]l)-si[2](ku[6])-o[2]n-i(e)'u[3]m(u[4]m). For deriv., see ALCYONEUM. Fr., *alcyon.* 1. *Alcyoneum.* 2. A genus of *Actinozoa* established by Linnæus, belonging to the order *Alcyonaria* and the family *Alcyonidæ.* [B, 28, 93.]—**A. digitatum.** Syn.: *dead-man's-hand, dead-men's-fingers.* A species of *A.* occurring under the form of sponge-like crusts or masses of orange-color upon the surface of submarine objects. [B, 28.]

ALDABARAN (Ar.), n. See ALBADARAN.

ALDANE, n. A[2]l'dan. For deriv., see ALDEHYDE. Fr., *aldane.* A term proposed by Ribau for products formed by the union of 2 or more molecules of an aldehyde, with the elimination of the elements of water. Thus, crotonic aldehyde, $C_8H_{10}O_2$, = 3 molecules of acetic aldehyde, less the elements of one molecule of water. The number of aldehyde molecules thus condensed is designated by the prefix di-, tri-, etc. *E.g.*, diacetaldane. [B, 2.]

ALDBOROUGH, n. A[4]ld'bu[6]-ro. A place in Suffolk, Eng., noted for its sea-bathing. [B, 108.]

ALDEHYD (Eng., Ger.), n. A[2]l'de[2]-hid, A[3]l'de[2]-hu[6]d. Aldehyde. [B.]—**A'alkoholat.** Aldehyde alcoholate.—**A'grün.** See *Aldehyde* GREEN.—**A'harz.** See *Aldehyde* RESIN.—**Aromatischer A.** See *Aromatic* ALDEHYDE.

ALDEHYDAMMONIA, n. A[2]l"de[2]-hid-a[2]m-mo'ni[2]-a[3]. For deriv., see ALDEHYDE and AMMONIA. Fr., *aldéhyde-ammoniaque.* Ger., *Aldehydammoniak.* Also written *aldehyde-ammonia.* Syn.: *ammonium aldehydate.* 1. A compound of an aldehyde with ammonia. The a's have in general the formula C_mH_{2m+1}.CH-(OH).NH_2, and are frequently designated as *hydrate-amides* or *hydramines.* 2. When used without qualification, the compound of acetic aldehyde with ammonia, $CH_3.CH(NH_2)(OH)$. See ETHYLIDENE *hydramine.*—**A. sulphite.** A crystalline body, isomeric with taurine, formed by the action of sulphurous acid upon ethylidene hydramine, having the constitution $C_2H_7NSO_3 = CH_3.CH =$ (NH_3SO_3). [B, 2, 3, 4.]—**Butyric a., Isobutyric a.** See BUTYLIDENE *hydramine.*—**Isovaleric a.** See AMYLIDENE *hydramine.*

ALDEHYDATE, n. A[2]l'de[2]-hi-dat. Fr., *aldéhydate.* Ger., *Aldehydat.* 1. A compound of an aldehyde with a base, as ammonium a. 2. A salt of aldehydic (acetylous) acid. [B.]

ALDEHYDCOLLIDIN (Ger.), n. A[3]l'de[2]-hu[6]d-ko[2]-li[2]-den'. Aldehydecollidine.—**A'hexahydrür.** Aldehydecollidine hexahydride. [B, 79.]

ALDEHYDE, n. A[2]l'de[2]-hid. A contraction of *alcohol dehydrogenatus*, alcohol deprived of water. Lat., *aldehydum.* Fr., *aldéhyde.* Ger., *Aldehyd.* It., *aldeide.* Sp., *aldehida. aldeida.* Syn.: *alcohol dehydrogenatum* (seu *dehydrogenatus*), *aldehyd.* A term given by Liebig to the body now known as acetic a., from the circumstance that it may be regarded as ethyl alcohol from which 2 atoms of hydrogen have been removed. When the term a. is used without qualification, this body is understood to be meant. See ACETIC A. The term was subsequently extended to all bodies of similar composition produced by the oxidation of a primary alcohol, and having the molecular constitution of the latter, less two atoms of hydrogen. The general formula of the a's is $(C_mH_n)'.C(H) = O$, where C_mH_n is any univalent hydrocarbon, and these bodies may therefore be regarded as derivatives: 1. Of a molecule of hydrogen, HH, in which the hydrogen is replaced by an oxygenized hydrocarbon. 2. Of a molecule of water in which both hydrogen atoms are replaced by a bivalent hydrocarbon, *i. e.*, they are oxides of the bivalent series of hydrocarbons. 3. Of formic a., CH_2O, in which a univalent hydrocarbon replaces one of the hydrogen atoms. On oxidation the a's are converted into the corresponding monobasic acids, of the general formula $(C_mH_n)'.C(OH) = O$, and by treatment with nascent hydrogen they are reconverted into the alcohols, $(C_mH_n)'.CH_2.OH$, from which they were derived. The individual a's (for which see the major list) have in general specific names derived from the corresponding acids. Many are obtained directly from plants, either existing ready formed in the latter or being given off as volatile oils on distilling the plants with water. [B, 2, 3, 4.] See also *Aromatic a.* and KETONE.—**A. acid.** See under ACID.—**A. alcohol.** See under ALCOHOL.—**A. alcoholate.** Fr., *aldéhyde-alcoolate.* Ger., *Aldehydalkoholat.* An addition compound of acetic a. and ethyl alcohol, having the composition $C_2H_4O.C_2H_6O = C_4H_{10}O_2$. [B, 2.]—**A. base.** See ALDINE.—**A. blue.** See under BLUE.—**A. characteristic.** The univalent radicle $C(H) = O$, common to the a's. [B.]—**A. ether.** See CROTONIC *aldehyde.*—**A. ethyl-chloride.** A supposed addition compound of acetic a. and ethyl chloride: $C_2H_4O.C_2H_5Cl$. Really monochlor-

ether. [B, 2, 3.] See CHLORETHER.—**A. green.** See under GREEN. —**A. radicle.** See under RADICLE —**A. resin.** See under RESIN. —**Aromatic a.** Fr., *aldéhyde aromatique.* Ger., *aromatischer Aldehyd.* It., *aldeide aromatica.* Sp., *aldeida aromática.* An a. produced by the oxidation of the primary aromatic alcohols and by their own oxidation giving rise to the monobasic aromatic acids. Thus, benzoic a., $C_6H_5.C(H) = O$, is derived from benzyl alcohol, $C_6H_5.CH.OH$, and on oxidation furnishes benzoic acid, $C_6H_5.C(OH) = O$. As the aromatic alcohols are regarded as derived from methyl alcohol (carbinol) by the substitution of phenyl or its homologues for hydrogen, so the aromatic a's may be considered to be formed by similar substitution from formic a. [B.] See also *Aromatic* KETONE.—**Double a.** An a. which bears the same relation to a glycol or diatomic alcohol that an ordinary a. does to a monatomic alcohol. Thus, glyoxal, $C_2H_2O_2, = \left\{ \begin{matrix} C(H) = O \\ C(H) = O \end{matrix} \right.$, is derived from glycol, $\left\{ \begin{matrix} CH_2.OH \\ CH_2.OH \end{matrix} \right.$, in the same way that formic a., $C(H) = O$, is derived from methyl alcohol, $CH_3.OH$. [B.]—**Hydroxy-a.** Fr., *hydroxy-aldéhyde.* Ger., *Hydroxyaldehyd.* A body derived from an a. by the substitution of a molecule of hydroxyl for an atom of hydrogen not situated in the a. characteristic (*e. g.*, oxyaldehyde and aldol [*q. v.*]). [B, 4.]—**Met-a.** See the major list.—**Oxy-a.** 1. An hydroxy-a. 2. A particular hydroxy-a. derived from acetic aldehyde. [B.] See OXYALDEHYDE.—**Par-a.** See the major list.—**Thio-a.** Fr., *thio-aldéhyde.* Ger., *Thioaldehyd.* An a. in which sulphur replaces oxygen in the a. characteristic. They may be regarded as sulphides of the bivalent hydrocarbons, having the general formula $C_mH_n.C(H) = S$. They are known chiefly in their polymeric modifications. [B, 4.]—**Trichlorinated a.** Lat., *aldehydum trichloratum.* Fr., *aldéhyde trichloré.* It., *aldeide triclorata.* Chloral. [B.]

ALDÉHYDE (Fr.), n. A^{3}l-da-ed. Aldehyde.—**Alcool-a.** See *Aldehyde*-ALCOHOL.—**A. acétique.** Acetic aldehyde. [B.]—**A. acrylique.** Acrolein. [B.]—**A. alcoolate.** See ALDEHYDE *alcoholate.*—**A.-ammoniaque.** See ALDEHYDAMMONIA.—**A. amylique.** Valeric aldehyde. [B, 107.]—**A. anisique.** Anisic aldehyde. [B, 38.]—**A. aromatique.** See *Aromatic* ALDEHYDE.—**A. benzoïque, A. benzylique.** Benzoic aldehyde. [B, 38, 93.]—**A. butylique, A. butyrique.** Butyric aldehyde. [B.]—**A. campholique.** Camphor. [B, 93.]—**A. caprique.** Capric aldehyde. [B.]—**A. caproïque, A. caproylique.** Caproic aldehyde. [B.] —**A. caprylique.** Caprylic aldehyde. [B, 38.]—**A. cétylique.** Palmitic aldehyde. [B, 93.]—**A. chloro-benzoïque, A. chloro-benzylique.** Chlorbenzoic aldehyde. [B.]—**A. chloro-salicylique.** Chlorsalicylic (orthochlorbenzoic) aldehyde. [B.] See CHLORBENZOIC *aldehyde.*—**A. cinnamique.** Cinnamic aldehyde. [B, 93.]—**A. crithmique.** Crithmic aldehyde. [B, 93.]—**A. crotonique.** Crotonic aldehyde. [B.]—**A. cuminique.** Cumic aldehyde. [B, 93.]—**A. éthalique.** Palmitic aldehyde. [B, 92, 107.] —**A. éthyl-méthyl-protocatéchique.** Ethylvanillin. [B, 93.] —**A. évodique.** Euodic aldehyde. [B.]—**A. formique.** Formic aldehyde. [B.]—**A. fumarique.** Fumaric aldehyde. [B.]—**A. heptoïque, A. heptylique.** Œnanthylic aldehyde ; œnanthol. [B.]—**A. hydroxy-benzoïque.** Hydroxybenzoic aldehyde. [B.]—**A. iso-butyrique, A. iso-butylique.** Isobutyric aldehyde. [B.] See BUTYRIC *aldehyde.*—**A. iso-caprique.** Isocapric aldehyde. [B.]—**A. iso-valérique.** Isovaleric aldehyde. [B, 93.] See VALERIC *aldehyde.*—**A. laurique.** Lauric aldehyde. [B.]—**A. mannitique.** Mannitose. [B, 93.]—**A. mésitique.** Mesitic aldehyde. [B, 93.]—**A. méth-oxybenzoïque, A. méthyl-oxybenzoïque.** Methyloxybenzoic aldehyde. [B.] — **A. méthyl-protocatéchique.** Methylprotocatechuic aldehyde ; vanillin. [B.] — **A. méthyl-salicylique.** Methylsalicylic (methyloxybenzoic) aldehyde. [B.]—**A. myristique.** Myristic aldehyde. [B.]—**A. naphtoïque.** Naphthoic aldehyde. [B.] — **A. nitro-benzoïque, A. nitro-benzylique.** Nitrobenzoic aldehyde. [B.]—**A. œnanthique, A. œnanthylique.** Œnanthylic aldehyde ; œnanthol. [B.]—**A. orthochloro-benzoïque, A. orthochloro-benzylique.** Orthochlorbenzoic aldehyde. [B.] See CHLORBENZOIC *aldehyde.*—**A. orthohydroxy-benzoïque, A. orthoxy-benzoïque.** Salicylic aldehyde. [B.]—**A. oxy-benzoïque, A. oxy-benzylique.** Hydroxybenzoic aldehyde. [B.] — **A. palmitique.** Palmitic aldehyde. [B.]—**A. parachloro-benzoïque, A. parachloro-benzyllque.** Parachlorbenzoic aldehyde. [B.] See CHLORBENZOIC *aldehyde.* [B.] — **A. parahydroxy-benzoïque.** Parahydroxybenzoic aldehyde. [B.] See HYDROXYBENZOIC *aldehyde.*—**A. para-isobutyrique.** Paraisobutyric aldehyde. [B.] See BUTYRIC *aldehyde.* — **A. para-méthylique.** Paramethyl aldehyde. [B.]—**A. paraméthyl-oxybenzoïque.** Anisic aldehyde. [B.] — **A. paraoxy-benzoïque.** Parahydroxybenzoic aldehyde. [B.] See HYDROXYBENZOIC *aldehyde.* —**A. para-thioformique, A. para-thiométhylique.** Parathiomethyl (parathioformic) aldehyde. [B.]—**A. para-toluïque, A. para-toluylique.** Paratoluic aldehyde. [B, 93.] See TOLUIC *aldehyde.* —**A. phényl-acétique.** Phenylacetic aldehyde. [B.]—**A. phtalique.** Phthalic aldehyde. [B, 38.]—**A. pipéronylique.** Piperonal. [B.]—**A. propionique.** Propionic aldehyde. [B, 93.]—**A. protocatéchique.** Protocatechuic aldehyde. [B.]—**A. pyromucique.** Pyromucic aldehyde ; furfurol. [B, 38.] —**A. rutique.** Rutic aldehyde. [B.]—**A. salicylique.** Salicylic aldehyde. [B.] — **A. sélénio-isovalérique.** Selenioisovaleric aldehyde. [B.]—**A. subérique.** Suberic aldehyde. [B.]—**A. sycocérylique.** Sycoceryl aldehyde. [B.]—**A. thio-acétique.** Thioacetic aldehyde. [B.]—**A. thio-formique.** Thioformic aldehyde ; methylene sulphide. [B, 93.]—**A. toluïque, A. toluylique.** Toluic aldehyde. [B.]—**A. tribromé.** Bromal. [B.]—**A. trichloré.** Chloral. [B.]—**A. valérique.** Valeric aldehyde. [B.]—**A. vanillique.** Vanillin. [B.]—**A. vinique.** Acetic aldehyde. [B, 107.]—**Bleu d'a.** See *Aldehyde* BLUE.—**Brom-a., Chlor-a.** Substitution compounds of ethylene in which bromine or chlorine replaces one or more atoms of hydrogen. [B, 93.]—**Hydroxy-a.** Hydroxy-aldehyde. See under ALDEHYDE.—**Mét-a.** Metaldehyde. [B.]—**Oxy-a.** See OXYALDEHYDE and *Oxy*-ALDEHYDE.—**Par-a.** Paraldehyde. [B.]—**Thio-a.** Thio-aldehyde. See under ALDEHYDE.—**Vert d'a.** See *Aldehyde* GREEN.

ALDEHYDE-AMMONIA, n. A^{2}l″de-hid-a^{2}m-mo′ni^2-a^3. See ALDEHYDAMMONIA.

ALDEHYDECOLLIDINE, n. A^{2}l″de^2-hid-ko^{2}l′li^2-den. Fr., *aldéhyde-collidine.* Ger., *Aldehydcollidin.* Syn.: *Aldehydine.* See COLLIDINE.—**A. hexahydride.** Fr., *hexahydrure d'aldéhyde-collidine.* Ger., *Aldehydcollidinhexahydrür.* An oily liquid, boiling at 165°, having the constitution of a. with the addition of 6 atoms of hydrogen : $C_5H_2(CH_3)_3N.H_6 = C_8H_{16}N$. [B, 79.]

ALDEHYDENE, n. A^{2}l″de^2-hi′den. Acetylene. [B.]

ALDEHYDE-SULPHUROUS ACID, n. A^{2}l″de^2-hid-su^{3}l′-fu^2-ru^{3}s. Fr., *acide aldéhyde-sulfureux.* Ethylidenehydroxysulphonic acid. [B.]

ALDEHYDIC, adj. A^{2}l-de^2-hi′di^{2}k. Fr., *aldéhydrique.* It., *aldeidico.* Sp., *aldeídico.* Pertaining to aldehyde. [B.]

ALDEHYDIC ACID, n. Fr., *acide aldéhydique.* Ger., *Aldehydsäure.* It., *acido aldeidico.* Sp., *ácido aldehídico* (*ó aldeídico*). See ACETYLOUS ACID.

ALDEHYDIN (Ger.), n. A^{3}l-de^2-hu^6-den′. Aldehydine.—**A'äthylchlorid.** Aldehydine ethyl-chloride. [B, 79.]—**A'äthyljodid.** Aldehydine ethyl-iodide. [B, 79.]

ALDEHYDINE, n. A^{2}l″de^2-hi′den. Fr., *aldéhydine.* Ger., *Aldehydin.* 1. A name given by Strecker to hydracetamide (*q. v.*). [B, 4, 93.] 2. Aldehydecollidine, an isomeric form of collidine (*q. v.*). [B, 2, 79.]—**A. ethyl-chloride.** Fr., *éthyl-chlorure d'aldéhydine.* Ger., *Aldehydinäthylchlorid.* A compound of aldehydecollidine with ethyl chloride, having the composition $C_{10}H_{16}NCl = C_5H_2(CH_3)_3N.C_2H_5Cl$. [B, 79.]—**A. ethyl-iodide.** Ger., *Aldehydinäthyljodid.* A compound of aldehydecollidine with ethyl iodide, having the formula $C_{10}H_{16}NI = C_5H_2(CH_3)_3N.C_2H_5I$. [B, 79.]

ALDEHYDODIMETHYLPROTOCATECHUIC ACID, n. A^{2}l-de^2-hi″do-di-me^2‴thi^{2}l-pro-to-ka^2-te^2-ku^2′i^{2}k. For deriv., see ALDEHYDE, *di**, METHYL, and PROTOCATECHUIC ACID. Fr., *acide aldéhydo-diméthyl-protocatéchique.* Ger., *Aldehydodimethylprotocatechusäure.* An aldehyde acid derived from dimethylprotocatechuic (veratric) acid ; opianic acid. [B, 4.]

ALDEHYDOMETHYLPROTOCATECHUIC ACID, n. A^{2}l-de^2-hi″do-me^2‴thi^{2}l-pro-to-ka^2-te^2-ku^2′i^{2}k. For deriv.. see ALDEHYDE, METHYL, and PROTOCATECHUIC ACID. Fr., *acide aldéhydo-méthyl-protocatéchique.* Ger., *Aldehydomethylprotocatechusäure.* See ALDEHYDOVANILLIC ACID.

ALDEHYDOPAROXYBENZOIC ACID, n. A^{2}l-de^2-hi″do-pa^2-ro^{2}x‴i^2-be^{2}n-zo′i^{2}k. For deriv., see ALDEHYDE and PAROXYBENZOIC ACID. Fr., *acide aldéhydo-paroxy-benzoïque.* Ger., *Aldehydoparoxybenzoësäure.* See ALDEHYDOSALICYLIC ACID.

ALDEHYDORTHOXYBENZOIC ACID, n. A^{2}l″de^2-hid-o^{2}r-tho^{2}x‴i^2-be^{2}n-zo′i^{2}k. For deriv., see ALDEHYDE and ORTHOXYBENZOIC ACID. Fr., *acide aldéhyd-orthoxy-benzoïque.* Ger., *Aldehydorthoxybenzoësäure.* See ALDEHYDOSALICYLIC ACID.

ALDEHYDOSALICYLIC ACID, n. A^{2}l-de^2-hi″do-sa^{2}l-i^2-si^{2}l′i^{2}k. For deriv., see ALDEHYDE and SALICYLIC ACID. Fr., *acide aldéhydo-salicylique.* Ger., *Aldehydosalicylsäure.* Syn.: *aldehydorthoxybenzoic acid.* A monobasic crystalline acid having the composition $C_8H_6O_4 = C_6H_3(OH)[C(H) : O]CO.OH$, or that of salicylic acid in which one atom of hydrogen is replaced by the aldehyde characteristic $C(H) : O$. Two acids of this constitution are known : 1. *Orth-a. a.*, $C_6(H,H,H,CH : O,OH,CO.OH,)$. 2. *Par-a. a.*, $C_6(H,CH : O,H,H,OH,CO.OH)$. An isomeric substance, *aldehydoparoxybenzoic acid*, derived from paroxybenzoic acid, has the constitution $C_6(H,H,OH,CH : O,H,CO.OH,)$ or $C_6(H,H,OH,H,CH : O,CO.OH,)$. [B, 2, 4.]

ALDEHYDOVANILLIC ACID, n. A^{2}l-de^2-hi″do-va^2-ni^{2}l′-li^{2}k. For deriv., see ALDEHYDE and VANILLIC ACID. Fr., *acide aldéhydo-vanillique.* Ger., *Aldehydovanillasäure.* Syn.: *aldehydomethylprotocatechuic acid.* A monobasic acid occurring under the form of silky acicular crystals of the composition $C_8H_8O_5 = C_6H_2(OH)(OCH_3)(CH : O)CO.OH$, or that of vanillic acid in which the aldehyde characteristic CH : O replaces an atom of hydrogen. [B, 4.]

ALDEHYDOXYBENZOIC ACID, n. A^{2}l″de^2-hid-o^{2}x‴i^2-be^{2}n-zo′i^{2}k. For deriv., see ALDEHYDE and OXYBENZOIC ACID. Fr., *aldéhyd-oxybenzoïque.* Ger., *Aldehydoxybenzoësäure.* Oxybenzoic (hydroxybenzoic) acid in which the aldehyde characteristic CH : O replaces an atom of hydrogen. It includes aldehydoparoxybenzoic and aldehydorthoxybenzoic acids. [B.] See ALDEHYDOSALICYLIC ACID.

ALDEHYDSÄURE (Ger.), n. A^{3}l-de^2-hu^{6}d′zoi-re^2. Aldehydic (acetylous) acid. [B.]

ALDEHYDUM (Lat.), n. n. A^{2}l(a^{3}l)-de^2-hi(hu^6)′du^{3}m(du^{4}m). Aldehyde. [B.]—**A. trichloratum.** Chloral. [B, 81.]

ALDEL, n. A Peruvian plant belonging to the order *Boraginaceæ.* [A, 337.]

ALDENEU (Fr.), n. A^{3}ld-nu^5. A cold sulphurous alkaline mineral spring in Switzerland, the waters of which are drank, and used in the form of hot baths, in bronchitis, rheumatism, and cutaneous affections. [B, 93.]

ALDER, n. A^{4}l′du^{5}r. From A.-S., *alor*, *aler.* O. H. Ger., *elira*, *erila.* Icel., *ell*, *oln.* Perhaps from Celtic *al*, near, and *lan*, a river-bank. Lat., *alnus.* Fr., *aune.* Ger., *Erle.* It., *alno.* Sp., *aliso.* The common name for several species of *Alnus* and shrubs of similar appearance. [B, 34, 116.]—**A. bark.** See under ALNUS *glutinosa.*—**A. buckthorn.** *Rhamnus frangula.* [B.]—**American a.** *Alnus serrulata.* [B.]—**Berry-bearing a.** *Rhamnus frangula.* [B.]—**Black a.** Fr., *aune noire.* A name formerly

given in England to *Rhamnus frangula*; in the United States, applied to *Prinos verticillatus* and *Alnus incana*. [B, 19, 34.]—**European a.** *Alnus glutinosa.* [B, 5, 19.]—**Heart-leaved a.** *Alnus cordifolia.* [A, 327.]—**Red a.** *Cunonia capensis.* [B, 19.]—**Smooth a.** *Alnus serrulata.* [B.]—**Speckled a., Tag a., Turkey a.** *Alnus incana.* [A, 327; B, 34.]—**White a.** A name given to *Clethra alnifolia* and other plants. [B, 19.]

ALDEYRE (Sp.), n. A^{3}l-da'i^{2}-ra. A place near Granada, in Spain, where there are mineral springs. [B, 88.]

ALDIDE, n. A^{2}l'did. From *aldehyde.* Fr., *aldide.* Ger., *Aldid.* A term applied by Gmelin to the aldehydes as a class, as well as to several organic anhydrides and other bodies not generally regarded as aldehydes. [B, 2.]

ALDINE, n. A^{2}l'den. From *aldehyde.* Fr., *aldine.* Ger., *Aldin.* Syn.: *aldehyde base.* A name given to a series of amorphous bodies having basic properties, produced by the decomposition of aldehydammonia (ethylidene hydramine) in alcoholic solution. The a.'s include hydracetamide, oxytrialdine, oxytetraldine, and oxypentaldine. [B, 3.]

ALDOL, n. A^{2}l-do^{2}l'. For deriv., see ALDEHYDE and ALCOHOL. Fr., *aldol.* Ger., *Aldol.* Syn.: *Oxybutyric aldehyde, oxybutyraldehyde.* A viscid liquid, of bitter aromatic taste, produced by the action of hydrochloric acid upon aldehyde, and having the constitution, $C_4H_8O_2 = CH_3.CH(OH).CH_2.CH:O$, of an aldehyde-alcohol derived from butylene glycol, and polymeric with acetic aldehyde. On oxidation it furnishes beta hydroxybutyric acid. It has a polymeric form, *paraldol,* and a related body is known as *paraldane.* [B, 2, 3, 4.]—**A. anhydride.** A body of the constitution $C_8H_{14}O_3 = 2C_4H_8O_2 - H_2O$. [B, 2.]

ALDROVANDA (Lat.), n. f. A^{2}l(a^{3}l)-dro-va^{2}n(wa^{3}n)'da^{3}. Named after Aldrovandi, an Italian botanist. A genus of water-plants belonging to the *Droseraceæ,* established by Monti. [B, 49.]—**A. vesiculosa** [Linnæus]. A species of A. found in ponds in northern Italy, France, Germany, and India, distinguished by the peculiar vesicular character of the ends of its leaves, which causes them to float upon the surface of the water and thus support the plant. [B, 19.]

ALDUM, n. See ALZUM.

ALE, n. Al. A.-S., *eale, aloth,* etc., from *alan* (Lat., *alere*), to nourish. [B, 116.] Lat., *cerevisia.* Fr., *ale* (ou *aile*). A fermented liquor made from the wort of barley-malt by fermenting rapidly and at a high temperature, so as to prevent the complete conversion of the saccharine matter into alcohol. By the subsequent transformation of this residual saccharine matter into alcohol and gaseous carbon dioxide, a sparkling effervescent liquid is produced. A. is usually of a light color, and contains a large proportion of hops and from 6 to 8 per cent. of alcohol. [B.]—**A. de garde** (Fr.). An a. containing a large amount of alcohol. [B, 51.]—**A. légère** (Fr.). A light ale. [B, 51.]—**Antiscorbutic a.** See CEREVISIA *antiscorbutica.*—**Bitter a.** A light ale, bitter from the large amount of hops employed in its preparation, and usually pale in color. [B, 190.]—**Bitter stomachic a.** See CEREVISIA *amara.*—**Burton a.** A. made at the town of Burton-on-Trent, England, said to owe its excellence to the peculiar quality of the spring-water in the place. [B, 190.]—**Gill a.** An infusion of ground-ivy (*Nepeta glechoma*) in a., formerly used in thoracic affections and internal wounds. [B, 59.]—**India a., Indian pale a.** Bitter a.; so called because first made especially for exportation to India. [B, 190.]—**Syrup of a.** A. inspissated before it has undergone thorough fermentation. It is essentially a thick mucilaginous infusion of malt, and was formerly employed as a demulcent. [B, 59.]

ALE (Lat.), n. f. A(a^{3})'le(la). Gen., *a'les.* Gr., ἄλη. Mental aberration. [B, 78.]

ALEATICO (It.), n. A^{3}-la-a^{3}'ti^{2}-ko. A sweet, aromatic Muscatel wine from Florence or Elba. [A, 305.]

ALE-BERRY, n. Al'be^{2}-ri^{2}. From *ale* and O.-E., *briw,* pottage. [B, 39.] A sudorific decoction made by boiling bread and mace in ale. [B, 59.]

ALEC (Lat.), n. n. A^{2}(a^{3})'le^{2}k. Gen., *ale'cis.* See ALEX.

ALEC (Ar.), n. An old term for vitriol. [A, 358.]

ALECARITH (Ar.), n. See ALCHARIT.

ALECH. See ALEC (Ar.).

ALECHARITH (Ar.), n. See ALCHARIT.

ALECHIL, n. A tripod. [B, 111.]

ALE-COST, n. Al'ko^{2}st. For deriv., see ALE and COSTUM. A name given to *Balsamita vulgaris* (*Pyrethrum tanacetum*), because used to flavor ale. [B, 19.]

ALECTOIRE (Fr.), n. A^{3}-le^{2}k-twa^{3}r. See ALECTORIA (1st def.).

ALECTOR (Lat.), n. m. A^{2}(a^{3})-le^{2}k'to^{2}r. Gen., *alecto'ris.* A person incapable of sleeping. [A, 316.]

ALECTORIA (Lat.), n. f. A^{2}(a^{3})-le^{2}k-to'ri^{2}-a^{3}. Deriv. (2d meaning), perhaps Gr., ἀλέκτωρ, unmarried, because the character of the male sexual organs was not understood. [B, 71.] Fr., *alectoire* (1st def.), *alectorie* (2d def.). 1. Fem. of adj. *alectorius* (*gemma* understood). Syn.: *alectorian, cock-stone.* A stone said to be generated in the body of a cock and reputed to possess magical properties. 2. A genus of Lichens established by Achard belonging to the tribe *Alectoriei* [Nylander] or the family *Usneei* [Tuckerman]. [B, 46, 71, 75, 77, 104, 114.]—**A. Arabum** [Achard]. Ger., *wohlriechende Bartflechte.* Syn.: *Usnea Arabum* [Kostel]. A species with a forked branching thallus having an amber-like odor and used as a stomachic, anti-emetic, and hypnotic. It is said to be the *oshnah* of Avicenna. [B, 180.]—**A. jubata** [Achard]. Fr., *crinière.* Syn.: *Cornicularia jubata* [De Candolle], *Parmelia* (seu *Setaria,* seu *Usnea*) *jubata.* A European species, used in Lapland as food for the reindeer, and in France in the preparation of astringent lotions for cutaneous excoriations. [B, 46, 71.]—**A. usneoides.** A species resembling *A. Arabum,* occurring under the form of long strips upon trees in the warmer parts of Asia, Africa, and America. It was used by the Arabians as a cordial and hypnotic. [B, 71, 180.]

ALECTORIAN, n. A^{2}-le^{2}k-to'ri^{2}-a^{2}n. See ALECTORIA (1st def.).

ALECTORIEI (Lat.), n. m. pl. A^{2}(a^{3})-le^{2}k-to-ri(re)'e^{2}-i(e). In Nylander's classification of Lichens, a tribe of the family *Lichenacei,* series *Ramalodei,* including *Alectoria* and one or two allied genera. [B, 77.]

ALECTORIOID, adj. A^{2}-le^{2}k-to'ri^{2}-oid. From *alectoria* (2d def.), and εἶδος, likeness. Resembling the thallus of *Alectoria* in shape; thread-like. [A, 316.]

ALECTORIUS (Lat.), adj. and n. m. A^{2}(a^{3})-le^{2}k-to'ri^{2}-u^{3}s(u^{4}s). Fr., *alectorien.* From ἀλέκτωρ, a cock. Of or pertaining to a cock. As a n. (*lapis* understood), the same as alectoria (1st def.). [B, 114.]

ALECTOROCTONUM (Lat.), n. n. A^{2}(a^{3})-le^{2}k-to-ro^{2}k'to^{2}-nu^{3}m(nu^{4}m). From ἀλέκτωρ, a cock, and κτόνος, murder, from the poisonous effects of the juice upon fowls. Cf. Sp., *mata-gallinas,* the Mexican name for the indigenous species. A genus of euphorbiaceous plants established by de Schlechtendal, but referred by Baillon to the genus *Euphorbia.* [B, 46.]—**A. cotinifolium.** See EUPHORBIA *cotinifolia.*—**A. petiolare.** See EUPHORBIA *petiolaris.*

ALECTOROLITHOS (Lat.), n. m. A^{2}(a^{3})-le^{2}k-tor-o^{2}l'i^{2}-tho^{2}s. From ἀλέκτωρ, a cock, and λίθος, a stone. Alectoria (1st def.). [A, 258.]

ALECTOROLOPHOIDES (Lat.), n. f. A^{2}l(a^{3}l)-e^{2}k-to^{2}r-o^{2}l-o^{2}f-o-i(e)'dez(de^{2}s). Gen., *alectorolophoid'eos.* From ἀλεκτορόλοφος, a cock's-comb, and εἶδος, likeness. A genus of *Fungi.* [B.]—**A. costis rectis, A. sulcis crispis** [Battarra]. *Cantharellus cibarius.* [B, 173.]

ALECTOROLOPHUS (Lat.), adj. and n. f. A^{2}(a^{3})-le^{2}k-to^{3}r-o^{2}l'o^{2}f-u^{3}s(u^{4}s). Gr., ἀλεκτορόλοφος. Fr., *alectorolophe.* Ger., *Hahnenkamm.* Sp., *alectorolofia* (n.), *alectorólofo* (adj.). 1. A plant mentioned by Pliny; probably *Rhinanthus crista galli.* 2. A name given by Hallier to a section of the genus *Rhinanthus,* regarded by him as forming a distinct genus. In this sense used as a masc. noun. 3. The crista galli of the ethmoid bone. 4. (Adj.) having a crest or comb like a cock. [A, 316; B, 48, 78, 114, 115.]—**A. crista galli, A. glaber, A. hirsutus.** See RHINANTHUS *crista galli.*—**A. major, A. minor.** See RHINANTHUS *major* and RHINANTHUS *minor.*

ALECTOROMANCY, n. A^{2}-le^{2}k'to^{2}-ro-ma^{2}n-si^{2}. From ἀλέκτωρ, a cock, and μαντεία, prophecy. Fr., *alectoromancie.* Ger., *Alektoromancie.* Sp., *alectoromancia.* See ALECTRYOMANCY.

ALECTRIDÆ (Lat.), n. n. pl. A^{2}(a^{3})-le^{2}k'tri^{2}-de(da^{3}-e^{2}). Gen., *alectrida'rum.* Fr., *alectrides.* A family of gallinaceous birds, according to Vieillot, comprising only a single genus, but, according to other classifications, comprising all *Gallinaceæ* which have wings suitable for flight. [A, 348; B, 38.]

ALECTRIDES (Lat.), n. f. A^{2}(a^{3})-le^{2}k'tri^{2}-dez(de^{2}s). Gen., *alectrid'eos* (*-eis*). The crista galli of the ethmoid bone. [A, 316.]

ALECTROPODION (Lat.), n. n. A^{2}(a^{3})-le^{2}k"tro-po'di^{2}-o^{2}n. From ἀλέκτωρ, a cock, and πόδιον, dim. of πούς, a foot. See RANUNCULUS.

ALECTRUROUS, adj. A^{2}-le^{2}k-tru^{2}'ru^{3}s. From ἀλέκτωρ, a cock, and οὐρά, a tail. Lat., *alectrurus.* Fr., *alectrure.* Having the tail-feathers arranged like those of a cock. [A, 346; B, 38.]

ALECTRYDES (Fr.), n. pl. A^{3}-le^{2}k-tred. See ALECTRIDES.

ALECTRYOMANCY, n. A^{2}-le^{2}k-tri'o^{2}-ma^{2}n-si^{2}. From ἀλεκτρυών, a cock, and μαντεία, divination. Lat., *alectryomantia.* Fr., *alectryomancie.* Ger., *Alektryomantie.* Sp., *alectriomancia.* A species of divination by means of cocks; usually practised by strewing grain over an area divided into squares, to each of which a specific significance was attached, and drawing the omen from the square chosen by the cock. [B, 78, 93.]

ALECTRYON (Lat.), n. n. A^{2}(a^{3})-le^{2}k'tri^{2}(tru^{6})-o^{2}n. Sp., *alectrion, alectrio.* A genus of *Sapindaceæ,* established by Gärtner, bearing polygamous apetalous flowers, with from 5 to 8 stamens, and a trimerous ovary, 2 cells of which are non-fertile. [B, 38, 46.]—**A. excelsum** [Gärtner]. A species of A. growing in New Zealand, bearing an acid edible fruit. [B, 46.]

ALECY, n. A'le^{2}-si^{2}. For deriv., see ALE. Intoxication or mental disorder from drinking ale. [Lilly, 1598 (B, 39).]

ALE-GAR, n. Al'ga^{3}r. From *ale,* and *eager* (Fr., *aigre*), sour. Also written *allegar* and *allicar.* Vinegar made from ale. [B, 59, 116.]

ALE-HOOF, n. Al'hu^{4}f. From *ale,* and A.-S., *heafd, heafod,* the head. The ground-ivy (*Nepeta glechoma*), used for flavoring ale. [B, 19, 39.]

ALEIMMA (Lat.), n. n. A^{2}(a^{3})-lim'(la'i^{2}m)-ma^{3}. Gen., *aleim'matos* (*-tis*). Gr., ἄλειμμα. An ointment. [B, 48.]

ALEION (Lat.), n. n. A^{2}(a^{3})-li'(a'i^{2})o^{2}n. From ἀλής, or ἀλής, collected together. A variety of water, probably rain-water; "significans conferto imbre collectam aquam." [B, 111.]

ALEIPHA (Lat.), n. f. A^{2}(a^{3})-li'(la'i^{2})-fa^{3}. Gr., ἄλειφα, ἄλειφαρ. A medicated oil or ointment, especially one made with vegetable juices. [B, 59, 111.]

ALEIPSIS (Lat.), n. f. A^{2}l(a^{3}l)-i'(a'i^{2})-psi^{2}s. Gen., *aleip'seos.* Gr., ἄλειψις. Lit., an anointing. See STEATOSIS.—**A. aucta** [G, 33]. See HYPERSTEATOSIS.—**A. diminuta** [G, 33]. See ASTEATOSIS.

ALEIPTERIUM (Lat.), n. n. A^{2}l(a^{3}l)-i(a-i^{2})-pte(pta)'ri^{2}-u^{3}m-(u^{4}m). Gr., ἀλειπτήριον. The anointing-room of the ancients, used also as a sudatorium. [A, 311.]

ALEIPTRON (Lat.), n. n. A^{2}l(a^{3}l)-i'(a'i^{2})-ptro^{2}n. Gr., ἄλειπτρον (= ἐξάλειπτρον). An ointment-box. [A, 311.]

ALEIS, n. A^{2}l'i^{2}s. An obsolete form of *aloes* (*q. v.*). [L, 73.]

ALEISON (Lat.), n. n. A^{2}l(a^{3}l)-i'(a'i^{2})-so^{2}n. Gr., ἄλεισον. An old term for the acetabulum. [B, 115.]

ALEKTRYOMANTIE (Ger.), n. A^{3}l-e^{2}k-tru^{6}-o-ma^{3}n-te'. See ALECTRYOMANCY.

ALELAION (Lat.), n. n. A^{2}l(a^{3}l)-e^{2}l-a'(a^{3}'i^{2})-o^{2}n. See HALELÆON.

ALEMA (Lat.), n. n. A^{2}l(a^{3}l)-e(a)'ma^{3}. Gen., *alem'atos* (*-tis*). Gr., ἄλημα. Flour. [B, 111.]

ALEMBIC, n. A^{2}l-e^{2}m'bi^{2}k. Ar., *al-ânbiq* (from *al*, the, and ἄμβιξ, a cup). Lat., *alembicus, alembicum.* Fr., *alambic.* Ger., *Alembik.* It., *alambicco, lambico.* Sp., *alambique.* An old form of apparatus for distillation; consisting of a flask-shaped vessel, the body, to which was adapted a head (considered by some to be the a. proper), of conical shape, with its external circumference, or base, placed lower than the neck, so that the vapors that rose, and condensed against the sides, ran down into the circular channel formed by its depressed part, whence they passed through the nose, or beak, into the receiver. [B, 2, 52; L, 70, 104.]

ALEMBIC, ALEMBICATE, v's tr. A^{2}l-e^{2}m'bi^{2}k, a^{2}l-e^{2}m'-bi^{2}k-at. To distill in an alembic. [B, 39.]

ALEMBICUS (Lat.), n. m. A^{2}l(a^{3}l)-e^{2}m'bi^{2}k-u^{3}s(u^{4}s). An alembic.—**A. cæcus.** One without a beak. [L, 51.]—**A. rostratus.** One with a beak. [L, 104.]

ALEMBROTH (Chald.), n. Lat., *sal alembroth.* Fr., *alembroth.* Ger., *Alembrothsalz.* It., *sale d'alembrot.* Sp., *sal de la sabiduria.* Syn.: *salt of wisdom. sal ellebrat* (seu *Taberi*), *alkitron.* An alchemical term for a poisonous compound of sal ammoniac and corrosive sublimate (chlorides of ammonium and mercury), supposed to have the property of dissolving bodies and separating metals from their ores. [B, 7; L, 73.] A one-per-cent. solution has lately been used by Sir J. Lister in the preparation of antiseptic dressings for wounds. [E. E. King, "Canadian Practitioner," May, 1886, p. 130.]—**A. desiccatum** (Lat.). Normal carbonate of potassium. [B, 50.]—**Sel a. insoluble** (Fr.). See HYDRARGYRUM *ammoniatum.*—**Sel a. soluble** (Fr.). Equal parts of corrosive sublimate and sal ammoniac. [B, 97; L, 44.]

ALEMZADAD, ALEMZADAR, ALEMZADAT, n's. Alchemical names for sal ammoniac. [B, 50; L, 104.]

ALÉNÉ (Fr.), adj. A^{3}-la-na. See SUBULATE.

ALÊNES (Fr.), n. A^{3}-le^{2}n. The corn-cockle (*Agrostemma githago*). [B, 173.]

ALÉNOIS (Fr.), adj. A^{3}-lan-wa^{3}. A corruption of *orlenois* [L, 42]. See CRESSON *a.*

ALENON (Lat.), n. n. A^{2}l(a^{3}l)-e(a)'no^{2}n. Gr., ἄληνον. Almond-oil. [Aetius (L, 53).]

ALEORE (Lat.), n. f. A^{2}l(a^{3}l)-e^{2}-o're(ra). Gr., ἀλεωρή. A means of protection against or relief from disease. [Hippocrates (L, 53).]

ALEPHANGINUS (Lat.), adj. A^{2}l(a^{3}l)-e^{2}-fa^{2}n(fa^{3}n)-ji(ge)'-nu^{3}s(nu^{4}s). See ALOEPHANGINUS.

ALEPIDOTE, adj. A^{2}l-e^{2}p'i^{2}d-ot. Gr., ἀλεπίδωτος. Lat., *alepidotus.* Fr., *alépidote.* Ger., *ungeschuppt.* Without scales (said of fishes). [L, 116.]

ALEPPO BOIL, ALEPPO BUTTON, ALEPPO EVIL, n's. See under BOIL.

ALEPTIQUE (Fr.), adj. A^{3}-le^{2}p-tek. See ALIPTIC.

ALES (Lat.), adj. A(a^{3})'lez(le^{2}s). Gr., ἀλής, ἁλής. Crowded into a mass (said of fæces); contracted (said of the uterus). [Hippocrates (A, 325); L, 84.]

ALES, n. An alchemical name for a compound salt. [Ruland, Johnson (L, 53).]—**A. crudum** (Lat.). "Those drops which often fall in the night in June." [L, 84.]

ALESCH (Ar.), n. See ALUMEN *plumosum.*

ALÈSE (Fr.), n. See ALÈZE.

ALET (Ar.), n. An old name for salt. [A, 325.]

ALET (Fr.), n. A^{3}-la. A town in the department of Aude, in France, at the base of the Eastern Pyrenees, having springs the waters of which, of various temperatures, contain iron, calcium, a little arsenic, carbonic acid, and (according to some authorities) phosphorus. They are used in chlorosis, anæmia, and dyspepsia. [A, 319; B, 93.]

ALETRIDEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-e^{2}t-ri^{2}d'e^{2}-e(a^{3}-e^{2}). Fr., *alétrides.* A tribe of hæmodoraceous plants established by Lemaire. [B, 170.]

ALETRINEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-e^{2}t-ri^{2}n'e^{2}-e(a^{3}-e^{2}). Fr., *alétrinées.* A section of the *Dracæneæ*, established by Reichenbach, including *Aletris* and other genera. [B, 170.]

ALETRIS (Lat.), n. f. A^{2}l(a^{3}l)-e^{2}t'ri^{2}s. Gen., *alet'ridos* (*-dis*). From ἀλετρίς, one of the noble maidens who prepared the meal for the offering-cakes (because the flowers of *A. farinosa* have a mealy appearance). [A, 311; B.] Fr., *alétris.* Ger., *Aletris.* It., *aletri.* A genus of hæmodoraceous herbs established by Linnæus, distinguished by the arrangement of the flowers in racemes and by the rugous appearance of the perianth. [B, 34.]—**A. alba** [Michaux]. See *A. farinosa.*—**A. aurea.** A species having like properties with *A. farinosa.* [L, 63.]—**A. capensis** [Linnæus]. Fr., *alétris du cap.* Syn.: *Veltheimia capensis* [Redouté] (seu *viridifolia* [Willdenow]). A species which furnishes a sweet syrupy liquid that exudes from the glands of the receptacle and is used as an article of food. [B, 173.]—**A. farinosa** [Linnæus]. Fr., *alétris farineux.* Ger., *mehlige A.* Star-grass, colic-root, aloe-root, bitter grass, black root, unicorn-root, ague-root, ague-grass, devil's-bit, starwort, mealy starwort, blazing star; a species growing throughout the United States, having a scape from 20 to 30 inches high, with oblong-tubular white flowers disposed on pedicels in a thin raceme. [B, 34.] Its rhizome, which is used in medicine, is dark-brown externally, white within, and 1⅓ to ⅓ inch thick. It contains starch, also a bitter principle which is tonic in small doses and emeto-cathartic in large doses. It is used as a tonic and stomachic, also in diseases of the chest and of the uterus. [B, 5, 33, 93; "Lancet," July 4, 1885, p. 36 (B); L, 45, 61, 65.]—**A. zeylanica** [Miller]. See SANSEVIERA *zeylanica.*—**Mehlige A.** (Ger.). See *A. farinosa.*

ALETRIS FARINOSA. (AFTER BIGELOW.)

ALÉTRIS (Fr.), n. A^{3}-la-tre. See ALETRIS.—**A. du cap.** See ALETRIS *capensis.*—**A. farineux.** See ALETRIS *farinosa.*

ALETUDO (Lat.), n. f. A^{2}l(a^{3}l)-e^{2}t-u^{2}(u)'do. Gen., *aletu'dinis.* Corpulence. [L, 48.]

ALEURINEI (Lat.), n. m. pl. A^{2}l(a^{3}l)-u^{2}-ri^{2}n'e^{2}-i(e). A subdivision of the *Trichosporei*, established by Léveillé, including the tribes *Isariei*, *Scoriadei*, *Periconiei*, *Sporotrichei*, and *Menisporei.* [B, 170.]

ALEURITES, ALEURITIS [Link] (Lat.), n. f. A^{2}l(a^{3}l)-u^{2}-ri-(re)'tez(te^{2}s), -ti^{2}s. From ἀλευρίτης, made of flour (from the white dusty substance on the plant). Gen., *aleuril'idis.* Fr., *aleurites, aleurit.* Ger., *Gummilacbaum, Mehlbaum.* Syn.: *Ambinux* [Commelin], *Telopea* [Solander], *Camirium* [Rumphius], *Carda* [Noronha]. A genus of euphorbiaceous plants, of the tribe *Jatropheæ*, established by Forster. [B, 19, 93, 170; L, 63, 64.]—**A. ambinux.** See *A. moluccana.*—**A. bancoulier** (Fr.). See *A. moluccana.*—**A. cordata** [Müller]. Fr., *abrasin, arbre à l'huile* (ou *à vernis*). Ger., *Tungbaum.* Syn.: *Dryandra cordata* [Thunberg], *Elæococca cordata.* The tung-tree, indigenous to China and Japan, where it is called *wu-lung.* It contains a fixed oil (candle-nut, kekune, or Bankul oil) which has been used both in the arts and in medicine. [B, 5, 49, 93.]—**A. Gomesii.** A Brazilian species, from the nut of which a purgative oil is obtained. [L, 77.]—**A. laccifera** [Willdenow]. Fr., *laquier.* Syn.: *Croton lacciferum* [Linnæus]. An East Indian species furnishing lac. [B, 33.]—**A. moluccana** [Willdenow]. Fr., *a. bancoulier.* Syn.: *Croton moluccanum* [Linnæus], *Camirium cordifolium* [Gärtner]. A species growing in the Moluccas and in Java, where it is called *camiri.* Its fruit (Fr., *noix de Bancoul, noix des Moluques*) contains an oil which is used in the arts, and the nut itself is employed as a purgative and aphrodisiac. [B, 93.]—**A. triloba** [Willdenow]. The akhrout, candle-nut-tree, or candleberry-tree; a species found on the islands of the Indian and South Pacific oceans, growing to the height of 30 or 40 feet. It bears a two-celled fleshy fruit, each cell containing one seed, resembling a small walnut in shape. These seeds contain a fixed oil (called country walnut-oil, artists' oil, kukui oil, kekune oil, Spanish walnut-oil, and Belgaum walnut-oil) which is extensively used in the arts, and to which drastic properties have been erroneously attributed. The nut is called Tutui nut, Bancoul nut, and Belgaum (or Indian) walnut. [B, 19, 49; L, 61, 63, 67.]

ALEUROMETER, n. A^{2}l-u^{2}-ro^{2}m'e^{2}t-u^{5}r. From ἄλευρον, flour, and μέτρον, a measure. Fr., *aleuromètre.* Ger., *Aleurometer, Brotstärkemesser.* An apparatus for testing the suitability of flour for breadmaking, invented by Boland. It consists essentially of a hollow copper cylinder about 6 inches long and ¾ inch in diameter inside, having two principal parts, one of which, about 2 inches long, is closed at the lower end, forming a kind of cup, in which the gluten is placed, and which is then screwed to the other part of the cylinder. The apparatus and its contents are then heated to from 350° to 380° F. in an oven or, preferably, in an oil-bath. From the expansion of the gluten, as measured by a graduated scale, its quality is determined—the more it swells the better is the flour, and it should give off no odor but that of hot and highly baked bread. [A, 377; B, 49; L, 52.]

ALEURON (Lat.), n. n. A[2]l(a[3]l)-u[2]'ro[2]n. Gr., ἄλευρον. Wheat flour. [L, 53.]

ALEURONE, n. A[2]l-u[2]-ron'. From ἄλευρον, wheat flour. Fr., *aleurone.* Ger., *Aleuron, Klebermehl.* It., Sp., *aleurona.* An albuminoid substance occurring in the form of small round grains in the seeds of plants toward the end of the period of ripening. It is soluble in water and in a dilute watery solution of caustic potash, but insoluble in alcohol, in ether, and in chloroform. During the germination of the seed the grains become dissolved. [B, 75.]

ALEURONIC, adj. A[2]l-u[2]-ro[2]n'i[2]k. Pertaining to aleurone. [B, 39.]

ALEURONKÖRPER (Ger.), n. A[3]l-oi[2]-ron'ku[6]rp-e[2]r. An aleurone grain. [B, 49.]

ALEUROTESIS (Lat.), n. f. A[2]l(a[3]l)-u[2]-ro-te(ta)'si[2]s. Gen., *aleurote'seos.* Gr., ἀλευρότησις. 1. A flour-sieve. 2. Sifted flour. [A, 311.]

ALEX (Lat.), n. f. A(a[3])'le[2]x. Written also *halex, alec, allec,* and *hallec.* Gen., *ale'cis.* An ancient fish-sauce, pickle, or brine, or the sediment of the same ; said to have been used by the Romans as a vulnerary. [A, 312 ; Waring (L, 63).]

ALEXANDERS, n. A[2]l-e[2]x-a[2]n'du[6]rz. A corruption of the species-name of either *Petroselinum alexandrinum* or *Smyrnium olusatrum.* The common name of the genus *Smyrnium* (*q. v.*). [B, 31, 39 ; L, 73.]

ALEXANDERSBAD (Ger.), n. A[3]l-e[2]x-a[3]nd'e[2]rz-ba[3]d. 1. A watering-place in Bavarian Oberfranken, having effervescent springs containing calcium and bicarbonates, and a water-cure establishment. [A, 319 ; B, 93.] 2. A warm mineral spring in Circassia. [B, 93.]

ALEXANDER'S-FOOT, n. See ANACYCLUS *pyrethrum.*

ALEXANDERSQUELLE (Ger.), n. A[3]l-e[2]x-a[3]nd'e[2]rz-kwe[2]l-le[2]. See ALEXANDERSBAD (2d def.).

ALEXANDRE (Fr.), n. A[3]l-e[2]x-a[3]ndr. One of the springs at Vals (*q. v.*), said to contain 90 grains of sodium bicarbonate to the quart.

ALEXANDREÆ (Lat.), n. f. pl. A[2]l(a[3]l)-e[2]x-a[2]nd(a[3]nd)'re[2]-e-(a[3]-e[2]). A sub-tribe of the *Suaedeæ*, established by Fenzl ; named from *Alexandra*, one of the genera. [B, 170.]

ALEXANDRIA (Lat.), n. f. A[2]l(a[3]l)-e[2]x-a[2]nd(a[3]nd)'ri[2]-a[3]. See PRUNUS *lauro-cerasus.*

ALEXANDRINE, n. A[2]l-e[2]x-a[3]nd'ren. See EMPLASTRUM *alexandrinum viride.*

ALEXANDRINENBAD, ALEXANDRINENQUELLE (Ger.), n's. A[3]l-e[2]x-a[3]nd-re'ne[2]n-ba[3]d, -kwe[2]l-le[2]. A feebly alkaline spring at Marienbad (*q. v.*). [L, 57.]

ALEXANDRINUM (Lat.), n. n. A[2]l(a[3]l)-e[2]x-a[2]nd(a[3]nd)-ri(re)'nu[3]m(nu[4]m). See EMPLASTRUM *alexandrinum viride.*

ALEXANTHI, n. An alchemical name for *flos æris* (*q. v.*, under Æs). [B, 50.]

ALEXÉTÈRE (Fr.), n. A[3]l-e[2]x-a-te[2]r. See ALEXETERIUM.—**A. acétique.** The fumes arising from the action of acetic acid on crystals of potassium sulphate. [L, 87.]—**A. ammoniacal.** Ammonium carbonate. [L, 85.]—**A. chlorique.** See ALEXETERIUM *chloricum.*—**A. désinfectant nitro-muriatique.** See FUMIGATION *de Gaubius.*—**A. nitrique.** See *Species pro vaporibus* ACIDI NITRICI.

ALEXETERIA (Lat.), n. n., pl. of *alexeterium* (*q. v.*).

ALEXETERIAL, ALEXETERIAN, ALEXETERIC, ALEXETERICAL, adj's. A[2]l-e[2]x-e[2]t-e'ri[2]-a[2]l, -a[2]n, -te[2]r'i[2]k, -i[2]k-a[2]l. Lat., *alexeterius.* Fr., *alexétère.* Ger., *alexeterisch.* It., *alessiterico.* Sp., *alexitéreo.* Having the properties of an alexeterium (*q. v.*). [B, 39 ; L, 98, 116.]

ALEXETERIUM (Lat.), n. n. A[2]l(a[3]l)-e[2]x-e[2]t-e(a)'ri[2]-u[3]m-(u[4]m). From ἀλεξητήριος, protective, having the effect of a charm. Fr., *alexétère.* Ger., *Hülfsmittel, Rettungsmittel.* It., *alessiterio.* Sp., *alexitereo.* An external protective measure, especially against infection or poison, as distinguished from an *alexipharmac*, which was used internally. Hippocrates used the word in the pl., *alexeteria*, to denote remedies in general, but later writers applied it particularly to remedies against the poisonous bites of animals. [B, 39 ; L, 44, 84.]—**A. chioricum.** Fr., *alexétère chlorique.* See SUFFUMIGATIO *guytoniana.*—**A. nitricum.** Fr., *alexétère nitrique.* See *Species pro vaporibus* ACIDI NITRICI.

ALEXETERY, n. A[2]l-e[2]x'e[2]t-e[2]-ri[2]. See ALEXETERIUM.

ALEXÉTHÈRE (Fr.), n. See ALEXÉTÈRE.

ALEXIA (Lat.), n. f. A[2]l(a[3]l)-e[2]x'i[2]-a[3]. From α priv., and λέγειν, to speak. Fr., *alexie.* Ger., *Alexie.* A form of aphasia manifested by a defective understanding of written signs as shown by inability to read aloud correctly. [L. Lichtheim, "Brain," Jan., 1885, p. 433.]

ALEXICACON, ALEXICACUM (Lat.), n's n. A[2]l(a[3]l)-e[2]x-i[2]k'a[2]k(a[3]k)-o[2]n, -u[3]m(u[4]m). From ἀλεξίκακος, protective. 1. An antidote, especially against poisons and infectious diseases. 2. An amulet against poison. [A, 305 ; L, 51, 104.]

ALEXIPHARMAC, adj. and n. A[2]l-e[2]x-i[2]-fa[3]rm'a[2]k. Gr., ἀλεξιφάρμακος. Lat., *alexipharmacus* (adj.), *alexipharmacon, alexipharmacum* (n's). Fr., *alexipharmaque.* Ger., *Alexipharmakon* (n.). It., *alessifarmaco.* Sp., *alexifármaco.* Acting as a prophylactic or as an antidote (said of internal remedies) ; as a n., a drug capable of so acting. [B, 39 ; L, 50, 51, 53.]

ALEXIPHARMACAL, ALEXIPHARMACEUTIC, ALEXIPHARMATICAL, ALEXIPHARMIC, ALEXIPHARMICAL, adj's. A[2]l-e[2]x-i[2]-fa[3]rm'a[2]k-a[2]l, -fa[3]rm-a[2]-su[2] tI[2]k, -a[2]t'i[2]k-a[2]l, -fa[3]rm'i[2]k, -fa[3]rm'i[2]k-a[2]l. See ALEXIPHARMAC.

ALEXIPYRECTICON, ALEXIPYRECTICUM, ALEXIPYRECTICUS (Lat.), n's n. and adj. A[2]l(a[3]l)-e[2]x-i[2]-pi(pu[6])-re[2]k'-ti[2]k-o[2]n, -u[3]m(u[4]m), -u[3]s(u[4]s). Preferable forms of *alexipyreticon*, etc. [L, 50.] See ALEXIPYRETIC.

ALEXIPYRETIC, adj. and n. A[2]l-e[2]x-i[2]-pi-re[2]t'i[2]k. From ἀλέξειν, to ward off, and πυρεκτικός, feverish. Lat., *alexipyreticus* (adj.), *alexipyreticon, alexipyreticum* (n's). Fr., *alexipyrétique.* Ger., *alexipyretisch, fieberwidrig* (adj's), *Alexipyretikon* (n.). It., *alessipiretico.* Sp., *alexipirético.* Preventive or curative of fever ; as a n., a febrifuge. [B, 39 ; L, 50.]

ALEXIPYRETOS, ALEXIPYRETUM (Lat.), adj. and n. A[2]l(a[3]l)-e[2]x-i[2]-pi(pu[6])'re[2]t-o[2]s, -u[3]m(u[4]m). See ALEXIPYRETIC.

ALEXIR, n. 1. An alchemical medicine. [B, 50.] 2. An elixir. [L, 93, 116.]

ALEXISBAD (Ger.), n. A[3]l-e[2]x'i[2]s-ba[3]d. A village in the duchy of Anhalt, in the Lower Harz region, having two ferruginous springs, the Alexisbrunnen and the Selkebrunnen (*q. v.*). [A, 319.] The waters contain sodium, calcium, magnesium, and iron sulphates and iron chloride, and are used in gastro-intestinal affections. [B, 93.]

ALEXISBRUNNEN (Ger.), n. A[3]l-e[2]x'i[2]s-brun-ne[2]n. One of the springs at Alexisbad, containing bicarbonate of iron and a small amount of free carbonic acid. [A, 319.]

ALEXITERIUM (Lat.), n. n. A[2]l(a[3]l)-e[2]x-i[2]t-e(a)'ri[2]-u[3]m(u[4]m). See ALEXETERIUM.

ALEZARAM, n. An alchemical term for the washing of lead. [L, 53, 116.]

ALÈZE (Fr.), n. A[3]l-e[2]z. From *à l'aise*, because it makes the patient comfortable. Ger., *Untertuch.* It., *alezo, giunta.* Sp., *alezo, hijuela.* A folded sheet of cotton, linen, or waterproof material, used to restrain a violent patient, to steady an injured limb, or to make counter-extension ; also a draw-sheet (*q. v.*). [L, 49.]

ALFACTA, n. An alchemical term for distillation. [B, 50.]

ALFADIDAM, n. An alchemical name for the dross of various metals. [L, 53.]

ALFALFA (Sp.), n. A[3]l-fa[3]l'fa[3]. From Ar., *alfaç, façah.* The plant *lucern* (*Medicago sativa*). [B, 39.]

ALFAR (Ar.), n. See ADRARAGI.

ALFASARD (Ar.), n. See ALFESERA.

ALFATIDA (Ar.), n. See ALFADIDAM.

ALFATIDE (Ar.), n. Sal ammoniac. [B, 50.]

ALFÉNIDE (Fr.), n. A[3]l-fa-ned. A white alloy of 50 parts of copper, 30 of zinc, 10 of nickel, and 1 part of iron. [L, 41.]

ALFESERA, n. The name of an old confection of the root of *Vitis alba*, used in spasmodic nervous affections. [Mesuen (L, 53).]

ALFIANO (It.), n. A[3]l-fe-a[3]'no. A village in Italy, in the province of Casale, having sulphurous springs the water of which is diuretic and purgative. [A, 375.]

ALFIDAS, ALFIDES (Ar.), n's. Subcarbonate of lead. [L, 84, 104.]

ALFILERILLA (Sp.), n. A[3]l-fe-la-rel'ya[3]. A Californian name for the *Erodium cicutarium.* [L, 67.]

ALFOI, ALFOL, n's. Alchemical names for sal ammoniac. [B, 50 ; L, 53.]

ALFOMBRILLA (Sp.), n. A[3]l-fom-brel'ya[3]. Scarlet fever. [L, 70.]—**A. silvestre** [Mex. Ph.]. See VERBENA *ciliata.*

ALFONSIA (Lat.), n. f. A[2]l(a[3]l)-fo[2]n'si[2]-a[3]. Fr., *alfonsie.* A genus of palms (properly belonging to *Elais*) established by Humboldt and Bonpland. [L, 30, 87.]—**A. oleifera** [Kunth]. Syn. : *Elais melanococca* [Martius]. A South American species bearing an edible fruit. An illuminating oil is obtained from the nut. [B, 173.]

ALFÓNSIGO (Sp.), n. A[3]l-fo[2]n'si[2]-go. The pistachio-tree. [B.] See PISTACIA *vera.*

ALFONSIN, ALFONTIN (Fr.), n's. A[3]l-fo[2]n[2]-sa[2]n[2], -ta[2]n[2]. It., Sp., *alfonsino.* An old instrument for extracting bullets from gunshot wounds, invented by Alfonso Ferri, a surgeon of the sixteenth century. [A, 314 ; L, 103, 109.]

ALFRANKEN, ALFSRANKE (Ger.), n's. A[3]lf'ra[3]n[2]-ke[2]n, a[3]lfs'ra[3]n[2]-ke[2]. See SOLANUM *dulcamara.*

ALFTERBRUNNEN (Ger.), n. A[3]lf'te[2]r-brun-ne[2]n. A mineral spring at Roisdorf, in Prussia, on the railway between Cologne and Rolandseck. [A, 305, 375.]

ALFUSA, n. An alchemical name for tutty. [L, 53.]

ALGA (Lat.), n. f. A[2]l(a[3]l)'ga[3]. Fr., *algue.* Ger., *Alge, Meergras.* It., Sp., *alga.* 1. A sea-weed (the singular of *algæ* [*q. v.*]). 2. A genus of marine naiadaceous plants established by Lamarck; now referred to *Zostera.* [B.]—**A. corraloides** [Rumphius]. The *Graciïaria lichenoides.* [B.]—**A. marina.** 1. The *Chondrus crispus.* [L, 78.] 2. Of Lamarck, the *Zostera marina.* [B, 173.]—**A. of the mouth.** See LEPTOTHRIX *buccalis.*—**A. zeylanica.** The *Gracilaria lichenoides.* [B.]

ALGACEÆ (Lat.), n. f. pl. A[2]l(a[3]l)-ga(ga[3])'se[2](ke[2])-e(a[3]-e[2]). Fr., *algacées.* A class of plants established by Gleditsch, corresponding in part to *Algæ*, together with *Lichenes* and *Hepaticæ*, including the genera *Riccia, Nemella, Lichen, Fucus, Ulva, Conferva,* and *Spongia.* [B, 170.]

ALGACEOUS, adj. A[2]l-ga'shu[3]s. Lat., *algaceus.* Fr., *algacé.* Sp., *algáceo.* Having the characteristics of *Algæ* or of the *Algaceæ.* [L, 46.]

ALGACITES (Lat.), n. f. pl. A[2]l(a[3]l)-ga[3]-si(ke)'tez(te[2]s). Fr., *algacites.* Ger., *Algaciten.* An order of fossil plants, established by

Sternberg, corresponding to the extant *Algæ*, including the sub-orders *Confervoidites*, *Ulvoidites*, *Floridoites*, and *Fucoidites*. [B, 170.]

ALGÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)'je(ga^3-e^2). Fr., *algues*. Ger., *Algen, Tange*. It., *alghe*. Sp., *algas*. Syn.: *hydrophytes*, *Hydrophyta* [Lyngbye]. In Linnæus's system, an order of the class *Cryptogamia*, comprising at first genera now ranked among the *A.*, *Lichenes*, and *Hepaticæ*. In Jussieu's classification, the *A.* embraced the true *A.* (*A. aquaticæ*) and the *Lichenes* (*A. terrestres*). In the modern systems, the sea-weeds, a great division of cryptogams, comprising those plants of this section in which there is no differentiation into axis, root, and appendages (thallogens), but which are provided with chlorophyll and with distinct organs of reproduction, being thus distinguished from the *Protophyta* on the one hand and from the *Fungi* on the other. By many, the *A.* and the chlorophyllaceous *Protophyta* are grouped together (*vide infra*), and some include both *A.* and *Fungi* under one section as *Thallophyta* (*q. v.*). By others, again, the division is entirely abandoned, and members formerly included in this class are now grouped with the allied *Fungi* under quite distinct divisions of the vegetable kingdom. See CARPOSPOREÆ, OOSPOREÆ, PROTOPHYTA, and ZYGOSPOREÆ. The *A.* have been variously subdivided. The two main systems of classification at present in vogue are based respectively on the mode of reproduction and on the color of the spores. According to the former, the *A.* like the *Fungi* are divided into *Zygosporeæ*, *Oosporeæ*, and *Carposporeæ* (*q. v.*); according to the latter, into *Chlorospermeæ*, *Melanospermeæ*, and *Rhodospermeæ* [Berkeley]. The following table shows the equivalence of these two systems:

A. ZYGOSPOREÆ.
  Zoosporeæ. / *Conjugatæ.* } (*Diatomaceæ.*)
B. OOSPOREÆ.
  Volvocineæ (now often assigned to the animal kingdom).
  Vaucheriaceæ (*Cœloblasteæ*).
  Œdogoniaceæ (*Confervaceæ*, *Ulvaceæ*).
} CHLOROSPERMEÆ (including also genera usually ranked among the protophytes).
  Characeæ (by some regarded as distinct from *A.*, by others classed with *Carposporeæ*).
  Fucoideæ (*Fucaceæ*). MELANOSPERMEÆ.
C. CARPOSPOREÆ.
  Florideæ (*Ceramiaceæ*). RHODOSPERMEÆ.

Thuret divides the *A.* into six orders: (1) CRYPTOPHYCEÆ, comprising genera usually ranked among the protophytes; (2) ZOOSPOREÆ, embracing all the *Zygosporeæ* and *Carposporeæ* of the preceding table except a portion of the *Fucoideæ* made up of orders 3 and 4; (3) DICTYOTEÆ; (4) FUCACEÆ; (5) TILOPTERIDEÆ (a doubtful order); (6) FLORIDEÆ. For an older system of classification, see ISOCARPEÆ and HETEROCARPEÆ. [B, 19, 29, 35, 41, 62, 75.]—**A. aquaticæ.** A. in the ordinary sense. [B, 170.]—**A. figuratæ** [Hassall]. See DESMIDEÆ.—**A. filiformes** [Hassall]. A division including the families *Siphoneæ*, *Thoreæ*, *Lemaneæ*, *Callithamneæ*, *Characeæ*, *Batrachospermeæ*, *Chætophoreæ*, *Conjugatæ*, *Cystospermeæ*, *Monocysteæ*, *Hydrodictyoneæ*, *Scytonemeæ*, *Oscillatorieæ*, *Rivularieæ*, and *Nostochineæ*. [B, 170.]—**A. globuliferæ** [Hassall]. A division including the families *Ulvaceæ*, *Palmelleæ*, and *Protococceæ*. [B, 170.]—**A. infusoriæ** [Martius]. A family including the genera *Vaucheria* and *Oscillatoria*. [B.]—**A. silicatæ** [Hassall]. See DIATOMACEÆ.—**A. terrestres.** The lichens. [B. 170.]—**A. vegetantes** [Martius]. A family including the genera *Chara*, *Batrachospermum*, *Hydrodictyon*, *Conjugata*, *Conferva*, *Rivularia*, *Linckia*, and *Botrydium*. [B, 170.] Cf. *A. infusoriæ*.—**Dark-spored A.** See MELANOSPERMEÆ.—**Green-spored A.** See CHLOROSPERMEÆ.—**Olive-spored A.** See MELANOSPERMEÆ.—**Rosy-spored A.** See RHODOSPERMEÆ.

ALGÆOLOGY, n. A^{2}l-je-o^{2}l'o-ji^2. See ALGOLOGY.

ALGÆSTHESES (Lat.), n. pl. A^{2}l(a^{3}l)-je^{2}s(ga^3-e^{2}s)-the(tha)'-sez(se^{2}s). From ἄλγος, pain, and αἴσθησις, sensation. Painful diseases. [L, 50.]

ALGAL, adj. A^{2}l'ga^{2}l. From *alga* (*q. v.*). Belonging to the *Algæ*. [L, 56.] As a n., see ALGALES.

ALGALÉE (Fr.), n. A^{3}l-ga^3-la. See ALGALI.

ALGALES (Lat.), n. pl. A^{2}l(a^{3}l)'ga^{2}l(ga^{3}l)-ez(e^{2}s). From *alga*. In Lindley's classification of thallophytes, the algals; an alliance corresponding to the *Algæ* of other authors.

ALGALI (Ar.), n. From ἀργαλεῖον, an instrument for injecting water. Fr., *algalie*. Sp., It., *algalia*. 1. A catheter. 2. A sound. [A, 305; B, 93; L, 41, 42, 104.] 3. Nitre. [B, 50, 52.]

ALGALIC, ALGALIE, ALGALY (Ar.), n's. See ALGALI (1st and 2d def's).

AL-GAM-BAY, n. A Burmese name for a bitter root used as a tonic. [L, 63.]

ALGAME, n. Probably from Ar., *Al-jamɔah*, union, or *al-jimaɔ*, the consummation of marriage. A mixture of gold and mercury. [B, 52.]

ALGAMET (Ar.), n. An alchemical name for carbon. [A, 305; L, 116.]

ALGARAB (Ar.), n. See ÆGILOPS.

ALGARAH (Ar.), n. See ANCHILOPS.

ALGARAT, ALGAREL (Ar.), n's. See ALGAROTH.

ALGAROBA (Sp.), n. A^{3}l-ga^3-ro'ba^3. 1. A Mexican name for *Prosopis juliflora* [De Candolle]. [B, 66.] 2. The fruit of the *Ceratonia siliqua*. [L, 67.]—**South American A.** The *Prosopis dulcis* and other species. [L, 67.]—**A. du Chili** (Fr.). The *Prosopis siliquastrum*. [L, 67.]

ALGAROBE (Fr.), n. A^{3}l-ga^3-rob. A name given in the Antilles to the pods of the *Prosopis juliflora*. [L.] See ALGAROBA.

ALGAROBIA (Lat.), n. f. A^{2}l(a^{3}l)-ga^2(ga^3)-ro^3'bi^2-a^3. Fr., *algarobie*. Sp., *algaroba*. Syn.: *Prosopis* [Kunth] (1st def.), *Algaroba* [G. Don] (1st def.). 1. A name given by Bentham to a genus of plants belonging to the natural order *Leguminosæ*, and the sub-order *Mimosæ*, now referred to the genus *Prosopis*. [B, 93, 170.] 2. The resin extracted from the *Algarobia glandulosa*. [L, 55.]—**A. dulcis.** See PROSOPIS *dulcis*. [B, 170.]—**A. ferruginea.** A variety growing in India, the bark of which is used with jaggery water in making an intoxicant. [L, 63.]—**A. glandulosa** [Torrey and Gray]. See PROSOPIS *glandulosa*.—**A. iuliflora, A. julæflora, A. julifera, A. juliflora.** See PROSOPIS *juliflora*.—**A. leucophæa.** Used for the same purposes as *A. ferruginea*. [L, 63.]

ALGAROBILIA (Lat.), n. f. A^{2}l(a^{3}l)-ga^3-ro-bi^{2}l'i^2-a^3. See ALGAROVILLA.

ALGAROBILLA (Sp.), n. A^{3}l-ga^3-ro-bel'ya^3. The pod of the *Balsamocarpum brevifolium*, which contains a large amount of tannic and ellagic acids. [B, 5.]

ALGAROTH, ALGAROTHUS, ALGAROTTO. From the name of Algarotti, the discoverer. Fr., *Poudre angélique* (ou *de vie*, ou *émétique*). Ger., *A'pulver*. It., *algarotti*. An alchemical name for the oxychloride of antimony.

ALGAROVE (Fr.), n. A^{3}l-ga^3-rov. See ALGAROBA.

ALGAROVILLA (It., Sp.), n. A^{3}l-ga^3-ro-vi^{2}l'la^3, -vel'ya^3. The seeds and husks of the fruit of the *Prosopis pallida*, containing tannin [L, 67], or of the *Juga marthæ*. [L, 56.]

ALGARRÓBA (Sp.), n. A^{3}l-ga^{3}r-ro'ba^3. Ar., *al-'harrûbah*. 1. The *Ceratonia siliqua* or its fruit. 2. An American *Mimosa*. [B, 39.]

ALGARROBERA, ALGARROBO (Sp.), n's. A^{3}l-ga^{3}r-ro-ba'ra^3, -ro'bo. 1. The *Ceratonia siliqua*. 2. Chilian names for the *Balsamocarpum brevifolium*. 3. Panama names for the *Hymenæa courbaril*. [L, 67.]

ALGASEF, n. From Ar., *Al-asaf*, dirt. An eruption. [L, 63.]

ALGEBRA, n. A^{2}l'je^2-bra^3. From Ar., *al-jebr*, the union of something broken. Sp., *álgebra*. 1. The surgical treatment of fractures. 2. Apparently the fracture itself. A term current in England in the sixteenth century. [B, 39.]

ALGEDO, ALGEDON (Lat.), n. A^{2}l(a^{3}l)-je(ga)'do, -do^{2}n. Gr., ἀλγηδών, a sense of pain. Fr., *algédo*. It., *algedine*. A pain or swelling about the neck of the bladder, anus, or testicles following the sudden checking of a gonorrhœa; also the sudden cessation of a gonorrhœal discharge. [L, 41, 103, 109.]

ALGEFACIENT, adj. A^{2}l-je^2-fa'she^{2}nt. From *algor*, cold, and *facere*, to make. Cooling. [L, 63.]

ALGEMA, ALGEMATODES (It.), n's n. A^{2}l(a^{3}l)-je(ga)'ma^3, -ma^3-to'dez(de^{2}s). From ἄλγημα, pain. [Hippocrates (A, 311).] Pain or the disease which is the cause of the pain. [L, 51, 53.]

ALGEN (Ger.), n. pl. A^{3}l'ge^{2}n. See ALGÆ.—**A'artig.** See ALGOUS.—**A'öl.** Fucusol; an oily substance, $C_{20}H_{12}O_{12}$, closely resembling furfurol, obtained by the distillation of *Algæ* with concentrated sulphuric acid. [L, 30.]—**A'pilze.** See PHYCOMYCETES.—**A'zucker.** See PHYCITE.

ALGERIA, n. Al-je'ri-a^3. Fr., *Alger*, *algérie*. A province and town in Africa, on the Mediterranean, much frequented by invalids. During twenty-two years the maximum temperature was 40° C., the minimum 2°, and the average 19·17°; the mean height of the barometer 762 mm., the maximum 766, and the minimum 755. [L, 49.]

ALGERIÆ (Ar.), n. Fr., *algérie*. See ALGERIT.

ALGÉRINE (Fr.), n. A^{3}l-zha-ren. A drink having the qualities of beer and aerated lemonade. [L, 109.]

ALGERIT, n. From Ar., *al-jigar*, quicklime. Also written *gir*. An alchemical name for quicklime. [B, 52.]

ALGEROT (Fr.), n. A^{3}l-zha-ro. See ALGAROTH.

ALGEROTH, n. See ALGAROTH.

ALGESIA (Lat.), n. f. A^{2}l(a^{3}l)-je(ga)'zi^2(si^2)-a^3. From ἄλγησις, a sense of pain. Fr., *algésie*. Ger., *Algesie*. Hyperæsthesia, pain. [L, 50, 54.]

ALGESICHRONOMETER, n. A^{2}l-je''zi^2-kro^{2}n-o^{2}m'e^{2}t-u^{5}r. From ἄλγησις, pain, χρόνος, time, and μέτρον, a measure. An instrument invented by Björnström for determining the time required for the response of the nervous system to a painful impression. [L, 57.]

ALGESIMETER, n. A^{2}l-je-zi^{2}m'e^{2}t-u^{5}r. From ἄλγησις, pain, and μέτρον, a measure. An instrument invented by Björnström to determine the sensibility of the skin. [L, 57.]

ALGESIS (Lat.), n. f. A^{2}l(a^{3}l)-je(ga)'si^{2}s. Gen., *alge'seos*. See ALGESIA.

ALGETIC, adj. Al-je^{2}t'ik. Lat., *algeticus*. Ger., *algetisch*. Painful. [L, 45, 50.]

ALGIA (Lat.), n. f. A^{2}l(a^{3}l)'ji^2(gi^2)-a^2. From ἄλγος, pain. Fr., *algie*. Pain. [L, 50.]

ALGIBIC, n. From Ar., *al-kibrît*. Sulphur. [B; L, 84.]

ALGID, adj. A^{2}l'ji^{2}d. Lat., *algidus*. Fr., *algide*. Ger., *frostig*. It., *algente*. Sp., *álgido*. Characterized by extreme chilliness of the surface and extremities of the body (said particularly of the cold stage of fevers and of the condition during collapse [*q. v.*]). [D.] Cold; very cold. [L, 47, 56, 93.]

ALGIDISM, n. A^{2}l'ji^{2}d-iz^{2}m. See ALGIDITY.

ALGIDITY, n. A^{2}l-ji^{2}d'i-ti^2. Fr., *algidité*. Chilliness; a marked degree of coldness in disease. [L.]—**Progressive A.** Fr., *algidité progressive*. See SCLEREMA *neonatorum*.

ALGIDNESS, n. A^{2}l'ji^{2}d-ne^{2}s. See ALGIDITY.

ALGIFIC, adj. A^{2}l-ji^{2}f'i^{2}k. Lat., *algificus.* Causing cold. [L, 58, 73.]

ALGIN, n. A^{2}l'ji^{2}n. From *alga* (*q. v.*). Fr., *algine.* A nitrogenous principle closely resembling albumin, but not coagulable by heat; the residual product in the wet process of obtaining iodine from certain marine *Algæ.* It forms definite *alginates* with the metals. It has considerable alimentary value, and may be used instead of gum arabic. ["N. Y. Med. Jour.," Dec. 5, 1885, p. 648.]

ALGINÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-ji(ge)'ne(na^3-e^2). A term used by Leunis to include the lichens and *Algæ.* [B, 170.]

ALGINATE, n. A^{2}l'ji^{2}n-at. A compound of algin with a metal.

ALGOID, adj. A^{2}l'goid. Lat., *algoides.* Resembling the *Algæ.*—**A. cells.** Vegetable cells akin to various lower forms of *Algæ,* described by J. H. Salisbury as occurring in the stools of patients suffering from chronic diarrhœa. [B, 70.]

ALGOIDEA (Lat.), n. n. pl. A^{2}l(a^{3}l)-go-i^{2}d'e^2-a^3. A term used by Batsch to include *Algæ* and lichens. [B, 170.]

ALGOIDES (Lat.), adj. A^{2}l(a^{3}l)-go-i(e)'dez(de^{2}s). Algoid; as a n., the water-aloe, a species of *Equisetum* the leaves of which resemble *Algæ.* [L, 116.]

ALGOLOGY, n. A^{2}l-go^{2}l'o-ji^2. From *alga,* sea-weed, and λόγος (see *-logy**). Lat., *algologia.* Fr., *algologie.* Ger., *Algologie.* Sp., *algología.* The department of botany which treats of *Algæ.* [B, 93; L, 116.]

ALGOMETRY, n. A^{2}l-gom'e^{2}t-ri^2. From ἄλγος, pain, and μέτρον, a measure. The measurement, or estimation, of pain.—**Electrical a.** It., *algometria ellettrica.* A comparative measurement of the pain produced by an induced current of electricity. [L, 44.]

ALGOR (Lat.), n. m. A^{2}l(a^{3}l)'go^{2}r. Gen., *algo'ris.* It., *algore.* See ALGIDITY.—**A. mortis.** It., *algore cadaverico.* The coldness of the body which succeeds death. [L, 54.]—**A. progressivus neonatorum.** See SCLEREMA *neonatorum.*

ALGOS (Lat.), n. n. A^{2}l(a^{3}l)'go^{2}s. Gen., *al'geos.* Gr., ἄλγος. See ALGEMA.

ALGOSE, adj. A^{2}l'gos. Very cold. [L, 56.]

ALGOSPASMICUS (Lat.), adj. A^{2}l(a^{3}l)''go-spa^{2}z(spa^{3}s)'mi^{2}k-u^{3}s(u^{4}s). For deriv., see ALGOSPASMUS. Having the characteristics of, or resembling, painful cramps. [L, 50.]

ALGOSPASMUS (Lat.), n. m. From ἄλγος, pain, and σπασμός, spasm. Fr., *algospasme.* A painful cramp. [L, 116.]

ALGOSPASTICUS (Lat.), adj. From ἄλγος, pain, and σπαστικός, drawing. See ALGOSPASMICUS.

ALGOUS, adj. A^{2}l'gu^{3}s. Ger., *algenartig.* Belonging to the *Algæ.* [L, 46, 56.]

ALGRE (Sp.), n. A^{3}l'gra. A mineral spring on the mountain of Montjui, in Spain; used only as a table water. [L, 105.]

ALGUADA, n. Leprosy. [Avicenna (G).]

ALGUE (Fr.), n. A^{3}lg. See ALGA.—**A. commune.** See ZOSTERA *marina.*—**A. de Java.** See AGAR-AGAR.—**A. de verriers, A. Marin.** See ZOSTERA *marina.*

ALGUES (Fr.), n. pl. A^{3}lg. See ALGÆ.—**A. à frondes.** Those *Algæ* which are spread out in the form of membranes. They comprise the sea-*Algæ,* classed usually under the *Fucoideæ* and *Florideæ.* [B, 107.]—**A. filamenteuses.** *Algæ* which consist of filaments made up either of a single elongated cell, or of several cells articulated in a row. [B, 107.]—**A. isocarpées.** A group of *Algæ* comprising such as are made up of single cells either free or agglomerated into colonies, and imbedded often in granular or gelatinous material. They embrace the genera now usually classed with the protophytes. [B.]

ALGUMIN (Heb.), n. Also written *algum* and *almug.* Red sandal-wood. [B, 49; L, 73.]

AL-GYOGY, n. A warm mineral spring in Transylvania containing sodium bicarbonate; used in digestive and urinary disorders. [B, 93.]

ALHAGEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-ha(ha^3)'je^2(ge^2)-e(a^3-e^2). Fr., *alhagées.* A sub-tribe of the *Leguminosæ* established by De Candolle. [L, 106.]

ALHAGEUS (Lat.), adj. A^{2}l(a^{3}l)-ha(ha^3)'je^2(ge^2)-e(a^3-e^2). Pertaining to the genus *Alhagi;* used as a n. in the fem. pl., *alhageæ* (*q. v.*).

ALHAGI, n. Ar., *al-ḥâj.* Sp., *alhagi, alhaji.* Syn.: *Manna* [Don], *Hedysarum* [Linnæus]. *Alhagia* [Reichenbach]. A genus of plants belonging to the natural order *Leguminosæ,* sub-order *Papilionaceæ,* characterized by bearing a stalked, woody pod, which, though contracted between the seeds, is not completely divided into jointed sections. [B, 19.]—**A. camelorum.** See *A. maurorum.*—**A. manna.** See under MANNA.—**A. mannifera** [Desvaux], **A. maurorum.** Ger., *Alhagistrauch.* Syn.: *Manna hebraica* [Don], *Hedysarum a.* [Linnæus]. A species growing in southern Asia, said to furnish a manna-like exudation, which collects on the leaves and branches. [B, 19, 80, 170; L, 80.]

ALHAMA DE ARAGÓN (Sp.), n. A^{3}l-a^3'ma^3 da a^{3}r-a^3-gon'. A town in Aragon, Spain, near which there are warm mineral springs containing carbonic acid, magnesium and sodium chlorides, and the sulphates of calcium and iron. Used in renal, vesical, hæmorrhoidal, cutaneous, rheumatic, and nervous affections. [A, 255.]

ALHAMA DE GRANADA. A^{3}l-a^3'ma^3 da gra^3-na^3' da^3. A city of Granada, in Spain, near which there are hot mineral springs containing carbonic acid, hydrogen sulphide, magnesium and sodium chlorides, magnesium and calcium sulphates, magnesium carbonate, and silica. Used in nervous, rheumatic, thoracic, cardiac, and cutaneous affections. [A, 255.]

ALHAMA DE MURCIE. A^{3}l-a^3'ma^3 da mur'thi^2-a. A town in the province of Murcie, Spain, where there are warm and hot mineral springs containing carbonic acid, calcium sulphate, potassium chloride, and iron. Used in anæmia and in urinary and intestinal disorders. [B, 93.]

ALHAMILLA (Sp.), n. A^{3}l-a^3-mel'ya^3. A hot mineral spring near Almería, Spain, containing magnesium and calcium sulphates and chlorides, magnesium carbonate, and silica. [A, 89, 255.]

ALHANDAL, n. A^{3}l-ha^{3}n'da^{3}l. From Ar., *al-ḥandhal.* See COLOCYNTH.—**Trochisci a.** (Lat.). Fr., *trochisques d'a.* Ger., *A'küchelchen, A'kuchen, A'täfelchen.* Syn.: *trochisci colocynthidis.* Troches of colocynth pulp 5 parts and gum arabic 1 part. Official, with some variations, in several old pharmacopœias; used in doses of from 3 to 12 grains. [L, 85.]

ALHANNA, n. Tripoli. [L, 94.]

ALHARMEL (Ar.), n. See PEGANUM *harmala.*

ALHASBA (Ar.), n. Measles. [G.]

ALHASEF (Ar.), n. See HYDROA and SUDAMINA.

ALHASUR (Ar.), n. A sweet substance, perhaps alhagi manna, found on an herb in Egypt, and imputed to the presence of an insect. [L, 105.]

ALHAUNE (Fr.), n. A^{3}l-on. A provincial name for the *Lawsonia inermis.* [B, 93.] Cf. ALHENNA.

ALHEMAKE, n. Ar., *al-hemak.* A red rash (applied by Avicenna to a disease thought to have been measles). [L, 83.]

ALHENNA (Lat.), n. f. A^{2}l(a^{3}l)-he^{2}n'na^3. From Ar., *al-khennâɔ.* See LAWSONIA *inermis.*

ALHENOT, n. Ar., *al-ânok* (Heb., *anak*). An alchemical name for lead. [B, 52.]

ALHOHONEC (Ar.), n. See ADEHEMEST.

ALI (It.), n. A^3'le. A spring near Messina, Sicily, containing calcium sulphate, hydrochloric and carbonic acids, and chlorides; used in cutaneous and bronchial affections. [L, 49.]

ALI, n. A Teloogoo name for flax. [B, 172.]

ALIA, n. An East Indian name for ginger. [L, 105.]

ALIAKOO, n. An East Indian name for the *Memecylon tinctorium.* [L, 67.]

ALIBERTIA (Lat.), n. f. A^{2}l(a^{3}l)-i^2-bar'ti^2-a^3. Fr., *alibertie.* A genus of rubiaceous plants found in tropical America. [L, 49, 67.]

ALIBILIS (Lat.), adj. A^{2}l(a^{3}l)-i^{2}b'i^{2}l-i^{2}s. From *alere,* to nourish. See ALIBLE.

ALIBILITY, n. A^{2}l-i^2-bi^{2}l'i^{2}t-i^2. Fr., *alibilité.* Sp., *alibilidad.* A term used to indicate the nutritive value of a substance. [L, 42, 63, 98.]

ALIBLE, adj. A^{2}l'i^{2}bl. Lat., *alibilis.* Fr., *alible.* Ger., *nahrend, nahrhaft.* It., Sp., *alible.* Nutritious. [B, 39; L, 43, 44.]

ALIBOUFIER, ALIBUSIER (Fr.), n's. A^3-le-bu-fe-a, -bu^6-se-a. See STYRAX *officinalis.*

ALICA (Lat.), n. f. A^{2}l(a^{3}l)'i^{2}k-a^3. Spelt, a kind of barley, or the meal or a drink made from it; a food to which Hippocrates attributed very nourishing properties; Egyptian wheat. [L, 41, 53, 97, 103.]

ALICANTE (Sp.), n. A^3-le-ka^{3}n'ta. A winter resort in Valencia, Spain. [L, 49.]

ALICANTSEIFE (Ger.), n. A^3-le-ka^{3}nt'zi-fe^2. Olive-oil soap. [L, 57.]

ALICANTSODA (Ger.), n. A^3-le-ka^{3}nt'zo-da^3. See BARILLA.

ALICASTRUM (Lat.), n. n. A^{2}l(a^{3}l)-i^{2}k-a^{2}s(a^{3}s)'tru^{3}m(tru^{4}m). A grain resembling alica (*q. v.*). [L, 58.]

ALICES (Lat.), n. pl. A^{2}l(a^{3}l)'i^2-sez(ke^{2}s). The red spots which precede the pustules of small-pox. [G.]

ALICONDE, n. A Congo name for the *Adansonia digitata.* [L, 105.]

ALICORNU (Lat.), n. n. A^{2}l(a^{3}l)-i^2-ko^{2}r'nu^2(nu). See UNICORNU.

ALICUA (Sp.), n. A^{3}l-e'kwa^3. A saline mineral spring near Cadiz, Spain.

ALICUM (Sp.), n. A^{3}l-e'kum. A mineral spring containing chlorides and sulphates, near Guadix. [L, 63.]—**A. de Ortega.** A Spanish mineral spring containing earthy sulphates. [L, 57.]

ALIENATED, adj. A'li^2-e^{2}n-a-te^{2}d. Lat., *alienatus.* Fr., *aliéné.* Ger., *geistesgestört.* It., *alienato.* Sp., *alienado.* 1. Insane, mad. 2. Gangrenous. 3. In botany, having given way to be replaced by others differing from them (said of the first leaves). [L, 44, 58, 70, 116.]

ALIENATIO (Lat.), n. f. A(a^3)-li^2-e^{2}n-a(a^3)'shi^2(ti^2)-o. Gen., *alienatio'nis.* See ALIENATION.—**A. partis.** Gangrene of a part. [L, 50.]

ALIENATION, n. A-li^2-e^{2}n-a'shu^{3}n. Lat., *alienatio.* Fr., *aliénation.* Ger., *Entfremdung.* It., *alienazione.* Sp., *alienación.* Insanity, delirium.—**A. d'esprit** (Fr.). A transitory delirium accompanied by fever, differing from other forms of mental trouble in duration only. [L, 112.]—**Mental a.** Fr., *a. mentale.* Ger., *Geisteszerrüttung.* A generic term including every form of deviation from the normal action of the mind. [L, 50, 55, 56, 112.]

ALIÉNÉ (Fr.), adj. and n. A^3-le-a-na. Insane. An insane person.—**A. accusateur.** A melancholiac who falsely accuses himself of crime, or brings similar reproaches against others, feeling

himself persecuted. [Grislain, quoted by Cotard, "Arch. de neurol.," Sept., 1882, p. 152.]

ALIÉNER (Fr.), v. tr. A^3-le-a-na. As a refl., *s'a.*, to become insane.

ALIENIST, n. A'li^2-e^{2}n-i^{2}st. Fr., *aliéniste.* Ger., *Irrenarzt.* It., Sp., *alienista.* One who investigates mental diseases. [L, 44, 95.]

ALIENUM (Lat.), n. n. A^{2}l(a^{3}l)-i^2-e(a)'nu^{3}m(nu^{4}m). 1. A foreign body. 2. Any substance injurious to the body. [L, 53, 94.]

ALIENUS (Lat.), adj. A^{2}l(a^{3}l)-i^2-e(a)nu^{3}s(nu^{4}s). See ALIENATED.

ALIFEROUS, adj. A^{2}l-i^{2}f'e^{2}r-u^{3}s. From *ala*, a wing, and *ferre*, to bear. Fr., *alifère.* Sp., *alifero.* Wing-bearing. [B, 39; L, 41, 95.]

ALIFORM, adj. A^{2}l'i^2-fo^{2}rm. Lat., *aliformis.* Fr., *aliforme.* Ger., *flügelförmig.* Sp., *aliforme.* Wing-shaped. [L, 46, 95, 106.]

ALIGEROUS, adj. A^{2}l-i^{2}j'e^2-ru^{3}s. Fr., *aligére.* See ALIFEROUS.

ALIGULUS (Lat.), n. m. A^{2}l(a^{3}l)-i^{2}g'u^2(u)-lu^{3}s(lu^{4}s). A confection. [B, 50.]

ALILITAM, n. A vine found in the Philippines, the bruised leaves of which are used to dissipate the tumors and allay the itching caused by a caterpillar called *basal.* [L, 105.]

ALIMA (Lat.), n. n. pl. A^{2}l(a^{3}l)-i(e)'ma^3. From ἄλιμος, without hunger. Alimentary substances. [L, 50.]

ALIMENT, n. A^{2}l'i^2-me^{2}nt. Lat., *alimentum.* Fr., *aliment.* Ger., *Nahrung.* It., Sp., *alimento.* Any substance capable of nourishing or of repairing the waste of the body.—**Accessory a., Adjective a.** A condiment. [K.]—**Substantive a.** A term including all foods which have a real nutritive value, as distinguished from those which are used simply as condiments. [K.]

ALIMENTAL, ALIMENTARY, adj's. A^{2}l-i^2-me^{2}nt'a^{2}l, -a-ri^2. Fr., *alimentaire.* Ger., *nährend.* It., *alimentario.* Sp., *alimentoso.* 1. Nourishing, nutritious. 2. Pertaining to alimentation. [L, 52, 56, 93, 103.]

ALIMENTATION, n. A^{2}l-i^2-me^{2}nt-a'shu^{3}n. Lat., *alimentatio.* Fr., *alimentation.* Ger., *Nahrung.* It., *alimentamento.* Sp., *alimentación.* 1. A process or system of giving food. 2. The processes of digesting and absorbing food.—**Artificial a.** Fr., *a. artificielle.* The nourishing of persons who are unable or unwilling to take food in the ordinary way.—**A. artificielle forcée** (Fr.). The feeding of those who resist.—**A. volontaire** (Fr.). The feeding of those who are willing to take food, but who are unable to do so.—**A. curative** (Fr.). The treatment of disease with nothing but food.—**A. forcée** (Fr.). See *Forced a.*—**A. iodique** (Fr.). The administration of iodine by mixing it with the food.—**A. médicamenteuse** (Fr.). An indirect method of medication by impregnating the food with a drug, by administering the drug either to the mother (in the case of a nursing infant) or to an animal the flesh of which is to be used as food. [L, 87.]—**Forced a.** 1. The feeding of a person against his will. 2. The giving of more food to a person than he craves. [L.] See also GAVAGE.—**Rectal a.** Feeding by means of nutrient enemata.

ALIMENTATIVE, adj. A^{2}l-i^2-me^{2}nt'a-ti^{2}v. Of, or pertaining to, alimentation. [B, 39.]

ALIMENTATIVENESS, n. A^{2}l-i^2-me^{2}nt-a'ti^{2}v-ne^{2}s. See ALIMENTIVENESS.

ALIMENTER (Fr.), v. tr. A^3-le-ma^{3}n-ta. To nourish, or supply nourishment. [L, 42.]

ALIMENTEUX (Fr.), adj. A^3-le-ma^{3}n-tu^5. Nourishing. [L, 42.]

ALIMENTIVENESS, n. A^{2}l-i^2-me^{2}nt'i^{2}v-ne^{2}s. Fr., *alimentivité.* Sp., *alimentividad.* A phrenological term for the instinct for taking food. [L, 42, 55, 98.]

ALIMON (Lat.), n. n. A^{2}l(a^{3}l)-i(e)'mo^{2}n. See ALIMUM.

ALIMONIA (Lat.), n. f. A^{2}l(a^{3}l)-i^2-mo'ni^2-a^3. 1. Aliment. 2. In botany, sap. [L, 58, 106.]

ALIMONIOUS, adj. A^{2}l-i^2-mo'ni^2-u^{3}s. Affording food, nourishing. [L, 56.]

ALIMOS (Lat.), adj. A^{2}l(a^{3}l)-i(e)'mo^{2}s. Preventing hunger; without hunger. [L.]

ALIMUM (Lat.), n. n. A^{2}l(a^{3}l)-i(e)'mu^{3}m(mu^{4}m). 1. A plant, the use of which prevents hunger and thirst. [L, 50.] 2. See ARUM.

ALIMUS (Lat.), adj. and n. m. A^{2}l(a^{3}l)-i(e)'mu^{3}s(mu^{4}s). See ALIMOS, ALIMUM, and GLYCYRRHIZA *glabra.*

ALINASAL, adj. A^{2}l-i^2-na'sa^{2}l. From *ala*, a wing, and *nasus*, the nose. Belonging to the ala nasi. [L, 66.]

ALINDESIS (Lat.), n. f. A^{2}l(a^{3}l)-i^{2}n-de(da)'si^{2}s. Gen., *alinde'seos.* From ἀλίνδησις, a rolling in the dust. An exercise recommended by Hippocrates, consisting in rolling in the dust after having been anointed with oil. [L, 94.]

ALINGI, n. A Tamil name for the *Alangium decapetalum.* [B, 172.]

ALINTHISAR (Ar.), n. Elongation of the uvula. [L, 94.]

ALIOCAB (Ar.), n. See ALACAP.

ALIONE, n. See ALLIONE.

ALIPÆNA (Lat.), n., n. pl. of *alipœnos* (*q. v.*). A^{2}l(a^{3}l)-i^{2}p-e'(a^3'e^2)-na^3. Dry, external remedies containing no fat. [L, 53.]

ALIPÆNOS (Lat.), adj. A^{2}l(a^{3}l)-i^{2}p-e'(a^3'e^2)-no^{2}s. From α priv., and λιπαρός, fatty. Free from, or lacking in, fat (said of remedies, and of lean persons). [L, 51, 94.]

ALIPANTA (Lat.), n. n. pl. A^{2}l(a^{3}l)-i^{2}p-a^{2}n(a^{3}n)'ta^3. See ALIPÆNA.

ALIPANTOS (Lat.), adj. A^{2}l(a^{3}l)-i^{2}p-a^{2}n(a^{3}n)'to^{2}s. See ALIPÆNOS.

ALIPASMA (Lat.), n. n. A^{2}l(a^{3}l)-i^{2}p-a^{2}z(a^{3}s)'ma^3. Gen., *alipas'matos* (*-tis*). From ἀλείφειν, to anoint, and πάσμα, a plaster. A fine powder mixed with oil, used as an ointment to prevent sweating. [L, 51.]

ALIPATA, n. Fr., *aveuglant.* A euphorbiaceous tree found in the Philippines, of which the juice and the smoke of the burning wood are said to cause blindness. By some it is regarded as an *Excœcaria.* [L, 87, 109.]

ALIPED, adj. A^{2}l'i^{2}p-ed. From *ala*, a wing, and *pes*, the foot. See CHEIROPTEROUS.

ALIPÈDES (Fr.), n. pl. A^3-le-pe^{2}d. See CHEIROPTERA.

ALIPILI (Lat.), n. m. pl. A^{2}l(a^{3}l)-i^{2}p'i^{2}l-i(e). From *ala*, the axilla, and *pilus*, a hair. Servants, in the ancient Roman baths, who removed the axillary hairs. [L, 94.]

ALIPON (Fr.), n. A^3-le-po^{2}n^2. A purgative and drastic species of turpeth found in Languedoc.

ALIPTA (Lat.), n. m. A^{2}l(a^{3}l)-i^{2}p'ta^3. From ἀλείφειν, to anoint, to train. The person who trained the ancient Grecian wrestlers and bathers; a teacher of gymnastics. [L, 50, 116.]

ALIPTERIUM (Lat.), n. n. A^{2}l(a^{3}l)-i^{2}p-te(ta)'ri^2-u^{3}m(u^{4}m). A place where anointing was done. [L, 81.]

ALIPTES (Lat.), n. m. A^{2}l(a^{3}l)-i^{2}p'tez(te^{2}s). See ALIPTA.

ALIPTIC, adj. A^{2}l-i^{2}p'ti^{2}k. Fr., *aleptique*, *aliptique.* 1. Pertaining to inunction. 2. Gymnastic. [L.]

ALIPTICA (Lat.), n. f. A^{2}l(a^{3}l)-i^{2}p'ti^{2}k-a^3. Gr., ἀλειπτική (τέχνη understood). An ancient term for gymnastic training. [A, 311.]

ALISANDERS, n. A^{2}l-i^{2}s-a^{2}nd'u^{5}rz. See ALEXANDERS.

ALISE (Fr.), n. A^{3}l-ez. The fruit of the lote-tree (*Pyrus aria*), eaten in some parts of France, and used as a medicine in diarrhœa. [D, 112; L, 67.]

ALISEDA (Sp.), n. A^{3}l-i^{2}s-a'dth^{2}a^3. A chalybeate astringent mineral spring in the Sierra Morena, in Spain, recommended for gastric weakness, chronic diarrhœa, amenorrhœa, and chlorosis. [D, 90; L, 57.]

ALISIER (Fr.), n. A^{3}l-i^{2}s-i^2-a. The lote-tree, service-tree, or beam-tree (the *Pyrus aria*). [D, 11, 79, 82.]—**A. blanc, A. de Bourgogne.** The *Pyrus aria.* [D, 2, 79, 92.]—**A. de Fontainebleau.** The *Cratægus dentata.* [D, 79.]—**A. des bois, A. torminal, A. tranchant.** The *Cratægus torminalis.*—**Sorbier a.** See *A.*

ALISMA (Lat.), n. n. A^{2}l(a^{3}l)-i^{2}z(i^{2}s)'ma^3. Gen., *alis'matos* (*-tis*). Gr., ἄλισμα. Fr., *alisme.* 1. A genus of perennial acaulescent herbs of the natural order *Alismaceæ*, sub-order *Alismeæ*, characterized by having 3 white petals and 6 stamens. [B.] 2. A general name for a number of plants (including *Acuron*, *Arnica montana*, etc.). [D, 107.]—**A. americanum** [Gray]. An American variety of *A. plantago.* [D, 115.]—**A. damasonium** [Linnæus]. See DAMASONIUM.—**A. graminifolia, A. lanceolata.** See *A. plantago.*—**A. plantago** [Linnæus]. Fr., *alisme fluteau, plantain d'eau, pain de grenouilles.* Ger., *grosser Froschlöffel, Wasserwegerich, Wasserwegbreit.* Syn.: *Plantago aquatica.* The water-plantain; an herb found in ditches and ponds in Europe and America. It has large, smooth radical leaves and a scape, rising 2 feet or less, with numerous small, rose-white flowers arranged in a panicle on pedicels from 8 to 12 inches long. [B, 34.] The root was formerly esteemed a remedy for rabies. [D, 133.] The rhizome and the leaves contain a butyraceous, pungent volatile oil and an acrid resin. The powder of the leaves is given in doses of 60 grains, and that of the root in doses of 30 grains, for renal calculi, dysentery, diarrhœa, chorea, and epilepsy. [D, 115.]—**A. ranunculoides.** Fr., *fluteau renonculier.* A species growing in wet places. [D, 12, 121.]—**A. stellatum** [Lamarck]. See DAMASONIUM.

ALISMACEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-i^{2}z(i^{2}s)-ma(ma^3)'se^2(ke^2)-e(a^3-e^2). Fr., *alismacées.* Ger., *Alismaceen, Froschlöffelpflanzen.* Sp., *alismáceas.* Syn.: *alismoideæ.* The alismads; a name given by the elder Richard to an order of endogenous phanerogams in the natural system of De Candolle, comprising herbs bearing petiolate leaves with branching peduncles, and perfect, or monœcious, flowers provided with both calyx and corolla. There are 3 sepals and 3 petals; the stamens are hypogynous; and the ovaries, 3 or more in number, are converted into as many achænia. [B, 1, 19, 34.]

ALISMACEOUS, adj. A^{2}l-i^{2}z-ma'shu^{3}s. Lat., *alismaceus.* Fr., *alismacé.* Ger., *froschlöffelartig.* Sp., *alismáceo.* Belonging to the genus *Alisma* or to the *Alismaceæ.* [D, 110.]

ALISMADS, n. pl. A^{2}l-i^{2}z'ma^{2}dz. See ALISMACEÆ.

ALISMÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-i^{2}z(i^{2}s)'me(ma^3-e^2). A sub-division of the *Alismeæ* made by Reichenbach. [B, 170.]

ALISMAL, adj. A^{2}l-i^{2}z'ma^{2}l. See ALISMALES.

ALISMALES (Lat.), n. f. pl. A^{2}l(a^{3}l)-i^{2}z(i^{2}s)-ma(ma^3)'lez(le^{2}s). The alismal alliance; according to Lindley, an alliance of endogens including the orders *Alismaceæ*, *Butomaceæ*, and *Juncaginaceæ.* [B, 170.]

ALISMEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-i^{2}z(i^{2}s)'me^2-e(a^3-e^2). Fr., *alismées.* A sub-order of the *Alismaceæ*, comprising those genera in which the petals are white, the embryo being curved and the leaves usually laminate. [B, 34.]

ALISMEOUS, adj. A^{2}l-i^{2}z'me-us. Belonging to the *Alismeæ.*

ALISMIN, n. A^{2}l-i^{2}z'mi^{2}n. Fr., *alismine.* An acrid, bitter extract, probably a mixture of several substances, obtained from the water-plantain (*Alisma plantago*). [B, 2.]

ALISMINÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-i^{2}z(i^{2}s)-mi(me)'ne(na^3-e^2). Link's term for the *Alismaceæ* (*q. v.*). [B, 170.]

O, no; O^2, not; O^3, whole; Th, thin; Th^2, the; U, like oo in too; U^2, blue; U^3, lull; U^4, full; U^5, urn; U^6, like ü (German).

ALISMOID, adj. A^{2}l-i^{2}z'moid. Lat., *alismoides.* Fr., *alismoïde.* See ALISMACEOUS.

ALISMOIDEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-i^{2}z(i^{2}s)-mo-i^{2}d'e^2-e(a^3-e^2). Fr., *alismoïdes.* Sp., *alismoideas.* 1. A name given by Ventenat to a family of plants bearing a seed devoid of endosperm; comprising genera now distributed among the *Alismaceæ*, *Butomeæ*, and *Juncagineæ.* [B, 1.] 2. The *Alismaceæ.* [B, 19.]

ALISO (Sp.), n. A^{3}l-e'so. See ALNUS *glutinosa.*

ALISPHENOID, adj. A^{2}l-i^{2}s-fe'noid. For deriv., see ALA and SPHENOID. Lat., *alisphenoides.* Fr., *alisphénoïde.* Pertaining to the greater wing of the sphenoid bone (see *A.* CANAL); as a n., that portion of the sphenoid bone of the fœtus which subsequently forms the greater wing and the external pterygoid plate. [C.] In some of the lower animals it persists as a separate bone, but in man it becomes united with the basisphenoid (*q. v.*).

ALISPHENOIDALIA (Lat.), n. n. pl. A^{2}l(a^{3}l)-i^{2}s-fe(fa)-noid-a(a^3)'li^2-a^3. The greater wings of the sphenoid bone. [L, 113.]

ALISSON (Lat.), n. n. A^{2}l(a^{3}l)-i^{2}s'so^{2}n. See ALYSSON.

ALISTELES, n. An alchemical name for sal ammoniac. [B, 50.]

ALITÉ (Fr.), adj. A^3-le-ta. Bedridden. [D, 75.]

ALITEMENT (Fr.), n. A^3-let-ma^{3}n^2. Confinement to bed. [D, 92.]

ALITH, n. An old name for asafœtida. [D, 107.]

ALITION (Fr.), n. A^3-li^2-shi^2-o^{2}n^2. Alimentation. [D, 10.]

ALITUS (Lat.), n. m. A^{2}l(a^{3}l)'i^{2}t-u^{3}s(u^{4}s). Gen., *alitus.* From *alere*, to nourish. Nourishment. [A, 312.]

ALIUM (Lat.), n. n. A^{2}l(a^{3}l)'i^2-u^{3}m(u^{4}m). See ALLIUM.

ALIUMEIZ (Ar.), n. The *Ficus sycomorus.* [D, 108.]

ALIVÉRIE (Fr.), n. A^3-le-va-re. A stimulating preparation of *Arabis chinensis*, used in India. [D, 79.]

ALIXIA (Lat.), n. f. A^{2}l(a^{3}l)-i^{2}x'i^2-a^3. See ALYXIA.—**Cortex alixiæ.** See ALYXIA *stellata.*

ALIZA (Sp.), n. A^{3}l-e'th^{2}a^3. The Colombian name of a shrub the juice of which is said to be a powerful hæmostatic. ["Lancet," Dec. 19, 1885, p. 1161.]

ALIZARAMIDE, n. A^{2}l-i^{2}z-a^{2}r'a^{2}m-i^{2}d. From *alizarin* and *amide.* Fr., *alizaramide.* Ger., *Alizaramid.* Syn.: *amidoxyanthraquinone.* A substance crystallizing in brown needles, having the structural formula $C_{14}H_6O_2 \left\{ \begin{matrix} OH \\ NH_2 \end{matrix} \right.$, obtained by heating a dilute solution of pure alizarin in ammonia. [B.]

ALIZAREIN, n. A^{2}l-i^{2}z-a're-i^{2}n. See ALIZARIMIDE.

ALI-ZARI, n. The Levant commercial name for madder. [B, 2.] —**Radix a.-z.** Madder root. [B, 180.]

ALIZARIC, adj. A^{2}l-i^{2}z-a^{2}r'i^{2}k. Fr., *alizarique.* Ger., *alizarisch.* It., *alizarico.* Sp., *alizárico.* Pertaining to alizarin. [B.] —**A. acid.** Fr., *acide alizarique.* Ger., *Alizarinsäure.* It., *acido alizarico.* Sp., *ácido alizárico.* See PHTHALIC ACID.

ALIZARIMIDE, n. A^{2}l-i^{2}z-a^{2}r'i^{2}m-i^{2}d. From *alizarin* and *imide* (a derived form of *amide*). Fr., *alizarimide.* Ger., *Alizarimid.* Syn.: *alizarein.* A product obtained by heating flocculent precipitated alizarin with ammonia, and digesting with dilute hydrochloric acid, $C_{14}H_7NO_2 = C_{14}H_6O_2.NH$; of a violet-red color while moist, but nearly black when dried. [B, 2.]

ALIZARIN, n. A^{2}l-i^{2}z'a^{2}r-i^{2}n. From *ali-zari*, the Levant commercial name for madder. Lat., *alizarinum.* Fr., *alizarine.* Ger., *Alizarin.* It., *alizarina.* Sp., *alizarino.* Syn.: *anthraquinonic acid;* one of the isomeric varieties of dihydroxyanthraquinone, having the constitution $C_{14}H_8O_4$. It forms prismatic crystals, which when perfectly dry are red, but when freshly precipitated from an alcoholic solution are brownish-yellow. It is soluble with difficulty in boiling water, but dissolves more readily in alcohol and in ether. It was first obtained from madder-root, of which it constitutes the coloring principle, being identical with Runge's madder-red and Persoz and Gaultier de Claubry's *matière colorante rouge.* It is said also to be identical with morindone (a substance obtained by decomposing morindin with heat), but this is uncertain. Artificial a. is now made from anthracene, derived from coal-tar, and is largely used in dyeing. [B, 2.]—**A. blue.** Ger., *Alizarinblau.* A blue coloring matter, in the form of brownish-violet needles, of a metallic lustre, obtained by heating nitroalizarin with glycerin and sulphuric acid. The formula is $C_{17}H_9NO_4$. [B, 49, 79; Perkin, "Nature," July 30, 1885 (B).]—**A.-blue amide.** Ger., *Alizarinblauamid.* A derivative of a.-blue in which a molecule of amidogen replaces one of hydroxyl, $C_{17}H_8NO_3(NH_2)$. It forms dark-blue acicular crystals. [B, 79.]—**A. brown.** Ger., *Alizarinbraun.* A brownish or olive-colored substance prepared by treating nitroalizarin with soda and stannous chloride, or with sodium hyposulphite. [B, 49.]—**A. carmine.** Ger., *Alizarinkarmin.* A red coloring matter, forming a very fast dye, consisting of the salts of the sulpho-acids of a. and purpurin. [B, 49.]—**A. orange.** Ger., *Alizarinorange.* See NITROALIZARIN.—**A'säure** (Ger.). Alizaric acid. See PHTHALIC ACID.

ALIZARINIC ACID, n. A^{2}l-i^{2}z-a^{2}r-i^{2}n'i^{2}k. See PHTHALIC ACID.

ALIZARINSULPHONIC ACID, n. A^{2}l-i^{2}z''a^{2}r-i^{2}n-su^{3}l-fo^{2}n'-i^{2}k. A product obtained by heating alizarin with fuming sulphuric acid. [B, 2.]

ALIZARIQUE (Fr.), adj. A^3-le-za^3-rek. See ALIZARIC.

ALIZARISCH (Ger.), adj. A^3-le-dza^3'ri^{2}sh. See ALIZARIC.

ALIZELES, n. See ALISTELES.

ALIZIER (Fr.), n. A^3-le-zi^2-a. See ALISIER.

ALJAMA (Sp.), n. A^{3}l-ha^3'ma^3. See ALHAMA.

ALJOSUCHA (Sp.), n. A^{3}l-ho-su'cha^3. A Peruvian plant. Rubbing it between the hands and then inhaling the odor is said to protect against tertian fever. [D, 101.]

ALJUZAM (Ar.), n. Lepra. [Kaposi (D, 18).]

ALK, n. A gum-resin obtained in northern Africa from the *Pistacia terebinthus.* [D, 117.]

ALKAERT, ALKAES, ALKAEST, n's. See ALCAHEST.

ALKAFIAL, ALKAFIEL, n's. Alchemical names for antimony. [B, 50.]

ALKAHEST, n. See ALCAHEST.

ALKAHESTIC, adj. See ALCAHESTIC.

ALKAHOL, n. See ALCOHOL and ALCAHOL.

ALKAIN, n. See ACAZDIR.

ALKALALBUMINAT (Ger.), n. A^{3}l-ka^{3}l-a^{3}l-bu-mi^{2}n-a^{3}t'. See *Alkali* ALBUMIN.

ALKALAMIDE, n. A^{2}l-ka^{2}l'a^{2}m-i^{2}d. From *alkali* and *amide.* Fr., *alcalamide.* Ger., *Alkalamid.* The a's are a class of compounds formed by the replacement of 2 or all 3 of the hydrogen atoms of ammonia by acid and base radicles. They are divided into *monalkalamides, dialkalamides*, and *trialkalamides*, according as they derive from 1, 2, or 3 molecules of ammonia. [B, 2.]—**Secondary a.** One in which 2 hydrogen atoms of ammonia are replaced, one by an acid and the other by a base radicle. [B, 2.]—**Tertiary a.** One in which all 3 of the hydrogen atoms of ammonia are replaced, either (*a*) by 1 basic and 2 acid monatomic radicles, (*b*) by 2 basic and 1 acid monatomic radicles, or (*c*) by 1 basic monatomic and 1 acid diatomic radicle. [B, 2.]

ALKALAP, n. Ar., *al-qalaɔi.* An alchemical name for tin. [B, 52.]

ALKALE, n. An alchemical name for hen's fat (*oleum gallinæ*). [Ruland (D, 83).]

ALKALESCENCE, ALKALESCENCY, n's. A^{2}l-ka^{2}l-e^{2}s'-se^{2}ns, -se^{2}ns-i^2. Lat., *alcalescentia.* Fr., *alcalescence.* Ger., *Alkalescenz.* It., *alcalescenza.* Sp., *alcalescencia.* 1. Slight alkalinity. [B.] 2. A tendency to alkalinity. [D, 77.]

ALKALESCENT, adj. A^{2}l-ka^{2}l-e^{2}s'se^{2}nt. Lat., *alcalescens.* Fr., *alcalescent.* Ger., *alkalisirend.* It., Sp., *alcalescente.* Weakly alkaline, becoming alkaline. [D, 77.]

ALKALI, n. A^{2}l'ka^{2}l-i. Pl., *a'es* or *a's.* Written also *alcali.* From Ar., *al-qalî*, soda-ash. Lat., Fr., *alcali, alkali.* Ger., *alkalisches Mittel, Laugensalz.* It., *alcali.* Sp., *álcali.* Originally, the soluble part of the ashes of plants, especially of sea-weed (carbonates of sodium and potassium). At a later period three kinds of a. were recognized—vegetable, mineral, and volatile, corresponding respectively to potash, soda, and ammonia and their carbonates. At present the word is used in various senses. In its most restricted but most usual sense it is applied to four substances only, the hydrates of potassium (potash), sodium (soda), lithium (lithia), and ammonium (supposed to exist in the aqueous solution of ammonia); in a more general sense it is applied to the hydrates of the so-called alkaline earths (baryta, strontia, and lime) and to a large number of organic substances, both natural and artificial, classed as alkaloids and as ammonium-bases. The following properties are common to the mineral and many of the organic alkalies: 1. They are more or less soluble in water, the a'es proper much more so than the alkaline earths. 2. They neutralize the strongest acids, and with weak acids form salts having alkaline properties in some degree. 3. Dissolved in water, they act as caustics or corrosives on vegetable and animal substances. 4. They precipitate the heavy metals from most of their acid solutions, as hydrates or as oxides. 5. They alter the tint of many coloring matters. [B, 2.]—**Acetated vegetable a.** Potassium acetate. [B, 69.]—**Acetated volatile a.** Ammonium acetate. [B, 69.]—**Aerated a.** Fr., *alcali aéré.* It., *alcali aerato.* A combination of an a. with aerial (carbonic) acid; a carbonate of potassium, sodium, or ammonium. [B, 93.]—**Aerated fixed mineral a.** Sodium carbonate. [B.]—**Aerated fixed vegetable a.** Potassium carbonate. [B.]—**Aerated volatile a.** Ammonium carbonate. [B.]—**A. ammoniacum acetatum, A. ammoniacum aquosum, A. ammoniacum causticum, A. ammoniacum fluidum, A. ammoniacum spirituosum, A. ammoniacum succinatum, A. ammoniacum vinosum, A. ammoniacum volatile** (Lat.), **A. animal** (Fr.). See under ALCALI.—**A'a. carbonica** (Lat.). The carbonates of the a'es. [B, 95.]—**A'a caustica** (Lat.). Caustic a'es. [B, 95.]—**A'metalle** (Ger.). The a.-metals. [B.]—**A. minerale nitratum, A. minerale phosphoratum, A. minerale salinum, A. minerale sulphuricum** (Lat.). See under ALCALI.—**A. of nitre.** See ALCALI *du nitre.*—**A. of tartar.** See ALCALI *tartari.*—**Caustic a.** Lat., *alcali causticum.* One of sufficient purity to act as a caustic. [B.]—**Deliquescent a.** Potash. [D, 90.]—**Effervescing a.** A carbonate of one of the a'es. [B, 93.]—**Effervescing fixed mineral a.** Sodium carbonate. [B.]—**Effervescing fixed vegetable a.** Potassium carbonate. [B.]—**Effervescing volatile a.** Ammonium carbonate. [B.]—**Fixed a.** Lat., *alcali fixum.* Fr., *alcali fixe.* Sp., *álcali fijo.* A non-volatile a. (either soda or potash). —**Fixed mineral a.** A salt of sodium, especially the carbonate. [B.]—**Fixed vegetable a.** Lat., *alcali fixum herbarum.* A salt of potassium, especially the carbonate. [B.]—**A. fixum tartaricum.** See ALCALI *fixum tartarisatum.*—**Fossil a.** Lat., Fr., *alcali fossile.* See *Mineral a.*—**Marine a.** Fr., *alcali marin.* Soda. [B.]—**Mephitic volatile a.** Ammonium carbonate. [B.]—**Mild a.** Lat., *alcali mite.* Fr., *alcali doux.* Ger., *mildes A.* An old name for an a. which had lost its causticity in some degree, as by combination with carbonic acid.—**Mild volatile a.** Ammonium carbonate. [B.]—**Mineral a.** Lat., *alcali minerale.* Fr., *alcali minéral.* Ger., *mineralisches A.* Syn.: *fossil a.* An old name for soda and sodium carbonate; now applied to all the inorganic a'es. [B.]—**Muriated vegetable fixed a.** Potassium chloride. [B.]—**Organic a.** An organic base. See ALKALOID.—**Phlogistic**

a., Phlogisticated a. Lat., *alcali phlogisticatum.* Fr., *alcali phlogistiqué.* Ger., *phlogistisirtes A.* An old term variously applied to sodium chloride and potassium cyanide and ferrocyanide. [B, 3, 86, 93, 107; D, 90.]—**Prussian a.** A cyanide of one of the alkali-metals. [B.]—**Urinary a.** Ammonia. [D, 90.]—**Vegetable a.** Lat., *alcali vegetabile.* Fr., *alcali végétal.* An old name for potash and potassium carbonate; now sometimes applied to the alkaloids. [B.]—**Volatile a.** Lat., *alcali volatile.* Fr., *alcali volatil.* Ger., *flüchtiges A.* An old name for ammonia and ammonium carbonate. For other sub-titles in Latin, see under ALCALI; see also *A.*-ALBUMINATE and *A.*-METAL.

ALKALIA, n. A vessel. [D, 107.]

ALKALID, n. An alchemical name for oxide of copper made by heating brass. [Ruland, Johnson (D, 83).]

ALKALIFIABLE, adj. A^{2}l-ka^{2}l'i^2-fi-a^2-bl. Ger., *alkalisirbar.* Capable of conversion into an alkali. [D, 77.]

ALKALIFY, v. tr. and intr. A^{2}l-ka^{2}l'i^2-fi. Ger., *alkalisiren.* To convert or be converted into an alkali. [D, 77.]

ALKALIGEN, ALKALIGENE, n's. A^{2}l-ka^{2}l'i-je^{2}n, -jen. See ALCALIGENIUM.

ALKALIGENOUS, adj. A^{2}l-ka^{2}l-i^2'je^{2}n-u^{3}s. Lat., *alcaligenus.* Fr., *alcaligène, alcalifiant.* Ger., *alkaligen, alkalisirend.* Sp., *alcaligeno.* Producing or engendering alkalies; a term formerly applied to nitrogen. [B.] Cf. ALCALIGENIUM.

ALKALIMETER, n. A^{2}l-ka^{2}l-i^{2}m'e^{2}t-u^{5}r. From *alkali,* and μέτρον, a measure. Fr., *alcalimètre.* Ger., *Alkalimeter.* Sp., *alcalimetro.* An apparatus for determining the amount of real alkali present in a liquid; either by the gradual addition of an acid of known strength, the amount necessary to saturate the alkali being noted; or, in the case of the alkaline carbonates, by measuring the amount of carbonic acid set free by their decomposition on adding an acid. [B.]

ALKALIMETRIC, adj. A^{2}l-ka^{2}l-i^2-me^{2}t'ri^{2}k. Fr., *alcalimétrique.* Ger., *alkalimetrisch.* Sp., *alcalimétrico.* Pertaining to alkalimetry.

ALKALIMETRY, n. A^{2}l-ka^{2}l-i^{2}m'e^{2}t-ri^2. Fr., *alcalimétrie.* Ger., *Alkalimetrie.* Sp., *alcalimetria.* The determination of the proportion of real alkali present in an alkaline liquid. [B, 2.] See ALKALIMETER.

ALKALINE, adj. A^{2}l'ka^{2}l-i^{2}n(in). Lat., *alcalinus.* Fr., *alcalin.* Ger., *alkalinisch, alkalisch.* It., Sp., *alcalino.* Having the properties of an alkali (*q. v.*).—**A.-earthy.** Fr., *alcalino-terreux.* Ger., *alkalinerdisch.* It., *alcalino-terroso.* Pertaining to the a. earths or their metals. [B.] See under EARTH. See also *A.* METALS, *A.* PHOSPHATES, *A.* REACTION, *A.* SALTS, and *A.* WATERS.

ALKALINITY, n. A^{2}l-ka^{2}l-i^{2}n'i^2-ti^2. Lat., *alcalinitas.* Fr., *alcalinité.* Ger., *Alkalinität.* It., *alcalinità.* Sp., *alcalinidad.* The state of being alkaline. [B.]

ALKALINIZATION, n. A^{2}l-ka^{2}l''i^{2}n-i^{2}z-a'shu^{3}n. Fr., *alcalinisation.* Ger., *Alkalinisation.* It., *alcalinisazione.* Sp., *alcalinización.* The act or process of rendering alkaline. [B.]

ALKALINIZE, v. tr. A^{2}l'ka^{2}l-i^{2}n-iz. Fr., *alcaliniser.* Ger., *alkalinisiren.* It., *alcalinisare.* Sp., *alcalinizar, alcalificar.* To render alkaline. [B.]

ALKALINURIA, n. A^{2}l''ka^{2}l-i^{2}n-u^2'ri^2-a^3. From *alkali,* and οὖρον, urine. Alkalinity of the urine. [D, 2.]

ALKALIOUS, adj. A^{2}l-ka^{2}l'i^2-u^{3}s. Alkaline. [D, 77.]

ALKALISCH (Ger.), adj. A^{3}l-ka^{3}l'i^{2}sh. Alkaline.

ALKALITÄT (Ger.), n. A^{3}l-ka^{3}l-i^2-tat'. Alkalinity. [D, 12.]

ALKALIZATE, v. tr., adj., and n. A^{2}l-ka^{2}l'i^{2}z-at. To alkalinize; alkaline; a substance having alkaline qualities. [Sheridan (D, 122).]

ALKALIZATION, n. A^{2}l-ka^{2}l-i^{2}z-a'shu^{3}n. See ALKALINIZATION.

ALKALIZE, v. tr. A^{2}l'ka^{2}l-iz. See ALKALINIZE.

ALKALOID, n. A^{2}l'ka^{2}l-oid. From *alkali,* and εἶδος, resemblance. Lat., *alcaloides, alcaloideum.* Fr., *alcaloïde.* Ger., *Alkaloid, Pflanzenbase.* It., *alcaloide.* Sp., *alcalóide.* An organic alkali or base; an organic substance possessing more or less alkalinity. Many of the a's can not strictly be termed alkalies, but they are so connected with substances decidedly alkaline that they are regarded as of essentially the same chemical nature. Most of the artificial a's must be considered as ammonia, or hydrate of ammonium, in which the hydrogen is replaced wholly or in part by a compound radicle generally composed of carbon and hydrogen (amines). Less is known of the constitution of the natural a's, but probably they also are derivatives of ammonia. [B, 2.]—**Cadaveric a.** Fr., *alcaloïde cadavérique.* Ger., *Cadaveralkaloid, Leichenalkaloid.* It., *alcaloide cadaverico.* Sp., *alcalóide cadavérico.* An a. generated in dead bodies by the processes of putrefaction. [B.] See PTOMAINE.—**Cinchona a's.** See under CINCHONA.—**Glucoside a.** A substance which shows the properties and reactions of an a., but, like a glucoside, can be decomposed by dilute acids into glucose and another compound. [B, 4.]

ALKALOIDAL, adj. A^{2}l-ka^{2}l-oid'a^{2}l. Having the properties of an alkaloid. [D, 90.]

ALKALOIDES, ALKALOIDEUM (Lat.), n's n. A^{2}l(a^{3}l)-ka^3-lo-i(e)'dez(de^{2}s), -i^{2}d'e^2-u^{3}m(u^{4}m). An alkaloid.—**Alkaloidea acria.** 1. Poisons containing strychnine, brucine, nux vomica, or veratrine. [Belg. Ph. (B, 95).] 2. A general term for tobacco, conium, veratrum, colchicum, aconite, and digitalis. [Russ. Ph. (B, 95).]—**Alkaloidea narcotica.** 1. The narcotics, morphine, opium, stramonium, belladonna, hyoscyamus, cicuta, conium, *Lactuca virosa,* etc. [Belg. Ph. (B, 95).] 2. Opium and its preparations. [Rom. Ph. (B, 95).] 3. Belladonna, opium, hyoscyamus, nux vomica, and stramonium. [Russ. Ph. (B, 95).]

ALKALOIMETER (Ger.), n. A^{3}l-ka^{3}l-o-i^{2}m'e^{2}t-e^{2}r. A form of alkalimeter (*q. v.*) devised by O. Henry, for determining the quantity of alkaloid in a solution, in which a solution of tannin is used instead of an acid. [D, 12.]

ALKALURETIC, adj. A^{2}l-ka^{2}l-u^2-re^{2}t'i^{2}k. Promoting the secretion of alkaline urine (said of drugs). [B, 20.]

ALKAMYE, n. The mixed metal alchemy (*q. v.*). [Prompt. Parv. (D, 122).]

ALKITRON, n. See ALEMBROTH.

ALKANET, n. A^{2}l'ka^{2}n-e^{2}t. From Fr., *orcanette,* or *organette.* Lat., *alkanna.* Fr., *organette* [Fr. Cod.]. Ger., *Ochsenzunge.* It., *organetta.* Sp., *orcaneta.* A commercial name for several different plants belonging to the genera *Anchusa* (*Alkanna, Lithospermum*) and *Lawsonia.* [B.]—**A. green.** Fr., *vert d'alkanna.* Ger., *Alkannagrün.* A substance obtained by evaporating a tincture of a. root. In ethereal solution it gives a green color. [D, 115.]—**A. root.** See *Dyers' a.*—**Bastard a.** *Lithospermum arvense.* [B, 71.]—**Dyers' a., False a.** Lat., *radix alcannæ spuriæ.* Fr., *orcanette, organette* [Fr. Cod.]. Ger., *Alkannawurzel, unechte Alkanna.* It., *organetta, ancusa.* Sp., *orcaneta.* The root of *Anchusa tinctoria* (*q. v.*). [B.]—**Garden a., Officinal a.** See ANCHUSA *officinalis.*—**True a.** Lat., *alkanna vera.* Ger., *echte Alkanna, Hennastrauch.* The leaves and root of *Lawsonia inermis* or *L. alba.*

ALKANIN, n. See ALKANNIN.

ALKANNA (Lat.), n. f. A^{2}l(a^{3}l)-ka^{2}n(ka^{3}n)'na^3. From Ar., *al-khennâ*, the *Lawsonia inermis.* Ger., *Alkanna, Alkanne.* It., *alcanna.* Sp., *alcana.* 1. Isinglass. [D, 119.] 2. Alkanet; a genus of boraginaceous plants separated by Tausch from *Anchusa,* from which it is distinguished by the absence of scales at the throat of the corolla and the absence of an excavation at the base of the nuts. [B, 19, 49.]—**Aechte A.** (Ger.). See *A. vera.*—**A'blätter** (Ger.). A. leaves. See LAWSONIA *inermis.*—**Alkannæ radix, Alkannæ spuriæ radix.** See *Radix alkannæ.*—**Alkannæ veræ radix.** See *Radix alkannæ veræ.*—**A'grün.** See ALKANET *green.*—**A. leaves.** Henna leaves. See LAWSONIA *inermis.*—**A. major latifolia dentata.** *Prinos verticillatus.* [D, 90.]—**A. Matthioli** [Tausch]. A species closely resembling *A.* (*Anchusa*) *tinctoria.* [B, 180.]—**A. orientalis.** Ger., *orientalische A., morgenländische A.* See *A. vera.*—**A. red.** Ger., *Alkannaroth.* It., *rosso di alcanna.* See ANCHUSIC ACID.—**A. spinosa** [Gärtner]. *Lawsonia inermis.* [B, 173.]—**A. spuria.** False alkanet (*Anchusa tinctoria*). [D, 90.]—**A. tinctoria** [Tausch]. *Anchusa tinctoria.* [B.]—**A. vera.** Ger., *echte A.* True alkanet; the *Lawsonia inermis* and *L. alba.* [D.]—**A. vulgaris.** *Anchusa tinctoria.* [B.]—**A'wurzel** (Ger.). See the major list.—**Echte A.** (Ger.). See *A. vera.*—**Färbende A.** (Ger.). See *A. tinctoria.*—**Morgenländische A., Orientalische A.** (Ger.). Oriental or true a. [B, 180.]—**Radix alkannæ.** Fr., *orcanette.* Ger., *Alkannawurzel, unechte Alkannawurzel.* The root of *Anchusa tinctoria.* [B.]—**Radix alkannæ orientalis.** See *Radix alkannæ veræ.*—**Radix alkannæ spuriæ.** See *Radix alkannæ.*—**Radix alkannæ veræ.** Ger., *echte Alkannawurzel.* The root of *Lawsonia inermis.* [B.]—**Vert d'a.** (Fr.). See ALKANET *green.*

ALKANNAWURZEL (Ger.), n. A^{3}l-ka^{3}n'na^3-vurtz-e^{2}l. Alkanet; radix alkannæ. [B.]—**Echte A.** See *Radix* ALKANNÆ *veræ.*—**Falsche A., Unechte A.** See *Radix* ALKANNÆ *spuriæ.*

ALKANNIN, n. A^{2}l-ka^{2}n'ni^{2}n. A principle contained in *Alkanna* (*Anchusa*) *tinctoria.* [B.] See ANCHUSIC ACID.

ALKANT, n. An alchemical term for mercury; also a kind of ink. [Ruland (D, 83, 135).]

ALKANTHUM, ALKANTUM (Lat.), n's n. A^{2}l(a^{3}l)-ka^{2}n-(ka^{3}n)'thu^{3}m(thu^{4}m), -tu^{3}m(tu^{4}m). Alchemical terms for (*a*) æs ustum; (*b*), a sort of arsenic, or arsenical preparation. [Ruland (D, 83, 105).]

ALKANZI, n. A sort of confection or electuary described by Mesuen. [D, 83.]

ALKAPTONE, n. A^{2}l-ka^{2}p'ton. Fr., *alcaptone.* Ger., *Alkapton.* An amorphous, brownish or yellow, nitrogenous substance discovered by Bödecker in the urine under certain pathological conditions. It stains the linen, particularly when the urine becomes alkaline, is readily soluble in water and in alcohol, and presents some of the reactions of glucose, reducing copper salts like the latter, but not fermenting with yeast, and, when treated with cold liquor potassæ, striking a dark-brown color, the coloration proceeding from the surface of the liquid downward. ["Brit. Med. Jour.," Jan. 7, 1882; B, 107; K, 16.]

ALKAPTONHARN (Ger.), n. A^{3}l-ka^{3}p-ton'ha^{3}rn. Urine which contains alkaptone. [D, 18.]

ALKAPTONURIA (Lat.), n. f. A^{2}l(a^{3}l)-ka^{2}p(ka^{3}p)-to^{2}n-u^2(u)'-ri^2-a^3. From ALKAPTONE and οὐρεῖν, to micturate. Fr., *alcaptonurie.* Ger., *Alkaptonurie.* The morbid condition in which alkaptone is present in the urine. [D, 87.]

ALKAR, n. See ALCAR.

ALKARA, n. See ALCARA.

ALKARANUM (Lat.), n. n. A^{2}l(a^{3}l)-ka^{2}r(ka^{3}r)-a(a^3)'nu^{3}m-(nu^{4}m). An alchemical term for antimony. [B, 87; D, 83.]

ALKARGEN, n. A^{2}l-ka^{3}r'je^{2}n. From *alkarsine* (*q. v.*), and γεννᾶν, to beget. Cacodylic acid generated by the action of water upon alkarsine. [B, 48.]

ALKARMES, n. See ALKERMES.

ALKARSINE, n. A^{2}l-ka^{3}r'si^{2}n. From *alcohol* (Ger., *Alkohol*), and *arsenic,* because it was regarded as an alcohol in which arsenic replaced oxygen. Fr., *alcarsine.* Ger., *Alkarsin.* Syn.: *Cadet's*

fuming arsenical liquid. Bunsen's name for a liquid, first obtained by Cadet in 1760, prepared by the action of arsenic trioxide upon potassium acetate ; a fœtid, brown-red, oily liquid, very poisonous and spontaneously inflammable, consisting of a variable mixture of cacodyl and its oxide. [B, 2, 3.]

ALKARVA, n. An old name for the *Ricinus communis.* [B, 87.]

ALKASA, n. Probably from Ar., *al-qaraɔ*, a gourd. An alchemical term for a crucible. [B ; Ruland (D, 83, 135).] Cf. ALCARA.

ALKATRAN, n. See ALCHITRAN.

ALKAUT, n. An old term for mercury. [B, 87.]

ALKAZOAL, n. See ALKASA.

ALKÉKENGE (Fr.), n. A^{3}l-ka-ka^{3}n^{2}zh. Alkekengi. [B.]—**A. coqueret** [Fr. Cod.]. The *Physalis alkekengi.* [B.]

ALKEKENGI, n. A^{2}l-ke^2-ke^{2}n′ji^2. From Ar., *al-kâkenj.* Lat., *alkekengi.* Fr., *alkékenge, alkékenge coqueret.* Ger., *Judenkirsche.* It., *alchechengi.* Sp., *alquequenje.* Also written *alcachingi.* The winter-cherry, or *Physalis a.* (*q. v.*), the *A. officinarum* of Tournefort, *A. Tournefortii* and *A. vulgare* of others. A number of varieties are described by the older writers, such as *A. officinarum*, or the variety found commonly in the shops ; *A. officinarum foliis variegatis*, a variety with variegated leaves ; *A. fructu parvo verticillato*, with small fruit arranged in whorls upon the stalk ; *A. virginianum fructu luteo*, a Virginian variety with yellow fruit ; *A. indicum majus, A. americanum annuum ramosissimum fructu ex luteo virescenti*, an annual American variety with fruit changing from yellow to green ; *A. americanum annuum maximum viscosum*, a large American variety ; *A. barbadense patulum, parvo flore, fructu amplo, mucrone productiori*, a dwarf species from Barbadoes with a small flower and broad pointed fruit ; *A. carassavicum, foliis origani incanis, flore viete sulphureo, fundo purpureo*, a species from Curaçoa, with leaves resembling those of the *origanum*, and sulphur-yellow flowers, purple at the bottom ; and *A. americanum frutescens, fructu globoso rubro, vesica atro-purpurea*, a shrubby American variety, with globose red fruit, having a dark-purple bladder. Some of these varieties are probably to be referred to distinct species of *Physalis.* [B, 200.]—**Baccæ a.** (Lat.). Winter-cherries ; the fruit of *Physalis a.*—**Trochisci a.** (Lat.). Troches made up of fruit of *Physalis a.* 3 drs., gum arabic, tragacanth, olibanum, pine-nuts, sweet almonds, starch, licorice, Armenian bole, and white-poppy seeds, of each, 6 drs., the seeds of melons, cucumbers, watermelons, and gourds, each, 3½ drs., and the seeds of smallage and of white henbane, white amber, Lemnian earth, and opium, each, 2 drs., mixed into a paste with a sufficient quantity of the fresh juice of the fruit of *Physalis a.* [B, 200.]

ALKEKENGIN, n. A^{2}l-ke^2-ke^{2}n′ji^{2}n. Fr., *alkékengine.* Ger., *Alkekengin.* Physalin. [B.]

ALKÉKENGINE (Fr.), n. A^{3}l-ka-ka^{3}n^2-zhen. Alkekengin. [B.]—**A. siliciée.** Silicated alkekengin ; a compound of alkekengin with silica, such as is thought to be present in Laville's pills. [B ; D.]

AL-KÊMELYEH (Ar.), n. See ALCHEMILLA.

ALKEN (Ar.), n. Faulty enunciation. [D, 14.]

ALKENYL, n. A^{2}l′ke^{2}n-i^{2}l. For deriv., see ALKOHOL and *-enyl**. Ger., *Alkenyl.* A generic term for the trivalent series of hydrocarbons having the general formula $C_nH_{2n+1}.CH' - CH \equiv$. The chief members of this series are ethenyl and isobutenyl. [B, 4.]

ALKERMES, n. A^{2}l-ku^{5}r′mez. From Ar., *al-qirmiz*, from Sansc., *krimidja*, produced by a worm. Lat., *alkermes.* Fr., *alkermès.* It., *alchermes.* Sp., *alkermes, alquermes.* Also written *alchermes* and *kermes.* 1. A variety of the cochineal insect found in the Morea. See KERMES. 2. A name applied to various preparations containing either kermes or cochineal. [B.] See *Confectio a.* and *Elixir a.*—**A. auriflcum minerale, A. minerale** (Lat.). See KERMES *mineral.*—**Confectio a.** (Lat.). Fr., *confection d'alkermès.* It., *elettuario di alchermes.* Syn. : *confectio margaritarum kermesina.* A confection made by boiling sugar and kermes grains, each, 480 parts, with 300 parts of apple-juice, straining and adding aloes-wood and cinnamon, each, 22 parts, lapis lazuli and pearls, of each, 6 parts, gold leaf and ambergris, each, 1¼ part, sugar 7 parts, and musk $\frac{6}{10}$ part [Palat. Disp. (B, 119)]. The Br. Ph. has the same formula, omitting the lapis lazuli, pearls, and gold leaf, and with the addition of 2 parts of cochineal and a few drops of the *oleum tartari per deliquium.* The Turin Ph. prescribes 21 parts, each, of cinnamon and kermes, 14 parts, each, of yellow saunders and red coral, and 443 parts of syrup of kermes ; the Sp. Ph., 7 parts, each, of pearls and lapis lazuli, 21 parts, each, of aloes-wood and cinnamon, and 518 parts of inspissated syrup of kermes ; the Würtemb. Ph., juice of kermes 1,000 parts, rose-water 180 parts, oil of cinnamon $\frac{6}{10}$ part, and sugar 360 parts ; the Parma Cod., cassia lignea 14 parts, red roses 10·2 parts, cinnamon 27 parts, cochineal 3·4 parts, and syrup of kermes 328 parts ; the Amsterd. Ph., syrup of kermes 554 parts, and aloes-wood and cinnamon, of each, 23 parts. [B, 119.]—**Elixir a.** (Lat.), **Elixir of a., Liquid a.** Fr., *élixir d'alkermès.* It., *elisire di alchermes.* A preparation made by digesting cloves and cinnamon, each, 11 parts, and vanilla 7 parts, in 1,080 parts of alcohol, adding a tincture made with cochineal 15 parts, alum 1·25 parts, and alcohol 180 parts, continuing the digestion for 3 days, and adding cinnamon-water 720 parts, and sugar 2,000 parts. [Ferrara Ph. (B, 119).]—**Troches of a.** Fr., *trochisques d'alkermès.* Troches made of confection of a. 45 parts, lac 11 parts, amber and musk, each, 0·6 part, sugar 540 parts, and sufficient mucilage of tragacanth formed with rose-water. [Palat. Disp., Würtemb. Ph., 1798 (B, 119).]

ALKERMÈS (Fr.), n. A^{3}l-kar-me^{2}s. Alkermes.—**A. liquide.** See *Elixir* ALKERMES.—**Confection d'a., Électuaire d'a.** See *Confectio* ALKERMES.—**Élixir d'a.** See *Elixir* ALKERMES.—**Trochisques d'a.** See *Troches of* ALKERMES.

ALKERVA, n. See ALKARVA.

ALKES, n. See *Æs ustum.*

ALKETRAN, n. See ALCHITRAN.

ALKHALI, n. See ALKALI.

ALKIAN, n. An alchemical term for a spirit supposed to reside in man and to carry on the processes of digestion and nutrition. [B, 200.]

ALKIBIADION (Lat.), n. n. See ALCIBIADION.

ALKIBRIC, ALKIBRIK, n's. Ar., *al-kibrît*, sulphur. Also written *alchibric, alchibert, alchabric.* Alchemical terms for sulphur. [B, 50.]

ALKIMIA (Lat.), n. f. A^{2}l(a^{3}l)-ki^{2}m′i^2-a^3. 1. Alchemy. [B.] 2. A powder made from basilicon. [Ruland (D, 83).]

ALKIN, n. 1. An alchemical term for potash ("cinis clavellatus"). [B, 50.] 2. Coal-smoke. [B, 87.]

ALKI PLUMBI (Lat.), n. n. A^{2}l(a^{3}l)′ki^2 plu^{3}m(plu^{4}m)′bi(be). An old term for acetate of lead. [D, 107.]

ALKIR, n. See ALKIN.

ALKITRAM, ALKITRAN, n's. See ALCHITRAN.

ALKITRUM (Lat.), n. n. A^{2}l(a^{3}l)′ki^{2}t-ru^{3}m(ru^{4}m). See ALCHITRAN.

ALKOEL, n. For deriv., see ALCOHOL. 1. A kind of fine lead ore. 2. Lapis lazuli. 3. Antimony. [B, 200 ; Ruland (D, 83).]

ALKOFOL, n. See ALCOHOL.

ALKOHOL (Ger.), n. A^{3}l′ko-ho^{2}l. Alcohol. The same form is occasionally used in Latin and English. [B.]—**Absoluter a.** Absolute alcohol. [B.]—**A'äther.** Acetone ; so called because supposed to be intermediate in constitution between an alcohol and an ether. [B, 78.] Cf. MESITE.—**A'amblyopie.** Alcoholic amblyopia. [D.]—**A'artig.** Alcoholic. [D.]—**A'dyscrasie.** Alcoholic dyscrasia ; chronic alcoholism. [B ; D.]—**A'haltig.** Alcoholic. [D.]—**A'messer.** Alcoholometer. [D, 129.]—**A'säuren.** The group of fatty acids (acetic acid, propionic acid, etc.) derived from the alcohol radicles. [B, 165.]—**A'vergiftung.** Poisoning by alcohol. [D, 12.]—**A'ydrolyton** (Lat.). See COHOLYDROLYTON.—**Aromatischer A.** See *Aromatic* ALCOHOL.—**Destillirter A.** Distilled alcohol. [B.]—**Dibasischer A., Dihydrischer A.** Dihydric alcohol. [B.] See *Diatomic* ALCOHOL.—**Diprimärer A.** See *Diprimary* ALCOHOL.—**Disekundärer A.** See *Disecondary* ALCOHOL.—**Ditertiärer A.** See *Ditertiary* ALCOHOL.—**Dreiatomiger A., Dreibasischer A., Dreiwerthiger A.** Triatomic, tribasic, and triacid alcohol [B.] See *Triatomic* ALCOHOL.—**Einatomiger A., Einbasischer A., Einwerthiger A.** Monatomic, monobasic, and monacid alcohol. [B.] See *Monatomic* ALCOHOL. **Essiga'.** Alcohol aceti ; acetic acid. [B.]—**Fünfatomiger A., Fünfbasischer A.** Pentatomic, pentabasic alcohol. [B.] See *Pentatomic* ALCOHOL.—**Gewöhnlicher A.** Ordinary alcohol. [B.] See ETHYL ALCOHOL.—**Hexabasischer A., Hexahydrischer A.** Hexabasic, hexahydric alcohol. [B.] See *Hexatomic* ALCOHOL.—**Kaustischer A.** See *Caustic* ALCOHOL.—**Krystallisationsa'.** See ALCOHOL *of crystallization.*—**Mehratomiger A., Mehrbasischer A., Mehrwerthiger A.** Polyatomic, polybasic alcohol. [B.] See *Polyatomic* ALCOHOL.—**Monobasischer A., Monohydrischer A.** Monobasic, monohydric alcohol. [B.] See *Monatomic* ALCOHOL.—**Normaler A.** See *Normal* ALCOHOL.—**Pentabasischer A., Pentahydrischer A.** Pentabasic, pentahydric alcohol. [B.] See *Pentatomic* ALCOHOL.—**Polyatomiger A., Polybasischer A., Polyhydrischer A.** Polyatomic, polybasic, and polyhydric alcohol. [B.] See *Polyatomic* ALCOHOL.—**Primärer A.** See *Primary* ALCOHOL.—**Primär-sekundärer A.** See *Primary-secondary* ALCOHOL.—**Primär-tertiärer A.** See *Primary-tertiary* ALCOHOL.—**Pseudoa'.** See *Pseudo-*ALCOHOL.—**Rectificirter A.** Rectified spirit. [B.]—**Schwefela'.** See *Alcohol* SULPHURIS.—**Sechsatomiger A., Sechsbasischer A., Sechswerthiger A.** Hexatomic, hexabasic, and hexacid alcohol. [B.] See *Hexatomic* ALCOHOL.—**Sekundärer A.** See *Secondary* ALCOHOL.—**Sekundär-tertiärer A.** See *Secondary-tertiary* ALCOHOL.—**Tertiärer A.** See *Tertiary* ALCOHOL.—**Tetrabasischer A., Tetrahydrischer A.** Tetrabasic, tetrahydric alcohol. [B.] See *Tetratomic* ALCOHOL.—**Thioa'.** See *Thio-*ALCOHOL.—**Tribasischer A., Trihydrischer A.** Tribasic, trihydric alcohol. [B.] See *Triatomic* ALCOHOL.—**Verdünnter A.** Dilute alcohol. [B.]—**Vieratomiger A., Vierbasischer A., Vierwerthiger A.** Tetratomic, tetrabasic, and tetracid alcohol. [B.] See *Tetratomic* ALCOHOL.—**Wasserfreier A.** Absolute alcohol. [B.]—**Wässeriger A.** Aqueous (dilute) alcohol. [B.]

ALKOHOLAT (Ger.), n. A^{3}l′ko-ho^{2}l-a^{3}t. Alcoholate.

ALKOHOLATUR (Ger.), n. A^{3}l-ko-ho^{2}l-a^3-tur′. See ALCOOLATURE.

ALKOHOLIC, adj. A^{2}l-ko-ho^{2}l′i^{2}k. See ALCOHOLIC.

ALKOHOLISATION (Ger.), n. A^{3}l-ko-ho^{2}l-i^2-za^{3}tz-i^2-on′. Alcoholization. [D, 12.]

ALKOHOLISCH (Ger.), adj. A^{3}l-ko-ho^{2}l′i^{2}sh. Alcoholic.

ALKOHOLISIREN (Ger.), v. tr. A^{3}l-ko-ho^{2}l-i^{2}z-er′e^{2}n. To alcoholize. [D, 77.]

ALKOHOLISIRUNG (Ger.), n. A^{3}l-ko-ho^{2}l-i^{2}z-er′ung. Alcoholization. [D, 77.]

ALKOHOLISMUS (Lat.), n. m. See ALCOHOLISMUS.

ALKOHOLIST (Ger.), n. A^{3}l-ko-ho^{2}l-i^{2}st′. One suffering from alcoholism. [Fürstner (B, 137).]

ALKOHOLOMETER (Ger.), n. A^{3}l-ko-ho^{2}l-o^{2}m-at′e^{2}r. Alcoholometer. [D.]

ALKOHOLOMETRIE (Ger.), n. A^{3}l-ko-ho^{2}l-o^2-me^{2}t′re. Alcoholometry.

ALKOHOLOMETRISCH (Ger.), adj. A^{3}l-ko-ho^{2}l-o-me^{2}t′-ri^{2}sh. Alcoometrical. [B.]

ALKOL, n. A^{2}l′ko^{2}l. 1. An old name for alcohol. 2. Also tartar. 3. The essence or inmost part of anything. "Purior substantia rei, segregata ab impuritate sua." [Theophrastus (B, 50).]

ALKOOL, n. See Alcohol (2d def.).

ALKOOLISER (Fr.), v. tr. See Alcooliser.

ALKOOSHI (Bengali), n. *Mucuna pruriens.* [B, 172.]

ALKOPHYRE, n. A^{2}l′ko-fir. See Alcophyre.

ALKORNIN (Ger.), n. A^{3}l-ko^{2}rn-en′. See Alcornin.

ALKORNOKRINDE (Ger.), n. A^{3}l-kor′no^{2}k-ri^{2}n-de^2. Alcornoque bark. [D.]

ALKOSOR, n. An alchemical term for camphor. [B, 50.]

ALKOUBA (Ar.), n. Eczema. [G.]

ÁLKUSI (Bengali), n. See Alkooshi.

ALKY, n. See Alki plumbi.

ALKYL, n. A^{2}l′ki^{2}l. Ger., *Alkyl.* The radicle of a monatomic alcohol; a hydrocarbon, like ethyl, methyl, etc., of the general formula C_nH_{2n+1}, which by combination with hydroxyl produces an alcohol. [B, 4.]—**A. allophanate.** Ger., *Alkylallophanat.* Syn.: *allophanic ether.* A compound of an a. with allophanic acid, of the general formula $NH_2-CO-NH-CO-O.C_nH_{2n+1}$. [B, 4.] See Ethyl *allophanate*, etc.—**A'amine.** See the major list. —**A. arsenate.** Ger., *Alkylarseniat.* A compound of an a. with arsenic acid, of the formula $As.O_4H_2.C_nH_{2n+1}$ (dihydric alkylic or monalkylic arsenates), $AsO_4H.(C_nH_{2n+1})_2$ (hydric dialkylic arsenates), $AsO_4.(C_nH_{2n+1})_3$ (trialkylic arsenates). [B, 4.]—**A. arsenite.** Ger., *Alkylarsenit.* A compound of an a. with arsenious acid. Such compounds have the formulæ $AsO_3H_2.C_nH_{2n+1}$ (monalkylic arsenites), $AsO_3H.(C_nH_{2n+1})_2$ (dialkylic arsenites), and $AsO_3.(C_nH_{2n+1})_3$ (trialkylic arsenites). [B, 4.]—**A'arsine.** Ger., *Alkylarsin.* An arsine in which an a. replaces hydrogen. These compounds resemble in structure the alkylamines, and are similarly designated as *primary*, *secondary*, and *tertiary*, according as 1, 2, or 3 atoms of hydrogen are replaced by an a. [B. 4.]—**A. borate.** Ger., *Alkylborat.* A compound of an a. with boric acid. See Ethyl *borate*, Methyl *borate.*—**A. bromide.** Ger., *Alkylbromür.* A compound of an a. with bromine, having the general formula $C_nH_{2n+1}.Br$. [B, 4.]—**A. carbamate.** Ger., *Alkylcarbamat.* A compound of an a. with carbamic acid. [B.] See Urethane.—**A. carbonate.** Ger., *Alkylcarbonat.* A compound of an a. with carbonic acid. Such compounds have the general formulæ $CO_4.(C_nH_{2n+1})_4$ (tetralkylic carbonates), $CO_3.(C_nH_{2n+1})_2$ (dialkylic carbonates), and $CO_3.R'(C_nH_{2n+1})$ (metallic alkylic carbonates). [B, 4.]—**A. chloride.** Ger., *Alkylchlorür.* A compound of an a. with chlorine, of the general formula $C_nH_{2n+1}.Cl$. [B, 4.]—**A'cyanamide.** Ger., *Alkylcyanamid.* A cyanamide in which an a. replaces hydrogen; a body of the constitution $(C\equiv N)-N(C_nH_{2n+1})H$. [B, 4.]—**A. cyanate.** Ger., *Alkylcyanat.* A compound of an a. with cyanic acid, having the formula $(C\equiv N)-O.C_nH_{2n+1}$. [B, 4.]—**A. cyanide.** Ger., *Alkylcyanür.* A compound of an a. with cyanogen. [B.] See Acidyl nitrile.—**A. cyanurate.** Ger., *Alkylcyanurat.* A compound of an a. with cyanuric acid, having the general formula $C_3N_3(O.C_nH_{2n+1})_3$. [B, 4.]—**A'guanidine.** Ger., *Alkylguanidin.* A compound in which one or more hydrogen atoms in guanidine are replaced by an a. [B. 4.]—**A. haloid.** Ger., *Alkylhaloïd.* A compound of an a. with a haloid. [B, 4.] See *A. bromide*, *A. chloride*, and *A. iodide.*—**A'harnstoff** (Ger.). See *A'urea.*—**A. hydrate.** Ger., *Alkylhydrat.* See Alcohol.—**A. hydrazine.** Ger., *Alkylhydrazin.* A compound of an a. with the body NH_2-NH_2. These bodies may be either *primary*, having the constitution $NH_2-NH.C_nH_{2n+1}$, or *secondary* and having the formula $NH_2-N.(C_nH_{2n+1})_2$ (*unsymmetrical hydrazines*), or $NH(C_nH_{2n+1})-NH(C_nH_{2n+1})$ (*symmetrical hydrazines*). [B, 4.] See Hydrazine. —**A. iodide.** Ger., *Alkyliodür.* A compound of an a. with iodine, having the constitution $C_nH_{2n+1}.I$. [B. 4.]—**A. isocyanate.** Ger., *Alkylisocyanat.* See *A. pseudocyanate.*—**A. isocyanide.** Ger., *Alkylisocyanür.* A compound of an a. with isocyanogen, having the formula, isomeric with that of the a. cyanides, $C\equiv N-C_nH_{2n+1}$. [B, 4.]—**A. isocyanurate.** Ger., *Alkylisocyanurat.* A compound of an a. with isocyanuric acid. [B, 4.]—**A. isosulphocyanate, A. isothiocyanate.** Ger., *Alkylisosulfocyanat*, *Alkylisothiocyanat.* A. mustard-oil. A compound, isomeric with the corresponding a. thiocyanate, having the constitution $S=C=N-C_nH_{2n+1}$. [B, 4.]—**A'jodür** (Ger.). See *A. iodide.*—**A. metaborate.** Ger., *Alkylmetaborat.* A compound of an a. with metaboric acid. [B, 4.]—**A. mustard-oil.** Ger., *Alkylsenföl.* See *A. isothiocyanate.*—**A. nitrate.** Ger., *Alkylnitrat.* A compound of an a. with nitric acid, of the general formula $C_nH_{2n+1}.NO_3$. [B, 4.] Cf. Ethyl *nitrate.* —**A. nitrite.** Ger., *Alkylnitrit.* A compound of an a. with nitrous acid, having the constitution $C_nH_{2n+1}.NO_2$. [B, 4.] Cf. Ethyl *nitrite.* —**A. orthoborate.** Ger., *Alkylorthoborat.* A compound of an a. with orthoboric acid. [B, 4.] See Ethyl *borate.*—**A. orthophosphate.** Ger., *Alkylorthophosphat.* A compound of an a. with orthophosphoric acid. See *A. phosphate.*—**A. oxide.** Ger., *Alkyloxyd.* A compound of an a. and oxygen; a simple ether. [B, 4.] See Ether.—**A. persulphide.** Ger., *Alkylpersulfid.* A compound of an a. with an excess of sulphur; a body having the constitution $(C_nH_{2n+1})_2S_2$. [B, 4.]—**A. phosphate.** Ger., *Alkylphosphat.* A compound of an a. with phosphoric acid. Such compounds are constituted and named like the analogous a. arsenates. [B, 4.]—**A'phosphine.** Ger., *Alkylphosphin.* A phosphine in which an a. replaces hydrogen. These compounds resemble in structure the alkylamines, and are similarly designated as *primary*, *secondary*, and *tertiary*, according as 1, 2, or 3 atoms of hydrogen are thus replaced. [B, 4.]—**A. phosphite.** Ger., *Alkylphosphit.* A compound of an a. with phosphorous acid. Such compounds are constituted and named like the analogous a. arsenites. [B, 4.]—**A. pseudocyanate.** Ger., *Alkylpseudocyanat.* A compound of an a. with isocyanic (pseudocyanic) acid, having the general formula $O=C=N.C_nH_{2n+1}$, and isomeric with the corresponding cyanate. [B, 4.]—**A. pseudothiocyanate.** See *A. isothiocyanate.* —**A'schwefelsäure** (Ger.). See *A'sulphuric acid.*—**A'senföl** (Ger.). A. mustard-oil. [B.] See *A. isothiocyanate.*—**A. silicate.** Ger., *Alkylsilicat.* A compound of an a. with silicic acid. [B, 4.]—**A'stibine.** Ger., *Alkylstibin.* A stibine in which an a. replaces hydrogen. These stibines resemble the alkylamines in structure and are similarly designated as *primary*, *secondary* and *tertiary*, according as 1, 2, or 3 atoms of hydrogen are replaced. [B, 4.]—**A'sulfat, A'sulfhydrat, A'sulfin, A'sulfinsäure, A'sulfit, A'sulfocyanat, A'sulfonsäure, A'sulfür** (Ger.). See *A. sulphate*, *A. sulphydrate*, *A'sulphine*, *A'sulphinic acid*, *A. sulphite*, *A. sulphocyanate*, *A'sulphonic acid*, *A. sulphide.*—**A. sulphate.** Ger., *Alkylsulfat.* A compound of an a. with sulphuric acid, having the general formula $(C_nH_{2n+1})_2SO_4$ (normal sulphates), or $C_nH_{2n+1}.HSO_4$ (*acid* or *hydric a. sulphates*, *alkylsulphuric acids*). [B, 4.]—**A. sulphide.** Ger., *Alkylsulfür*, *Alkylsulfid.* Syn.: *thioether.* A compound of an a. with sulphur, having the general formula $(C_nN_{2n+1})_2S$, or that of an ether in which sulphur replaces oxygen. [B, 4.]—**A'sulphine.** Ger., *Alkylsulfin.* A trivalent radicle formed by the union of 3 molecules of an alkyl with sulphur, $(C_nH_{2n+1})_3S'$. [B, 4.]—**A'sulphinic acid.** Ger., *Alkylsulfinsäure.* A sulphinic acid of the general formula $C_nH_{2n+1}.SO.OH$. [B, 4.]—**A. sulphite.** Ger., *Alkylsulfit.* A compound of an a. with sulphurous acid, having in general the formula $(C_nH_{2n+1})_2.SO_3$. [B, 4.]—**A. sulphocyanate.** Ger., *Alkylsulfocyanat.* See *A. thiocyanate.*—**A'sulphonic acid.** Ger., *Alkylsulfonsäure.* A sulphonic acid of the composition $C_nH_{2n+1}.SO_2.OH$. [B, 4.]—**A'sulphurea.** See *A'thiourea.*—**A'sulphuric acid.** Ger., *Alkylschwefelsäure.* The acid a. sulphates, so called because they act like monobasic acids. [B, 4.] Cf. Ethylsulphuric acid and Ethyl *sulphate.*—**A. sulphydrate.** Ger., *Alkylsulfhydrat.* A mercaptan. [B, 4.]—**A. thiocyanate.** Ger., *Alkylthiocyanat.* A compound of an a. with thiocyanic acid, having the general formula $N\equiv C-S-C_nH_{2n+1}$. [B, 4.]—**A'thiourea.** Ger., *Alkylthioharnstoff.* Thiourea in which 1 or 2 atoms of hydrogen are replaced by an a. [B, 4.]—**A'urea.** Ger., *Alkylharnstoff.* A compound consisting of urea in which 1, 2, or 3 atoms of hydrogen are replaced by an a. [B, 4.]

ALKYLAMINE, n. A^{2}l-ki^{2}l′a^{2}m-i^{2}n. From *alkyl* and *amine.* Ger., *Alkylamin.* A body having the constitution of ammonia in which an alkyl replaces hydrogen. The a's are designated, according as 1, 2, or 3 atoms of hydrogen are thus replaced, as *primary* a's (*monalkylamines*, a's of the general formula $NH_2.C_nH_{2n+1}$); *secondary* a's (*dialkylamines*, a's of the general formula $NH(C_nH_{2n+1})(C_pH_{2p+1})$); and *tertiary* a's (*trialkylamines*, a's of the general formula $N(C_nH_{2n+1})(C_pH_{2p+1})(C_qH_{2q+1})$). [B, 4.] Cf. also Tetralkylammonium.

ALKYLATE, n. A^{2}l′ki^{2}l-at. Ger., *Alkylat.* A compound derived from a monatomic alcohol by the substitution of a metal for the hydroxylic hydrogen. The general formula of the a's is $(C_nH_{2n+1}O.)_pR$. where R is a radicle the quantivalence of which is *p*. [B, 4.] See Ethylate and Methylate.

ALKYLENE, n. A^{2}l′ki^{2}l-en. Ger., *Alkylen.* A hydrocarbon of the general formula $C_nH_{2n+1}.CH=CH_2$, which in composition acts as a bivalent radicle, $C_nH_{2n+1}.CH'-CH'_2$. [B, 4.] See Ethylene, Methylene, etc.

ALKYLIC, adj. A^{2}l-ki^{2}l′i^{2}k. Of or pertaining to an alkyl. [B, 4.]

ALKYLIDENE, n. A^{2}l-ki^{2}l′i^{2}d-en. Ger., *Alkyliden.* A bivalent hydrocarbon radicle of the general formula $C_nH_{2n+1}.CH_2.-CH''$. [B, 4.] See Ethylidene, etc.

ALKYMIA (Lat.), n. f. A^{2}l(a^{3}l)-ki^{2}m(ku^{6}m)-i(e)′a^3. See Alkimia (2d def.).

ALKYMISTRE, n. A^{2}l′ki^{2}m-i^{2}str. An alchemist. [D, 90.]

ALKY PLUMBI (Lat.), n. See Alki plumbi.

ALKYTRAN, n. See Alchytran.

ALLA (Lat.), n. f. A^{2}l(a^{3}l)′la^3. Ale. [D, 107.]

ALLABE, n. See Alabe.

ALLABOR, n. See Alabari.

ALLABROT, n. A sort of fictitious salt. [D, 107.]

ALLÆANTHUS (Lat.), n. m. A^{2}l(a^{3}l)-le(la^3-e^2)-a^{2}n(a^{3}n)′thu^{3}s-(thu^{4}s). Fr., *allœanthe.* A genus of artocarpaceous plants, resembling *Maclura*, established by Thwaites. [B, 121, 170.]—**A. zeylanicus** [Thwaites]. *Allandoa*, *alandoo-gaha.* A tree, with milky juice, found in Ceylon, from the liber of which paper and sacking are made. [B, 121; D, 79.]

ALLA-GALLI-GHEETSA (Teloogoo), n. The *Crotalaria verrucosa.* [B, 172.]

ALLAGE (Lat.), n. f. A^{2}l(a^{3}l)′a^2(a^3)-je(ga). Gen., *al′lages.* From ἀλλαγή, change. See Allaxis.

ALLAGOSTEMON (Lat.), adj. and n. m. A^{2}l(a^{3}l)-la^{2}g(la^{3}g)-oste(sta)′mo^{2}n. Gen., *allagoste′monis.* From ἀλλαγή, change, and στήμων, a filament. Fr., *allagostémone.* A term invented by Mönch to designate flowers in which the stamens are alternately arranged opposite to the sepals and the petals. [B, 121; D, 11.]

ALLAITANT (Fr.), part. of *allaiter.* A^{3}l-la-ta^{3}n^2. Giving milk; in the condition of lactation. [D, 10.]

ALLAITÉ (Fr.), adj. A^{3}l-la-ta. Suckled; nourished with milk. [D, 10.]

ALLAITEMENT (Fr.), n. A^{3}l-lat-ma^{3}n^2. The act of suckling; nourishment by suckling. [D, 10.]—**A. animal.** Suckling which is accomplished by recourse to the udder of an animal, as of a goat or ass. [D, 11.]—**A. artificiel.** It., *allattamento artificiale.* The feeding of a suckling infant with cow's-milk or some food preparation administered in a bottle or in other ways. [D, 11.]—**A. étranger.** It., *allattamento straniero.* Suckling performed by a wom-

an who is not the mother of the child suckled. [D, 11.]—**A. maternel.** It., *allattamento materno.* Suckling performed by the mother of the child suckled. [D, 11.]—**A. mixte.** It., *allattamento misto.* Suckling by the mother, or a wet nurse, combined with nourishment by artificial means. [D, 11.]—**A. par adoption.** It., *allattamento per adozione.* The same as *A. étranger*, but applied to animals. [D, 11.]

ALLAITER (Fr.), v. tr. A^{3}l-la-ta. To nurse ; to give suck to.

ALLAMANDA (Lat.), n. f. A^{2}l(a^{3}l)-la^{2}m(la^{3}m)-a^{2}n(a^{3}n)′da^3. Fr., *allamande.* A Linnæan genus of South American apocynaceous shrubs, having a unilocular ovary with 2 parietal placentæ and a capsular fruit dehiscing by 2 valves. The species have decided purgative and frequently emetic properties, and are used by the natives, in decoction, for different sorts of colic. [B, 19, 121, 180 ; D, 92.]—**A. angustifolia** [Pohl]. A Brazilian species. [B, 180.]—**A. Aubletii** [Pohl]. Syn.: *Aurelia grandiflora* [Aublet]. A species growing in Guiana and on the banks of the Orinoco, with oblong-ovate acuminate leaves. [B, 71, 180.]—**A. cathartica.** 1. Of Linnæus, the *A. Linnæi.* 2. Of Schrader, the *A. Schottii.* 3. Of other authors, the *A. Aubletii.* [B, 180.]—**A. grandiflora** [Lamarck]. The *A. Linnæi.* [B, 180.]—**A. Linnæi** [Pohl]. A species found in the West Indies and in South America, with subsessile ovate-oblong leaves and yellow flowers in villous fascicles. [B, 71, 180.]—**A. œnotheræfolia** [Pohl]. A Brazilian species. [B, 180.]—**A. Schotii** [Pohl]. A species growing near Rio de Janeiro, with oblong-acuminate sessile leaves. [B, 71, 180.]

ALLAMANDEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-la^3-ma^{2}n(ma^{3}n)′de^2-e(a^3-e^2). Fr., *allamandées.* 1. A subdivision of the *Apocyneæ*, made by Reichenbach, comprising the genera *Allamanda* and *Aspidosperma.* 2. A sub-order [Endlicher] or tribe [De Candolle] of the *Apocyneæ*, comprising the single genus *Allamanda.* [B, 121, 170.]

ALLAMANDIEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-la^3-ma^{2}n(ma^{3}n)-di(de)′e^2-e(a^3-e^2). A tribe of the *Apocyneæ*, made by G. Don, corresponding to *Allamandeæ* (1st def.). [B, 170.]

ALLANATE, n. A^{2}l′a^{2}n-at. Fr., *allanate.* A salt of allanic acid. [B.]

ALLANDOA, ALLANDOO-GAHA, n's. Ceylon names for the *Allœanthus zeylanicus.* [B, 121.]

ALLANIC ACID, n. A^2-a^{2}n′i^{2}k. For deriv., see Allantois. Fr., *acide allanique.* A monobasic crystalline acid, of the constitution $C_4H_6N_6O_6$, produced by the action of nitric acid upon allantoin. [B, 2.]

ALLANTIASIS (Lat.), n. f. A^{2}l(a^{3}l)-la^{2}n(la^{3}n)-ti^2-a(a^3)′si^{2}s. Gen., *allantias′eos* (*-sis*). From ἀλλᾶς, a sausage. Ger., *Wurstvergiftung.* Syn.: *botulismus.* A morbid condition produced by eating unwholesome sausages. It is characterized by constipation, nausea, vomiting, dizziness, imperfect vision, muscular prostration, and enfeeblement of the circulation, and is frequently fatal. It is often observed in southwestern Germany, especially in Baden and Würtemberg. [D, 9, 18, 66.]

ALLANTIS (Lat.), n. f. A^{2}l(a^{3}l)-la^{2}n(la^{3}n)′ti^{2}s. Gen., *allan′tidis.* See Allantois.

ALLANTOATE, n. A^{2}l-a^{2}n′to-at. For deriv., see Allantois. Lat., *allantodas, sal allantodicus.* Fr., *allantoate.* Ger., *Allantoat, allantoïnsaures Salz.* A salt of allantoic acid. [D.]

ALLANTODES (Lat.), n. f. A^{2}l(a^{3}l)-la^{2}n(la^{3}n)-to′dez(de^{2}s). Gen., *allanto′deos* (*-eis*). From ἀλλαντοειδής, sausage-like. 1. A sausage. 2. The allantois. 3. The great toe. [B, 87 ; D, 80.]

ALLANTODICUS (Lat.), adj. A^{2}l(a^{3}l)-la^{2}n(la^{3}n)-to^{2}d′i^{2}k-u^{3}s-(u^{4}s). Allantoic. [D, 80.] See Sal *a.*

ALLANTOIC, adj. A^{2}l-a^{2}n-to′i^{2}k. For deriv., see Allantois. Lat., *allantodicus, allantoicus.* Fr., *allantoïque.* Ger., *allantoïsch.* It., *allantoico.* Sp., *alantóico.* Of, pertaining to, or derived from the allantois. [A.]—**A. acid.** Lat., *acidum allantoicum* (seu *allantodicum*). Fr., *acide allantoïque.* Ger., *Allantoinsäure.* It., *acido allantoico.* Sp., *ácido alantóico.* A name at first given to allantoine under the supposition that it was a true acid ; now applied to a monobasic crystalline acid of the composition $C_4H_8N_4O_4$, derived from allantoine by the addition of the elements of a molecule of water. [B, 3.]—**A. fluid.** Lat., *liquor amnii spurius.* Fr., *liquide allantoïdien.* Ger., *falsches Fruchtwasser, allantoïsche Flüssigkeit.* It., *liquido allantoideo.* The fluid contained in the sac of the allantois, representing the oxidation products formed by the Wolffian bodies. As obtained from the embryo of the horse it is a turbid, yellowish, milky liquid, containing peculiar bodies called *hippomanes.* The a. fluid of the cow contains albumin, lactic acid, sugar, salts of calcium, potassium, and sodium, iron, urea, urates, and allantoin. [B, 108, 125.]—**A. vessels.** Balfour's name for the umbilical vessels. [A. Thomson (A, 5).]

ALLANTOID, adj. and n. A^{2}l-a^{2}n′toid, a^{2}l′a^{2}n-toid. Gr., ἀλλαντοειδής. Lat., *allantoides, allantodes.* Fr., *allantoïde.* Ger., *allantoïd.* It., *allantoideo.* Sp., *alantóideo.* 1. Pertaining to the allantois. 2. (N.) the allantois.—**A. animals.** See Allantoidea.—**A. circulation.** See under Circulation.—**A. liquid.** See Allantoic *fluid.*—**A. membrane, A. vesicle.** See Allantois.—**A. vessels.** See Allantoic *vessels.*

ALLANTOIDEA (Lat.), n. f. A^{2}l(a^{3}l)-la^{2}n(la^{3}n)-to-i^{2}d′e^2-a^3. Fem. of adj. *allantoideus* (*tunica* understood). The allantois. [B, 78.]

ALLANTOIDEA (Lat.), n. n. pl. A^{2}l(a^{3}l)-la^{2}n(la^{3}n)-to-i^{2}d′e^2-a^3. Neut. pl. of adj. *allantoideus* (*animalia* understood). A subdivision of vertebrate animals comprising all those in which the fœtus is supplied with an allantois. It includes the classes *Reptilia, Aves,* and *Mammalia*, and is thus co-ordinate with the division *Amniota.* [B, 28.]

ALLANTOIDES (Lat.), adj. and n. f. A^{2}l(a^{3}l)-a^{2}n(a^{3}n)-to-i(e)′dez(de^{2}s). 1. (Adj.) allantoid. 2. (N.) the allantois. 3. A sausage. 4. The great toe. [B, 87 ; D, 80.]

ALLANTOINE, n. A^{2}l-a^{2}n′to-i^{2}n. Lat., *allantoina.* Fr., *allantoïne.* Ger., *Allantoïn.* It., Sp., *allantoina.* Syn.: *allantoic* (or *amniotic*) *acid.* A colorless crystalline body found in the allantoic fluid of the cow, in the urine of new-born children, and occasionally in the urine of adults, especially after the ingestion of tannic or uric acid, and in some pathological conditions. It has also been discovered in the young leaves of the plane-tree. Artificially it may be produced from uric acid by the action of water and peroxide of lead. It acts like an acid, forming salts with metallic oxides, and like a base, combining with acids. Formula: $C_4H_6N_4O_3 = CO\left\langle\begin{matrix}NH-CH-NH\\NH-CO \quad NH_2\end{matrix}\right\rangle CO$. [B, 2, 3.]—**A. nitrate.** Fr., *azotate d'allantoïne.* Ger., *salpetersaures Allantoïn.* A compound of a. with nitric acid, of the constitution $C_4H_6N_4O_3.HNO_3$. [B, 2.]

ALLANTOÏQUE (Fr.), adj. A^{3}l-la^{3}n-to-ek. See Allantoic.

ALLANTOIS (Lat.), n. f. A^{2}l(a^{3}l)-la^{2}n(la^{3}n)′to-i^{2}s. Gen., *allanto′idis.* From ἀλλᾶς, a sausage, and εἶδος, likeness. Gr., ἀλλαντοειδής, ὑμήν (χιτὼν) ἀλλαντοειδής. Lat., *allantoides, tunica farciminalis* (seu *farcimalis*), *membrana farciminosa.* Fr., *allantoïde.* Ger., *Allantoïs, Harnsack, Wursthäutchen.* It., *allantoide.* Sp., *alantóides.* The urinary vesicle of the embryo ; a flask-like diverticulum, connected with the intestine by a narrow pedicle, situated in the space between the umbilical vesicle, the amnion, and the subzonal membrane. It is found only in the *Amniota* (*allantoidea*). A dilatation of its pedicle ultimately forms the urinary bladder, and its vascular portion gives rise to the umbilical cord and the fœtal elements of the placenta. [A. Thomson (A, 5) ; A, 11.] See figure under *Fœtal* envelopes.—**A'flüssigkeit** (Ger.). See Allantoic *fluid.*—**A'höcken** (Ger.). Gasser's term for a thickening of the anterior wall of the a. which appears in the chicken-embryo in the latter part of the third day.—**A'höhle** (Ger.). See *Sac of the a.*—**A'stiel.** See *Pedicle of the a.*—**A'wulst** (Ger.). A thickened bulging portion of the visceral mesoblast, being a thick mass of cells at the posterior extremity of the embryo, which is the first rudiment of the allantois and contains a small diverticulum coming from the rectum, which is the beginning of the cavity of the allantois. [H.]—**Diverticulum allantoidis.** See under Diverticulum.—**Sac of the a.** Ger., *Allantoishöhle.* That portion of the original a. which remains outside the abdominal wall after the urinary bladder has been formed from another portion.—**Vascular layer of the a.** The mesoblastic or outer layer of the a., which lines the interior of the chorion. [A. Thomson (A, 5).]

ALLANTOÏSCH (Ger.), adj. A^{3}l-la^{3}nt′o-i^{2}sh. See Allantoic.

ALLANTOTOXICON, ALLANTOTOXICUM (Lat.), n's n. A^{2}l(a^{3}l)-la^{2}n(la^{3}n)-to-to^{2}x′i^{2}k-o^{2}n, -u^{3}m(u^{4}m). From ἀλλᾶς, a sausage, and τοξικόν, poison. Ger., *Wurstgift.* A poisonous principle sometimes found in sausages. [B, 78 ; D, 12.] Cf. Allantiasis and Botulinic acid.

ALLANTURIC ACID, n. A^{2}l-a^{2}n-tu^2′ri^{2}k. From *allantoine* and *uric.* Fr., *acide allanturique.* Ger., *Allantursäure.* It., *acido allanturico.* Sp., *ácido alantúrico.* A white, gummy, deliquescent substance, of slightly acid reaction, obtained by the action of nitric and hydrochloric acids and lead peroxide upon allantoin, and of nitric acid and chlorine upon uric acid ; having the constitution $C_3H_4N_2O_3$. [B, 2, 3.]

ALLARINOCH, n. Ar., *al-ânok,* lead. An old term for lead. [B ; D, 107.]

ALLASIA (Lat.), n. f. A^{2}l(a^{3}l)-la(la^3)′zi^2(si^2)-a^3. Fr., *allasie.* A Linnæan genus of cucurbitaceous plants. [B, 180 ; D, 108.]—**A. payos** [Loureiro]. A species growing in southeastern Africa, the leaves of which are applied in the form of a poultice for the relief of labor-pains and to accelerate parturition. [B, 180.]

ALLATAÏM DU HAREM (Fr.), n. A farinaceous preparation analogous to the *racahout des Arabes* (*q. v.*). [D, 126.]

ALLAXIS (Lat.), n. f. A^{2}l(a^{3}l)-la^{2}x(la^{3}x)′i^{2}s. Gen., *alax′eos* (*-xis*). From ἀλλάσσειν, to change. Syn.: *allage.* Change, metamorphosis ; the act of transformation into another state or substance, or the process of being so transformed. [B, 78.]

ALLAY, n. A^{2}l-la′. See Alloy.

ALLAY, ALLAYE, v's tr. A^{2}l-la′. See Alloy.

ALLEC (Lat.), n. n. A^{2}l(a^{3}l)′le^{2}k. Gen., *alle′cis.* See Alex.

ALLECRIM BRAHO, n. From Port., *alecrim brabo,* wild rosemary. A Brazilian name for the *Hypericum laxiusculum.* [B ; D, 90.]

ALLECTUARY, n. A^{2}l-le^{2}k′tu^2-a-ri^2. An electuary. [D, 90.]

ALLEENBAUM (Ger.), n. A^{3}l-lan′ba^3-um. *Salix alba.* [D, 75.]

ALLEEVERAY (Tamil), n. Flax (*Linum usitalissimum*). [B, 172.]

ALLEGAR, n. A^{2}l′le^2-ga^{3}r. See Ale-gar.

ALLÉGEMENT (Fr.), n. A^{3}l-lazh-ma^{3}n^2. The amelioration of a disease. [D, 137.]

ALLEGHANY MOUNTAIN SPRINGS, n. See Cresson Springs.

ALLEGHANY SPRING, n. A^{2}l-le^2-ga′ni^2. A mineral spring in Montgomery County, Virginia, containing calcium sulphate (12 grs. to the pint), magnesium sulphate (5·3 grs. to the pint), the sulphates of sodium and potassium, the carbonates of iron, manganese, magnesium, calcium, barium, strontium, and lithium, sodium chloride, small quantities of other chlorides, fluorides, nitrates, and silicates, and free carbonic acid. It is cathartic and diuretic, and has been found useful in dyspepsia and hepatic disorders. [B, 15.]

ALLEGREZZA (It.), n. A^{3}l-le^{2}g-re^{2}tz′a^3. A cold mineral

spring in Tuscany, containing carbonates and probably hydrogen sulphide. Employed in gastric and calculous affections. [D, 79.]

ALLELO, n. An Egyptian name for the *Solanum nigrum*. [D, 90.]

ALLELUCHIEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-le^{2}l-u^2(u)-ki(ke)′e^2-e(a^3-e^2). From ἀλληλοῦχος, continuous. A tribe of *Aroideæ*, established by Schott, characterized by the absence of sterile flowers and by the spadix being in part united with the spathe. [B, 121.]

ALLELUJA (Lat.), n. f. A^{2}l(a^{3}l)-le^2-lu^2(lu)′ja(ya^3). Really the interj. *a.* (= Hebr. *hallel-û-yah*), praise the Lord. Fr., *alléluia*. The wood-sorrel (*Oxalis acetosella*); so called because appearing at the time that the canticle alleluia was directed by the church to be sung. [B; D, 11, 81.]

ALLENE, n. A^{2}l-len′. For deriv., see ALLYLENE. Fr., *allène*. Ger., *Allen*. It., *allene*. A name given to an isomeric form of allylene; otherwise called isallylene or beta-allylene. [B.] See ALLYLENE.—**A. chloride.** See ALLYLENE *chloride*.

ALLENEE, n. An old name for tin. [D, 107.]

ALLENIMENTUM (Lat.), n. n. A^{2}l(a^{3}l)-le^{2}n-i^2-me^{2}n′tu^{3}m-(tu^{4}m). From *ad*, to, and *lenire*, to soothe. See ADLINIMENTUM.

ALLENTHESIS (Lat.), n. f. A^{2}l(a^{3}l)-le^{2}n′the^{2}s-i^{2}s. From ἄλλος, another, and ἔνθεσις, introduction. Fr., *allenthèse*. Ger., *Allenthese*. It., *allentesi*. A name applied by Walther to the penetration of foreign bodies into, or their presence within, the organism. [D, 11.]

ALLENTHETON, ALLENTHETUM (Lat.), n's n. A^{2}l(a^{3}l)-le^{2}n′the^{2}t-o^{2}n, -u^{3}m(u^{4}m). A foreign body within the organism. [D, 11.]

ALLENTOIS (Lat.), n. f. A^{2}l(a^{3}l)-le^{2}n′to-i^{2}s. A faulty spelling for allantois. According to Coxe, the great toe. [B, 87.]

ALLEOTIC, adj. A^{2}l-le-o^{2}t′i^{2}k. See ALLŒOTIC.

ALLERBAUM (Ger.), n. A^{3}l′le^{2}r-ba^3-um. The white poplar (*Populus alba*). [D, 75.]

ALLERHEILIGEN (Ger.), n. A^{3}l′le^{2}r-hil-i^{2}g-e^{2}n. A cold mineral spring in the canton of Soleure, Switzerland, containing carbonates and calcium sulphate; recommended in nervous affections. [D, 79.]

ALLERIM BRABO, n. See ALLECRIM BRAHO.

ALLERLEIGEWÜRZ (Ger.), n. A^{3}l′le^{2}r-li-ge^2-vu^{6}rtz. Allspice. [B, 180.] See PIMENTA.

ALLERMANNSHARNISCH (Ger.), n. A^{3}l′le^{2}r-ma^{3}ns-ha^{3}r-ni^{2}sh. *Allium victoriale*. [D, 77.]—**A'wurzel.** The root of *Allium victoriale*. [L, 30.]

ALLEVAMENTUM (Lat.), n. n. A^{2}l(a^{3}l)-le(la)-va^2(wa^3)-me^{2}n′-tu^{3}m(tu^{4}m). From *allevare*, to relieve. An alleviation or means of alleviating. [D, 78.]

ALLEVARD (Fr.), n. A^{3}l-le^2-va^{3}r. A French health resort in the department of Isère, on the confines of Savoy, at which there are two springs: 1. A sulphur spring, the water of which is applied in the form of vapor-baths and douche-baths in the treatment of gastric disorders, constipation, diarrhœa, and inflammatory conditions of the throat and lungs. 2. A cold chalybeate spring, containing calcium carbonate, recommended for the treatment of anæmia and chlorosis. [D, 18, 79.]

ALLEVIATOR, n. A^{2}l-le′vi^2-a-to^{2}r. From Lat., *allevare*, to raise up. Jenks's name for an apparatus consisting of 2 uprights with a windlass and supports of various kinds, designed for lifting invalids. [D, 2.]

ALLEX (Lat.), n. f. A^{2}l(a^{3}l)′le^{2}x. Gen., *al'licis* (1st def.), *alle'cis* (2d def.). 1. The great toe. See HALLUX. 2. See ALEX.

ALLEZANI (It.), n. A^{3}l-le^{2}tz-a^3′ne. The site of two cold chalybeate springs in Corsica. [D, 79.]

ALLFRESSEND (Ger.), adj. A^{3}l′fre^{2}s-se^{2}nd. Omnivorous. [D, 75.]

ALLFRESSER (Ger.), n. A^{3}l′fre^{2}s-se^{2}r. Pemphigus. [D, 129.]

ALL-GOOD, n. A^{4}l′gu^{4}d. Ger., *Allgut*. The *Chenopodium bonus Henricus*. [B, 19; D, 12.]

ALL-HEAL, n. A^{4}l′hel. Ger., *Allheil*. 1. A sovereign remedy; a panacea. 2. A name given to several species of plants. [D.]—**Æsculapius's a.-h.** An umbelliferous plant, formerly much vaunted as a universal remedy, apparently a species of *Ferula*. [B. 200.]—**Candy a.-h.** An umbelliferous plant obtained from Candia (Crete); apparently a species of *Ferula*. [B, 200.]—**Clown's a.-h.** The *Stachys palustris*. [B, 19.]—**Hercules's a.-h.** Lat., *panax heracleum*. The *Opopanax chironium*. [B, 19, 200.]

ALLHEILSMITTEL (Ger.), n. A^{3}l′hils-mi^{2}t-te^{2}l. A panacea. [D.]

ALLIACEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-li^2-a(a^3)′se^2(ke^2)-e(a^3-e^2). For deriv., see ALLIUM. Fr., *alliacées*. Ger., *Zwiebelpflanzen, Lauchpflanzen*. It., *agliacee*. Sp., *aliáceas*. 1. A family of plants, made by Batsch, including *Allium, Scilla, Albuca, Asphodelus*, etc. 2. A similar division made by Reichenbach, comprising *Allium, Scilla, Porrum*, etc. 3. Link's name for a tribe of *Liliaceæ* comprising the single genus *Allium*. 4. Bernhardi's name for an order (corresponding to a cohort of other systems) of Monocotyledons comprising the tribes (= orders of other systems) *Dioscorideæ, Smilaceæ, Hypoxideæ, Amaryllideæ, Asphodeleæ*, and *Juncaceæ*. [B, 170.]

ALLIACEOUS, adj. A^{2}l-i^2-a′shu^{3}s. Lat., *alliaceus*. Fr., *alliacé*. Ger., *knoblauchartig*. It., *agliaceo*. Sp., *aliáceo*. Garlicky; resembling garlic in odor or appearance.

ALLIAGE (Fr.), n. A^{3}l-li^2-a^{3}zh. An alloy. [B.]—**A. fusible.** See *Fusible* ALLOY.

ALLIAIRE (Fr.), n. A^{3}l-li^2-a^{2}r. *Alliaria*. [L.]—**A. commun.** *Sisymbrium alliaria*. [L.]

ALLIANCE, n. A^{2}l-li′a^{2}ns. From Fr., *allier*, to unite. Lat., *nixus*. Fr., *alliance*. Ger., *Allianz*. It., *allianza*. In Lindley's classification of plants, a group of related orders, corresponding to the cohort of Bentham and Hooper's classification. There are 56 a's, comprising 303 orders arranged in 7 classes (see CLASS), which are distinguished by the termination *-ales*. [B.]—**Algal a., Alismal a., Amomal a.,** etc. See ALGALES, ALISMALES, AMOMALES, etc.

ALLIAR ÆRIS (Lat.), n. n. A^{2}l(a^{3}l)′li^2-a^{3}r e′(a^3′e^2)-ri^{2}s. See *Aqua* MERCURII.

ALLIARIA (Lat.), n. f. A^{2}l(a^{3}l)-i^2-a(a^3)′ri^2-a^3. From *allium*, on account of the garlicky odor of *A. officinalis*. Fr., *alliaire*. It., *alliaria*. Sp., *aliaria*. Jack-in-the-hedge; a genus of cruciferous plants established by Adanson. [D; L.]—**A. officinalis** [Andrzej]. See SISYMBRIUM *a.*—**Herba alliariæ, Semen alliariæ.** The herb and seed of *Sisymbrium a.* (*q. v.*).

ALLIARIS, ALLIARIUM (Lat.), n's f. and n. A^{2}l(a^{3}l)-li^2-a-(a^3)′ri^{2}s, -ri^2-u^{3}m(u^{4}m). See ALLIARIA.

ALLIARIUS (Lat.), adj. A^{2}l(a^{3}l)-li^2-a(a^3)′ri^2-u^{3}s(u^{4}s). Resembling garlic. [L, 50.]

ALLIATRUM (Lat.), n. n. A^{2}l(a^{3}l)-li^2-a^{2}t(a^{3}t)′ru^{3}m(ru^{4}m). See *Acetum* ALLII.

ALLIATUM (Lat.), n. n. A^{2}l(a^{3}l)-li^2-a(a^3)′tu^{3}m(tu^{4}m). A sort of sauce prepared with garlic. [L, 48.]

ALLIATUS (Lat.), adj. A^{2}l(a^{3}l)-li^2-a(a^3)′tu^{3}s(tu^{4}s). Prepared or mixed with garlic. [L, 58.]

ALLICAR, n. A^{2}l′li^{2}k-a^{3}r. See ALE-GAR.

ALLICOL, n. A^{2}l′li^{2}k-o^{2}l. An old name for petroleum. [L, 104.]

ALLIDENE, n. A^{2}l′li^{2}d-en. From *allyl*. Fr., *allidène*. Ger., *Alliden*. A bivalent radicle, C_3H_4, found in acrolein. [B, 3.]

ALLIÉ (Fr.), adj. A^{3}l-li^2-a. Alloyed. [L, 103.]

ALLIEÆ (Lat.). n. f. pl. A^{2}l(a^{3}l)-li(le)′e^2-e(a^3-e^2). A tribe of *Asphodeleæ*, made by Kunth, comprising *Allium* and allied genera. [B, 170.]

ALLIER (Fr.), n. A^{3}l-li^2-a. The *Pyrus aria*. [B, 173.]

ALLIEZ (Fr.), n. A^{3}l-li^2-a. The *Ervum ervilia*. [L, 67.]

ALLIGAMEN (Lat.), n. n. A^{2}l(a^{3}l)-li^{2}g-a(a^3)′me^{2}n. Gen., *alligam'inis*. From *alligare*, to bind to. A bandage. [L, 63.]

ALLIGANS (Lat.), adj. A^{2}l(a^{3}l)′li^{2}g-a^{2}nz(a^{3}ns). In botany, holding fast to anything, as by a tendril. [L, 38.]

ALLIGATION, n. A^{2}l-li^{2}g-a′shu^{3}n. See ALLOY.

ALLIGATOR (Lat.), n. m. A^{2}l(a^{3}l)-li^{2}g-a(a^3)′tor. From *alligare*, to bind to (1st def.). From Sp., *el legarto*, the lizard (2d def.). Ger., *Alligator*. It., *alligatore*. 1. In botany, a part of a plant by which the latter attaches itself to any object. [B.] 2. A genus of *Reptilia* usually referred to the genus *Crocodilus*. [B.]—**A'birne** (Ger.). The a. pear. See PERSEA *gratissima*.—**A. forceps.** See under FORCEPS.—**A. sinensis.** The Chinese a. The scales are used by the Chinese in the treatment of syphilis. [L, 75.]

ALLIGATURA (Lat.), n. f. A^{2}l(a^{3}l)-li^{2}g-a^3-tu^2(tu)′ra^3. Fr., *alligature*. A term used by Scribonius Largus to denote a bandage or ligature; also the act of ligation or binding up. [L, 53.]

ALLIGIREN (Ger.), v. tr. A^{3}l-li^{2}g-er′e^{2}n. To alloy. [L, 46.]

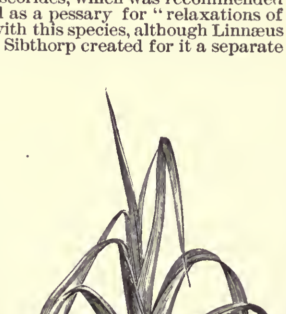
ALLINERE (Lat.), v. tr. A^{2}l(a^{3}l)-li^{2}n′e^{2}r-e^2. To anoint. [L, 58.]

ALLIONIA (Lat.), n. f. A^{2}l(a^{3}l)-li^2-o′ni^2-a^3. From Allioni, an Italian botanist. Fr., *allione*. A genus of nyctaginaceous plants, natives of Central America. [L, 67.]

ALLIONIACEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-li^2-o^{2}n-i^2-a(a^3)′se^2(ke^2)-e(a^3-e^2). 1. Of Reichenbach, a division of the order *Nyctagineæ*, comprising *Allionia* and allied genera. 2. Of other authors, the order *Nyctagineæ*. [B, 170.]

ALLIONIEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-li^2-o^{2}n-i(e)′e^2-e(a^3-e^2). See ALLIONIACEÆ (1st def.).

ALLIOPORRUM (Lat.), n. n. A^{2}l(a^{3}l)-li^2-o-po^{2}r′ru^{3}m(ru^{4}m). From *allium* and *porrum*. An old name for *Allium scorodoprasum*. [L, 63.]



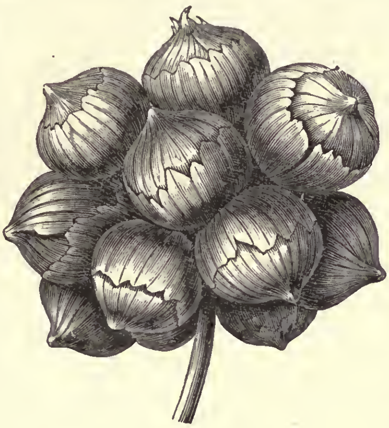
ALLIOTIC, adj. and n. A^{2}l-li^2-o^{2}t′i^{2}k. See ALLŒOTIC and ALLŒOTICS.

ALLITURATE, n. A^{2}l-li^{2}t′u^2-rat. Fr., *alliturate*. Ger., *Allitarat*. A salt of allituric acid.

ALLITURIC ACID, n. A^{2}l-li^{2}t-u^2′ri^{2}k. Fr., *acide allituriqne*. Ger., *Allitursäure*. A yellowish-white crystalline substance, soluble with difficulty in water, obtained by the action of hydrochloric acid upon alloxantine, and having the constitution $C_6H_6N_4O_4$. [B, 2, 158.]

ALLIUM (Lat.), n. n. A^{2}l(a^{3}l)′li^2-u^{3}m(u^{4}m). Perhaps allied to ἀλλᾶς, a sausage; or to Celtic, *all*, hot. Fr., *ail*. Ger., *Lauch*. It., *aglio*. Sp., *ajo*. Garlic. 1. A genus of bulbiferous liliaceous plants belonging to the tribe *Asphodelcæ*, having white or rose-colored flowers, disposed in umbels and provided with straight stamens. 2. In the U. S. Ph., the bulb of *A. sativum* (*q. v.*).—**Acetum allii.** Fr., *vinaigre d'ail, oxéolé d'ail*. It., *aceto di aglio*. Sp., *vinagre de ajo*. Syn.: *alliatrum*. A preparation consisting of 1 part of sliced garlic (bulb of *A. sativum*) infused in 9 parts [Ph. Wurzb. (1796)], or 12 parts [Ph. Sax. (1837)] of strong vinegar. [L, 85.]—**Acetum allii compositum.** See ACETUM *antisepticum*.—**Allii bulbus** [Greek Ph.]. The bulb of *A. sativum*. [B, 95.]—**A. acutangulum** [Schrader]. A European species closely related to *A. fallax*. [B, 64.]—**A. aginum.** The *A. ophioscorodon*. [L, 104.]—**A. albescens.** See *A. ampeloprasum*.—**A. alpinum.** See the major list.—**A. altaicum** [Pallas]. Fr., *ail renflé*. Syn.: *Cepa ventricosa* [Bernhardi]. A variety of *A. fistulosum*. [B, 173.]—**A. ampeloprasum** [Linnæus]. Fr., *ail ampéloprase* (ou *d'orient*), *poireau d'été*. Ger., *Sommerlauch*. Syn.: *Porrum ampeloprasum*. A European species flower-

ing in July and August, distinguished by its purplish flowers. It is related to *A. porrum*, and was formerly much esteemed as a diuretic, as an emmenagogue, and as an antidote to the bites of serpents. [B, 71, 200.]—**A. anguinum** [Matthioli]. The *A. victoriale.* [B, 173.]—**A. angulosum.** Fr., *ail anguleux, ail de mulot.* Syn.: *Cepa angulosa* [Bernhardi]. 1. Of Jacquin, the *A. fallax*. 2. Of Pollich, the *A. acutangulum.* [B, 64, 177.]—**A. angustifolium umbellatum album.** See *A. nigrum.*—**A. arenarium.** Fr., *ail des sables.* 1. Of Linnæus, a variety of *A. vineale.* 2. Of Smith, the *A. scorodoprasum.* [B, 64.]—**A. ascalonicum** [Linnæus]. Lat., *ascalonia cæpa* [Pliny]. Fr., *échalotte.* Ger., *Eschlauch, Schalotte.* It., *scalogno, cipolla d'inverno.* Sp., *chalote, escaluña.* Shallot; a perennial species found in great abundance about the city of Ascalon, in Palestine, whence its specific name. It has an edible compound bulb like that of garlic. [B, 19.]—**A. ascendens.** The *A. ampeloprasum.* [B, 177.]—**A. aureum** [Lamarck]. The *A. moly.* [B, 173.]—**A. Bertolonii.** The *A. ampeloprasum.* [B, 177.]—**A. bulbo composito.** The *A. sativum.* [L, 84.]—**A. canadense** [Kalm]. A North American species, distinguished by the umbels being capitate and bearing sessile bracteolate bulbs. The stamens and sepals are equal in length. It has been substituted for the common garlic and is equally useful. [B, 34; L, 61.]—**A. capillare** [Lamarck]. The *A. moschatum.* [B, 173.]—**A. carinatum.** Ger., *Berglauch* (1st def.). 1. Of Linnæus, a species found in Germany, Switzerland, and the Tyrol. 2. Of others, a variety of *A. oleraceum.* [B, 64.]—**A. carneum** [Tenor]. The *A. roseum.* [B, 177.]—**A. cepa.** See the major list.—**A. chinense** [Don]. A Chinese species. [B, 180.]—**A. compactum** [Thuillier]. Fr., *ail compact.* A variety of *A. vineale.* [B, 173.]—**A. controversum** [Schrader]. See *A. ophioscorodon* (2d def.). [B, 180.]—**A. descendens.** 1. Of Linnæus, the *A. sphærocephalum.* 2. Of Koch, a variety of *A. vineale.* [B, 64.]—**A. Dioscoridis** [Sibthorp]. An undescribed species, made as an equivalent for the *moly* of Homer. [B, 180.]—**A. fallax** [Don]. A German species, allied to *A. acutangulum.* [B, 64.]—**A. fistulosum** [Linnæus]. Fr., *ciboule, oignon d'hiver.* Ger., *Winterzwiebel, Röhrenlauch.* Rock onion, stone onion, Welsh onion; a species indigenous to Siberia and Russia, and cultivated in western Europe, where it is eaten. It has a long tapering root without a bulb. [B, 19.]—**A. flexum, A. flexuosum.** See *A. carinatum* (1st def.).—**A. foliosum** [Clarion]. The *A. schœnoprasum.* [B, 173.]—**A. gallicum** [Marcellus Empiricus]. 1. The *Portulaca oleracea*, or purslane. 2. The comfrey, or *Symphytum officinale.* [B, 200; L, 104.]—**A. Gasparrinii.** The *A. ampeloprasum.* [B, 177.]—**A. illyricum.** The *A. roseum.* [B, 177.]—**A. latifolium.** See the major list.—**A. leptophyllum.** Fr., *ail leptophylle* (ou *à feuilles étroites*). An East Indian species, the bulbs of which are eaten and the dried leaves used as a condiment. [D, 92; L.]—**A. longum.** The *A. victoriale.* [D, 92.]—**A. lusitanicum** [Lamarck]. Fr., *ail de Portugal, ciboule de Saint Jacques.* A species the leaves of which are made into salad. [B, 173.]—**A. magicum** [Curtis]. The *A. nigrum.* [B, 180.]—**A. majale.** The *A. roseum.* [B, 177.]—**A. moly** [Linnæus]. Fr., *ail moly, ail doré.* Ger., *goldgelber Lauch.* Syn.: *Cepa moly* [Mönch]. Garden garlic; a species, distinguished by its yellow flowers, believed by Linnæus to be the moly of the ancients, which is now referred to *A. nigrum.* The *A. moly* grows in the south of France, where its seeds and rootlets are used as an aperient, and is cultivated in the United States. [B, 138, 173.]—**A. montanum.** See the major list.—**A. moschatum** [Linnæus]. Fr., *ail musqué.* A species growing in the south of France, the bulbs of which are diuretic. [B, 173.]—**A. multibulbosum** [Jacquin]. See *A. nigrum.*—**A. multiflorum** [Desfontaines]. The *A. ampeloprasum.* [B. 177.]—**A. nigrum** [Linnæus]. It., *cipollone, cipollaccio.* Syn.: *Moly homericum* [Cæsalpinus] (seu *album*, seu *montanum*, seu *Theophrasti* [Clusius]), *Ornithogalum indicum.* A European species allied to *A. ursinum*, with radical, non-fistular, lanceolate leaves and whitish flowers with spreading sepals. The moly of Theophrastus and of Dioscorides, which was recommended by the latter author to be applied as a pessary for "relaxations of the uterus," is usually identified with this species, although Linnæus identified it with his *A. moly*, and Sibthorp created for it a separate species, the *A. Dioscoridis.* [B, 64, 177, 180, 200.]—**A. obliquum** [Linnæus]. Fr., *ail oblique.* Syn.: *Cepa obliqua* [Mönch]. An edible Siberian species. [B, 173.]—**A. odorum** [Linnæus]. An edible European species. [B, 180.]—**A. oleraceum** [Linnæus]. Fr., *ail des potages.* Field garlic; a European species, used in cooking. The bulb is said to be diuretic. [D, 92; L, 63.]—**A. ophioscorodon.** 1. Of Don, a species closely allied to *A. sativum* and perhaps only a variety of the latter. The separate bulblets (cloves) of the bulb are more rounded than in *A. sativum.* 2. Of Link, a species distinguished from *A. sativum* by its non-compound bulb. [B, 178.]—**A. parviflorum** [Thuillier]. The *A. oleraceum.* [D, 92.]—**A. petiolatum** [Lamarck]. The *A. ursinum.* [B, 173.]—**A. plantagineum** [Lamarck]. The *A. victoriale.* [B, 173.]—**A. porrum** [Linnæus]. Fr., *porreau.* Ger., *Porree, Aschlauch, gemeiner Lauch.* It., *porro.* Sp., *puerro.* The leek. A species having flat lanceolate leaves, tricuspidate stamens rather longer than the sepals, and a globous umbel of white flowers. The scaly cylindrical bulb is used in cooking, and has occasionally been employed medicinally as a stimulant. [B, 34, 97.]—**A. pratense.** A variety of *A. vineale.* [B, 173.]—**A. ramosissimum** [Jacquin]. The *A. obliquum.* [B, 173.]—**A. redolens.** The *Teucrium scordium.* [L, 116.]—**A. roseum** [Linnæus]. Ger., *Rosenlauch.* It., *aglietto, aglio salvatico.* Sp., *ajo de calebra.* A species with rose-red flowers, cultivated in France. [B. 178; L, 30.]—**A. rotundum** [Linnæus]. A European species related to *A. ampeloprasum.* [B, 64.]—**A. sativum.** See the major list.—**A. scallonicum.** The *A. ascalonicum.* [L, 74.]—**A. schœnoprasum** [Linnæus]. Fr., *civette, ciboulette, fausse échalotte.* Ger., *Schnittlauch, Suppenlauch.* It., *erba cipollina.* Sp., *cibollino francés, ajo morisco.* Syn.: *Cepa schœnoprasa* [Mönch]. Chive or cive; a species cultivated in Europe and the United States, with terete, filiform, fistulous leaves, purple flowers, and a small oval bulb. The leaves are used for seasoning food. [B, 19, 34.]—**A. scorodoprasum** [Linnæus]. Fr., *rocambole, ail d'Espagne.* Ger., *Roggenbole, Rokamboll.* Sp., *ajo fino* (ó *pardo*). Syn.: *Porrum scorodoprasum.* Rocambole; a perennial European species closely resembling *A. sativum*, but with smaller bulblets and a more delicate flavor than the latter. It is the *ophioscorodon* of Dioscorides, and is sometimes confounded with the *A. ophioscorodon.* It is used for the same purposes as *A. sativum.* [B, 115, 178, 180, 200.]—**A. senescens** [Linnæus]. Ger., *Narcissenlauch.* A European species with leaves like those of the narcissus. [L, 30.]—**A. setaceum** [Waldstein and Kitaibel]. The *A. moschatum.* [B, 178.]—**A. sibiricum** [Linnæus]. The *A. roseum* [B, 180], or the *A. schœnoprasum.* [B, 178.]—**A. spectabile.** The *A. ampeloprasum.* [B, 177.]—**A. sphærocephalum** [Linnæus]. A German species. [B, 64, 180.]—**A. staminibus tricuspidatis.** The *A. sativum.* [L, 84.]—**A. suaveolens** [Jacquin]. An Austrian species with bright purple flowers. [B, 178; L, 30.]—**A. subhirsutum** [Linnæus]. A European species with linear ciliated leaves. According to some, the moly of Dioscorides. [B, 71, 180.]—**A. subrotundum.** The *A. ophioscorodon.* [D. 92.]—**A. Tenorii** [Sprengel]. The *A. roseum.* [B, 178.]—**A. tuberosum.** Fr., *ail tubereux.* A species cultivated in India. [D, 92.]—**A. uliginosum** [Don]. An Asiatic species, used in China as a depurative of the blood, and given in urinary troubles, hæmorrhages, and spermatorrhœa. Locally it is applied as a remedy in toothache. [L, 75.]—**A. ursinum.** See the major list.—**A. victoriale, A. victorialis** [Linnæus]. Fr., *ail serpentin, faux nard, faux spicanard.* Ger., *Siegwurz, netzwurzeliger Lauch.* It., *aglio serpentino, radice vittoriale* Syn.: *Cepa victorialis, Victorialis longa.* A European species with a capitate umbel, flat elliptical non-fistular leaves, and a long rhizome along which the bulbs are disposed. The rhizome and bulbs were formerly regarded as prophylactic against wounds, accident, and enchantment, and were also used to relieve abdominal pain in pregnant women; and the emanations from the plant were believed by the miners of Silesia and Bohemia to counteract the effect of the noxious vapors rising from the mines. [B, 49, 71, 173; L, 84.]—**A. vineale** [Linnæus]. Fr., *ail des vignes.* Ger., *Weinbergslauch.* Crow garlic; a European species which has become naturalized in the United States. It gives a disagreeable odor to the milk and butter of the cows feeding upon it, and to wheat with which it becomes mixed by growing in the same field. [B, 34, 138; D, 92.]—**A. vulgare.** See the major list.—**Bulbus allii** [Belg. Ph., Swed. Ph.], **Radix allii.** The bulb of *A. sativum* (*q. v.*).—**Syrupus allii** [U. S. Ph.], **Syrupus de allio.** Fr., *sirop d'ail.* Ger., *Knoblauchsyrup.* It., *sciroppo di aglio.* Sp., *jarabe de ajo.* A preparation made by macerating 15 parts of garlic in 25 parts of dilute acetic acid for 4 days, adding 15 parts of dilute acetic acid, expressing and filtering until 40 parts of filtrate are obtained, and adding 60 parts of sugar. A similar preparation, made by infusing 1 part of garlic in 2 parts of boiling water, and adding 2 of sugar, was formerly official in various continental pharmacopœias. [L, 65, 85.]



THE ALLIUM PORRUM. [A, 327.]

THE ALLIUM SCHŒNOPRASUM. [A, 327.]

ALLIUM ALPINUM (Lat.), n. n. $A^2l(a^3l)$-pi(pe)'$nu^3m(nu^4m)$. The *A. victoriale.* [B, 180.]—**Radix allii alpini.** The rhizome of *A. victoriale.* [B, 97, 180.]

ALLIUM CEPA (Lat.), n. n. Se(ka)'pa^3. Fr., *ognon commun* [Fr. Cod.]. *oignon* [Fr. Cod.]. Ger., *Zwiebel, Zwiebellauch.* It., *cipolla.* Sp., *cebolla.* Syn.: *Cepa* (vel *Cæpa*), *Cepa vulgaris* [Bernhardi]. The onion; a biennial garden herb, botanically distinguished by having a naked fistulous scape swelling at the base, longer than the leaves, which are fistulous and terete, and bearing at its summit a large globose umbel of greenish-white flowers. The bulb is round or oblong and not compound, and consists of a series of concentric layers, the outer dry and membranous, the inner fleshy and succulent. A variety, *A. cepa*, var. *bulbiferum*, *A. cepa*, var. *proliferum*, tree onion, top onion, is distinguished by the flower stalk producing at its summit a cluster of small green bulbs instead of flowers and seeds. Another variety, the potato onion, or multiplier onion, produces a large number of small bulbs. The bulb of the onion is stimulant, expectorant, and diuretic, and has been given in infantile catarrhal affections, in dropsy, and in calculous affections; externally it acts as a mild irritant by virtue of a volatile oil which it contains, and is applied hot to the ear for the relief of earache, to the soles of the feet as a derivative in convulsive disorders, and as a discutient application to inflammatory swellings. The pulp is official in the Fr. Codex. [B, 5, 34, 119, 138.] See also CATAPLASMA *maturans* and UNGUENTUM *suppurans*.—**Bulbus allii cepæ.** The bulb of the onion. See *supra.*

THE TOP ONION. [A, 327.]

THE MULTIPLIER ONION. [A, 327.]

ALLIUM LATIFOLIUM (Lat.), n. n. La^{2}t(la^{3}t)-i^{2}fo'li^2-u^{3}m-(u^{4}m). A broad-leaved species of A.; probably the *A. victoriale.* [B.]—**A. l. liliflorum.** The moly of Theophrastus. [B, 200.] See A. *nigrum.*—**A. l. montanum maculatum.** *A. victoriale.* [B, 200.]—**Radix allii latifolii.** The rhizome of *A. victoriale.* [B, 180.]

ALLIUM MONTANUM (Lat.), n. n. Mo^{2}n-ta(ta^3)'nu^{3}m(nu^{4}m). 1. Of Schmidt, the *A. fallax.* 2. Of Sibthorp and Smith, a variety of the *A. carinatum* of Linnæus. [B, 64.]—**A. m. bicorne, A. m. bicorne purpureum proliferum.** The *A. ampeloprasum.* [B, 200.]—**A. m. majus anglicum Newtoni.** The *A. scorodoprasum.* [B, 200.]—**Radix allii montani latifolii maculati.** The rhizome of *A. victoriale.* [B, 97.]

ALLIUM SATIVUM [Linnæus] (Lat.), n. n. Sa^{2}t(sa^{3}t)-i(e)'-vu^{3}m(wu^{4}m). Fr., *ail* [Fr. Cod.], *ail cultivé.* Ger., *Knoblauch, Gartenlauch.* It., *aglio.* Sp., *ajo cultivado.* Syn.: *Porrum sativum* [Reichenbach]. Common garlic, English garlic; a perennial species with a scape about 2 feet high, having linear-lanceolate leaves, pink or purplish flowers with tricuspidate stamens, and a compound bulb consisting of several small bulblets (cloves) inclosed in a common scaly membrane. These bulblets are oblong, laterally compressed, rounded on the back, and wedge-shaped anteriorly, and consist of an envelope of fleshy scales surrounding a fleshy center. They have a pungent, disagreeable odor and acrid taste, due to the presence of 1 per cent. of a nauseous volatile oil (oil of garlic), which, in the crude state, is a brownish-yellow liquid, heavier than water, made up of a mixture of allyl sulphide and oxide, but which, when rectified, is colorless and lighter than water, and consists mainly of allyl sulphide. Garlic also contains a little albumin, starch, and sugar, 35 per cent. of mucilage, and from 50 to 60 per cent. of water. The bulb is official as *allium* [U. S. Ph.], *allii bulbus* [Greek Ph.], *bulbus allii* [Belg. Ph., Swed. Ph.], *ail* [Fr. Cod.], *ajo* [Sp. Ph.]. It has properties and uses similar to those of the onion (*q. v.* under A. CEPA). [B, 34, 81.] See *Acetum* ALLII, *Syrupus* ALLII, *Liniment d'*AIL, OXYMEL *alliatum*, and ACETUM *antimephiticum.*—**A. s. alterum.** The *A. ophioscorodon.* [B, 200.]—**A. s. caule planifolio bulbifero.** The *A. s.* [L, 84.]—**Bulbus allii sativi, Radix allii sativi.** The bulb of *A. s.* [B, 108, 180.]—**Succus allii sativi.** The juice of the bulb of *A. s.* [B, 180.]

ALLIUM URSINUM [Linnæus] (Lat.), n. n. U^{5}r(ur)-si(se)'-nu^{3}m(nu^{4}m). Fr., *ail des ours* (ou *des bois*). Ger., *Bärenlauch, Waldknoblauch.* It., *aglio orsino.* Syn.: *Cepa ursina.* A species distinguished by its long-petiolate elliptical-lanceolate leaves and its snow-white flowers. It is found in Siberia, where it is eaten when young, and in Central Europe, where it is occasionally employed as a diuretic and anthelminthic, and as a remedy in scurvy. [B, 173, 178, 180.]—**Herba allii ursini latifolii, Radix allii ursini latifolii.** The herb and rhizome of *A. u.*, both of which have been employed in medicine. [B, 180.]

ALLIUM VULGARE (Lat.), n. n. Vu^{3}l(wu^{4}l)-ga(ga^3)'re(re^2). Fr., *ail commun.* Ger., *gemeiner Lauch.* It., *aglio commune.* Sp., *ajo commun.* Common garlic (*A. sativum*). [B, 180.]—**Radix allii vulgaris.** The bulb of *A. sativum.* [B, 180.]

ALLMANHAUSEN (Ger.), n. A^{3}l'ma^{3}n-ha^3-u-ze^{2}n. A spring in Bavaria, containing hydrogen sulphide, carbonates, chlorides, and iron. [L, 105.]

ALLOCHETIA, ALLOCHEZIA (Lat.), n's f. A^{2}l(a^{3}l)-lo-ke-(ch^{2}e^2)'shi^2(ti^2)-a^3, -zhi^2(zi^2)-a^3. From ἄλλος, another, and χέζειν, to empty the bowels. Fr., *allochézie.* Ger., *Allochezie.* 1. A discharge of other than fæcal matter from the bowels. 2. The passage of fæces from an abnormal opening. [L, 50.]

ALLOCHIRIA (Lat.), n. f. A^{2}l(a^{3}l)-lo-ki(ch^{2}e)'ri^2-a^3. From ἄλλος, another, and χείρ, the hand. Fr., *allochirie.* Ger., *Allochirie.* Obersteiner's term for a derangement of the sense of touch in which a tactile impression made on one side of the body is apt to be referred by the patient to the corresponding point on the opposite side; observed in hysteria and in locomotor ataxia. [A, 319; "Brain," iv, 1881, p. 153 (D, 35).]

ALLOCHOOS (Lat.), adj. A^{2}l(a^{3}l)-lo^{2}k(lo^{2}ch^2)'o-o^{2}s. From ἀλλόχοος. Talking deliriously. [L, 53.]

ALLOCHROIC, adj. A^{2}l-lo-kro'i^{2}k. Gr., ἀλλόχροος. Fr., *allochroé.* Ger., *anderfarbig.* Sp., *allocroado.* 1. Changeable in color. 2. Not of the same color throughout. [L, 41, 63.]

ALLOCHROISM, n. A^{2}l-lo^{2}k'ro-i^{2}zm. Lat., *allochroismus.* Fr., *allochroïsme.* Sp., *allocroismo.* 1. A gradual change of color. 2. Diversity of color. [L, 30, 41.]

ALLOCHROMASIA (Lat.), n. f. A^{2}l(a^{3}l)-lo-kro(ch^{2}ro)-ma-(ma^3)'zi^2(si^2)-a^3. From ἄλλος, another, and χρῶμα, color. Fr., *allochromasie.* Ger., *Allochromasie.* It., *allocromasia.* Sp., *alocromasia.* Color-blindness. [L, 50, 55.]

ALLOCHROMATIC, adj. A^{2}l-lo-kro-ma^{2}t'i^{2}k. Gr., ἀλλοχρωματικός. Lat., *allochromaticus.* Varying in color. [L, 50, 63.]

ALLOCHROOUS, adj. A^{2}l-lo^{2}k'ro-u^{3}s. See ALLOCHROIC.

ALLOCINETIC, adj. A^{2}l-lo-si^{2}n-e^{2}t'i^{2}k. From ἄλλος, foreign, and κινητικός, setting in motion. Ger., *allokinetisch.* Occasioned by external impressions on motor nerves (said of muscular movements—the opposite of *autocinetic*). [W. Preyer (A, 319).]

ALLODAPA (Lat.), n. f. A^{2}l(a^{3}l)-lo^{2}d'a^3-pa^3. From ἀλλοδαπός, foreign, strange. Fr., *allodape.* Sp., *allodapo.* 1. A genus of epidacraceous plants. [L. 41.] 2. A genus of *Oxyuridæ.* [Diesing (L, 16).]—**A. typica.** A species of *A.* (2d def.) found in the cæcum of *Dicholophus cristatus.* [L, 63.]

ALLODINIA (Lat.), n. n. pl. A^{2}l(a^{3}l)-lo-di^{2}n'i^2-a^3. A subfamily of *Sambucideæ*, including *Sambucus* and 5 other genera. [B, 170.]

ALLŒOMORPHIA, ALLŒOMORPHOSIS, ALLŒOPATHIA, ALLŒOPATHIC, ALLŒOPATHY. See ALLOMORPHIA, ALLOPATHIC, and ALLOPATHY.

ALLŒOSIS (Lat.), n. f. A^{2}l(a^{3}l)-le(lo-e^2)-o'si^{2}s. Gen., *allœo'-seos (-is).* Gr., ἀλλοίωσις. 1. A change, as from disease to health. [L, 104.] 2. Mental aberration. [A, 311.]

ALLŒOTIC, adj. A^{2}l-le-o^{2}t'i^{2}k. Lat., *allœoticus.* Alterative.

ALLŒOTICS, n. pl. A^{2}l-le-o^{2}t'i^{2}ks. From ἀλλοιοῦν, to change. Lat., *allœotici.* Fr., *allœotiques.* It., *alleotici.* Alteratives; substances which, according to the humoral pathologists, had the property of changing the composition of the humors, especially the blood. [D, 76.]

ALLOGOTROPHIA (Lat.), n. f. A^{2}l(a^{3}l)-lo^{2}g-o-tro'fi^2-a^3. From ἄλλος, another, and τρέφειν, to nourish. A condition in which one part of the body is nourished at the expense of another. [L, 104.]

ALLOIOSIS, ALLOIOTICS. See ALLŒOSIS and ALLŒOTICS.

ALLOKINETISCH (Ger.), adj. A^{3}l-lo-ki^{2}n-e^{2}t'i^{2}sh. See ALLOCINETIC.

ALLOLALIA (Lat.), n. f. A^{2}l(a^{3}l)-lo-la(la^3)'li^2-a^3. From ἄλλος, different, and λαλεῖν, to speak. Fr., *allolalie.* Ger., *Allolalie.* A general term for affections of the faculty of speech. [L, 50, 116.]

ALLOLALUS (Lat.), adj. A^{2}l(a^{3}l)-lo'la^3-lu^{3}s(lu^{4}s). Gr., ἀλλόλαλος. Affected with allolalia (*q. v.*). [L, 50.]

ALLOMERISM, n. A^{2}l-lo^{2}m'e^{2}r-i^{2}zm. Cooke's name for the principle which preserves the crystalline form of a substance, notwithstanding a change in its constituents. [B, 196.]

ALLOMORPHISM, n. A^{2}l-lo-mo^{2}rf'i^{2}zm. From ἄλλος, different, and μορφή, shape. Lat., *allomorphia, allomorphosis.* Fr., *allomorphie.* Ger., *Allomorphie.* It., *allomorfia.* 1. A change of shape (said, in teratology, of gross developmental abnormities un-

accompanied by apparent histological changes). [A, 314.] 2. Metamorphosis. [A, 322.]

ALLOMORPHOSIS (Lat.), n. f. A2l(a3l)-lo-mo2rf-o'si2s. Gen., *allomorpho'seos.* See ALLOMORPHISM.

ALLOMORPHUS (Lat.), adj. A2l(a3l)-lo-mo2rf'u3s(u4s). Affected with allomorphism (*q. v.*). [A, 322.]

ALLON, n. A Hebrew name for the oak. [L, 105.]

ALLONBY, n. A2l'lo2n-bi2. A sea-bathing resort in the county of Cumberland, England. [A, 375 ; L, 57.]

ALLONGE (Fr.), n. A3l-lo2n2zh. See ADAPTER.

ALLONGEMENT (Fr.), n. A3l-lo2n2zh-ma3n2. Elongation.—**A. œdémateux avec prolapsus du col utérin.** A term applied by Guéniot to a special variety of swelling of the cervix uteri during labor, dependent on great hyperæmia, and characterized by the rapidity with which it comes on and subsides. [" Arch. gén. de méd.," April, 1872, p. 402 ; A, 24.]—**A. opératoire.** Any procedure for elongating a uterine tumor after it has been severed from its connections, and is lying in the vagina, thus so reducing its bulk in the other diameters as to admit of its extraction through the vulva. [Bandl (A, 319).]

ALLOPALLADIUM, n. A2l''lo-pa2l-la'di2-u3m. A native crystalline variety of palladium. [B.]

ALLOPATH, n. A2l'lo-pa2th. See ALLOPATHIST.

ALLOPATHETIC, ALLOPATHIC, adj's. A2l''lo-pa2th-e2t'-i2k, -lo2p'a2th-i2k. Lat., *allopathes, allopathicus.* Fr., *allopathique.* Ger., *allopathisch.* Sp., *alopático.* Pertaining to allopathy. [L.]

ALLOPATHISER (Fr.), v. tr. A3l-lo-pa3-te-za. Sp., *alopatizar.* To treat according to allopathic principles. [L, 55.]

ALLOPATHIST, n. A2l-lo2p'a2th-i2st. Fr., *allopathe, allopathiste.* Ger., *Allopathist.* Sp., *alopatista.* One who practises or believes in allopathy (3d def.). [L.]

ALLOPATHY, n. A2l-lo2p'a2th-i2. From ἄλλος, another, and πάθος, pain or disease. Lat., *allopathia.* Fr., *allopathie.* Ger., *Allopathie.* It., *allopatia.* Sp., *alopatía.* 1. Pain or disease due to an agency working on the body from without. [A. 322.] 2. Disease in one part of the body occurring as the consequence of disease or injury in another part (*e. g.*, in the liver as the result of injury to the head) ; also fracture by *contrecoup.* [A, 322.] 3. That therapeutical doctrine which teaches that diseases are to be cured by establishing artificial morbid conditions of an opposite character. Some homœopathists falsely apply the term to all medical practice which does not rest upon their own doctrine. Cf. HOMŒOPATHY and ISOPATHY.

ALLOPHANATE, n. A2l-lo2f'a2n-at. Fr., *allophanate.* Ger., *Allophanat.* It., *allofanato.* Sp., *alofanato.* A salt of allophanic acid. [B.]

ALLOPHANIC, adj. A2l-lo-fa2n'i2k. From ἄλλος, different, and φαίνεσθαι, to seem. Fr., *allophanique.* Ger., *allophanisch.* It., *allofanico.* Sp., *alofánico.*—**A. acid.** Fr., *acide allophanique.* Ger., *Allophansäure.* It., *acido allofanico.* Sp., *ácido alofánico.* Syn. : *ureocarbonic acid.* A supposititious substance, $C_2H_4N_2O_3$= $NH_2 - CO - NH - CO - OH$, acting as a monobasic acid, forming a series of salts called allophanates, and a. ethers, of the constitution $NH_2-CO-NH-CO-O.R'$, and bearing the same relation to biuret that the carbamates bear to urea. [B, 4.]—**A. amide.** See BIURET.—**A. ether.** Fr., *éther allophanique.* Ger., *Allophansäure-Ester.* It., *etere allofanico.* An allophanate of a hydrocarbon radicle. [B.] See ALLYL *allophanate,* ETHYL *allophanate,* etc.

ALLOPHANSÄURE (Ger.), n. A3l-lo-fa3n'zoi-re2. Allophanic acid. [A, 324.]—**A.-Aethylenester.** Ethylene allophanate. [B.]—**A.-Aethylester.** Ethyl allophanate. [B.]—**A.-Ester.** Allophanic ether. [B.]—**A.-Glycerylester.** Glyceryl allophanate. [B.]—**A.-Methylester.** Methyl allophanate. [B.]—**A.-Phenylester.** Phenyl allophanate. [B.]

ALLOPHASIS (Lat.), n. f. A2l(a3l)-lo2f'a3-si2s. Gen., *allopha'seos (-seis).* From ἄλλος, strange, unreal, and φάναι, to speak. Delirium.

ALLOPHILLUS (Lat.), n. m. A2l(a3l)-lo-fi2l'lu3s(lu4s). See ALLOPHYLUS.

ALLOPHYLEÆ (Lat.), n. f. pl. A2l(a3l)-lo-fi(fu6)'le2-e(a3-e2). For deriv., see ALLOPHYLUS. A tribe of sapindaceous plants established by Blume. [B.]

ALLOPHYLLUS (Lat.), n. m. A2l(a3l)-lo-fi2l(fu6l)'lu3s(lu4s). Gleditsch's term for the genus *Allophylus* of Linnæus. [B.]—**A. ternatus** [Loureiro]. The *Schmidelia cochinchinensis,* a Cochin China species ; used as a resolvent. [B, 180 ; L, 87.]

ALLOPHYLUS (Lat.), n. m. A2l(a3l)-lo-fi(fu6)'lu3s(lu4s). From ἀλλόφυλος, of another tribe, strange, foreign. Written also *allophyllus* and *allophillus.* A genus of plants of the natural order *Hesperideæ,* established by Linnæus. [B.]

ALLOPTEROUS, adj. A2l-lo2p'te2-ru3s. Lat., *allopterus* (from ἄλλος, different, and πτερόν, a wing or fin). Fr., *alloptère.* Ger., *anderflügelicht.* Having the wings or the pectoral fins in an unusual situation. [Duméril (A, 385) ; L, 116.]

ALLORO (It.), n. A3l-lo'ro. The bay-tree (*Laurus nobilis*). [B.]

ALLORRHYTHMIA (Lat.), n. f. A2l(a3l)-lo2r-ri2th2(ru6th2)'-mi2-a3. Fr., *allorrhythmie.* Ger., *Allorrhythmie.* From ἄλλος, strange, and ῥυθμός, a regular motion. Written also *allorythmia.* Any pathological deviation from the rhythm of the heart's action. [A, 319.]

ALLOSORUS (Lat.), n. f. A2l(a3l)-lo-so'ru3s(ru4s). From ἄλλος, various, and σωρός, a heap (see SORUS). Fr., *allosore.* Sp., *alósoro.* Bernhardi's name for a genus of polypodiaceous ferns. [A, 248 ; L, 49, 67.]—**A. crispus** [Bernhardi]. Syn. : *Osmunda crispa* [Linnæus]. Rock-brake ; curled a. ; a species found in Europe and North America. A decoction has been used in pulmonary catarrh. [L, 49.]

ALLOSTEATODES (Lat.). adj. A2l(a3l)''lo-ste(sta)-a3-to'dez-(de2s). From ἄλλος. altered, and στεατώδης, tallow-like. Relating to an alteration of the sebaceous secretion, especially in color, as in stearrhœa flavescens and s. nigricans. [G.]

ALLOSTEMONES (Lat.), n. m. pl. A2l(a3l)-lo-ste2m-o'nez-(ne2s). A sub-class of exogenous plants established by Link, comprising the orders *Violariæ, Loaseæ, Passifloreæ, Fumariaceæ, Papaveraceæ, Cruciferæ, Capparideæ, Meliantheæ, Besedineæ, Oxalideæ, Balsamineæ, Cardamindeæ, Geraniaceæ, Meliaceæ, Hippocastaneæ, Acerineæ, Malpighiaceæ, Erythroxyleæ, Guttiferæ, Hypericinæ, Aurantia, Camelliaceæ, Tiliaceæ, Büttneriaceæ, Bombaceæ, Malvaceæ, Cistineæ, Bixinæ, Anonaceæ, Magnoliaceæ, Dilleniaceæ, Ranunculaceæ, Hypopithydes, Sarraceniaceæ,* and *Nymphœaceæ.* [B, 170.]

ALLOTHERM (Ger.), n. A3l'lo-te2rm. From ἄλλος, foreign, and θέρμη, heat. An animal whose temperature is immediately dependent on that of the medium in which it lives. [W. Preyer (A, 319).]

ALLOTRIAPOSTEMA (Lat.), n. n. A2l(a3l)-lo2t''ri2-a2p(a3p)-o2st-e(a)'ma3. Gen., *allotriapostem'atos.* From ἀλλότριος, foreign, and ἀπόστημα, an abscess. Fr., *allotriapostème.* Senftleben's term for an abscess containing a foreign body. [A, 322.]

ALLOTRIECCRISIS (Lat.), n. f. A2l(a3l)-lo2t''ri2-e2k'kri2s-i2s. Gen., *allotrieccris'eos.* From ἀλλότριος, foreign, and ἔκκρισις (= ἔκκριμα, excrement). Fr., *allotrieccrise.* Ger., *Allotriekkrise.* The discharge of foreign substances with the excretions. [L, 50.]

ALLOTRIECCRITICUS (Lat.), adj. A2l(a3l)-lo2t''ri2-e2k-kri2t'-i2k-u3s(u4s). Pertaining to allotrieccrisis. [L, 50.]

ALLOTRIOCHETIA, ALLOTRIOCHEZIA (Lat.), n's f. A2l(a3l)-lo2t''ri2-o-ke(ch2e2)'shi2(ti2)-a3, -zi2-a3. Fr., *allotriochézie.* See ALLOCHEZIA.

ALLOTRIODONTIA (Lat.), n. f. A2l(a3l)-lo2t''ri2-o-do2n'shi2-(ti2)-a3. From ἀλλότριος, foreign, strange, and ὀδούς, a tooth. Fr., *allotriodontie.* Ger., *Allotriodontie.* It., *allotriodontia.* 1. The transplantation of teeth from one person to another. 2. An abnormal situation of teeth. [L, 30, 44, 55, 116.]

ALLOTRIODONTICUS (Lat.), adj. A2l(a3l)-lo2t''ri2-o-do2nt'-i2k-u3s(u4s). Pertaining to *allotriodontia.* [L, 50.]

ALLOTRIOGEUSIA, ALLOTRIOGEUSTIA (Lat.), n's f. A2l(a3l)-lo2t''ri2-o-ju2'(ge2-u')-si2-a, -ju2'(ge2-u')-sti2-a3. From ἀλλότριος, foreign, and γεῦσις, the sense of taste. Fr., *allotriogeusie.* Ger., *Allotriogeusie.* A depraved or abnormal appetite. [L, 45, 54, 63.]

ALLOTRIOLITHIASIS (Lat.), n. f. A2l(a3l)-lo2t''ri2-o-li2th-i(e)'a3-si2s. Gen., *allotriolithia'seos.* From ἀλλότριος, foreign, and λιθίασις (see LITHIASIS). Fr., *allotriolithiase.* Ger., *Allotriolithiase.* The formation of a calculus from foreign substances. [L, 50. 116.]

ALLOTRIOLITHUS (Lat.), n. m. A2l(a3l)-lo2t-ri2-o2l'i2th-u3s-(u4s). Fr., *allotriolithe.* A calculous concrement formed in an unusual situation. [A, 385.]

ALLOTRIOPHAGIST, n. A2l-lo2t''ri2-o2f'a2-ji2st. Gr., ἀλλοτριοφάγος (from ἀλλότριος, foreign, and φαγεῖν, to eat). Lat., *allotriophagus.* Fr., *allotriophage.* Ger., *Allotriophag.* One addicted to allotriophagy. [L, 30, 41.]

ALLOTRIOPHAGOUS, adj. A2l-lo2t''ri2-o2f'a2g-u3s. Lat., *allotriophagus.* Fr., *allotriophagique.* Ger., *allotriophagisch.* Sp., *alotriófago.* Pertaining to allotriophagy. [L, 41, 50, 98.]

ALLOTRIOPHAGY, n. A2l-lo2t''ri2-o2f'a2-ji2. Lat., *allotriophagia.* Fr., *allotriophagie.* Ger., *Allotriophagie.* It., *allotriofagia.* Sp., *alotriofajia.* 1. A morbid propensity to eat innutritious or unsuitable substances. 2. The eating of such substances. [L, 44, 54, 55, 56, 98.]

ALLOTRIOTECNIE (Fr.), n. A3l-lo2t-ri2-o-te2k-ne. See ALLOTRIOTEXIS.

ALLOTRIOTECTICUS (Lat.). adj. A2l(a3l)-lo2t''ri2-o-te2k'-ti2k-u3s(u4s). 1. Born in an unusual manner. 2. Pertaining to an unusual delivery. [L, 50.]

ALLOTRIOTEXIS (Lat.). n. f. A2l(a3l)-lo2t''ri2-o-te2x'i2s. Gen., *allotriotex'eos.* From ἀλλότριος, abnormal, and τέξις, parturition. Fr., *allotriotexie.* Ger., *Allotrioteknie.* It., *allotriotecnia.* 1. An abnormal delivery. 2. The birth of a fœtal monster or mole. [L, 50.]

ALLOTRIURIA (Lat.), n. f. A2l(a3l)-lo2t''ri2-u2(u)'ri2-a3. From ἀλλότριος, abnormal, and οὐρεῖν, to pass urine. Fr., *allotriurie.* Ger., *Allotriurie.* The passing of urine containing unusual substances. [L, 30, 50.]

ALLOTROPE, n. A2l'lo-trop. From ἄλλος, different, and τροπή, a change. Fr., *allotrope.* Ger., *Allotrop.* One of two or more isomeric forms of the same element. [B.] See also ISOMERISM.

ALLOTROPHIC, adj. A2l-lo tro2f'i2k. From ἄλλος, different, and τροφή, nourishment. Fr., *allotrophique.* Lacking its ordinary nutritious properties, with or without having acquired injurious characters, in consequence of isomeric molecular changes occurring during its preparation or preservation (said of an alimentary albuminoid). [C. Robin (A, 385).]

ALLOTROPIC, adj. A2l-lo-tro2p'i2k. Fr., *allotropique.* Ger., *allotropisch.* It., *allotropico.* Sp., *alotrópico.* Belonging to, or consisting of, an allotrope. [B ; L, 55, 98.]

ALLOTROPISM, ALLOTROPY, n's. A2l-lo2t'ro-pi2zm, -pi2. Lat., *allotropismus.* Fr., *allotropie.* Ger., *Allotropie.* It., *allotropia.* Sp., *alotropía.* See ISOMERISM. [L, 30, 44, 55, 98.]

ALLOUCHIER (Fr.), n. A^{3}l-lu-shi^2-a. See *Pyrus aria.*

ALLOUIA, n. A Carib name for the *Solanum tuberosum.* [L, 105.]

ALLOXAMIDE, n. A^{2}l-lo^{2}x′a^{2}m-i^{2}d(id). Fr., *alloxamide.* A substance, $C_8H_4N_4O_4$.HO, produced by the action of ammonia on alloxan. [A, 385.]

ALLOXAN, n. A^{2}l-lo^{2}x′a^{2}n. Lat., *alloxanum.* Fr., *alloxane.* Ger., *Alloxan.* It., *allossana.* Sp., *aloxano.* Syn.: *erythric acid, mesoxalylurea.* A substance obtained by the action of nitric acid or of nascent chlorine upon uric acid. It occurs in the form of large, colorless, efflorescent prismatic crystals of the constitution $C_4H_2N_2O_4+4H_2O$, or as small crystals of the constitution $C_4H_2N_2O_4+H_2O$, and, the molecule of water being regarded as an integral part of its composition, its structural formula is probably $C(OH)_2\left\langle\begin{matrix}CO-NH\\CO-NH\end{matrix}\right\rangle CO$. It is decomposed by dilute acids, forming urea, oxalic acid, and alloxantin. It has been found in the intestinal mucus in catarrhal enteritis. It gives a red color to the skin, and has been used as the basis of cosmetic preparations. [B, 3, 4; L, 44, 57, 77, 98.]—**A'säure** (Ger.). See ALLOXANIC *acid.*

ALLOXANATE, n. A^{2}l-lo^{2}x′a^{2}n-at. Fr., *alloxanate.* Ger., *Alloxanat.* It., *allossanato.* Sp., *aloxanato.* A salt of alloxanic acid. There are probably three varieties: 1. *Acid a's,* of the general formula $CO(NH_2).NR-CO.CO.CO.OR$. 2. *Normal a's,* of the general formula $CO(NH_2)NH-CO.CO.CO.OR$. 3. *Basic a's,* or compounds of the oxides of some heavy metals with alloxanic acid.

ALLOXANIC, adj. A^{2}l-lo^{2}x-a^{2}n′i^{2}k. Fr., *alloxanique.* It., *allossanico.* Sp., *aloxánico.* Derived from, or belonging to, alloxan. [B; L, 98.]—**A. acid.** Fr., *acide alloxanique.* Ger., *Alloxansäure.* It., *acido allossanico.* Sp., *ácido aloxánico.* A crystalline acid derived from alloxan by treatment with alkalies, having the composition $CO(NH_2).NH-CO-CO-CO.OH=C_4H_4N_2O_5$. It is regularly monobasic, but, the hydrogen atom attached to the second nitrogen atom being also replaceable, it acts as a dibasic acid. [B, 3, 4.]

ALLOXANTHINE, ALLOXANTINE, n's. A^{2}l-lo^{2}x-a^{2}n′-then, -ten. Fr., *alloxantine.* Ger., *Alloxantin.* It., *allossantina.* Sp., *aloxantina.* Syn.: *uroxin.* A substance occurring in small, hard prismatic or rhombic crystals, having the composition $C_8H_4N_4O_7+3H_2O$. It is formed by the action of warm dilute nitric acid on uric acid or alloxan, and in numerous other ways. [B, 3, 4.]

ALLOY, n. A^{2}l-loi′. From Fr., *aloi* (= *à loi,* according to law, *i. e.,* according to a standard of purity in metals to be coined). [A, 302.] Lat., *alligatio.* Fr., *alliage.* Ger., *Vermischung.* It., *lega.* Sp., *aleación.* A compound of two or more metals. [L, 52, 56, 69, 111.] Cf. AMALGAM.—**Fusible a.** A term denoting an alloy which melts at low temperatures, and into the composition of which mercury enters.

ALLOY, v. tr. A^{2}l-loi′. Fr., *allier.* Ger., *vermischen.* It., *allegare.* Sp., *alear.* To reduce the purity of a metal by mixing one less valuable with it. [L, 46, 56, 95.]

ALLSEED, n. A^{4}l′sed. A popular name for the *Polycarpus;* also applied to the *Chenopodium polyspermum,* the *Radiola millegrana,* and other plants. [L, 67.]

ALLSEITSWENDIG (Ger.), adj. A^{3}l′zits-ve^{2}nd-i^{2}g. See VAGUS (adj.).

ALLSPICE, n. A^{4}l′spis. See PIMENTA and CALYCANTHUS.—**A.-tree.** See PIMENTA *vulgaris* and CALYCANTHUS *floridus.*—**Bush a.** See BENZOIN *odoriferum.*—**Carolina a.** See CALYCANTHUS *floridus.*—**Japan a.** See CHIMONANTHUS *fragrans.*—**Oil of a.** See *Oleum* PIMENTÆ.—**Wild a.** See BENZOIN *odoriferum.*

ALLTÄGIG, ALLTÄGLICH (Ger.), adj's. A^{3}l′tag-i^{2}g, -li^{2}ch^2. Daily. [L, 80.] See QUOTIDIAN.

ALLU-BATSALA, n. A Teloogoo name for the *Basella alba.* [B, 172.]

ALLUBODON, n. A Ceylonese name for the wood of the *Calyptranthes jambolana.* [L, 67.]

ALLUCINATIO (Lat.), n. f. A^{2}l(a^{3}l)-lu^2(lu)-si^{2}n(ki^{2}n)-a(a^3)′-shi^2(ti^2)-o. Gen., *allucinatio′nis.* See HALLUCINATION.

ALLUF (Ar.), n. See ARUM *serpentaria.*

ALLUM, n. See ALUM.

ALLUME (It.), n. A^{3}l-lu′ma. Chalybeate springs in the island of Giglio. [L, 63.]

ALLURE (Fr.), n. A^{3}l-lu^{6}r. See GAIT.

ALLUS (Lat.), n. m. A^{2}l(a^{3}l)′lu^{3}s(lu^{4}s). The great toe. [L, 48.]—**A. pollex.** The thumb. [L, 45.]

ALLUX (Lat.), n. m. A^{2}l(a^{3}l)′lu^{3}x(lu^{4}x). See HALLUX.

ALLWOCHENTLICH (Ger.), adv. A^{3}l′voch^2-e^{2}nt-li^{2}ch^2. Weekly, once a week. [L, 46.] See HEBDOMADAL.

ALLYL, n. A^{2}l′i^{2}l. For deriv., see ALLIUM and *-yl.** Lat., *allylum.* Fr., *allyle.* Ger., *Allyl.* It., *allile.* Sp., *alilo.* Syn.: *acryl, propylenyl.* A univalent radicle of the composition $C_3H_5=CH_2:CH.CH'_2$, differing from the trivalent radicle glyceryl, $CH'_2-CH'-CH'_2$, in the double linking of its first 2 carbon atoms. Its compounds occur in oil of garlic and oil of mustard. A. in the free state always occurs as a double molecule. [B, 2, 4.] See DIALLYL.—**Acid a. sulphate.** See *A. sulphate.*—**A'acetessigester, A'acetessigsäure-Aethylester.** See ETHYL *allylacetoacetate.*—**A. acetate.** Fr., *acétate d'allyle.* Ger., *Essigsäure-Allylester.* A liquid of the constitution $CH_3.CO.O(C_3H_5)=C_5H_8O_2$. [B, 4.]—**A'acetate.** Fr., *allyl-acétate.* Ger., *allylessigsaures Salz.* A salt of allyl-acetic acid. [B.]—**A'acetic acid.** Fr., *acide allyl-acétique.* Ger., *Allylessigsäure.* It., *acido allil-acetico.* Sp., *ácido alil-acético.* A colorless oily liquid having the properties of a monobasic acid and the constitution $C_5H_8O_2=CH_2(C_3H_5)-CO.OH$, or that of acetic acid in which allyl replaces hydrogen. It is isomeric with tiglic and angelic acids. [B, 4.]—**A'acetic ether.** Fr., *éther allyl-acétique.* Ger., *Allylessigsäure-Ester.* It., *etere allil-acetico.* An allylacetate of a compound radicle, usually applied to ethyl a.-e. (ethyl allylacetate). [B, 2.]—**A'acetoacetate.** An acetoacetate in which a. replaces the radicle hydrogen. [B.] See ETHYL *allylacetoacetate.*—**A. acetone.** See METHYLISOCROTYL KETONE.—**A. alcohol.** Fr., *alcool allylique.* Ger., *Allylalkohol.* It., *alcool allilico.* A mobile liquid of pungent odor prepared by the action of oxalic acid upon glycerin and having the constitution $C_3H_6O=CH_2:CH-CH_2.OH$, isomeric with propionic aldehyde. [B, 3, 4.]—**A. alcohol bromide, A. alcohol chloride, A. alcohol cyanide.** Fr., *bromure d'alcool allylique, chlorure d'alcool allylique, cyanure d'alcool allylique.* Ger., *Allylalkolbromür, Allylalkoholchlorür, Allylalkoholcyanür.* Addition compounds of a. with chlorine, bromine, and cyanogen. See *A. alcohol dibromide, A. alcohol dichloride, A. alcohol dicyanide.*—**A. alcohol dibromide.** Fr., *dibromure d'alcool allylique, alcool allylique bibromé.* Ger., *Allylalkoholdibromür.* See DIBROMHYDRIN.—**A. alcohol dichloride.** Fr., *dichlorure d'alcool allylique, alcool allylique bichlore.* Ger., *Allylalkoholdichlorür.* See DICHLORHYDRIN.—**A. alcohol dicyanide.** Fr., *dicyanure d'alcool allylique.* Ger., *Allylalkoholdicyanür.* See DICYANHYDRIN.—**A. aldehyde.** Acrolein. [L, 65.]—**A'alkohol, A'alkoholbromür, A'alkoholchlorür, A'alkoholdibromür, A'alkoholdichlorür, A'alkoholdicyanür** (Ger.). See *A. alcohol, A. alcohol bromide,* etc.—**A. amine.** See ALLYLAMINE.—**A. and ethyl oxide.** See *Allylethyl ether.*—**A. and glyceryl oxide.** See TRIALLYLIN.—**A. and hydrogen sulphate.** Fr., *sulfate d'allyle et d'hydrogène.* Acid a. sulphate. See *A. sulphate.*—**A. and hydrogen sulphide.** Fr., *sulfure d'allyle et d'hydrogène.* See *A. mercaptan.*—**A. and methyl oxide.** See *Allylmethyl ether.*—**A. and phenyl oxide.** See *Allylphenyl ether.*—**A'aniline.** Fr., *allyl-aniline.* Ger., *Allylanilin.* It., *allilanilina.* Aniline in which a. replaces hydrogen: $N(C_6H_5)(C_3H_5)H=C_9H_{11}N$. [B, 2.]—**A. arsenide.** Fr., *arséniure d'allyle.* Ger., *Allylarseniür.* See TETRALLYLARSONIUM.—**A'äther** (Ger.). See *A. ether.*—**A'äthylather, A'äthyloxyd** (Ger.). See *Allylethyl ether.*—**A'benzene.** Fr., *allyl-benzine.* Ger., *Allylbenzol.* It., *allilbenzina.* Beta phenylpropylene. [B.] See PHENYLPROPYLENE.—**A. borate.** Fr., *borate d'allyle.* Ger., *Allylborat, Borsäure-Allylester.* It., *borato di allile.* Sp., *borato de alilo.* A liquid emitting pungent irritating vapors and having the composition $(C_3H_5)_3BO_3$. [B, 3.]—**A. bromide.** Fr., *bromure d'allyle.* Ger., *Allylbromür, Bromallyl.* It., *bromuro di allile.* Sp., *bromuro de alilo.* A liquid of pungent odor, having the composition $C_3H_5Br=CH_2:CH-CH_2Br$. [B, 3.] For the other bodies called bromides of a., see DIALLYL *tetrabromide* and TRIBROMHYDRIN.—**A'carbamide.** Fr., *allyl-carbamide.* Ger., *Allylcarbamid.* See *Allylurea.*—**A. carbamine.** Fr., *allyl-carbamine.* Ger., *Allylcarbamin.* A. isocyanide. [B, 3.] See *A. cyanide.*—**A. carbimide.** Fr., *allyl-carbimide.* Ger., *Allylcarbimid.* See *A. pseudocyanate.*—**A., carbonyl, and hydrogen sulphide.** See *Allylthiocarbonic acid.*—**A. carboxylamine.** Fr., *allyl-carboxylamine.* Ger., *Allylcarboxylamin.* See *A. pseudocyanate.*—**A. chloride.** Fr., *chlorure d'allyle.* Ger., *Allylchlorür.* It., *cloruro di allile.* Sp., *cloruro de alilo.* A liquid of pungent odor, boiling at 44·6° C., and having the composition $C_3H_5Cl=CH_2:CH-CH_2Cl$. [B, 3.]—**A. chlorobromhydrin.** Fr., *allyl-chlorobromhydrine.* Ger., *Allylchlorbromhydrin.* See CHLOROBROMHYDRIN.—**A'cyanamide.** Fr., *allyl-cyanamide.* Ger., *Allylcyanamid.* Syn.: *sinamine.* A substance of the composition $C_4N_2H_6=CN.NH.C_3H_5$, or, according to Hofmann, $C_3N_3(NH.C_3H_5)_3$, obtained by the action of lead hydroxide upon allylthiourea. It is a syrupy liquid, which, combined with water of crystallization $(2C_4N_2H_6+H_2O)$, forms prismatic crystals. It has a very bitter taste and a strong alkaline reaction, and possesses marked basic properties. [B, 3, 4.]—**A. cyanide.** Fr., *cyanure d'allyle.* Ger., *Allylcyanür.* It., *cianuro di allile.* Sp., *cianuro de alilo.* A compound of a. with cyanogen. *A. isocyanide, allylcarbamine,* $C_4H_5N=C\equiv N-CH_2.CH:CH_2$, is a mobile liquid, having an exceedingly penetrating and permanent disagreeable odor. [B, 3.]—**A. cyanocarbonate.** Fr., *cyanocarbonate d'allyle.* Ger., *Cyancarbonsäure-Allylester.* A body of the constitution $CO(CN)-O.C_3H_5=C_5H_5NO_2$. [B, 2.]—**A. cyanoformate.** Fr., *cyanoformate d'allyle.* Ger., *Cyanameisensäure-Allylester.* A colorless liquid, having an odor of mustard, formed by the decomposition of a. alcohol dicyanide. [B, 3.]—**A. dibromide.** Fr., *dibromure d'allyle.* Ger., *Allyldibromür.* It., *dibromuro di allile.* Sp., *dibromuro de alilo.* See DIALLYL *tetrabromide.*—**A. dichlorhydrin.** Fr., *allyl-dichlorhydrine.* Ger., *Allyldichlorhydrin.* A. alcohol dichloride. [B, 2.] See DICHLORHYDRIN.—**A'diethylcarbinol.** Fr., *allyl-diéthyl-carbinol.* Ger., *Allyldiäthylcarbinol.* A tertiary alcohol of the composition $C_8H_{16}O=(C_3H_5)(C_2H_5)_2.COH$. [B, 3.]—**A. diiodide.** Fr., *diiodure d'allyle.* Ger., *Allyldijodür.* See DIALLYL *tetraiodide.*—**A'diisopropylcarbinol.** Fr., *allyl-diisopropyl-carbinol.* Ger., *Allyldiisopropylcarbinol.* A tertiary alcohol of the composition $C_{10}H_{20}O=(C_3H_5)\left(\begin{matrix}CH_3\\CH_3\end{matrix}\right\rangle CH)_2.COH$. [B, 3.]—**A'dimethylcarbinol.** Fr., *allyl-diméthyl-carbinol.* Ger., *Allyldimethylcarbinol.* A tertiary alcohol of the composition $C_6H_{12}O=(C_3H_5)(CH_3)_2.COH$. [B, 2.]—**A'dipropylcarbinol.** Fr., *allyl-dipropyl-carbinol.* Ger., *Allyldipropylcarbinol.* A tertiary alcohol of the composition $C_{10}H_{20}O=(C_3H_5)(CH_3.CH_2.CH_2)_2.COH$. [B, 3.]—**A'dithiocarbamate.** A salt of allyldithiocarbamic acid. [B.]—**A. dithiocarbamic acid.** Fr., *acide allyl-dithiocarbamique.* Ger., *Allyldithiocarbaminsäure.* Syn.: *sulphosinapic acid, allylsulphocarbamic (allylthiocarbamic) acid.* A monobasic acid, known only through its salts, having the composition $NH(C_3H_5)-CS-S.H=C_4H_7NS_2$. [B, 3.]—**A'essigsäure** (Ger.). Allylacetic acid. [B.]—**A'essigsäure-Aethylester** (Ger.). Ethyl allylacetate. [B.]—**A'essigsäure-Ester** (Ger.). Allylacetic ether. [B.]—**A'ester** (Ger.). A compound a. ether; a salt of a. [B.]—**A. ether.** Fr., *éther allylique.* Ger., *Allyläther, Allylester.* It., *etere allilico.* Any compound of a.

with a non-metallic element or an acid radicle; particularly the compound of a. with oxygen, or diallyl oxide, $C_6H_{10}O = CH_2:CH-CH_2-O-CH_2-CH:CH_2$, a liquid lighter than water, having an odor of horse-radish, contained in crude oil of garlic. [B, 2, 3.]—**A'ethyl.** Fr., *allyl-éthyle.* Ger., *Allyläthyl.* It., *allil-etile.* See Amylene.—**A'ethyl ether.** Fr., *éther* (ou *oxyde*) *allyl-éthylique.* Ger., *Allyläthyläther, Allyläthyloxyd.* It., *etere* (o *ossido allil-etilico*). A liquid of the constitution $C_3H_5-O-C_2H_5 = C_5H_{10}O$. [B, 3, 4.]—**A'ethylic.** Fr., *allyl-éthylique.* Containing both a. and ethyl. [B.]—**A'ethylic oxide, A'ethyl oxide.** See *A'ethyl ether.*—**A'eugenol.** Fr., *allyl-eugénol.* Ger., *Allyleugenol.* A liquid having the composition $C_{13}H_{16}O_2 = C_6H_3(O.C_3H_5)(O.CH_3)$-$(C_3H_5)$. [B, 2.]—**A. formate.** Fr., *formiate d'allyle.* Ger., *Ameisensäure-Allylester.* It., *formiato di allile.* A liquid of pungent odor resembling that of mustard, having the composition $C_4H_6O_2 = CHO.OC_3H_5$. [B, 3.]—**A'harnstoff** (Ger.). Allylurea. [B.]—**A. hydrate.** Fr., *hydrate d'allyle.* Ger., *Allylhydrat.* It., *idrato di allile.* Sp., *hidrato de alilo.* A. alcohol.—**A. hydride.** Fr., *hydrure d'allyle.* Ger., *Allylhydrür.* It., *idruro di allile.* Propylene. [B, 2, 4.]—**A. hydrosulphide.** See *A. mercaptan.*—**A. iodide.** Fr., *iodure d'allyle.* Ger., *Allyljodür.* It., *ioduro di allile.* Sp., *ioduro de alilo.* A liquid of pungent garlicky odor having the constitution $C_3H_5I = CH_2:CH-CH_2I$. [B, 3.] For the so-called diiodide of a., see Diallyl *tetraiodide.*—**A. iododichloride.** Fr., *iododichlorure d'allyle.* Ger., *Allyljodürdichlorür.* See Iododichlorhydrin.—**A. isocyanate.** Fr., *isocyanate d'allyle.* Ger., *Allylisocyanat, Isocyansäure-Allylester.* It., *isocianato di allile.* See *A. pseudocyanate.*—**A. isocyanide.** Fr., *isocyanure d'allyle.* Ger., *Allylisocyanür.* It., *isocianuro di allile.* Sp., *isocianuro de alilo.* See *A. cyanide.*—**A. isosulphocyanate, A. isosulphocyanide, A. isothiocyanate.** Fr., *isosulfocyanure* (ou *isosulfocyanate* ou *isothiocyanate*) *d'allyle.* Ger., *Allylisosulfocyanür, Allylsulfocyanat, Allylthiocyanat.* It., *isosolfocianuro* (o *isosolfocianato*) *di allile.* See *A. pseudothiocyanate.*—**A'jodür** (Ger.). See *A. iodide.*—**A'jodürdichlorür** (Ger.). See *A. iododichloride.*—**A'malonic acid.** Fr., *acide allyl-malonique.* Ger., *Allylmalonsäure.* It., *acido allil-malonico.* A dibasic acid, isomeric with hydromuconic acid, having the constitution $C_6H_8O_4 = C(C_3H_5)H-(CO.OH)_2$, of malonic acid in which a. replaces hydrogen. [B, 4.]—**A. mercaptan.** Fr., *allyl-mercaptan.* Ger., *Allylmercaptan.* A liquid of ethereal garlicky odor having the composition $C_3H_5.SH$, or that of a. alcohol in which sulphur replaces oxygen. [B, 3, 4.]—**A'mercaptide.** Fr., *allyl-mercaptide.* Ger., *Allylmercaptid.* A compound of allyl mercaptan with a metal, of the general formula $(C_3H_5.S)_nR$, where R is a radicle of the quantivalence of *n*; an allylate in which sulphur replaces oxygen. [B.]—**A'methyl.** Fr., *allyl-méthyle.* Ger., *Allylmethyl.* It., *allil-metile.* Sp., *alil-metilo.* A radicle compounded of a. and methyl; normal butylene. [B.] See Butylene.—**A'methyl ether.** Fr., *éther* (ou *oxyde*) *allyl-méthylique.* Ger., *Allylmethyläther, Allylmethyloxyd.* It., *etere* (o *ossido*) *allil-metilico.* A colorless liquid of the constitution $C_4H_8O = CH_2:CH-CH_2-O-CH_3$, formed by the action of a. iodide upon sodium methylate. [B, 4.]—**A'methylic.** Fr., *allyl-méthylique.* It., *allil-metilico.* Pertaining to or consisting of a. and methyl. [B.]—**A'methylic oxide, A'methyl oxide.** See *A'methyl ether.*—**A'methylpropylcarbinol.** Fr., *allyl-méthyl-propyl-carbinol.* Ger., *Allylmethylpropylcarbinol.* A tertiary alcohol of the composition $C_8H_{16}O = (C_3H_5)(CH_3)(C_3H_7)COH$. [B, 3.]—**A. monobromide.** Fr., *monobromure d'allyle.* Ger., *Allylmonobromür.* It., *monobromuro di allile.* Sp., *monobromuro de alilo.* See *A. bromide.*—**A. monochloride.** Fr., *monochlorure d'allyle.* Ger., *Allylmonochlorür.* It., *monocloruro di allile.* Sp., *monocloruro de alilo.* See *A. chloride.*—**A. monoiodide.** Fr., *monoiodure d'allyle.* Ger., *Allylmonjodür.* It., *monoioduro di allile.* See *A. iodide.*—**A. mustard-oil.** Ger., *Allylsenföl.* See *A. pseudothiocyanate.*—**A. nitrate.** Fr., *azotate d'allyle.* Ger., *Allylnitrat, Salpetersäure-Allylester.* It., *nitrato di allile.* Sp., *nitrato de alilo.* A mobile liquid of pungent odor having the constitution $C_3H_5.NO_3$. [B, 3.]—**A. oxalate.** Fr., *oxalate d'allyle.* Ger., *Allyloxalat, Oxalsäure-Allylester.* It., *ossalato di allile.* Sp., *oxalato de alilo.* An oily liquid, having an odor of mustard, of the composition $C_8H_{10}O_4 = C_2O_2.O_2(C_3H_5)_2$. [B, 2, 3.]—**A'oxide.** Fr., *oxyde d'allyle.* Ger., *Allyloxyd.* It., *ossido di allile.* Sp., *óxido de alilo.* See *A. ether.*—**A'oxybutyric acid.** Fr., *acide allyl-oxybutyrique.* Ger., *Allyloxybuttersäure.* It., *acido allil-ossibutirico.* A monobasic acid having the constitution $C_7H_{12}O_3 = CH_3.CH(OH).CH(C_3H_5)-CO.OH$, or that of hydroxybutyric acid in which a. replaces hydrogen. [B, 4.]—**A'phenol.** Fr., *allyl-phénol.* Ger., *Allylphenol.* It., *allil-fenolo.* Syn.: *anol.* A substance forming laminar crystals of the constitution $C_9H_{10}O = C_6H_4(OH)(C_3H_5)$, prepared by the action of potash upon anisic aldehyde. [B, 158.]—**A'phenylether.** Fr., *éther* (ou *oxyde*) *allyl-phénylique.* Ger., *Allylphenyläther. Allylphenyloxyd.* It., *etere* (o *ossido*) *allil-fenilico.* A colorless, strongly refracting liquid, of the same density as water, formed by the action of sodium phenylate upon a. bromide, and having the composition $C_9H_{10}O = C_6H_5.O-CH_3$, isomeric with allylphenol. [B, 2.]—**A'phenylic.** Fr., *allyl-phénylique.* It., *allil-fenilico.* Containing both a. and phenyl. [B.]—**A'phenylic oxide, A'phenyl oxide.** See *A'phenyl ether.*—**A'piperidine.** Fr., *allyl-pipéridine.* Ger., *Allylpiperidin.* A liquid, boiling at 140° C., having the composition $C_8H_{15}N = C_5H_{10}N.C_3H_5$. [B, 79.]—**A. pseudocyanate.** Fr., *pseudocyanate d'allyle.* Ger., *Allylpseudocyanat, Pseudocyansäure-Allylester.* Syn.: *allylcarboxylamine, a. isocyanate.* An oily liquid, of pungent irritating odor, formed by the action of potossium pseudocyanate upon a. iodide, and having the constitution $C_4H_5NO = CH_2:CH-CH_2-N:C:O$. [B, 4.]—**A. pseudosulphocyanate, A. pseudothiocyanate.** Fr., *pseudosulfocyanate* (ou *pseudothiocyanate*) *d'allyle.* Ger., *Allylpseudosulfocyanat, Allylpseudothiocyanat.* Syn.: *a. isothiocyanate, a. isosulphocyanate, a. mustard-oil.* A substance of the composition $C_4H_5NS = CH_2:CH.CH_2-N:C:S$, produced by the decomposition of myronic acid (a glucoside contained in mustard-seed) under the combined action of water and myrosin (an albuminous ferment present in the seeds); also produced artificially by the action of potassium thiocyanate upon a. iodide. It is a colorless oily liquid, of the sp. gr. of 1·036, at 0° C., insoluble in water, soluble in alcohol and in ether; has an exceedingly penetrating pungent odor, and sharp biting taste; is very irritant to the mucous membranes when inhaled; and, locally applied, is a vesicant. It has been employed as a counter-irritant. [B, 2, 3, 4.]—**A'rhodanür** (Ger.). A. thiocyanate. [B, 49.]—**A'schwefelharnstoff** (Ger.). A'thiourea. [B.]—**A'schwefelsäure** (Ger.). A'sulphuric acid. [B.]—**A'schwefelwasserstoff** (Ger.). A. mercaptan. [B.]—**A'senföl** (Ger.). A. mustard-oil. [B.] See *A. pseudothiocyanate.*—**A'sulfat** (Ger.). 1. A. sulphate. 2. A'sulphate. [B.]—**A.-sulfate** (Fr.). A'sulphate. [L, 41.]—**A'sulfhydrique** (Fr.). See Éther *allylsulfhydrique.*—**A'sulfocarbamat** (Ger.), **A'sulfocarbamate** (Fr.). An allyldithiocarbamate. [B; L, 41.]—**A'sulfocarbaminsäure** (Ger.). Allyldithiocarbamic acid. [B.]—**A'sulfocarbamique** (Fr.). See *A'sulphocarbamic acid.*—**A'sulfocarbonat** (Ger.), **A.-sulfocarbonate** (Fr.). See *A'thiocarbonate.*—**A'sulfocarbonique** (Fr.). See *A'sulphocarbonic acid.*—**A'sulfocarbonsäure** (Ger.). Allylthiocarbonic acid. [B.]—**A'sulfocyanat, A'sulfocyanür** (Ger.). See *A. thiocyanate.*—**A'sulfonique** (Fr.). See *A'sulphonic acid.*—**A'sulfonsäure** (Ger.). Allylsulphonic acid. [B.]—**A'sulfurée** (Fr.). Allylthiourea. [B.]—**A'sulfür, A'sulfuret** (Ger.). A. sulphide. [B; L, 37.]—**A'sulfurique** (Fr.). See *A'sulphuric acid.*—**A. sulphate.** Fr., *sulfate d'allyle.* Ger., *Allylsulfat, Schwefelsäure-Allylester.* It., *solfato di allile.* Sp., *sulfato de alilo.* A compound of a. and sulphuric acid. The only known sulphate of a. is *acid a. sulphate*, or *allylsulphuric acid*, a substance of the composition $C_3H_5.HSO_4$, acting as a monobasic acid, forming salts called allylsulphates. [B, 3.]—**A'sulphate.** (Fr.), *allyl-sulfate.* Ger., *Allylsulfat.* It., *allil-solfato.* A salt of allylsulphuric acid; a compound of a base with acid a. sulphate, of the general formula $(C_3H_5.SO_4)_nR$, in which R is a radicle of the quantivalence of *n.*—**A. sulphide.** Fr., *sulfure d'allyle.* Ger., *Allylsulfür.* It., *solfuro di allile.* Sp., *sulfuro de alilo.* Syn.: *diallyl sulphide, thioallyl ether.* A substance of the constitution $C_6H_{10}S = CH_2:CH.CH_2-S-CH_2.CH:CH_2$, forming the chief constituent of rectified oil of garlic (*q. v.* under *Allium sativum*), and developed in the leaves and seeds of many cruciferous plants; also obtainable artificially by the action of potassium sulphide upon a. iodide. When pure, it is a colorless, oily liquid of powerful alliaceous odor. [B, 3, 4.]—**A'sulphocarbamate.** Fr., *allyl-sulfocarbamate.* Ger., *Allylsulfocarbamat.* See *A'dithiocarbamate.*—**A'sulphocarbamic acid.** Fr., *acide allyl-sulfocarbamique.* Ger., *Allylsulfocarbaminsäure.* It., *acido allil-solfocarbamico.* See *A'dithiocarbamic acid.*—**A'sulphocarbonate.** Fr., *allylsulfocarbonate.* Ger., *Allylsulfocarbonat.* See *A'thiocarbonate.*—**A'sulphocarbonic acid.** Fr., *acide allyl-sulfocarbonique.* Ger., *Allylsulfocarbonsäure.* It., *acido allil-solfocarbonico.* See *A'thiocarbonic acid.*—**A. sulphocyanate, A. sulphocyanide.** Fr., *sulfocyanate* (ou *sulfocyanure*) *d'allyle.* Ger., *Allylsulfocyanat, Allylsulfocyanür.* It., *solfocianato* (o *solfocianuro*) *di allile.* See *A. thiocyanate.*—**A'sulphonic acid.** Fr., *acide allyl-sulfonique.* Ger., *Allylsulfonsäure.* A monobasic acid produced by the oxidation of a. sulphide, and having the constitution $C_3H_5SO_3 = CH_2:CH.CH_2-SO_2.OH$. [B, 4.]—**A. sulphurea.** Fr., *allylsulfurée.* Ger., *Allylschwefelharnstoff.* See *A'thiourea.*—**A'sulphuric acid.** Fr., *acide allyl-sulfurique.* Ger., *Allylschwefelsäure.* It., *acido allil-solforico.* See under *A. sulphate.*—**A. thioalcohol.** Fr., *allyl-thioalcool.* Ger., *Allylthioalkohol.* See *A. mercaptan.*—**A'thioäther** (Ger.). See *A. sulphide.*—**A'thiocarbamate.** Fr., *allyl-thiocarbamate.* Ger., *Allylthiocarbamat.* See *A'dithiocarbamate.*—**A'thiocarbamic acid.** Fr., *acide allyl-thiocarbamique.* Ger., *Allylthiocarbaminsäure.* See *A'dithiocarbamic acid.*—**A'thiocarbamide.** Fr., *allyl-thiocarbamide.* Ger., *Allylthiocarbamid.* See *A'thiourea.*—**A'thiocarbimide.** Fr., *allyl-thiocarbimide.* Ger., *Allylthiocarbimid.* See *A. pseudothiocyanate.*—**A'thiocarbonate.** Fr., *allyl-thiocarbonate.* Ger., *Allylthiocarbonat.* A salt of allylthiocarbonic acid. [B.]—**A'thiocarbonic acid.** Fr., *acide allyl-thiocarbonique.* Ger., *Allylthiocarbonsäure.* A substance, occurring under the form of yellow acicular crystals, having the properties of a monobasic acid, and the formula $C_4H_6S_2O. = (C_3H_5)S-CO-SH$, or that of thiocarbonic acid in which a. replaces hydrogen. [B, 2.]—**A. thiocyanate.** Fr., *thiocyanate d'allyle.* Ger., *Allylthiocyanat, Thiocyansäure-Allylester.* A substance of the composition $C_4H_5SN = N\equiv C-S-CH_2.CH:CH_2$, isomeric with a. pseudothiocyanate, and readily convertible into the latter. It is a colorless, highly refracting, oily liquid, having an odor resembling at once that of garlic and that of hydrocyanic acid. It produces headache, nausea, and nervous disorders when inhaled. [B, 2, 3.]—**A. thioether.** Fr., *allyl-thioéther.* Ger., *Allylthioäther.* See *A. sulphide.*—**A'thioharnstoff** (Ger.). A'thiourea. [B.]—**A'thiourea.** Fr., *allyl-thiourée.* Ger., *Allylthioharnstoff.* Syn.: *sinamine* [Will.], *mustard-oil ammonia, allylthiocarbamine.* A base, formed by the action of ammonia on oil of mustard, and having the constitution of thiourea in which a. replaces an atom of hydrogen; $C_4H_8N_2S = H_2N-CS-NH(C_3H_5)$. It forms crystals moderately soluble in water, readily soluble in alcohol. Given internally, it produces cardiac palpitation and insomnia, and is excreted by the urine as ammonium thiocyanate. [Wöhler and Frerichs (B, 3).]—**A. tribromide.** Fr., *tribromure d'allyle.* Ger., *Allyltribromür.* It., *tribromuro di allile.* Sp., *tribromuro de alilo.* See Tribromhydrin.—**A. trichloride.** Fr., *trichlorure d'allyle.* Ger., *Allyltrichlorür.* It., *tricloruro di allile.* Sp., *tricloruro de alilo.* See Trichlorhydrin.—**A'urea.** Fr., *allyl-urée.* Ger., *Allylharnstoff.* It., *allil-urea.* A substance forming prismatic crystals readily soluble in water, having the constitution $C_4H_8N_2O = NH_2-CO-NH(C_3H_5)$, being that of urea in which a. replaces 1 atom of hydrogen. [B, 3.] Cf. Diallyl *urea.*—**A'xanthic acid.** Fr., *acide allyl-xanthique.* See *A'thiocarbonic acid.*—**Ameisensaures A.** (Ger.). See *A. formate.*—**Borsaures A.** (Ger.). See *A. sulphate.*

ALLYLAMINE, n. A^{2}l-i^{2}l'a^{2}m-en. From *allyl* and *amine.* Fr., *allylamine.* Ger., *Allylamin.* It., *allilamina, allilammina.* A base, $C_3H_7N = N(C_3H_5)H_2$, formed by the substitution of allyl for an atom of hydrogen in ammonia. It is a liquid, of strong ammoniacal odor, the vapor of which when inhaled produces sneezing and lacrimation. It combines with acids to form crystalline salts. [B, 3.] See also TRIALLYLAMINE and TETRALLYLAMMONIUM.

ALLYLATE, n. A^{2}l'i^{2}l-at. Fr., *allylate.* Ger., *Allylat.* It., *allilato.* Sp., *alilato.* A derivative of allyl alcohol in which the hydrogen of the latter is replaced by a base. The general formula of the a's is $(CH_2 : CH.CH_2.O)_n.R$, where R is a radicle the quantivalence of which is *n.* [B, 4.]

ALLYLENE, n. A^{2}l'li^{2}l-en. From *allyl* and *-ene.** Fr., *allylène.* Ger., *Allylen.* It., *allilene.* Syn.: *propine.* A colorless gas, having the constitution $C_3H_4 = CH_3 - C \equiv CH$, *i. e.*, bearing the same relation to allyl that ethylene bears to ethyl. In composition it acts as a bivalent radicle, $CH_3 - C' = CH'$, or a quadrivalent radicle, $CH_3 - C'' - CH''$. An isomeric modification, *allene.* or *isoallylene,* has the composition $CH_2 = C = CH_2$. [B, 2, 4.]—**A a., Alpha-a'.** Ordinary a.—**A. acetate.** Fr., *acétate d'allylène.* Ger., *Allylenacetat.* A compound of a. and acetic acid. The *diacetate,* $C_7H_{10}O_4 = C_3H_4(C_2H_3O_2)_2$, is known. [B, 2.]—**A. bromide.** Fr., *bromure d'allylène.* Ger., *Allylenbromür.* See *A. dibromide* and *A. tetrabromide.*—**A. chloride.** Fr., *chlorure d'allylène.* Ger., *Allylenchlorür.* See *A. dichloride* and *A. tetrachloride.*—**A. diacetate.** Fr., *diacétate d'allylène.* Ger., *Allylendiacetat.* See *A. acetate.*—**A. dibromide.** Fr., *bibromure d'allylène.* Ger., *Allylendibromür.* An oily liquid of the composition $C_3H_4Br_2 = CH_3.CBr = CH.Br$. [B, 4.]—**A. dichloride.** Fr., *bichlorure d'allylène.* Ger., *Allylendichlorür.* A liquid of the composition $C_3H_4Cl_2 = CH_3.CCl = CH.Cl$. [B, 4.]—**A. dihydriodide.** A substance of the composition $C_3H_6I_2 = C_3H_4.(HI)_2$. [B, 2.]—**A. dihydrobromide.** A substance of the composition $C_3H_6Br_2 = C_3H_4(HBr)_2$. [B, 2.]—**A. diiodide.** Fr., *biiodure d'allylène.* Ger., *Allylendijodür.* A liquid of the composition $C_3H_4I_2 = CH_3.CI = CH.I$. [B, 4.]—**A. hydriodate, A. hydriodide.** A compound of a. with hydriodic acid, of the formula $C_3H_4.HI$. [B, 2.] See also *A. dihydriodide.*—**A. hydrobromate, A. hydrobromide.** A compound of a. with hydrobromic acid, of the composition $C_3H_4.HBr$. [B, 2.] See also *A. dihydrobromide* and *A. hydrobromiodide.*—**A. hydrobromiodide.** A substance of the composition $C_3H_4.HBr.HI$. [B, 2.]—**A. hydrochlorate, A. hydrochloride.** A compound of a. with hydrochloric acid.—**A. iodide.** Fr., *iodure d'allylène.* Ger., *Allylenjodür.* See *A. diiodide* and *A. tetraiodide.*—**A. monohydriodide, A. monohydrobromide.** See *A. hydriodide* and *A. hydrobromide.*—**A. oxide.** Fr., *oxyde d'allylène.* Ger., *Allylenoxyd.* A body of the constitution $C_3H_4.O = CH_3.C\overset{O}{=\!=}CH$. According to Watts. acrolein (formed by the oxidation of a.) has this formula. [B, 2, 4.]—**A. tetrabromide.** Fr., *tétrabromure d'allylène.* Ger., *Allylentetrabromür.* An oily liquid of the constitution $C_3H_4Br_4 = CH_3.CBr_2 - CHBr_2$. An isomeric form, *allene tetrabromide,* $CH_2Br - CBr_2 - CH_2Br$, is also known. [B. 2, 158.]—**A. tetrachloride.** Fr., *tétrachlorure d'allylène.* Ger., *Allylentetrachlorür.* A liquid of the composition $C_3H_4Cl_4 = CH_3.CCl_2 - CH.Cl_2$. [B, 4.]

ALLYLENIC, adj. A^{2}l-li^{2}l-e^{2}n'i^{2}k. Fr., *allylénique.* Of or pertaining to allylene. [B.]

ALLYLIC, adj. A^{2}l-li^{2}l'i^{2}k. Fr., *allylique.* It., *allilico.* Sp., *alilico.* Of or pertaining to allyl.—**A. alcohol, A. ether.** See under ALLYL.

ALLYLIDE, n. A^{2}l'li^{2}l-i^{2}d. Fr., *allylide.* Ger., *Allylid.* A compound of allyl directly with a base. [B. 3.]

ALLYLIN, n. A^{2}l'li^{2}l-i^{2}n. Fr., *allyline.* Ger., *Allylin.* A substance having the composition $C_6H_{12}O_3 = C_3H_5(OH)_2.O(C_3H_5)$, being that of glycerin in which a molecule of allyl replaces an atom of hydroxylic hydrogen; a viscid liquid obtained from the syrupy residue left behind in the process of rectification of crude allyl alcohol. [B, 2, 3.] See TRIALLYLIN.

ALLYLOXYD (Ger.), n. A^{3}l'lu^{6}l-o^{2}x-u^{6}d. Allyl oxide; allyl ether. [B.]—**Borsaures A., Essigsaures A.,** etc. See *Borsaures* ALLYL, *Essigsaures* ALLYL, etc.

ALLYLUM (Lat.), n. n. A^{2}l(a^{3}l)'li^{2}l(lu^{6}l)-u^{3}m(u^{4}m). Allyl. [B, 93.]

ALLYSSINEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-li^{2}s(lu^{6}s)-si^{2}n'e^2-e(a^3-e^2). A tribe of cruciferous plants established by Brongniart. [B, 170.]

ALLZEIT-SCHMERGEL (Ger.), n. A^{3}l'tzit-shmar-ge^{2}l. The *Chenopodium bonus Henricus.* [B, 180.]

ALMA (Lat.), n. f. A^{2}l(a^{3}l)'ma^3. Gr., ἅλμη. 1. Sea-water, brine. 2. A salt incrustation. 3. Saltness, especially in the juices of plants. [Theophrastus (A, 311).]

ALMA (Lat.), n. n. A^{2}l(a^{3}l)'ma^3. Gen., *al'matos(-tis).* Gr., ἅλμα. 1. A fœtal movement. [L, 84.] 2. A pulsation, palpitation. [Hippocrates (A, 311).]

ALMABRI, n. An alchemical term for a stone resembling amber. [Ruland (L, 53).]

ALMACIGA (Sp.), n. A^{3}l-ma^6'thi^2-ga^3. Mastic. [B.]

ALMAFALA (Port.), n. A cold saline spring in Portugal. [L, 105.]

ALMAGER, n. See ALMAGRA.

ALMAGI, n. See ALHAGI.

ALMAGRA, ALMAGRE, n's. Alchemical names for: 1. A washing, or the thing washed. [Ruland (L, 84), L, 116.] 2. Red earth, red bole. [L, 53, 73.] 3. White sulphur. [L, 104.]

ALMAGRO (Sp.), n. A^{3}l-ma^3'gro. See NAVA.

ALMAKANDA, ALMAKIST, n's. See ALMETAT.

ALMANDA CATHARTICA (Lat.), n. f. A^{2}l(a^{3}l)-ma^{2}nd-(ma^{3}nd)'a^3. A plant growing in Cayenne and Surinam; used by the natives as a remedy for colic; supposed to be cathartic. [L, 97.]

ALMARAGO, n. See CORAL.

ALMARCAB, ALMARCARIDA, ALMARCAT, ALMARCAZIDA, ALMARCHAZ, n's. See ALMETAT.

ALMARGAN, ALMARGE, ALMARGEN, n's. Alchemical names for coral. [Ruland (L, 53), L, 84, 104.]

ALMARIAB, n. See ALMETAT.

ALMARKASITA, n. An alchemical name for mercury. [Ruland, Johnson (L, 53).]

ALMARTACK, ALMARTAK, n's. Sp., *almartaga.* See ALMETAT.

ALMAS, n. A Hungarian village where there are warm springs containing hydrogen sulphide. [L, 49, 63.]

ALMASTIGA (Sp.), n. A^{3}l-ma^{3}s'ti^{2}g-a^3. Mastic. [B.]

ALMATATICA, n. An alchemical name for copper. [Ruland, Johnson (L, 53).]

ALME (Lat.), n. f. A^{2}l(a^{3}l)'me(ma). See ALMA, n. f.

ALMECASIDE, ALMECAT, n's. Alchemical names for copper. [B, 50; L, 53, 104.]

ALMECEGA (Port.), n. Mastic. [A, 381.]

ALMECHASIDE, ALMECHASITE, n's. See ALMECASIDE.

ALMECIGA (Sp.), n. A^{3}l-ma'thi^2-ga^3. Mastic. [A, 334.]—**A. molle** [Nees v. Esenbeck] (Lat.). A Brazilian resin, apparently identical with elemi resin, derived from the almecigo (*Icica icicariba*); gray or yellowish opaque pieces. mixed with purer translucent specimens, completely soluble in ether, partially soluble in alcohol, and inflammable. [B, 180.]

ALMECIGO (Port.), n. A Brazilian tree, said to be the *Icica icicariba* of De Candolle. [B, 180.]

ALMEIDA DE SAYAGO (Sp.), n. A^{3}l-ma'e-da^3 da sa^3-ya^3'go. A village in the province of Zamora, in Spain, where there is an alkaline sulphurous spring, the waters of which are used for dropsy, paralysis, rheumatism, and diseases of the kidneys, liver, etc. [A, 255.]

ALMELILETU (Ar.), n. A name applied by Avicenna to the heat left after a fever, also to an unnatural heat less than that of fever. [L, 53, 84.]

ALMENDORA, n. A South American name for the *Geoffroya superba.* [L, 67.]

ALMENE, n. See SAL *gemmæ.*

ALMERIA (Sp.), n. A^{3}l-ma-re'a^3. See ALHAMILLA.

ALMÉSIGA, n. A native name for a tree found on the Congo, and for its gum, which is used by the natives for a variety of diseases. [L, 105.]

ALMETAT, n. Ar., *al-mourtak* or *al-martak.* An alchemical name for litharge. [B, 52.]

ALMEZERION (Ar.), n. The *Cneorum tricocum.* [L, 105.]

ALMISA (Ar.), n. Musk. [L, 84.]

ALMISADIR, ALMISADRE, n's. Ar., *al-noshádir.* Alchemical names for sal ammoniac and verdigris. [B, 50, 52.]

ALMISARAB (Ar.), n. Earth. [L, 104.]

ALMISDACH, ALMISHDACH (Ar.), n's. See MISDACH.

ALMIZADIR, n. See ALMISADIR.

ALMOGIA (Sp.), n. A^{3}l-mo'he-a^{3}. A town in Andalusia, Spain, having cold sulphurous springs. [A, 385.]

ALMOHARIN (Sp.), n. A^{3}l-mo-a^{3}-ren'. A village in the province of Badajoz, in the capitanía of Estramadura, Spain, where there is a mineral spring called Carasco (*q. v.*). [A, 375.]

ALMOND, n. A^{2}m'u^{3}nd. Gr., ἀμυγδάλη. Lat., *amygdala.* Fr., *amande.* Ger., *Mandel.* It., *mandorla.* Sp., *almendra.* The seed or nut of the *Amygdalus communis.* [B.]—**African a.** The *Brabejum stellatifolium.* [L, 67.]—**A. biscuits.** See *A. bread.*—**A. bloom.** A cosmetic preparation made by boiling 4 parts of Brazil dust in 96 of water, straining and adding 3 of isinglass, 8 of grana silvestrica (or 1 part of cochineal), 4 of alum, and 2 of borax. [L, 45.]—**A. bread.** Bread made of flour of sweet a's and white of egg; used as a food for diabetics. [L, 65.]—**A. cake.** Lat., *placenta amygdalæ.* The mass left after the oil has been expressed from a's. Used for washing the skin. [A, 377.]—**A. coffee.** See *Roasted a's.*—**A. flavor.** A liquid preparation made from bitter a's, used in cookery; poisoning is said to have occurred from its use. [L, 63.]—**A. legumin.** See AMANDIN.—**A. milk.** See *Mistura* AMYGDALÆ.—**A. mixture.** See *Mistura* AMYGDALÆ.—**A. of the Amazon.** The *Geoffroya superba.* [L, 67.]—**A's of the ears, A's of the throat.** The tonsils. [L, 84.]—**A. oil.** See *Oleum* AMYGDALÆ.—**A. paste.** See *Pasta* AMYGDALÆ.—**A. powder.** Powdered a. cake, used for washing the hands. [L, 63.]—**Artificial oil of bitter a's.** Nitrobenzene. [B.]—**Bitter a.** Lat., *amygdala amara* [U. S. Ph., Br. Ph.], *amygdalæ amaræ* [Ger. Ph.]. Fr., *amande amère.* Ger., *bittere Mandeln.* It., *mandorle amare.* Sp., *almendras amargas.* The seed of the *Amygdalus communis,* var. *amara;* an oblong flattened seed, covered with a brownish testa, linearly marked, and containing a white, oily, dicotyledonous embryo (kernel). It has a bitter taste, and, triturated with water, forms an emulsion having the odor of hydrocyanic acid. It contains a crystalline substance (amygdalin) and about 43 per cent. of volatile oil. There are three varieties, French, Sicilian, and Barbary. It was formerly used in pulmonary and dyspeptic affections, but is now seldom used except for flavoring. In large quantities it is poisonous. [A, 377; B, 5; L, 78.]—**Bitter-a. water.** See *Aqua* AMYGDALÆ *amaræ.*—**Blanched a's.** Lat., *amygdalæ decorticatæ.* A. kernels deprived of their husks previously softened by soaking for a short time in warm water. [A, 377; B.]—**Burnt a's.** See *Roasted a's.*—**Compound powder of a's, Confection of a's.** See *Pulvis* AMYGDALÆ *compositus.*—**Country a.** The fruit of the *Terminalia catappa.* [B, 172; L, 67.]—**Earth-a.** See ARACHIS *hypogœa.*—**Emulsion of a's.** See *Mistura* AMYGDALÆ.—**Essence of bitter a., Essential oil of a.** See *Oleum* AMYGDALÆ *amaræ.*—**Expressed oil of a.** See *Oleum* AMYGDALÆ *expressum.*—**Guiana a's.** Brazil-nuts. [A, 377.]—**Indian a.** See *Country a.*—**Java a's.** The nuts or kernels of *Canarium commune.* [A, 377; B, 172.]—**Jordan a's.** A fine variety of sweet a's brought from Malaga. [B.]—**Milk of a's.** See *Mistura* AMYGDALÆ.—**Oil of a's.** See *Oleum* AMYGDALÆ.—**Oil of bitter a's.** See *Oleum* AMYGDALÆ *amaræ.*—**Oil of sweet a's.** See *Oleum* AMYGDALÆ *dulcis.*—**Paper-shelled a's.** A's derived from the *Amygdalus fragilis,* having a thin shell easily broken with the fingers. [B.]—**Purified oil of bitter a.** Oil of bitter a. freed from hydrocyanic acid and benzoin; benzoic aldehyde. [B.]—**Roasted a's.** Used for coloring and flavoring liqueurs and confectionery, and formerly as a substitute for coffee. [A, 377.]—**Sweet a.** See AMYGDALA *dulcis.*—**Syrup of a.** See *Syrupus* AMYGDALÆ.—**Valencia a's.** A variety of sweet a's brought from Valencia, Spain. [B, 5.]—**Volatile oil of a., Volatile oil of bitter a.** See *Oleum* AMYGDALÆ *amaræ.*

ALMONDWORTS, n. pl. A^{2}m'u^{3}nd-wu^{5}rtz. Lindley's name for the *Amygdaleœ* (*Drupaceœ*). [B.]

ALMORADUZ (Sp.), n. A^{3}l-mo-ra^{3}'duth^{2}. The sweet marjoram (*Origanum heracleoticum*).

ALMOTI, n. Allspice. [B, 180.]

ALMUCHABALA (Ar.), n. The search for the philosopher's stone. [L, 41.]

ALMUG (Heb.), n. See ALGUMMIN.

ALMURADIEL, ALMURADUL (Sp.), n's. A^{3}l-mu-ra^{3}-de-e^{2}l', -dul'. A town in Spain having ferruginous springs. [A, 385.]

ALMURI (Ar.), n. A cathartic preparation mentioned by Rhazes. [L, 116.]

ALMYZA, ALMYZINTHRA (Ar.), n's. Quicklime. [L, 104.]

ALNABATI (Ar.), n. 1. A gentle cathartic. [Avicenna, Serapion (L, 97).] 2. The fruit of the carob-tree. [Avicenna (L, 63).]

ALNEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)'ne^{2}-e(a^{3}-e^{2}). A tribe of betulaceous plants established by Spach, including *Alnus.* [B, 170.]

ALNEC, n. An alchemical name for tin. [B, 50.]

ALNERIC, n. See SULPHUR *vivum.*

ALNICOLUS (Lat.), adj. A^{2}l(a^{3}l)-ni^{2}k'o-lu^{3}s(lu^{4}s). From *alnus,* the alder, and *colere,* to live on. Parasitic on alders. [L, 116.]

ALNIFOLIUS (Lat.), adj. A^{2}l(a^{3}l)-ni^{2}-fo'li^{2}-u^{3}s(u^{4}s). From *alnus,* the alder, and *folium,* a leaf. Having leaves resembling those of the alder (e. g., *Clethris alnifolia*). [B.]

ALNUS (Lat.), n. f. A^{2}l(a^{3}l)'nu^{3}s(nu^{4}s). From Celtic, *al,* near, and *lan,* a river-bank. Fr., *aune.* Ger., *Erle, Eller.* It., *alno.* Sp., *alamo.* The alder, a genus of betulaceous trees and shrubs. [B, 19.]—**Alni nigræ bacciferæ cortex, Alni nigræ cortex.** The bark of *Rhamnus frangula.* [B, 180.]—**A. communis** [Desfontaines]. See *A. glutinosa.*—**A. emarginata** [Krocker]. Fr., *aune rogné.* Syn.: *Betula emarginata.* A variety of *A. glutinosa.* [B, 173.]—**A. frangula.** See RHAMNUS *frangula.*—**A. glauca.** See *A. incana.*—**A. glutinosa** [Gärtner]. Fr., *aune commun, verne.* Ger., *Eller.* Sp., *aliso.* The common European alder; found in warm and moist regions as a tree upward of 40 feet high, but in cold, mountainous districts as a bushy shrub. Its leaves and young shoots are covered with a glutinous substance; hence its specific name. The bark (Lat., *cortex alni* [seu *betulæ alni*]; Fr., *écorce d'aune;* Ger., *Erlenrinde*) is found in commerce in quills or curved pieces of a brownish or ash-gray color, the young bark having reddish or brownish dots. The bark of the American variety is of a darker color. Alder bark contains from 15 to 20 per cent. of tannin, and has been used for astringent gargles, also in diarrhœa and hæmaturia. The leaves also are astringent and bitter, and have been used locally for excessive sweating of the feet, and as a discutient and antilactescent applied to the breast. [B, 5, 19, 97, 180; L, 65, 85.]—**A. incana** [Willdenow]. A shrub or small tree growing in Canada and the northern part of the United States, having serrated leaves pubescent inferiorly. The bark is used as a hæmostatic. [L, 65, 85.]—**A. nigra, A. nigra baccifera.** Fr., *aune noir.* Ger., *Schwarzeller.* The black, or berry-bearing, alder. [L.] See RHAMNUS *frangula.*—**A. papyrifera** [Michaux]. See BETULA *papyracea.*—**A. rotundifolia.** See *A. glutinosa.*—**A. rubra** [Tuckerman]. See *A. serrulata.*—**A. serrulata** [Willdenow]. The common American (or smooth) alder; a shrub from 15 to 20

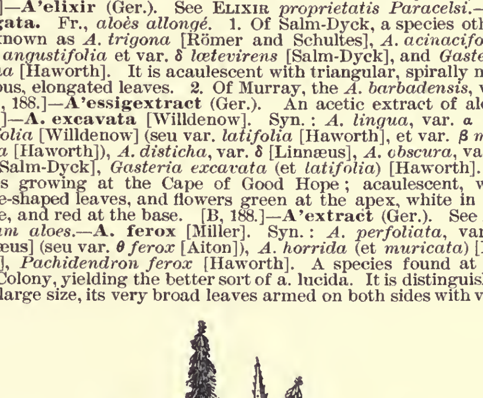
ALNUS GLUTINOSA. (AFTER B. FRANK [A, 304].)

feet high, growing in swamps and by river-banks. The leaves are serrulate and smooth inferiorly. Its medicinal properties are the same as those of *A. glutinosa.* [B, 5; L, 61.]—**Cortex alni.** Fr., *écorce d'aune.* Ger., *Erlenrinde.* The bark of *A. glutinosa* (*q. v.*). [B.]—**Folia alni.** Ger., *Ellerblätter.* The leaves of *A. glutinosa* (*q. v.*). [B, 180.]

ALO, n. An African name for the dried and powdered leaves of *Adansonia digitata,* used as a condiment and antihidrotic. [B, 173.]

ALOÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)'o-e(a^{3}-e^{2}). A family of plants comprising *Aloe, Agave, Yucca, Dracœna,* and other genera. [B, 170.]

ALOANAC (Ar.), n. See ALHENOT.

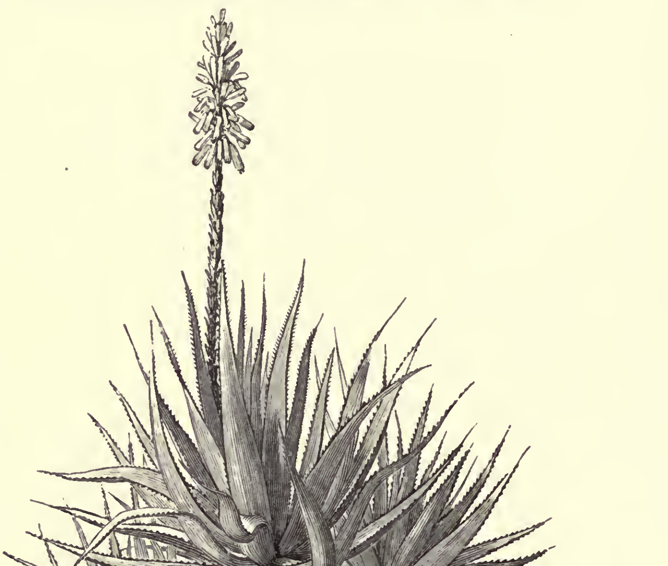


ALOCASIA (Lat.), n. f. A^{2}l(a^{3}l)-o-ka(ka^{3})'zi^{2}(si^{2})-a^{3}. Fr., *alocasie.* Ger., *Alocasie.* A section of the botanical genus *Colocasia,* regarded by some as a separate genus. [L, 67.]—**A. metallica.** A Borneo variety, with leaves resembling large polished metallic shields. [L. 67.]—**A. montana.** An East Indian variety, the juice of which is used by the natives as a stimulant and rubefacient. [L, 63.]

ALOCASINÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-o-ka^{2}s(ka^{3}s)-i(e)'ne(na^{3}-e^{2}). A sub-tribe of aracaceous plants of the tribe *Caladieæ,* established by Schott, including the genus *Alocasia.* [B, 170.]

ALOCHIA (Lat.), n. f. A^{2}l(a^{3}l)-o'ki^{2}(ch^{2}i^{2})-a^{3}. From α priv., and λόχια, the lochia. Absence of the lochial discharge. [L, 47.]

ALOE (Lat.), n. f. A^{2}l(a^{3}l)'o-e(a). Written also *Aloë* [Ger. Ph.]. Gen., *al'oes.* Gr., ἀλόη [Dioscorides]. Fr., *aloès.* Ger., *Aloë. Aloe.* It., *aloe.* Sp., *aloes.* 1. A genus of liliaceous plants, belonging to the suborder *Asphodeleœ,* established by Tournefort, characterized by their permanent fleshy leaves; flowers, disposed in erect spikes or in clusters, with a 6-parted cylindrical perianth, which, with the 6 stamens, is inferior to the ovary; and the membranous 3-celled fruit, containing many seeds. The term is now frequently restricted to those species which have tall stems, the acaulescent and sub-caulescent varieties being referred to *Gasteria, Haworthia,* and other genera. 2. In the U. S. Ph., Br. Ph., Ger. Ph., and Belg. Ph., aloes,



or the inspissated juice of the leaves of several species of A., especially the *A. barbadensis*, *A. soccotorina*, *A. Perryi*, *A. purpurascens*, *A. rubescens*, *A. spicata*, *A. ferox*, *A. africana*, *A. arborescens*, *A. abyssinica*, and their varieties. The leaves are cut off near the ground, and the bitter yellowish juice which is contained in them near their surface is collected in vessels, in which it is evaporated either by the heat of the sun or by a fire, the value of the product depending largely upon the care with which this is done. Aloes is a yellowish or brownish, hard, amorphous substance, of peculiar saffron-like odor, and very disagreeable, persistent, bitter taste. It is almost completely soluble in boiling water and in alcohol. Its chief constituent is a crystalline glucoside, *aloin*, of which several varieties (*barbaloin*, *nataloin*, *socaloin*) are known. Aloetic, chrysammic, picric, and oxalic acids are produced by decomposing the aloins with acids ; a hot aqueous solution of aloes deposits on cooling *a. resin*, which, along with *a. bitter*, *aloetin*, and other amorphous principles formerly described, appears to be a modified aloin. Other substances obtained from aloes by various processes are *alorcinic acid*, *aloisol*, *paracoumaric acid*, *paroxybenzoic acid*, *anthracene*, and *methylanthracene*. The physical and chemical properties of aloes vary according to the source and method of preparation. See A. BARBADENSIS, A. SOCOTRINA, *A. lucida*, *A. capensis*, *A. caballina*, *A. hepatica*, etc. Aloes is purgative, affecting principally the pelvic portion of the large intestine and acting upon the muscular coat of the latter rather than upon the vessels. It also acts as an emmenagogue. Among the Mohammedans it has a religious symbolic significance, being borne by the pilgrims from Mecca, and is believed to ward off evil spirits. [B, 2, 19, 81, 185, 188 ; L, 41, 61, 65, 67.]—**Aehrenförmige A.** (Ger.). See *A. spicata*.—**Alcohol cum a.** See *Tinctura aloes*.—**A. abyssinica** [Lamarck]. Syn. : *A. vulgaris*, var. *abyssinica* [De Candolle]. A species closely related to *A. barbadensis*, distinguished chiefly by its long-pedicelled, yellowish-green flowers. It is believed to yield the Jafferbad aloes. [B, 188 ; L, 87.]—**A. acinacifolia** [Salm-Dyck]. A species 2 varieties of which are now included in *A. elongata* [Salm-Dyck]. [B, 188.]—**A. acuminata.** 1. Of Haworth, a species growing at the Cape of Good Hope, distinguished by its acuminate leaves and flowers which are red before their expansion, and yellow, streaked with green, afterward. 2. Of Salm-Dyck, includes *A. acuminata* [Haworth] and *A. suberecta*. 3. Of Lamarck, *A. verrucosa*.—**A. africana** [Miller]. Syn. : *Pachidendrum africanum* [Haworth]. African a., sword-leaved a. ; a species found in the Cape Colony, yielding a weak variety of a. lucida. [A ; B, 169, 188.]—**A. africana foliis longis, conjugatis, supra cavis**, etc. [Boerhaave]. The *A. verrucosa*. [B, 188.]—**A. africana mitræformis spinosa** [Dillenius]. The *A. Commelyni*. [B, 169, 188.]—**A. americana anonæ foliis, floribus suave rubentibus, A. americana serrata, floribus coccineis.** *A. soccotorina*. [B, 200.]—**A. angustifolia** [Salm-Dyck]. Syn. : *A. lingua*, var. *angustifolia* [Haworth], *A. linguiformis*, var. β [Lamarck], *A. linguiformis*, var. C *verrucosa* [De Candolle], *Gasteria angustifolia* [Haworth]. An acaulescent species growing at the Cape of Good Hope, having spreading, incurved, tongue-shaped, dark-green leaves, spotted with white and green flowers, red at the base. [B, 188.]—**A. apicra.** A subgenus including species with irregular small 2-lipped flowers ; by Willdenow made a separate genus *Apicra*. [B, 48, 118.]—**A. arabica** [Lamarck]. Syn. : *A. variegata* [Forskål]. An Arabian species with a subfruticose stem, and stiff, smooth, long-lanceolate leaves, spotted with white, and having stiff reddish spines on their margins. It is said to furnish the *A. hepatica*. [B, 172, 188.]—**A. arachnoidea, A. arachnoides.** Syn. : *A. pumila*, var. δ *arachnoides* [Linnæus], *Apicra arachnoides* [Willdenow], *Haworthia arachnoides* [Haworth]. A South African species ; acaulescent, with triangular cuspidate stem-leaves, oblong-lanceolate, acuminate radical leaves with hairy margin, and flowers in erect cylindrical spikes. [B, 179, 188.]—**A. arborea, A. arborescens** [Miller]. Fr., *aloès corne de belier*. Syn. : *A. perfoliata*, var. η [Willdenow] (seu var. α *arborescens* [Aiton]), *A. fruticosa* [Lamarck], *Catevala arborescens*. A species growing at the Cape of Good Hope and also at Barbadoes, producing a variety of a. lucida. The leaves are nearly linear, lanceolate, and thorny. [A ; B, 180, 188.]—**A. aromatica.** Aloes-wood. [L, 104.]—**A. barbadensis.** See the major list.—**A'baum** (Ger.). *Agave americana*. [L, 80.]—**A'bitter.** Ger , *Aloëbitter*. See the major list.—**A. brasiliensis.** The caraguata ; a Brazilian plant resembling the A. in appearance ; perhaps a species of *Agave* or *Yucca*. [B, 200.]—**A. brevifolia.** See *A. distans*.—**A. caballina** [Belg. Ph., Netherl. Ph.]. Fr., *aloès caballin*. Ger., *Rossaloë*, *Pferdaloë*. It., *aloe caballino* (o *cavallino*). Sp., *aloes* (ó *acibar*) *caballuno*. Fœtid, caballine, or horse aloes. A name given to an inferior variety of aloes, having a very fœtid odor, dark and opaque in appearance, and never used except in veterinary practice. [B, 5, 95 ; L, 57, 67.]—**A. caballina vulgari similis sed tota maculata.** An old name for a variety of A. resembling the *A. vulgaris* (*A. barbadensis*), but spotted with white. [B ; L, 102.]—**A. cæsia** [Salm-Dyck]. A species which has but little bitterness and yields aloes in small quantity. [L, 87.]—**A. capensis.** Fr., *aloès du Cap* [Fr. Cod.]. Ger., *kap'sche Aloe*. It., *aloe del Capo*. Sp., *aloes del Cabo*. A variety of a. lucida obtained at the Cape of Good Hope from *A. ferox*, *A. africana*, *A. spicata*, *A. arborescens*, *A. purpurascens*, *A. Commelyni*, *A. multiformis*, and *A. plicatilis*. It is of a dark, blackish-brown color, a glossy surface, and a conchoidal fracture It yields a light, yellowish-brown or greenish-brown powder. Ether dissolves from 1 to 7 per cent. of it. [A ; L.]—**A. carinata.** See *A. verrucosa*.—**A. Commelyni** [Willdenow]. Syn. : *A. perfoliata*, var. ν [Linnæus] (seu var. κ [Willdenow], seu var. ο *mitræformis* [Aiton], *A. mitræformis* [De Candolle (in part)], *A. mitræformis*), var. α [Lamarck] (seu var. *humilior* et *elatior* [Haworth]). A species growing at the Cape of Good Hope, having ovate-oblong, attenuate, spreading leaves, with dentate margins fringed with whitish spines, and red flowers in racemes. It furnishes part of the a. capensis of commerce. [B, 188.]—**A. communis.** A. caballina. [B, 180.]—**A. de Capo.** A. capensis. [B, 180.]—**A. depressa** [Haworth]. Syn. : *A. perfoliata*, var. ζ [Linnæus] (seu var. γ *depressa* [Aiton]). Flat-leaved a. ; a species growing at the Cape of Good Hope, having acute, oblong-ovate, glaucous leaves with white dentate margins and apex, and red flowers streaked with yellow. [B, 169, 188.]—**A. depurata.** See *Extractum aloes aquosum*.—**A. dichotoma** [Linnæus]. Fr., *arbre à fleche*. Syn. : *Rhipidodendrum dichotomum* [Willdenow]. A species growing near the Cape of Good Hope, characterized by its dichotomous, very smooth, fruticose stem, and ensiform leaves. It yields a variety of a. capensis. [B, 188 ; L.]—**A. Dioscoridis.** Common or Barbadoes aloes. [B, 200.]—**A. distans** [Haworth]. Syn. : *A. brevifolia* [Salm-Dyck]. A species related to *A. mitræformis* [Willdenow], but differing in its widely separated leaves. It includes several varieties formerly referred to *A. perfoliata*, var. π [Aiton], and *A. mitræformis*, var. β [Willdenow, Aiton]. [B, 188.]—**A. disticha.** 1. Of Linnæus, a species now referred to several species of *A.* 2. Of Thunberg, the *A. verrucosa*. 3. Of Römer and Schultes, a species, also known as *A. lingua* [Salm-Dyck], *Gasteria disticha* [Haworth], growing at the Cape of Good Hope. It is acaulescent and bears distichous leaves and red flowers. [B, 188.]—**A. echinata** [Willdenow]. Syn. : *A. perfoliata*, var. ο *humilis* [Linnæus] (seu var. ξ *humilis* [Aiton], *A. humilis* [Thunberg], *A. humilis*, var. β [Haworth], *Catevala humilis*). A species growing at the Cape of Good Hope ; acaulescent, and bearing subulate aculeate leaves and flowers in reflexed racemes with a blood-red corolla. It is rich in resinous matter. [B, 179, 188 ; L, 87.]—**A'elixir** (Ger.). See ELIXIR *proprietatis Paracelsi*.—**A. elongata.** Fr., *aloès allongé*. 1. Of Salm-Dyck, a species otherwise known as *A. trigona* [Römer and Schultes], *A. acinacifolia*, var. γ *angustifolia* et var. δ *lætevirens* [Salm-Dyck], and *Gasteria trigona* [Haworth]. It is acaulescent with triangular, spirally multifarious, elongated leaves. 2. Of Murray, the *A. barbadensis*, var. β. [B, 188.]—**A'essigextract** (Ger.). An acetic extract of aloes. [L, 80.]—**A. excavata** [Willdenow]. Syn. : *A. lingua*, var. α *angustifolia* [Willdenow] (seu var. *latifolia* [Haworth], et var. β *multifaria* [Haworth]), *A. disticha*, var. δ [Linnæus], *A. obscura*, var. α et β [Salm-Dyck], *Gasteria excavata* (et *latifolia*) [Haworth]. A species growing at the Cape of Good Hope ; acaulescent, with tongue-shaped leaves, and flowers green at the apex, white in the middle, and red at the base. [B, 188.]—**A'extract** (Ger.). See *Extractum aloes*.—**A. ferox** [Miller]. Syn. : *A. perfoliata*, var. γ [Linnæus] (seu var. θ *ferox* [Aiton]), *A. horrida* (et *muricata*) [Haworth], *Pachidendron ferox* [Haworth]. A species found at the Cape Colony, yielding the better sort of a. lucida. It is distinguished by its large size, its very broad leaves armed on both sides with very

ALOE FEROX. (AFTER B. FRANK [A, 304].)

stout prickles, and by its reddish or reddish-yellow flowers with strongly exserted stamens. It is crossed with a number of other varieties, making numerous hybrids. [A ; B, 5, 188 ; L, 78.] See also *A. subferox*.—**A. fœtida.** *A. caballina*. [B, 180.]—**A. foliis spinosis, confertis, dentatis, vaginantibus, planis, maculatis.** The *A. barbadensis*. [L, 102.]—**A. frutescens** [Salm-Dyck]. A variety, closely resembling the *A. arborescens*, found at the Cape of Good Hope, and furnishing aloes in small quantities. [B, 118 ; L, 87.]—**A. fruticosa.** See *A. arborescens*.—**A. gallica.** A bitter drug ; perhaps gentian. [L, 63.]—**A. gasteria.** A subgenus of A. including species with bent cylindrical flowers ; often raised into a separate genus *Gasteria*. [B, 48, 188.]—**A. glauca** [Miller]. Syn. :

A. perfoliata, var. ζ [Willdenow] (seu var. ξ *glauca* [Aiton]), *A. rhodacantha*. A species found at the Cape of Good Hope with very glaucous oblong-ensiform leaves, having margins beset with red spines. Several varieties are described. It yields but a small amount of bitter principle with a large amount of coloring matter. [B, 188; L, 87.]—**A. guineensis, A. guineensis caballina.** See *A. caballina* and *A. hepatica*.—**A. gummi.** See *A.* (2d def.).—**A'gummi** (Ger.). See ALOE-BITTER.—**A'haltig** (Ger.). Aloetic. [L, 44.]—**A'hanf** (Ger.). Pita thread; the fibre of the *Agave* used in the manufacture of ropes. [L, 37.]—**A'harz** (Ger.). See *A. resin*. —**A. hepatica.** Fr., *aloès hépatique*. Ger., *Leberaloë*. It., *aloe epatico*. Sp., *aloes* (*ó acibar*) *epático*. Liver aloes, hepatic aloes. A name formerly applied to a variety of Socotrine aloes, or in the United States to Barbadoes aloes; now applied to aloes, from any source, occurring in the form of dry, blackish, liver-colored, opaque lumps, which have a dull fatty lustre and break readily into angular fragments. [B, 5; L.]—**A'holz** (Ger.). See ALOES-WOOD.—**A. horrida.** See *A. ferox*.—**A. humilis.** 1. Of Lamarck, a species resembling *A. echinata*, growing at the Cape of Good Hope. It is rich in resinous matter. 2. Of Thunberg, the *A. echinata*. [B, 188.] —**A. hyacinthioides** [Linnæus]. The *Sanseviera zeylanica*. [B, 173.]—**A. Indiæ orientalis serrata.** *A. soccotorina*. [B. 200.]—**A. indica** [Royle]. Syn.: *A. perfoliata* [Roxburgh]. A species with red flowers, growing in sandy plains in northwestern India. It furnishes part of the Indian a oes of commerce. [B, 172; L, 87.] —**A. insuccata.** A preparation made by dissolving aloes 1 lb. in the juice of roses 2 lbs., and the juices of violets, borage, and bugloss, of each 15 oz., filtering, and evaporating to the consistence of an extract. [B, 57.]—**A. insuccata tartarea.** The same as a. insuccata with the addition of one third of its weight of cream of tartar. [L, 97.]—**A. intermedia** [Haworth]. Syn.: *A. linguiformis*, var. *verrucosa* [De Candolle], *A. lingua*, var. α, *Gasteria intermedia* [Haworth]. A species found at the Cape of Good Hope with narrow tongue-shaped leaves. [B, 188.]—**A. ispicata.** The *A. spicata*. [L, 63.]—**A'klystier** (Ger.). See *Enema aloes*.—**A. leptocaulon.** A variety found in Madagascar, said to furnish aloes. [B, 5.] —**A. lingua, A. linguæformis, A. linguiformis.** A species with tongue-shaped leaves containing a great number of varieties, which have all been referred to other species, especially to *A. disticha* [B, 118.] See *A. disticha* (1st def.), *A. excavata*, *A. sulcata*, *A. intermedia*, and *A. angustifolia*.—**A. litoralis** [König]. A species found on the sea-coast of India, furnishing a very good variety of aloes. The juice of the leaves, freshly expressed, is extensively used as a refrigerant lotion in external inflammations, and, mixed with alum, as a local application in ophthalmia. [B, 172.]—**A. lota.** See *Extractum aloes aquosum*.—**A. lucida** [Greek Ph.]. Ger., *glänzende* (oder *durchsichtige*) *A.* Sp., *aloes lúcido*. Shining aloes; a variety occurring as a nearly uniform mass of a vitreous lustre, breaking readily into conchoidal, sharp-edged lumps, or into small reddish or yellowish-brown splinters which are translucent; obtained from the various species of A. enumerated under a. capensis.—**A. maculata** [Lamarck]. See *A. obscura* and *A. saponaria*.—**A. mitræformis.** 1. Of Willdenow, a species growing at the Cape of Good Hope, with acute ovate leaves subspinous on the margin. Cf. *A. distans*. 2. Of Aiton, the *A. Commelyni* and *A. distans*. [B, 188.]—**A. multiformis.** A species yielding a. lucida, found in the Cape Colony. [B, 5.]—**A. muricata.** See *A. ferox*.—**A. Musambron, A. Muzanbron.** Indian or Barbadoes aloes. [B, 180.]—**A. natalensis.** Natal aloes. [L, 65.] A variety obtained in Natal from an undetermined species of A., of a greenish slate-color, and a duller appearance than cape aloes when fractured. —**A. obscura.** 1. Of Miller, the common soap A., the *A. perfoliata*, var. μ [Linnæus] (seu var. κ *obscura* [Aiton]), *A. saponaria*, var. *obscura* [Haworth], *A. picta*, var. α [Aiton] (seu var. α *major* [Willdenow]), *A. maculata*, var. β [Lamarck]; a species found at the Cape of Good Hope, with reddish flowers and elliptical-lanceolate green leaves spotted with white. 2. Of Willdenow, the *A. excavata*. 3. Of Salm-Dyck, the *A. excavata* and *A. sulcata*. [B, 188.]—**A. œnanthe.** A substance recommended by Celsus as an application to phagedenic ulcers; called by the commentator "red aloes." [B, 45.]—**A. officinalis** [Forskål]. An Arabian variety with red flowers; probably the *A. rubescens*. [B, 188; L, 87.]—**A. palustris.** See STRATIOTES *aloides*.—**A. pellucida.** See *A. lucida*.—**A. perfoliata.** 1. Of Linnæus, Willdenow, Aiton, and others, a species comprising a great many varieties, all of which have since been elevated into distinct species. See *A. arborescens*, *A. africana*, *A. ferox*, *A. subferox*, *A. depressa*, *A. glauca*, *A. soccotorina*, *A. purpurascens*, *A. Commelyni*, *A. obscura*, *A. saponaria*, *A. serrulata*, *A. echinata*, *A. suberecta*, *A. distans*, and A. BARBADENSIS. 2. Of Roxburgh, *A. indica*. [B, 169, 172, 188.]—**A. perfoliata, floribus pedunculatis, cernuis, corymbosis subcylindricis.** *A. barbadensis*. [L, 102.]—**A. Perryi** [Baker]. A species growing on the island of Socotra and said to be one of the sources of Socotrine aloes. [L, 65, 74.]—**A. picta.** See *A. obscura* (1st def.) and *A. saponaria*.—**A'pille** (Ger.). See the major list.—**A. plicatilis** [Miller]. Syn.: *A. disticha*, var. ε [Linnæus], *A. tripetala*, *Rhipidodendrum distichum* [Willdenow], *Rhipidodendron plicatile* [Haworth]. A species found at the Cape of Good Hope, yielding a weak variety of a. lucida, characterized by its dichotomous stem and smooth, tongue-shaped, obtuse leaves. [B, 5, 188.]—**A. pseudo-ferox.** See *A. subferox*.—**A'pulver** (Ger.). Powdered aloes. [L, 80.]—**A. pumila** [Linnæus, Haworth]. A species with several varieties, now referred to *A. arachnoides* and other distinct species of A. [B, 179, 188.]—**A. punctata.** See *A. variegata* (1st def.).—**A. purgans.** Aloes. [L, 104.]—**A. purificata** [U. S. Ph.]. Fr., *aloès dépuré*. Ger., *gereinigte A.* Purified aloes; aloes freed from foreign ingredients by mixing 100 parts with alcohol 15 parts, heating on a water bath, straining, and driving off the alcohol by evaporation. [B, 5; L.]—**A'purpur** (Ger.). Aloetic acid. [A, 324.]—**A. purpurascens** [Haworth]. Syn.: *A. perfoliata*, var. ε *purpurascens* [Aiton], *A. soccotorina*, var. β *purpurascens*, *A. sinuata* [Thunberg], *A. ramosa* [Haworth]. A species growing at the Cape of Good Hope and at Barbadoes, closely related to *A. soccotorina*, and distinguished by its large dichotomous stem, and flowers with deep-violet bracts and the calyx yellowish at the apex. It furnishes hepatic aloes. [B, 5, 188; L, 64.]—**A. ramosa.** See *A. purpurascens*.—**A. resin.** Ger., *Aloeharz*. The amorphous, resinous substance, probably an altered form of aloin, which is deposited from a hot aqueous solution of aloes on cooling. It is dissolved by alkalies and re-precipitated by acids. A portion of it can be rendered permanently soluble in water by continued boiling. According to Kosmann, it has the composition $C_{51}H_{66}O_{30}$, polymeric with that of soluble aloes. The griping qualities of aloes are supposed to depend upon this constituent. [B, 2; L, 65.]—**A'resinsäure** (Ger.). See ALOERESINIC ACID.—**A. retusa** [Linnæus]. Syn.: *Haworthia retusa* [Haworth], *Apicra retusa* [Willdenow], *Catevala retusa*. A species growing at the Cape of Good Hope; acaulescent, with smooth quinquefarious leaves. [B, 188.]—**A. rhodacantha.** See *A. glauca*. —**A. root.** The *Aletris farinosa*. [L, 45.]—**A. rosata.** A preparation made by dissolving aloes in the juice of roses, filtering, and evaporating to the consistence of an extract. [B, 57.]—**A. rosata tartarea.** A. rosata mixed with one third its weight of cream of tartar. [L, 97.]—**A. rubescens** [De Candolle]. Syn.: *A. vera* [Lamarck]. An East Indian species, allied to *A. barbadensis*, having amplexicaul leaves with spinose margins. It yields Socotrine aloes. [B, 188; L, 87.]—**A'saft** (Ger.). See *Succus aloes*.—**A. sahnudra.** A Madagascar species said to furnish aloes. [B, 5.]—**A'salz** (Ger.). A salt of aloetic acid. [L, 30.]—**A. saponaria** [Haworth]. Syn.:

ALOE SOCCOTORINA. (AFTER B. FRANK [A, 304].)

A. perfoliata, var. θ et λ [Linnæus] (seu var. ι *saponaria* [Aiton]), *A. umbellata* [De Candolle], *A. disticha* [Miller], *A. picta*, var. β *minor* [Willdenow], *A. maculata*, var. α [Lamarck]. Great soap-a.; a species growing at the Cape of Good Hope, having red flowers and oblong-lanceolate, dirty-green leaves, covered with large, oblong, transverse white spots and furnished with reddish spines. [B, 169, 188.]—**A'säure** (Ger.). Aloetic acid; chrysammic acid. [B, 49; L.]—**A. serra.** 1. Of Willdenow, the *A. depressa*. 2. Of De Candolle, a species found at the Cape of Good Hope, having red flowers and cæspitose leaves with spinose margins. [B, 188.]—**A. serrulata** [Haworth]. Syn.: *A. perfoliata*, var. λ *serrulata* [Aiton]. Saw-leaved a.; a species growing at the Cape of Good Hope. [B, 169, 188.]—**Aloes gummi.** See *A.* (2d def.).—**A. sinensis.** An Asiatic variety, employed by the Chinese. [L, 75.]—**A. sinuata.** See *A. purpurascens*.—**Aloes lignum.** See ALOES-WOOD.—**A. soccotorina** [Lamarck], **A. socotorina.** Fr., *aloès socotrin* (ou *succotrin*). Syn.: *A. perfoliata*, var. ξ [Linnæus] (seu var. δ *soccotorina* [Aiton]), *A. vera* [Miller]. Socotrine a.; a species believed to be indigenous to the island of Socotra, but by some said not to grow

there, the *A.* of this island being, according to these authorities, the *A. Perryi.* It is also cultivated on the East African coast, in South Africa, and in Barbadoes. It furnishes Socotrine and Barbadoes aloes. It is characterized by its dichotomous stem, its very long, ensiform, attenuate leaves, spotted with white and furnished with white spines, and by its flowers, rose-red in color and green at the apex. *A. purpurascens* is sometimes regarded as a variety of this species. [B, 5. 49, 180, 188.]—**A. socotrina.** See the major list.—**A. spicata** [Linnæus]. Fr., *aloès en épis.* Spiked a. ; a species growing at the Cape of Good Hope, and furnishing the greater part of a. capensis, distinguished by its flat lanceolate-ensiform leaves beset with reddish spines, and by its yellowish and orange-colored flowers disposed in closely set horizontal spikes. [B, 5, 172, 188.]—**A. spuria.** See AGAVE.—**Aloes spicatæ extractum.** See ALOE SOCOTRINA (2d def.).—**Aloes succus.** See *A.* (2d def.).—**A'stoff** (Ger.). Aloin or aloetin. [L, 30.]—**A. suberecta** [Haworth]. Syn.: *A. perfoliata*, var. *μ suberecta* [Aiton], *A. acuminata*, var. *β major* [Salm-Dyck]. Lesser hedgehog a. ; a species indigenous to the Cape of Good Hope, with acuminate leaves, resembling the *A. acuminata*, but much larger than the latter. [B, 169, 188.]—**A. subferox** [Sprengel]. Syn.: *A. pseudo-ferox* [Salm-Dyck], *A. perfoliata*, var. *ε* [Linnæus], *Pachidendron pseudo-ferox* [Haworth]. A species, related to *A. ferox*, found at the Cape of Good Hope, and distinguished by its simple fruticose stem and its lanceolate leaves, smooth on the upper surface and covered on the margin and inferior surface with dark-red stiff spines. [B, 188.]—**A. succotrina.** See *A. soccotorina* and A. SOCOTRINA.—**A. sulcata** [Salm-Dyck]. Syn.: *A. obscura*, var. *γ truncata* [Salm-Dyck], *A. lingua*, var. *angulata* [Salm-Dyck] (seu var. *δ*), *A. linguiformis*, var. *β* [De Candolle], *A. linguiformis* [Lamarck], *Gasteria angulata* (et *sulcata*) [Haworth]. A species growing at the Cape of Good Hope, closely related to *A. excavata*, but larger than the latter. [B, 188.]—**Aloes vulgaris extractum.** See *A. hepatica.*—**A'tinctur** (Ger.). See the major list.—**A. triangularis.** See *A. viscosa.*—**A. trigona.** See *A. elongata* (1st def.).—**A. tripetala.** See *A. plicatilis.*—**A. umbellata** [De Candolle]. The *A. saponaria* and a related species. [B, 183.]—**A.- und Asafoetida-Pillen** (Ger.). See *Pilulæ aloes et asafœtidæ.*—**A.- und Eisen-Pillen** (Ger.). See *Pilulæ aloes et ferri.*—**A.- und Mastix-Pillen** (Ger.). See *Pilulæ aloes et mastiches.*—**A. variegata.** 1. Of Linnæus, a species ; also known as *A. punctata* [Haworth] and partridge-breast a., growing at the Cape of Good Hope and in Mexico. It is subcaulescent, with thick, short leaves, and is one of the species referred to the section or genus *Gasteria.* It is official in the Mexican Ph. as *zábila;* the juice of the leaves, which, according to Llamas, contains barbaloin, a bitter resin, a volatile oil, albumin, gum, etc., is drastic and anthelmintic. [J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 163 (A) ; B, 185, 188.] 2. Of Forskål, the *A. arabica.* [B, 188.]—**A. vera.** 1. Of Miller, the *A. soccotorina.* 2. Of Lamarck, the *A. rubescens.* [B, 173, 188.]—**A. vera minor.** A small variety, furnishing Socotrine aloes, leafy and with red flowers. [B, 200.]—**A. vera vulgaris.** The *A. barbadensis.* [B, 200.]—**A. verrucosa** [Miller]. Fr., *aloès verruqueux.* Syn.: *A. disticha* [Thunberg], *A. disticha*, var. *β* [Linnæus], *A. acuminata* [Lamarck], *A. carinata* [De Candolle], *A. serra*, var. *β verrucosa* [Persoon], *Gasteria verrucosa* [Haworth]. A species growing at the Cape of Good Hope ; acaulescent and having narrow, tongue-shaped, distichous leaves covered with white warts. [B, 173, 188.]—**A. violata.** A preparation resembling a. rosata, but made with the juice of violets. [B, 57.]—**A. viscosa** [Linnæus]. Syn.: *Haworthia viscosa* [Haworth], *Apicra viscosa* [Willdenow]. A species growing at the Cape of Good Hope, the leaves of which are viscous in the wild plant, but rarely so in the cultivated variety. [B, 179, 188.]—**A. von Barbadoes** (Ger.). See *A.* BARBADENSIS (2d def.).—**A. von Mocha** (Ger.). See *Mocha* ALOES.—**A. vulgaris.** See *A. abyssinica* and A. BARBADENSIS.—**A'wein** (Ger.). See *Vinum aloes.*—**A. wood.** See ALOES-WOOD.—**A. zeylanica.** See SANSEVIERA *zeylanica.*—**A. zocotrina, A. zoctorinia.** See A. SOCOTRINA.—**American a., Bastard a., Blue a., Century a.** Fr., *aloès américain, aloès bleu.* Ger., *amerikanische A., hundertjährige A.* See AGAVE *americana.*—**Common soap a.** See *A. obscura.*—**Decoctum a's compositum** [Brunsw. Ph., 1777]. Fr., *décoction d'aloès composée.* It., *decotto di aloe composto.* Made by taking Socotrine aloes, myrrh, and saffron, of each 2 parts, potassium carbonate 4 parts, licorice juice 24 parts, water 768 parts, reducing by boiling to 642 parts, and adding 192 parts of compound tincture of cardamom. [L, 85.]—**Durchsichtige A.** (Ger.). See *A. lucida.*—**Electuarium aloes compositum** [Würtemb. Ph., 1798]. Fr., *électuaire d'aloès composée.* Made of 13 parts of aloes and 1 part, each, of asarabacca root, cinnamon, mace, mastic, spikeward, and aloes-wood, and 72 parts of honey. The Sardinian Ph. of 1773 orders a very similar preparation.—**Elixir aloes saponaceum** [Swed. Ph., 1817]. Fr., *élixir d'aloès savonneux.* Made by taking 30 parts each of Socotrine aloes, myrrh, potassium acetate, and thickened oxgall, 15 of saffron, and 360 of alcohol, and filtering after three days' digestion. [L, 85.]—**Enema aloes** [Br. Ph.]. Fr., *lavement aloétique.* Ger., *Aloeklystier.* It., *clistere d'aloe.* Made by rubbing up 40 grains of aloes and 15 of potassium carbonate with 10 fluidounces of mucilage of starch. [B, 5.]—**Essentia aloes.** See *Tinctura aloes.*—**Extractum aloes.** See *Extractum aloes aquosum.*—**Extractum aloes acido sulfurico correctum.** Made by adding 1 part of sulphuric acid to 8 parts of the extractum aloes dissolved in 32 parts of water, and evaporating to the proper consistence. [L. 57, 65.]—**Extractum aloes aquosum** [U. S. Ph.]. Fr., *extrait d'aloès.* Ger., *Aloeextract.* It., *estratto d'aloe.* Sp., *extracto de aloes.* Syn.: *extractum aloes* [Ger. Ph.], *extractum aloes barbadensis, extractum aloes socotrinæ* [Br. Ph.]. A preparation made by extracting aloes with boiling water and evaporating the liquid to dryness. The dose is from 1 to 6 grains. Several European pharmacopœias order equal parts of vinegar or lemon-juice and aloes. [L, 65, 68, 70. 85.]—**Extractum aloes gummosum, Extractum aloes socotrinæ.** See *Extractum aloes aquosum.*—**False a.** See AGAVE *americana.*—**Feine A.** (Ger.). See A. SOCOTRINA.—**Flat-leaved a.** See *A. depressa.*—**Gemeine A.** (Ger.). See *A. hepatica.*—**Gereinigte A.** (Ger.). See *A. purificata.*—**Glänzende A.** (Ger.). See *A. lucida.*—**Great mitre a.** See *A. Commelyni.*—**Great soap a.** See *A. saponaria.*—**Green a.** See FOURCROYA *gigantea.*—**Grosse A.** (Ger.). See *A. barbadensis.*—**Lesser hedgehog a.** See *A. suberecta.*—**Lignum aloes.** See ALOES-WOOD.—**Pferda'.** (Ger.). See *A. caballina.*—**Pilulæ aloes** [U. S. Ph.]. Fr., *pilules d'aloès et de savon* [Fr. Cod.]. Ger., *Aloepillen.* It., *pillole di aloe.* Syn.: *pilulæ aloes barbadensis* (seu *socotrinæ*) [Br. Ph.], *pilulæ cum a.* [Fr. Cod.]. The aloes pills of the U. S. Ph. contain 2 grains each of aloes and white soap ; those of the Br. Ph. contain 2 parts of Barbadoes or Socotrine aloes, and 1 part each of soap and confection of roses, and are flavored with oil of nutmeg or oil of caraway. The French Codex orders a pill containing 10 centigrammes each of aloes and soap. [L, 61. 65, 68.]—**Pilulæ aloes amaræ.** See *Pilule d'*ALOÈS *et de gentiane.*—**Pilulæ aloes barbadensis** [Br. Ph.]. See *Pilulæ aloes.*—**Pilulæ aloes benedictæ Fulleri.** See *Pilulæ aloes martiales.*—**Pilulæ aloes crocatæ.** See *Pilulæ aloes et myrrhæ.*—**Pilulæ aloes cum colocynthide.** See *Extractum* COLOCYNTHIDIS.—**Pilulæ aloes cum myrrha.** See *Pilulæ aloes et myrrhæ.*—**Pilulæ aloes et asafœtidæ** [U. S. Ph.], **Pilulæ aloes et assafœtidæ.** Fr., *pilule d'aloès et asafétide.* Ger., *Aloe- und Asafœtida-Pillen.* It., *pillole d'aloe ed assafetida.* The pills of the U. S. Ph. contain 1⅓ grain each of aloes, asafœtida, and soap. The preparation of the Br. Ph. is a pill mass made up of equal parts of Socotrine aloes, asafœtida, soap, and confection of roses. [B, 5 ; L, 65, 68.]—**Pilulæ aloes et ferri** [U. S. Ph., Br. Ph.]. Fr., *pilule d'aloès et de fer.* Ger., *Aloe- und Eisen-Pillen.* It., *pillole d'aloe e ferro.* Syn.: *pilulæ aloeticæ ferratæ* [Ger. Ph.]. The pill of the U. S. Ph. contains 1 grain each of aloes, dried ferrous sulphate, and aromatic powder, made up with the confection of roses. The Br. Ph. preparation is a pill mass containing 3 parts of ferrous sulphate, 4 of Barbadoes aloes, 6 of the compound powder of cinnamon [Br. Ph.], and 8 of confection of roses. The German preparation consists of pills containing 5 centigrammes each of aloes and dried sulphate of iron. [B ; L, 65, 68.]—**Pilulæ aloes et mastiches** [U. S. Ph.]. Fr., *pilules d'aloès et de mastic, pilules des gourmands.* Ger., *Aloe- und Mastix-Pillen.* It., *pillole d'aloe e mastico.* Syn.: *pilulæ ante cibum, pills of aloes and mastic, dinner pills, Lady Webster's pills.* Each pill contains 2 grains of aloes and ½ grain each of mastic and red-rose petals.—**Pilulæ aloes et myrrhæ** [U. S. Ph., Br. Ph.]. Fr., *pilules d'aloès et de myrrhe.* Ger., *Rufus'sche Pillen.* It., *pillole d'aloe e mirrha.* Sp., *pildoras de aloes y de mirra.* Syn.: *Rufus's pills, pills of aloes and myrrh.* The U. S. Ph. pills contain 2 grains of aloes, 1 grain of myrrh, and ½ grain of aromatic powder, made up with syrup. The Br. Ph. pill mass is made up of 4 parts of Socotrine aloes, 2 of myrrh, and 5 of confection of roses. Several European pharmacopœias order a preparation very similar to that of the Br. Ph. [B, 5 ; L, 65, 68, 70, 85.]—**Pilulæ aloes martiales.** Fr., *pilules de Fuller.* A preparation official in many European pharmacopœias, made by mixing 8 parts of aloes, 4 of senna, 2 each of asafœtida, galbanum, and myrrh, 1 part of mace, 12 parts of ferrous sulphate, 1 part of refined oil of amber, and 16 parts of syrup of artemisia. [L, 85.]—**Pilulæ aloes socotrinæ.** See *Pilulæ aloes.*—**Pilulæ cum a.** [Fr. Cod.], **Pilulæ cum a. et sapone** [Fr. Cod.]. See *Pilulæ aloes.*—**Pulvis aloes.** Fr., *poudre d'aloès* (*q. v.*). According to the U. S. Ph, of 1820, a mixture of 393 parts of aloes and 95 of canella. [L, 83.]—**Pulvis aloes compositus.** Fr., *poudre d'aloès composée.* Syn.: *species hieræ picræ.* A preparation official in many European pharmacopœias, made by mixing powdered aloes with a number of aromatic substances. [L, 85.]—**Pulvis aloes et canellæ.** It., *polvere di aloe e cannella.* Syn.: *hiera picra.* A preparation official in the U. S. Ph., 1870, containing 4 parts of aloes and 1 part of canella. [L, 65, 68.]—**Purple a.** See *A. purpurascens.*—**Resina aloes.** See *A. resin.*—**Rossa'** (Ger.). See *A. caballina.*—**Rothe A.** (Ger.). See *A. lucida.*—**Saw-leaved a.** See *A. serrulata.*—**Small mitre a.** See *A. distans.*—**Soap a.** See *A. obscura* and *A. saponaria.*—**Socotara A., Socotran'sche A.** (Ger.), **Socotora a., Socotrine aloes, Socotrine a. juice, Socotrinische A.** (Ger.). See ALOE SOCOTRINA.—**Spiked a.** See *A. spicata.*—**Strauchartige A.** (Ger.). See *A. arborescens.*—**Succus aloes.** Fr., *suc d'aloès.* Ger., *A'saft.* An old pharmaceutical name for aloes.—**Sukotrin-A.** (Ger.). See ALOE SOCOTRINA.—**Suppositoria cum a.** It., *suppositorio di aloe.* See *Suppositoire d'*ALOÈS.—**Sword-leaved a.** See *A. africana.*—**Tinctura aloes.** Fr., *teinture d'aloès.* Ger., *Aloetinctur.* It., *tintura di aloe.* Sp., *tintura de aloes.* A preparation official in nearly all pharmacopœias. That of the U. S. Ph. represents in 100 parts of the tincture 10 parts of aloes and 10 of extract of licorice ; that of the Br. Ph. 3 parts of aloes and 9 of licorice ; that of the Ger. Ph., and that of the Fr. Cod., 20 parts of aloes. Other official preparations contain from 4 to 12 parts of alcohol to 1 of aloes. [B ; L, 57, 65, 68, 70, 85.]—**Tinctura aloes ætherea.** A preparation official in many European pharmacopœias, differing but slightly from that of the Edinburgh Pharmacopœia, 1813, which orders 46 parts of myrrh and 393 parts of spirits of ether to be digested for 4 days, and 46 parts of aloes and 31 parts of saffron added, and the whole again digested for 4 days. [L, 85.]—**Tinctura aloes composita** [Ger. Ph.]. Fr., *teinture d'aloès composée.* Ger., *zusammengesetzte Aloetinctur.* It., *tintura di aloe composta.* Sp., *tintura de aloes compuesta.* Syn.: *tinctura de aloe composita* [Fr. Cod.]. A preparation made by macerating 6 parts of aloes and 1 part each of rhubarb, zedoary, gentian root, and saffron in 200 parts of dilute alcohol, and filtering at the end of 7 days. In the old London Ph. this name was given to the *tinctura aloes et myrrhæ.* The Hamburg Codex of 1835 orders 3 parts each of the tinctures of aloes and saffron, and 4 of tincture of myrrh. The Edinburgh Ph. of 1813 orders 2 parts each of aloes and myrrh, 1 part of saffron, and 24 parts of alcohol. The Batavian Ph. of 1805 and the

Amsterdam Ph. of 1792 order 31 parts of saffron and 937 parts of alcohol to be digested for 24 hours, and to the expressed filtrate 31 parts each of aloes and myrrh added, and the whole again digested for 3 days and filtered. The U. S. Ph. of 1820 orders myrrh 62 parts, alcohol 590, and water 190, to be digested for 4 days, and 46 parts of aloes and 31 of saffron added, and the whole digested for 3 days and decanted. See also *Teinture d'*ALOÈS *composée*.—**Tinctura aloes crocata, Tinctura aloes cum myrrha crocata.** See *Tinctura aloes composita*.—**Tinctura aloes et myrrhæ** [U. S. Ph.]. Fr., *élixir de propriété*. Ger., *Aloe-elixir*. It., *tintura di aloe e myrra*. Sp., *tintura de aloes y de mirra*. Syn.: *elixir proprietatis Paracelsi*. Made by macerating 10 parts each of aloes and myrrh in 80 of alcohol for 7 days, and, after filtering, adding sufficient alcohol to bring the whole quantity up to 100 parts. [L, 65, 68.] —**Tinctura de a. composita** [Fr. Cod.]. See *Teinture d'*ALOÈS *composée*.—**Tinctura rhei et aloes.** See under RHEUM.—**Vinum aloes.** Fr., *vin d'aloès*. Ger. *Aloewein*. It., *vino d'aloe*. Sp., *vino di aloes*. The U. S. Ph. orders 6 parts of aloes, 1 part of cardamom seeds, and 1 part of ginger, in 90 parts of strong white wine, to be macerated and filtered, and sufficient of the same wine added to bring the whole up to 100 parts. The preparation of the Br. Ph. contains about 4 parts of aloes and 1½ part each of cardamom seeds and ginger in 100 parts of sherry. The Edinburgh Ph. of 1813 orders Socotrine aloes 31 parts, cardamom seeds and ginger each 4 parts, and Spanish white wine 786 parts. The Dublin Ph. of 1826 orders 25 parts of Socotrine aloes, 6 of canella, 280 of Spanish white wine, and 94 of alcohol. The Geneva Ph. of 1780 orders 30 parts of Socotrine aloes, 7 of canella, and 540 of Spanish white wine. The Turin Ph. of 1833 orders 16 parts of the *species hieræ picræ*, 1 part of cochineal, and 96 parts of Malaga wine. [B; L, 65, 68, 85.]—**Water a.** See STRATIOTES *aloides*.—**Yellow-flowered a., Yellow-flowering a.** See ALOE BARBADENSIS.

ALOË (Ger.), n. A^3'lo-e^2. For this word and its compounds, see under ALOE.

ALOE BARBADENSIS (Lat.), n. m. Ba^{3}r-ba^{2}d(ba^{3}d)-e^{2}n'si^{2}s. From Barbadoes, its source. Fr., *aloès des Barbades* [Fr. Cod.]. It., *aloe delle Barbadoes*. Sp., *aloes de las Barbadas*. 1. A species of *Aloe* established by Miller, also called *A. perfoliata*, var. *π vera* [Linnæus] (seu var. *λ vera* [Willdenow], seu var. *ν barbadensis* [Aiton], seu var. *vulgaris* [Aublet]), *A. vulgaris* [Lamarck], *A. vulgaris*, var. *barbadensis* [De Candolle]. It is indigenous to America, but has been brought into the Mediterranean countries of Europe and Africa. It is distinguished by its subfruticose stem, ensiform leaves, and yellow flowers. A variety, *A. b.*, var. *β*, the *Aloe elongata* [Murray], *A. humilis*, var. *β* [Willdenow], and *A. vulgaris* [Willdenow], is described; also a small variety, the *A. b.*, var. *chinensis*. The *A. b.* furnishes most of the Barbadoes aloes of commerce. [B, 188.] 2. A brown, or orange-brown, variety of aloes, which is translucent in thin pieces and opaque in masses, and breaks with a smooth, waxy, slightly conchoidal fracture. When breathed upon it emits a distinct saffron-like odor. Ether dissolves about 10 per cent. of this variety. Formerly it was known as hepatic, or liver, aloes. It is usually imported in calabashes. It is mostly derived from the *Aloe barbadensis*, although several other varieties furnish a portion of it. The active principle is barbaloin. [B; L.] —**A. b. mitior** [Dillenius]. See *A. purpurascens*.—**Extractum aloes b.** See *Extractum* ALOES *aquosum*.—**Pilula aloes b.** See *Pilulæ* ALOES, under ALOE.

ALOE-BITTER, n. A^{2}l'o-e^2 bi^{2}t'tu^{5}r. Fr., *résino-amer*. Ger., *Aloë-Bitter*. Syn.: *aloebitter*. A bitter principle extracted from aloes by evaporation of the aqueous extract from which the aloeresin has been removed. It is probably modified aloin. [B, 48, 81.] —**Artificial a.-b.** Ger., *künstliches A.-B.* A substance formed by treating aloes with nitric acid. [B, 48.]

ALOEDARIUM (Lat.), n. n. A^{2}l(a^{3}l)-o-e(e^2)-da(da^3)'ri^2-u^{3}m-(u^{4}m). A compound cathartic medicine containing aloes.—**A. marocostinum.** An aloetic panacea highly vaunted by Mindererus. [L, 53, 87.]

ALOEDARY, n. A^{2}l'o-e^{2}d-a-ri^2. See ALOEDARIUM.

ALOEPATICUS (Lat.), adj. A^{2}l(a^{3}l)-o-e(e^2)-pa^{2}t(pa^{3}t)'i^{2}k-u^{3}s-(u^{4}s). Made of aloes. [L, 63.]

ALOEPHANGINUS (Lat.), adj. A^{2}l(a^{3}l)-o-e(e^2)-fa^{2}n(fa^{3}n)-ji-(ge)'nu^{3}s(nu^{4}s). Aloetic. [L, 50.]

ALOEPILLEN (Ger.), n. pl. A^{3}l'o-e^2-pi^{2}l-le^{2}n. See *Pilulæ* ALOES.—**Eisenhaltige A.** See *Pilulæ* ALOES *et ferri*.

ALOERESIC ACID, n. A^{2}l-o-e^2-re^{2}s'i^{2}k. Fr., *acide aloérésique*. A yellowish-brown, micro-crystalline, resinous acid of the formula $C_{30}H_{32}O_{14}$, obtained from that portion of Cape aloes which is soluble in water, by boiling with dilute sulphuric acid. It is insoluble in ether. See also ALOERESINIC ACID. [B, 2.]

ALOERESIN, n. A^{2}l''o-e^2-re^{2}z'i^{2}n. See ALOE *resin*.

ALOERESINIC ACID, n. A^{2}l''o-e^2-re^{2}z-i^{2}n'i^{2}k. A resinous acid, of the formula $C_{16}H_{16}O_6$, obtained by boiling with dilute sulphuric acid that portion of Cape aloes which is insoluble in water. It is soluble in ether. [B, 2.] See ALOERESIC ACID and ALOERETINIC ACID.

ALOERETIC ACID, n. A^{2}l''o-e^2-re^{2}t'i^{2}k. Fr., *acide aloérétique*. 1. A brown, micro-crystalline, resinous acid, of the formula $C_{30}H_{34}O_{15}$, nearly insoluble in water and in ether, but sparingly soluble in alcohol; obtained, along with aloeresic acid, from that portion of Cape aloes which is soluble in water by boiling with dilute sulphuric acid. 2. A name also applied to chrysatric acid. [B, 2.]

ALOERETIN, n. A^{2}l''o-e^2-re'ti^{2}n. A brown amorphous resin, insoluble in ether; obtained, along with aloeresic and aloeretic acids, by boiling with dilute sulphuric acid that portion of Cape aloes which is soluble in water. [B, 2.]

ALOERETINIC ACID, n. A^{2}l''o-e^2-re^{2}t-i^{2}n'i^{2}k. Fr., *acide aloérétinique*. A resinous acid, insoluble in ether; obtained, along with aloeresinic acid, by boiling that portion of Cape aloes which is soluble in water with dilute sulphuric acid. [B, 2.]

ALOES, n. pl. A^{2}l'oz. Fr., *aloès*. Ger., *Aloe*. It., *aloe*. Sp., *áloes, acibar*. In medicine, applied both to the plants of the genus *Aloe* and to the inspissated juice of several of the species. For the compound terms in Latin, see under ALOE.—**African a.** See ALOE *africana*.—**American a.** See AGAVE *americana*.—**Aqueous extract of a.** See *Extractum* ALOES *aquosum*, under ALOE.—**Artificial bitter of a.** See ALOETIC ACID.—**Barbadoes a.** See ALOE BARBADENSIS.—**Benares a.** A variety of Indian a. resembling Barbadoes a., but of a darker color and more glossy. [L, 65.]—**Bethelsdorp a.** The most esteemed variety of Cape aloes; so called because collected at the Bethelsdorp mission. [L, 103.]—**Bitter of a.** See ALOE-BITTER.—**Bombay a.** Fr., *aloès de l'Inde*. A variety of hepatic aloes obtained from Bombay, of a lighter color than the ordinary variety. [L, 77.]—**Bonaire a.** See *Benares a.*—**Caballine a.** See ALOE *caballina*.—**Cape a.** See ALOE *capensis*.—**Capey a., Capey Barbadoes a.** A variety of Barbadoes a. presenting a smooth glossy surface on fracture.—**Cold-drawn Barbadoes a.** The pure inspissated juice of the *Aloe barbadensis*, as distinguished from the ordinary Barbadoes a., which is the residue of a decoction of the plant. [L.]—**Compound decoction of a.** See *Decoctum* ALOES *compositum*, under ALOE.—**Curaçoa a.** A West Indian variety, resembling Barbadoes a., but darker and more glossy.—**Cyprus a.** A variety of a. obtained from Cyprus. [L, 53.]—**East India a.** See ALOE *socotrina*.—**Enema of a.** See *Enema* ALOES, under ALOE.—**Extract of a.** See *Extractum* ALOES *aquosum*, under ALOE.—**Extract of Barbadoes, or of Socotrine, a.** See *Extractum* ALOES *aquosum*, under ALOE.—**Fœtid a.** See ALOE *caballina*.—**Glycerate, or glycerole, of a.** A solution in glycerin of an alcoholic extract of aloes. [B, 5.]—**Hepatic a.** See ALOE *hepatica*.—**Indian a.** See *Bombay a.*—**Insoluble a.** See ALOE *resin*.—**Jafferbad a.** A variety of a pitchy-black color, with a glossy, porous fracture, and of an odor and taste more disagreeable than those of Socotrine a.—**Liver a.** See ALOE *hepatica*.—**Mineral a.** Bitumen. [L, 119.]—**Mocha a., Moka a.** A nearly black, inferior variety from the interior of Arabia. [L, 65.]—**Natal a.** See ALOE *natalensis*.—**Pills of a.** See *Pilulæ* ALOES, under ALOE.—**Pills of a. and asafœtida.** See *Pilulæ* ALOES *et asafœtidæ*, under ALOE.—**Pills of a. and iron.** See *Pilulæ* ALOES *et ferri*, under ALOE.—**Pills of aloes and mastic.** See *Pilulæ* ALOES *et mastiches*, under ALOE.—**Pills of aloes and myrrh.** See *Pilulæ* ALOES *et myrrhæ*, under ALOE.—**Pills of Barbadoes a., Pills of Socotrine a.** See *Pilulæ* ALOES, under ALOE.—**Purified a.** See ALOE *purificata*.—**Rosated a.** See ALOE *rosata*.—**Shining a.** See ALOE *capensis*.—**Smyrna a., Socotrine a., Socotrine a.** See ALOE SOCOTRINA.—**Socotrine a. juice.** A form of Socotrine a. having the consistence of honey and a deep-orange or pale-yellow color. On standing, it separates into two layers, an inferior, pale, opaque, and granular with crystals of aloin, and a superior, transparent and darker-colored. [L, 122.]—**Soluble a.** That portion of a. which is soluble in cold water. According to Kussmann, it has the composition $C_{17}H_{22}O_{10}$. [B, 2.]—**Tincture of a.** See *Tinctura* ALOES, under ALOE.—**Tincture of a. and myrrh.** See *Tinctura* ALOES *et myrrhæ*, under ALOE.—**Translucent a.** See ALOE SOCOTRINA.—**Turkey a.** See ALOE SOCOTRINA.—**Turkistan a.** See *Bombay a.*—**Volatile oil of a.** A pale-yellow liquid obtained in small quantities from a., smelling and tasting like mint. [L, 63.]—**Wine of a.** See *Vinum* ALOES, under ALOE.—**Zanzibar a.** See ALOE SOCOTRINA.

ALOÈS (Fr.), n. A^3-lo-e^{2}z. 1. The genus *Aloe*. 2. Aloes. 3. Aloes-wood.—**Alcoolature d'a., Alcoolé d'a.** See *Tinctura* ALOES, under ALOE.—**Alcoolé d'a. composée.** See *Teinture d'a. composée*.—**Alcoolé d'a. et de rhubarbe.** See *Tinctura* RHEI *et aloes*.—**Alcoolé d'a. et de thériaque.** See *Teinture d'a. composée*.—**Alcoolé d'a. myrrho-safrané.** See *Tinctura* ALOES *composita*, under ALOE.—**A. allongé.** See ALOE *elongata*.—**A. apatie.** See ALOE *hepatica*.—**A. barbade.** See ALOE *barbadensis*.—**A. bec de canne.** See ALOE *disticha* (3d def.).—**A. bleu.** A name applied in the Mauritius to the *Agave americana*. [B, 121.] —**A. caballin.** See ALOE *caballina*.—**A. caballin du Cap.** See ALOE *spicata*.—**A. carratas.** An uncertain species, possibly the caraguata. Cod. of 1837, made of 2 parts each of Socotrine aloes, *Arum maculatum*, and calomel, 3 each of pulvis oxydii stibii compositum and rhubarb, 4 each of senna, gum ammoniac, and scales of iron, and 48 of compound syrup of senna. [L, 85.]—**Électuaire d'a. composée.** See *Electuarium* ALOES *compositum*, under ALOE. — **Élixir d'a. savonneux, Essence d'a. composée.** See *Elixir* ALOES *saponaceum*, under ALOE.—**Extrait d'a., Extrait gommeux d'a.** See *Extractum* ALOES *aquosum*, under ALOE.—**Extrait gommo-résineux d'a.** A preparation official in the Frankfort Ph. of 1791 ; made by mixing the aqueous and alcoholic extracts of aloes, and evaporating to the proper consistence. — **Extrait résineux d'a.** See *Extrait gommo-résineux d'a.* — **Œnolature d'a., Œnolé d'a.** See *Vinum* ALOES, under ALOE. — **Pilules d'a., de myrrhe et de gayac.** A preparation official in the Geneva Ph. of 1780 ; made of 15 parts each of Socotrine aloes, oxide of antimony, and guaiacum resin, 8 each of saffron and myrrh, and sufficient copaiba balsam to make a pill mass. [L, 85.]—**Pilules d'a. et d'agaric.** Syn. : *pilulæ hieræ picræ*. A preparation official in the Sard. Ph. of 1773 ; made of 1 part each of the *species hieræ picræ* and powdered troches of agaric, 2 parts of aloes, and sufficient alcohol to make into a pill mass. [L, 85.]—**Pilules d'a. et d'asafétide.** See *Pilulæ* ALOES *et asafœtidæ*, under ALOE. — **Pilules d'a. et de coloquinthe.** See *Extractum* COLOCYNTHIDIS *compositum*.—**Pilules d'a. et de fer.** See *Pilulæ* ALOES *et ferri*, under ALOE.—**Pilules d'a. et de gayac.** A preparation official in the Geneva Ph. of 1780 ; made of 3 parts of Socotrine aloes, 2 of guaiacum resin, 1 part each of aromatic powder and Peruvian balsam and sufficient syrup of orange peel to make a pill mass. [L, 85.]—**Pilules d'a. et de gentiane.** The Amsterdam Ph. of 1792 and the Batavian Ph. of 1805 order this pill to be made of equal parts of Socotrine aloes and extract of gentian. The Swedish Ph. of 1817 orders 3 parts of the pill mass of aloes and myrrh, and 2 of extract of gentian. The Brunswick Dispens. of 1777 and the Span. Ph. of 1798 order 12 parts of Socotrine aloes, 6 of extract of gentian, 1 part of oil of cloves, and sufficient syrup of ginger to make a pill mass.—**Pilules d'a. et de gomme-gutte.** Syn. : *pilulæ de Anderson*. A preparation official in the Fr. Cod., each pill containing 10 centigrammes each of aloes and gamboge, with a little honey and oil of anise. The Ferrara Ph. of 1832 orders a pill mass to be made of 2 parts of Socotrine aloes and 1 part of gamboge, with syrup. See also *Pilulæ* GAMBOGIÆ *compositæ*.—**Pilules d'a. et de mastic.** See *Pilulæ* ALOES *et mastiches*, under ALOE.—**Pilules d'a. et de myrrhe.** See *Pilulæ* ALOES *et myrrhæ*, under ALOE.—**Pilules d'a. et de quinquina.** A preparation official in the Fr. Cod. of 1837 ; made of 6 parts of Socotrine aloes, 3 of extract of cinchona, 2 of cinnamon, and sufficient syrup of wormwood to make a pill mass. [L, 85.]—**Pilules d'a. et de rhubarbe.** See *Extractum* RHEI *compositum*.— **Pilules d'a. et de savon** [Fr. Cod.]. See *Pilulæ* ALOES, under ALOE.—**Pilules d'a. et de scammonée.** See PILULÆ *de duobus*.—**Pilules d'a. et de succin.** A preparation official in several old European pharmacopœias, containing 2 parts of Socotrine aloes to 1 of ambra flava. [L, 85.]—**Pilules d'a. et d'opium.** See PILULÆ *anglicæ*.—**Pilules d'a. gentianées.** See *Pilules d'a. et de gentiane*.—**Pilules d'a. gentiano-savonneuses.** A preparation official in the Brunswick Ph. of 1777 ; made of 4 parts of Socotrine aloes, 2 of extract of gentian, 1 part of powdered ginger, and soap sufficient to make a pill mass. [L, 85.]—**Pilules d'a. gommeuses.** A preparation official in the Geneva Ph. of 1780 ; made of equal parts of Socotrine aloes and gum arabic. [L, 85.]—**Pilules d'a. martiales.** A preparation official in the Geneva Ph. of 1780 ; made of 1 part of Socotrine aloes, 12 parts of black oxide of iron, and sufficient syrup to make a pill mass. [L, 85.]—**Pilules d'a. rosées.** See ALOE *rosata*.—**Pilules d'a. safranées.** See *Pilulæ* ALOES *et myrrhæ*, under ALOE.—**Pilules d'a. simples.** A preparation official in the Fr. Cod. ; made of equal parts of powdered aloes and honey. [L, 76.]—**Poudre d'a.** A preparation official in the Fr. Cod. ; made by powdering aloes in a mortar, drying, and then triturating to a fine powder and passing through a sieve containing 100 meshes to the French square inch.—**Poudre d'a. composée.** See *Pulvis* ALOES *compositus*, under ALOE. The Würzburg Ph. of 1796 orders under this name 1 drachm each of Socotrine aloes, myrrh, and sulphate of iron, 12 drops of the essential oil of savin, and a sufficient quantity of sugar. [L, 85.]—**Suc d'a.** See *Succus* ALOES, under ALOE.—**Suppositoire d'a.** A suppository official in the Fr. Cod., containing 50 centigrammes of aloes and 4 grammes of cacao-butter.—**Teinture d'a.** See *Tinctura* ALOES, under ALOE. — **Teinture d'a. composée.** A preparation official in the Fr. Cod. ; made by macerating for 10 days 40 parts of aloes and 5 each of gentian root, zedoary, saffron, white agaric, and *électuaire thériacal* in 2,000 parts of 60 per cent. alcohol, and filtering. See also *Tinctura* ALOES *composita*, under ALOE.—**Teinture d'a. et de benjoin.** See *Tinctura* BENZOINI *composita*.—**Teinture d'a. et de mastic.** A preparation official in the Spanish Ph. of 1798 ; made of 29 parts each of aloes, olibanum gum, and mastic, 14 of colophony, and 1,725 of alcohol.—**Teinture d'a. et de myrrhe.** A preparation official in the Würzburg Ph. of 1796 ; made of 2 parts of hepatic aloes, 3 of myrrh, and 60 of alcohol. [L, 85.] See also *Tinctura* ALOES *et myrrhæ*, under ALOE.—**Teinture d'a. et de myrrhe safranée.** See *Tinctura* ALOES *composita*, under ALOE.—**Teinture d'a. et de réglisse.** A preparation official in the Batavian Ph. of 1805 ; made of 15 parts of aloes, 46 of extract of licorice, and 250 each of alcohol and water. [L, 85.]—**Teinture d'a. et de rhubarbe.** See *Tinctura* RHEI *et aloes*.—**Vin d'a.** See *Vinum* ALOES, under ALOE.

ALOESIN, n. A²l-o'e²s-i²n. Fr., *aloésine*. See ALOE-BITTER.

ALOESINIC ACID, n. A²l-o-e²s-i²n'i²k. Fr., *acide aloésinique*.

ALOE SOCOTRINA (Lat.), n. f. So-ko-tri(tre)'na³. Fr., *aloès socotrin*. Ger., *Socotrinische Aloe*. It., *aloe socotrino* (o *sucotrino*). Sp., *acibar sucotrino*, *áloes soccotrino*. 1. See ALOE *soccotorina*. 2. A variety of aloes procured from the ports on the Red Sea and East African coast. It is derived from unknown varieties of the *Aloe*. It is of a yellowish-brown color, with a dull conchoidal fracture, and when breathed upon emits an agreeable saffron-like odor, pleasanter than that of the other varieties. Ether dissolves from 4 to 5·5 per cent. of this variety. It formerly occurred in commerce in skins, but now is seen in kegs and tin-lined boxes. [L, 65, 78.] See also *Liquid Socotrine* ALOES.—**Extractum aloes socotrinæ** [Br. Ph.]. See *Extractum* ALOES *aquosum*, under ALOE.—**Pilula aloes socotrinæ** [Br. Ph.]. See *Pilulæ* ALOES, under ALOE.—**Vinum aloes socotrinæ.** See *Vinum* ALOES, under ALOE.

ALOES-WOOD, n. A²l'oz-wu⁴d. Fr., *bois d'aloès*. Ger., *Aloeholz*. Sp., *leño de áloes*. Syn. : *agallochum*, *calambac*, *sinkoo*. Ainslie and Martius make three varieties : 1. Agallochum, xylaloes, or calambak, derived from the *Alocxylum agallochum*, a heavy resinous wood rarely found in commerce, said to be odorless in the natural state, but to become fragrant from a diseased condition of the wood. 2. The lignum asphaltum officinale, lignum aspalathi, derived from the *Aquilaria malaccensis* [Lamarck], occurring in heavy, nodular, grayish-black pieces, of a fragrant odor and bitter taste. It is the kind most frequently found in commerce. 3. Lignum aquilariæ, l. aquilinum, l. agallochum spurium (Ger., *Adlerholz*) ; derived from the *Excœcaria agallocha* [Linnæus]. It has a greenish hue, is not very resinous, has a somewhat musky odor and an aromatic but not bitter taste. It is impossible to determine to which of these varieties the aloes-wood so much used formerly belongs. It was used as a perfume to flavor medicinal preparations, and for fumigations. [B, 180 ; L, 55, 78, 97.] The Chinese regard it as being tonic, stimulant, aphrodisiac, and diuretic, but it is chiefly used by them for incense. Good specimens should yield 48 per cent. of matter soluble in alcohol. [Stroud, " Brit. and Colon. Druggist," May 1, 1886, p. 279.]—**False A.-w.** See A.-w. (3d def.).

ALOETAMIDE, n. A²l-o-e²t'a²m-i²d. A substance of the composition $C_{17}H_9(NH_2)(NO_2)_2$, formed by the action of dilute ammoniacal gas upon aloetic acid. It is said to be darker in color and more soluble than chrysammide. [B, 140.]

ALOETIC, adj. A²l-o-e²t'i²k. Lat., *aloeticus*. Fr., *aloétique*. Ger., *aloëtisch*. It., *aloetico*. Sp., *aloético*. Derived from or containing aloes. As a n., a preparation containing aloes. [L, 30, 44, 50.]

ALOETIC ACID, n. Fr., *acide aloétique*. Ger., *Aloëtinsäure*. It., *acido aloetico*. Sp., *ácido aloético*. Syn. : *artificial bitter of aloes*. An orange-red, amorphous, solid acid of the composition $C_7H_2N_2O_5$, or more probably $C_{14}H_4N_4O_{10} = C_{14}H_4(N.O_2)_4O_2$, obtained by the decomposition of aloin with nitric acid. By the continued action of nitric acid a. a. is converted into chrysammic acid. [B, 2, 4.]

ALOETICA (Lat.), n. n. pl. A²l(a³l)-o-e²t'i²k-a³. Aloetic compounds. [L, 57.]

ALOETICAL, adj. A²l-o-e²t'i²k-a²l. See ALOETIC.

ALOETIN, n. A²l-o'e²t-i²n. Fr., *aloétine*. Ger., *Aloetin*. It., Sp., *aloetina*. A substance soluble in water, obtained by Robiquet from aloes ; it probably represents the active principle associated with various impurities. [B, 5 ; L, 44, 55, 78, 95.]

ALOETINIC ACID, n. A²l-o-e²t-i²n'i²k. Ger., *Aloëtinsäure*. See ALOETIC ACID.

ALOËTINCTUR (Ger.), n. A³l'o-e²-ti²nk-tur''. See *Tinctura* ALOES, under ALOE.—**Zusammengesetzte A.** See *Tinctura* ALOES *composita*, under ALOE.

ALOÉTINÉ (Fr.), n. A³-lo-a-te-na. Pertaining to the genus *Aloe* ; as a n. f. pl., *aloétinées*, a section of liliaceous plants. [A, 385.]

ALOEXYLON (Lat.), n. n. A²l(a³l)-o-e²x'i²l(u⁶l)-o²n. From ἀλόη, the aloe, and ξύλον, wood. 1. A genus of leguminous trees belonging to the suborder *Cæsalpiniæ*, established by Loureiro (the *Aloexylum* of Batsch). [B, 170, 180.] 2. Aloes-wood.—**A. agallochum** [Loureiro]. Syn. : *Cynometra agallocha* [Sprengel]. The only species ; a large tree growing in Cochin-China furnishing one variety of aloes-wood (*q. v.*). [B, 180.]

ALOEXYLUM (Lat.), n. n. A²l(a³l)-o-e²x'i²l(u⁶l)-u³m(u⁴m). See ALOEXYLON (1st def.).—**A. ovatum.** See AQUILARIA *ovata*.

ALOFEL, n. An alchemical name for a cloth used to cover a vessel. [L, 94.]

ALOGANDROMELIA (Lat.), n. f. A²l(a³l)-o-ga²n(ga³n)-drome(ma)'li²-a³. From ἄλογος, abnormal, ἀνήρ, a man, and μέλος, a limb. Fr., *alogandromélie*. It., Sp., *alogandromelia*. A fabled monstrosity having the body of a human being and the limbs of a lower animal. [D, 10 ; L, 44.]

ALOGAR, n. See ALOHAR.

ALOGETISCH (Ger.), adj. A³-lo²g-e²t'ish. See ALOGISCH.

ALOGHERMAPHRODITIA (Lat.), n. f. A²l(a³l)-o²g-hu⁶r-(he²r)-ma²f(ma³f)-ro-di²'shi²(ti²)-a³. From ἄλογος, abnormal, and ἑρμαφρόδιτος, an hermaphrodite. Fr., *aloghermaphroditie*. It., *alogermafrodismo*. Sp., *alogermafroditia*. Hermaphroditism. [D, 10, 90 ; L, 44.]

ALOGIA (Lat.), n. f. A²l(a³l)-o'ji²(gi²)-a³. From α priv., and λόγος, a word. Fr., *alogie*. Ger., *Alogie*. Syn. : *alogistia*. 1. Aphasia due to defective action of the intellect. [L, 45.] 2. Senselessness, nonsensical behavior. [D, 12.]

ALOGISCH (Ger.), adj. A³-lo²g'i²sh. Pertaining to or characterized by alogia. [L, 50.]

ALOGISTIA (Lat.), n. f. A^{2}l(a^{3}l)-o-ji^{2}s(gi^{2}s)′ti^2-a^3. From ἀλογιστία, thoughtlessness, rashness. See Alogia.

ALOGOS (Lat.), adj. A^{2}l(a^{3}l)′o-go^{2}s. From ἄλογος, irrational. Causeless or not understood. [Hippocrates (L, 94).]

ALOGOTROPHY, n. A^{2}l-o^{2}g-o^{2}t′ro-fi^2. Lat., *alogotrophia.* From ἄλογος, abnormal, and τροφή, nutrition. Fr., *alogotrophie.* Ger., *Alogotrophie.* It., Sp., *alogotrofia.* Irregular nutrition and resulting hypertrophy and altered shape of a part. [A, 301 ; D, 10, 77 ; L, 55.]

ALOGUS (Lat.), adj. A^{2}l(a^{3}l)′o-gu^{3}s(gu^{4}s). See Alogos.

ALOGY, n. A^{2}l′o-ji^2. See Alogia.

ALOHAR, ALOHOC, ALOHOSOC, n's. Alchemical names for quicksilver. [B, 50.]

ALOID, adj. A^{2}l′oid. Resembling the *Aloe* or aloes. [L, 63.]

ALOIDEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-o-i^{2}d′e^2-e(a^3-e^2). A section of liliaceous plants including *Agapanthes, Aletris, Aloe,* and other genera. [B, 170.]

ALOIDES (Lat.), n. m. A^{2}l(a^{3}l)-o-i(e)′dez(de^{2}s). See Stratiotes.

ALOIDOL, n. A^{2}l-oid-o^{2}l′. Fr., *aloïdol.* A compound extracted from aloes. [A, 385.]

ALOIN, n. A^{2}l′o-i^{2}n. Lat., *aloinum.* Fr., *aloïne.* Ger., *Aloïn.* It., Sp., *aloina.* Syn.: *bitter of aloes.* A glucoside contained in and probably constituting the active principle of aloes. There appear to be several principles of this sort derived from different varieties of aloes, and named *barbaloin,* $C_{17}H_{20}O_7$ (from Barbadoes aloes), *nataloin,* $C_{16}H_{18}O_7$ (from Natal aloes), *socaloin,* $C_{15}H_{16}O_7$ (from Socotrine aloes), and *zanaloin* (from Zanzibar aloes). These principles appear to form an homologous series, and are regarded as derivatives and probably partake of the nature of substituted phenols. A. is a yellowish crystalline substance, and is official in the Br. Ph. It is given in doses of from 1 to 2 grains and has the same effect as aloes, but is less griping. See Barbaloin, Nataloin, Socaloin, and Zanaloin. [B, 5, 81 ; L, 116.]

ALOINÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-o-i(e)′ne(na^3-e^2). A suborder of liliaceous plants made by Link, comprising *Agave, Aloe,* and one or two allied genera. [B, 170.]

ALOINEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-o-i^{2}n′e^2-e(a^3-e^2). Fr., *aloinées.* A suborder or section of liliaceous plants made by Endlicher, Lindley, and others, comprising *Aloe, Sanseviera, Yucca,* and other allied genera. [B, 170.]

ALOISINSÄURE (Ger.), n. A^{3}l-o-i^{2}s-en′zoi-re^2. A thick brownish-red liquid with a castor-like odor, formed by the action of chlorine-water on aloisol. [B, 196.]

ALOISOL, n. A^{2}l-o-i^{2}s-o^{2}l′. From *aloe,* and *oleum,* oil. An oily liquid obtained in very small quantities by distilling aloes with half its weight of quicklime. Rembold states that it is a mixture of xylenol with acetone and hydrocarbons. [A, 2 ; L, 78.]

ALOITES (Lat.), n. m. A^{2}l(a^{3}l)-o-i(e)′tez(te^{2}s). 1. See Aloe *gallica.* 2. A genus of fossil liliaceæ found only in tertiary deposits. [L, 63.]

ALOITINIC ACID, n. A^{2}l-o-i^{2}t-i^{2}n′i^{2}k. See Aloetic acid.

ALOJA (Sp.), n. A^3-lo′ha^3. A drink made of honey, spices, and water. [L, 99.]

ALOMANIA (Lat.), n. f. A^{2}l(a^{3}l)-o-ma(ma^3)′ni^2-a^3. From ἅλς, salt, and μανία, madness. Sp., *alomania.* A craving for salt. [L, 95.]

ALOMARTES (Sp.), n. A^3-lo-ma^{3}r′te^{2}s. A cold sulphurous spring in Spain. [A, 385.]

ALOMBA, n. See Acazdir.

ALOMIEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-o-mi(me)′e^2-e(a^3-e^2). From *Alomia,* one of the genera. A sub-tribe or division of composite plants, belonging to the *Eupatoriaceæ,* made by Lessing, De Candolle, and Lindley. [B, 170.]

ALONSENEL (Fr.), n. A^{3}l-o^{2}n^2-se^{2}n-e^{2}l. A popular name for the *Cowania stansburyana.* [A, 321.]

ALONSOA (Lat.), n. f. A^{2}l(a^{3}l)-o^{2}n′so-a^3. A genus of scrophulariaceous plants, one variety of which, growing in Peru, has anodyne and stomachic properties. [L, 67.]

ALOO (Hindúst.), n. The *Solanum tuberosum.* [B, 172.]

ALOOC, n. See Alhenot

ALOOIDEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-o-o-i^{2}d′e^2-e(a^3-e^2). A family of plants of the order *Campanales* established by Batsch, comprising *Agave, Aletris, Aloe,* and other genera. [B, 170.]

ALOPECES (Lat.), n. f. pl. A^{2}l(a^{3}l)-o^{2}p′e^{2}s(e^{2}k)-ez(e^{2}s). Pl. of *alopex* (Gr., ἀλώπηξ). An old term for the psoas muscles. [L, 94.]

ALOPECIA (Lat.), n. f. A^{2}l(a^{3}l)-o-pe(pa)′shi^2(ki^2)-a^3. From ἀλωπεκία, a disease like the mange in foxes. Fr., *alopécie.* Ger., *Alopecie, Kahlheit, Fuchsräude, Haarschwund.* It., *alopecia, calvezza.* Sp., *alopecia, calvez.* 1. Falling off of the hair from any part of the body (but more especially from the scalp or face) in sufficient quantity to produce marked thinning of the hair or baldness. 2. The baldness so produced. 3. The shedding of the hair of domestic animals. [A, 301.]—**A. accidentalis.** See *A. areata.*—**A. acquisita.** Fr., *alopécie acquise.* An acquired a. as opposed to one which is congenital. [L, 57.]—**A. adnata.** See *A. congenita.*—**A. area, A. areata.** Fr., *alopécie pseudo-tondante.* Syn.: *area Celsi.* A temporary, sometimes permanent, a. occurring usually in sharply defined patches of various shapes, situated on any of the hairy surfaces of the body, but most frequently on the scalp. The patches tend to extend at the periphery, and in rare cases the disease may result in the loss of all the hair upon the body. Aside from the loss of hair there are no symptoms. By some it is regarded as a trophoneurosis, by others as being due to the presence of a parasite, the *Microsporon Audouini,* or the *Microsporon* (or *Bacterium*) *decalvans.* [G.]—**A. circumscripta.** See *A. areata.*—**A. congenita.** Fr., *alopécie congénitale.* Congenital baldness. It may be permanent or the development of the hair may be simply delayed. The whole body may be affected (*a. universalis congenita*) or only circumscribed regions (*a. localis congenita*). [G.]—**A. eczematodes.** A. due to eczema of the scalp. [Pincus (G).]—**A. furfuracea.** See *A. pityrodes.*—**A. leprosorum.** An a. occurring as a symptom of leprosy. [G.]—**A. localis congenita.** See *A. congenita.*—**A. neuritica.** An a. due to neuritic atrophy. [G.] See *Neuritic* dermatoses.—**A. neurotica.** A. of neuropathic origin, due to affections of either the peripheral nerves or the nervous centres. [G.]—**A. normalis.** The baldness of old age or of infancy. [D, 90.]—**A. pityrodes.** An a. characterized by a gradual thinning of the hair, accompanied by a copious desquamation of sebaceous matter and epithelial scales. [G.]—**A. pityrodes capillitii.** An a. pityrodes of the scalp, usually beginning at the vertex or along the upper and central regions of the head. [G.]—**A. pityrodes universalis.** A severe and rapidly developing form of a. pityrodes affecting various regions of the scalp and also other hairy parts of the body. Upon the scalp it may resemble a. areata, but there is never complete baldness of the affected spots, and they are not sharply circumscribed, but merge gradually into the surrounding healthy regions. [G.]—**A. porriginosa.** See Alopécie *porrigineuse.*—**A. præmatura, A. præmatura idiopathica.** See *A. præsenilis.*—**A. præmatura symptomatica.** See *A. symptomatica.*—**A. præsenilis.** Baldness or thinning of the hair resembling a. senilis in its general character, but coming on at an earlier age. It is usually referred to an inherited tendency. [G.]—**A. rheumatica.** A. due to rheumatism. [G.]—**A. senilis.** Ger., *Glatze.* The falling off of the hair incident to advancing age and due to senile atrophy of the skin. It usually begins either at the forehead, temples, or vertex, and extends gradually at the periphery. [G.]—**A. simplex.** An a. resembling a. pityrodes in its appearance and course, but unattended with desquamation of the epithelium or any trouble with the sebaceous secretion. [G.]—**A. symptomatica.** Fr., *alopécie symptomatique.* Loss of hair due to disturbed nutrition of the skin, either general or local. [G.]—**A. syphilitica.** Fr., *alopécie syphilitique.* A form of a. due to syphilis, characterized by the falling off especially of the hair of the scalp and eyebrows and the eyelashes. It may or may not be associated with syphilitic cutaneous lesions. The hair loses its lustre, becomes brittle and atrophic, and is either thinned uniformly or, more frequently, in irregular patches, with entirely or partially bald spots scattered here and there. [G.]—**A. unguis, unguium.** See Onychoptosis.—**A. universalis.** An a. attacking all the hairy portions of the body. [D, 90.]—**A. universalis congenita.** See *A. congenita.*—**A. volatilium.** The moulting of birds. [D, 141.]—**Circumscribed a.** See *Alopécie par plaques.*—**Idiopathic a.** Fr., *alopécie idiopathique.* Baldness which is not of parasitic origin. [A, 385.]—**Idiopathic premature a.** See *A. præsenilis.*—**Neuritic a.** See *A. neuritica.*—**Neurotic a.** See *A. neurotica.*—**Syphilitic a.** See *A. syphilitica.*

ALOPECIATUS (Lat.), adj. A^{2}l(a^{3}l)-o-pe(pa)-shi^2(ki^2)-a(a^3)′-tu^{3}s(tu^{4}s). Affected with or characterized by alopecia. [L.]

ALOPÉCIE (Fr.), n. A^{3}l-o-pa-se. Alopecia due to accidental causes and including all forms except a. congenita and a. senilis. [G.]—**A. cachectique.** Alopecia due to general innutrition. [G.]—**A. de convalescence.** Alopecia following acute febrile affections. [G.]—**A. générale.** See Alopecia *universalis.*—**A. idiopathique.** See Alopecia *præsenilis.*—**A. naturelle.** A variety of alopecia including a. congenita and a. senilis. [Cazenave (G).]—**A. par plaques.** Alopecia affecting circumscribed areas ; a term employed by Sauvages to comprise ophiasis and a. porrigineuse. [G, 17.]—**A. porrigineuse.** Alopecia due to phtheiriasis. [G, 17.]—**A. pseudo-tondante.** See Alopecia *areata.*—**A. syphilitique, A. vénérienne.** See Alopecia *syphilitica.*

ALOPECIODES (Lat.), adj. A^{2}l(a^{3}l)-o-pe(pa)-si^2(ki^2)-o′dez(de^{2}s). For deriv., see Alopecia and *-oid.** Ger., *Fuchsräudenähnlich.* Resembling alopecia. [L, 50.]

ALOPÉCIQUE (Fr.), adj. A^{3}l-o-pa-sek. 1. Pertaining to alopecia 2. (N.) one affected with alopecia. [L, 41.]

ALOPECUREÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-o-pe^{2}k-u^2(u)′re^2-e(a^3-e^2). A division of graminaceous plants belonging to the series *Clisantheæ,* established by Fries, comprising *Alopecurus* and *Phleum.* [B, 170.]

ALOPECUROID, adj. A^{2}l-o-pe^{2}k′u^2-roid. Lat., *alopecuroides.* Fr., *alopécuroïde.* Ger., *fuchsschwanzähnlich.* Resembling the plant *Alopecurus.* [L, 41, 50, 51.]

ALOPECUROIDEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-o-pe^{2}k-u^2(u)-roi^{2}d′e^2-e(a^3-e^2). A tribe of graminaceous plants made by Koch, comprising *Alopecurus, Phleum,* and allied genera. [B, 170.]

ALOPECUROS, ALOPECURUS (Lat.), n's m. A^{2}l(a^{3}l)-o-pe^{2}k-u^2(u)′ro^{2}s, -ru^{3}s(ru^{4}s). Gr., ἀλωπέκουρος. Fr., *alopécure.* Ger., *Fuchsschwanzgras.* A genus of graminaceous plants established by Linnæus, equivalent to the *Cerdrosurus* of Ehrenberg. [B : L, 50, 58, 67.]—**A. agrestis.** Ger., *Ackerfuchsschwanz.* Field foxtail-grass. [A, 315.]

ALOPECY, n. A^{2}l′o-pe-si^2. See Alopecia.

ALOPEX (Lat.), n. f. A^{2}l(a^{3}l)-o′pe^{2}x. Gr., ἀλώπηξ. See Alopeces.

ALOPHANGINUS (Lat.), adj. A^{2}l(a^{3}l)-o-fa^{2}n(fa^{3}n)-ji(ge)′nu^{3}s(nu^{4}s). See Aloephanginus.

ALORA (Sp.), n. A^{3}l-o′ra^3. A village in Spain where there are sulphurous springs. [A, 385.]

ALORAP, n. See Alacap.

ALORCINIC ACID, n. A^{2}l-o^{2}r-si^{2}n′i^{2}k. Fr., *acide alorcinique.* Ger., *Alorcinsäure.* A crystalline acid of the composition $C_9H_{10}O_3 + H_2O$, produced by melting aloes with potash. [B, 4.]

ALOSA (Lat.), n. f. A^{2}l(a^{3}l)-o'sa^3. From *alausa*, the shad. Fr., *alose*. Ger., *Alose*. A genus of malacopterygious fishes of the herring family, including the shad and allied species. [L, 110.]—**A. menhaden.** The bony fish, mossbunker, menhaden. Its oil has been suggested as a substitute for cod-liver oil.—**Lapides alosæ.** The jaw-bones of the shad, formerly used as an aperient. [B, 180.]—**Stomachus alosæ.** The dried stomach of the shad, formerly used as a tonic. [B, 180.]

ALOSANTHI, n. An alchemical term for flos salis (*q. v.*). [Ruland (L, 94).]

ALOSAT, ALOSOHOC, ALOSOT, n's. See ALOHAR.

ALOTO, n. A Sandwich Island name for a species of *Euphorbia* the juice of which is used as an application to ulcers. [Waring (L, 63).]

ALOTTE, n. A Mexican name for the *Bixa orellana*. [L, 105.]

ALOUCHE (Fr.), n. A^{3}l-ush. The *Pyrus aria*. [L, 55.]

ALOUCHI, n. See ALUCHI.—**A'harz** (Ger.). See ALUCHI.

ALOUCHIER (Fr.), n. A^{3}l-u-shi^2-a. The *Pyrus aria*. [L.]

ALOUETTE (Fr.), n. A^3-lu-e^{2}t. The *Alauda arvensis*. [L.]

ALOUTCHA, n. A Crimean name for a variety of the tobacco plant supposed to be the *Nicotiana rustica*. [B, 121 ; L, 63.]

ALOYAU (Fr.), n. A^{3}l-wa^3-yo. See SIRLOIN.

ALOYSIA (Lat.), n. f. A^{2}l(a^{3}l)-o-i^{2}s(u^{6}s)'i^2-a^3. From Mary Louisa, a queen of Spain, in honor of whom it was named. Fr., *aloysie*. A genus of verbenaceous shrubs established by Ortega. [B, 180.]—**A. citriodora.** Fr., *verveine odorante*. Ger., *Punschpflanze*. It., *erba Luigia* (o *della Principessa*). Sp., *yerba Luisa* (*ó de la Princesa*). Syn.: *Verbena triphylla* [Heut.], *Lippia citriodora* [Kunth]. The lemon-verbena ; a South American species cultivated in Europe and the United States. The leaves have a strong, agreeable, lemon-like odor. [B, 180.]—**Folia aloysiæ** [Fr. Cod.]. The leaves of the *A. citriodora*; excitant, stomachic, and antispasmodic. [L, 77.]

ALOZET, n. An alchemical name for quicksilver. [Ruland (L, 94).]

ALP (Ger.), n. A^{3}lp. Nightmare. [D, 77.]

ALPAM (Malay), n. See BRAGANTIA *Waltichii*.

ALPAMATO, n. See PSIDIUM *thea*.

ALPBALDRIAN (Ger.), n. A^{3}lp'ba^{3}l-dri^2-a^{3}n. The root of *Valeriana celtica*, formerly official. [B, 180.]

ALPBALSAM (Ger.), n. A^{3}lp'ba^{3}l-za^{3}m. See RHODODENDRON.

ALPDRUCK, ALPDRÜCKEN (Ger.), n's. A^{3}lp'druk, -dru^{6}k-e^{2}n. 1. Nightmare. 2. Somnambulism. [D, 18, 77.]

ALPENA, n. A^{2}l-pe'na^3. A town in Michigan, on Thunder Bay, an inlet from Lake Huron, in which there is an artesian well 900 feet deep, the waters of which are remarkably rich in hydrogen sulphide, and contain also potassium, sodium, magnesium, iron, and calcium carbonates, sodium chloride, calcium sulphate, alumina, silica, carbon dioxide, and nitrogen. Temp., 52° F. The iron tube through which the water flows is highly magnetic, and this has given rise to a popular belief that the water itself is magnetic. [R. C. Kedzie, "Trans. of the State Med. Soc. of Michigan," 1871, p. 40 (A, 363).]

ALPENAMPFER (Ger.), n. A^{3}lp'e^{2}n-a^{3}mp-fe^{2}r. See RUMEX *alpinus*.

ALPENAUGENWURZ (Ger.), n. A^{3}lp'e^{2}n-a^3-ug-e^{2}n-vurtz. See ATHAMANTA *cretensis*.

ALPENBALDRIAN (Ger.), n. A^{3}lp'e^{2}n-ba^{3}l-dri^2-a^{3}n. See ALPBALDRIAN.

ALPENBALSAM (Ger.), n. A^{3}lp'e^{2}n-ba^{3}l-za^{3}m. See RHODODENDRON *arboreum*.

ALPENBÄRLAP (Ger.), n. A^{3}lp'e^{2}n-bar-la^{3}p. See LYCOPODIUM *alpinum*.

ALPENBÄRWURZ (Ger.), n. A^{3}lp'e^{2}n-bar-vurtz. See MEUM *mutellina*.

ALPENDOPPELBEERE (Ger.), n. A^{3}lp'e^{2}n-do^{2}p-pe^{2}l-bar-e^2. The *Lonicera alpigena*. [L.]

ALPENDOPPELBLUME (Ger.), n. A^{3}lp'e^{2}n-do^{2}p-pe^{2}l-blu-me^2. The *Atragene alpina*. [L.]

ALPENEBENHOLZ (Ger.), n. A^{3}lp'e^{2}n-a-be^{2}n-ho^{3}ltz. The *Cytisus alpinus*. [L.]

ALPENFRAUENMANTEL (Ger.), n. A^{3}lp'e^{2}n-fra^3-u-e^{2}n-ma^{3}nt-e^{2}l. See ALCHEMILLA *alpina*.

ALPENGLÖCKEN (Ger.), n. A^{3}lp'e^{2}n-glu^{5}k-e^{2}n. See SOLDANELLA *alpina*.

ALPENGRINDWURZ (Ger.), n. A^{3}lp'e^{2}n-gri^{2}nd-vurtz. See RUMEX *alpinus*.

ALPENHAHNENFUSS (Ger.), n. A^{3}lp'e^{2}n-ha^{3}n-e^{2}n-fus. See RANUNCULUS *alpestris*.

ALPENHECKENKIRSCHE (Ger.), n. A^{3}lp'e^{2}n-he^{2}k-e^{2}n-kersh-e^2. See LONICERA *alpigena*.

ALPENHELMKRAUT (Ger.), n. A^{3}lp'e^{2}n-he^{2}lm-kra^3-ut. See SCUTELLARIA *alpina*.

ALPENKLEE (Ger.), n. A^{3}lp'e^{2}n-kla. See TRIFOLIUM *alpinum*.

ALPENKNÖTERIG (Ger.), n. A^{3}lp'e^{2}n-knu^{5}t-e^{2}r-i^{2}g. See POLYGONUM *alpinum*.

ALPENKRAUT (Ger.), n. A^{3}lp'e^{2}n-kra^3-ut. See TURRITIS *alpina*.

ALPENLÄUSEKRAUT (Ger.), n. A^{3}lp'e^{2}n-loi-ze^2-kra^3-ut. See PEDICULARIS *reculeta*.

ALPENLIESCH, ALPENLIESCHGRAS (Ger.), n's. A^{3}lp'-e^{2}n-lesh, -lesh-gra^{3}s. See PHLEUM *alpinum*.

ALPENQUENDEL (Ger.), n. A^{3}lp'e^{2}n-kwe^{2}nd-e^{2}l. See THYMUS *alpinus*.

ALPENROSE (Ger.), n. A^{3}lp'e^{2}n-ro-ze^2. See RHODODENDRON.—**Baumartige A.** See RHODODENDRON *arboreum*.—**Dahurische A.** See RHODODENDRON *dahuricum*.—**Gelbblühende A.** See RHODODENDRON *chrysanthum*.—**Gewimperte A.** See RHODODENDRON *hirsutum*.—**Goldfarbige A.** See RHODODENDRON *chrysanthum*.—**Grösste A.** See RHODODENDRON *maximum*.—**Rostfarbige A.** See RHODODENDRON *ferrugineum*.

ALPENSALZ (Ger.), n. A^{3}lp'e^{2}n-za^{3}ltz. Glacier-salt. [A, 315.] See MAGNESIUM *sulphate*.

ALPENSEIDELBAST (Ger.), n. A^{3}lp'e^{2}n-zi-de^{2}l-ba^{3}st. See DAPHNE *alpina*.

ALPENSOCKENBLUME (Ger.), n. A^{3}lp'e^{2}n-zo^{2}k-e^{2}n-blum-e^2. See EPIMEDIUM *alpinum*.

ALPENSTICH (Ger.), n. A^{3}lp'e^{2}n-sti^{2}ch^2. An endemic pleurisy of a severe form, often accompanied by typhoid symptoms and ending fatally, observed in the Swiss Alps in 1771, and in some parts of North Germany in 1832-'33 ; attributed to the vernal south wind of the Alps. [A, 305.] See also ALPFLECKEN.

ALPENTASCHE (Ger.), n. A^{3}lp'e^{2}n-ta^{3}sh-e^2. See THLASPI *alpinum*.

ALPENTHYMIAN (Ger.), n. A^{3}lp'e^{2}n-tu^{6}m-i^2-a^{3}n. See THYMUS *alpinus*.

ALPENVEILCHEN (Ger.), n. A^{3}lp'e^{2}n-fil-ch^{2}e^{2}n. See CYCLAMEN *europæum*.

ALPENWEGERICH (Ger.), n. A^{3}lp'e^{2}n-ve^{2}g-e^{2}r-i^{2}ch^2. See LEONTODON *aureum*.

ALPENWINDRÖSCHEN (Ger.), n. A^{3}l'pe^{2}n-vi^{2}nd''ru^{6}s-ch^{2}e^{2}n. The *Anemone narcissiflorus*. [L, 30.]

ALPENWOHNEND (Ger.), adj. A^{3}lp'e^{2}n-von-e^{2}nd. See ALPINE.

ALPENZILAND (Ger.), n. A^{3}l'pe^{2}n-tze''la^{3}nd. The *Daphne alpina*. [L, 30.]

ALPESTRIS (Lat.), adj. A^{2}l(a^{3}l)-pe^{2}st'ri^{2}s. Fr., *alpestre*. Growing on mountains, below the snow line (said of plants). [B.] Cf. ALPINE.

ALPFLECKEN (Ger.), n. pl. A^{3}lp'fle^{2}k-e^{2}n. Blue spots (probably of a hæmorrhagic character) sometimes seen after an attack of *Alpenstich* (*q. v.*). [D, 12.]

ALPHA, n. A^{2}l'fa^3. Gr., ἄλφα. 1. The first letter of the Greek alphabet ; used in chemical notation (either spelled out or in the Greek form, α) to denote the first of a series of isomeric bodies. [B.] 2. In ophthalmology, see ANGLE *a*. 3. The fibre of the esparto grass. [L, 67.] For compound words beginning with a., see the major list.—**A. leucocytes.** See under LEUCOCYTE.

ALPHABETARIUS (Lat.), n. m. A^{2}l(a^{3}l)-fa^3-be^{2}t-a(a^3)'ri^2-u^{3}s-(u^{4}s). A botanist who arranges plants in the alphabetical order of their names. [Linnæus (L, 63).]

ALPHABETUM CHYMICUM (Lat.), n. n. A^{2}l(a^{3}l)-fa^3-be-(ba)'tu^{3}m(tu^{4}m) ki^{2}m(ch^{2}u^{6}m)'i^{2}k-u^{3}m(u^{4}m). The chemical alphabet ; a system devised by Raymond Lully, in which each letter of the alphabet had a symbolic meaning. [L, 84, 94.] See the List of Abbreviations.

ALPHENE, n. A^{2}l-fen'. A supposititious radicle, N_2H_4C. [B, 2.]—**A. sulphide.** See AMMONIUM *thiocyanate*.

ALPHENIC, ALPHENIK, ALPHENIS, ALPHENIX (Ar.), n's. Fr., *alphénic*. According to some, from the Arabic article *al*, and *phanac*, tender ; according to others, from *al*, and the Latin *penidius*, sugar. Fr., *alphénic*, *alphœnix*. Barley sugar. [L, 30, 41, 94, 102.]

ALPHENOLS, n. pl. A^{2}l-fe^{2}n-o^{2}lz'. From *alcohol* and *phenol*. A class of compounds which resemble both alcohols and phenols in their composition. [Grimaux (L, 63).]

ALPHESERA. See ALFESERA.

ALPHICUS (Lat.), n. m. A^{2}l(a^{3}l)'fi^{2}k-u^{3}s(u^{4}s). From ἀλφός, leprosy. A classical word supposed to have meant one who cured leprosy. [L, 58.]

ALPHITA (Lat.), n. n. pl. A^{2}l(a^{3}l)'fi^{2}t-a^3. 1. See ALPHITON. 2. Nux vomica. [A, 385.]

ALPHITEDON, ALPHITIDON, ALPHITIDUM (Lat.), n's n. A^{2}l(a^{3}l)-fi^{2}t-e(a)'do^{2}n, -fi^{2}t'i^{2}d-o^{2}n, -u^{3}m(u^{4}m). Really the Gr. adv. ἀλφιτηδόν, after the manner of meal ; a contraction of the phrase *fractura* ἀλφιτηδόν *facta*. Fr., *alphitédon*. An old term for a variety of fracture of the skull in which the bones are crushed into small fragments. [L, 50, 94.]

ALPHITOMANCY, n. A^{2}l-fi^{2}t'o-ma^{2}n-si^2. From ἄλφιτον, barley-meal, and μαντεία, divination. Divination by means of barley-meal. [A, 385.]

ALPHITOMORPHA (Lat.), n. f. A^{2}l(a^{3}l)-fi^{2}t-o-mo^{2}r'fa^3. From ἄλφιτον, meal, and μορφή, form. Fr., *alphitomorphe*. A botanical genus name used by Wallroth, equivalent to *Erysiphe*. [B, 153.]

ALPHITOMORPHÆÆ, ALPHITOMORPHEÆ (Lat.), n's f. pl. A^{2}l(a^{3}l)-fi^{2}t-o-mo^{2}rf-e'(a^3'e^2)-e(a^3-e^2), -mo^{2}rf'e^2-e(a^3-e^2). A family of hyphomycetous (sclerogastrous) *Fungi*, made by Cerda, comprising *Antennaria*, *Erysiphe*, and other genera. [B, 170.]

ALPHITOMORPHEI (Lat.), n. m. pl. A^{2}l(a^{3}l)-fi^{2}t-o-mo^{2}rf'e^2-i(e). A family of *Fungi*, made by Bonorden, belonging to the order *Sphæronemei*, comprising the genera *Antennaria*, *Eurotium*, and *Alphitomorpha*. [B, 170.]

ALPHITON, ALPHITUM (Lat.), n's n. A^{2}l(a^{3}l)′fi^{2}t-o^{2}n, -u^{3}m(u^{4}m). From ἄλφιτον, pearl-barley, barley meal. Meal made of roasted barley; used by the ancients as food and as a medicine. [L, 50.]

ALPHODEOPSORIASIS (Lat.), n. f. A^{2}l(a^{3}l)-fo-de^2-o so-ri^2-a(a^3)′si^{2}s. Gen., *alphodeopsoria′seos.* From ἀλφώδης, leprous, and ψωρίασις, psoriasis. An old name for psoriasis resembling leprosy. [L, 50.]

ALPHODERMIA (Lat.), n. f. A^{2}l(a^{3}l)-fo-du^{5}r(de^{2}r)′mi^2-a^3. From ἀλφός, white, and δέρμα, the skin. Fr., *alphodermie.* See Achromatosis.

ALPHODES (Lat.), adj. A^{2}l(a^{3}l)-fo′dez(de^{2}s). See Alphoid.

ALPHODIL (Ger.), n. A^{3}l′fo-del. See Asphodel.

ALPHOID, adj. A^{2}l′foid. From ἀλφώδης, leprous. Lat., *alphodes, alphoides, alphoideus.* Fr., *alphoïde.* Resembling alphus. [G; L, 50.]

ALPHONSIN, n. A^{2}l-fo^{2}n′zi^{2}n. See Alfonsin.

ALPHOS (Lat.), n. m. A^{2}l(a^{3}l)′fo^{2}s. From ἀλφός, white, or white leprosy. Fr., *alphos.* Ger., *Alphos.* It., *alfo, alfos.* Sp., *alfo.* 1. A variety of the vitiligo (*q. v.*) of Celsus. 2. According to Plenck, a species of lepra in which there arise white spots that are set in the skin ("cutem deprimentes"). Plenck describes two varieties: *Alphus simplex* and *Alphus leuce* (*q. v.*). 3. Psoriasis. [G, 11.] See also Alphus.

ALPHOSIS (Lat.), n. f. A^{2}l(a^{3}l) fo′si^{2}s. Gen., *alpho′seos.* 1. See Achromatosis. 2. Albinoism. [L, 83.]—**A. æthiopica.** See Albinism.—**Epichrosis a.** See under Epichrosis. [B.]

ALPHOUS, adj. A^{2}l′fu^{3}s. Pertaining to alphos. [G.]

ALPHUS (Lat.), n. m. A^{2}l(a^{3}l)′fu^{3}s(fu^{4}s). For deriv., see Alphos. 1. Alphos (*q. v.*). 2. In Fuchs's classification of skin diseases, the name of a variety of "scrofulous" pustular diseases of the skin attended with the formation of white crusts. [G, 5.]—**A. confertus.** A scrofulous form of impetigo, the lesions occurring in clusters and being attended with the formation of white crusts. [G, 5.]—**A. leuce.** Syn.: *vitiligo leuce* [Sauvages], *leuce* [Celsus]. Plenck's term for a cutaneous disease characterized by white spots that "penetrate the skin deeply." "The hairs are whitened, and if the affected place is rubbed it does not redden; if pricked, a milky water flows out." It probably is either morphœa or leuce. [G, 11.] See Vitiligo o*f Celsus.*—**A. simplex.** According to Plenck, a disease of the skin characterized by white patches which do not involve the hairs, travel from one part to another, and are attended with roughening of the skin (? psoriasis). [G.] Compare Vitiligo *a.* and Alphos.—**A. sparsus.** A scrofulous form of ecthyma disseminated over the body and attended with the formation of white crusts. [G, 5.]

ALPICUS (Lat.), adj. A^{2}l(a^{3}l)′pi^{2}k-u^{3}s(u^{4}s). Ger., *Alpisch.* See Alpine (1st def.).

ALPICOLUS (Lat.), adj. A^{2}l(a^{3}l)-pi^{2}k′o-lu^{3}s(lu^{4}s). From *Alpes,* the Alps, and *colere,* to inhabit. Fr., *alpicole.* See Alpine. [L, 116.]

ALPIGENUS (Lat.), adj. A^{2}l(a^{3}l)-pi^{2}j(pi^{2}g)′e^{2}n-u^{3}s(u^{4}s). Fr., *alpigène.* See Alpestris.

ALPINE, adj. A^{2}lp′i^{2}n(in). Lat., *alpinus.* Fr., *alpeste.* Ger., *alpenwohnend, alpisch.* It., *alpino.* 1. Pertaining to the Alps. 2. In botany and zoology, found in the region of perpetual snow on mountains. [B.]

ALPINIA (Lat.), n. f. A^{2}l(a^{3}l)-pi^{2}n′i^2-a^3. From *Alpinus,* an Italian botanist of the 16th century, in whose honor it was named. Fr., *alpinie.* A genus of plants of the natural order *Zingiberaceæ,* distinguished by the presence of thick aromatic rhizomes and flowers disposed in clusters. [B, 19.]—**A. alba.** See Amomum *medium.* [L, 87.]—**A. allughas.** Syn.: *Hellenia allughas* [Willdenow], *Mala inschikua.* An Indian species, made by Roscoe, furnishing a variety of galangal root. It is used externally as an anodyne and internally as an antidote to poisons, as an emmenagogue and provocative of the lochia, and in gout and calculous disorders. [B, 172, 180.]—**A. aromatica.** Syn.: *Paco-seroca minor, multicaulis.* A species described by Aublet as growing in Guiana, distinguished by its multiple stems. Its roots are carminative and stomachic. [B, 187.]—**A. calcarata.** A species closely resembling *A. khulinjan.* [B. 172.]—**A. cardamomum.** See Elettaria *cardamomum.*—**A. chinensis.** An Asiatic species of which *A. khulinjan* is regarded as a variety. [B, 172.]—**A. costata.** [Roxburgh]. See Elettaria *cardamomum medium.*—**A. exaltata** [Aley]. A British Guiana species, regarded by some as being the source of the Corowatti, or Khorowatti, root. [B.]—**A. galanga** [Swartz]. Syn.: *Maranta galanga* [Linnæus]. A species growing in India, furnishing the larger galangal root. It is from 6 to 7 feet high when in flower, with lanceolate, white, smooth, petiolate leaves and pale-green fragrant flowers in terminal panicles. [B, 33, 177.]—**A. khulinjan.** A variety growing in Madras. Its rhizome resembles the lesser galangal root, and is used as a carminative, stomachic, expectorant, and excitant, and for the relief of incontinence of urine. [B, 172.]—**A. media** [Sprengel]. See Elettaria *cardamomum medium.*—**A. nutans** [Roscoe]. A species resembling the *A. galanga,* which furnishes an inferior variety of galangal root. [B.]—**A. officinarum** [Hance]. A species growing in China, furnishing the ordinary galangal root of commerce. [B, 33.]—**A. odorata.** A variety growing in British Guiana, the leaves of which are applied by the natives to produce sweating. [L, 63.]—**A. paco-seroca.** See *A. aromatica.*—**A. pyramidata** [Blume]. A species resembling the *A. galanga.* [B.]—**A. racemosa** [Linnæus]. Paco-seroca. A species growing in Guiana and the West Indies, of which the root, flowers, and fruit have an aromatic odor and a pungent, bitter taste. The root is used as an application to malignant ulcers and cancers. [B, 180.]—**A. spicata** [Jacquin]. See Costus *spicatus.*—**A. tubulata.** See *A. exaltata.*

ALPINACEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-pi^{2}n-a(a^3)′se^2(ke^2)-e(a^3-e^2). A suborder of plants of the *Scitamineæ,* made by Link, equivalent to the *Zingiberaceæ* of Endlicher. [B.]

ALPINIÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-pi^{2}n′i^2-e(a^3-e^2). A division of zingiberaceous plants, made by Blume and Endlicher, comprising *Alpinia* and allied genera. [B, 170.]

ALPINIEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-pi^{2}n-i(e)′e^2-e(a^3-e^2). 1. See Alpiniæ. 2. A division of the *Zingiberaceæ,* including *Amomum, Zingiber,* and *Galanga.* [B, 170.]

ALPININ, n. A^{2}lp′i^{2}n-i^{2}n. From *Alpinia* (*q. v.*). One of the constituents, of the formula $C_{17}H_{12}O_6$, of the yellow coloring matter of the galanga rhizome. [B, 5.] See Kempherid.

ALPINUS (Lat.), adj. A^{2}l(a^{3}l)-pi(pe)′nu^{3}s(nu^{3}s). See Alpine.

ALPISCH (Ger.), adj. A^{3}lp′i^{2}sh. See Alpine.

ALPISTE (Fr.), n. A^{3}lp-est. See Phalaris *canariensis.*

ALPKRAUT (Ger.), n. A^{3}lp′kra^3-ut. See Solanum *nigrum.*—**Durchwachsenes A.** See *Herba* eupatorii *perfoliati.*

ALPMÄNNCHEN (Ger.), n. A^{3}lp′me^{2}n-ch^{2}e^{2}n. Nightmare. [A, 317.]

ALPMEHL (Ger.), n. A^{3}lp′mal. See Lycopodium.

ALPRANKEN (Ger.), n. A^{3}lp′ra^{3}n^{2}k-e^{2}n. See Solanum *dulcamara* and Viscum *album.*

ALPRAUCH (Ger.), n. A^{3}lp′ra^3-uch^2. See Fumaria *officinalis.*

ALPREADA (Port.), n. A^{3}l-pra-a^3′da^3. Cold sulphurous springs at Castello Branco, in the province of Beira, Portugal. [L, 105.]

ALPSCHOSS (Ger.), n. A^{3}lp′sho^{2}s. See Belemnites.

ALPWEIBCHEN (Ger.), n. A^{3}lp′vib-ch^{2}e^{2}n. Nightmare, [D, 60.]

ALPZOPF (Ger.), n. A^{3}lp′tzo^{2}pf. See Plica *polonica.*

ALQUEIDON (Sp.), n. A^{3}l-ka-e-don′. A ferruginous spring in Spain. [A, 385.]

ALQUEZAR (Sp.), n. A^{3}l-ka-th^{2}a^{3}r′. A cold sulphurous spring in Aragon, Spain. [A, 385.]

ALQUIFUZ (Ar.), n. Fr., *alquifoux.* A cosmetic preparation of some form of lead, used by women in the East to blacken the eyebrows. [L.]

ALQUITRANUM (Lat.), n. n. A^{2}l(a^{3}l)-kwi^{2}t-ra(ra^3)′nu^{3}m-(nu^{4}m). See Alchitran.

AL-RACHAS (Ar.), n. See Araxat.

ALRAMUDI, adj. An alchemical term signifying cineritious. [Ruland (L, 94).]

ALRATICA (Ar.), n. An imperforate condition of the vagina, either congenital or acquired. [Albucasis (L, 94).]

ALRAUN (Ger.), n. A^{3}l′ra^3-un. See Mandragora.—**A'kraut.** See Mandragora *officinalis.*—**A'wurzel.** See *Radix* mandragoræ *officinalis.*—**Wilder A.** See Allium *victoriale.*

ALRAUNCHEN, ALRAUNEN, ALRAUNMÄNNCHEN (Ger.), n's pl. A^{3}l′ra^3-un-ch^{2}e^{2}n, -e^{2}n, -me^{2}n-ch^{2}e^{2}n. The roots of the *Mandragora vernalis.* [B, 180.]

ALRUM, n. See Alzum.

ALSADAR (Ar.), n. A common name for the *Celtis.* [B, 121.]

ALSAFAT, ALSAFATUM (Ar.), n's. See Safat.

ALSAMACH, ALSAMECH (Ar.), n's. The meatus auditorius internus. [L, 94.]

ALSAM-KUMBONG, n. An Indian name for the *Mangifera indica.* [B, 121.]

ALSANDERS, n. A^{2}l-sa^{2}nd′u^{5}rz. See Alexanders.

ALSAPHAT, ALSAPHATUM (Ar.), n's. See Safat.

ALSASUA (Sp.), n. A^{3}l-sa′swa^3. Mineral springs in Spain, containing sodium chloride. [A, 385.]

ALSE (Ger.), n. A^{3}l′se^2. See Alosa.

ALSEBEERE (Ger.), n. A^{3}l′se^2-bar-e^2. See Elsebeere.

ALSEBRAN (Ar.), n. See Sempervivum *tectorum* and Euphorbia *cyparissias.*

ALSECH, n. See Alumen *plumosum.*

ALSEI (Ger.), n. A^{3}l′si. See Absinthium.

ALSELAT, n. An alchemical name for oxide of copper (æs ustum). [B, 50.]

ALSELEBETTI (Ar.), n. According to Avicenna, the best variety of ambergris; so called as coming from Selebet. [L, 94.]

ALSEN (Ger.), n. A^{3}l′se^{2}n. See Artemisia *absinthium.*

ALSENE, n. Fr., *alsène.* The common name at the Cape of Good Hope for the *Artemisia afra.* [A, 385; B, 121.]

ALSENECH (Ger.), n. A^{3}l′se^{2}n-e^{2}ch. See Selinum *palustre.*

ALSEODAPHNE (Lat.), n. f. A^{2}l(a^{3}l)-se^2-o-da^{2}f(da^{3}f)′ne(na). Gen., *alseodaph′nes.* A genus of lauraceous plants separated by Nees von Esenbeck from the genus *Ocotea,* distinguished by the limb of its perianth being deciduous. [B, 180.]—**A. amara** [Kostel]. Syn.: *Ocotea amara.* A Brazilian species, the bark of which is aromatic and is used as a stomachic tonic. [B, 180.]—**A. cujumary** [Kostel]. Syn.: *Ocotea cujumary.* A species growing on the Rio Negro, the seeds of which are used in gastric debility. [B, 180.]—**A. cymbarum** [Kostel]. Syn.: *Ocotea cymbarum.* A large tree growing on the Orinoco, with bitter aromatic bark and wood. It is said that native laurel oil (oleum lauri nativum), which is much used in arthritic affections, is obtained from the bark of this tree. [B, 180.]—**A. opifera** [Kostel]. Syn.: *Ocotea opifera.* A species

growing on the Rio Negro, from the bark of which is distilled a balsam used as an embrocation in rheumatism, etc. [B, 180.]

ALSI (Hind.), n. See LINUM *usitatissimum.*

ALSIDENA (Lat.), n. f. A^{2}l(a^{3}l)-si^{2}d-e(a)′na^3. A kind of onion mentioned by Pliny. [A, 318.]

ALSIDIUM (Lat.), n. n. A^{2}l(a^{3}l)-si^{2}d′i^2-u^{3}m(u^{4}m). From ἄλσος, a shady place, on account of the arboreous branching of its fronds. Fr., *alsidie.* 1. A genus of *Algæ*, established by Agardh, belonging to the order *Florideæ.* [B.] 2. See RHODOMELEÆ.—**A. Blodgettii.** A genus established by Haworth, growing on the coasts of North America, which has been used in consumption and scrofulous diseases. ["N. Y. Med. Times," 1856, p. 391 (B, 154).]—**A. corallinum.** A variety growing in the Mediterranean.—**A. helminthochorton** [Kützing], **A. helminthochortos** [Latour]. Ger., *Wurmmoss.* Syn.: *Fucus helminthochortos, Ceranium helminthochorton.* A species furnishing in part the helminthochorton, or Corsican moss. [B, 35.]

ALSIKE, n. See TRIFOLIUM *hybridum.*

ALSINACEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-si^{2}n-a(a^3)′se^2(ke^2)-e(a^3-e^2). 1. According to Wahlenberg, a division of the *Caryophylleæ*, comprising *Alsine, Elatine, Stellaria*, etc. 2. According to Fries, a family of the *Columnifloræ*, comprising the divisions *Alsineæ, Stellarieæ*, and *Lepigoneæ.* [B, 170.]

ALSINE (Lat.), n. f. A^{2}l(a^{3}l)′si^{2}n-e(a). Gen., *al′sines.* Gr., ἀλσίνη. Fr., *morgeline.* 1. A genus of caryophyllaceous plants established by Linnæus. 2. Of Dioscorides, the *Parietaria officinalis.* 3. In the middle ages, a term embracing a number of genera, such as *Alsine, Veronica*, and *Myosotis.* [B, 121, 170.]—**A. avicularum** [Lamarck]. See STELLARIA *media.*—**A. holostea glabra, folio gramineo, flore majore.** See STELLARIA *holostea.*—**A. media.** See STELLARIA *media.*—**A. pratensis, gramineo folio amplhore.** See STELLARIA *media.*—**A. umbellata.** See HOLOSTEUM *umbellatum.*—**A. vera glabra, floribus umbellatis albis.** See HOLOSTEUM *umbellatum.*—**A. vulgaris** [Mönch]. See STELLARIA *media.*—**Herba alsines.** See STELLARIA *media.*

ALSINEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-si^{2}n′e^2-e(a^3-e^2). Fr., *alsinées.* 1. According to De Candolle, Reichenbach, and Gray, an order, suborder, section, family, or tribe of caryophyllaceous plants, comprising *Alsine, Stellaria*, and other genera. In Lindley's system it is an order of the alliance *Silenales*, in Koch's an order of *Thalamifloræ*, in Endlicher's it comprises the tribes *Sabulineæ, Stellarineæ*, and *Sperguleæ.* 2. According to Fries, a division of the *Alsinaceæ*, comprising *Alsine* and other genera. 3. By Spach it is regarded as a family of the *Caryophyllineæ*, comprising a great number of genera. [B, 120.]

ALSINEFORMIS (Lat.), n. f. A^{2}l(a^{3}l)-si^{2}n-e^2-fo^{2}rm′i^{2}s. See MONTIA *fontana.*

ALSINES (Lat.), n. f., pl. of *alsine.* A family of plants, made by Adanson, comprising *Alsine* and many other genera. [B, 170.]

ALSIOSUS (Lat.), adj. A^{2}l(a^{3}l)-si^2-o′su^{3}s(su^{4}s). From *alsius*, chilly. Gr., δύσριγος. 1. Easily affected by cold. 2. Chilly by nature. [A, 312; L, 58.]

ALSIRACOSTUM (Ar.), n. From *al-seraka*, an evacuation. An ancient compound medicine, mentioned by Mesne, used in high fevers. [L, 94.]

ALSITAS, n. See CERUSSA.

ALSIUS (Lat.), adj. A^{2}l(a^{3}l)′si^2-u^{3}s(u^{4}s). See ALSIOSUS.

ALSO-ALAP, ALSO-BISZTRA (Hung.), n's. See under ALAP and BISZTRA.

ALSODEA (Lat.), n. f. A^{2}l(a^{3}l)-so-de(da)′a^3. See ALSODEIA.

ALSODEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-so-de(da)′e(a^3-e^2). From *Alsodea*, or *Alsodeia*, one of the genera. A tribe of violaceous plants established by Lindley. [B, 170.]

ALSODEIA (Lat.), n. f. A^{2}l(a^{3}l)-so-di′(da′-i^2)-a^3. From ἀλσώδης, growing in woods. A genus of violaceous plants established by Aubert. Those growing in Africa have emetic properties. [L, 67, 87.]

ALSODINÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-so-di(de)′ne(na^3-e^2). A section of violaceous plants, made by R. Brown, including 3 or 4 genera. [B, 170.]

ALSODINEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-so-di^{2}n′e^2-e(a^3-e^2). A tribe or division of violaceous plants, made by De Candolle and others. [B, 170.]

ALSO-ERZTERGALY, ALSO-KÉKEA (Hung.), n's. See under ERZTERGALY and KÉKEA.

ALSOPHILA (Lat.), n. f. A^{2}l(a^{3}l)-so^{2}f′i^{2}l-a^3. From ἄλσος, a shady place, and φιλεῖν, to love. 1. A genus of polypodiaceous ferns, made by R. Brown. 2. A genus of cyatheaceous ferns, made by Presl. This genus is distinguished by the absence of an indusium and by having only one sorus on each venule; some of its species attain the height of 80 feet. [B, 79, 170.]—**A. excelsa.** A variety growing on Norfolk Island, the white central portion of which is eaten by hogs. [B, 19.]—**A. lurida.** A species growing in China, furnishing paku-kedang, which is made up of the chaffy hairs, about 2 inches long, found at the bases of the fronds and stems. [B, 33.]

ALSOPHILACEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-so^{2}f-i^{2}l-a(a^3)′se^2-(ke^2)-e(a^3-e^2). An order of ferns, made by Presl, including *Alsophila* and other genera. [B, 170.]

ALSOPHILEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-so^{2}f-i^{2}l′e^2-e(a^3-e^2). A sub-tribe of cyatheaceous ferns, made by Fée, including *Alsophila.* [B, 170.]

ALSO-RONA, ALSO-SEBES, ALSO-TVAROSZCZA, ALSO-VACZA (Hung.), n's. See under RONA, SEBES, TVAROSZCZA, and VACZA.

ALSRÖSCHEN (Ger.), n. A^{3}lz′ru^{5}s-ch^{2}e^{2}n. See HELLEBORUS *niger.*

ALSTONAMINE, n. A^{4}l-sto^{2}n′a^{2}m-en. See ALSTONINE.

ALSTONIA (Lat.), n. f. A^{4}l-sto′ni^2-a^3. From Alston, a professor of botany in Edinburgh. Fr., *alstonie.* 1. The genus *Symplocos* of Linnæus. [B, 170.] 2. A genus of apocynaceous shrubs or trees, established by R. Brown, distinguished by the presence of a tuft of silky hairs at each end of the seed and by the absence of nectary scales. [B, 19.]—**A. bark.** See *Cortex alstoniæ.*—**A.-bitter.** A dark-yellow, amorphous, non-nitrogenous substance obtained from *A. constricta.* [B, 180.]—**A. constricta.** The Australian fever-tree; a species growing in Australia, said to furnish the principles alstonine and alstonicine. The bark is used in Australia as an adjuvant to quinine. [B, 8, 49.]—**A. scholaris** [R. Brown]. Syn.: *Echites scholaris* [Linnæus]. The devil-tree; a large tree growing in the East Indies, the bark of which is used in medicine. See *Cortex alstoniæ.* [B, 33, 95.]—**A. spectabilis** [R. Brown]. A species furnishing the Poelé-bark of Java. [L, 65.]—**A. theæformis.** See SYMPLOCOS *a.*—**A. venenata** [R. Brown]. An East Indian species having an acrid and poisonous milky juice. [B, 180.]—**Cortex alstoniæ.** Fr., *écorce de dite* [Fr. Cod.]. Dita bark, the bark of *A. scholaris*; official in the Fr. Cod. and the Ind. Ph., 1868. It occurs in flattened pieces about 6 inches long, with a warty, fissured surface, brownish in color, breaks with a splintery fracture, and is almost odorless, but has a bitter taste. It is used as a tonic and antiperiodic. [B, 95; L, 65.]

ALSTONICINE, n. A^{4}l-sto^{2}n′i^2-sen. An uncrystallizable alkaloid obtained by Oberlin and Schlagdenhauffen from *Alstonia constricta.* [B, 8.]

ALSTONIDINE, n. A^{4}l-sto^{2}n′i^2-den. An alkaloid extracted by Hesse from *Alstonia constricta*, soluble in ether, in chloroform, in alcohol, and in hot petroleum naphtha. Its solutions show a blue fluorescence. [L, 65.]

ALSTONIEÆ (Lat.), n. f. pl. A^{4}l-sto^{2}n-i(e)′e^2-e(a^3-e^2). Fr., *alstoniées.* A tribe of apocynaceous plants, according to G. Don, Endlicher, and De Candolle, comprising *Alstonia* and, according to the latter, *Adenium* also. [B, 170.]

ALSTONIN, n. A^{4}l′sto^{2}n-i^{2}n. A neutral bitter principle found by Palm in *Alstonia constricta.* [L, 65.]

ALSTONINE, n. A^{4}l′sto^{2}n-en. Syn.: *Chlorogenine.* A crystallizable alkaloid, $C_{21}H_{20}N_2O_4$, obtained by Oberlin and Schlagdenhauffen from *Alstonia constricta.* [B, 8.]

ALSTROEMEREÆ (Lat.), n. f. pl. A^{3}l-stru^{5}m-e(a)′re^2-e(a^3-e^2). An order of monocotyledonous plants, established by Salisbury, including the single genus *Vandesia.* [B, 170.]

ALSTROEMERIA (Lat.), n. f. A^{3}l-stru^{5}m-e(a)′ri^2-a^3. From Claudius Alströmerius, a Swede. Fr., *alstrœmère.* Syn.: *Ligtu* [Adanson]. A genus of herbs, established by Linnæus, belonging to the *Amaryllidaceæ*, having erect, leafy stems surmounted by umbels of flowers, with a 6-parted subcampanulate perianth, 6 stamens, a trifid stigma, and a 3-celled ovary with numerous horizontally disposed ovules. [B, 19.]—**A. curtisiana** [Meyer]. A Chilian species, used for the same purposes as *A. ligtu.* [B, 180.]—**A. edulis** [Tussac]. Fr., *pélégrine, topinambour* (ou *pélégrine comestible*) *des Antilles.* An edible variety growing at the Cape of Good Hope and in the West Indies. [B, 173, 186.]—**A. hookeriana** [Schultz]. See *A. curtisiana.*—**A. ligtu** [Linnæus]. A South American variety, having linear or linear-lanceolate leaves and beautiful reddish flowers. It furnishes the Talcahuana arrow-root. [B, 19.]—**A. pelegrina** [Linnæus], **A. peregrina** [Ruíz and Pavón]. Fr., *fleur de Saint Martin.* It., *fiore di San Martino.* Sp., *peregrina de Lima.* A variety growing on the coasts of Chili and Peru, resembling *A. ligtu.* [B, 180, 186.]—**A. pulchella** [Willdenow], **A. pulchra** [Sims]. A Chilian species, used for the same purposes as *A. ligtu.*—**A. salsilla** [Linnæus]. A species growing in Peru and Colombia. An infusion of the root is used in cutaneous diseases and as an alterative. [B, 180; L, 87.]—**A. tomentosa** [Ruíz and Pavón]. A Peruvian species having the same properties as *A. ligtu.* [B, 173.]

ALSTROEMERIACEÆ, ALSTROEMERIEÆ (Lat.), n's f. pl. A^{3}l-stru^{5}m-e^2-ri^2-a(a^3)′se^2(ke^2)-e(a^3-e^2), -i(e)′e^3-e(a^3-e^2). A tribe, division, or suborder of amyllidaceous plants in various systems of classification, including *Alstroemeria* and other genera. [B, 170.]

ALSTRÖMERIA (Lat.), n. f. See ALSTROEMERIA.

ALSTRÖMERIACEÆ (Lat.), n. f. pl. See ALSTROEMERIACEÆ.

ALSTRÖMERIÆ (Lat.), n. f. pl. See ALSTROEMEREÆ.

ALSURENGIAM (Ar.), n. See HERMODACTYLUS.

ALSUSTREL (Port.), n. A^{3}l-sus-tre^{2}l′. Cold saline springs at Ourique, in Portugal. [L, 105.]

ALTACH (Ar.), n. Alum.

ALTAFOR, n. An alchemical name for camphor. [Johnson (L, 94).]

ALTAMBUS, n. See LAPIS *rubeus.*

ALTAMIRANIUS (Lat.), adj. A^{2}l(a^{3}l)-ta^3-mi^2-ra(ra^3)′ni^2-u^{3}s-(u^{4}s). From *Altamira*, a Mexican village; a botanical species-name (e. g., *Ternstroemia altamiriana*).

ALTARE (It.), n. A^{3}l-ta^3′ra. A cold sulphurous spring in Piedmont. [A, 385.]

ALTARIS, n. An alchemical term for quicksilver. [B, 50.]

ALTAVIVA-IRPINA (It.), n. A^{3}l-ta^3-ve′va^3-er-pe′na^3. A place in Italy where there are sulphurous springs. [A. 385.]

ALTBAUM (Ger.), n. A^{3}lt′ba^3-um. See PRUNUS *padus.*

ALTDORF (Ger.), n. A^{3}lt′do^{2}rf. A health resort in Switzerland. [A, 385.]

ALTEA (It.), n. A^{3}l-ta'a^3. See ALTHÆA.—**Pasta d'a.** [Sard. Ph., 1853; Camp. Ph., 1823]. A preparation made by boiling 4 grammes of marsh-mallow root in 96 of water to 48 grammes, and, when cool, adding 4 of gum arabic, 24 of white sugar, the well-beaten whites of 12 eggs, and ½ gramme of aromatic water of orange flowers.—**Unguento d'a.** [Sard. Ph., 1853; Camp. Ph., 1823]. Made by mixing 12 parts each of decorticated marsh-mallow root and flaxseed with sufficient water to make a mucilage, adding 72 parts of purified lard, boiling to expel moisture, and adding 8 parts of rosin, 3 of turpentine, and 12 of yellow wax. [L, 68.]

ALTER (Ger.), n. A^{3}lt'e^{2}r. 1. Age. 2. An old man.—**A'satrophie.** Senile atrophy.—**A'sblödsinn.** Senile dementia.—**A'sdegeneration, A'sdegenerescenz.** Senile degeneration.—**A'smarasmus.** Senile marasmus.—**A'spflege.** The nursing and care of aged persons.—**A'sring.** See ARCUS *senilis*.—**A'sschwach.** Weak from old age. [D, 77.]—**A'sschwäche.** The weakness of old age. [D, 8.]—**A'sschwund.** Senile atrophy. [D, 60.]—**A'sspital.** An asylum for aged persons.—**A'sstaar.** Senile cataract.—**A'sveränderung.** A change or degeneration due to senility. [L, 57.]—**A'swarze.** See VERRUCA *senilis*.—**A'swerden.** Senilization. [D, 60.]—**A'szittern.** The tremor of the aged. [D, 60.]—**Angehendes A.** Early life. [D, 129.]—**Aeusserstes A.** Extreme old age. [D, 129.]—**Blühendes A.** Early life, youth. [D, 129.]—**Gesetztes A.** Mature life. [D, 129.]—**Gleiches A.** See HELICIA.—**Greises A.** Old age. [D, 129.]—**Hinfalliges A., Höchstes A., Hohes A.** Decrepit old age. [D, 129.]—**Jugendliches A.** Youth. [D, 129.]—**Kindliches A.** Infancy, childhood. [D, 129.]—**Mannbares A.** The age of puberty. [D, 129.]—**Mittleres A.** Middle life. [D, 129.]—**Munteres A.** See AGERASIA.—**Reifes A.** Mature age. [D, 129.]—**Sehr hohes A.** Extreme old age. [D, 129.]

ALTER, v. tr. and intr. A^{4}l'tu^{5}r. 1. To change. 2. To castrate. 3. To menstruate for the first time.

ALTERANT, adj. A^{4}l'tu^{5}r-a^{2}nt. Lat., *alterans*. Fr., *altérant*. Ger., *alterirend*. It., Sp., *alterante*. 1. Changing. 2. Causing thirst. [L, 55, 56.] For the substantive meaning, see ALTERATIVE, n.

ALTERANTIA (Lat.), n., n. pl. of adj. *alterans*. A^{2}l(a^{3}l)-tu^{5}r-(te^{2}r)-a^{2}n(a^{3}n)'shi^2(ti^2)-a^3. Alteratives. See ALTERATIVE.

ALTERATION, n. A^{4}l-tu^{5}r-a'shu^{3}n. Lat., *alteratio*. Fr., *altération*. Ger., *Umwandelung*. It., *alterazione*. Sp., *alteración*. 1. Change. 2. Castration. [L, 56.]

ALTÉRATION (Fr.), n. A^{3}l-ta-ra^3-shi^2-o^{2}n^2. 1. See ALTERATION. 2. Great thirst. 3. A change, more particularly an unfavorable one, which occurs in the expression of the countenance, in the structure of any organ, or in the nature of a fluid excreted. [A, 330.]

ALTERATIVE, adj. A^{4}l'tu^{5}r-a-ti^{2}v. Fr., *altératif*. See ALTERANT.

ALTERATIVE, n. A^{4}l'tu^{5}r-a-ti^{2}v. Lat., *alterans*. Fr., *altérant*. Ger., *alterirende* (oder *blutreinigende*) *Mittel*. It., Sp., *alterante*. A medicine which produces changes, especially favorable changes, in the system without appreciably changing the nature of its fluids or solids. [A, 257.]—**Renal a'.** Diuretics. [L.]

ALTERCUM (Lat.), n. n. A^{2}l(a^{3}l)-tu^{5}r(te^{2}r)'ku^{3}m(ku^{4}m). See HYOSCYAMUS.

ALTERIREND (Ger.), adj. A^{3}lt-e^{2}r-er'e^{2}nd. See ALTERANT.

ALTERNANCE (Fr.), n. A^{3}l-te^{2}rn-a^{3}ns. The state of being alternate, as contra-distinguished from opposed. [A, 385.]

ALTERNANS (Lat.), adj. A^{2}l(a^{3}l)-tu^{5}rn(te^{2}rn)'a^{2}nz(a^{3}ns). See ALTERNUS.

ALTERNANTHERA (Lat.), n. f. A^{2}l(a^{3}l)-tu^{5}rn(te^{2}rn)-a^{2}n-(a^{3}n)-the(tha)'ra. From *alternans*, alternate, and ἄνθος, an anther, having the anthers alternately fertile and sterile. A genus of amaranthaceous plants established by Forskål. [L, 64.]—**A. achyrantha** [De Candolle]. See ILLECEBRUM *achyrantha*.—**A. repens, A. sessilis, A. triandra.** See PARONYCHIA *sessilis*.

ALTERNARIEI (Lat.), n. m. pl. A^{2}l(a^{3}l)-tu^{5}rn(te^{2}rn)-a^3-ri(re)'-e^2-i(e). From *Alternaria*, one of the genera. A tribe of *Fungi* made by Léveillé. [B, 170.]

ALTERNATE, adj. A^{2}l-tu^{5}rn'at. Gr., ἀμοιβαῖος. Lat., *alternus* (from *alter*, another, a second one). Fr., *alterne*. Ger., *abwechselnd*. It., Sp., *alterno*. In botany, placed on opposite sides and at a different level (said of leaves, etc.). [B.]—**A. with.** Placed between the successive members of a series (said of stamens placed between the members of a row of petals). [B.]

ALTERNATING, adj. A^{2}l'tu^{5}rn-at-i^{2}ng. Fr., *alternant*. See *A. elective* AFFINITY.

ALTERNATI-PENNÉ (Fr.), adj. A^{3}l-te^{2}r-na^3-ti^2-pe^{2}n-na. See *Alternately* PINNATE.

ALTERNATIVE, adj. and n. A^{2}l-tu^{5}rn'a^{2}t-i^{2}v. Lat., *alternativus*. Fr., *alternatif*. Ger., *alternativ*. It., *alternativo*. A botanical term used to describe the arrangement of the parts of a flower in which each of the members of the outer of two concentric rows overlaps half of two members in the inner row. [B.]—**Voltaic a., Volta'sche A.** (Ger.). The alternate elements of a voltaic pile. [L, 57.]

ALTERNIPENNÉ (Fr.), adj. A^{3}l-te^{2}r-ni^2-pe^{2}n-na. See *Alternately* PINNATE.

ALTERNIPÉTALE (Fr.), adj. A^{3}l-te^{2}r-ni^2-pa-ta^{2}l. In botany, alternate with the petals (said of the stamens). [B.]

ALTERNUS (Lat.), adj. A^{2}l(a^{3}l)-tu^{5}rn(te^{2}rn)'u^{3}s(u^{4}s). See ALTERNATE.

ALTHÄA (Ger.), n. A^{3}l-ta'a^3. See ALTHÆA.

ALTHÆA (Lat.), n. f. A^{2}l(a^{3}l)-the'(tha^3'e^2)-a^3. Gr., ἀλθαία (from ἀλθεῖν, to heal). Fr., *althée*. Ger., *Althee*, *Althäa*. It., *altea*. Sp., *malvavisco*, *altea*. Syn.: *Malvaviscus*. 1. A genus of malvaceous herbs established by Linnæus, distinguished by having the base of the calyx enveloped in an involucel of from 6 to 9 bractlets, and one-seeded carpels. [B, 34.] 2. The official title in the U. S. Ph. of the root of *A. officinalis*. [L, 65.]—**A. ægyptica.** See ABELMOSCHUS *esculentus*.—**A. cannabina** [Linnæus]. A species growing in southern Europe, the ἀλθαία of Dioscorides, and the κάνναβις ἀγρία of others. It was formerly official as *A. officinalis*. [B, 180.]—**A. ficifolia.** Syn.: *Malvea arborea* [Blackwell]. According to Linnæus a Siberian, but according to Cavanilles an Oriental, species. [B, 173, 180.]—**A. frutex.** The *Hibiscus syriacus*. [L, 67.]—**A. hirsuta** [Linnæus], **A. hispida** [Mönch]. A French species resembling in its properties the *A. officinalis*. [B, 173.]—**A. narbonensis** [Jacquin]. A variety growing in southern France and in Spain, used for the same purposes as *A. officinalis*. [B, 173, 180.]—**A. officinalis.** Fr., *guimauve*. Ger., *Eibisch*, *eibische Malve*. Marsh-mallow. 1. A species made by Linnæus, occurring as a perennial herb growing on the borders of salt marshes in the New England States and Europe, and also as a cultivated plant. It has a stalk about 3 feet high, and bears numerous axillary or terminal large purple flowers and cordate-ovate leaves covered, like the stalk, with soft downy hairs. [B, 5; L, 50, 74.] 2. The *A. cannabina*. [B, 180.]—**A. pallida.** An Austrian species allied to *A. rosea* and used for the same purposes. [B, 180.]—**A. rosea.** Fr., *rose tremière*. Ger., *Rosenmalve*. Syn.: *Alcea rosea*. Hollyhock. A species established by Cavanilles, bearing variously colored axillary, sessile flowers and cordate rugous leaves. The flowers were official in a large number of old pharmacopœias, and were used as a substitute for those of *A. officinalis*. [B, 34; L, 74, 85.]—**A. sinensis.** A variety of *A. rosea*.—**A. taurinensis** [De Candolle]. A variety growing in southern Europe, closely resembling *A. officinalis*, of which by some it is regarded as a variety. The root is used for the same purposes as that of *A. officinalis*. [B, 180; L, 65.]—**Ceratum de a.** See *Unguentum flavum de a.*—**Decoctum althææ.** Fr., *décoction de guimauve*. Ger., *Althäendecoct*. It., *decotto di altea*. Sp., *cocimiento de altea*. A preparation official in many old pharmacopœias, made by boiling varying proportions of marsh-mallow root and water. [L, 85.]—**Decoctum althææ foliorum** [Belg. Ph.]. A preparation made by boiling 3 parts of the leaves of *A. officinalis* with sufficient water to make 100 parts after filtration. [L, 123.]—**Decoctum althææ radicis** [Belg. Ph.]. One part of marsh-mallow root boiled with sufficient water to make 20 parts after filtration. The Finnish Ph. orders enough to make 24 parts, and the Spanish enough to make 48 parts. [L, 23.]—**Emplastrum de a.** Fr., *emplâtre de guimauve*. It., *empiastro d'altea* [Sard. Ph., 1773]. Made by mixing 8 parts each of oil of chamomile, oil of white lilies, white wax, and goats' fat, 3 each of fowls' fat and calves' marrow, 4 of powdered marsh-mallow root, and 18 of diachylon plaster. [L, 85.]—**Flores althææ.** Fr., *fleurs de guimauve*. Ger., *Althäenblumen*. It., *fiori de altea*. Sp., *flores de malvavisco*. Syn.: *flores malvæ*. The flowers of the *Malva silvestris*. [B; L, 29, 65.]—**Flores althææ roseæ.** See *A. rosea*.—**Folia althææ, Herba althææ.** Fr., *feuilles de guimauve*. Ger., *Eibischblätter*. The leaves of *A. officinalis*. [L, 65.]—**Infusum althææ.** Fr., *infusion de racine de guimauve*. It., *infuso d'altea*. A preparation official in many pharmacopœias, made by infusing 1 part of marsh-mallow root in hot water and reducing to about 8 parts. [L, 85.]—**Mucilago althææ.** Fr., *mucilage de*

ALTHÆA OFFICINALIS. (AFTER DE LANESSAN.)

ALTHÆA OFFICINALIS.
Longitudinal section of the flower.
(After de Lanessan.)

guimauve. Ger., *Althäenschleim.* It., *mucillagine d'altea.* A preparation made by boiling 1 part of marsh-mallow root in 8 parts of water, and reducing to the proper consistence. Official in a number of pharmacopœias. [L, 68, 85.]—**Oleum althææ** [Sp. Ph., 1798]. Made by digesting for 3 or 4 days 1 part of marsh-mallow root in 3 parts of olive-oil, and boiling to expel moisture. [L. 85.]—**Onguent d'a.** [Fr. Cod.]. See *Unguentum flavum de a.*—**Pasta althææ.** See PASTA *gommosa* and *Pasta d'*ALTEA.—**Radix althææ.** Fr., *racine de guimauve.* Ger., *Althäenwurzel.* It., *radice di altea.* Sp., *raíz de malvavisco.* The root of *A. officinalis*, official in the U. S., Ger., and many other pharmacopœias. It occurs in cylindrical, somewhat tapering pieces, from 3 to 8 inches long and about ½ an inch in diameter, of a white color, with a faint aromatic odor and sweet mucilaginous taste. It is demulcent, and a decoction of it is used to allay irritation of the vagina and rectum. [L, 65, 78, 85.]—**Pulvis althææ.** See *Poudre de* GUIMAUVE.—**Species althææ** [Austr. Ph., 1869]. It., *specie d'altea.* A mixture of 20 parts of marsh-mallow leaves, 10 of the root, 2 of the flowers, and 5 of licorice root. [L, 68.]—**Syrupus althææ.** Fr., *sirop de guimauve.* Ger., *Eibischsyrup.* It., *siroppo d'altea.* Sp., *jarabe de malvavisco.* Syn.: *syrupus de radice althϾ* [Fr. Cod.]. A preparation made, according to the U. S. Ph., by infusing 4 parts of marsh-mallow root in water, adding 60 of sugar, and water sufficient to make 100. The formula of the Ger. Ph. is the same, with the addition of 1 part of alcohol. The Fr. Cod. orders 2 parts of the root to be extracted with 12 of water, 60 of syrup added, and the whole reduced by heat to a specific gravity of 1·26. The Gr. Ph., 1837, and the Hamburg Cod., 1835, order 18 parts of boiling water and 1 part of marsh-mallow root to be infused and filtered, 24 parts of sugar added, and the whole reduced to the proper consistence. The Polish Ph., 1817, and the Turin Ph., 1833, order 1 part of the root and 6 parts of cold water to be infused for 12 hours, and, after straining, 32 parts of syrup added. Used principally as a basis of pectoral remedies. [B; L, 65, 68, 85.]—**Syrupus althææ compositus.** Fr., *sirop de guimauve composé.* A preparation official in a large number of pharmacopœias. The Dan. Ph., 1805, and the Sp. Ph., 1798, order 9 parts of marsh-mallow root and 216 of water, to be reduced by boiling to one third, and, near the end of the boiling, 9 of licorice added, and, after filtration, 216 of sugar. The Amst. Ph., 1798, orders 37 parts of marsh-mallow root and 738 of water, to be reduced to one third by boiling, near the end of the boiling, 6 of licorice and 9 of the *herba capilli Veneris* added, and, after filtration, 443 parts of sugar. The Sard. Ph., 1773, orders 111 parts each of marsh-mallow and saxifrage roots, 130 of *Parietaria officinalis*, and 3,320 of water, to be reduced by one quarter by boiling, after filtration 1,328 of sugar added, and the whole evaporated to the proper consistence. The Würtem. Ph., 1798, orders 11 parts each of the roots of marsh-mallow, *Triticum repens*, asparagus, and licorice, and of the herbs of marsh-mallow, *Parietaria officinalis*, saxifrage, plantain, and black and white maidenhair, 15 of dry raisins, 30 of chick peas, and 1,440 of water, to be reduced by boiling to 840, and 1,440 of suga added. The Bruns. Dispensatorium, 1777, omits from this last formula the chick peas. The Palat. Dispen., 1764, orders the same ingredients, in slightly varying proportions, as the Würt. Ph., and adds 11 parts each of the greater and lesser cold seeds. [L, 85.]—**Syrupus de radice althææ** [Fr. Cod.]. See *Syrupus althϾ.*—**Tabellæ althææ.** See *Trochisci althϾ.*—**Tabellæ cum radice althææ** [Fr. Cod.]. Fr., *tablettes de guimauve* [Fr. Cod.]. A preparation made of 2 parts of powdered marsh-mallow root, 20 of powdered sugar, and 1 part of gum-arabic mucilage. Each tablet should contain 1 gramme. See also *Trochisci althϾ.* [L, 79, 85.]—**Trochisci althææ.** Fr., *tablettes* (ou *pastilles*) *de guimauve.* Ger., *Althäentäfelchen.* It., *tavolette d'altea.* Sp., *pastillas de malvavisco.* The Austr. Ph., 1869, orders 10 parts of marsh-mallow root, 100 of white sugar, 1 part of orange flowers, and sufficient gum arabic to make into a mass. The Fr. Cod., 1837, the Sard. Ph., 1773, and the Turin Ph., 1833, order 1 part of powdered marsh-mallow root, 7 parts of white sugar, and sufficient gum-arabic mucilage to make a mass. The Parm. Ph., 1823, and the Russ. Ph., 1803, order 15 parts of marsh-mallow root, 4 of Florentine iris root, 240 of sugar, and sufficient gum-tragacanth mucilage to make a mass. See also *Tabellæ cum radice althϾ* [L. 29, 30, 68, 85].—**Trochisci althææ compositi.** See *Trochisci althϾ.*—**Unguentum althææ** [Dan. Ph., 1868]. Fr., *onguent de guimauve.* Ger., *Althäensalbe.* It., *unguento d'altea.* A preparation made by evaporating a mixture of 2 parts of marsh-mallow root, 1 part each of turmeric, flaxseed, and fenugreek, and 70 parts of water to the proper consistence, and adding 44 parts of lard and 6 of yellow wax. [L, 68.]—**Unguentum citrinum de a., Unguentum flavum de a.** Fr., *onguent d'a.* A preparation official in many old pharmacopœias, made by mixing marsh-mallow root and turmeric with a variety of fatty matters and wax. It is of little value. [L, 85.]

ALTHÆINE, n. A^{2}l-the'i^{2}n. Ger., *Althäin.* See ASPARAGINE.

ALTHÄENBLUMEN (Ger.), n. pl. A^{3}l-ta'e^{2}n-blum-e^{2}n. See *Flores* ALTHÆÆ.

ALTHÄENDECOCT (Ger.), n. A^{3}l-ta'e^{2}n-da-ko^{2}kt''. See *Decoctum* ALTHÆÆ.

ALTHÄENPASTA (Ger.), n. A^{3}l-ta'e^{2}n-pa^{3}st-a^{3}. See *Pasta* ALTHÆÆ.

ALTHÄENSALBE (Ger.), n. A^{3}l-ta'e^{2}n-za^{3}lb-e^{2}. See *Unguentum* ALTHÆÆ.

ALTHÄENSCHLEIM (Ger.), n. A^{3}l-ta'e^{2}n-sh'lim. See *Mucilago* ALTHÆÆ.

ALTHÄENSYRUP (Ger.), n. A^{3}l-ta'e^{2}n-ze-rup''. See *Syrupus* ALTHÆÆ.

ALTHÄENTÄFELCHEN (Ger.), n. pl. A^{3}l-ta'e^{2}n-ta-fe^{2}l-ch^{2}e^{2}n. See *Trochischi* ALTHÆÆ.

ALTHÄENWURZEL (Ger.), n. A^{3}l-ta'e^{2}n-vurt-ze^{2}l. See *Radix* ALTHÆÆ.

ALTHÄENZUCKER (Ger.), n. A^{3}l-ta'e^{2}n-tzuk-e^{2}r. See *Pasta* ALTHÆÆ.

ALT-HAIDE (Ger.), n. A^{3}lt'ha^{3}-e-de^{2}. An alkaline-carbonated chalybeate spring, near Glatz, Prussia. [L, 57.]

ALTHANACA, ALTHANACHA, n's. Old terms for orpiment. [L, 85.]

ALTHEA (Lat.), n. f. A^{2}l(a^{3}l)-the(tha)'a^{3}. See ALTHÆA.

ALTHEBEGIUM (Ar.), n. Avicenna's term for a puffy swelling attributed to a morbid state of the liver and "an ill habit of the body." [L, 94.]

ALTHEBEN (Ar.), n. See PANNUS *oculi.*

ALTHEE (Ger.), **ALTHÉE** (Fr.), n's. A^{3}l-ta'. See ALTHÆA.

ALTHEINE, n. A^{2}l-the'i^{2}n. See ASPARAGINE.

ALTHESTERIUS (Lat.), adj. A^{2}l(a^{3}l)-the^{2}s-te(ta)'ri^{2}-u^{3}s(u^{4}s). From ἀλθηστήριος, healing, vulnerary. In the neut. pl., *althesteria*, vulneraries. [L, 50.]

ALTHEUS (Lat.), n. m. A^{2}l(a^{3}l)'thu^{2}s. Gen., *al'theos.* Gr., ἀλθεύς. A physician or surgeon. [L, 50.]

ALTHEXIS (Lat.), n. f. A^{2}l(a^{3}l)-the^{2}x'i^{2}s. Gen., *althex'eos* (*-is*). Gr., ἄλθεξις. Healing, cure. [L, 50.]

ALTHINGIA (Lat.), n. f. A^{2}l(a^{3}l)-thi^{2}n(thi^{2}n^{2})'ji^{2}(gi^{2})-a^{3}. See ALTINGIA.

ALTHIONATE, n. A^{2}l-thi'o^{2}n-at. Fr., *althionate.* Ger., *Althionsalz.* A salt of althionic acid. [L, 46.]

ALTHIONIC ACID, n. A^{2}l-thi^{2}-o^{2}n'i^{2}k. From *alcohol*, and θεῖον, sulphur. Fr., *acide althionique.* Ger., *Althionsäure.* An acid isomeric with sulphovinic acid, of the formula $C_2H_6SO_4$, formed by distilling a mixture of alcohol and sulphuric acid until it becomes black and frothy. [B, 118.]

ALTHOS (Lat.), n. n. A^{2}l(a^{3}l)'tho^{2}s. Gen., *al'theos.* Gr., ἄλθος. A healing agent, a vulnerary. [L, 50.]

ALTIFOLIUS (Lat.), adj. A^{2}l(a^{3}l)-ti^{2}-fo'li^{2}-u^{3}s(u^{4}s). From *altus*, high, and *folium*, a leaf. Having high leaves. Used as a botanical species-name (e. g., *Helleborus a.*).

ALTIGALEATUS (Lat.), adj. A^{2}l(a^{3}l)-ti^{2}-ga^{2}l(ga^{3}l)-e^{2}-a(a^{3})'-tu^{3}s(tu^{4}s). From *altus*, high, and *galeatus*, covered with a helmet. Having a high hood. Used as a botanical species-name (e. g., *Aconitum altigaleatum*).

ALTIHIT, ALTIHT (Ar.), n's. 1. A name given by Avicenna to the *Laserpitium* of the ancients. [L, 94.] 2. Asafœtida. [L, 116.] 3. The white gentian. [L, 84.]

ALTILIBAT, n. See ALBOTIM.

ALTIMAR, n. An alchemical term for æs ustum. [B, 50.]

ALTIMIO, n. An alchemical term for the scoria of lead. [Ruland (L, 94).]

ALTINCAR, n. An old term used by Lebavius for a factitious salt employed in the purgation and separation of metals. [L, 94.]

ALTINGAR, ALTINGAT, n's. See *Flos* ÆRIS, under ÆS.

ALTINGIA (Lat.), n. f. A^{2}l(a^{3}l)-ti^{2}n(ti^{2}n^{2})'ji^{2}(gi^{2})-a^{3}. Fr., *althingie.* 1. A botanical genus, now referred to *Liquidambar.* [B.] 2. A genus of plants belonging to the *Eutassa* of Salisbury. [L, 30.]—**A. cærulea, A. excelsa.** See LIQUIDAMBAR *altingiana.*

ALTINGIACEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-ti^{2}n(ti^{2}n^{2})-ji^{2}(gi^{2})-a-(a^{3})'se^{2}(ke^{2})-e(a^{3}-e^{2}). From *Altingia*, one of the genera. 1. A family of plants established by Hayne, including *Altingia* and *Liquidambar.* 2. A division of plants established by Reichenbach, comprising the single genus *Platanus.* 3. An order of the amental alliance established by Lindley, comprising *Liquidambar* only; trees nearly related to the plane-trees and willows, from which they differ in having seed-vessels with two distinct cells instead of one, and seeds with broad membranous wings. [B, 170; L, 67.]

ALTINGIEÆ (Lat.), n. f. pl. A^{2}l(a^{3}l)-ti^{2}n(ti^{2}n^{2})-ji(ge)'e^{2}-e(a^{3}-e^{2}). In Gardner's system, a tribe of the *Hamamelideæ*, comprising *Altingia* and other genera. [B, 170.]

ALTINURAUM, n. An alchemical term for vitriol. [Ruland (L, 94).]

ALTISSIMUS (Lat.), adj. A^{2}l(a^{3}l)-ti^{2}s'si^{2}m-u^{3}s(u^{4}s). As a botanical species name, highest (e. g., *Lactuca altissima*).

ALTMANNSKRAUT (Ger.), n. A^{3}lt'ma^{3}ns-kra^{3}-ut. See SENECIO and ERIGERON.

ALTRIX (Lat.). n. f. A^{2}l(a^{3}l)'tri^{2}x. Gen., *altri'cis.* From *alere*, to nourish. A foster-mother, a wet-nurse. [A, 318.]

ALTSCHADENWASSER (Ger.), n. A^{3}lt'sha^{3}d-e^{2}n-va^{3}s-ze^{2}r. See *Lotio* HYDRARGYRI *flava.*

ALT-SOHL, ALT-TURA (Ger.), n's. A^{3}lt'zol, -tu-ra^{3}. See under SOHL and TURA.

ALTWASSER (Ger.), n. A^{3}lt'va^{3}s-ze^{2}r. A warm carbonated chalybeate spring in Silesia. [L, 49.]

ALTWURZEL (Ger.), n. A^{3}lt'vurtz-e^{2}l. See *Radix* INULÆ *helenii.*

ALUACH, n. An alchemical name for refined tin. [Ruland (L, 94).]

ALUBO (Ceylonese), n. See ALLUBO.

ALUCHI, n. Ger., *Alouchiharz.* A sweet-scented phosphorescent resin obtained from a tree called *fimbi* in Madagascar, and used for the same purposes as tacamahac. According to some this tree is the *Cannella alba*, according to others the *Wintera aromatica.* [B, 180; L, 105, 107.]

ALUCINATIO (Lat.), n. f. A^{2}l(a^{3}l)-u^{2}(u)-si^{2}n(ki^{2}n)-a(a^{3})'shi^{2}-(ti^{2})-o. Gen., *alucinatio'nis.* See HALLUCINATION.

ALUCO, n. A nocturnal bird of prey mentioned by Bellonius and others, the dried blood of which was formerly used in asthma. [L, 94.]

AL-UD (Ar.), n. See AGALLOCHUM.

ALUDEL, n. A²l'u²-de²l. Ger., *Sublimirgefäss.* A pear-shaped earthen vessel, open at each end, formerly used by chemists for subliming. [B, 2.]

ALUDIT, n. An alchemical term for mercury. [Ruland (L, 94).]

ALUECH, n. See ALUACH.

ALUFIR, n. An old term for redness. [Ruland (L, 94).]

ALUINE (Fr.), n. A³-lu⁶-en. See ARTEMISIA *abrotanum.*

ALULA (Lat.), n. f. A²l(a³l)'u²(u)-la³. Dim. of *ala,* a wing. Ger., *Afterflügel.* Syn.: *ala spuria.* A bastard wing; a bundle of feathers attached to the carpal joint in some birds. [B, 7.]

ALULET, n. A²l-u²-le²t'. A membranous structure found in some insects, not absolutely connected with the anterior wing, but to be regarded as an adjunct to it. [M'Lachlan (L, 121).]
